Less than three weeks after the sinking of the *Raccoon*, *U-165* experienced the same fate. The German submarine *U-165* had been commissioned in early February 1942, commanded by Captain Eberhard Hoffman. It carried out only a single war patrol, beginning with its departure from Kiel, Germany on August 7, 1942. It sailed across the North Atlantic, making its first two strikes off the northern tip of Newfoundland on August 28, 1942 (damaging an American merchant vessel and an American oiler). Just over a week later, *U-165* sank the *Aeas* and the *Raccoon* in the St. Lawrence River. By mid-September, it began its return voyage across the Atlantic. On September 27, 1942, on its 52nd day at sea, *U-165* was sunk in the Bay of Biscay by depth charges from an RAF #311 Squadron Wellington aircraft. All 51 hands aboard *U-165* were lost.

McCALLUM, Albert Robert (#J/7070)

Albert Robert McCallum had planned to have a career in aviation after the war, so it was only logical that he enlisted to become a pilot with the RCAF. He had recently been promoted to Flight Lieutenant when his crew left in turbulent weather during the daytime on an anti-submarine patrol south-west of the Scilly Islands in the Atlantic. The plane managed to send one SOS, but it was never seen again.

Albert McCallum was born in Parry Sound, Ontario, on January 29, 1919, the only son of Gordon and Johanna (Joan) Katherine (nee Morrison) McCallum. Gordon McCallum (born in Dunchurch, Ontario) married Joan Morrison (born in Orville, Ontario) on January 6, 1918. Gordon and Joan had two children together: a son, Albert, and a daughter Margaret Dorothy McCallum, born in 1921. Gordon worked in Sarnia as a fireman with the C.N.R. The McCallums lived at 555 Confederation Street in Sarnia.

Albert attended Confederation Public Elementary School in Sarnia from 1925 to 1932. He then moved to Parry Sound where he completed his high school education in 1937 at the age of eighteen. Albert was active in sports, especially hockey, swimming and softball, along with rugby, tennis, badminton and bowling. Alfred was not afraid to be busy. After completing high school, he had several jobs: a Junior Clerk at Canadian Bank of Commerce in Parry Sound (1937-1938); a ledger-keeper in Seaforth (1938-1940); and a teller in Dublin, Ontario. He was an assistant Scoutmaster for one year ending in March 1940, and also served in the Middlesex and Huron Regiment NPMA (Non-Permanent Active Militia) "D" Company as a Private from July 29 to November 14, 1940 in Seaforth, Ontario.

When he was twenty-one, Albert McCallum enlisted with the Royal Canadian Air Force on November 15, 1940 in London, Ontario. He stood five feet eight inches tall, had blue eyes and brown hair, was single, and recorded his address as Dublin, Ontario (where he was employed as a bank teller), and his permanent address as 555 Confederation Street, Sarnia (where his parents were living). He requested flying duties with a preference to be a pilot. His plan for after the war was to enter the field of aviation. His training was extensive.

From #1 Auxillary Manning Depot in Picton, Ontario, Albert received his air training at #2 Service Flying Training School (SFTS) in Uplands, Ontario; at #3 Initial Training School (ITS) in Victoriaville, Quebec; at #1 Elementary Flying Training School (EFTS) in Malton; and at #5 Service Flying Training School (SFTS) in

Brantford, Ontario. Sergeant-Pilot Albert McCallum was awarded his Pilot's Flying Badge and "Wings" on September 1, 1941 at SFTS Brantford, along with two other Sarnians: Sergeant-Pilot Wesley K. McDermid and Sergeant-Observer Howard Fraser Thompson (Thompson is included in this Project). On September 5, 1941, Albert continued his training at #31 General Reconnaissance School (GRS) in Charlottetown, P.E.I., and in late November 1941, was posted to #31 Operational Training Unit in Debert, Nova Scotia.

F/L-Pilot Albert Robert McCallum

Albert embarked overseas for the United Kingdom on March 29, 1942. He was one of the first group of Canadians to ferry Hudson aircraft to England. He was initially posted to #3 Personnel Reception Centre. On April 11, 1942, he was transferred to RAF #119 Squadron where he continued his training in the spring and summer of 1942 at Loch Erne, Northern Ireland, on Catalina flying boats. In mid-August 1942, he returned to Canada on a two-week furlough at his home in Sarnia, spending it with family and friends. At the end of the month, he returned to the U.K. and #119 Squadron. In October of 1942, his parents in Sarnia received news of their son Albert's promotion from Pilot Officer to Flying Officer.

No. 119 Squadron was part of **RAF Coastal Command**. Coastal Command played a pivotal role in the Allied war effort, most notably against U-boats during the Battle of the Atlantic. They also sank enemy warships and merchant vessels, protected Allied shipping from aerial attacks, and carried out reconnaissance and air-sea rescues.

RAF #119 Squadron "By night and by day" began as a flying boat squadron that used civilian aircraft for maritime patrols from March to November 1941. The squadron reformed as an operational unit at RAF Lough Erne, Northern Ireland on April 14, 1942, originally operating the Consolidated Catalina. The first aircraft arrived in May, and in August eleven crews went to Canada to ferry new aircraft across the Atlantic. The last of these aircraft arrived in mid-September 1942 but, by then, the squadron was based at RAF Pembroke Dock and was preparing to convert to the Short Sunderland Mk. II and IIIs (a British flying boat patrol bomber). As part of Coastal Command, Sunderland patrols began on November 20, but only continued for approximately five months before disbanding in mid-April 1943. The squadron formed again in mid-July 1944 as a torpedo-bomber squadron that attacked German E-boats and R-boats.

On December 14, 1942, Albert was promoted to Flight Lieutenant-Pilot. The next day, he was with the #119 Squadron as the Pilot aboard Sunderland Mark III DV971 aircraft. The crew of eleven on board were on a day anti-submarine patrol over the Atlantic Ocean. At approximately 12.15 hours, an SOS was received from the aircraft giving their position as south-west of the Scilly Islands (an archipelago off the southwestern tip of the Cornish peninsula of Great Britain). Nothing else was heard from the aircraft and it failed to return. Sea conditions at the time were reported to be rough. An extensive search failed to locate the aircraft or dinghies. It was assumed that the crew lost their lives at sea. Perishing with Flight Lieutenant-Pilot Albert Robert McCallum were F/Sgt.s Raymond Ingham Law, Bliss Dunfield King, and William George Milne (all RCAF); F/O. E.N. Jackson (RNZAF, a passenger); and Cpl. H.R. Watkinson, F/Sgt. G. Hamilton, Sgt.'s A.G.E. Wilson, T.C. Gallagher, A.G. Shum and G.S. Crossan (all RAF).

The day after Albert's plane failed to return, Gordon and Joan McCallum in Sarnia received a telegram informing them that their son Albert was, MISSING AFTER AIR OPERATIONS OVERSEAS. On December 18, 1942, the McCallum's received the following letter from the Commanding Officer of #119 Squadron, RAF, Home Forces:

Dear Mrs. McCallum,

Before receiving this letter you will have been informed by telegram that your son Flight Lieutenant Albert Robert McCallum is reported missing while engaged on active operations against the enemy.

The aircraft took off at dawn on an overseas reconnaissance and failed to return. A sustained and determined air search has not been successful.

It is with deep regret and a very real sense of personal loss that I convey this news to you. "Bob", as he was affectionately known to all of us was one of the best aircraft Captains in the Squadron. His ability, good humour and unfailing sense of duty was an inspiration to all ranks. His loss is a very severe blow to the Squadron as a whole and myself in particular. In view of his excellent work he had been very recently promoted to the rank of Flight Lieutenant which he had well earned. His steadiness and reliability made him one of the main supports of the Squadron. There is a possibility, and I am still hoping, that he may have been picked up by a small vessel or fishing boat, if so the news will be immediately conveyed to you.

Your son's effects have been carefully collected together and forwarded to the Royal Air Force Depository, where they will be held until better news is obtained or for a period of six months, after which they will be sent to you.

The whole Squadron, very many of whom are Canadians, and myself as Commanding Officer, offer you our very sincere sympathy during this period of anxiety. If I can be of any assistance please let me know and I will do my best to help I any way possible.

In late December 1942, the McCallums received a letter from their son, dated December 14, 1942 in which he stated, *The weather has been bad but we expect to be out tomorrow to see some action.*

In September 1943, Albert Robert McCallum was officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas.* Six months after the war ended in Europe, in November 1945, the McCallums received a War Service Gratuity of \$350.55 for the loss of their only son. In July 1946, the McCallums, now residing in Palmerston, Ontario, received the following letter from R.C.A.F. Records Officer in Ottawa:

Dear Mrs. McCallum:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son Flight Lieutenant A.R. McCallum. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

Albert McCallum, 23, has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom, Panel 99.

McCLURE, Donald Leonard (#A/103300)

Donald Leonard McClure, 22, had planned to return to his family and to his job at Holmes Foundry after the war. During the intense fighting of the Battle of Sicily in 1943, an enemy shell hit Donald's tank and perforated his abdomen. Despite receiving immediate medical attention, he passed away the same day and became the first Sarnian to die in the Battle of Sicily.

Donald was born in Euphemia Township in Lambton County, Ontario on March 23, 1921, the middle son of William Alexander (born in Brooke Township, Lambton County) and Edna Isabella (nee Bissell) McClure, of 249 Cromwell Street, Sarnia. It was Edna's second marriage. She had married Victor Iverson in 1914, but he passed away in February 1916. They had had one child together, a son Edward Leland Iverson, born in Oil Springs on February 5, 1916 (he was the grandson of Oil Baron Edward Iverson, 1846-1918). Widowed Edna Iverson married William Alexander McClure on January 14, 1919. William and Edna had three sons together: Donald Leonard; John William Alexander 'Jack' (born March 6, 1922); and James Kenneth (born May 15, 1920, see below). Along with Edward Leland Iverson, their half-brother, the three McClure boys grew up with Edna at 249 Cromwell Street. Sadly, when Donald was only five months old, his father William, a local Sarnia grocer, died of heart disease on August 27, 1921 at Sarnia General Hospital at the age of 35.

The McClure boys never shied away from doing their duty. At the time of Donald's death in 1943, his brother John William 'Jack' was residing in Sarnia; his half-brother Edward was in Detroit with the U.S. Navy (he would be stationed in Pensacola, Florida, but was never allowed to serve overseas); and his brother James was in the Canadian Army stationed on the east coast. John 'Jack' McClure also served in the war, but was sent home after his two brothers were killed in action.

Donald McClure attended Central United Church and was educated at Sarnia public schools and at Sarnia Collegiate which he attended for three years, until he was sixteen. During his high school days, he was a member of the rifle team. Upon graduating from a technical course in machine shop, he was first employed at Goodison Threshing Company and then at Holmes Foundry as a core-maker for two years prior to enlisting.

On May 10, 1941, Donald McClure, 20, married Ethel Mamie McClure in Sarnia. They initially resided at 249 Cromwell Street (with his mother), and later 264 Cameron Street, Sarnia. 1942 was a year of change for both Donald and Ethel. Just over a year after getting married, in June 1942, Donald enlisted in the Canadian Army. Four months later, on October 16, the young couple had one child together, but their son that was born stillborn. It must have been a horrible time for the young couple.

Donald McClure, 21, enlisted in the Canadian Army on June 15, 1942 in London, Ontario. He stood five feet nine and a quarter inches tall, had blue eyes and fair hair, and was residing with his wife Ethel and his mother at 249 Cromwell Street at the time. His plan for after the war was to return to Holmes Foundry. From #1 District Depot in London, Donald received his army training at #10 Basic Training Centre (BTC) in Kitchener and then at #A8 Canadian Armoured Corps (Advanced) Training Centre (CACATC) at Camp Borden. On November 17, 1942, he was granted his two-week embarkation leave.

On December 12, 1942, Trooper Donald McClure embarked overseas for the United Kingdom. Initially a member of #2 Canadian Armoured Corps Reinforcement Unit (CACRU), he continued his training in England and later Scotland. During his training, he attained qualifications as a Driver in charge (carrier), and a Driver in charge Class III (tank). On May 20, 1943, Donald was transferred to the 12th Canadian Army Tank (CAT) Regiment.

Trooper Donald Leonard McClure

Almost one year to the day after enlisting in the Army, on June 16, 1943, Donald embarked from the U.K. bound for Sicily. At some point, Donald wrote home, his letter included descriptions of Gibraltar and Algiers, which he had visited en route to Sicily. Trooper Donald McClure, as a member of the 12th Canadian Tank Corps of the Three Rivers Regiment, Royal Canadian Armoured Corps (R.C.A.C.), took part in the initial invasion force of Sicily on July 10, 1943. Donald, the co-driver of a tank, was part of a five-man tank crew.

The **Italian Campaign**, the first sustained Canadian Army operation of the War, began with the invasion of Sicily on July 10, 1943. **Sicily** was a mountainous island and, for the Italian and German forces there, the interior was a defensive planner's dream. For the Canadians, as they marched up Sicily island's dusty mountainous winding roads, in scorching temperatures above 40 degrees Celsius, their designated route had them fated to run into major

concentrations of German troops offering an ever-stiffening resistance, while holding the high ground in a series of lines. The fierce fighting on the island lasted more than four weeks, and by August 17, the Germans had evacuated the island to the Italian mainland. In early September, Canadian and Allied forces would invade Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl lasting 20 months.

Three weeks into the Sicily battle, Donald's tank was hit by enemy fire on July 30, 1943. Donald suffered a mortar wound that perforated his lower abdomen and, despite being administered plasma and blood and being operated on by an Army surgeon, he died as a result of his wounds at approximately 0245 hours on July 30. Of his other crew members, the other driver of the tank was killed instantly, two were wounded and one member escaped injury. Donald's remains were buried on July 31, 1943, at a location recorded on the Army Field Service Card as "East side of Olive Orchard near Leonforte MR.348925". Donald McClure was the first Sarnia fatality in the Sicilian campaign.

On Cameron Street, Ethel McClure received a telegram in mid-August from the Director of Records. It informed her that her husband of two years, TROOPER MCCLURE HAD BEEN OFFICIALLY REPORTED DIED OF WOUNDS ON A DATE NOT YET AVAILABLE. It added that further word would be forwarded when received. In mid-September 1943, Ethel received the following letter from the Major-General, Adjutant-General:

Dear Madam:

I deeply regret to inform you that your husband, A103300 Trooper Donald Leonard McClure, gave his life in the Service of his Country in Sicily on the 30th day of July, 1943

From official information we have received, your husband died as the result of wounds received in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Donald McClure was later officially recorded as, *Overseas casualty, died of wounds received in action, in the field (Sicily)*. In mid-October 1944, Ethel received another letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

No. A.103300, Trooper Donald L. McClure

Dear Madam:

With reference to the regretted death of your husband, the marginally named Canadian soldier, I am to advise that information has recently been received from overseas that his remains have been reburied in grave 486, row G, plot D, of the new Canadian Military Cemetery at Agira, Sicily. This is a recognized military burial ground.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. For obvious reasons it cannot now be stated when this work of permanent commemoration will begin, but you may rest assured that before it is carried out you will be communicated with and given an opportunity of selecting a short personal inscription for engraving upon the memorial...

In May 1945, Ethel, now residing in Acton, Ontario, received a War Service Gratuity of \$184.64 for the loss of her husband Donald. Donald McClure, 22, is buried at Agira Canadian War Cemetery, Sicily, Grave D.G.486. On his headstone are inscribed the words, UNTIL THE DAY BREAK AND THE SHADOWS FLEE AWAY. For Donald's twice-widowed mother Edna in Sarnia, a little over one year later, she would lose a second son, James, who was killed in Italy.

SOURCES: A, B, C, D, E, F, G, J, L, N, S, 2C, 2D, 7C, 8X, 8Y

McCLURE, James Kenneth (#A/28723)

In December 1944, James (Jim) Kenneth McClure, 24, was killed during the Italian Campaign. His death greatly affected his family in Sarnia. His mother, Edna, was overwhelmed, for James was her second son killed in the war; and his wife, Norma, was eight months pregnant with their only child, a daughter, that her husband would never see.

James was born in Norville, near Toronto on May 15, 1920, the eldest son of William Alexander (born in Brooke Township, Lambton County, Ontario) and Edna Isabella (nee Bissell) McClure, of 215 ½ North Christina Street, and later 249 Cromwell Street, Sarnia. It was Edna's second marriage. She had married Victor Ivinson in 1914, but he passed away in February 1916. They had had one child together, a son Edward Leland Ivinson, born in

Oil Springs on February 5, 1916 (he was the grandson of Oil Baron Edward Ivinson, 1846-1918). Widowed Edna Ivinson married William Alexander McClure on January 14, 1919. William and Edna had three sons together: James; John William Alexander 'Jack' (born March 6, 1922); and Donald Leonard (born March 23, 1921, see above). Along with Edward Leland Ivinson, their half-brother, the three McClure boys grew up with Edna at 249 Cromwell Street. Sadly, when James was only fifteen months old, his father William, a local Sarnia grocer, died of heart disease on August 27, 1921 at Sarnia General Hospital at the age of 35.

The McClure boys never shied away from doing their duty. At the time of James' death in 1944, his brother John William 'Jack' was residing in Sarnia; his half-brother Edward was in Detroit with the U.S. Navy (he would be stationed in Pensacola, Florida, but was never allowed to serve overseas); and his brother, Donald, a member of the Canadian Army, had been killed in action in the Battle of Sicily the previous year. John 'Jack' McClure also served in the war, but was sent home after his two brothers were killed in action.

James McClure was educated at a Sarnia public school from which he graduated in 1935. He then attended Sarnia Collegiate for only two months and left school at the age fifteen. James (Jim) was very interested in farming, so after leaving high school, he spent five years working on a farm. His responsibilities included managing a farm of 200 cleared acres over a two-year period. Following that, he was a seaman with Canada Steamship Lines and sailed for one season (8 months) on the *S.S. Huronic*.

James McClure, 21, enlisted in the Canadian Army on January 13, 1942 in London, Ontario. He stood five feet seven and three-quarter inches tall, had blue eyes and dark brown hair, and was single. He recorded his occupation as "labourer", and was residing with his mother on North Christina Street at the time. His plan for after the war was to return to farming. From #1 District Depot in London, and then #1 District Depot (Active Force) in Windsor, James received his army training as a Gunner at #10 Basic Training Centre (BTC) in Windsor and later at the Advanced Canadian Army Training Centre (CATC) at Petawawa until May 1942.

On May 2, 1942, James McClure, now nearly 22, married Miss Norma Louise Gehm, the daughter of Mr. and Mrs. H.C. Gehm, in a quiet ceremony at the military chapel at Camp Petawawa. The couple were attended by Gunner Sidney Morr, R.C.A. and Gunner Lloyd Illman, R.C.A. After their marriage, James returned to service and Norma resided in Watford for a short time, before moving to Sarnia to live with her mother-in-law, Edna McClure, at 249 Cromwell Street.

After his marriage, James was transferred to Debert, Nova Scotia, where he became a member of the 30th Anti-Aircraft Battery (30 LAA), Royal Canadian Artillery. In January 1943, while still a member of 30LAA, he was posted to Goose Bay, Labrador. Part of this unit's role was to guard the airport in Labrador while it was under construction. In July 1943, James was posted to St. John, New Brunswick, as a member of #22 Anti-Aircraft Regiment, Royal Canadian Artillery. During his time in St. John, James learned that his younger brother Donald, a member of the Canadian Tanks Corps, had been killed in action during the Battle of Sicily in late July of 1943.

Private James Kenneth McClure

It was during this time that the army was short in Infantry Reserves. Due to this shortage, in February 1944, Gunner James McClure transferred to the infantry and reverted to Private. He attended #12 Canadian Infantry Basic Training Centre (CIBTC) in Chatham, Ontario in mid-February, and the following month continued his training at A-29 Canadian Infantry Training Centre (CICTC) at Camp Ipperwash. In late May 1944, he was transferred to #1 Transit Camp in Windsor, Nova Scotia.

Private James McClure embarked overseas for the United Kingdom on June 4, 1944. Initially posted to #2 Canadian Infantry Reinforcement Unit (CIRU) and then #3CIRU, James became a month later a member of the Perth Regiment, Royal Canadian Infantry Corps (RCIC), of the Central Mediterranean Force (CMF). On July 16, 1944, a little more than one month after arriving overseas, James McClure embarked from the U.K. bound for Italy.

The **Italian Campaign**, the first sustained Canadian Army operation of the War, had begun with the invasion of Sicily on July 10, 1943. His brother Donald had been killed on July 30 in Sicily. The fierce fighting on the island would last more than four weeks, during which the Canadians would advance through difficult mountainous terrain, against an ever-stiffening German resistance. By August 17, the Germans had evacuated the island to the Italian mainland. In early September, Canadian and Allied forces would invade Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl, lasting 20 months, over a range of landscapes, through challenging weather, and against a series of well-protected defences held by some of the German army's best troops.

James McClure served with the Perth Regiment as they advanced northward through Italy. On December 13, 1944, fewer than five months after arriving in Italy, Private James McClure was killed in action while fighting during the Italian Campaign. His remains were buried on December 14 at a location recorded on the Army Field Service Card as "5 C.A.D. Cemetery No 11. sh.89/III. NW MR. 452418 Gr.A10".

In late December 1944, Captain A.J. Goldring of Military District No. 1 Headquarters, London arrived at 249 Cromwell Street. Living there were James' mother, Edna, and her daughter-in-law Norma, who was James' wife and who was eight months pregnant. Captain Goldring informed the two women that James had been killed in action while serving in Italy. It must have been an extremely painful time for everyone. Norma had lost her husband who would never see their child and Edna had lost her second son in war.

As for Captain Goldring, he must have known how difficult it was to be the bearer of such horrible news. According to the District Chaplain's report to the Director of Records in Ottawa, this is what occurred at the visit to Edna and Norma: *Captain Goldring proceeded on to Sarnia and located Mrs. McClure (Norma) at the address given. She received the sad news of her husband's death bravely and calmly, but the mother of Pte. McClure was somewhat overcome as this was the second son killed in action during the present conflict. Mrs. McClure is expecting her child some time in January, and it is presumed that she will be remaining at the Sarnia address.*

In early January 1945, Edna wrote a letter to the Department of National Defence, Director of Records in Ottawa. In it, she requested information about her fallen son Donald (see above) and the fate of her other son James. Following is a portion of that letter:

Dear Sir

.... I am writing to ask that any further information you receive (about Donald's gravestone) you will kindly notify me if that is in order. Don was living at home here with me & his younger brother (James) & his wife was also here of course when he enlisted and this was his only home so I feel that I am entitled to know anything that can be learned about his grave. Also I am concerned about my older son Pte. James K. McClure A28723 who was reported killed in action in Italy Dec 13/44. His wife at present is here with me and is expecting to go to Petrolia hospital almost any time now so if possible will you kindly inform us here of any information you may receive regarding his death. It is now over a month and we have not heard any more than that he was killed in action.... Hoping for further information soon and thanking you...

In mid-January 1945, Norma received the following letter from the Major-General, Adjutant-General:

Dear Mrs. McClure:

It was with deep regret that I learned of the death of your husband, A28723 Private James Kenneth McClure, who gave his life in the Service of his Country in the Mediterranean Theatre of War on the 13th day of December, 1944.

From official information we have received, your husband was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

James McClure was later officially recorded as, *Overseas casualty, killed in action, in the field (Italy)*. In mid-June 1945, a month after the war in Europe ended, the Colonel, Director of Records, for Adjutant-General wrote the following letter to Norma:

Dear Madam:

Information has now been received from the overseas military authorities that your husband, A28723 Private James Kenneth McClure, was buried with religious rites in grave A10, of a temporary Cemetery located at Villanova, approximately eight miles North-West of Ravenna, Italy.

The grave will have been temporarily marked with a wooden cross for identification purposes and in due course the remains will be reverently exhumed and removed to a recognized military burial ground when the concentration of graves in the area takes place. On this being completed the new location will be advised to you, but for obvious reasons it will likely take approximately one year before this information is received.

In late August 1945, Norma received another letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Madam:

Information has just been received from overseas that the remains of your husband, A28723 Private James Kenneth McClure, have been buried in grave 10, row A, plot 7, of 5th Canadian Armoured Division Cemetery, Villanova, seven miles West of Ravenna, Italy. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

In December 1945, more than one year after James' death, Edna McClure wrote the following letter to the Officer of Records, Department of National Defence:

Dear Sir

Would you kindly let me have a card of sympathy from the Can. Gov. like the one you sent Jim's wife. I received one relating to my other son Tpr. Donald McClure but so far have not received one regarding Pte. James K. McClure A-28723 killed in action Dec. 13/45. I would like to have the two to put together. Hoping this is not out of order. I am gratefully yours.

Edna I. McClure (mother)

James McClure, 24, is buried in Villanova Canadian War Cemetery, Italy, Grave VII.A.10. On his headstone are inscribed the words, UNTIL THE DAY BREAK AND THE SHADOWS FLEE AWAY.

Two months after James' death, on February 13, 1945, Norma gave birth to their daughter, Carol Louise, born in the C.E.E. Hospital in Petrolia. The baby was baptized in Central United Church, the same church where a memorial service was held for Private James McClure when Carol Louise was two months old.

Eight months later, in October 1945, Norma received a War Service Gratuity of \$342.33 for the loss of her husband. For James' twice-widowed mother Edna in Sarnia, this was her second son lost in the war. She had lost her son Donald, who had been killed in action the previous July in 1943 in Sicily.

McFADYEN, Gilbert Campbell (#R/220720)

Gilbert "Bert" McFadyen was eighteen years old and just out of high school when he made the decision to serve his country. He did not see his nineteenth birthday. He gave his life in defence of Canada while transporting necessary supplies to secret radar stations off the British Columbia coast. He has no known grave.

Gilbert McFadyen was born in London, Ontario on September 15, 1924, the eldest son of George Henry and Isabel May (nee Campbell) McFadyen, of 222 South Mitton Street, Sarnia. George (born in Sarnia) and Isabel (born in Caradoc Township) were married in Welland, Ontario on June 28, 1919. George and Isabel McFadyen had two children together: Gilbert Campbell and John Robert, born in April 1926. George supported his family working as a department store manager in Sarnia.

Gilbert spent the first seven years of his life growing up in London, Middlesex, then Waterloo, then back to Middlesex. The McFadyen family moved to Sarnia when Gilbert was seven years old. Gilbert received his education at Lochiel Street Public School in Sarnia (1930-1938) and then Sarnia Collegiate (1938-1943). He was active in basketball and baseball, and his hobby was music. He was an avid member of the Young Men's Christian Association and also took a very active part in Central United Church, having served as an usher. Gilbert was also a member of the Central Century Club, and was its vice-president during 1942. He was working part time at Zellers Department Store in 1943 as a stockroom clerk when he left school to join the service.

Eighteen-and-a-half year old Gilbert McFadyen enlisted in the Royal Canadian Air Force in Sarnia on April 30, 1943. He stood six feet one and a half inches tall, had blue eyes and brown hair, was single, and lived at home with his parents on Mitton Street at the time. He requested ground duties (general duties) with the Air Force. The Air Force medical officers deemed him unfit for aircrew due to his visual acuity (myopia). From #3 Recruiting Centre in London, and after a 12-day leave in Sarnia, Gilbert was posted to #2 Manning Depot in Brandon, Manitoba on May 13, 1943. On June 5, 1943, he was transferred to No. 3 Reception Depot in Vancouver, British Columbia. On July 14, 1943, he was posted to RCAF Headquarters of Western Air Command (WAC) in Vancouver, with the rank of Aircraftman 2nd Class. Two-and-a-half months after he enlisted, on July 15, 1943, Gilbert was assigned to the RCAF vessel *M427 B.C. Star*.

AC2 Gilbert Campbell McFadyen

RCAF *M427 B.C. Star*

Before the start of the war, **RCAF's Western Air Command** operated four high-speed crash vessels and a scow seaplane tender. During the buildup of the war effort on the West Coast, many new remote early warning radar units were built and maintained. The RCAF would requisition a fleet of fishing vessels and tugs for patrol, transport and supply duties to the remote defence sites along British Columbia's coast. These vessels were attached to the RCAF Marine Section. They were the "work horses" that plied back and forth on their unscheduled runs moving construction crews, material, and heavy equipment up and down the coast of British Columbia. To keep the radar units' existence and locations secret, radio silence was enforced on these runs, and all information regarding the movement of this type of marine vessel was classified. All communications were coded.

The *M427 B.C. Star* was one of the vessels engaged in the coastal supply of all the Air Force stations along the British Columbia coast. It was a former salmon seine fishing vessel built in Vancouver in 1940, with a wooden hull and diesel engine, and was 67 feet long. It was requisitioned by RCAF Western Command in January 1942.

On July 21, 1943, the *B.C. Star* left Vancouver with over 40 tons of gravel, cement and other supplies bound for a RCAF construction detachment at Cape St. James. She carried a crew of ten (including McFadyen) and three CMU (construction and maintenance unit) personnel. Two days later, the ship put in at the RCAF Station Bella Bella where she took aboard another 2.5 tons of cargo and three CMU personnel. On July 24, the *B.C. Star* departed RCAF Station Bella Bella with her cargo of forty-three tons of gravel, cement and cargo; her ten-man crew; and five No. 9

CMU personnel assigned to the construction project. They were bound for the new RCAF radar site at Cape St. James off Kunghit Island on the southern tip of the Queen Charlotte Islands. The vessel carried complete safety equipment including a lifeboat, two life rafts, eighteen life jackets and two life buoys. The *B.C. Star* never arrived at its destination.

The crew at No. 28 Radar Unit (RU) Cape St. James had no way of knowing that the supply boat was on its way, having not yet received the necessary cypher equipment to decode the movement message. Radio silence was enforced on the ship and no one missed her until August 3 when construction crews queried about their supplies. An intense sea and air search covered a wide area during the next several weeks. All crew and passengers were lost. Gilbert McFadyen had been aboard the *B.C. Star* less than two weeks when the vessel disappeared. Only two bodies were recovered weeks later, and very little wreckage was found. On September 3 an unidentified airman's body was found on Price Island. A tombstone was erected at the Meadow Island Cemetery, Bella Bella, to remember the unknown airman.

In the aftermath, speculation and rumours circulated about the vessel being attacked by a Japanese submarine. This information was enhanced by crewmembers aboard another RCAF Marine vessel inbound to Alliford Bay. They reported that they were listening to a Ketchikan Alaska radio station when its program was interrupted by a strange and unidentified transmission. The broken-up message read: *Star... out of bread and water... Alliford repeat message... Thank you... Good afternoon*. However, no conclusive evidence ever came to light that explained why the *B.C. Star* went down. Speculation was that the hull had simply opened up under the weight of her cargo and she sank so quickly that no lifeboats were launched and no distress signals were sent out.

This supply mission resulted in the largest loss of life in the history of the Marine Branch. One month after the loss, marine craft procedures were revised to ensure prompt reporting of arrivals and departures.

In early August 1943, George and Isabel McFadyen in Sarnia received a telegram from Royal Canadian Air Force Casualty officials informing them that their eldest son, AC2 Gilbert C. McFadyen, attached to a boat plying coastal waters, was missing after marine operations. Approximately one week later, it was confirmed that Gilbert was a member of the crew of the missing boat, and it was believed that all personnel had been lost. Time of the disappearance of the vessel was not disclosed by air force officials, but it was believed to have been sometime during the previous two weeks.

In mid-August 1943, George McFadyen received a letter from G. Hollis Slater, whose son, Sergt. Jonathan C. Slater, was among the ship's crew. In the letter, Hollis stated that he was hopeful that the airmen were still alive. Mr. Slater wrote, *It would appear that the ship left the mainland on July 24 for Cape St. James at the southern tip of the Queen Charlotte Islands and a day's run away. On August 5 the following message was reported to have been picked up by the radio at Ketchikan, Alaska, 'B.C. Star – Bread and water. Cumshaw Aliford, repeat'*. Reference to Cumshaw and Aliford were not clear, but Mr. Slater interpreted the message as meaning that the men were on Louris Island in the Queen Charlottes and were attempting to travel by land to Sandspit or Aliford Bay on the northeast of Moresby Island.

Also in mid-August 1943, Isabel received a letter from F/L H.S. McDonald, Chaplain, Western Air Command, Vancouver, B.C. Following is a portion of that letter:
My dear Mrs. McFadyen:

... At present there is nothing further to report on the loss of the "B.C. Star" and I can assure you that a diligent search is being pursued daily in an endeavor to find wreckage or other evidence of the boat. So far no word has been heard from any of the crew. As long as there is the faintest hope of finding any of the crew, the search will be kept up.

The "B.C. Star" operated with Vancouver as a base and journeyed from Station to Station under the direction of the Commanding Officer of No. 9 Construction & Maintenance Unit. It was while on one of these routine voyages that the boat was reported missing after leaving a west coast base.

It is the policy of the Station Chaplains to visit all boats that tie up at their wharf and I am quite sure that wherever your son's boat was docked and there was a chaplain on the Station they would have a visit. As a matter of fact it was the custom for the chaplain to have his morning coffee with the crew in the galley.

I recall meeting your son when he passed through No. 3 Repair Depot in Vancouver at which time I was one of the chaplains on that Station. I recall him because he came from Sarnia and I intimated the fact that my father had been one of the engineers that constructed the Sarnia tunnel and in that way we had a point of contact. He was not at

the Station very long before he was posted to duty. This made him very happy because like any other boy he was anxious to 'get going' since that is what he joined up for. He was quite happy and satisfied in his work and I am sure that he did his job well. I can assure you that if he is alive there is no danger of him being a prisoner of war and should any member of the crew be found I am quite sure that he would want to contact all the next of kin of the remainder of the crew.

Let me assure you that in the R.C.A.F. we know the boys, we have many chats and contacts with them and through this personal touch are able to help them in many ways. Should anything further develop to change the situation of missing to that of another category, you will be notified immediately. With all good wishes to you and praying for the safety of your son.

In March 1944, Gilbert Campbell's name appeared on the official casualty list of the Royal Canadian Air Force as, *Previously reported "missing in sinking of 'B.C. Star'" 24-July-43 life rafts only wreckage found presumed vessel sunk, now "presumed dead" 24-July-43 for official purposes.* Aircraftman Class II Gilbert McFadyen was one of sixteen RCAF airmen lost when the *B.C. Star* vessel sank. There were no survivors. Also killed were: LACs Harold Frederick Dakenfold, George Thornton Stead, and Clarence James Sherlock; Sgts Philip Eric Olsen, Jack Douglas Hearfield, Jonathan Charles Slater, and William Murray MacNeill; Cpls Charles Gordon Glover, and Tadeusz Ledwig Polec; ACs Titus Vollhoffer, Maurice Daniel Onuski, and Arthur Garnet Davies; FSgts Roy Henry Drouillard, and William Ernest Mitchell.

In September 1946, Isabel McFadyen received a letter from the R.C.A.F. Casualty Officer, for Chief of the Air Staff in Ottawa. Following is a portion of that letter:

... I regret there are very few particulars known of the tragedy in which your son AC.2 Gilbert Campbell McFadyen lost his life. The British Columbia Star departed from Bella Bella on July 23, 1943 for Rose harbor giving an estimated time of arrival at the latter port as 10 A.M. July 24. The last word received from the ship was a wireless message despatched at 6.10 P.M. Pacific War Time July 23 which read as follows: "Departed Bella Bella 17.20 hours 23-7-43 E.T.A. Rose Harbour 10.00 hours 24-7-43".

A Court of Enquiry was convened at Prince Rupert for the purpose of investigating the loss of this vessel and their findings revealed that the vessel was a good ship, in good repair and suitable for the voyage; that it was well fitted with all necessary and sufficient life saving, fire fighting and wireless equipment. It was commanded by an able and experienced Master. Its crew were sufficient in number for the safe handling of the vessel and were able and experienced. There is no evidence of negligence on the part of the Master or any of the crew and no blame is attached to any of them. An intensive search for the lost vessel was carried out by air and by sea and it is the opinion of the Court that in this connection everything was done that could have been done.

The possibility of the vessel getting off course and running aground appears unlikely as the extensive air and sea search would have been almost certain to disclose the whereabouts of the wreck. Loss by fire could not be seriously considered due to the fact that the two life rafts which were recovered showed no evidence of this. Had an explosion occurred wreckage would have been discovered. The possibility of the shifting of the cargo was given consideration by the Court but this cause could not be substantiated due to the fact that the hold was loaded almost to capacity and under the direct supervision of the Master thus eliminating the possibility of the cargo shifting in rough seas...

I deeply regret having to convey such distressing news and I only hope your sad loss will leave you fortified to face the future.

In October 1955, Isabel received the following letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff:

Dear Mrs. McFadyen:

I am sorry indeed that after so long an interval I must refer to the loss of your son, Aircraftman Second Class Gilbert Campbell McFadyen, who has been officially recorded as not having a "known" grave.

Due to the extreme hazards attending air, land and sea operations, many Royal Canadian Air Force boys do not have a "known" grave. All are being commemorated by name on Memorials erected at a number of locations, each Memorial representative of a theatre of operations.

The Memorials are erected by the Imperial War Graves Commission (of which Canada is a member) who has announced that one of the Memorials will be erected in Ottawa, Canada. The name of your son will appear on that Memorial.

It is believed that the Memorial will be erected during 1956, and during the period of construction, before

the name of your son is engraved on the Memorial, you will receive a Verification Form to complete and mail to the Imperial War Graves Commission.

May I take this opportunity to express to you and the members of your family my deepest sympathy in the loss of your gallant son.

Eighteen year-old Gilbert McFadyen has no known grave. His name is inscribed on the Ottawa War Memorial, Ontario, Canada, Panel 2, Column 5.

On a beautifully clear, sunny day on July 6, 2013, the Denny Island War Memorial was dedicated on Denny Island, British Columbia, at the former Bella Bella RCAF base. On that day, dignitaries, military personnel, area families, RCMP, pipers, seventeen Chiefs and members of the First Nations took part in a memorial service and dedication ceremony unveiling the Bella Bella RCAF War Memorial and the Warrior Pole (dedicated to the memory of the Pacific Coast Militia Rangers and First Nation War Veterans). There were also several commemorative plaques unveiled that day: one telling the story of RCAF Station Bella Bella; one honouring Canso 9879 (crashed July 30, 1943); and one honouring the *BC Star*, that includes the names of the 15 crew/passengers who lost their lives on July 23, 1943. Sarnia's AC2 Gilbert Campbell McFadyen's name is included on that plaque.

McISAAC, Charles Daniel (#B/157245)

Charles Daniel McIsaac was a married husband of four years and working in the mines in northern Ontario when he made the decision to serve his country. Ten months later, he lost his life in defense of the Allied cause while fighting to liberate Belgium.

Charles McIsaac was born in Glencoe, Nova Scotia on May 7, 1916, the son of Hugh and Mary Jessie McIsaac. Hugh (a miner) and Mary McIsaac, both born in Glencoe, Nova Scotia, were married in Cape Breton, Nova Scotia on September 12, 1905. Hugh and Mary were blessed with eleven children: sons Charles, John, Hugh, Daniel, Joseph, Alex and Duncan (latter died at age 3 in September 1932); and daughters Lena, Jessie, Hughina, and Margaret.

Charles left public school part way through grade seven at the age of fourteen, which is around the time the McIsaac family moved to Timmins, Ontario, where they resided at 264 Spruce Street. Going to work at an early age, Charles worked as a pipefitter's helper for almost two years at Hollinger Mines. Then for the next nine years, he worked in various mines in Timmins, doing blasting and drilling. His last employer prior to enlisting was Paymaster Gold Mines, where he worked as a gold miner. For relaxation, Charles enjoyed bowling, billiards, hunting and fishing. Twenty-three-year-old Charles married Margaret Virginia, of Sarnia, in Timmins on December 2, 1939. The couple lived with Charles' parents Hugh and Mary McIsaac in Timmins.

Twenty-seven-year-old Charles, married four years and with no children, enlisted in the Canadian Army in Toronto on December 17, 1943. He stood six feet one and a half inches tall, had blue eyes and dark brown hair, and recorded his occupation as gold and nickel miner. With one brother overseas in the engineers, Charles expressed a desire for the Royal Canadian Engineers, but was recommended for the infantry. He was anxious to get overseas as quickly as possible. From #2 District Depot in Toronto, Charles received his army training at #25 Canadian Infantry (Basic) Training Centre (CITC) in Simcoe, and in March 1944 continued at A-29 Canadian Infantry (Advanced) Training Centre (CITC) at Camp Ipperwash.

On July 11, 1944, Charles McIsaac embarked overseas for the United Kingdom. He continued his training in the U.K., as a member of #2 Canadian Infantry Reinforcement Unit (CIRU). On August 4, 1944, two months after D-Day, Private Charles McIsaac departed the U.K. bound for France, as a member of the Essex Scottish Regiment, Royal Canadian Infantry Corps (RCIC).

The **Battle of Normandy** had begun for the Canadians with the June 6, 1944 D-Day landings at Juno Beach. After breaching the "Atlantic Wall" of "Fortress Europe", Allied armies began their break out from the narrow Normandy bridgehead to carve out a foothold on the French mainland. It would take a whole summer of tenacious fighting, pushing against fierce and ruthless German forces to advance east across France. In a brutal campaign of attrition, the Canadians clawed their way forward liberating villages and towns including Bretteville, Carpiquet, Caen and Falaise.

After the Allied breakout from Normandy, Canadian forces were assigned the "**Long Left Flank**", the less glamorous but vital tasks of clearing coastal areas in the north of France and Belgium of German occupiers; opening

the English Channel ports; and capturing the launching sites of German V-1 rockets. In a series of stop-and-start advances against stiff resistance in fortified positions, the Canadians liberated ports and villages including Rouen, Dieppe, Dunkirk, Boulogne and Calais.

In early October 1944, the Canadians were entrusted with liberating the 45-mile-long Scheldt estuary (the Belgian-Dutch border area) that connected the port of Antwerp to the North Sea. The **Battle of the Scheldt** was among the most difficult and grueling struggles in the war. The bitter fighting against a well-fortified and heavily entrenched enemy took place in a bleak environment made worse by the winter cold in a flooded and freezing muddy quagmire.

Charles McIsaac served with the Essex Scottish as they advanced through France and Belgium. Only two months after arriving in France, on October 13, 1944, Charles lost his life in the early stages of the Battle of the Scheldt in Belgium. He was struck in the frontal area of his head by a shell fragment at approximately 0600 hours and examined at 0830 hours. Weak, with strenuous breathing and in some shock due to the loss of blood, he died on that day at approximately 1000 hours as a result of his wounds.

[Note: In Charles McIsaac's Military Service File, some documents record the location of his death as France, and others record it as Belgium].

Charles McIsaac's remains were buried on October 14, 1944 at a location recorded on the Army Field Service Card as "Military Cem. Antwerp Cemetery, Belgium Sh. 23 & 33 6490 Grave 15, row R, plot British". The burial site was later redesignated as Schoonselhof Cemetery, Antwerp, Belgium.

On October 20, 1944, Charles' wife of less than five years Margaret in Timmins, received the following telegram from the Director of Records in Ottawa: MINISTER OF NATIONAL DEFENCE DEEPLY REGRETS TO INFORM YOU THAT B157245 PRIVATE CHARLES DANIEL MCISAAC PREVIOUSLY REPORTED MISSING IN ACTION HAS NOW BEEN OFFICIALLY REPORTED WOUNDED AND DIED OF WOUNDS THIRTEENTH OCTOBER 1944 STOP WHEN FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED STOP LETTER FOLLOWS. In early November 1944, Margaret received the following letter from the Colonel, Director of Records for Adjutant-General:

Dear Mrs. McIsaac:

Further to this Headquarters' telegram of the 20th October 1944, informing you of the regretted death of your husband B157245 Private Charles Daniel McIsaac, in keeping with the policy of the Canadian Army of informing the next-of-kin of all details of battle casualties, the following paragraph informs you of the wounds sustained by Private McIsaac.

According to information obtained by this Headquarters from Canadian Army Medical Authorities, your late husband died as a result of a shell fragment wound to the frontal region of the head. Please accept my sincere and heartfelt sympathy for the irreparable loss you have suffered.

Private Charles McIsaac's death was later officially recorded as: *Officially listed as Overseas casualty, died of wounds, in the field (France)*. In June 1945, Margaret McIsaac, then living on Norfolk Street in Simcoe, Ontario, received a War Service Gratuity of \$103.10 for the loss of her husband. In September 1946, Margaret received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Madam:

Information has been received from overseas that the remains of your husband, B157245 Private Charles Daniel McIsaac, are buried in grave 15, row R, of Schoonselhof Cemetery, Antwerp, Belgium. Marked map is enclosed. The portion of this civilian cemetery containing the graves of deceased members of the Forces has been made into a permanent recognized military burial ground which will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your choice for engraving on the headstone....

Twenty-eight-year-old Charles McIsaac is buried in Antwerpen Schoonselhof Cemetery, Belgium, Grave III.A.15. On his headstone are inscribed the words, **THOUGH GOD HAS TAKEN YOU YOU ARE ALWAYS IN MY HEART FOR DEATH SHALL PART US NOT.**

McKEOWN, Victor Herbert (#J/19969)

At age 31, Victor Herbert McKeown interrupted his career to serve his country. One of his RCAF training instructor's described him as, "keen, a deep sense of responsibility and displays ample initiative". Victor gave his life for the Allied cause while serving in one of the most dangerous postings of the war.

Victor McKeown was born in Portadown, Co Armagh, Northern Ireland on May 7, 1911, the son of John and Mary Ellen (nee Hewitt) McKeown. John and Mary Ellen were both born in Ireland, and were married on December 23, 1901 in Portadown, Northern Ireland. At some point, the McKeown family immigrated to Canada, first living in Toronto and then in Sarnia, at 355 George Street. John and Mary Ellen McKeown had eight children together: sons Victor; Thomas Douglas (Doug, who would become a Sergeant in the same R.C.A.F. unit as Victor); Joseph W.; William H. (the latter two would both later reside in Toronto); and Robert John (died in March 1909); and daughters, who at the time of Victor's death were Mrs. Alice Burr in Toronto, Mrs. James Struthers, and Mae (Mrs. Roy Chalmers), both residing in Sarnia. John McKeown supported his family working as a carpenter in Sarnia.

Victor spent the first seven years of his life in Toronto before the family moved to Sarnia. Victor was educated in Sarnia, attending London Road Public Elementary School (1918-1926), and then Sarnia Collegiate Institute from 1926 to 1928. While at high school, Victor was a well-known athlete, very active in lacrosse, football, softball, boxing and hockey. His hobbies included photography and rifle shooting. After leaving school at the age of 18, Victor was employed as a repairman at the Dominion Salt Company in Sarnia from 1928 to 1940. In August 1940, Victor had served in the 2-26th Battery, Royal Canadian Artillery in Sarnia, with the rank of Bombardier. Later in 1940, he moved to Toronto to work at De Havilland Aircraft as an aircraft inspector. He worked there from 1940 to 1942 when he left to enlist.

Thirty-one-year-old Victor McKeown enlisted with the Royal Canadian Air Force on September 14, 1942 in Toronto. He stood five feet six inches tall, had gray eyes and brown hair, was single, and lived at 11 Clarendon Avenue, Toronto at the time. Doubtful about his eyesight, he applied for ground crew, but was recommended for Air Gunner by the Selection Board. From #11 Recruitment Centre then #1 Manning Depot in Toronto, Victor received his air training at #6 Service Flying Training School (SFTS) in Dunnville; and #23 Pre-Aircrew Education Detachment (PAED) at University of Toronto; followed by #2 Air Gunner School (AGGTS) in Trenton; and then #3 Bombing and Gunnery School (B&GS) in MacDonald Manitoba. The Chief Instructor at #3B&GS wrote of Victor, *Keen on his work; has a deep sense of responsibility; obliging to others; carries weight with his fellow students; displays ample initiative in carrying out air exercises should make a capable crew member*. Victor was awarded his Air Gunner's Badge at #3B&GS in Manitoba on June 25, 1943. The next day, he began his 14-day embarkation leave. On July 10, 1943, he would be stationed at #1 Y Depot in Halifax, Nova Scotia.

Victor McKeown embarked overseas from Halifax bound for the United Kingdom on July 16, 1943. Initially posted to #3 Personnel Reception Centre (PRC), he was transferred to #1664 Conversion Unit (CU) on August 7, 1943. One month later, on September 10, 1943, he became a member of RCAF #434 Bluenose Squadron "In Excelsis Vincimus" (We Conquer the Heights), part of **Bomber Command**, with the rank of Pilot Officer-Air Gunner.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

No. 434 Squadron was formed at RAF Tholthorpe, Yorkshire on June 13, 1943 as part of No. 6 (RCAF) Group. The unit was equipped with Handley Page Halifax aircraft, a four-engine heavy bomber. The squadron was adopted by the Rotary Club of Halifax and took the nickname "Bluenose" in reference to the schooner "Bluenose" and the common nickname for Nova Scotians (many of the initial squadron members were Maritimers). On December 11, 1943, the squadron transferred its base to RAF Croft where it remained for the rest of the war. In mid-December 1944, the squadron converted to the Canadian-built Avro Lancaster.

On the night of November 18, 1943, Pilot Officer Victor McKeown was one of a group of R.C.A.F. airmen who took part in a bombing mission on Mannheim, Germany. For more than eight hours, they withstood a temperature that fell to more than 35 degrees below zero but it didn't stop them from carrying out their part of the smashing attack on the important industrial city.

Two months later, on January 29, 1944, Victor was a member of Crew #31 aboard Halifax MK V aircraft LK916 (markings WL-D) that took off from RAF Croft on a night operation targeting Berlin. It was the third day of a

heavy Anglo-American aerial offensive on Germany. On that fateful night, their Halifax aircraft was blown up over their target of Berlin. Perishing with Pilot Officer-Air Gunner Victor McKeown were P/O.s Wallace Kingdon Maxwell, Carl Thomas Edward Lee, Edward Philip Devaney, William (Bill) Henry Martin, Sgt. Ernest Parker (RAF) and F/S Kenneth James Scales. Of the 677 aircraft involved in the operation there were 46 losses.

Pilot Officer-AG Victor Herbert McKeown

L-R: **Sgt. McKeown**, Sgt. C. Lee, Sgt. E. Devaney, Sgt. B. Martin (around the fire after returning from Nov. 18/19 Mannheim mission)

Several days later, John and Mary Ellen McKeown on George Street in Sarnia received a telegram from the R.C.A.F. Casualty Office in Ottawa informing them that their son, SERGEANT VICTOR HERBERT MCKEOWN HAS BEEN REPORTED MISSING AFTER AIR OPERATIONS OVERSEAS. Victor's brother Thomas Douglas (Doug), a member of the same unit, sent their parents an encouraging word. Doug cabled his parents the following, DON'T WORRY ABOUT VIC HIS CHANCES OF BEING SAFE ARE VERY GOOD. Another set of Sarnia parents, Howard and Margaret Thompson, received the same RCAF Casualty Office telegram on the same day about their son, Arthur Cameron Thompson, who was also listed as missing in the same bombing raid over Berlin (he is included in this Project).

In early February 1944, Mary Ellen received the following letter from the Officer Commanding No. 434 Squadron in Great Britain:

Dear Mrs. McKeown:

By the time you receive this letter you will doubtless have received official notification of the fact that your son, R.190962 Sergeant Victor Herbert McKeown, has been missing on operations since 28/29 January, 1944.

Your son was not only a valued Air Gunner of this Squadron but he was highly popular with all the ranks and will be sorely missed by his many friends and acquaintances here.

I can well understand the shock and grief that the sad tidings brought to you and I join with all the Officers, Non Commissioned Officers and Airmen of this unit in extending to you our heartfelt sympathy in this hour of bitter trial. There is always the possibility that your son may be alive and well even if a prisoner of war in enemy hands and we are all hoping for the best. There is no information to hand at the present time to justify this hope but you may rest assured that any information which may be received at some future date will be forwarded to you immediately.

Your son's personal effects have been carefully gathered together and forwarded to the Standing Committee of Adjustment, Central Depository, Royal Air Force, Colnbrook, Slough, Bucks., and they will communicate with you in due course. Please allow me once again to express the deep and lasting sympathy which we all feel with you at this time.

Victor's brother Doug McKeown, who was a Sergeant-Air Gunner with the R.C.A.F., arrived home in Sarnia in April 1944 to spend a leave with parents John and Mary Ellen. He had been overseas for two years and three months. He had been injured in a crash in England a year and a half prior, spent six weeks in hospital and had been assigned to ground duty since. At the time of Doug's visit, he and the McKeown parents had not received any further news of Victor's status.

In July 1944, John and Mary Ellen received a letter from Flight Lieutenant J.L. Westman of the R.C.A.F. Casualty Office at Ottawa informing them that their son, Sergeant Victor Herbert McKeown had been advanced to Pilot Officer on January 23, 1944 but regretted no further information had been received as to his fate.

In November 1944, Mr. M. Hewitt (Victor's uncle) in Portadown, Ireland wrote to the Canadian Casualty Branch in London, England, seeking information about his nephew Victor. A portion of his letter reads: ... *I know that sometimes it takes many months before any news is received of missing personnel, however I am still living in hopes that he may be a Prisoner of War somewhere and not been notified. I should be very much obliged if you would keep in touch with me regarding any future news that may become available...*

Later that month, Mr. M. Hewitt received a reply from the Wing Commander, for Air Officer Commanding-in-Chief, R.C.A.F. Overseas. Following is a portion of that reply: ... *I regret that no news has been received regarding him since the date on which he was reported missing, and due to the time which has elapsed, and the absence of any further information, action to presume, for official purposes, that his death has occurred, will shortly be taken. Please accept my sympathy with you in the loss of your nephew.*

In December 1944, John received the following letter from the Air Marshal, Chief of the Air Staff:
Dear Mr. McKeown:

I have learned with deep regret that your son, Pilot Officer Victor Herbert McKeown, is now for official purposes presumed to have died on Active Service Overseas on January 29th, 1944. I wish to offer you and the members of your family my sincere and heartfelt sympathy.

It is most lamentable that a promising career should be thus terminated and I would like you to know that his loss is greatly deplored by all those with whom your son was serving.

Victor Herbert McKeown's death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas (Germany)*. In October 1945, the McKeowns received a War Service Gratuity of \$211.70 for the loss of their son. In November 1946, Mary Ellen received the following letter from the Wing Commander for Chief of the Air Staff in Ottawa:

Dear Mrs. McKeown:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son, Pilot Officer V.H. McKeown. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

In February 1947, Victor's sister-in-law Mrs. Joseph W. McKeown wrote the following letter to the Secretary, Department of National Defence for Air, in Ottawa:

Dear Sir,

In a number of recent publications I have read of some of the searches for missing aircrew in Europe, and I was wondering if perhaps there might have come to light any additional information regarding my brother, Pilot Officer Victor Herbert McKeown, missing on operations on Jan. 29, 1944.

I am in hopes that you have this information but have held it back for fear of re-opening our grief. We would much rather know the facts than spend the rest of our days wondering. Hoping have an early reply.

Following is a portion of the reply sent from the R.C.A.F. Casualty Officer, for Chief of the Air Staff:

... We regret that up until the present time no definite information has been received concerning your brother or any members of his crew. The loss of this aircraft is at present the subject of a Casualty Enquiry with our Air Force Missing Research and Enquiry Units. An airman believed to be Sergeant Parker, the Flight Engineer of your brother's crew, was washed ashore at Danemare in Denmark. You may be assured that should any information become available concerning your brother it will be forwarded to you. May I offer you my deepest sympathy in your sad loss.

In May 1952, Mary Ellen received the following letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff:

Dear Mrs. McKeown:

It is with reluctance that after so long an interval, I must refer to the loss of your son, Pilot Officer Victor Herbert McKeown, but due to the lack of any information concerning him since he was reported missing, it must be regretfully accepted and officially recorded that he does not have a "known" grave.

Due to the extreme hazards attending air operations there are, unhappily many thousands of British aircrew

boys who do not have "known" graves and all will be commemorated on General Memorials that will be erected at a number of locations by the Imperial War Graves Commission (of which Canada is a member), each Memorial representative of a theatre of operations. One of these Memorials will be erected at Runnymede, England, and the name of your son will appear on that Memorial.

I realize that this is an extremely distressing letter and that there is no manner of conveying such information to you that would not add to your heartaches. I am fully aware that nothing I may say will lessen your great sorrow, but I would like to express to you and the members of your family my deepest sympathy.

Thirty-two-year-old Victor McKeown has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom, Panel 251.

McKERNAN, John (#A/59800)

John McKernan was so eager to serve his country that he lied about his age in order to enlist. He became a member of an elite Canadian parachute battalion who lost his while fighting to liberate France during the Battle of Normandy. The loss of his only son left John's father devastated and seeking answers.

John McKernan was born in Windsor, Ontario on August 2, 1924, the only son of John McKernan Sr. and Eva May (nee Wells, born in Kent, Ontario) McKernan. John Sr. and Eva May were married on January 4, 1921 in Dresden, Ontario. John Sr. and Eva McKernan had three children together: John Jr., and daughters Mary Elizabeth and Florence May. In 1939, when John Jr. was fifteen years old, his mother Eva May passed away. His father remarried in 1943 and later moved from Dresden to Sarnia living at R.R. #3, Lakeshore Road.

John Jr. left school at age sixteen after completing grade nine in Dresden. His interests included bowling and pool. In 1940-1941, John worked as a delivery boy for one year at Dynes & Dynes in Dresden. He then worked at the Wallaceburg Brass Factory as a labourer doing grinding for eight months prior to enlisting.

Seventeen year-old John McKernan enlisted in the Canadian Army on March 2, 1942 in London, Ontario. He stood five feet seven and three-quarter inches tall, had hazel eyes and brown hair, and was single. On his attestation paper, he declared his birth date as August 2, 1921 (not 1924), making himself three years older than he was. As he declared his birth year as 1921, authorities believed that he was twenty years old. As a result, the documentation in his Service File, including his Death Certificate, records his birth year as 1921.

From #1 District Depot in London, John received his army training at #10 Basic Training Centre (BTC) in Kitchener; then #1 Canadian Signal Training Centre (CSTC) in Kingston; and Canadian Army Trade School (CATS) in Hamilton (to train as a radio mechanic). He was unsuccessful at CATS and was then transferred to A-10 Canadian Infantry Training Centre (CITC) at Camp Borden to complete advanced training in the infantry. He had hoped to qualify as a motorcyclist or dispatch rider but was designated as infantry. In mid-August 1943, he was transferred to Aldershot, Nova Scotia.

On September 13, 1943, John McKernan embarked overseas for the United Kingdom where he was posted to #5 Canadian Infantry Reinforcement Unit (CIRU). He continued his training in the U.K., and in March 1944, was transferred to #4 CIRU. In early June 1944, he became a member of the North Shore Regiment, Royal Canadian Infantry Corps (RCIC), with the rank of Private. On June 12, 1944, John departed the U.K., arriving the next day in France - six days after D-Day.

The **Battle of Normandy** had begun for the Canadians with the June 6, 1944 D-Day landings at Juno Beach. After breaching the "Atlantic Wall" of "Fortress Europe", Allied armies began their break out from the narrow Normandy bridgehead to carve out a foothold on the French mainland. It would take a whole summer of tenacious fighting, pushing against fierce and ruthless German forces to advance east across France. In a brutal campaign of attrition, the Canadians faced fierce battles and vicious counterattacks as they clawed their way forward liberating villages and towns including Bretteville, Carpiquet, Caen and Falaise.

John McKernan served for several weeks with the North Shore Regiment. In early July 1944, he was attached to the 1st Canadian Parachute Battalion. This airborne infantry battalion of the Canadian Army had been formed in July 1942, and in 1943, had been attached to the British 6th Airborne Division. On the night of June 5th to 6th, the 1st Canadian Parachute Battalion were part of the Allied paratroopers who were dropped into enemy territory in the hours before the D-Day landing. John McKernan joined this battalion in their ground operations to strengthen the bridgehead and support the advance of Allied troops towards the Seine River.

Less than ten weeks after arriving in France, on August 19, 1944, and approximately two weeks after his 20th birthday, John McKernan lost his life in the final days of the Battle of Normandy. His remains were buried in a temporary grave on August 20 at a location recorded on the Army Field Service Card as "France sheet 7F/2 MR 110736 Ranville Grave 96-A". Of the 27 officers and 516 men from the 1st Canadian Parachute Battalion who took part in the Battle of Normandy, 24 officers and 343 men gave their lives.

On August 28, 1944, John McKernan Sr. in Dresdan, received the following telegram from the Director of Records: MINISTER OF NATIONAL DEFENCE DEEPLY REGRETS TO INFORM YOU THAT A59800 PRIVATE JOHN MCKERNAN HAS BEEN OFFICIALLY REPORTED KILLED IN ACTION NINETEENTH AUGUST 1944 STOP IF ANY FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED.

In October 1944, John Sr., then residing at R.R. #3 Lakeshore Road, Sarnia, received the following letter from the Brigadier, Acting Adjutant-General:

Dear Mr. McKernan:

It was with deep regret that I learned of the death of your son, A59800 Private John McKernan, who gave his life in the Service of his Country in the Western European Theatre of War on the 19th day of August, 1944.

From official information we have received, your son was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

In December 1944, John Sr. was still waiting for information about the circumstances of his son's death. He wrote the following letter to the Director of Records in Ottawa:

Dear Sir,

Will you pardon my again writing your Dept in regard to the matter of obtaining some particulars concerning my son's death in action overseas on August 19th, 1944. Not having had any communication from the O.C. of the unit in which my son, Private John McKERNAN, (Reg No. 59800) was serving, and being anxious to secure any available details as to where and how he was killed, I would gratefully appreciate your cooperation in the matter.

About five weeks ago I wrote the Minister of National Defence and was informed that such particulars did not reach that office but would eventually be forwarded in a letter from the Officer Commanding the unit in the field to myself. I was also informed that a cable had been forwarded on my behalf to the O.C, requesting that if he had not already done so, he was to write me as soon as possible. To date, I have had no communication and as the interval of time from date of my son's death (August 19) is now rapidly approaching four months, I feel that if I do not soon obtain some information on this matter, the element of time may make securing details more difficult or impossible.

For your further information, I would explain that neither myself or my two daughters had been in receipt of any letters from my son for a considerable period prior to his leaving Canada, and this naturally increases our anxiety, as we do not even know the name of the infantry regiment to which he was attached at the time of his being killed in action. Trusting that you may be able to render some assistance in the matter.

Later that month, John Sr. received a reply from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Mr. McKernan:

... In reply thereto, I wish to inform you that your son was serving with the North Shore Regiment in the Western European Theatre of War at the time he was killed in action. A Burial Report now received from Overseas advises that Private McKernan was buried on the 20th day of August, 1944, in a temporary grave at Ranville which is approximately 5 ½ miles North East of Caen, France. A further cable has been despatched Overseas to-day requesting that a letter be forwarded to you by the Officer Commanding your late son's Unit respecting the circumstances surrounding his death.

In February 1945, John Sr., seeking the personal effects of his son, wrote a letter to the Estates Branch, Department of National Defence in Ottawa. Following is a portion of that letter:

Dear Sirs,

There having been no further word concerning any of the personal belongings of my son, the above mentioned soldier, who was killed in action exactly six months ago to-day, August 19th, 1944, I am taking the liberty of writing your Dept on the matter, trusting that it may yet be possible to learn whether myself and other members of

the family may hope to receive any article, however small, which may have been recovered at the time of his death.

As a result of my having received a communication from a Chaplain overseas some time ago, I learned that my son died in a United States army hospital in France. Previous correspondence from the Director of Records did not contain this information and it is only since learning that death did not occur on the field, that I am taking this matter with your Dept.

... Not having had any word from my Son's commanding officer or other member of his Unit overseas, (the chaplain from whom I had heard was attached to a Canadian Infantry Reinforcement Unit and had no connection with my son's regiment). I have no idea as to the actual circumstances of his death but would think that the fact that he is said to have died in a U.S. army field hospital would have made such recovery of personal belongings more certain than if he had been killed instantly. Any information which you may be able to obtain in this matter will be gratefully appreciated by my two daughters and myself.

In late April 1945, John McKernan Sr. was still anxiously waiting for any of his son's personal effects. From a portion of another letter to the Estates Branch, he wrote:

...I feel that the length of time which has now elapsed since Aug 19th, 1944, has been ample and would greatly appreciate any information which you may be able to obtain on the matter.

In this connection, I would like to draw your attention to a fact which may be of some value in any possible action you may take in attempting to trace my son's personal effects – namely, my first notification from official sources was that he had been killed in action while serving with the North Shore (N.B) Reg't. Then later I was advised in a letter from a chaplain that my son had died in a United States Army hospital in France and had been on the strength of the 1st Canadian Parachute Battalion.

Had his death taken place other than in a field hospital, I would not have been so surprised at the failure of any of my son's belongings to reach Canada. But in view of the death being in a hospital I do feel that somewhere there must be at least one small item which would be greatly appreciated by myself or other members of the family...

In June 1945 (more than one month after VE Day), John McKernan Sr. still had not received any of his son's personal effects.

Private John McKernan's death was later officially recorded as, *Overseas casualty, killed in action, in the field (France)*. In January 1946, John Sr. received a War Service Gratuity of \$331.37 for the loss of his only son. In October 1946, John Sr. was still seeking information on the location of the grave of his son in Normandy. His only previous information from overseas had been that his son had been buried in a temporary grave at Ranville, but was later to be re-interred in a permanent Canadian Military Cemetery. John Sr.'s intention was to go to France to visit the area where his son's grave was situated.

In November 1946, John Sr. received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Mr. McKernan:

... advice has now been received from the overseas authorities that the remains of your son, (A59800 Private John McKernan), are now buried in grave 14, row E, plot 2, of Ranville Airborne Cemetery, Ranville, France. Marked map is enclosed. This is a recognized military burial ground which will receive care and maintenance in perpetuity.

The grave has been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

Twenty year-old John McKernan is buried in Ranville War Cemetery, Calvados, France, Grave IIA.E.14. On his headstone are inscribed the words, I HAVE FOUGHT A GOOD FIGHT, I HAVE FINISHED MY COURSE, I HAVE KEPT THE FAITH.

McLAGAN, John Pettigrew (#A/50287)

John Pettigrew McLagan had been married for just over a year-and-a-half when he chose to serve his country. Two months after arriving overseas, his wife gave birth to their only child, a baby girl. John never had the opportunity to hold her. John lost his life in the fight to liberate the Dutch people from years of suffering under Nazi control. One week after his death, the war in Europe ended.

John McLagan was born in Leith, Edinburgh, Scotland on March 22, 1908, the son of James Innes and Robina McLagan. James and Robina McLagan were married in Edinburgh, Scotland on January 6, 1905. When John was eight years old, he lost his father James, who died on September 7, 1916. Thirteen years later, in 1929, when John was twenty-one years old, the McLagan family immigrated to Canada and moved to Windsor, Ontario, living at 765 Huron Line. John had two full brothers: Thomas (would reside in Windsor) and James Innes (would become a member of the Chatham police force); and a half-brother, Edward Sanby Jollie (would reside in Pasadena, California).

John McLagan served two years with the Essex Scottish Militia while in Windsor. Around 1935, widowed mother Robina, John and his brothers moved to Chatham, residing at 216 ½ King Street. John was a member of Christ Anglican Church in Chatham and was affiliated with the A.Y.P.A. John was a baker for thirteen years prior to enlisting, working at Sergison Bakery in Windsor and then at the Sunshine Bakery in Chatham.

On December 31, 1938, thirty year-old John married Rose Bazeley (born in Stapleford, England) in Sarnia, Ontario. John and Rose McLagan had one child together, daughter Mary Anne, born May 25, 1943 in Sarnia (while John was overseas). Rose and daughter Mary Anne lived at 423 Davis Street, Sarnia while John was overseas.

Thirty-two-year-old John McLagan enlisted in the Canadian Army on August 14, 1940 in Chatham, Ontario, becoming a member of the 1st Kent Regiment. He stood five feet nine and a half inches tall, had brown eyes and brown hair, and lived at 216 ½ King Street, Chatham at the time. He planned to enter the civil service after the war. John received his army training at bases in London; Windsor; Halifax, Nova Scotia; Chippewa (Niagara); New Westminster; and Terrace, British Columbia; and then #12 Vocational Training School in Saskatoon (a driver mechanics course). In late February 1943, still a member of the Kent Regiment, he was posted to #1 District Depot in London, Ontario.

John McLagan embarked overseas for the United Kingdom on March 23, 1943, where he was posted to #3 Canadian Infantry Reinforcement Unit (CIRU). Two months after arriving overseas, Rose gave birth to their daughter Mary Anne. On June 18, 1943, John was transferred to the Essex Scottish Regiment, Royal Canadian Infantry Corps (RCIC), with the rank of Private. On July 3, 1944, John departed from the U.K. and arrived in France, one month after D-Day.

Private John Pettigrew McLagan

The **Battle of Normandy** had begun for the Canadians with the June 6, 1944 D-Day landings at Juno Beach. After breaching the “Atlantic Wall” of “Fortress Europe”, Allied armies began their break out from the narrow Normandy bridgehead to carve out a foothold on the French mainland. It would take a whole summer of tenacious fighting, pushing against fierce and ruthless German forces to advance east across France. In a brutal campaign of attrition, the Canadians faced fierce battles and vicious counterattacks as they clawed their way forward liberating villages and towns including Bretteville, Carpiquet, Caen and Falaise.

Private John McLagan served in France with the Essex Scottish as a driver mechanic motor vehicle class

“C”. Less than four weeks after arriving in France, he was wounded at Caen, France on July 30, 1944 during the Normandy campaign. He was returned to the U.K. for medical care. On August 10, 1944, Rose McLagan on Davis Street in Sarnia received the following telegram from the Director of Records: MINISTER OF NATIONAL DEFENCE WISHES TO INFORM YOU THAT A50287 PRIVATE JOHN PETTIGREW MCLAGAN PREVIOUSLY REPORTED WOUNDED IN ACTION NATURE OF WOUNDS NOW REPORTED SHELL FRAGMENT WOUND BOTH ARMPITS AND CHEST STOP IF ANY FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED. John spent five months convalescing in an English hospital, before being posted to #2 Canadian Infantry Training Regiment (CITR).

On January 8, 1945, Private John McLagan rejoined his Essex Scottish Regiment in North-West Europe, again as a driver mechanic motor vehicle class “C”. Prior to John returning to his unit, the Essex Scottish had taken part in the grueling struggle for the Battle of the Scheldt in Northern Belgium and the Netherlands. Christmas and the New Year was spent in the line near Grosbeek, Netherlands.

John joined the Essex in their next advance as they moved into German territory. In February 1945, the Allies launched a great offensive, the **Battle of the Rhineland** that was designed to drive the Germans eastward back over the Rhine River. There would be two formidable thrusts: one by the Ninth U.S. Army; and one by the First Canadian Army, strengthened by the addition of Allied formations. The resilient Germans had spent months improving their defences; winter rains and thaw had turned the ground into a thick, muddy quagmire and the enemy would fight fiercely to defend their home soil. During one month of fighting, the Canadians succeeded in clearing the Reichswald Forest, in breaking the Siegfried Line and in clearing the Hochwald Forest. But victory came at a high cost.

After a period of rest, the Essex moved back into Holland. Almost five years earlier, in May 1940, the Netherlands, despite its declaration of neutrality, had been invaded by the German blitzkrieg and put under Nazi control. It led to five years of suffering for the Dutch people. In March 1945, the 1st Canadian Corps (who had been fighting in Italy) joined their comrades of the 2nd Canadian Corps (who had fought through France, Belgium, and Germany). For the first time in history, two Canadian Army corps would fight together. The two Canadian Corps were tasked with the **Liberation of the Netherlands**, on two fronts--northeastern Holland and northern Germany, and Western Holland. Grateful residents greeted the Canadians as heroes as they liberated towns and cities. It was never easy. The freedom fighters faced destroyed roads, bridges and dykes; experienced days of fierce clashes against a resilient, sometimes fanatical enemy; and engaged in house-to-house fighting.

It was during the fighting to liberate the Netherlands that John McLagan lost his life in northern Germany. On April 30, 1945, John was killed in action in the Hatton area of Germany. His remains were buried on April 30 at a location in Germany recorded on the Army Field Service Card as “Kirchhatten Sh. 1/25000 2916 MR 4327/0043 Plot 1 Grave 2”. One week after John McLagan’s death, VE Day was declared, ending the war in Europe.

In mid-May 1945, Rose McLagan in Sarnia received a telegram from Ottawa informing her that her husband, PRIVATE JOHN P MCLAGAN WAS KILLED IN ACTION ON THE WESTERN FRONT ON APRIL 30. Also in mid-May 1945, Rose received the following letter from the Major-General, Adjutant-General:

Dear Mrs. McLagan:

It was with deep regret that I learned of the death of your husband, A50287 Private John Pettigrew McLagan, who gave his life in the Service of his Country in the Western European Theatre of War on the 30th day of April, 1945.

From official information we have received, your husband was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

John McLagan’s death was later officially recorded as, *Overseas casualty, killed in action, in the field (Germany)*. In late August 1945, Rose received the following letter from the Colonel, Director of Records, for Adjutant-General:

Dear Madam:

Information has now been received from the overseas military authorities that your husband, A50287 Private John Pettigrew McLagan, was buried with religious rites in grave 2, row 1, plot 1, of a temporary cemetery located at a point approximately ten miles North-West of Delmenhorst, Germany. Marked map is enclosed.

The grave will have been temporarily marked with a wooden cross for identification purposes and in due course the remains will be reverently exhumed and removed to a recognized military burial ground when the concentration of graves in the area takes place. On this being completed the new location will be advised to you, but for obvious reasons it will likely take approximately one year before this information is received.

In November 1945, Rose McLagan received a War Service Gratuity of \$755.68 for the loss of her husband. In late-June 1946, she received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Madam:

Information has just been received from overseas that the remains of your husband, A50287 Private John Pettigrew McLagan, have been carefully exhumed from the original place of internment and reverently reburied in grave 12, row B, plot 9, of Holten Canadian Military Cemetery, Holten, Holland. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

John McLagan left behind his wife Rose, and their daughter Mary Anne, who was one month short of her second birthday when he died. Thirty-seven-year-old John McLagan is buried in Holten Canadian War Cemetery, Netherlands, Grave IX.B.12. On his headstone are inscribed the words, JOHN BELOVED HUSBAND OF ROSE, DEAR FATHER OF MARY ANNE McLAGAN.

McLAUGHLIN, Patrick Douglas (#A/28522)

Patrick Douglas McLaughlin left his father, James, and his hometown of Sarnia to serve with every intention of becoming a machinist in Sarnia on his return. He may have left his father to do his duty, but he never forgot him. From the day he enlisted to the day he died, Patrick sent his pay home to support his handicapped father. Patrick was killed in action in the Battle of the Scheldt in 1945, three months before the war in Europe ended.

Patrick McLaughlin was born in Sarnia on May 8, 1921, the youngest son of James and Lenora McLaughlin. James, a boilermaker by trade, and Lenora were married on May 17, 1920 in Sarnia. Five years later in 1925, James and Lenora separated, when Patrick was four. Patrick lived with his father at 444 South Brock Street and Lenora later resided in Timmons, Ontario. Patrick had an older brother, James, who later resided in Detroit, Michigan.

After being educated at St. Joseph's Separate School, Patrick attended Sarnia Collegiate Institute and Technical School for two and a half years. He enjoyed swimming, skiing and snowshoeing but left high school early, at age 15. Instead, he joined the work force by doing farm work; working at Auto-lite factory for six months; working as a clerk in a drug store for one year; and, prior to enlisting, working as a clerk for six months at Loblaw's Groceteria.

Nineteen year-old Patrick McLaughlin enlisted in the Canadian Army in on March 19, 1941 in London, Ontario. He stood five feet five inches tall, had hazel eyes and dark brown hair, was single, and was residing at home with his father on Brock Street at the time. Patrick's plan for after the war was to become a machinist. From #1 District Depot in London, Patrick received his army training as a Gunner at #10 Basic Training Centre (BTC) in Kitchener; his advanced training at Canadian Army Training Center A2 (CATC) at Petawawa and 3A District Depot in Kingston (training as a tradesman – motor mechanics); and at Canadian Army Training School (CATS) in Hamilton. He returned to CATC in Petawawa in early April 1942.

His additional training was extensive. On May 5, 1942, Patrick became a member of the 30th Light Anti-Aircraft (LAA) Battery, Royal Canadian Artillery, serving in Debert Nova Scotia. In early October 1942, he proceeded to "G" Force as a Bombardier, posted to Goose Bay, Labrador. On July 1, 1943, he became a member of the 22nd Anti-Aircraft Regiment, serving in St. John, New Brunswick. In late August 1943, he advanced in rank to Lance Bombardier. He served in St. John until January 1944, when he was transferred to #1 Transit Camp in Windsor, Nova Scotia. In February 1944, he was stationed at #24 Basic Training Centre in Brampton, and reverted to Private. In August 1944, he was granted a three-week embarkation leave.

On October 11, 1944, Patrick McLaughlin embarked overseas from Debert, Nova Scotia bound for the

United Kingdom. There he was posted to #2 Canadian Infantry Reinforcement Unit (CIRU), and later to #2 Canadian Infantry Training Regiment (CITR) where he continued his training in the U.K.

On November 10, 1944, McLaughlin departed from the U.K. and arrived the next day in the North-West Europe Theatre. He disembarked as a member of the Royal Regiment of Canada (RRoFC), Royal Canadian Infantry Corps (RCIC), with the rank of Private. He served with the Royal Regiment as they advanced through North-West Europe. All during the time Patrick was serving, he sent his pay home to his father James on Brock Street, to help him keep his home. His father James needed the money--he was handicapped, having lost one of his legs.

Patrick McLaughlin arrived soon after the grueling struggle for the Battle of the Scheldt in Northern Belgium and the Netherlands. After spending a frigid winter in the northern Netherlands, Patrick joined the RRoFC in their next advance as they moved into German territory. In early February 1945, the Allies launched a great offensive, the **Battle of the Rhineland** that was designed to drive the Germans eastward back over the Rhine River. There would be two formidable thrusts: one by the Ninth U.S. Army; and one by the First Canadian Army, strengthened by the addition of Allied formations. The resilient Germans had spent months improving their defences; winter rains and thaw had turned the ground into a thick, muddy quagmire and the enemy fought fiercely to defend their home soil. During one month of fighting, the Canadians succeeded in clearing the Reichswald Forest, in breaking the Siegfried Line and in clearing the Hochwald Forest. But victory came at a high cost.

It was during the fighting in the Battle of the Rhineland that Private Patrick McLaughlin lost his life. A little over three months after arriving in the NW Europe Theatre, on February 27, 1945, he was killed in action in north-western Germany. Patrick McLaughlin's remains were buried at a location recorded on the Army Field Service Card as "Germany Bedburg Cleve 932527 R.19 Gr. 19".

In early March 1945, James McLaughlin in Sarnia received a telegram from Ottawa informing him that his son, PTE PATRICK MCLAUGHLIN WAS KILLED ON THE WESTERN FRONT. In late March 1945, James received the following letter from a Major-General, Adjutant-General:

Dear Mr. McLaughlin:

It was with deep regret that I learned of the death of your son, A28522 Private Patrick Douglas McLaughlin, who gave his life in the Service of his Country in the Western European Theatre of War on the 27th day of February, 1945.

From official information we have received, your son was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Patrick McLaughlin was later officially recorded as, *Overseas casualty, killed in action, in the field (Germany)*. In March 1946, James received a War Service Gratuity of \$380.12 for the loss of his youngest son. In August 1946, James received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Sir:

Information has just been received from overseas that the remains of your son, A28522 Private Patrick Douglas McLaughlin, have been carefully exhumed from the original place of internment and reverently reburied in grave 12, row B, plot 7, of Nijmegen Canadian Military Cemetery, four miles South-East of Nijmegen, Holland. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

In January 1948, the Director of War Service Records in Ottawa sent James McLaughlin on Brock Street a photograph of Patrick's grave and the marker over his burial place in Nijmegen, Holland. Twenty-three-year-old Patrick McLaughlin is buried in Groesbeek Canadian War Cemetery, Netherlands, Grave VII.B.12. On his headstone are inscribed the words, AT REST.

McLELLAN, Allan Joseph (#A/4167)

Allan Joseph McLellan, at age 36, enlisted with the Royal Canadian Naval Reserve (RCNR). Unfortunately, his stint in the military lasted only nine months when Allan was deemed “Medically unfit” and discharged in October 1941. He spent most of his remaining time in a sanitarium. Two years after the war ended and six years after first being diagnosed with tuberculosis, Allan passed away at Queen Alexandra Sanitarium.

Allan “Cap” McLellan was born on March 28, 1904 in Southampton, Ontario, the son of Alexander and Mary (nee Longe) McLellan. Alexander McLellan (born 1874 in Michigan) and Mary Longe (born 1875) were married on April 7, 1898 in Port Huron. Alexander and Mary McLellan would be blessed with six children together: Beatrice Alberta (born 1898); Harold Alexander (born 1901); Allan Joseph; John Angus (born 1906), Adeline ‘Ada’ (born 1909) and Arnold James (born 1911). Alexander McLellan supported his family working as a marine captain. The McLellans lived first at 264 Devine Street and later at 286 South Vidal Street, Sarnia.

Allan was a member of St. Joseph’s Catholic Parish, Sarnia, and attended two years of high school. In his younger days, he was an outstanding softball and soccer player and was also prominent in other forms of athletics. Allan had several jobs prior to joining the military: as an acetylene burner for six months with the Canadian Kellogg Company (construction); as a clerk in the Ontario Liquor Control Board store on Front Street in Sarnia; and as a Seaman with Imperial Oil Shipping Company.

After serving for some time with Imperial Oil Shipping, thirty-six-year-old Allan McLellan enlisted in the Royal Canadian Naval Reserve (RCNR) on January 20, 1941 in London, Ontario. He stood five feet five and one-quarter inches tall, had blue eyes and brown hair, was single and residing with his parents on Vidal Street in Sarnia at the time. From London Division Head Quarters, Allan was posted on April 22, 1941 to *HMCS Stadacona* in Halifax, with the rank of Able Seaman.

The *Stadacona* was originally a 682 ton, 196-foot yacht named *SS Columbia*, launched in 1899. It was commissioned by the RCN in August 1915 and renamed the *HMCS Stadacona*. The *Stadacona* was one of several private yachts acquired by the RCN during the First World War—it was a patrol vessel based out of Halifax. The *Stadacona* was sold in 1924, ending its RCN naval duties. The Royal Canadian Navy Maritime Command base in Halifax, Nova Scotia became the *HMCS Stadacona* in 1925. During World War II, this RCN shore establishment served as a depot and training base, with machine shops, stores buildings, barracks, administration offices and drill halls needed to maintain the hundreds of corvettes being commissioned during the Battle of the Atlantic.

Able Seaman Allan McLellan received his training at *HMCS Stadacona* and served only in Canada, from January 1941 to October 1941. It was during his service in Halifax, in May 1941, that he became ill, with symptoms that included a cold, sore chest, loss of voice and sick stomach. He was treated in the Halifax Military Hospital, and later diagnosed with Pulmonary Tuberculosis. He was discharged on October 6, 1941 as “Medically Unfit”.

After his discharge from the navy, Allan McLellan entered the Queen Elizabeth Sanitarium in Byron, where he remained for most of his time until his death. On May 23, 1947, two years after the war ended in Europe, forty-three-year-old Allan McLellan passed away at the Queen Alexandra Sanitarium. After his death, it was determined that his Pulmonary Tuberculosis condition had existed prior to his enlistment, but became worse during his service, and was “aggravated as a result of his military duties”. His cause of death was officially recorded as, *Far advanced pulmonary tuberculosis due to left broncho pleural fistula with pyoneumothorax. Death was related to military service.*

Besides his parents Alexander and Mary McLellan on Vidal Street in Sarnia, Allan was survived by his three brothers--Harold, John and Arnold--and his two sisters: Mrs. Beatrice Birmingham of Sarnia and Mrs. Kenneth Haines (Ada) of Talara, Peru. In January 1945, Alexander and Mary McLellan received a War Service Gratuity of \$60.00 for the loss of their son. Allan’s funeral was held on May 27, 1947 out of the McKenzie & Blundy Funeral Home with a Requiem High Mass celebrated at St. Joseph’s Church. Pallbearers were members of Sarnia Branch No. 62 Canadian Legion. Internment was at Our Lady of Mercy Catholic Cemetery, Sarnia, Ontario, Lot 11, Range 6, Grave D. On Allan McLellan’s headstone are inscribed the words, BELOVED SON OF ALEX AND MARY McLELLAN. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

McRAE, Howard (#A/105640)

Almost three months after the Second World War ended, Howard McRae was still in Europe, waiting like so many of the troops to get home. In November 1945, Howard, 22, died as a result of a motor vehicle accident in Holland.

Howard McRae was born in Sarnia on September 1, 1923, the eldest child of James Howard and Johan Margaret (nee: McKay) McRae. As a young lad, James McRae (born July 9, 1899 in Glengarry, Ontario) had spent a lot of time with his father, a farmer, John Angus McRae ("Red Jack"), riding horses and working in the barn. Years later, twenty-five-year-old James McRae married Johan McKay (born June 1900 in Plympton Township, Ontario) on December 3, 1924 in Sarnia. At the time of their marriage, James was residing at 301 South Christina Street and was employed as a city fireman, while Johan was living at 258 South Vidal Street. James and Johan McRae had seven children together: Howard; William John (born 1926, Sarnia); Roderick (born 1932, Sarnia) and Robert Angus (born 1934, Sarnia); and daughters Catherine May (born 1927, Sarnia, died May 1940); Lila (born 1928, Sarnia); and Johan Margaret (born 1935).

Howard was an active youth, but his teenage years got off to a rough start. When he was fourteen years old, his mother Johan passed away at the age of thirty-eight in 1937. Howard attended high school for one year, but left school at the age of sixteen before passing his exams. He was active in baseball, rugby, swimming and hockey (a goaltender), and his hobbies included hunting and stamp collecting. Howard worked several jobs in Sarnia before enlisting: as a labourer unloading cars for C.N.R.; as a truck driver with Langs Transport (Aug – Dec 1941); and as a labourer with Dominion Alloy Steel Company (from Dec 1941 until he enlisted). Howard served with the Royal Canadian Engineers (R.C.E.) from March 1942 until the time he enlisted.

Nineteen year-old Howard McRae enlisted in the Canadian Army on January 4, 1943 in London, Ontario. He stood five feet eight and one-quarter inches tall, had blue eyes and red hair, was single, and was residing with his younger siblings and widowed father at 268 Cameron Street at the time. His reasons for joining the army included, "duty, and to be with friends". Howard's plan for after the war was to return to Dominion Alloy to become a welder.

From #1 District Depot in London, Private Howard McRae began his army training in late January 1943 at A-29 Canadian Infantry Training Centre (CITC) at Camp Ipperwash. In July 1943, he became a member of the Lincoln and Welland Regiment, Royal Canadian Infantry Corps (R.C.I.C.), based in Aldershot, Nova Scotia. Six months after enlisting, on July 20, 1943, Howard McRae embarked from Halifax bound for the United Kingdom.

Private Howard McRae

Howard continued his training with the Lincoln and Welland Regiment in the United Kingdom. One year after arriving in the U.K., he sailed across the English Channel and arrived in France on July 25, 1944. The Lincoln and Welland Regiment, part of the 10th Infantry Brigade, 4th Canadian Armoured Division, advanced through North-West Europe until the end of the war.

The **Battle of Normandy** had begun for the Canadians with the June 6, 1944 D-Day landings at Juno Beach.

It would take a whole summer of tenacious fighting, pushing against fierce and ruthless German forces to advance east liberating villages and towns across France. After the Allied breakout from Normandy, Canadian forces were assigned the **“Long Left Flank”**, the less glamorous but vital tasks of clearing coastal areas in the north of France and Belgium of German occupiers, opening the English Channel ports, and capturing the launching sites of German V-1 rockets (late August-early October 1944).

In early October 1944, the Canadians were entrusted with grueling task of liberating the Belgian-Dutch border estuary connecting Antwerp to the North Sea. The **Battle of the Scheldt** (early October-early November 1944) was among the most difficult and grueling struggles in the war. The bitter fighting against a well-fortified and heavily entrenched enemy took place in a bleak environment made worse by the winter cold in a flooded and freezing muddy quagmire. Howard McRae would be absent without leave for twenty days in late October until mid-November 1944, so he missed the last week of fighting at the Scheldt.

The Lincoln and Welland Regiment continued their advance across NW Europe. In early February 1945, the Allies launched a great offensive, the **Battle of the Rhineland** that was designed to drive the Germans eastward back over the Rhine River. There would be two formidable thrusts: one by the Ninth U.S Army; and one by the First Canadian Army, strengthened by the addition of Allied formations. During one month of fighting, the Canadians would succeed in clearing the Reichswald Forest, in breaking the Siegfried Line and in clearing the Hochwald Forest. For the first time in history, two Canadian Army corps would fight together. In March 1945, the two Canadian Corps were tasked with the **Liberation of the Netherlands**, on two fronts— northeastern Holland and northern Germany, and Western Holland. Grateful residents greeted the Canadians as heroes as they liberated towns and cities. Howard McRae would be absent without leave for 82 days from late February 1945 until mid-May 1945 (missing the Rhineland and Netherlands) when he surrendered himself at Oldenburg, Germany.

The war in Europe ended when Germany surrendered in early May 1945. When Howard returned to his Regiment in Holland, he volunteered for duty in the Pacific Theatre. He would not have the opportunity to serve in the Pacific, because in mid-August 1945, Japan surrendered, ending the war.

Almost three months after the Second World War ended, Howard McRae was still in Europe, waiting like so many of the troops to get home. On November 9, 1945, Howard died as a result of a motor vehicle accident in Holland. In the Court of Inquiry that followed, based on eyewitness accounts, investigators determined the following facts: on November 8, the Lincoln and Welland Regiment held a dance at the 61 Club (canteen) in Bussum; the dance ended at 2300 hours; after leaving the dance, a few of the Dutch girls discovered that their bus to Amsterdam had already left; several Canadian soldiers offered to return the girls to their homes in Amsterdam; a Willys 5 cwt jeep was taken without authority from a courtyard in Bussum between 2230 and 2359 hours on November 8.

It was determined that the jeep containing the driver and seven passengers was on an unauthorized journey to Amsterdam; the jeep occupants included four members of the Lincoln & Welland Regiment (all Canadian) and four civilian Dutch girls (one of the girls was Howard McRae's girlfriend, Hedwig van den Hout); one of the other soldiers drove the jeep to the Valkenweg ferry boat, and after the canal crossing, Private Howard McRae was the driver of the jeep at the time of the accident; the accident occurred at approximately 0030 hours November 9 on the Meeuwenlaan, North Amsterdam.

The accident was caused by excessive speed and a slippery road due to the rain and many leaves, contributed to the accident; as the vehicle rounded a corner, the jeep jumped a curb and swerved to avoid two persons walking on a sidewalk, then glanced off one tree and collided with a second tree, overturning next to the road; two of the occupants died at the scene of the accident, including Private Howard McRae (badly crushed skull) and one of the Dutch girls (H. Volkers); another Dutch girl had severe injuries and all other occupants would survive.

Howard McRae's body was buried on November 14, 1945 in the Canadian Military Cemetery, Nijmegen, Holland. On November 15, 1945, three months after the Second World war ended, James McRae on Cameron Street in Sarnia received the following telegram from the Director of Records in Ottawa; REGRET DEEPLY A105640 PRIVATE HOWARD MCRAE OFFICIALLY REPORTED TO HAVE DIED NINTH NOVEMBER 1945 RESULT OF A MOTOR ACCIDENT STOP YOU SHOULD RECEIVE FURTHER DETAILS BY MAIL DIRECT FROM THIS UNIT. James had last heard from his son several weeks prior, where at the time, he was stationed in Holland.

In late November 1945, widowed father James McRae received the following letter from a Major-General, Adjutant-General:

Dear Mr. McRae:

It was with deep regret that I learned of the death of your son, A105640 Private Howard McRae, who died while in the Service of his Country in Western Europe on the ninth day of November, 1945. The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement.

In January 1946, James received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Sir:

Information has just been received from overseas that the remains of your son, A105640 Private Howard McRae, have been buried in grave 2, row B, plot 16, of Nijmegen Canadian Military Cemetery, three and a half miles South-East of Nijmegen, Holland. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

In August 1947, James McRae received a War Service Gratuity of \$387.76 for the loss of his son Howard. Twenty-two-year-old Private Howard McRae is buried in Groesbeek Canadian War Cemetery, Netherlands, Grave XVI.B.2.

Howard's father, James McRae, joined the Sarnia Fire Department in 1923, and would work there for 26 years. Howard's mother, Johan McRae, had been sick for quite a long time prior to her death in 1937. During that period, Margaret Ann DeRush became the family's live in housekeeper/nanny, helping to care for the couple's seven children. Some time after Johan's death, James McRae married Margaret Ann DeRush.

Margaret, born April 24, 1911 in Sarnia, was the daughter of Eli DeRush and Mary Lucy Shaw. James and Margaret McRae resided on Cameron Street and the children loved Margaret as they did their biological mother. In mid-June 1949, James lost his life while on duty. In a fatal accident that occurred at the corner of Russell and Davis Streets, a 9-ton pumper truck accidentally backed over him and killed him instantly. James left behind his wife Margaret, his daughters Lila (in Toronto), Johan (in Sarnia), sons William, Roderick and Bobby, and stepdaughters Barbara and Betty (Mrs. Robert Macklin). On January 25, 1950, seven months after James McRae's death, Margaret McRae gave birth to their son, who she would name Howard. James McRae did not know his wife Margaret was pregnant at the time of his death.

MEERE, Leonard Raymond (#R/205555)

Despite his superiors' assessment of him as *An alert, keen, well-motivated airman, who... should do well with training* and despite his extensive training, Leonard Raymond Meere, 19, of Sarnia died in a solo practice flight near Prince Albert Saskatachewan in 1943. Leonard left behind his parents, his two brothers and his young fiancée.

Leonard was born in Aston, Birmingham, England on September 5, 1924, the youngest son of Thomas William and Edith Meere (nee Hudson). Thomas and Edith were both born in Birmingham, England, and were married in Lozells, Birmingham, England on August 1, 1915. They had three children together, all boys: Arthur Ernest, Jonathan Frederick and Leonard. At the time of Leonard's death, both of his brothers were also in the military. Arthur Meere was a Corporal of the RCAF, in Dunnville, Ontario, and Jonathan Meere had been overseas with the 5th Armoured Troops of the Canadian Army for two years.

The Meere family had immigrated to Canada arriving on May 14, 1927 aboard the passenger ship *Aurania*. Leonard was only two years eight months old when he arrived. Thomas had been a Special Constable in England, but upon arrival, he recorded his occupation as welder-bricklayer. After disembarking, the Meere family resided briefly at Thomas' mother's residence at 385 King Street, Toronto.

The Meere family moved in Sarnia sometime in 1928. Leonard Meere attended Johnston Memorial public school from 1929 to 1937. He then attended Sarnia Collegiate from September 1937 to June 1942, where he specialized in shop electricity. Leonard was also active in swimming and in basketball. After passing grade 12 and graduating from high school at the age of seventeen, Leonard worked as a labourer and a stockbroker at the Union

Gas Company of Canada Limited in Sarnia for six months before enlisting. Also prior to enlisting, Leonard had met, fallen in love, and had made plans to marry Gwen Robinson of Wallaceburg.

Now eighteen, Leonard Meere enlisted in the Royal Canadian Air Force on November 12, 1942 in Sarnia, requesting flying duties. He stood five feet five inches tall, had blue eyes and brown hair, was single, and was residing at 386 Brock Street with his parents at the time. Following the war, he planned to pursue employment in the electrical trade. The Recruiting Officers comments about Leonard included, *An alert, keen, well-motivated airman, who has lots of youthful enthusiasm, good athletic and work history. Would imagine he is better than average pilot material, and Has brother in R.C.A.F., another overseas. Has the right idea as regards to the service. Should do well with training.*

His training was extensive. From #9 Recruiting Centre in London and then #2 Manning Depot in Brandon, Manitoba, Leonard received his air training at #20 Pre-Aircrew Education Detachment (PAED) at University of Saskatchewan; at #7 Initial Training School (ITS) in Saskatoon; and at #6 Elementary Flying Training School (EFTS) in Prince Albert, Saskatchewan. At the end of his training, Leonard obtained the rank of Leading Aircraftman-Pilot.

The airfield near Prince Albert, Saskatchewan had been converted on July 22, 1940 under the British Commonwealth Air Training Plan (BCATP) to No. 6 Elementary Flying School (EFTS). From March 17, 1941 to September 11, 1942, the station also doubled as No. 6 Air Observer School (AOS). At No. 6 EFTS, trainees were given 50 hours of basic flying instruction over 8 weeks on simple trainer aircraft--the De Havilland Tiger Moth and Fairchild Cornell.

Early in the day on September 23, 1943, Leading Aircraftman-Pilot and student Leonard Meere carried out a practice flight of just over two hours. Later on the same day, Leonard Meere carried out a second practice flight. He took off from #6 EFTS at 1540 hours on a routine solo training exercise in Tiger Moth aircraft #1168. This time, the aircraft reached a maximum altitude of 5000 feet and had achieved an average altitude of 3000 feet, when after approximately 35 minutes of flying time, it crashed about ten miles North-West of the main aerodrome at Prince Albert. The cause of the accident was recorded as obscure. Leonard Meere was killed instantly--his skull and brains were crushed and his heart ruptured.

Shortly after the crash, Thomas and Edith Meere in Sarnia received a cable informing them that their son Leonard had been killed in a flying accident at Prince Albert, Saskatchewan. Two days after Leonard's death, Edith received the birthday present her son Leonard had sent her. It was a small green leather prayer book with a golden cross on the front. On the outside cover was printed "Common Prayer Hymn Book of Canada", and inside was his hand-written message, *"Happy Birthday, Love - Len"*.

Leading Aircraftman-Pilot Leonard Raymond Meere

One day later, the family received a communication from the Commanding Officer of the #6 Elementary Flying Training School at Prince Albert. It read, *I would like you to know, that as an honor to one who sacrificed his*

life in the course of duty, the remains were enfolded in the Royal Canadian Air Force ensign, before being placed in the casket.

With sincere sympathy, yours very truly, A.T. Chesson.

Among the items collected in Leonard Meere's personal belongings were some clothes, toiletries, tobacco, post cards and his Sarnia Collegiate yearbook. Leading Aircraftman-Pilot Leonard Meere and another Sarnian, Pilot Officer Hugo Farner (who died September 24 on an instruction flight in Quebec and is included in this Project), were buried barely a wingspan apart in Sarnia's first double military funeral on September 28, 1943. Hundreds of relatives and friends attended both services, which drew thousands to the streets, around the churches, and along the walking routes to Lakeview Cemetery. Pallbearers, honorary pallbearers and a firing party came from R.C.A.F. flying school at Centralia. The Sarnia Air Cadet No. 44 Squadron band played at both funerals and they also provided an escort party.

The service for both began at the Robb Funeral Home. The service for Leonard Meere was continued at St. George's Anglican Church where it was officiated by Rev. F.G. Hardy, while the service for Hugo Farner was led by Rev. J.M. Macgillivray at St. Andrew's Presbyterian Church. Led by the firing party, the band and the escort party, the funeral corteges left their respective churches and marched slowly to the cemetery. At Lakeview, they again slow-marched to the gravesides, with the band playing the "Dead March in Saul". After the ministers conducted graveside services, the firing party delivered three volleys, with the band playing "Abide With Me" between them. Two buglers who accompanied the firing party from Centralia then stepped to the end of the graves and sounded the "Last Post". The pallbearers for both funerals were LACS L. Renaud, W. Cline, J. Young, R. McDermott, J. Smuk and R. Hill. One of those in attendance at the funeral of Leonard Meere was his young fiancée, Miss Gwen Robinson.

In September 1945, Thomas and Edith Meere received a War Service Gratuity of \$52.50 for the loss of their youngest son. As well as his parents and two older brothers, Leonard was also survived by his grandmother, Lucy Denton of Toronto, and his uncle, Albert Meere of Toronto, the only other living relatives in Canada. Nineteen year-old Leonard Meere is buried at Sarnia (Lakeview) Cemetery, Sarnia, Ontario, Section E. Lot 141. On his headstone are inscribed the words, REST IN PEACE.

Of the 2467 student pilots trained at No. 6 EFTS, most were RCAF and 475 were RAF airmen. The school closed on November 15, 1944. The aerodrome is now the Prince Albert Airport, and all that remains of the former No. 6 EFTS is one World War II era hanger. The city of Prince Albert renamed the airport Glass Field in honour of a local man with a long history as a pilot and pilot instructor during World War II. A monument was erected in front of the terminal building that commemorates No. 6 EFTS/AOS and pays tribute to the 17 airmen and one civilian who died in training accidents there in wartime – one of the names inscribed on the plaque is Sarnia's Leonard Meere.

MELLON, Ralph Jackson (#R/205716)

Ralph Jackson Mellon, 20, enlisted with the RCAF when he was eighteen years old. Ralph showed so much promise, that his commanding officer referred to him as one of his "ace gunners." Unfortunately, Ralph was killed on his first mission to bomb Germany, when his plane collided with another in his squadron over the Baltic Sea. Ralph's body was never recovered.

Ralph was born in Sarnia on May 29, 1924, the eldest son of Allan Alexander and Jessie May (nee Jackson) Mellon. Point Edward born Allan Mellon married and Jessie Jackson of Sarnia on March 30, 1918, and they would have three children together: Ralph and his twin sister, Ruth Evelyn, and Donald Charles, born nearly five years later on May 5, 1929. Allan supported Jessie and his children by working with the Canadian National Railway as a pumpman.

Ralph knew how to keep himself busy. He attended S.S. #15 Medowle Public School from 1930 to 1937 and then Sarnia Collegiate Institute from September 1937 to March 1941 until he left at age seventeen. He was active in basketball and softball, and his hobby was motorcycles. Prior to enlisting, Ralph was employed as a truck driver in Sarnia at White Packing Company (1940-August 1941) and then as a machine operator and welder at Electric AutoLite. Ralph also served with the 2-26th Field Battery Reserve in Sarnia as a Gunner from June 1941 until he enlisted.

The family dynamic changed when Ralph was eighteen years old. On July 13, 1942, his mother, Jessie, passed away. She was only forty-eight. One can only wonder if his mother's death influenced Ralph's decision at age eighteen to enlist four months after her death.

Ralph Mellon enlisted in the Royal Canadian Air Force on November 17, 1942 in London, Ontario. He stood five feet eight inches tall, had hazel eyes and brown hair, was single, and was living at R.R. #1 Sarnia with his widowed father at the time. Ralph requested flying duties, with a desire to be a pilot, but was eager to take on any role as part of an aircrew.

From #9 Recruiting Centre in London and #1 Manning Depot in Lachine, Quebec, Ralph received his air training with a Pre-Aircrew Education Course in Hamilton; then at #4 Wireless School in Guelph; at #1 Manning Depot in Toronto; and at #9 Bombing and Gunnery School (B&GS) in Mont Joli, Quebec, where he was awarded his Air Gunner's Badge on March 24, 1944. He then continued his training at #3 Aircrew Graduate Training School (AGTS) in Three Rivers, Quebec, before being posted to #1 Y Depot in Lachine, Quebec in early May 1944.

Flight Sergeant-AG Ralph Jackson Mellon

Ralph Mellon embarked overseas from Halifax bound for the United Kingdom on May 25, 1944. Initially posted to #3 Personnel Reception Centre (PRC), he was transferred to #22 Operational Training Unit (OTU) in July 1944. Two days before Christmas Day 1944, he was transferred to #433 Squadron. Just over three months later, in early April 1945, Ralph became a member of RCAF #431 Iroquois Squadron "The Hatiten Ronterriios" (Warriors of the air), part of **Bomber Command**, with the rank of Flight Sergeant-Air Gunner.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

RCAF #431 Squadron had been formed in Britain in November 1942, based at RAF Burn and was equipped with Vickers Wellington aircraft. In July 1943, it moved to RAF Tholthorpe and converted to Handley Page Halifax aircraft. In December 1943, the squadron moved again, to RAF Croft. The squadron remained at Croft for the remainder of the war, and in October 1944 would be equipped with Lancasters.

Less than a month after joining #431 Squadron, Gunner Ralph Mellon lost his life in action. On April 25, 1945, Ralph was a part of a crew aboard Lancaster Mk.X aircraft KB831 (markings SE-E) that took off from Croft at 1455 hours for a day bombing operation targeting gun positions in Wangerooge, Germany. Their Lancaster aircraft KB831 and Lancaster aircraft KB822, both from the #431 squadron, were in a mid-air collision at approximately 1718 hours, 12,000 feet, over the Baltic Sea off Norderney on their way to their target. Both aircraft fell into the sea. Extracts from the report on the flying accident included: *...daylight, visibility good, aircraft flying in Gaggle formation, and ... at 1718 hours, 12000 feet, two Lancaster aircraft collided in mid-air, at position 5352N. 0740E. ... One went down on fire, and the other broke up in air. Six chutes were seen, and ... There is no conclusive evidence as to the cause of this accident.* Six of the seven aircraft lost on this mission were as a result of mid-air collisions, despite weather conditions being almost perfect.

Lancaster KB831 casualties were Flight Sergeant-Air Gunner Ralph Mellon along with F/L. Robert John Stingle; Barry Desmond Emmet; F/O. William Edward Hanna; WO. Clarence Robert Irwin Mark; Sgt. John Nugent Sims (RAF); and Sgt. Douglas Alexander Faulkner (RAF). F/L R.J. Stingle's body washed ashore and was buried in Cuxhaven Cemetery. Sgt. J.N. Sims body also washed ashore, at Langeoog Island and was buried in the military cemetery there. The rest of the crew, including Ralph Mellon, were lost at sea.

In late April 1945, widowed father Allan Mellon at 205 ½ North Front Street in Sarnia received a telegram from the Department for National Defence for Air in Ottawa informing him that his son, FLIGHT SERGEANT RALPH JACKSON MELLON WAS REPORTED MISSING IN ACTION RECENTLY AFTER AIR OPERATIONS OVER ENEMY TERRITORY. A few days later, Allan received the following letter from the Wing Commander, Officer Commanding, No 431 (RCAF) Squadron:

Dear Mr. Mellon,

Before you receive this letter you will have had a telegram informing you that your son Sergeant Ralph Jackson Mellon is missing as a result of air operations. At approximately 1501 on the afternoon of the 25th instant, Ralph and members of his crew took off from this aerodrome to carry out operations over WANGEROOGE, but unfortunately failed to return.

It is with regret that I write to you this date to convey the feelings of my entire Squadron, Ralph was popular with this Squadron, and was fast becoming one of my "ace" Gunners. Ralph had just started operational flying and this was his first trip over enemy territory.

There is always a possibility that your son may be a prisoner of war, in which case you will either hear from him direct, or through the Air Ministry who will receive advice from the International Red Cross Society. Ralph's effects have been carefully gathered together and forwarded to the Royal Air Force Central Depository, where they will be held until further news is received, or in any event for a period of at least six months before being forwarded to you through the Administrator of Estates, Ottawa.

On behalf of the Officers and men of the Squadron, may I express my most sincere sympathy to you at this very anxious time.

A little over one week after receiving the above letter, on May 8, 1945, VE Day was declared, ending the war in Europe.

In early May 1945, Allan received a letter from the R.C.A.F. Casualty Officer, for Chief of the Air Staff in Ottawa. Following is a portion of that letter:

Dear Mr. Mellon:

It is with deep regret that I must confirm our recent telegram informing you that your son, Flight Sergeant Ralph Jackson Mellon, is reported missing on Active Service.

Advice has been received from the Royal Canadian Air Force Casualties Officer, Overseas, that your son and the entire crew of his aircraft failed to return to their base after taking off to carry out air operations over Wangerooge Island, Germany, on April 25th, 1945.

The term "missing" is used only to indicate that his whereabouts is not immediately known and does not necessarily mean that your son has been killed or wounded. He may have reached enemy territory and might be a Prisoner of War; and should you receive any card or letter from him please forward it at once to the Royal Canadian Air Force Casualties Officer, Air Force Headquarters, Ottawa. Enquires have been made through the International Red Cross Committee and all other appropriate sources and I wish to assure you that any further information received will be communicated to you immediately.

Attached is a list of the members of the Royal Canadian Air Force who were in the crew of the aircraft together with the names and addresses of their next-of-kin. Your son's name will not appear on the official casualty list for five weeks. You may, however, release to the Press or Radio the fact that he is reported missing but not disclosing the date, place or his unit.

Permit me to extend to you my heartfelt sympathy during this period of uncertainty and I join with you and the members of your family in the hope that better news will be forthcoming in the near future.

In early November 1945, Allan received the following letter from the Air Marshal, Chief of the Air Staff:

Dear Mr. Mellon:

I have learned with deep regret that your son, Flight Sergeant Ralph Jackson Mellon, is now for official purposes presumed to have died on Active Service Overseas on April 25th, 1945. I wish to offer you and the members of your family my sincere and heartfelt sympathy.

It is most lamentable that a promising career should be thus terminated and I would like you to know that his loss is greatly deplored by all those with whom he was serving.

Ralph Mellon was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas (Germany)*. In April 1946, widowed-father Allan Mellon received a War Service Gratuity of \$304.55 for the loss of his elder son. In February 1947, Allan received the following letter from the Wing Commander, for Chief of the Air Staff in Ottawa:

Dear Mr. Mellon:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son, Flight Sergeant R.J. Mellon. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

Twenty year-old Ralph Mellon has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom, Panel 282.

MENDIZABAL, Rodolfo (#J/15049)

Rodolfo Mendizabal's trademark calm and unflinching courage while fighting the enemy never deserted him. And in his experiences as an RCAF pilot in the Far East, Rodolfo, nicknamed "Rudy" and "Dizzy", faced death many times. He survived against improbable odds until he died during a training flight on August 10, 1943.

Rodolfo was born in Toronto, Ontario on March 5, 1918, the only son of Augustin Ranulfo and Mary Wilhelmina (nee Dafoe) Mendizabal. Born in Oruro, Bolivia, Augustin wed Mary in her hometown of Madoc in Hastings County on February 17, 1917 in Madoc, Hastings County, Ontario. The young couple had two children together: Rodolfo and his younger sister, Mary Isabel, born June 2, 1920 in Toronto (she later resided in Amherstburg, before returning to Toronto. A school teacher, she lost her fiancé to the war).

Augustin Mendizabal became a British citizen in 1915 and was a graduate in Civil Engineering from the University of Toronto and a graduate from the College of Education. During World War I, Augustin served overseas for two years and won a Distinguished Conduct Medal in France. He eventually became a long-time language teacher at Sarnia Collegiate. The Mendizabal family lived at 496 London Road and later 309 ½ North Brock Street.

Rodolfo's sister Mary Isabel
1938 – SCITS
Member of Editorial Board

Rodolfo attended Renfrew Public School from 1925-1929 but completed his elementary education (1929-1931) at a local school after the family moved to Sarnia. He then attended Sarnia Collegiate from 1931-1936. While at SCITS, he was heavily involved in many groups and became what one would term a "well-rounded student".

Rodolfo was the Boys Sports editor for the yearbook and was a member of several teams including the gymnastics, wrestling and rifle teams as well as the first aid team. He was also active in swimming, boxing, hockey, rugby and soccer. Besides sports, he was accomplished in music and languages, the latter no doubt influenced by his father. He was part of the school band where he played the clarinet and, along with English, he also had a sound knowledge of French, German and Spanish. Perhaps influenced by his father's service in the Great War, Rodolfo was part of the Sarnia Collegiate Cadet Service in 1936 and won second prize at the provincial indoor pistol matches at Listowel. While part of the rifle team, he won a special gold medal for shooting accuracy and a Dominion Marksman gold ring.

After completing high school, Rodolfo attended the University of Toronto, in the Bachelor of Arts program from 1936 to 1940, where he also took courses studying chemistry and mineralogy. He was a member of the U. of T. Gymnastics team and took Canadian Officer Training Corps (C.O.T.C.) training in 1939-40. In the summer of 1938, he worked for Ontario Research Foundation in Toronto doing steel analysis, and in the summer of 1939, he worked for the Dominion Salt Company Limited in Sarnia. In mid-February 1940, Rodolfo completed his Non-Permanent Active Militia of Canada Attestation application in Toronto.

On August 23, 1940, twenty-two-year-old Rodolfo Mendizabal enlisted in the Royal Canadian Air Force in Toronto. He stood five feet four and a half inches tall, had brown eyes and dark brown hair, was single, and was residing at 321 Bloor Street, West in Toronto at the time (he recorded his permanent address as 496 London Road, Sarnia). He was planning to enter his final year in obtaining his B.A. Degree at the University of Toronto, but enlisted instead, requesting flying duties, with a preference to be a pilot. He planned to complete his education after the war was over.

Portions of two of the reference letters written on Rodolfo's behalf in his application give a glimpse of his character. His uncle at the Medical Arts Building in Toronto wrote that Rodolfo *has a strong patriotic urge just now to help in this war, and this desire is probably reinforced by his wish to follow his father's example in the last war.* His Physical Education Professor at U. of T. wrote that *At all times under all conditions, his conduct and behavior was in line with his training – thoroughly disciplined, dependable and responsible to any trust put upon him to discharge. His manner is quiet and unassuming, his character is exemplary, his personal habits clean and beyond reproach.* Little wonder that the RCAF Recruiting Officer wrote this of Rodolfo: *An excellent type – splendid education – should make a first rate single seater fighter pilot. Has had a fair amount of military training. Strong on sport.*

From #1 Manning Depot in Toronto, Rodolfo received his air training at #3 Training Centre (TC) in Ottawa; at #1 Initial Training School (ITS) in Toronto; at #1 Elementary Flying Training School (EFTS) in Malton; and at #1 Service Flying Training School (SFTS) at Camp Borden, where he received his Pilots Flying Badge on April 28, 1941. Two weeks later, on May 12, 1941, Rodolfo was posted to #1 Manning Depot in Halifax, Nova Scotia. On May 29, 1941, Rodolfo embarked overseas from Halifax bound for England.

Initially posted to #3 Personnel Reception Centre in the U.K., he was transferred to No. 59 Operational Training Unit (OTU) on July 7, 1941 where he continued his training. Soon Rodolfo became a member of **Fighter Command**. On August 26, 1941, he was posted to RAF No. 136 Squadron where he would fly Hawker Hurricanes. In mid-November 1941, he was appointed his commission with #136 Squadron, at Kirton-on-Lindsay, Lincolnshire. There he gained experience in taking photographic mosaics and obliques and in conducting escort duty and runner torpedo attacks.

In November 1941, RAF No. 232 Squadron departed England for the Middle East. By the time they arrived in South Africa, Japan had entered the war and the squadron was diverted to Singapore in the Far East. On January 13, 1942, Mendizabal arrived at Singapore with a reinforcement convoy of RAF aircrew and 51 crated Hurricane II fighters. He became part of No. 232 Squadron (the Hurricanes had also been diverted from the Middle East to the Far East to supplement the few Buffalo fighters defending the island fortress). With the airfields near the city already too dangerous to use, the squadron embarked two days later aboard the Royal Navy aircraft carrier *HMS Indomitable* bound for Malaya. Following the Japanese invasion of the Malayan peninsula on December 8, 1941, by the end of January 1942, there were no airfields left in British hands, so the squadron flew off to Java.

On January 22, 1942, Mendizabal was in action flying a Hurricane against some Japanese Navy Fighters over Malaya. His aircraft was badly shot up with bullets in the engine and there was considerable damage to the undercarriage. Both tires were punctured and he sustained a bullet flesh wound in the leg. In spite of this, he managed

to land his torn up Hurricane aircraft on damaged landing gear and was fit for flying four days later.

One week later, on January 29, his Hurricane II aircraft crashed due to landing gear technical problems and he survived unscathed. Sometime in the early part of 1942, Rodolfo wrote a letter to his parents in Sarnia informing them that he had been transferred to a Royal Air Force squadron in Calcutta, India.

On February 2, 1942, #232 Squadron arrived in Palembang on the island of Sumatra. Following the Japanese invasion of Sumatra on February 13, a further withdrawal was required. The following day the squadron evacuated to Java and the situation regarding serviceability was so grave that No. 232 was merged with No. 242 Squadron, and its ground crews were evacuated to Ceylon. Operating alongside No. 605 Squadron, the two fighter squadrons were in action in Java from February 17-27, often operating at odds of ten to one or worse. It was a last ditch defence as soon, Java would also be in the hands of the Japanese.

The Japanese forces landed in Java on March 1, 1942. Days later, a stranded Mendizabal, two Australians, a New Zealander, and a Dutchman would make a daring escape from the soon-to-be "Japanese held" Java, in a makeshift Lockheed 10 aircraft. When orders for a cease-fire came through, every aircraft that could be flown out of the country had been destroyed as the Japanese advanced. Demolition parties were also ordered to blast holes in all the landing strips. This group of five Allied Force airmen were not willing to surrender: F/O Rodolfo Mendizabal (RCAF), Sgt. Stuart Munroe (RAAF), Sgt. Alan Bryant Martin (RAAF), Sgt. Douglas Jones (RNZAF), and Dutchman Frederik Pelder.

At the Pameungpeuk airfield, this international quintet came across an old abandoned Lockheed 212 training plane with a smashed tail in a corner of one flying field and another Lockheed that had been destroyed by a truck driving into it. The five men, pilots not mechanics, patched together the wrecks of the two damaged Lockheed 212 transport planes into a single airplane that could barely fly. For lack of a screwdriver, a coin was used to true up the replacement tail, which was tied together with rope. Forty-gallon wing fuel tanks were removed from another airplane and installed inside the fuselage with strings and bits of bamboo. A hole was made in the side of the fuselage through which a length of hose was jammed into the wing fuel tank, the idea being to feed from tanks inside the fuselage. A number of full 20-litre cans were carried into the cabin. On March 9, after the official surrender, the five airmen and their makeshift Lockheed was ready for flight.

The only clear takeoff path on the damaged airstrip ran in zig-zag fashion and was no more than the width of the landing gear. It seemed nearly impossible that the overloaded Lockheed could take off successfully. At the extreme end of the field, the engines were revved up to full power, the brakes were eased off, and the plane veered down the strip with craters whizzing by under the wings. The aircraft was bounced into the air by the lip of a crater, clearing the fence at the end of the field by inches.

Once airborne, they then flew in stages, each taking turns at piloting the twin-engine Lockheed for seven hours, first from Java, 1,200 miles to Medan in Northern Sumatra. The tired airmen spent March 10 at Medan, checking out the plane, looking for maps, and arranging for a refueling stop at Lho Nga, near Kata Rakja on the northern tip of Sumatra. The local Governor gave them codes which they were to deliver to the Admiralty in Ceylon, so that Ceylon could re-establish contact with Sumatra.

Early on the morning of March 11, the Lockheed left on its next hop, a 1,400-mile journey across the Bay of Bengal to Ceylon. They would alight to refuel at Lho Nga, still in friendly hands. The Dutch there helped to camouflage the aircraft during refueling, shielding it from Japanese reconnaissance aircraft in the area. On take-off, upon clearing the trees at the end of the airstrip, two Japanese bombers were diving down on the Lockheed. The aircraft was a few seconds ahead and was gradually able to pull out of range to escape over the ocean. After an eight-hour, 1,400-mile overwater flight, the Lockheed arrived at Colombo, Ceylon. Luck was on their side one more time as on their approach, they happened to fire the correct coloured flare, signaling the flak gunners not to fire on them.

A May 1943 newspaper account of the escape had the headline: "Escape From Java in Patched-Up Lockheed – International Quintet Fly Training Crate 2,600 Miles." The following is a portion of an account of their escape, as written by the New Zealander in the group, Sergeant Pilot Doug L. Jones of the New Zealand RAF (RNZAF). The account was sent to Mr. and Mrs. A.R. Mendizabal in a letter and printed in the *Canadian (Sarnia) Observer* on March 22, 1943, one year after the events:

Rodolfo Mendizabal and Four Flying Companions In Thrilling Air Escape

An epic story is told in a New Zealand paper of how Rodolfo Mendizabal, son of Mr. and Mrs. A.R.

Mendizabal, along with four companions, escaped from the Japs after the fall of Java. The task seemed so hopeless that none of those who knew what these young men were attempting, had any idea that they would succeed. The boys in the escapade were all sergeant-pilots, Rodolfo Mendizabal, the Canadian; Stuart Munroe and Alan Martin, Australians; Doug L. Jones, a New Zealander, and a Dutchman, whose name is unknown (was F.Pelder). Together, they feature in the best aerial escape story of the war. After the fall of Java, with Japanese troops a few miles away, they joined together the undamaged sections of two shattered aircraft and braving the hazards of distance and Jap Zeros, flew from Java to Sumatra and then on across the Bay of Bengal to Ceylon. Their story, which can now be told, throws new light on the last days of the Netherlands, East Indies. Here is their story, as told by Sergeant Pilot D.L. Jones, NZRAF.

"Fresh from Durban, I was in the last convoy into Singapore, and was bombed 26 times by as many as 50 Jap planes. Our convoy was one of the last to leave. We were there for three days, then came out on the same ship as we went in on. There were no planes for us to fly at Singapore, so there was no use in staying there. Anyway, the Japs had already landed on the island and the evacuation was in full force. In Java we were sent to Buitenzorg, 35 miles in from Batavia. We waited there hoping to get planes to fly. It soon became obvious that we were not to get any. When the Japs began attacking the island in earnest, they issued us all with rifles and ammunition with the idea of making a stand somewhere-sort of backs-to-the-wall stunt. This idea didn't appeal to us much, so a few of us got working on our own".

"They were short of transport to shift the camp, so half a dozen of us went into Balavia to see if we could pick up any lorries. Batavia by this time was a deserted city. The Japs had landed troops on each side of it. All around the docks there were sunken vessels, which had either been bombed or scuttled. The Dutch had sunk a large vessel across the harbor mouth to stop ant ship getting in. We found some lorries after a while, but the trouble was none of them would go-which was why they were left. But we each managed to repair a lorry and get back to camp. At 4 a.m. next day we were awakened, and told to get moving as the Japs were down the road. Fortunately, a few transports had come up and they were able to take the whole camp to the town of Garut, 140 miles away. We were there a week waiting for word to come through to tell us which port to go to. We did not know at the time that there wasn't an open port in Java. (Already blockaded Java's "escape port", Tjilitjap on the south coast, was completely destroyed by Jap bombers on March 5, a few hours after I left in the last ship to get away from Java)".

"At 10 p.m. on March 7 we received instructions that the town we were in was an open city, and we were to hand in our arms and await occupation. We asked the C.O. of our unit if he would let a few of us escape as best we could. He said he wouldn't. We told him to come back in half an hour and we would hand over our arms. In that half-hour we worked like mad, loading up our cars with food and ammunition. We had a couple of machine guns, which we had picked up at a bombed-out drone, a couple of Tommy-guns and dozens of rifles. We started out, reached the coast next day, and traveled along it, keeping a look-out for boats. Near a small native village called Pamaunpouk we found a deserted aerodrome with damaged aircraft scattered over it. A Dutch pilot and four of us sergeant-pilots looked them over and found a twin-engined Lockheed 10 with its tail blown off, but its engines in running order. Searching further, we found another machine of the same type, with the nose and wings smashed, but the tail untouched".

"We all hit on the same idea at once. With the few tools we had we started. I used a 6d for a screwdriver, and got tied up in knots with ballraces, and lockingpins and God knows what! We found that the tail part of the good machine was strained out of alignment, and we finished up tying it together with rope. We fitted a machine-gun in the turret and another in the nose, firing forward. There was plenty of petrol lying around the field in drums. We also found couple of spare wing tanks with a capacity of 40 gallons apiece, which we strapped inside the fuselage with bits of bamboo and string after plugging up some holes with cork and bits of wood. I bashed a hole in the side of the fuselage, fitted a piece of bowser-hose through, and jammed one end in the tank in the wing, with the idea of feeding petrol from the tanks into the fuselage. Next day at 9 a.m. we were ready. After figuring out the range of the plane, we found we could not quite make Australia, so we agreed to fly up the coast of Sumatra, as we had been told the top end was still in Dutch hands". "While we were repairing the plane, word came through that the Dutch government had capitulated, and that all members of the army were to proceed to Bandoeng to be demobilized. Before going, the Dutch destroyed the airfields-and a real job they made of it. They dynamited the whole field. We found the only clear patch ran in zigzag fashion barely the width of the undercarriage and with an overloaded plane it seemed a 10 to 1 chance that we wouldn't get off. The Dutchman had flown Lockheeds before, so he took the controls. At the extreme end of the field we revved the engines up until they were about to shake themselves to pieces, let off the brakes and

away we went. We zigzagged down the field with craters whistling by under our wing-tips. I looked ahead and thought we couldn't get off without hitting the fence at the end. I still don't think we would have, had we not hit the lip of one of the craters, which bounced us into the air. We cleared the fence by inches, got over the beach and out to sea. We flew 800 miles up the coast of Sumatra, then turned inland in the hope of finding an airfield. Later we discovered it was Medan airport. It was cluttered up with obstructions so we guessed it was still in Dutch hands. We couldn't see any signs of life, so we took it we had caused an air-raid alarm".

"We lowered our wheels and began to circle the field, wagging our wings. Soldiers appeared as if by magic and began clearing away the obstructions. Cars began to come in from the city packed with civilians and in a few minutes, hundreds of people were clearing the field so we could land. The Dutch treated us like kings. Next day we returned to our plane determined to try to get to Ceylon. The governor had given us codes, which we were to deliver to the admiralty if we got there, so as to re-establish contact with Sumatra. At Kuta Raja, on the northern tip of Sumatra, we had the same trouble in landing, but eventually got down OK. The Dutch immediately grabbed our machine, pushed it under cover and threw camouflaging over it, as they said the Jap reconnaissance plane was due over in five minutes. They set their watches by this plane, and at exactly 9 a.m. over she came. She circled us twice and then made off in a devil of a hurry. We guessed we had been spotted, so we started filling up as quickly as we could. We had just about finished when a lookout reported nine Jap bombers headed our way. We filled up in double-quick time while the Dutch soldiers were pulling off the camouflage and our Dutch pilot was revving up. Right in front of us was a whopping big hill, behind which we could see the Jap bombers heading toward us. The only thing to do was to turn as soon as we were in the air. We did it! We must have missed the trees on that hill by mere inches. We turned out to sea as fast as we could go with two of the Jap bombers armed with cannons diving down on us. But we were just those few seconds too soon for them. We just managed to keep out of range, and in the end gradually drew away from them. The old bus had a marvelous turn of speed when pushed. We owe our survival to that. We set what we thought was a course for Ceylon, but the only map we had was one of the world torn from a magazine. We had a job transferring petrol from the cabin to the wing tanks, but in the end found that by banking the plane over, we could gravity-feed it in".

"It was well into the afternoon when we did sight land. I was at the controls at the time and didn't know whether it was Ceylon or India. Knowing Colombo was on the other side of the island, I headed inland and ran slap-bank into hills and a hailstorm. Eventually we hit the coast and followed it down. Very soon we saw a large town and seaport ahead-Colombo. Then we had an uncanny bit of luck. There were a large number of warships in the harbor and on sighting us they started to challenge us with a signalling lamp. The correct thing to do when so challenged is to fire what we call 'colors of the day' with a Verey pistol. We had a Verey pistol on board and cartridges, but there are dozens of colors to choose from and they change the color every day. We had to shoot something off, so I picked up a two-star red, fired it and waited. We expected every gun in the harbor to open up on us, but nothing happened. We found the landing field and landed. We found out later that the colors of the day were a two-star red-just what we had fired. The trip from Java to Medan took seven hours ten minutes, and we landed with ten minutes petrol supply left. The flight from Kuta Raja took eight hours and we landed with 15 minutes supply left".

Of the five airmen who had survived the March 1942 escape from Java with Mendizabal, only one was to survive the war. Along with Mendizabal, also killed in wartime service were Sgt. Stuart Munroe, RAAF, killed in action as member of #75 Squadron at Milne Bay, New Guinea on August 27, 1942; Sgt. Alan Bryant Martin, RAAF, killed in a training accident as member of #76 Squadron in Queensland, Australia on May 21, 1942; and Sgt. (later F/O) Douglas Loftus Jones, RNZAF, killed in action as a member of #17 Squadron on a mission to Rabaul, New Guinea on January 9, 1944. Only the Dutchman, Frederik Pelder survived the war. He would go on to fly B-25's with No. 18 (Dutch) RAAF Squadron during the war, retire as a Colonel, and was awarded the Cross of Merit (for his escape from Java). After the war Pelder entered Netherlands civil aviation.

In August 1942, Mendizabal was posted to RAF #151 Operational Training Unit (OTU). In December of 1942, Rodolfo was part of a special escort. One of the highest-ranking officers of the R.C.A.F., Air Vice-Marshal Harold Edwards, was on an inspection tour of R.C.A.F. and R.A.F. establishments in India and Middle East theatres of war. It brought him to front-line fighter and bomber stations from which many Canadians were flying against the Japanese in Burma. He met airmen who called themselves, "the Canadians closest to the Japanese forces." Vice Marshall Edwards travelled in a Hudson bomber escorted by fighters. One of the fighters was piloted by F/O Rodolfo Mendizabal, of Sarnia, a veteran of Singapore and East Indies campaigns. At the time, Mendizabal did not claim any victories over the Japanese, but said that he had seen "plenty" of them.

The Burma Campaign had begun in December 1941 when the Japanese moved through Thailand and invaded the British colony of Burma. The Japanese saw Burma as a stepping-stone to India as well as protection for their troops fighting in the Malayan peninsula and in Singapore. It would be one of the longest campaigns of the war, fought primarily by British Commonwealth and Chinese and U.S. forces against the forces of Imperial Japan and their allies. The campaign had a number of notable features that included dense jungles, mountainous terrain, lack of roads for transport, prevalent disease, and weather conditions that included severe heat and monsoon seasons. Approximately 8,000 Canadians, including Sarnians, served in the Burma Campaign. Many of them were part of RAF squadrons carrying out duties that included doing reconnaissance, protecting convoys, dropping supplies and troops, escorting operations, conducting patrol and bombing missions, and becoming part of fighter squadrons.

By the end of 1942, Rodolfo Mendizabal had become a member of RAF No. 5 Squadron "Frangas Non Flectas" (Thou mayest break but shall not bend me). The Curtiss Mohawk fighter was the squadron's main aircraft at the time. From May 1942 to May 1943, the squadron was based in Assam, India, performing escort duties and ground attack sorties in Burma. In mid-1943, the squadron converted to Hawker Hurricanes and carried out Fighter Bomber duties. Along with carrying out attacks on enemy targets, the fighters of No. 5 Squadron provided bomber and transport escorts, and flew as escorts for Blenheims making reconnaissance flights.

In his book *Mohawks Over Burma*, Gerry Beauchamp described several of missions that Rodolfo "Rudy" Mendizabal participated in. He was flying a Curtiss Mohawk fighter when he was part of RAF No. 5 Squadron (while based at Agartala in Tripura, India). Following are some of those missions:

On December 25, 1942, No. 5 Squadron took part in a major sortie over Burma, flying from their base to Imphal, Ywamandaung, Yuwa, and Ye-U. The Mohawks attacked factory-like buildings, railway stations, shipping, Army-huts and an airfield. At Kenswe, a train consisting of trucks and a locomotive with steam was attacked. F/O Mendizabal did one run down the entire length of the train and saw DeWilde strikes (incendiary bullets), while another F/O (Rashleigh) concentrated on the engine, carrying out an attack from the side. Troops were seen to dash away. At the airfield, Mendizabal fired a short burst into a large bamboo hut. Further attacks were made on shipping before the formation returned to base.

On January 19, 1943, two sections of three Mohawks from No. 5 Squadron escorted Blenheim light bombers from Feni on a bombing attack on Akyab Island. At 0915 hours, some Japanese Army Nakajima Ki-43 fighters (code-named Oscars) were seen near Narigan. Some of the Mohawks engaged the Oscars while others continued escorting the Blenheims to their target before returning to the fight. The combat turned into a series of dogfights over the northern end of the island, lasting approximately 30 minutes. F/O Mendizabal claimed two enemy aircraft damaged. Two Oscars were downed and three of the Mohawks were slightly damaged.

On March 19, 1943, the RAF used Vultee Vengeance dive bombers on an operation for the first time, and No. 5 Squadron had the honour of escorting them on this first mission. Six Vengeances and six Bisley bombers were to rendezvous over Dohazari before proceeding to their target area at Hitgive. At 1600 hours, five Mohawks (one piloted by F/O Mendizabal) would escort the Vengeance dive bombers to the target, staying with them until the action was complete. The Mohawks were then supposed to escort back the Bisley twin-engine bombers on the return trip. The Mohawk pilots could not find the Bisleys, and so returned to Dohazari, landing at 1815 hours.

The next evening, a ration of two Australian bottles of beer was given out to each of the airmen in the Officers' Mess, to celebrate the promotion of W/O Harold Oskar Seifert, RCAF, to Pilot Officer. A piano was brought over from Wing, the men joined in singing songs and everyone had an enjoyable evening. Being the end of March, one member of No. 5 Squadron recorded that the weather was becoming increasingly unstable as the monsoon season approached. The days were still relatively fine but there were fitful winds and brilliant, almost continuous lightning at night.

On March 29, 1943, at 1520 hours, six Mohawks took off from a rough airstrip south of Chittagong, Bangladesh, codenamed Reindeer, near base camp Hove. One of the Mohawks was piloted by Rodolfo Mendizabal. The six aircraft were scrambled from Reindeer to intercept hostile aircraft approaching from the south (one of the Mohawks was airborne slightly later than the others, was unable to locate the group, so stayed airborne above the base). When in line abreast formation at 17,000 feet over Maungdaw, the five Mohawks (including Mendizabal) saw a dozen Oscars (Japanese Ki-43 fighters) at 16,000 feet, nine to starboard and three to port. The Japanese turned towards the Mohawks upon recognition and, in doing so, split up the five fighters. A confused melee ensued. One of the Mohawk pilots later reported that the Japanese seemed to work in pairs, one feigning attack by wagging his

wings, another on the other beam actually carrying out the attack. Mendizabal got in several long deflection bursts at one enemy aircraft which dove away. He also carried out a head-on attack on another Oscar which passed below him. He could not see strikes on either of these aircraft because his windscreen had oiled up. All five Mohawks were able to return safely to base, some riddled with bullet holes. As Mendizabal was coming up the coast on the return flight, his engine stopped and he made a belly landing about 20 miles (32 km) north of the base. He was unhurt, and according to the Operations Record Book, he later stepped out of a lorry at the base looking as though nothing untoward had happened.

‘B’ Flight of No. 5 Squadron at Agartala, early 1943.

Photo: “Mohawks Over Burma”

In early February of 1943, his parents in Sarnia received word from the Canadian government that their only son Rodolfo had been missing for several months in the eastern theatre of war. No other information was provided. A few weeks later, Augustus and Mary were advised by the government that the report of their missing son issued weeks earlier was incorrect. In a telegram, the Hon. C.G. Power, Minister of National Defence for Air, relayed a cablegram that he had received from Air Vice-Marshal Edwards in England in regard to Rodolfo Mendizabal. The Vice-Marshal said that Rodolfo had been an escort pilot with him while on a tour of India during December of 1942, and at the time Rodolfo was safe and well. The Vice-Marshal expressed his profound regret that there had been an official report that their son had been reported missing on air operations for several months. The Commander said that he would endeavour to obtain further information about the Sarnian’s whereabouts. He was later reported safe and had been in Burma since October 1942.

In mid-April 1943, Mendizabal was posted to the RAF base at Ramu, India and in July 1943 was posted to Air Fighting Training Unit (AFTU) based at RAF Station Amarda Road, India. Airmen were posted to AFTU to teach them various fighter flying tactics deemed valuable in the unique air war against the Japanese.

On August 10, 1943, Flying Officer-Pilot Rodolfo Mendizabal was aboard his Hurricane IID aircraft KW859 on a Fighter Affiliation training exercise (learning to be an Air Fighting Instructor). He was detailed with Flight Lieutenant Fogg of Amarda Road, Air Fighting Training Unit (A.F.T.U.), to carry out attacks with cine’ camera guns on a formation of Vultee Vengeances (dive bombers). At approximately 1140 hours, the formation was at 1,000 feet when his aircraft broke away downwards for his third solo attack. When it was very near the ground, at an angle of approximately 60°, the aircraft appeared to pull out slightly, but hit the ground and burst into flames immediately. The crash occurred four miles east of the Amarda Road Station at Subhanauika Bridge, India. Rodolfo died instantly of multiple injuries in the crash. The aircraft was badly smashed and the pieces were spread over a wide area.

In the investigation that followed, it was impossible to say from the ground examination exactly what happened. A portion of the investigators report reads as follows: *It appears to have hit the ground at a high speed at the bottom of a dive, in a slightly nose down attitude, rebounding and turning over. At the same time the fuel tanks exploded, and the aircraft disintegrated. The only burnt portion is the remains of the cockpit and fuselage, this being due presumably to the reserve tank exploding. The airframe has completely disintegrated, and the engine is very severely damaged, the crankcase being smashed, reduction gear torn off, and most of the accessories and their drives being broken away.* The investigation concluded that some failure of the controls was a possibility, but more likely, the pilot made an error of judgement that didn't allow him sufficient time to pull out of the dive.

On August 10, 1943, fellow pilot F/O Harold Seifert wrote a letter home to his mother Lydia and younger sister Trudy in Winnipeg, Manitoba. (Of note, Harold had lost his brother Pilot Officer Arnold Seifert in May 1942 during a raid over Germany). Following is a portion of Harold's August 1943 letter to his mother and sister:

I have received lots of mail in the last couple of days, with your pictures. Have you ever changed and seem to be a grown up girl, and not the little sister I left behind.

I was given some bad news just before I left for the hospital. One of our airplanes was seen to spin in and Mendizabal was the only one flying, so he must have been killed. He was quite a good friend of mine, and then you say you got a letter from his father, so it is really tragic. I just got the picture of he and I in the Free Press two days ago and I was going to show him.

Fatal accidents happened to two Canadians while RAF No. 5 Squadron was re-equipping with Hurricanes at Amarda Road. The first involved Rodolfo on August 10, 1943. The second was twenty-two-year-old F/O Harold Seifert, who was killed while carrying out a tactical formation exercise on November 8, 1943 (three months after Mendizabal's death). His Hurricane went into a dive at 8,000 feet and collided with the ground at a high speed and steep angle. He was buried at the scene of the crash at Kharagpur, near Bengal, 100 miles north of Calcutta, India. Harold Seifert is buried in Ranchi War Cemetery in India.

Rodolfo Mendizabal's name would appear on the official R.C.A.F. casualty list approximately one week after the crash. No other details were included in the report and no information was available locally as his parents Augustin and Mary Mendizabal were vacationing in Haliburton. The last word the parents had received from their son indicated that he was still in the Far East and there was some speculation as to whether he took part in the Sicilian campaign.

In late August 1943, Augustin Mendizabal of London Road in Sarnia received the following letter from the Flight Lieutenant, R.C.A.F. Casualties Officer, for Chief of the Air Staff in Ottawa:

Dear Mr. Mendizabal:

It is my painful duty to confirm the telegram recently received by you which informed you that your son, Flying Officer Rodolfo Mendizabal, was killed on Active Service.

Advice has been received from the Royal Canadian Air Force Casualties Officer, Overseas, that your son, who was the sole occupant of an aircraft, lost his life on August 10th, 1943, during flying operations at Subhanauika Bridge, four miles east of Amarda Road Station, India. His funeral took place on August 11th, 1943, at the Amarda Road Cemetery. Group Captain C. de Crespigny officiated.

You may be assured that any further information received will be communicated to you immediately. May I take this opportunity to offer both you and Mrs. Mendizabal my deepest sympathy.

Also in late August 1943, Augustin received the following letter from Flight Lieutenant C.S. Courtney-Clarke, Officer Commanding, No. 5 Squadron, R.A.F. India:

Dear Mr. Mendizabal,

It is with great regret that I must write to you about the sad loss of your son. He has not only been one of my pilots, but a personal friend ever since he joined the squadron, and we have been through a lot of fighting, and also a lot of fun together. "Dizzy" and I went on leave together only last month and had a grand time sharing a house boat up in Kashmir.

He was killed while flying a Hurricane at Amarda Road in Orissa. He was on a course there learning to be an "Air Fighting Instructor". I have had the report on his accident and apparently he misjudged his height while recovering from a practice attack on another aircraft, and hit the ground at great speed. There is no doubt that he was killed instantly.

He was buried at Amarda Road, with full Military honours, and representatives of the squadron flew down for the funeral. Please allow me to express on behalf of myself and all his other squadron friends the sympathy we all feel with you in your bereavement.

Rodolfo Mendizabal was later officially recorded as, Killed as a result of a flying accident, overseas (India). In October 1945, Augustin received a letter from the R.C.A.F. Casualty Officer, for Chief of the Air Staff. Following is a portion of that letter:

Dear Mr. Mendizabal:

Further to my letter of August 22nd, a reply has now been received to my enquiry Overseas and although his log book and operational record books of the Squadrons, with which he carried out his operational flying, are not available the following particulars have been secured through the R.C.A.F. District Headquarters, India.

He is recorded as having been posted to No. 59 O.T.U. on May 29th, 1941, and to No. 36 Squadron on September 4th, 1941, where he probably gained experience in taking photographic mosaics and obliques, and in escort duty and runner torpedo attacks.

On November 18th, 1941, he was posted to No. 136 Squadron at Kirtoon-on-Lindsay and appears to have gone with that Squadron to Singapore where he disembarked on January 13th, 1942, and commenced operations with 'B' Flight from Seletah airfield on January 19th.

On January 22nd, 1942, he was in action against some Jap. Navy Fighters, flying a Hurricane. His aircraft was badly shot up with bullets in the engine and there was considerable damage to the undercarriage. Both tyres were punctured and he sustained a bullet flesh wound in the leg, but in spite of this he landed his aircraft safely and was fit for flying again on January 26th, 1942.

On January 29th, Sgt. Mendizabal crashed in landing a Hurricane. In lowering his undercarriage for landing it carried on past the normal vertical position.

On February 2nd, 1942, he sailed with No. 136 Squadron ground personnel and a few pilots from Singapore in the SS. Whangpu, arriving at Palembang in Sumatra on February 4th, and commenced operating from Palembang 1, and also assisted in the Control Room of No. 226 Fighter Group. The Japanese made a parachute attack on Palembang 1 and caused the Squadron to evacuate to Palembang 2 on February 14th, 1942, and the following day, when Sumatra was evacuated, Sergeant Mendizabal probably left P.2 by air for Java.

On February 20th, 1942, he commenced operating with the Squadron from Tjililitan near Batavia, and on February 24th was attached with the Squadron C.O. and the remainder of the serviceable pilots to No. 242 Squadron. When the Squadron arrived in Java, verbal information was received that Sgt. Mendizabal had been commissioned, but no official confirmation ever reached the Squadron.

After being with No. 136 Squadron in India from March 17th, 1942, Sgt. Mendizabal was posted to No. 151 O.T.U. on 2nd August, 1942, to No. 224 Group on October 19th, 1942, and to No. 5 Squadron on October 29th, 1942.

Squadron Leader N. Welch, R.A.F., R.A.F. Station, New Delhi, who supplied most of the foregoing information pertaining to No. 136 Squadron, was under the impression that Sgt. Mendizabal had not escaped from Java until another N.C.O. of the Squadron informed him that the Sgt. was in India. He has no knowledge of how Sgt. Mendizabal escaped. However, four of the aircraft left behind in Java did get out to Australia, and it has been suggested that the following personnel may be able to supply information as to what happened in Java after 24th February, 1942...

If you will write to the above mentioned personnel in care of R.A.F. Records Office, Gloucester, your letters will be forwarded to them at their latest address, most promptly. I am giving you the names of the four above mentioned as I felt you would wish to communicate with them yourself.

In late-February 1947, Augustin, then residing on North Brock Street, received the following letter from the Wing Commander for Chief of the Air Staff in Ottawa:

Dear Mr. Mendizabal:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son, Flying Officer R. Mendizabal. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

In late-November 1951, Augustin received the following letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff:

Dear Mr. Mendizabal:

It is with regret that I must again refer to the loss of your son, Flying Officer Rodolfo Mendizabal. The Imperial War Graves Commission has advised, however, that your son has been moved to the Balesore New Cemetery, hundred miles north east of Cuttack, Orissa, India, he was laid to rest in Grave 53, in the Military Plot. Your son's grave will be reverently cared for and maintained in perpetuity by the Commission who will also erect a permanent headstone over the grave. May I take this opportunity to extend my sincere sympathy.

In March of 1945, the "FO. Rodolfo Mendizabal Shooting Trophy", named in honour of the young flier, was presented during assembly in the auditorium of Sarnia Collegiate Institute, to Pte. Angus Young, of the Army Cadet Corps. The young cadet achieved the highest shooting scores in a contest held in the collegiate rifle range, among entrants from the three Sarnia cadet corps-Army, Navy and Air. Rodolfo's father, Augustin Mendizabal, who was a member of the Collegiate Institute teaching staff, presented the trophy, a silver statue of an athlete upon a mahogany base.

Ten years after the end of World War II, on November 11, 1955, the "new" renovated Sarnia cenotaph in Victoria Park (now Veterans Park) was re-dedicated. The renovated grey granite monument had been enlarged by the addition of two new "wings", on which were inscribed the names of Sarnia's fallen soldiers from World War I, World War II along with a plaque with the Korea War fallen. The prior existing WWI bronze tablets had been removed and are now located on the outside west wall of the Royal Canadian Legion, Branch 62. The November 11th, 1955 re-dedication ceremony was preceded by a parade consisting of civic, military and veteran units marching from city hall to Victoria Park. During a Friday morning drizzling rain, the cenotaph was unveiled by Lieutenant-Colonel J.H. Coleman, M.B.E., Ed, Commanding Officer of the Sarnia Garrison, followed by a dedication ceremony by Rev. G.G. Stone. The first wreath laid upon the cenotaph was by Captain and Mrs. Augustin R. Mendizabal on behalf of all the next of kin.

Rodolfo Mendizabal, 25, is buried in Madras War Cemetery, Chennai, India, Grave: 9.B.7. On his headstone are inscribed the words, BORN IN TORONTO, CANADA, 5TH MARCH 1918. STUDENT AT THE UNIVERSITY OF TORONTO.

METCALFE, William Stuart (#A/50101)

Sarnia born William "Bill" Metcalfe was only nineteen years old when joined the army. Two and a half years later in England, he married his British bride, and they later had a son together. William served in Italy for 16 months before moving into northwest Europe, fighting in France, Belgium and Germany. One month after VE day, William lost his life in a tragic accident in Holland.

William was born in Sarnia on February 21, 1921, the only son of Karl Steadman and Julia Stuart Metcalfe. Karl and Julia were married on April 17, 1920 in Sarnia, Ontario (they would divorce in 1938). William's

grandfather was Lieutenant Colonel William Wallace McVicar, a veteran of the Great War, who lived in Sarnia. William attended public school in Petrolia, and then completed his education at Sarnia Collegiate Institute. William participated in swimming and basketball. He was a member of Central United Church and of the Central Century Club, serving as the club's pianist on Sunday afternoons. William was also able to obtain First Class Honours in his second year from the Toronto Conservatory of Music. Prior to enlisting, he was a grocery store clerk and manager in Byron, Ontario from September 1938 to July 1939, earning twenty-five dollars a week.

At age nineteen, William Metcalfe enlisted in the Canadian Army on August 13, 1940 in Chatham, Ontario with the Kent Regiment. He stood five feet eight inches tall, had hazel eyes and dark brown hair, and lived with his mother Julia Metcalfe at 309 North College Street, Sarnia at the time. Julia was employed as a supervisor at the Port Huron Michigan General Hospital. His father Karl, an accountant, was living at 326 Dundas Street, London, Ontario at the time. William's plan for after the war, was to enter the Civil Service, possibly the postal department.

William began his training with the Kent Regiment in Chatham (army trade school), before transferring to #1 District Depot in London. In May 1941, he trained at #12 Basic Training Centre in Chatham, taking an electricians' course. Two months later, he trained at Canadian Army Training School (CATS) in Hamilton. In September 1941, William was posted to Camp Borden with the 5th Canadian Armoured Division, as a Signaller. Two months later, William embarked overseas for England on November 14, 1941. Initially appointed Lance Corporal, he would revert to Signaller, serving in the U.K. with the Royal Canadian Corps of Signals 5th Canadian Armoured Division.

Signalman William Stuart Metcalfe

While in the U.K., William met and fell in love with a British woman. After a six-month relationship and receiving written permission to marry from his Commanding Officer, William married Helen Rosa Appleby on February 17, 1943 at the Chelsea Registry Office, Middlesex, England. Helen, born June 28, 1920 in St. Pancras, London, England, was serving with the Canadian Army in England, a Private with the No. 1 Royal Canadian Corps of Signals (RCCS). William and Helen had one child together, a son, Terrence William Stuart Metcalfe, born September 12, 1943 in Lingfield, England. The young Metcalfe family lived at 207 Walton Road, East Molesey, Surrey, England.

William departed the United Kingdom bound for Italy on October 24, 1943. The **Italian Campaign**, the first sustained Canadian Army operation of the War, had begun with the invasion of Sicily on July 10, 1943. The fierce fighting on the island lasted more than four weeks, during which the Canadians would advance through difficult mountainous terrain, against an ever-stiffening German resistance. By August 17, the Germans had evacuated the island to the Italian mainland. In early September, Canadian and Allied forces would invade Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl, lasting 20 months, over a range of landscapes, through challenging weather, and against a series of well-protected defences held by some of the German army's best troops.

William Metcalf served in Italy with the 5th Canadian Armoured Division Signals, Royal Canadian Corps of Signals (R.C.C.S.), part of the British 8th Army in the Central Mediterranean Forces. In late 1943, not long after his

arrival in Italy, he wrote a letter to his grandfather in Sarnia, Lt. Colonel William W. MacVicar. The following are portions of that letter:

I never saw so much filth and poverty anywhere. These towns are beyond all imagination. The first few days here were beautifully warm, and we thought there was something to this "Sunny Italy" business, despite the fact that the nights almost "did us in". Don't know when I ever ran into such bone-biting coldness. You can put on everything you own, and still shake like a model T Ford.

Then came the rains, and believe me, it has everything that England ever showed us in the way of rain beaten by a mile. We are bivouacked in a vineyard, using pup tents as a home. They aren't too bad except that every time you touch the canvas when it is raining, the water pours through in torrents, and being so low we are always touching them, so, there being no room upward, we decided to go down, and now are sleeping some three feet below the surface of the ground in something that is a cross between a tent and a dugout. It is not bad, though, and actually it is comparatively dry and quite warm. We are thankful that conditions are no worse than they are. They definitely could be very much worse. The food is good and can be supplemented with all kinds of oranges, apples and nuts.

The one thing here worth mentioning is the music one can hear anywhere in the streets. It seems to be the only thing these people can do properly, and they do it under the least provocation. Some poor broken specimen of humanity shuffling along will suddenly burst forth in a flood of song that would put Nelson Eddy to shame, and when they get about half "vino-ed" up you should hear them.

Speaking of "vino", it is no wonder these people got licked at every turn of the wheel if they have been drinking that brew ever since they were infants. It's vile! About the only thing I can say for it is that it would make good ink.

William served in Italy until February 26, 1945, when the Italian Campaign ended. The following day, he embarked for the Northwest Europe Theatre, first arriving in France. He continued to serve with the 5th Canadian Armoured Division Signals, R.C.C.S., as they advanced through France and Belgium towards Germany. On May 7, 1945, Germany surrendered, and VE Day, marking the end of war in Europe, was celebrated on May 8, 1945.

Approximately one month after VE Day, on June 4, 1945, William Metcalfe lost his life in a tragic accident in Groningen, Holland. On the night of June 3, 1945, he along with a few of his comrades, attended a Unit dance being held in the Appollo Club in Groningen. After the dance, he and his comrades left the club and returned to their quarters at about 0130 hours, June 4. At about 0200 hours, William left alone from his billet accommodation. At the 0900 hours roll call that morning, William was absent. Five days later, on the morning of June 9, 1945, his body was recovered from the Loopende Canal in Groningen.

In the investigation that followed, it was determined that at some time in the very early hours of June 4, William had been walking on the cobble-surfaced street alongside the Loopende Canal when he fell in and accidentally drowned. The canal was approximately 40 feet wide, varied in depth from 10 to 15 feet, and had no curb or railing at the edge of the street forming the canal wall. William's body was discovered in the canal five days after he fell in and was recovered. He was buried on June 9, 1945 at 5th Canadian Armoured Division Temporary Cemetery, Groningen. His remains were later reburied in Holten Canadian Military Cemetery.

In mid-June of 1945, Lt. Col. William W. McVicar in Sarnia was notified of the death of his grandson, Signalman William Stuart Metcalfe, which had occurred in Holland on June 4. Also in mid-June 1945, Julia Metcalfe on College Street received the following letter from a Major-General, Adjutant-General:

Dear Mrs. Metcalfe:

It was with deep regret that I learned of the death of your son, A50101 Signalman William Stuart Metcalfe, who died while in the Service of his Country in the Western European Theatre of War on the 4th day of June, 1945.

You may be assured that any additional information received will be communicated to you without delay. The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement.

William Metcalfe's death was later officially recorded as, *Overseas casualty, in the field (Holland), cause of death accidental drowning*. William left behind his parents Karl and Julia Metcalfe in Canada, and his wife of a little over two years Helen, and their one year-old son Terrence, in England.

In July 1945, Karl and Julia Metcalfe began the application process with the Director of Immigration to bring their daughter-in-law Helen and their grandchild Terry to Canada. The hope was that they would come to Canada to

live either with Karl at 22 Duke Street, London, or with Julia, who was living with her parents Colonel and Mrs. McVicar at 309 North College Street, Sarnia. In December 1945, Helen, still in England, received a War Service Gratuity of \$988.68 for the loss of her husband. In February 1946, the Director of Immigration approved the settlement arrangements for Helen and Terry Metcalfe to come to Canada. They initially resided with Karl on Duke Street in London, and by June 1946, were residing on their own at 277 Steele Street, London.

William Metcalfe, 24, is buried in Holten Canadian War Cemetery, Netherlands, Grave VI.B.13. His name is also inscribed on the Petrolia cenotaph.

MILLER, David Douglas (#R/68104)

David Douglas Miller was operating his own business in Sarnia when he joined the air force. During his training he found time to marry his fiancée. One month later, he embarked overseas. After completing thirty-seven operations in one of the most dangerous postings of the war, he sacrificed his life for the Allied cause. He left behind his wife and their two year-old daughter.

David was born in Sarnia on November 5, 1915, the eldest son of Douglas Martin and Iva Ellen (nee Shephard) Miller, of 394 Campbell Street, Sarnia. Douglas (born in Sombra) and Iva (born in Wilkesport) were married in Wilkesport, Ontario on December 23, 1914. Douglas and Iva Miller had five children together: David; Clifford A. Stanley (born 1916); Lloyd Gordon (born 1918, died two years later); Nadine Anne (born 1920); and Claire Miller. Douglas supported his family working as a railway employee, a C.N.R. engineer.

David Miller attended several public elementary schools in Sarnia from September 1921 to September 1928, including Russell Street, George Street and Confederation Street schools. He then attended Sarnia Collegiate from September 1928 to June 1934, taking courses that included mechanical drafting, mathematics, typing, shorthand and bookkeeping. David participated in rugby, hockey, baseball and basketball.

David had a number of jobs before he enlisted: he was employed by W.A. Duggan, General Merchant on Campbell Street in Sarnia doing deliveries and as a clerk for almost ten years until October 1934; he was employed as a clerk at E. and R. Shoe Company in Sarnia from October 1934-February 1935; he was employed as an attendant by Harry Hayes at a service station in Detroit from March 1935-March 1936; and he was employed as a truck driver by J.W. Krantz in Detroit from March 1936-June 1938.

In June 1938, David returned to Sarnia, operating a Supertest gasoline service station at the corner of London Road and Vidal Street. He operated the station until he joined the R.C.A.F. David's manager at the Supertest Station wrote a reference letter to the Recruiting Officer on behalf of David, stating, *While under his employ, he distinguished himself greatly by taking over the business and through his efforts he brought it up from a very low standard of efficiency to the highest rating it had ever known.* The manager stated that he was very reluctant to lose him, but would, without hesitation, accept him again.

David originally joined the Royal Canadian Air Force as a tradesman, on September 15, 1939 (five days after Canada declared war on Germany). Nine months later, on June 25, 1940, twenty-four-year-old David Miller officially enlisted in the R.C.A.F. in London, Ontario. He stood five feet four and a half inches tall, had brown eyes and light brown hair, was single, and lived with his parents on Campbell Street in Sarnia at the time. Keen to fly, he requested flying duties, with a preference to be a pilot.

On July 2, 1940, David took the late morning train from London and arrived at #1 Manning Pool, at Exhibition Grounds, Toronto. From #1 Manning Depot in Toronto, David began his air training at #1 Initial Training School (ITS) in Toronto, and then continued at #2 Wireless School in Calgary. In late September 1940, while at #2 Wireless School in Calgary, he wrote the following letter to his Commanding Officer (it was a military requirement that a soldier had to obtain his Commanding Officer's written permission in order to marry):

Dear Sir:

It is my desire to obtain your permission to my getting married. My future wife is a Graduate Nurse from Chatham General Hospital, Chatham Ontario. Her name is Miss Marguerite Irwin. She is still working at the above mentioned hospital.

We have been engaged for nearly two years now and have only been waiting her graduation till we marry. She is now a Graduate Nurse and her complete training is ended December 18th. Our plans have been for some time to be married on or about December 27th. However these will have to be altered now to suit the situation.

Miss Irwin is twenty three years of age, I am twenty-five. We both come from Sarnia, Ontario. My financial position is such that we both feel we can get married at this time.

Your earnest approval of this marriage will be deeply appreciated.

Yours truly, R.68104 David D. Miller

In January 1941, David continued his air training at #4 Bombing and Gunnery School (B&GS) in Fingal, Ontario. That same month, the Irwin family doctor (Dr. Tutt, Front Street, Sarnia) wrote a letter to the Commanding Officer of #4 B&GS on behalf of Marguerite. Following is that letter:

The Officer Commanding Gunnery and Bombing School, Fingal, Ontario

Sir: I have known Miss Marguerite Irwin and her family well for several years. They are very fine people, of spotless record so far as I, as family doctor and friend, have ever heard. Miss Irwin is a graduate nurse of an excellent training school for nurses where discipline is rigid and standards high. I unhesitatingly say she is a most desirable, moral and splendid type of person.

David Miller received his Commanding Officer's authority to marry. On February 16, 1941, David married Jessie Marguerite Irwin, the eldest daughter of Mr. and Mrs. Chester Irwin of 142 Clarence Street, Port Colborne. The marriage took place at St. Paul's United Church in Sarnia. At the ceremony, Miss Wilma Irwin, sister of the bride, served as bridesmaid and Alex Hodges served as the best man. A reception was given by the bridegroom's parents.

On February 17, 1941, one day after getting married, David was awarded his Air Gunner's Badge and began a three-week leave. The newlywed couple travelled on a motor trip to Toronto and Niagara Falls for their honeymoon. On their return, Jessie initially lived with her in-laws, Douglas and Iva Miller at 394 Campbell Street, Sarnia. David and Jessie later had a daughter together, Saralea Faith Miller.

WAG David Douglas Miller

In mid-March 1941, David was posted to the Embarkation Depot in Debert, Nova Scotia. On April 8, 1941, one month after getting married, he embarked overseas bound for the United Kingdom. Initially posted to #3 Personnel Reception Centre (PRC), he continued his training in the U.K., including at #1 Signals School; and with #22 Operational Training Unit (OTU) in Warwickshire; and at Station Portreath in Cornwall, England. In mid-March 1942, David Miller became a member of #15 Operational Training Unit, RAF Harwell. Two weeks later, on April 1, 1942, he departed the U.K. bound for the Middle East, where he became a member of #205 Group. By late May 1942, he was a member of RAF #148 Squadron "Trusty", part of **Bomber Command**.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

RAF #148 Squadron went through three different incarnations during the war. From April 1939 to April

1940, it was a Group Pool Squadron based in England, training airmen in Ansons and Wellingtons. In mid-December 1940 it was reformed in Malta, once again operating Vickers Wellington, a twin-engine medium bomber. This time the squadron was an active bomber squadron, carrying out attacks on Axis bases in Italy and Libya, first from Luqa, Malta and later from Kabrit, Egypt, supporting the 8th Army in North Africa. This second incarnation, which David Miller was a part of, ended on December 14, 1942. The third incarnation was as a special duties squadron, using a wide range of aircraft that carried out supply drops to resistance groups across the Balkans, and later carrying out pick-up missions.

As part of #148 Squadron, David took part in the **North African Campaign**. The campaign began in June 1940 and continued for almost three years, as Allied and Axis forces pushed each other back and forth across the desert. Battles between British Commonwealth, U.S. and French forces against Italian-German Axis and Vichy France forces took place across Libya, Egypt, Morocco, Algeria and Tunisia. Canadians fought as part of British army units, as members of the RAF or the Royal Canadian Air Force and with the Royal Canadian Navy.

On September 28, 1942, David Miller was part of a 6-man crew aboard Wellington HD947. The aircraft was on a night operation to attack Tobruk Harbour in North Africa when it went missing. Nothing was heard from the crew after it was reported missing, and it was assumed that the aircraft came down in the sea, and the crew lost their lives. Perishing with Flight sergeant-Wireless operator/Air Gunner David Miller were F/O S.C. Pearse, and Sgt's R.H. Gresham, A.H. Threlfall, D.A. Mitchell and R.C.M. Banbury.

In early October 1942, Jessie Miller, then residing with her in-laws, Douglas and Iva Miller on Campbell Street, received the following letter from the Air Commodore, Air Officer in Charge, Air Ministry Records:
Madam,

I am commanded by the Air Council to express to you their grave concern on learning from the Casualties Officer of the Royal Canadian Air Force that your husband, CAN.R.68104 Sergeant David Douglas MILLER has been reported missing.

The Wellington aircraft of which your husband was a wireless operator and air gunner failed to return to its base on the 28th September 1942 from an operational flight. This does not necessarily mean that he is killed or wounded, and if he is a prisoner of war, he should be able to communicate with you in due course. Meanwhile enquiries will be made through the International Red Cross Society and, as soon as any definite news is received, you will be at once informed.

If any information regarding your husband is received by you from any source you are requested to be kind enough to communicate it immediately to the Secretary, Department of National Defence for Air, Ottawa, who will forward it to the Air Ministry. The Air Council desire me to express their deep sympathy with you in your great anxiety, and earnestly hope that favourable news of your husband may be forthcoming.

Also in early October 1942, Jessie received the following letter from the Officer Commanding #148 Squadron:

Dear Mrs. Miller,

You will have received the news that your husband was missing from an operation on the night of 28th/29th September. He was front gunner in an aircraft that took off during the evening of the 28th to bomb the harbor at Tobruk. From that time we heard no more of the aircraft or crew. I am sorry that I am unable to give you any more information, but that is all I know.

Your husband was a member of an excellent crew and had himself completed thirty seven operations since joining the Squadron at the end of May. He operated at high pressure throughout June, July and August while the Germans were advancing.

You have a husband to be proud of Mrs. Miller and I sincerely hope that he will prove to be a prisoner of war.

In November 1942, Douglas and Iva Miller received the news that their eldest son David was reported missing, and that he had not returned from an operational flight in the Middle East several weeks prior. In Port Colborne, David's wife Jessie also received the news that her husband was reported missing after not returning from operations in the Middle East. David Miller's death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas.*

In June 1943, Jessie, then living at 294 Campbell Street, received a telegram from Ottawa informing her that her husband, FLIGHT SERGEANT DAVID DOUGLAS MILLER IS PRESUMED TO HAVE DIED ON

SEPTEMBER 28 OF THE PREVIOUS YEAR DURING AIR OPERATIONS OVER TOBRUK IN AFRICA.

In February 1945, exactly four years after getting married, Jessie Miller, then living with her parents in Port Colbourne, received a War Service Gratuity of \$463.34 for the loss of her husband. Two years later, in late February 1947, Jessie received the following letter from the Wing Commander, for Chief of the Air Staff in Ottawa:

Dear Mrs. Miller:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your husband, Flight Sergeant D.D. Miller. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

In November 1952, Jessie received a letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff. Following is a portion of that letter:

Dear Mrs. Miller:

It is with reluctance that after so long an interval, I must refer to the loss of your husband, Flight Sergeant David Douglas Miller, but due to the lack of any information concerning him since he was reported missing, it must be regretfully accepted and officially recorded that he does not have a "known" grave.

Due to the extreme hazards attending air operations there are, unhappily, many thousands of British aircrew boys who do not have "known" graves and all will be commemorated on General Memorials that will be erected at a number of locations by the Imperial War Graves Commission (of which Canada is a member), each Memorial representative of a theatre of operations. One of these Memorials will be erected at El Alamein, and the name of your husband will appear on that Memorial...

I realize that this is an extremely distressing letter and that there is no manner of conveying such information to you that would not add to your heartaches. I am fully aware that nothing I may say will lessen your great sorrow, but I would like to express to you and the members of your family my deepest sympathy.

David Miller left behind his parents Douglas and Iva, his brother and two sisters, all residing in Sarnia, and his wife Jessie and their daughter Saralea Miller, who was not yet two years old. Years later, Jessie Miller re-married, becoming Mrs. Jessie Hodgkins, living at 627 Maple Avenue, Sarnia.

Flight Sergeant David Miller, 26, has no known grave. His name is inscribed on the Alamein Memorial, Egypt, Column 264. David Miller's Citations include: Etoile de 1939-1945, Africa Star, Defence Medal, War Medal 1939-1945, Canadian Volunteer Service Medal & Clasp, Operational Wings posthumously awarded on February 28, 1947.

MILLS, Thomas Gordon (#A/105836)

At age 21, Thomas Gordon Mills left his machinist apprenticeship at Imperial Oil to serve his country. It was a career he planned to return to after the war. He never got the chance. He gave his life in defence of freedom while fighting to liberate Italy.

Thomas was born in Sarnia on July 9, 1921, the eldest son of Gordon and Gretchen Kathleen Mills who were married on September 9, 1919 in Sarnia. Gordon and Gretchen Mills had two children together: Thomas and Robert Arthur. The Mills family lived at 104 Norman Street in Sarnia, and Gordon supported his family working on the staff of Marketing Accounting Department at the Sarnia Imperial Refinery. Thomas' grandmother Sarah Vansickle, and aunt Frances Kettle, both resided at 224 Cameron Street, Sarnia.

Thomas attended Sarnia Collegiate for two years, leaving school in 1939 after grade ten at the age of eighteen. He enjoyed swimming, bicycling and baseball. After completing grade ten, he worked for twenty months at Mueller Brass Limited in Sarnia as a milling machine operator. He then worked as a machinist (apprentice) at Imperial Oil Limited Refinery in Sarnia for ten months--six months in the machine shop and four months in the drum plant.

On July 6, 1940, Thomas married Gladys Annabell Wells in Sarnia. Thomas and Gladys Mills had one child together, a son, Thomas Gordon Mills Jr. After less than three years of marriage, and before Thomas enlisted, he and Gladys separated by mutual agreement. Gladys and son Thomas Jr. would live with her parents, Mr. and Mrs. E. Wells, at 128 Penrose Street, Sarnia.

On January 19, 1943, twenty-one-year-old Thomas Mills enlisted in the Canadian Army in London, Ontario. He stood five feet eight and three-quarter inches tall, had brown eyes and dark brown hair, and was living at home with his parents on Norman Street at the time. He gave no specific reason for joining the army, but did say he was, “excited to get a few whacks at ‘Gerry’”. He expressed a preference to be a driver. After the war he planned to return to Sarnia to work as a machinist at Imperial Oil. From #1 District Depot in London, Thomas received his army training at #13 Basic Training Center (BTC) in Listowel (where he qualified as a Class III driver); and advanced training at A-29 Canadian Infantry Training Centre (CITC) at Camp Ipperwash. On July 18, 1943, six months after enlisting, Private Thomas Mills embarked overseas for the United Kingdom.

Arriving in the U.K. in late July 1943, Thomas continued his training as a member of the #3 Canadian Infantry Reinforcement Unit (CIRU). In mid-October 1943, Thomas was transferred, becoming a member of the Perth Regiment, Royal Canadian Infantry Corps (RCIC). On October 26, 1943, Private Thomas Mills of the Perth Regiment departed from the U.K., arriving in Italy on November 8, 1943.

The **Italian Campaign**, the first sustained Canadian Army operation of the War, had begun with the invasion of Sicily on July 10, 1943. The fierce fighting on the island would last more than four weeks, during which the Canadians would advance through difficult mountainous terrain, against an ever-stiffening German resistance. By August 17, the Germans had evacuated the island to the Italian mainland. In early September 1943, Canadian and Allied forces would invade Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl, lasting 20 months, over a range of landscapes, through challenging weather, and against a series of well-protected defences held by some of the German army’s best troops.

Thomas Mills served with the Perth Regiment as they advanced northward through Italy. Gordon and Gretchen Mills in Sarnia received letters from their son Thomas, two of the later ones were dated September 9 and 15, 1944. In the second letter, Thomas stated that he was out of the lines at the time but that he expected to return to them soon.

On October 1, 1944, almost eleven months after arriving in Italy, Private Thomas Mills lost his life while fighting near Rimini. Thomas’ remains were buried at a location recorded on the Army Field Service Card as, “11 CIB Cem. Cesena sh 100A MR 742023 RB Grave 3, Italy.”

On October 14, 1944, Gladys Mills on Penrose Street, received the following telegram from the Director of Records in Ottawa: MINISTER OF NATIONAL DEFENCE DEEPLY REGRETS TO INFORM YOU THAT A105836 PRIVATE THOMAS GORDON MILLS HAS BEEN OFFICIALLY REPORTED KILLED IN ACTION FIRST SEPTEMBER 1944 STOP IF ANY FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED. No other details of his death were given.

Since Gordon and Gretchen had received letters written by their son on September 9 and 15, 1944, they believed that there was an error in the transmission, and that his death should have read October 1. Three days later, Gladys Mills and Thomas’ parents received the following telegram from the Director of Records in Ottawa: TELEGRAM 2532 DATED FOURTEENTH OCTOBER 1944 SHOULD HAVE READ AS FOLLOWS STOP MINISTER OF NATIONAL DEFENCE DEEPLY REGRETS TO INFORM YOU THAT A105836 PRIVATE THOMAS GORDON MILLS HAS BEEN OFFICIALLY REPORTED KILLED IN ACTION ON A DATE NOT YET CONFIRMED STOP LETTER FOLLOWS.

In late October 1944, Gretchen received the following letter from the Colonel, Director of Records, for Adjutant-General:

Dear Mrs. Mills:

With further reference to my telegram of the 17th instant concerning the regretted death of A.105836 Private Thomas Gordon Mills, I wish to inform you that information received from Overseas advises that Private Mills was killed in action on the 1st September, 1944.

However, as the casualty return received from the Unit was dated 5th October, it is considered that there was an error in the date as shown on the casualty return. The Overseas Authorities are presently investigating the correct date of your son’s death and I wish to assure you that you will be immediately advised on receipt of further official information from Overseas Authorities.

In mid-November 1944, Gladys received the following letter from the Major-General, Adjutant-General:

Dear Mrs. Mills:

It was with deep regret that I learned of the death of your husband, A105836 Private Thomas Gordon Mills, who gave his life in the Service of his Country in the Mediterranean Theatre of War on the 1st day of October, 1944.

From official information we have received, your husband was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Thomas Mills' death was later officially recorded as, *Overseas casualty, killed in action, in the field (Italy)*. In late October 1945, a stained-glass window in memory of Pte. Thomas Gordon Mills was unveiled and dedicated at a morning service in Canon Davis Memorial Church. In December 1945, the Children's Aid Society in Sarnia received a War Service Gratuity of \$307.29 for Thomas Gordon Mills Jr., for the loss of his father.

In late April 1947, the Director of Records, for Adjutant-General, sent Gretchen Mills a photograph of the grave and marker over the burial place of her eldest son. Thomas Gordon Mills, 23, is buried in Cesena War Cemetery, Italy, Grave III, G, 8. On his headstone are inscribed the words, BE THOU FAITHFUL UNTO DEATH, AND I WILL GIVE THEE A CROWN OF LIFE. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

MISENER, Everett Paul (#R/122986)

Nineteen year-old Everett Misener interrupted his college studies to serve his country. While training, he displayed all the attributes to be an excellent fighter pilot. It was during training that he lost his life in a tragic flying accident. The death of their youngest son devastated his family, and was made worse by a military error.

Everett was born in Sarnia on December 30, 1921, the youngest son of Robert Scott (born in Brucefield, Huron, Ontario) and Olive Elizabeth (nee Glass, born in Sarnia) Misener. The Misener family lived at 286 North Vidal Street, Sarnia, and Robert Misener was a captain and president of Colonial Steamships Limited, Port Colborne, Ontario (in Everett's Service File, several documents record Captain Robert Misener of Sarnia Steamships Limited, Port Colborne). Robert and Olive Misener had six children together: William Austin Miles (born 1903, but died at 6 months old); Ralph Scott (born 1908, would serve in the Royal Canadian Mounted Police reserve in Winnipeg); John Erwin (born 1905, enlisted in the navy in the fall of 1940 and became a Sub-Lieutenant in the Royal Canadian Naval Volunteer Reserve, and would serve at an Eastern Canadian port, in the North Atlantic, the North Sea, the English Channel and the Irish Sea); Inez Mildred Elizabeth (born 1905); Dorothy Olive (born 1915) and Everett. Years later, both of Everett's sisters married, becoming Mrs. J.B. Pierson, of Montreal, and Mrs. J.A. France, of Sarnia.

Everett Misener attended London Road Public School from 1927 to 1934, then Sarnia Collegiate from 1934 to 1939. He was very active in basketball and football, and participated in track, rugby and softball. He was a congregant of St. Andrew's Presbyterian Church where he became a member of the Young Men's Ushers Club. After completing high school, Everett continued his education at Ridley College, St. Catharines, Ontario from February 1940 until June 1941. At Ridley College, he worked on his Junior Matriculation, and was also member of the Air Cadet Corps there, which was affiliated with the 119th Bombing Squadron, Hamilton. In a reference letter written by the Ridley College Assistant to the Headmaster on behalf of Everett's RCAF application, the Assistant wrote, *(Everett) has a pleasing personality, and is exceptionally well-liked by his fellow students. He is of sound moral character, and has a high sense of honour and loyalty. I have no hesitation in recommending him to you most highly in every way. I feel sure that he would be an asset to any branch of the Service.*

Nineteen year-old Everett Misener interrupted his studies at Ridley to enlist in the Royal Canadian Air Force on September 1, 1941 in Hamilton, Ontario. He stood six feet one inch tall, had blue eyes and blonde hair, was single, and recorded his address as 286 Vidal Street, Sarnia (at home with his parents). Everett recorded that he had worked for approximately eight months in 1941 as a steel handler with Port Arthur Shipbuilding Company Limited. He expressed his desire to be a pilot, and the RCAF Medical Board declared Everett to be, *Above average intellect, physically fit, an above average recruit, should make an excellent pilot*. The Recruiting Officer recorded of Everett, *Good average young Canadian – keen to fly and serve overseas and should do well in training*. From #1 Manning Depot in Toronto, Everett received his air training at #1 Bombing and Gunnery School (B&GS) in Jarvis; and at #1 Initial Training School (ITS) in Toronto; continuing at #7 Elementary Flying Training School (EFTS) in Windsor; and at #2 Service Flying Training School (SFTS) at Uplands (Ottawa).

Just prior to his graduation at Uplands, Everett was able to take a few days away to be the best man at the wedding of his brother John. John Erwin Misener of the RCNVR, married Catherine Patricia Marie Taylor of Sarnia on August 15th, 1942. The wedding took place in the chapel of HMCS King's College in Halifax, where John had graduated as a sub-lieutenant that morning. Three years later, in mid-August of 1945 only days after VJ-Day, Lieutenant John Misener was awarded the Distinguished Service Cross for his part in the sinking of a German submarine in early March of 1945.

Everett Misener graduated from SFTS Uplands a little over one week after his brother's wedding and was awarded his Pilot's Flying Badge on August 28, 1942. The SFTS Commanding Officer comments on Everett included, *Slow at first but caught on and progressed rapidly to above average on inst. Has considerable natural ability once he gets going... Has been above average during course. Link Trainer progress and ability excellent and High character and leadership qualities... Courteous, clean-cut, popular, plenty of initiative, mature, neat, intelligent and hard worker.* The Chief Instructor recommended Everett for Fighter Squadron.

Sergeant-Pilot Everett Paul Misener

On September 27, 1942, Everett began an instructor's course at RCAF #3 Flying Instructor School (FIS), in Arnprior, Ontario. As part of the British Commonwealth Air Training Plan, provisions were made for three separate flying instructor schools in Canada—No. 1 at Trenton, Ontario for twin-engine aircraft; No. 2 at Vulcan, Alberta (later Pearce) for Harvard instructors; and No. 3 at Arnprior, for instructors at elementary flying schools. #3 FIS at Arnprior operated from August 1942 to January 1944.

Approximately two weeks after beginning his instructor's training, Everett Misener lost his life in a flying accident. Prior to the accident, he had over 102 hours of dual flying and 170 hours of solo flying hours. On October 11, 1942, Sergeant-Pilot Everett Misener was on a solo cross-country training flight aboard his Cornell Fairchild aircraft #10505, from Arnprior to Kingston, Ontario. At approximately 1100 hours, his Cornell aircraft crashed seven miles north-west of Watertown, New York, while endeavouring to make a forced landing on a three-lane highway. Everett, who suffered multiple injuries in the plane crash, died instantly; his body was found in the wreckage. The circumstances of casualty were officially listed as, *Low Flying. Possibility of vision being obscured temporarily by the sun in his eyes. Aircraft struck high tension wires and crashed into tree.*

A few days later, Everett's funeral with military honours was held in Sarnia. Following a service at the Misener home for family and friends, a public service was held in St. Andrew's Presbyterian church that was largely attended. The Rev. J.M. Macgillivray of St. Andrew's, assisted by Flight-Lieutenant O. Nimmo, oversaw the church service. In part of Rev. Macgillivray's eulogy he said, *This sad bereavement has brought the horrors of war closer to us. Today we mourn the loss of another one of our fine young men who has given his life for the cause. Paul represented the finest type of Canadian manhood. He was clean, strong, vigorous and every inch a man. He had the stuff that makes good airmen and he was beloved by all who knew him. It is hard to think that a young life has been snuffed out. He gave all he had – his years of success to come – for the things most precious to him. His sacrifice is nonetheless real because he did not fight the foe overseas. He gave his life for his country, his family, for you and for*

me. As the funeral party made its way to the Sarnia (Lakeview) Cemetery, it was accompanied by a R.C.A.F. band and an escort from the air base at St. Thomas. At the cemetery, a firing party fired a volley and the "Last Post" was sounded.

In mid-November of 1942, still mourning the recent loss of their son, the Misener family had to deal with a painful error made by the Department of National War Services. On November 18, 1942, a letter was received at the Misener home from the National War Services with a notification that Everett Paul Misener was to report for medical examination prior to his call to service in the military. There had been reports that there were similar cases of this kind of tragic error not only in the Sarnia-Lambton district but across the country. Captain Robert Scott Misener took the matter up with the authorities so that steps would be taken to prevent further hurt to members of such families.

Following is the letter that Captain Robert S. Misener sent to the Department of National War Services, in London, Ontario, and to the Minister of the Department of National War Services in Ottawa:

Dear Sir,

Your notice of call No. A-73816 for my son Everett Paul Misener was received at my home on November 18, 1942.

On October 11 of this year, my family and I experienced one of the greatest sorrows a family could suffer. We lost our youngest son on active service with the R.C.A.F. This boy had voluntarily offered his services to his country in July, 1941, in order that he too might share in the struggle of all free men against oppressive tyranny. He worked hard so that his family, his country and all free peoples might the sooner see peace and happiness emerge out of today's chaos. His ambition was realized on August 26, 1942, when he received his wings. Now he, too, could join those thousands of other brave young Canadians who hammered at the foe in every corner of the globe. Such was what he wanted, but destiny intervened and his young life was cruelly cut off before the realization of his fondest hopes for us all.

The late Sgt. Pilot Everett Paul Misener, whose military call was received last week, needed no call to arms. He knew his duty; he gave his life for his country.

Such was the man whose memory you have insulted, though perhaps unintentionally, with a call to service. As his father, my wrath transcends my sorrow. I denounce with all my strength the gross carelessness and utter incompetency of the clerks in the department you represent. I blame no less the superior officers and executive chiefs of the department for their negligence and inefficiency in permitting such errors to be made by members of their staff. Worse, if they know that such conditions exist, I condemn them for their unforgivable lack of consideration for their fellow men by not ensuring against a repetition of such occurrences.

So that their feelings may be spared at least this additional wound, I feel that I speak on behalf of all parents, and others concerned, in the same position as I am, in saying that such careless and inefficient methods should be dealt with immediately.

In August 1945, Captain Robert Scott and Olive Misener received a War Service Gratuity of \$97.50 for the loss of their youngest son Everett. A little over five months later, another Sarnian, Pilot Officer Edwin Robert Myles, would lose his life in a training accident at the same school (he is included in this Project). Everett Misener, 20, is buried in Sarnia (Lakeview) Cemetery, Sarnia, Ontario, Section E. Lot 121.

MONTEITH, Charles Clarence (#A/108948)

Charles Clarence Monteith interrupted his career as a mechanic, and left behind his wife and three young children so that he could serve his country. After more than sixteen months of training, and not long after arriving overseas, he suffered a brain haemorrhage. One month after he died, VE Day was declared.

Charles was born in Delaware Township, Ontario on June 27, 1915, the eldest son of Bert (born in Delaware Twp., Ontario) and Gertrude May (nee Finch) Monteith. Bert and Gertrude Monteith were married in Lambeth on September 14, 1910, and lived in Petrolia. Bert Monteith supported his family working as a truck driver. Charles had four brothers and one sister, who at the time of his death were: Lorne Nelson (born 1923) and Walter Cecil (born 1928) both residing in Petrolia; Morley (born 1917), who had been overseas with the Governor-General's Foot Guards for three years and was in Germany at the time; Melvin Bertram (born June 1914, but died a month later); and his only sister, Leatta Viola (born 1912, later became Mrs. Alfred Hall, residing in Petrolia).

Charles attended Petrolia High School for only one year in 1928, leaving grade nine at the age of thirteen. After, he took a night course in welding in Sarnia. Charles had little interest in sports but enjoyed motor mechanics.

He had a number of jobs before enlisting including: six years as a rural mail carrier; six years as a motor mechanic (part at Lambton Motors); one year at Polymer, Sarnia doing maintenance on diesel engines; and four months at Dow Chemical of Canada Limited in Sarnia in mechanics maintenance. And he always found time for his hobby, working late hours on two or three engines in his workshop.

On April 24, 1937, Charles married Edythe Helen Ferguson, the daughter of Mr. and Mrs. D.L. Ferguson at the Wyoming Parsonage. Miss Leta Monteith served as bridesmaid and Alfred Hall served as the best man. Following the wedding ceremony, a wedding dinner was served at the home of the bride's sister, Mrs. J.M. Gillatly. After the ceremony, Charles and Edythe Monteith left for a wedding trip to Detroit. On their return, they resided in Thamesville. Charles and Edyth Monteith had three children together: Edna Rosalee (born Dec. 23, 1937); Robert Clarence (born April 3, 1941); and Reginald Duncan (born Nov. 27, 1942).

Twenty-eight-year-old Charles Monteith enlisted in the Canadian Army on November 23, 1943 in London, Ontario. He stood five feet seven inches tall, had blue eyes and brown hair, and along with his wife and three children were living at 442 George Street at the time. After the war he planned to return to his work as a motor mechanic. From #1 District Depot in London, Charles began his army training at #23 Canadian Armoured Corps Basic Training Centre (CACBTC) in Newmarket, Ontario. In mid-February 1944, he moved to Camp Borden where he received further training at #1 Canadian Armoured Corps Training Regiment (CACTR); and then Technical & Schools Wing (T&S Wing), Canadian Armoured Corps Training Establishment; and then Canadian Armoured Corps Trained Soldiers Regiment (CACTSR). Rising in rank to Lance Corporal at CACTSR, he earned qualifications as a Class III Driver and Driver Mechanic Group "C" (tank).

Almost sixteen months after enlisting, in March 1945, Charles Monteith reverted to the rank of Trooper, and on March 19, 1945, he sailed for the United Kingdom. Overseas, he continued his training as a member of #2 Canadian Armoured Corps Reinforcement Unit (CACRU). As a member of the Royal Canadian Armoured Corps (RCAC), he sent several letters home to his family, the last one on April 5, 1945. Less than three weeks after arriving overseas, on April 9, 1945, Charles was admitted to No. 17 Canadian General Hospital in Wokingham, England.

On the morning of April 9, 1945, Charles Monteith was getting ready for morning parade among his comrades when they saw him fall. Unconscious and with laboured breathing, he was brought to the hospital right away. He was diagnosed with a brain haemorrhage, and over the next six days, his condition gradually deteriorated. In the early morning hours of April 14, 1945, Charles fell into a coma, and lost his life as a result of the brain haemorrhage, at No. 17 Canadian General Hospital. The cause of twenty-nine year olds death was recorded as: "subarachnoid haemorrhage – unknown cause". Charles Monteith was buried on April 17, 1945 in Brookwood Military Cemetery.

On April 10, 1945, Edythe on George Street received the following telegram from the Director of Records: SINCERELY REGRET INFORM YOU A108948 TROOPER CHARLES CLARENCE MONTEITH HAS BEEN OFFICIALLY REPORTED SERIOUSLY ILL NINTH APRIL 1945 DIAGNOSIS BRAIN HAEMORRHAGE STOP WHEN FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED STOP WHEN ADDRESSING MAIL ADD WORDS IN HOSPITAL IN BOLD LETTERS OVER NAME OF ADDRESSEE FOR QUICK DELIVERY.

On April 13, 1945, Edythe received the following telegram from the Director of Records: SINCERELY REGRET INFORM YOU A108948 TROOPER CHARLES CLARENCE MONTEITH HAS NOW BEEN OFFICIALLY REPORTED DANGEROUSLY ILL ELEVENTH APRIL 1945 STOP WHEN FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED.

On April 17, 1945, Edythe received the following telegram from the Director of Records: REGRET DEEPLY A108948 TROOPER CHARLES CLARENCE MONTEITH HAS NOW BEEN OFFICIALLY REPORTED TO HAVE DIED FOURTEENTH APRIL 1945 STOP YOU SHOULD RECEIVE FURTHER DETAILS BY MAIL DIRECT FROM THIS UNIT.

In late April 1945, Edythe received the following letter from the Major-General, Adjutant-General:
Dear Mrs. Monteith:

It was with deep regret that I learned of the death of your husband, A108948 Trooper Charles Clarence Monteith, who died while in the Service of his Country in the United Kingdom on the 14th day of April, 1945.

You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement.

Charles Monteith's death was later officially recorded as, *Overseas casualty, died as result of brain haemorrhage, England*. Less than one month after Charles' death, VE Day was declared, ending the war in Europe. Charles left behind his mother and father, three brothers and a sister, his wife Edythe and their three children; Edna (age 7), Robert (age 4) and Reginald (age 2).

In September 1945, Edythe received a War Service Gratuity of \$125.41 for the loss of her husband. In September 1946, the Colonel, Director of Records, for Adjutant-General, sent Edythe a photograph of the grave and marker over the burial place of her late husband in Surrey, England. Charles Monteith, 29, is buried in Brookwood Military Cemetery, Surrey, United Kingdom, Grave 51.C.1. On his headstone are inscribed the words, LOVING AND KIND FAITHFUL AND TRUE BEAUTIFUL MEMORIES WE HAVE OF YOU. FAMILY.

MORRIS, Howard Paul (#J/14392)

Sarnia born Howard Morris had been active all his life in a variety of activities. His desire for action and for service to Canada led him to enlisting in the RCAF in 1941 when he was only 19. On December 16, 1943, Howard was killed when his Lancaster aircraft crashed as it returned to base after a night raid on Berlin.

Howard Paul Morris was born in Sarnia on September 19, 1921, the only son of Lloyd David and Marie Adams (nee Hickimbotham) Morris. Goderich born Lloyd wed Sarnia native Marie on September 8, 1920 in Sarnia, and they were blessed with two children: Howard and a younger daughter, V. Georgine. Lloyd supported his family working in the Pumping Department at Sarnia Imperial Oil Refinery and the family lived at 568 North Christina Street.

From an early age, Howard had a variety of interests that kept him busy. He received his early education at London Road Public School from 1928 to 1934 and then attended Sarnia Collegiate for six years from 1934 to 1940. He was active in tennis, swimming, baseball, golf, hockey and badminton, and his hobby was building model planes. Howard was also very interested in hunting and camping and had belonged to a local Boy Scout Troop.

He was a member of Central United Church and the Central Century Club. Howard was very interested in church affairs and, besides ushering on Sundays, he was chosen one year as the Junior Member of the Board of Stewards. For several years, Howard played in Robinson's and Pressey's Boys' Bands and, in the course of his musical career, had been awarded several medals. After graduating high school in 1940, he was employed in 1941 at F.W. Woolworths as a stock room manager. He then worked for six months at Sarnia Imperial Oil Limited Refinery, doing asbestos insulation and brick masonry.

Two months shy of his twentieth birthday, Howard enlisted in the Royal Canadian Air Force on July 19, 1941 in London. He stood six feet one inch tall, had blue eyes and brown hair, was single, and was residing at home with his parents on Christina Street at the time. He requested flying duties, with a preference to be either a Pilot or Observer. From the Recruiting Centre in London and #1 Manning Depot in Toronto, Howard received air training at #4 Bombing and Gunnery School (B&GS) at Fingal; at #6 Initial Training School (ITS) in Toronto; at #12 Elementary Flying Training School (EFTS) in Goderich; at #1 Service Flying Training School (SFTS) at Camp Borden; and Composite Training School (KTS) in Trenton. He then attended #4 Air Observer School (AOS) in London and finished third in his class. Howard was awarded his Air Observers Badge on September 25, 1942. In late September-early October of 1942, Howard spent a fourteen-day leave in Sarnia with his family and friends. Howard Morris then embarked overseas from #1 Y Depot in Halifax for the United Kingdom on October 10, 1942.

In late October 1942, Howard cabled his parents in Sarnia that he had arrived overseas safely. From #3 Personnel Reception Centre, he continued his training in the U.K. at #6 Air Observer School (AOS). In March 1943, Howard became a member of #22 Operational Training Unit (O.T.U.), training in Wellington bombers. On May 20, 1943, he became a member of RCAF #426 Thunderbird Squadron "On Wings of Fire", part of **Bomber Command**.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

No. 426 Squadron was established at RAF Dishforth, Yorkshire, on October 15, 1942, as part of No. 4

Group. In January 1943, it was transferred to No. 6 (RCAF) Group. The squadron was equipped with Vickers Wellington aircraft to deliver bombs and mines to the enemy. In June 1943, the squadron transferred to RAF Linton-on-Ouse and switched to Avro Lancaster bombers. Later in April of 1944, the squadron began to convert to Handley Page Halifax bombers that they used until the end of the war in Europe. The thunderbird crest used by the squadron originates from North American natives, and according to myth, signifies disaster and death to anyone on the ground who perceives it.

Flying Officer-Navigator Howard Paul Morris

No. 426 Squadron was established at RAF Dishforth, Yorkshire, on October 15, 1942, as part of No. 4 Group. In January 1943, it was transferred to No. 6 (RCAF) Group. The squadron was equipped with Vickers Wellington aircraft to deliver bombs and mines to the enemy. In June 1943, the squadron transferred to RAF Linton-on-Ouse and switched to Avro Lancaster bombers. Later in April of 1944, the squadron began to convert to Handley Page Halifax bombers that they used until the end of the war in Europe. The thunderbird crest used by the squadron originates from North American natives, and according to myth, signifies disaster and death to anyone on the ground who perceives it.

Howard Morris was the Navigator for the Commanding Officer of #426 Squadron, Wing Commander L. Crooks, until the Commanding Officer was killed in action on August 17, 1943. In June of 1943, Lloyd and Marie Morris in Sarnia received news that their son Howard was promoted from Pilot Officer to Flying Officer on March 25, 1943.

No. 426 Squadron took part in many daring raids over enemy territory, including raids on Berlin, Leipzig and Frankfurt. One of those raids was on a December 16, 1943, a night raid over Berlin, Germany where 483 Lancasters took part in the operation. Howard Morris and the crew of Lancaster II aircraft DS779 (markings OQ-Q) took off from Linton-on-Ouse and were able to strike their target over Berlin and to make their way home; however, at approximately 23.25 hours on December 16 (7 hours after take-off), as the pilot let down through very low cloud on its approach to base, the aircraft crashed at Hunsingore near Marston, Moor, Yorkshire, England. The aircraft hit the ground and ran for several hundred yards. As it did, all the propellers snapped off as did the oil cooler, part of one rudder and other parts of the airframe. The pilot was able to lift the aircraft into the air again, clearing some trees and high-tension wires, before it crashed about a mile further on.

Five airmen were killed in the crash and two were injured and survived. Perishing with RCAF Navigator-F/O Howard Paul Morris were F/Sgt-Pilot Reginald Donald Stewart; Sgt's John Greenwell and Leslie Sale (both RAF), and F/O William Hamilton (RAF). Injured and surviving were Sgt. D.S. Jamieson (RCAF) and Sgt. Duncan Ernest Stewart (RAF).

Thirty bombers were lost in the raid including 25 Lancasters. A number of them were lost on their return to England due to very poor weather across almost all airfields. Several days after the crash, Lloyd and Marie Morris received a telegram from the R.C.A.F. Casualty Officer in Ottawa informing them that their son, FLYING OFFICER

HOWARD PAUL MORRIS WAS KILLED ON DECEMBER 16 WHILE ON ACTIVE SERVICE OVERSEAS. No details of the air operation in which Howard was killed were given, but it was intimated that a letter would soon follow. Howard Morris' remains were buried on December 22, 1943 at Harrogate Cemetery, England.

Flying Officer-Navigator Howard Paul Morris

In late December 1943, Marie received a letter from the Wing Commander of RCAF No. 426 Squadron. Following is a portion of that letter:

Dear Mrs. Morris:

You will have received a telegram informing you that your son, Flying Officer Howard Paul Morris, was killed on active service, some time before this letter reaches you. I know that you will want to know the circumstances of his death and I am extremely sorry that I have been unable to write sooner to give you such details as are available.

Your son was the Navigator of an aircraft detailed to attack Berlin on the night of the 16th December 1943. He and his crew had successfully carried out their mission and had reported on R.T. when approaching Base. Unfortunately, however, the weather had closed in on Base at the time of their return and the aircraft crashed whilst endeavouring to break cloud to come in for a landing. Your son and four other crew mates were killed instantaneously, the other two members being very seriously injured.

Your son was buried with full Service honours and interment took place at Stonefall Cemetery, Harrogate, Yorks. Owing to the time taken to communicate under present conditions, it was not possible to ascertain your wishes regarding the funeral, in the time available. I hope you will understand the necessity for this action and I sincerely trust that the arrangements made were what you would have desired. You will wish to know that all War Graves are taken care of by the Imperial War Graves Commission who will erect a temporary wooden cross pending the provision of a permanent memorial. I have to advise also that the question of re-interment, if this is desired, could only be considered at the conclusion of hostilities....

The news of Howard's death came as a severe blow to the members of this Squadron. He was a very capable and efficient Navigator, having completed several operational sorties over enemy territory. The quiet and efficient manner with which he carried out his duties as a Navigator earned him the respect of his entire crew. He died in the performance of his duty and this Squadron will miss him. We join with you in sorrow at his passing, and I wish to extend to you the deep felt sympathy of the officers and men of this Squadron in your bereavement.

There may be something I have not mentioned here which you may wish to know. If so, please do not hesitate to write to me, Mrs. Morris, as I am only too anxious to give you any information which may help you to bear the sad loss you have sustained.

Howard Morris was later officially recorded as, Killed after air operations at Hunsingore near Marston Moor, Yorkshire, England on returning from a bombing raid over Berlin, Germany. In July 1945, Lloyd and Marie received a War Service Gratuity of \$449.18 for the loss of their only son. Howard Morris, 22, is buried at Harrogate

(Stonefall) Cemetery, Yorkshire, United Kingdom, Section C, Row G, Grave 6. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

MYLES, Edwin Robert (#J/24295)

Edwin Robert (Edwin Jr.) Myles had much to look forward to after the war. With four years of experience working in an auto shop before he enlisted in 1941, he planned on becoming a licensed engine mechanic. Edwin would also be spending more time with Marjorie, a young lady he had married less than two years ago. Edwin's dreams of his future died when he was killed in a training accident near Ottawa in April 1943.

He was born in Sarnia on August 31, 1920, the only son of Edwin William and Emily Edith (nee Scammel) Myles. Edwin Sr. (born in Dorsetshire, Cranbourne, Surrey, England) and Emily (born in Egham, England) were married on April 2, 1919 in Egham, England and, at some point, immigrated to Canada. Edwin and Emily had two children together: first Edwin Jr. and then daughter Edith Kathleen. When Edwin Jr. was eight years old, his mother Edith and he visited England together, returning to Canada on September 10, 1928 aboard the passenger ship *Ausonia*. The Myles family initially lived at 213 Tecumseh Street and later moved to 103 Rose Street. This was convenient for Edwin Sr. as he worked as a car inspector at Imperial Oil.

Edwin Jr. attended Devine Street Public School in Sarnia from 1926 to 1932 and then Sarnia Collegiate Institute from 1932 to 1936. He completed school at the age of seventeen and was very active during his years at Sarnia Collegiate. While attending high school, he was a member of the Signal Corps, Non-Permanent Army Militia (NPAM) for six months, and was captain for a time. Edwin also participated in baseball, basketball, handball and bowling, and his hobbies were woodworking and photography. He was also busy outside school. Edwin was a member of St. John's Anglican Church and an active worker in the local Boy Scout Association for many years. He was Scoutmaster of the 2nd Kinsman Troop for a time. In recognition of his efforts, he was made a King Scout in 1937, an honour that permitted his name to be entered into a souvenir book of permanent record at Dominion Headquarters of the Boy Scout Association.

After completing high school, Edwin was unemployed for about a year, but his life changed in the next few years. First, he was hired in 1937 by Fred Galbraith to work at his Dodge and DeSoto dealership on Davis Street, a job he would have until he enlisted, doing body and mechanical work. To bolster his credentials, Edwin took a mechanics night course at Sarnia Collegiate in 1940.

Secondly, Edwin said goodbye to his days of bachelorhood. On June 20, 1941, Edwin, 20, married Marjorie Lorraine Drinkwater, the only daughter of Mr. and Mrs. E.W. Drinkwater, at St. John's Anglican Church in Sarnia. At the wedding ceremony, Miss Millicent Miller served as bridesmaid and the flower girl was Miss Edith Myles, the sister of the groom. Serving as best man was Bill Drinkwater, a brother of the bride. A reception was held at the YMCA for forty-six guests and, following that, the newlywed couple left on a motor trip to northern points. On their return, Edwin and Marjorie Myles lived with his parents at 103 Rose Street. Marjorie would later live at 223 Devine Street, Sarnia.

At age twenty-one and seven months after getting married, Edwin Myles joined the Royal Canadian Air Force in London, Ontario on January 26, 1942. He stood five feet nine and a half inches tall, and had brown eyes and dark brown hair. Marjorie and he were living at 103 Rose Street at the time. He requested flying duties, with a preference to be either a Pilot or Observer. His plan for after the war was to become a licensed engine mechanic. The Recruiting Officer recorded that Edwin was, *Eager for Air Crew, energetic, sociable, natural, self-possessed, modest, clear headed, has leadership training. Resolute and straight forward.*

From #9 Recruiting Centre in London and then #1 Manning Depot in Toronto, Edwin received his air training at the #1 Initial Training School (ITS) at the former Eglinton Hunt Club in Toronto; at #9 Elementary Flying Training School (EFTS) in St. Catharines; and then at #16 Service Flying Training School (SFTS) at Hagersville. The Instructor and Commanding Officer commented that Edwin was *A keen, alert, serious type of airman, dependable, with fine deportment and leadership qualities; A keen student of exceptional academic ability, good average flying ability... should go far with more experience in flying; and Should make a satisfactory twin engine instructor as seems anxious to carry on this work.*

Edwin Myles was awarded his Pilot's Flying Badge at Hagersville on March 5, 1943. At the ceremony, he

was presented with an R.C.A.F. identification bracelet for graduating from the St. Catharines E.F.T.S. with the highest marks on ground school work. After graduation, he returned to Sarnia on a 14-day leave to visit his parents Edwin and Emily, and his wife Marjorie. Returning to duty on March 19, 1943, Edwin went to Arnprior, Ontario to take an instructor's course, as a member of RCAF #3 Flying Instructor School (FIS), with the rank of Pilot Officer.

As part of the British Commonwealth Air Training Plan, provisions were made for three separate flying instructor schools in Canada—No. 1 at Trenton, Ontario for twin-engine aircraft; No. 2 at Vulcan, Alberta (later Pearce) for Harvard instructors; and No. 3 at Arnprior, for instructors at elementary flying schools. #3 FIS at Arnprior operated from August 1942 to January 1944.

Pilot Officer Edwin Robert Myles

Approximately two weeks after arriving at Arnprior, Edwin Myles was killed in a training accident. On April 3, 1943, P/O Edwin Myles and another officer, Pilot Officer R.W. Moeller, were flying in a Cornell aircraft FH740. Up to this point, Edwin had 115 hours of dual flying time and over 104 hours of solo flying. The two airmen were engaged in a routine mutual instruction instrument cross-country training flight, with Edwin in the front cockpit acting as Pilot-Student Instructor. At approximately 0930 hours, the aircraft crash landed into the ground in dense swamp bush-land, four miles North West of Cormack near Eganville (about 95 miles west of Ottawa). Edwin was killed instantly, suffering a compound fracture of the skull with multiple fractures of bones in both legs. The other airman, Pilot Officer R.W. Moeller was uninjured although the plane was completely destroyed.

Just one day after the crash, Edwin's parents and his wife Marjorie, who were all living on Rose Street, received news from R.C.A.F. Headquarters in Ottawa that Edwin was instantly killed in an R.C.A.F. training plane crash near Ottawa. The name of the other occupant of the plane was withheld by air force authorities at the time.

Edwin's remains arrived in Sarnia two days later. On that same day, Marjorie, now residing at 223 Devine Street, received the following letter from the Air Marshal, Chief of the Air Staff:

Dear Mrs. Myles:

I have learned with deep regret of the death of your husband, Pilot Officer Edwin Robert Myles, on Active Service on April 3rd and I wish to offer you my sincere and heartfelt sympathy.

It is so unfortunate that a promising career should be thus terminated and I would like you to know that his loss is greatly deplored by all those with whom your husband was serving.

A military funeral was held in Sarnia for Pilot Officer Edwin Myles under R.C.A.F. auspices. The funeral was held at the Robb Funeral Home, with a service conducted by Rev. J.A.E. Blackwell, rector of St. John's Anglican Church. From the funeral home, the cortege proceeded to St. John's Church where a public service was held. A party of R.C.A.F. officers and men from the Technical Training School at St. Thomas attended the funeral. Honorary pallbearers included five fellow Flying Officers and active pallbearers included six fellow Flight Sergeants. Accompanying the funeral party to internment at Lakeview cemetery was the R.C.A.F. band.

At the graveside, a firing party fired a volley while the band played "Abide With Me" and "The Last Post"

was sounded. Rev. Blackwell speaking from the text read, "I have fought a good fight, I have finished the course, I have kept the faith, we are met here once again to pay a last respect to one whom Almighty God has been fit to take..." He then said, "Is there any text more fitting to describe Pilot Officer Myles' life than the words which I have chosen; his faith which he kept to the end, cultivated and developed among you who knew him so well; his devotion to any task assumed; his steadfastness in his purpose and dependability in any task must serve as an inspiration to strengthen us to follow his example. Intermingled with the natural sorrow of our hearts will be the pride and joy in the memory of one who fought a good fight and kept the faith as a son, a husband or a companion."

Approximately five months earlier, another Sarnian, Sergeant-Pilot Everett Misener, had lost his life in a training accident at the same school (he is included in this Project). Pilot Officer-Pilot Edwin Myles was later officially recorded as, *Killed as the result of a flying accident (about four miles north west Cormac near Evanville Ontario) (Mutual instruction instrument flying cross country)*. Edwin Myles, 22, is buried at Sarnia (Lakeview) Cemetery, Sarnia, Ontario, Canada, Section E. Lot 122. On his headstone are inscribed the words, THERE IS COMFORT IN THE THOUGHT THAT A LOVING GOD KNOWS BEST.

NASH, Charles Arthur (#R/90884)

Sarnia born and educated Charles Arthur Nash, 24, was a young man who always kept himself busy, and after the war he planned to pursue one of his interests by becoming an electrical engineer. On a night raid over Munster, Germany in June 1943, as part of the #83 Pathfinder Force, his aircraft never returned. Charles Nash has no known grave.

Charles Nash was born in Sarnia on November 21, 1918, the only son of Albert Clarence (born in Grimsby, Ontario) and Lillian Kate (nee Kerry, born in Otford, Kent, England) Nash. Albert, a landscape gardener for the City of Sarnia, and Lillian were married in Sarnia in May 1915. Albert and Lillian were blessed with five children together: a son Charles, and daughters Lilian Alberta (Allison), Winnifred Gertrude (Carol), Alice Irene (Stamos), and Marian Evelyn Nash. The Nash family lived at 194 Elgin Street.

Charles attended public schools in Sarnia from 1924 to 1932 and then Sarnia Collegiate from September 1932 to May 1935. At Sarnia Collegiate, he pursued several interests. Besides taking courses in electricity, woodworking, math, history, science, English and Literature Composition, Charles was active in hockey, rugby, football and gymnastics, and his hobby was sailing. Outside school, Charles kept himself busy. He was a member of St. George's Anglican Church and he worked at a number of jobs prior to enlisting: making and applying brick siding at Insulated Building Materials in Sarnia from 1935 to 1937; doing electrical work at Imperial Electric in Sarnia for several winter months; applying brick siding at Ontario Roofing from 1937 to 1940; and in 1940 until he enlisted, working as an applicator and salesman with Western Roofing in North Bay. He had also worked for six months with S. Rigby Taxi and Transfer in North Bay as a driver.

At age twenty-two, Charles Nash enlisted in the Royal Canadian Air Force on June 23, 1941 in North Bay, Ontario. He stood five feet eight and a half inches tall, had blue eyes and brown hair, was single, and was residing at 91 Worthington Road, North Bay at the time. He requested flying duties as opposed to ground duties. His plan for after the war was to work in the field of electrical engineering. From the Recruiting Centre in North Bay and then #1 Manning Depot in Toronto, Charles received his air training at #1 Service Flying Training School (SFTS) at Camp Borden; at #1 Wireless School (WS) in Montreal; at Composite Training School (KTS) in Trenton; and then at #6 Bombing and Gunnery School (B&GS) in Mountain View, Ontario. At #6 B&GS, he finished third in his class of 35, and was awarded his Air Gunners Badge on May 11, 1942, with the rank of Sergeant-Air Gunner.

He then enjoyed a 14-day leave at his home in Sarnia before going overseas. After returning to duty, Charles was posted to #1 Y Depot in Halifax and the RAF Trainees Pool. On July 5, 1942, Charles embarked overseas for the United Kingdom. His parents in Sarnia received a cable from Charles later that month, telling them of his safe arrival at an English port.

Disembarking in the U.K. on July 18, 1943, from #3 Personnel Reception Centre, Charles continued his training at #7 Air Gunnery School (AGS) at Stormy Down, Wales, and then at #14 Operational Training Unit (OTU) Cottesmore, in Rutland, England. In early February 1943, he was transferred to #1660 Conversion Unit at RAF Swinderby. On April 3, 1943, Charles Nash became a member of RAF #83 Squadron "Strike to Defend", part of **Bomber Command**, with the rank of Warrant Officer Class II-Air Gunner.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

RAF No. 83 Squadron, part of No. 5 Group, spent the first half of the war operating as a night bomber squadron, based at RAF Scampton, equipped with Handley Page Hampden twin-engine medium bombers. In late December 1941, the squadron began to convert to Avro Manchester bombers, also a twin-engine medium bomber. Flaws in the aircraft soon became apparent (underpowered and unreliable engines), and after only five months, in May 1942, the Manchesters were replaced by Avro Lancasters, which the squadron kept for the rest of the war. In August 1942, there were two big changes for the squadron—its base was transferred to RAF Wyton; and it became part of the **Pathfinder Force**.

The Pathfinder Force was made up of experienced, hand-picked crews from bomber squadrons with elite navigational abilities. These aerial rangers, equipped with the latest target-finding technologies were the spearhead of the bomber stream, arriving first over the target and dropping coloured flares to pinpoint and highlight the area to be bombed by the follow-on force.

WOII-AG Charles Arthur Nash

Approximately two months after joining RAF #83 Pathfinder Force, Charles lost his life during an operation against the enemy. On the night of June 11/12, 1943, Charles Nash was a crew member aboard Lancaster Mk. I R5686 aircraft (markings OL-G) that took off from Wyton on an operation targeting Munster, Germany. The aircraft failed to return from the operation and nothing was heard from the crew. It was assumed that they lost their lives at sea. The aircraft apparently crashed into the sea off the coast of Holland. Perishing with Warrant Officer II-Air Gunner Charles Nash were F/O Christian Godfrey Miller (RCAF); F/O Daniel Owen Thomas (RAF); F/L Cornelius Vincent Joseph Geary (RAF); Sgt. Norman Greenwood (RAF); Pilot James Eric Swift (RAF); and Sgt. James Joseph Anderton (RAF). The bodies of the crew were never recovered; however, the bodies of J.E. Swift and J.J. Anderton washed ashore days later. The remains were recovered by the Germans and buried in Holland.

Not long after the aircraft's disappearance, Albert and Lillian in Sarnia received a telegram from Ottawa informing them that their son, SERGEANT CHARLES ARTHUR NASH WAS REPORTED MISSING AFTER AIR OPERATIONS OVERSEAS JUNE 12. Albert and Lillian had received a letter from Charles only days earlier.

Several days before Christmas in 1943, Albert received the following letter at his Elgin Street home from the Squadron Leader, R.C.A.F. Casualties Officer, for Chief of the Air Staff in Ottawa:

Dear Mr. Nash:

It is with deep regret that, in view of the lapse of time and absence of any further information concerning your son, Sergeant Charles Arthur Nash, since he was reported missing, the Air Ministry Overseas now proposes to

take action to presume his death for official purposes.

Will you please confirm by letter that you have not received any further evidence or news concerning him. The presumption of death will proceed after hearing from you, and on completion you will receive official notification by registered letter.

May I extend to you and the members of your family my sincere sympathy in this time of great anxiety.

In October 1945, Albert and Lillian Nash received a War Service Gratuity of \$333.10 for the loss of their only son. Nine years after Charles' death, in June 1952, Albert received the following letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff in Ottawa:

Dear Mr. Nash:

It is with reluctance that after so long an interval, I must refer to the loss of your son, Warrant Officer Class 2 Charles Arthur Nash, but due to the lack of any information concerning him since he was reported missing, it must be regretfully accepted and officially recorded that he does not have a "known" grave.

Due to the extreme hazards attending air operations there are, unhappily, many thousands of British aircrew boys who do not have "known" graves and all will be Commemorated on General Memorials that will be erected at a number of locations by the Imperial War Graves Commission (of which Canada is a member), each Memorial representative of a theatre of operations. One of these Memorials will be erected at Runnymede, England, and the name of your son will appear on that Memorial.

I realize that this is an extremely distressing letter and that there is no manner of conveying such information to you that would not add to your heartaches. I am fully aware that nothing I may say will lessen your great sorrow, but I would like to express to you and the members of your family my deepest sympathy.

Charles Nash, 24, was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas.* Charles Nash has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom, Panel 180. On the Sarnia cenotaph, his name is inscribed as G.A. Nash.

NEAL, Donald Leland (#A/17881)

Courtright born Donald Leland Neal decided at age twenty-four to enlist in the Canadian Army. After working for eight years in a variety of jobs, Donald decided to become a mechanic after the war. But first, he wanted to serve his country. Sadly, he was killed in action in the Italian Campaign in late September 1944.

Donald Neal was born in Courtright on November 29, 1918, the son of Guy Elmer and Annie Duncan (nee Alexander) Neal, of R.R. #1, Courtright, Ontario. Guy (born 1879 in Lambton, a farmer) and Annie (born 1883 in Lambton) were married on September 17, 1914 in Brigden, Ontario. Guy and Annie were blessed with six children: sons William Alexander (born 1915); Milton Stockdale (born 1916); and Robert and Donald; as well as daughters, Doris Jean (later resided on Brock Street) and Bessie L. Neal.

Donald attended Sarnia Collegiate but left after one year at the age of sixteen. Like many others his age, he had a variety of interests. He was active in baseball and hockey and enjoyed hunting and working on cars. Prior to enlisting, Donald had a number of jobs: he helped his father for a number of years on their 120 acre Courtright farm; he assisted an operator of a weed sprayer for Moore Township for several months; he worked in a saw mill for one winter; he worked at marine construction by building docks, slips and breakwaters; and he worked as a labourer on Donald McRae's farm at R.R. #1 Courtright. Needless to say, Donald filled in the hours he missed at school with gainful labour.

At age twenty-four, Donald Neal enlisted in the Canadian Army on April 20, 1943 in Windsor, Ontario. He stood five feet five inches tall, had blue eyes and light brown hair, was single, and was residing at home in Courtright at the time. His plan for after the war was to pursue employment as a mechanic. From #1 District Depot in Windsor, Donald received his army training at #12 Basic Training Centre (BTC) in Chatham and his advanced training at A-29 Canadian Infantry Training Centre (CITC) at Camp Ipperwash. In early December 1943, he was transferred to Headquarters #1 Training Brigade in Debert, Nova Scotia. On February 13, 1944, Donald embarked overseas for the United Kingdom.

Disembarking in the U.K. on February 24, 1944, he was posted to #3 Canadian Infantry Reinforcement Unit (3CIRU). When he arrived overseas, Donald cabled his parents in Courtright that he had made it safely. He continued his training in the U.K. for approximately one month. On March 28, 1944, Donald Neal departed the U.K. bound for

Italy, as a member of the Perth Regiment (Motor), Royal Canadian Infantry Corps (RCIC), with the rank of Private.

The **Italian Campaign**, the first sustained Canadian Army operation of the War, had begun with the invasion of Sicily on July 10, 1943. The fierce fighting on the island would last more than four weeks, during which the Canadians would advance through difficult mountainous terrain, against an ever-stiffening German resistance. By August 17, the Germans had evacuated the island to the Italian mainland. In early September 1943, Canadian and Allied forces would invade Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl, lasting 20 months, over a range of landscapes, through challenging weather, and against a series of well-protected defences held by some of the German army's best troops. Donald Neal would serve with the Perth Regiment as they advanced north through Italy.

On September 27, 1944, six months after arriving in Italy, Donald Neal lost his life during fighting there. On October 10, 1944, Guy and Annie in Courtright received the following telegram from the Director of Records in Ottawa; MINISTER OF NATIONAL DEFENCE DEEPLY REGRETS TO INFORM YOU THAT A117881 PRIVATE DONALD LELAND NEAL HAS BEEN OFFICIALLY REPORTED KILLED IN ACTION TWENTYSEVENTH SEPTEMBER 1944 STOP IF ANY FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED.

In early November 1944, Annie in Courtright received the following letter from the Brigadier, Acting Adjutant-General:

Dear Mrs. Neal:

It was with deep regret that I learned of the death of your son, A117881 Private Donald Leland Neal, who gave his life in the Service of his Country in the Mediterranean Theatre of War on the 27th day of September, 1944.

From official information we have received, your son was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

In December 1945, Annie received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Madam:

Information has just been received from overseas that the remains of your son, A117881 Private Donald Leland Neal, have been carefully exhumed from the original place of interment and reverently reburied in grave 8, row F, plot 7, of Cesena British Empire Cemetery, Cesena, Italy. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

Donald Neal's death was later officially recorded as, *Overseas casualty, killed in action, in the field (Italy)*. In February 1946, Guy and Annie received a War Service Gratuity of \$192.23 for the loss of their son Donald. In April 1947, the Lt.-Col. Director of Records sent Annie Neal a photograph of the grave and marker over the burial place in Italy of her son Donald.

Donald Neal, 25, is buried in Cesena War Cemetery, Italy, Grave VII, F, 8. On his headstone are inscribed the words, BELOVED SON OF GUY AND ANNIE NEAL, COURTRIGHT, ONTARIO, CANADA. Donald Neal's name is also inscribed on a Memorial plaque on the interior wall of St. Stephen's Anglican Church in the Village of Courtright.

NORTHCOTT, John Henry (#A/20182)

John Henry Northcott, 22, was deployed to England a year after he was married and, while in England, his young wife, Johanna, gave birth to their only child, a son named John after his father. Northcott would never get to meet his young son, for he was killed in a freak accident in England in May 1943.

John Northcott was born in Sarnia on April 17, 1921, the eldest child of John (Jack) George Blackstock and Iva Luxton (nee Willis) Northcott. John Sr. (born May 17, 1902 in Toronto) and Iva Northcott (born December 25,

1898 in Sarnia) were married on November 28, 1918 in Sarnia. [Note: On their Marriage Certificate, John's age is recorded as 21]. When John Sr. married Iva, he was employed as a conductor. In 1921, John Sr. was a fireman, supporting Iva and their newborn son John Jr. at their home at 262 Brock Street. At some point, John Sr. was later employed as a chauffer with a motorbus company in Detroit. The Northcott family soon grew and John Jr. had four siblings: two brothers--David William and Lyle Edward and two sisters, Francis May and Margaret Annie Northcott. John Sr. and Iva also lost two children at a young age: Cecil Jack (May 1, 1920) and June Marie (January 13, 1929).

Tragedy struck the Northcott family when John Jr. was not quite eight years old. His father John Sr., a young man at twenty-six, died on March 21, 1929 in Highland, Michigan, from injuries sustained in an auto collision. Iva later remarried, to James L. Burley and they lived in Stokes Bay, Ontario. John's step-father James also served in the war, as a Sapper in the Canadian Army.

Existing records show little information about John Jr.'s life before he enlisted. At the age of thirteen, he left school after completing grade eight. Prior to enlisting, John Jr. took a six-month business course and was employed for two years by his stepfather as a truck driver.

John served in the Non-Permanent Active Militia, with the 11th Field Company, Royal Canadian Engineers, from April 22, 1937 to October 13, 1938. On September 15, 1939 (five days after Canada declared war on Germany), eighteen year-old John Northcott enlisted in the Canadian Army in Sarnia. He stood five feet eleven and one quarter inches tall, had blue eyes and light brown hair, and was living in Stokes Bay, Bruce County, Ontario at the time, employed as a truck driver. He planned to enter the civil service after the war, possibly as a policeman. From #1 District Depot in London, John received his army training at Royal Canadian Engineers Training Centre (RCETC) at Camp Petawawa, as a member of the 11th Field Company with the rank of Sapper.

On April 4, 1940, John obtained permission from the military to marry. On April 8, 1940, seven months after enlisting, he married Johanna Gweneth Pearl Burley (born 1922), in Wiarton, Ontario. His new wife Johanna, also resided in Stokes Bay, the same community as John's mother, brothers and sisters. On August 23, 1940, four months after getting married, John Northcott embarked overseas from Halifax, Nova Scotia bound for the United Kingdom. On May 15, 1941, thirteen months after getting married, Johanna Northcott gave birth to the couple's son, John Leroy Northcott in Wiarton, Ontario. John Northcott was in England when his son was born.

Disembarking on September 5, 1940 in Greenock, Great Britain, Sapper John Northcott continued his training, including receiving qualifications as a driver and completing a wireless course. He served only in the U.K., as a member of the 11th Field Company, Royal Canadian Engineers, including duty as a truck driver.

On the night of Sunday, May 2, 1943, during a weekend leave in London, John Northcott died in a tragic accident. He had been with two other Sappers from the 11th Field Company during the Saturday, May 1st day and evening enjoying the city. At some point in the evening, John became separated from his buddies. At approximately 12:15 a.m. on the Sunday, John was struck by an electric tube train at Cockfosters Railway Station, Southgate, Middlesex County. It was the last train of the night, and after stopping at its usual stopping point, the driver reported that as he was approaching the platform, he had felt a bump, and thought that he had run over something. It was very dark at the time and with no platform lights on, visibility was practically nil.

Upon investigation, rail personnel discovered the body of a soldier lying under the third car of the train. After police and a doctor had arrived at the scene, the current was taken off, the soldier was examined and pronounced dead, his body removed from the track, placed on a stretcher and taken to Enfield Mortuary. John Northcott had died at the scene as a result of his injuries that included severe head injuries, severed esophagus and trachea, fracture of ribs and cervical spine, his right foot almost severed, and abrasions from being dragged.

John Northcott was buried on May 7, 1943 at Brookwood Cemetery in Woking, Surrey. A temporary wooden cross bearing his name and regimental particulars was erected over the grave. In the inquest that followed, military investigators determined that his death was completely accidental, and not the result of any improper conduct by the deceased.

In mid-May 1943, Johanna, still living in Stokes Bay, received the following letter from the Major-General, Adjutant-General:

Dear Madam:

I deeply regret to inform you that your husband, A.20182 Sapper John Henry Northcott, gave his life in the Service of his Country in the United Kingdom on the 2nd day of May, 1943. You may be assured that any additional

information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Iva Northcott would learn the news of her son's death not from official sources, but from her daughter-in-law Johanna. John Northcott's death was later officially recorded as, *Overseas casualty, accident, due to being run over by a train, cause of death a fractured cervical spine, England*. His widow Johanna, mother of one, was awarded a pension of \$75 per month from the Canadian Military. In August 1945, Johanna, now residing in Sudbury, received a War Service Gratuity of \$733.34 for the loss of her husband John. Johanna also received the Silver Cross medal for the loss of her husband. The card accompanying the medal read, *This Memorial Cross is forwarded to you by the Minister of National Defence, on behalf of the Government of Canada, in memory of one who died in the service of his Country.*

Brookwood Military Cemetery

Silver Cross awarded to Johanna Northcott 1943

In June 1946, the Colonel, Director of Records in Ottawa sent Iva Burley in Stokes Bay a photograph of the grave and marker over the burial place in England of her son John. Johanna Northcott later remarried (to Clifford Neil Patterson), becoming Johanna Patterson, residing in Virginiatown, Ontario. Twenty-two-year-old John Northcott is buried in Brookwood Military Cemetery, Surrey, United Kingdom, Grave 34.I.10.

O'CONNOR, James Michael Barry (#R/68264)

Ten months after twenty-one-year-old James Michael Barry O'Connor enlisted, he married the love of his life in Winnipeg. Two months later, he sailed overseas to serve in one of the war's most dangerous postings. On his 24th mission aboard a Halifax bomber, one short of his 25th and then being sent home, his aircraft failed to return from its target. He has no known grave.

Although his first name was James, he was known as Barry. Barry O'Connor was born in Sarnia on January 22, 1919, the eldest son of James Phillip and Angela Loretta (nee Barry) O'Connor. James O'Connor (a contractor, born in Oil Springs, Ontario) and Angela Barry (born in St. Mary's, Perth, Ontario) were married on January 2, 1918 at Our Lady of Mercy Church in Sarnia. James and Angela O'Connor had six children together: sons James Michael Barry; John Edward (born November 1922); Patrick William (born 1924); and Joseph Peter (born 1932), and daughters Mary Catherine (born 1921, later Mrs. Lloyd Mathers) and Margaret Lorraine. Two of Barry's brothers also served in the war: John Edward, a Private in the Royal Canadian Army Service Corps, attached to National Defence Headquarters in Ottawa; and Patrick William, a Stoker First-Class in the Royal Canadian Naval Volunteer Reserve (RCNVR). Patrick also served in the Korean War (he is included in this Project on page 1097).

Barry's brother - Private John Edward O'Connor, RCASC

The O'Connor family lived at 231 Harkness Street, and later 236 Proctor Street, Sarnia. Barry attended Our Lady of Mercy Catholic Elementary School from 1926 to 1931, Sarnia Collegiate from September 1932 until June 1934, and then two years at St. Patrick's Catholic High School. He was active in boxing and skating, enjoyed hunting and shooting, and was a member of St. Joseph's Catholic Parish, Sarnia. In 1937, he worked at Holmes Foundry as a spare man for three months until he was laid off (seasonal work), and then worked for the rest of the year at J. Maylor Tobacco Store as a clerk. In 1938, he began work at Electric Auto-Lite and continued there until he enlisted.

Twenty-one-year-old Barry O'Connor enlisted in the Royal Canadian Air Force on August 12, 1940 in London, Ontario. He stood five feet nine and a half inches tall, had blue eyes and black hair, was single, and lived with his parents on Harkness Street at the time. He requested flying duties, with a preference to be a pilot or air gunner. From #1 Recruiting Centre in London, Barry received his air training at several Commonwealth Air Training Plan facilities, including at #3 Wireless School in Winnipeg, Manitoba and #5 Bombing and Gunnery School (B&GS) in Dafoe, Saskatchewan.

On June 21, 1941, ten months after enlisting, Barry O'Connor married Helen Grace Hood, the daughter of Mr. and Mrs. Edward Hood of Winnipeg, at St. Mary's Academy in Winnipeg, Manitoba. The ceremony was officiated by Flying-Officer (Rev. Father) Lucien Vinet, chaplain of the R.C.A.F. school at Winnipeg. In early August 1941, Barry was posted to #1 Y Depot in Halifax. On August 24, 1941, two months after getting married, Barry O'Connor embarked overseas from Halifax bound for the United Kingdom.

Initially posted to #3 Personnel Reception Centre in the U.K., Barry continued his training at #1 Signals School, and on January 20, 1942, at #22 Operational Training Unit (O.T.U.) at RAF Wellesbourne Mountford. In mid-June 1942, he became a member of RAF No. 156 Squadron in Alconbury, part of **Bomber Command**.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

No 156 Squadron had been formed in February 1942 based at RAF Alconbury, operating Vickers Wellington twin-engine, long-range medium bombers. In August 1942, still equipped with Wellingtons, they moved their base to RAF Warboys, and the squadron became one of the founding members of the Pathfinder Force. The **Pathfinder Force** was made up of experienced, handpicked crews from bomber squadrons with elite navigational abilities. These aerial rangers, equipped with the latest target-finding technologies were the spearhead of the bomber stream, arriving first over the target and dropping coloured flares to pinpoint and to highlight the area to be bombed by the follow-on force.

In August of 1942, James and Angela O'Connor received a letter from their son Barry. In it, he revealed how he was in one of the recent big R.A.F. raids on Bremen. Following is a portion of that letter:

The most fun I've ever had was one night recently coming back from Bremen. Incidentally, I got direct hits on

my target with bombs of the 4,000 pounds size which are absolutely guaranteed to wake the baby and scare the chickens. Anyhow, on my way back, we met a stooge in a Me. 109, who, incidentally, didn't see us, for he came belting towards us, head on, off to the starboard a bit. I was in the front turret, as I'm front gunner as well as bomb-aimer. I got in two nice long bursts from my guns square into him. He never fired a shot just went into a long dive. Wish I knew whether he went all the way down or not but we didn't linger to check up. We just went down in another long dive in the opposite direction, in case there were others about. They find it pretty tough chewing to tackle a heavy bomber down on the deck, so we dove from 15,000 feet down to ground level, low enough in fact to scrape our trailing aerial on the coast of Holland. The trailing aerial is 15 feet in length, so you can realize we were plenty low. The searchlights and flak couldn't depress low enough to get at us and it sure was funny watching the gun and searchlight crews digging themselves into their holes and trying to pull them in after we zipped over them, or should I say, passed them?

Barry also had words of praise for a watch that his father had given him before he went overseas: *It's still keeping time right to the second. In fact it's a better timepiece than the air ministry chronometer our navigator was given. He often uses my watch to get our exact turning point. James added, I've been in 13 raids and have only 17 more to go. I'm nearly half through now. I wouldn't mind if it was 170 if I could get home between them.*

WOII-BA (James Michael) Barry O'Connor

On October 22, 1942, Barry was transferred from #156 Squadron, becoming a member of RCAF #419 Moose Squadron "Moosa Aswayita" (written in Cree, not Latin, means "Beware the moose-a ferocious fighter"), with the rank of Warrant Officer Class II-Bomb Aimer. RCAF #419 Squadron, part of Bomber Command, was formed at RAF Mildenhall, England in mid-December 1941, and was named after its first commanding officer, Wing Commander John "Moose" Fulton. The unit moved to various bases throughout the war, including Leeming, Topcliffe, Croft and Middleton St. George. Initially operating Wellington bombers, in November 1942 the squadron converted to Handley Page Halifax bombers, and in March 1944 to Avro Lancasters.

Approximately eight months after he mailed the above letter to his parents, Barry O'Connor lost his life. On the night of April 28, 1943, the RAF carried out an operation involving approximately 226 aircraft dropping over 590 mines in the Danish waters and in the Baltic Sea. That night, Barry O'Connor was aboard Halifax II aircraft JB923 (markings VR-Q) that took off at 20:42 hours from RAF Base Middleton St. George for a "Gardening" operation (nickname for mine laying) to Skagerrak, to an area designated as "Silverthorne". It was Barry's 24th sortie with Halifax Bomber JB923, while most others of the crew were serving on only their 4th or 5th mission. As a reservist, Barry would have been sent home after his 25th mission. His Halifax aircraft would be lost that night, to enemy action while it was laying mines in the Skagerrak Strait, Norway. The operation was not successful that night for Moose Squadron--two of the aircraft returned because of the heavy cloud cover, one was hit by flak and had to return, and JB923 did not return.

[Note: Some sources list the aircraft JB923 as JB929. This follows the error in the Squadron ORB for that night].^{6G}

Perishing in Halifax bomber JB923 with twenty-four-year-old Barry O'Connor were WO.s George Kenneth Alfred Smallwood and James Gordon Acker; Sgts. Robert Russell Gourde and James Arthur Laurence Allen; and FS.s Lloyd Joseph Charles Murphy and John William Carley. In early May 1943, James and Angela in Sarnia received word that their son, FLIGHT SERGEANT JAMES MICHAEL BARRY O'CONNOR WAS REPORTED MISSING AFTER AIR OPERATIONS OVERSEAS.

In mid-May 1943, Helen, then living on Spadina Avenue in Toronto, received a letter from the Wing Commander of No. 419 (R.C.A.F.) Squadron. Following is a portion of that letter:

Dear Mrs. O'Connor,

It is with very deep regret that I write to inform you of the circumstances of your husband's posting as missing.

Flight Sergeant O'Connor was the Bomb Aimer of an aircraft detailed to perform an operation on the night of April 28th. The operation was generally successful, but unfortunately your husband's aircraft failed to return and nothing has since been heard of it. There is, of course, a hope that all, or part of the crew may either be interned in neutral territory, or may be prisoners of war in enemy hands. This, of course, would not be known for some considerable time but if any word comes in we shall notify you immediately.

Flight Sergeant O'Connor was with us for seven months and had twenty-four operations to his credit. Some of these were among the Squadron's most hazardous and successful, and against the enemy's most heavily defended targets.

Your husband was a great favourite with all sections of the Squadron. His cheery manner and keen sense of humour, coupled with his reliability, will certainly make his loss felt for some considerable time. As you are probably aware, he took quite a prominent part in our Station sports and activities; in fact, he was such an all-round man that this Squadron, and the Air Force as a whole, will find him hard to replace....

If there is anything I can do, or any help I can give you, do not hesitate to write and let me know. May I express the sincere sympathy of the entire Squadron in the loss of a very gallant gentleman, and hope with you that better news may follow shortly.

Helen O'Connor received two more letters shortly after: one from the Flight Lieutenant, for Air Officer Commanding-in-Chief, R.C.A.F., Overseas; and the other from the Headquarters of the R.C.A.F. Casualties Officer in Ottawa. Both letters confirmed the information she had received in the above letter and added; *...enquiries are continuing through the International Red Cross Committee, and all other available sources, and any news which may be forthcoming will be communicated to you at once. If any information regarding your husband is received by you from any source you are requested to be kind enough to communicate it immediately to the R.C.A.F. Casualties Officer,... Ottawa.*

In November 1943, Helen wrote a letter to RCAF Headquarters, frustrated and anxious for information about her husband. Following is a portion of that letter:

Dear Sir:

I received your letter... asking me to confirm the fact that no further information has been received by me, concerning my husband. I regret to say, that the only information I have received about him, came from R.C.A.F. headquarters and that was very little.

There is one thing I would like to know, and I feel that I have the right to ask. I know my husband was "lost" on a raid somewhere over Germany and I feel that enough time has elapsed now that I should be able to know just where it was.

I know this action to "presume him dead" is only for official purposes. Will they keep on trying to trace him? I pray that they will... I have not heard anything about my husband, not in six whole months, I'm hoping for some better news shortly...

The reply letter from the Flight Lieutenant, R.C.A.F. Casualties Officer was received by Helen very soon after. Following is a portion of that letter:

Dear Mrs. O'Connor:

... It is regretted that no additional particulars are available at these Headquarters regarding the flight from which your husband's aircraft failed to return or the target which he had been detailed to attack, however enquiries are being made Overseas and as soon as a reply is received it will be forwarded to you.

Please be assured that although the Air Ministry now proposes to presume your husband's death it is for official purposes only and such action will not in any way affect or diminish the search being made for him. May I again offer my sincere sympathy in this trying time.

In late January 1944, Helen received the following letter from the Air Marshal, Chief of the Air Staff:

Dear Mrs. O'Connor:

I have learned with deep regret that your husband, Flight Sergeant James Michael Barry O'Connor, is now for official purposes presumed to have died on Active Service Overseas on April 28th, 1943. I wish to offer you and the members of your family my sincere and heartfelt sympathy.

It is most lamentable that a promising career should be thus terminated and I would like you to know that his loss is greatly deplored by all those with whom your husband was serving.

Soon after, James and Angela received the news that their son Barry O'Connor's death was officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas.* In December 1944, James and Angela received official information advising them that their son, Flight Sergeant J.M. Barry O'Connor, who has been missing since April 28, 1943, was promoted to Warrant Officer, Class 2, as of November 2, 1942.

In February 1945, Helen, then living in Prince Rupert, British Columbia, received a War Service Gratuity of \$549.84 for the loss of her husband Barry. In August 1946, Helen received the following letter from the R.C.A.F. Records Officer in Ottawa:

Dear Mrs. O'Connor:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your husband Warrant Officer, Class 2, J.M.B. O'Connor. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

In January 1952, Helen, then living on Close Avenue in Toronto, received the following letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff:

Dear Mrs. O'Connor:

It is with reluctance that after so long an interval, I must refer to the loss of your husband, Warrant Officer Class II James Michael Barry O'Connor, but due to the lack of any information concerning him since he was reported missing, it must be regretfully accepted and officially recorded that he does not have a "known" grave.

Due to the extreme hazards attending air operations there are, unhappily, many thousands of British aircrew boys who do not have "known" graves and all will be commemorated on General Memorials that will be erected at a number of locations by the Imperial War Graves Commission (of which Canada is a member), each Memorial representative of a theatre of operations. One of these Memorials will be erected at Runnymede, England and the name of your husband will appear on that Memorial.

I realize that this is an extremely distressing letter and that there is no manner of conveying such information to you that would not add to your heartaches. I am fully aware that nothing I may say will lessen your great sorrow, but I would like to express to you and the members of your family my deepest sympathy.

Barry O'Connor left behind his father James and mother Angela, his three brothers and two sisters, and his wife Helen of less than two years. More than twenty years after her husband lost his life, Helen, then living on Durie Street in Toronto, was still searching for answers. Following is the letter she wrote to R.C.A.F. Headquarters in late November 1964:

Dear Sirs:

After so long an interval I find it hard to have to write this letter. However I should like my address on file, in the event that some trace of my late husband's aircraft should turn up. My common sense tells me this is almost impossible, however he has been on my mind so much this last – while I wonder.

I know my husband's plane went down somewhere in or, around the Skagerrak, I have enclosed this small clipping from the Toronto Star dated Nov. 10/64. [The clipping was a news article about a massive drilling rig that was being moved through the area of Skagerrak. The rig's long steel legs were going to be lowered to the North Sea bottom, to drill for oil and natural gas].

The Air Force was very kind in giving me all the information it could at the time Barry was missing. Would it be possible to tell me just where in England my husband was stationed all the time he was overseas? I would imagine this is all on file. I plan on going to England this year and would like to know where he spent the last months of his life.

This is very important to me, and I would be most grateful if you could help me to obtain this information. I

have since remarried, however my heart and mind remembers that Barry has no “known” grave among many others. I must thank you and the dept for all your kindness in the past. Please let me know where Barry was stationed.

James Michael Barry O'Connor, 24, has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom, Panel 180. Parents James and Angela O'Connor in Sarnia lost a second son to war--Patrick William O'Connor, a veteran of WWII, would lose his life in the Korean War (he is included in this Project on page 1097).

Composite picture of the three O'Connor brothers who served in WWII.
John Edward (L), Patrick (C) and James Barry (R)

O.L.M. Cemetery, Sarnia

There is a memorial headstone in Our Lady of Mercy Catholic Cemetery in Sarnia that has inscribed on it the names of six O'Connor family members, including: James and Angela O'Connor, and their children Joseph Peter, Mary Catherine, Pte. Patrick William and W.O. Barry O'Connor, RCAF.

OLIVER, William John (#J/23152)

A well-rounded young man who was active in sports, music, his church and the Boy Scouts, William Oliver was only eighteen years old when he made the decision to serve his country. After almost two years of air training in Canada and the U.K; receiving his pilot flying badge; and being promoted to flying officer-pilot; William Oliver lost his life as a result of a tragic accident while serving in the United Kingdom.

William John (Jack) Oliver was born in Sarnia on October 25, 1923, the son of George Wilfred and Della (nee Hume) Oliver. George and Della, both born in Petrolia, were married on December 9, 1914 in Forest, Ontario. George supported his family working at a fence company and later at Polymer Corp in Sarnia. George and Della had five children together: sons William John; Kenneth Lyle; Clare LaVerne; and Wilfred Ray (born Feb. 3, 1918, served as a Lieutenant in the Canadian Army, with a Royal Canadian Artillery Unit). Unfortunately, their only daughter Hilda Marie Oliver, died at the age of nine months in March 1922.

The Oliver family lived at 123 Proctor Street, Sarnia. William attended Johnston Memorial Public School in Sarnia from September 1929 to June 1936, and then Sarnia Collegiate from September 1936 until April 1941. He participated in football, hockey and softball, and was a member of Boy Scouts of Canada. His hobbies included model railroad building, photography and music. He played in the school orchestra and the cadet band while at Sarnia Collegiate, and was a member of the Lambton Garrison Band. William was also a member of the Devine Street United Church and the Young Men's Club of St. Andrew's Church. Prior to enlisting, William was attending Sarnia Collegiate part time, and was employed (since April 1941) as a laboratory assistant in the inspection lab at Sarnia Imperial Refinery.

Eighteen year-old William Oliver enlisted in the Royal Canadian Air Force on November 14, 1941 in London, Ontario. He stood five feet six inches tall, had brown eyes and black hair, was single, and lived at home with his parents on Proctor Street at the time. He requested flying duties, with a preference to be a Pilot or Observer. Following the war, William planned to attend university. The Recruiting Officer wrote of William, *Keen bright young man, very anxious to serve. Should be excellent Air Crew material in every respect.*

From #9 Recruiting Centre in London and then #2 Manning Depot in Brandon, Manitoba, William received his air training at #7 Bombing and Gunnery School (B&GS) in Paulson, Manitoba; and #16 Service Flying Training School (SFTS) in Hagersville, Ontario; continuing at #5 Initial Training School (ITS) in Belleville, Ontario; and #13 Elementary Flying Training School (EFTS) in St. Eugene, Ontario; and then #2 Service Flying Training School (SFTS) at Uplands, near Ottawa. William was awarded his Pilots Flying Badge on January 22, 1943 at Uplands. During his training, he flew Anson, Harvard and Fleet Finch II aircraft. After receiving his Pilots Flying Badge, William completed a Navigational Reconnaissance Course at #31 General Reconnaissance School (GRS) at RCAF Charlottetown, Prince Edward Island. In April 1943, William enjoyed a 16-day pre-embarkation leave.

Lt. Wilfred Ray Oliver, R.C.A.

Flying Officer-Pilot William John Oliver

By the end of April 1943, William was posted at #1 Y Depot in Halifax, Nova Scotia. On May 8, 1943, eighteen months after enlisting, William embarked overseas from Halifax bound for the United Kingdom. Initially posted to #3 Personnel Reception Centre, he continued his air training in the U.K. at #3 (Pilot) Advanced Flying Unit (AFU), and in July 1943, he was promoted to the rank of Flying Officer-Pilot. On August 3, 1943, he was transferred, becoming a member of RAF #6 Operational Training Unit (OTU).

RAF No. 6 Operational Training Unit was formed and reformed a number of times throughout the war. During that time, it was equipped with a variety of different aircraft; operated from several different bases; and trained airmen to carry out a range of tasks (fighters, bombers and reconnaissance). In March 1943, the unit, then based at RAF Silloth, was equipped with Vickers Wellingtons (twin-engine medium bomber) and Avro Ansons (twin-engine, multi-role aircraft), and trained airmen to be part of Coastal Command.

Five months after arriving overseas, on October 6, 1943, William Oliver was killed when he accidentally fell from the roof of the St. George Hotel, 19 George Street, Edinburgh, Scotland. He and three of his fellow officers on leave had arrived at the hotel on October 5 from the R.A.F. Station Silloth, Cumberland, having booked a room there. The men had spent part of the evening in a dancehall in the city and returned to the hotel about 10 p.m. William was last seen between 11:15 and 11:30 p.m. obtaining the key for the room they were sharing.

In the investigation that followed, it was determined that shortly after midnight William climbed through a window onto the top floor of the hotel and was walking on the roof. It was while walking on the roof that he inadvertently walked over the edge of the roof, falling 80 feet to the ground. His body was found at 6:45 a.m. that morning (October 6). The investigation that followed the incident concluded that it was entirely accidental.

Not long after the accident, George and Della Oliver in Sarnia received a cable from R.C.A.F. Headquarters in Ottawa informing them that their son, Pilot Officer W.J. Oliver had been killed on active service overseas. No details were given as to how he met his death, although it was stated that the funeral would be held at East Fortune near Edinburgh, Scotland.

In late October 1943, William's brother Ken on South Russell Street in Sarnia, received the following letter from the Group Captain, Commanding, R.A.F. Station, Silloth, Cumberland:

Dear Mr. Oliver,

You will have been informed by the Air Ministry that your brother, William John Oliver, lost his life on the 6th October as a result of a fall from the roof of a hotel in Edinburgh.

May I offer on behalf of all at Silloth and myself, our sincere sympathy with you in your sad bereavement. It is very tragic that your brother should have lost his life at the conclusion of his long period of training, and at a time when he no doubt expected to be soon engaged on active operations.

As it appears that nobody was with him when the accident happened, it can only be assumed that after climbing on the roof of the hotel for some reason which we do not know, he inadvertently fell off, and was killed by the fall to the pavement below.

I appreciate how you must feel when you receive this letter, and again express our true sympathy.

William Oliver's death was later officially recorded as, *Killed while on leave. (Fell off roof of hotel), overseas (Scotland)*. Not long after his death, a memorial service was held for William at Devine Street United Church, officiated by its pastor Rev. Arnold Mathews, assisted by Rev. J.M. Macgillivray of St. Andrew's Presbyterian Church. The memorial service in Sarnia occurred while William's funeral was being held in Scotland. His brother, Lieutenant Wilfred Ray Oliver, who was overseas with a Royal Canadian Artillery Unit at the time of William's death, was able to attend the funeral.

In June 1945, George and Della Oliver received a War Service Gratuity of \$249.33 for the loss of their son. William John Oliver, 19, is buried at Haddington (St.Martin's) New Burial Ground, East Lothian, United Kingdom (Scotland), Section E, Grave 18. On his headstone are inscribed the words, FOR HONOUR, FOR COUNTRY AND FOR GOD. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

OTTAWAY, Ernest Edward

Ernest Edward Ottaway experienced plenty of grief in his life—when he was seven, he lost his sister; when he was nine, he lost his father, a World War I veteran; and after marrying, he and his wife lost their first-born child. Yet, he was one of the first in Sarnia to enlist to serve his country. Four years later, he was killed in action in Belgium while leading his platoon during one of the most difficult and grueling battles in the war.

Ernest Ottaway was born in Calgary, Alberta on August 29, 1912, the eldest child and only son of Ernest Augustine and Lillian Florence (nee Dochstader, born in Ontario) Ottaway. Father Ernest Augustine was born March 1889 in London, England, and his family immigrated to Calgary, Alberta, in 1904, when he was fifteen years old.

Ernest Sr. Ottaway and Lillian Dochstader were married in Calgary, Alberta on June 8, 1911. Ernest Sr. and Lillian Ottaway had three children together: son Ernest Edward (Jr.) and daughters Virginia Lillian (born 1914, became Virginia Baldwin) and Ruby Gertrude (born August 2, 1915, accidental death on September 25, 1919).

Father Ernest Augustine Ottaway (#160577) was a veteran of the Great War. On October 11, 1915, twenty-seven-year-old Ernest Sr. enlisted in the Canadian Over-Seas Expeditionary Force in Calgary. He stood five feet eight and one half inches tall, had brown eyes and black hair, was employed as a printer pressman, was married to Lillian, and lived in Calgary at the time. He also had three very young children at home at the time; his eldest, son Ernest Jr. was just three years old. He recorded his prior military experience as three years with the No. 11 Army Medical Corps. He became a member of the 82nd Battalion with the rank of Private. Seven months later, he embarked overseas, arriving in Liverpool, England on May 29, 1916. Just over four months later, on October 8, he arrived in France, as a machine gunner with the 1st Canadian Machine Gun Company.

In May 1918, Ernest Augustine was promoted to Corporal. The Hundred Days Campaign (August 8 – November 11, 1918) would be the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The first offensive in Canada’s Hundred Days Campaign was the **Battle of Amiens** in France (August 8-14), a truly all-arms battle, one that all four Canadian divisions would be involved in. During one week at Amiens, the Canadians advanced nearly 14 km – but it came at a cost of 11,822 Canadian casualties.

On August 9, 1918, Corporal Ernest Augustine Ottaway was wounded in action at Amiens, recorded as “gun shot wound right thigh and head”. He was operated on three days later at No. 9 General Hospital, Rouen. He was returned to England, recovering in a General Hospital in Liverpool one week later, and Princess Patricia Canadian Red Cross Hospital in late September. On October 4, 1918, he was discharged from hospital to duty. The Great War would end one month later. On December 24, he was returned to Canada, and was discharged on demobilization in February 1919 in Calgary, Alberta.

Seven months after being discharged, Ernest Sr. and Lillian lost their four year-old daughter Ruby, the result of an accident. Ernest Jr., who spent his early childhood in Calgary, was seven years old at the time. In October 1920, the Ottaway family moved east, residing briefly at 413 Nelson Street, Sarnia, the home of Lillian’s brother, Joseph Dochstader. In June 1921, the family was living in Cardiff Township, Ontario. The Ottaway household included parents Edward Sr. and Lillian; Edward Sr.’s parents Valentine Edward and Selina Georgina; and their two children Ernest Jr. and Virginia Lillian. Months later, on September 18, 1921, Ernest Sr. died at the age of 32 in Bancroft, Ontario. His death was the result of his service overseas—he had been both wounded and gassed in France, and died as a result of congestion of his lungs. Ernest Jr. was nine years old at the time. Later, widowed Lillian Florence Ottaway moved to 225 Cromwell Street, Sarnia.

By the time Ernest Jr. Ottaway moved to Sarnia, he had already finished his formal education, completing 8th grade public school. In Sarnia, he was a member of St. George’s Anglican Church. He participated in tennis and softball, and enjoyed his hobby of photography. Prior to enlisting, Ernest Jr. was employed in Sarnia as a painter and printing pressman. He had also done some work as an auto mechanic and had taken a six-month business course. He was employed for several years with the Frontier Printing Company, and approximately one year with the Canadian Printing Company.

On October 10, 1936, Ernest Ottaway married Petrolia-born Gertrude Leila Hallam, the youngest daughter of Robert and Eva Mabel Hallam at Canon Davis Memorial Church, in Sarnia. Ernest was a printing pressman residing at 413 Nelson St., while Gertrude was a clerk residing at 204 Proctor St. at the time. The groom’s sister, Miss Virginia Ottaway, served as bridesmaid and William E. Baldwin served as the best man. After the ceremony, Ernest and Gertrude Ottaway left on a wedding trip to the United States and, on their return, they lived at 413 Nelson Street. Ernest and Gertrude Ottaway had two daughters together: Joanne Earnestine (tragically a stillborn, February 18, 1937); and Marlene Diana, born April 9, 1938.

Ernest Ottaway was a member of the local Sarnia militia unit, the 11th Field Company, Royal Canadian Engineers (RCE) from May 1937 until July 1938, where he attained the rank of Sergeant. Twenty-seven-year-old Ernest Ottaway was one of the first men to enlist in Sarnia, joining the Canadian Army on September 8, 1939 (two days before Canada declared war on Germany). He stood five feet ten inches tall, had brown eyes and black hair, and was married with a one year-old daughter at home. He recorded his occupation as painter, and his address as 413 Nelson St., later changed to 149 Brock St., Sarnia (in his Service File, his next of kin’s address—Gertrude, is

changed twice to 302 George Street and 163 ½ North Forsythe Street, Sarnia). Ernest began his army training in London, Ontario. As a member of the 11th Field Company, Royal Canadian Engineers, Canadian Active Service Force (CASF), he advanced in rank to Company Sergeant-Major (CSM) in February 1940.

After helping to train infantry troops at Petawawa camp, Ernest Ottaway embarked overseas from Halifax bound for the United Kingdom on August 23, 1940, a member of the Royal Canadian Engineers, 11th Field Company, with the rank of Company Sergeant-Major. He continued his training in the United Kingdom, took command of a battalion for a time, and was an instructor at a bomb disposal school. In August 1942, after being in the United Kingdom for more than two years, Ernest spent his 30th birthday overseas, far from his wife and daughter.

In late March 1943, Ernest returned to Canada to take an Officer's Training Course (OTC) in Brockville, Ontario. He was pleased to make it home to Sarnia for a short while, in time for his daughter Marlene's fifth birthday. When he arrived in Sarnia by train, he was met by his wife Gertrude and daughter Marlene; Sergeant-Major Alf. Luckins with whom he had served overseas; and two members of the Canadian Legion. Although she had not seen her father for almost three years, little Marlene Diana rushed toward him as he talked with two other soldiers. "She knew him instantly," her mother said. Ernest said, "My one worry from the time I left England was whether I would make the grade in time for her birthday. Now we'll have a nice little party."

While in Sarnia, Ernest told a reporter for the *Canadian (Sarnia) Observer* of some of his experiences. On more than one occasion he had been close to exploding bombs. He was so close to one that it lifted him bodily, together with the truck he was driving, and deposited both in a nearby field, after the truck had neatly cleared a four-foot hedge. Miraculously, Ernest had escaped injury. "The bomb exploded about 40 feet away from the truck one night as I was driving to the barracks," he said. "Owing to the noise of the engine I did not hear its approach. I didn't know what happened until I found the hole made by the bomb in the road." He said that he was in London on several occasions when "Jerry came over" as he put it. He said that the approach of a high explosive bomb can be likened to the noise made by an express train. Half an hour after he arrived at an English camp, a lone plane came over and strafed the barracks with machine gun fire. About a month before he returned to Canada, he was machine-gunned again with other soldiers who were stationed at a point on the south-east coast of England.

While back in Canada, Ernest secured his commission in the infantry, receiving his certificate at the Canadian Army Officers' Training Centre (OTC) at Brockville in July of 1943. He was then transferred to A-29 Canadian Infantry Training Centre (CITC) at Camp Ipperwash for advanced training, graduating on August 20, 1943 with the rank of Lieutenant. He was then posted to #12 Canadian Army (Basic) Training Centre (BTC) in Chatham as a Platoon Commander, and soon after to Officers Training Centre (OTC) in Brockville, Ontario. In December 1943, Ernest spent his Christmas leave at home in Sarnia with his wife Gertrude and daughter Marlene. It would be the last Christmas they would spend together.

On February 17, 1944, Lieutenant Ernest Ottaway returned to England, becoming a member of the #4 Canadian Infantry Reinforcement Unit (#4CIRU), and later the #3CIRU. He continued training in the U.K., and was awarded a Canadian Efficiency Medal in April 1944. On August 25, 1944, Ernest embarked from the U.K. and arrived in France the next day as a member of the Queen's Own Rifles of Canada, Royal Canadian Infantry Corps (RCIC).

Ernest arrived in France soon after the Battle of Normandy (June 6-August 21, 1944). After the Allied breakout from Normandy, Canadian forces were assigned the "**Long Left Flank**". This offensive included the less glamorous but vital tasks of clearing coastal areas in the north of France and Belgium of German occupiers; opening the English Channel ports for supplies essential to the Allied advance; and capturing the launching sites of German V-1 rockets. In a series of stop-and-start advances against stiff resistance in fortified positions, the Canadians liberated ports and villages including Rouen, Dieppe, Dunkirk, Boulogne and Calais. Lieutenant Ottaway served with the Queen's Own Rifles as they advanced through northern France and Belgium from late August to early October.

In early September 1944, Allied forces had captured the inland port of Antwerp, Belgium, the second greatest port in Europe at the mouth of the Scheldt River. However, German forces still controlled the 45-mile-long Scheldt estuary (the Belgian-Dutch border area) that connected the port of Antwerp to the North Sea. In early October 1944, the Canadians were entrusted with liberating the estuary. The **Battle of the Scheldt** was among the most difficult and grueling struggles in the war. The bitter fighting against a well-fortified and heavily entrenched enemy took place in a bleak environment made worse by the winter cold in a flooded and freezing muddy quagmire. Ernest Ottaway and the Queen's Own Rifles would take part in the advance through northern Belgium towards the Netherlands.

On October 10, 1944 Ernest Ottaway became a replacement officer of a platoon of the Queen's Own Rifles of Canada R.C.I.C. In a letter to his wife Gertrude in Sarnia, he indicated that he first participated in the fighting on October 16. Ernest Ottaway lost his life only five days later on October 21, 1944 while leading his platoon of Alpha Company during the Battle of the Scheldt at the town of Schoondijke, in Belgium. Though killed on October 21, 1944, Ernest Ottaway's remains were not buried until November 13, 1944. His remains were buried at a Holland location recorded on the Army Field Service Card as "1/25000 Philipine Sheet 22 SW in corner of pear orchard by farm house on east side of highway MR 179071."

Lieutenant Ernest Edward Ottaway

Memorial Cross

On October 28, 1944, Gertrude Ottaway on Forsythe Street in Sarnia received the following telegram from the Director of Records in Ottawa: MINISTER OF NATIONAL DEFENCE DEEPLY REGRETS TO INFORM YOU THAT LIEUTENANT CEM ERNEST EDWARD OTTAWAY HAS BEEN OFFICIALLY REPORTED KILLED IN ACTION TWENTY-FIRST OCTOBER 1944 STOP IF ANY FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED. No other details were provided.

In early November 1944, Gertrude received the following letter from the Major-General, Adjutant-General:
Dear Mrs. Ottaway:

It was with deep regret that I learned of the death of your husband, Lieutenant Ernest Edward Ottaway, who gave his life in the Service of his Country in the Western European Theatre of War on the 21st day of October, 1944.

From official information we have received, your husband was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

In mid-November 1944, Gertrude received the following letter from the Lieutenant-Colonel commanding the 1st Battalion, Queen's Own Rifles of Canada:

It is with great personal regret and sorrow that I have to write you concerning the death of your husband on October 21 during the battle of the Scheldt pocket. The battalion had driven the enemy from the village of Ijzendijke and was pursuing them into the heavily defended belt based on the town of Oostburg. "A" company, to which your husband was attached, was given the job of "feeling out" the enemy defences in the area of a large farm, which was manned by several machine-guns and a number of snipers. During the course of the patrols that were necessary to get this information your husband, while leading his platoon forward, exploded an anti-personnel mine in the ditch up which he was crawling, killing him instantly.

Although Edward had been with us only a few days, we already knew that we had been lucky in getting an officer of his caliber. We are all very sorry to lose him in this way, as we were convinced he had a future with the regiment. I can assure you that he died carrying out his duty, leading his platoon into an action which we all knew was an extremely dangerous and hazardous one. We have indeed lost a very fine soldier. May I offer you, on behalf of myself and the regiment, our sincere sympathy in your great loss.

More than a year after Ernest Ottaway was buried, Gertrude received a letter from the Colonel, Director of Records, for Adjutant-General in mid-December 1945. Following is a portion of that letter:

Dear Madam:

Information has just been received from overseas that the remains of your husband, Lieutenant Ernest Edward Ottaway, have been carefully exhumed from the original place of interment and reverently reburied in grave 7, row E, plot 2, of Adegem Canadian Military Cemetery, Adegem, Belgium. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

Pear orchard cemetery where Ernest Ottaway and other Queen's Own Rifles were buried in October 1944.
Located in Dunnepolder in the province of Zeeland, Netherlands

Ernest Ottaway's death was later officially recorded as, *Overseas casualty, killed in action, in the field (Holland)*. In May 1945, Gertrude received a War Service Gratuity of \$1157.50 for the loss of her husband. Ernest Ottaway left behind his widowed mother Lillian, his sister Virginia, his wife of eight years Gertrude, and their six-year old daughter Marlene.

Ernest Edward Ottaway and his father Ernest Augustine Ottaway both died at the age of 32, both as a result of war. In early December of 1944, a memorial service in Ernest Edward Ottaway's honour was held in St. George's Anglican Church, Sarnia during the regular morning Sunday service. Rev. F.G. Hardy, the choir and congregation paid a solemn tribute to his memory, which included the singing of a favourite hymn of his, "Unto the Hills Will I Lift Up Mine Eyes" and the recital of appropriate prayers. Ernest Ottaway, 32, is buried in Adegem Canadian War Cemetery, Belgium, Grave I.I.E.7. On his headstone are inscribed the words, IN LOVING MEMORY OF MY DEAR HUSBAND WHO WAS KILLED IN OOSTBURG, HOLLAND.

PAITHOWSKI, Michael Joseph (#V/17380)

NOTE: Michael Paithowski spelled his surname with a "w" in it. The rest of the family spelled the surname with a "u", as Paithouski.

Less than three years after enlisting, Michael Joseph Paithowski married the love of his life. Seven months later, he was serving on one of the sturdy little "work horses" of the Royal Canadian Navy. Three months after the birth of his son, Michael Paithouski lost his life off the east coast of Canada to what British Prime Minister Winston Churchill said was "... the only thing that ever really frightened me during the war..."

Michael Joseph Paithowski was born in Hamilton, Ontario on December 7, 1916, the son of Michael Paithouski Sr. (nicknamed "Tato") and Rosa Paithouski. Rosa Paithouski (nee Doskevitch) was born in Lvov, Poland. Rosa had a previous marriage to Paul Lukasevich, and Rosa and Paul had two children together: Peter Lukasevich (born 1901) and Mike Lukez (born 1907, changed his name from Lukasevich), who later became half-brothers to Michael Paithowski. Rosa emigrated from Poland to Canada, leaving behind her husband and two children. Peter Lukasevich and Mike Lukez later immigrated to Canada, arriving in their twenties in Sarnia, and they later moved to Windsor.

Michael Paithouski Sr. (“Tato”) was born in Vilshanka (near Kiev), Ukraine. When Tato emigrated from Trieste in northeastern Italy to North America in 1909, his first stop was Ellis Island, New York. Tato’s last name was actually Piatkowski, but the immigration officer recorded it as Paithouski, which it was to remain afterwards. His name is recorded on the American Immigrant Wall of Honor at Ellis Island in New York Harbor. Tato Paithouski then made his way from New York to Montreal and later to Hamilton. It was in Canada that Tato married Rosa. Tato and Rosa had three children: Mary (born 1915 in Montreal); Michael Joseph (born December 7, 1916 in Hamilton); and Nicholas Joseph (born October 26, 1917 in Hamilton). Eventually the Paithouski family moved to Sarnia, residing at 589 South Vidal Street. Tato supported his family working as a boiler foreman at Imperial Oil’s Refinery.

The Paithouski siblings and their spouses were very busy people. Michaels’ sister, Mary, married Earl Joseph Wynne just before Earl went off to war in September 1939 (he would become a Sergeant in the army). Michael’s younger brother **Nicholas (Nick) Joseph Paithouski**, was a star football player for Queen’s University, from where he graduated in 1940 as a civil engineer. In his first season as a football player at Queen’s in 1936, Nick played on the junior team because he was viewed as too small for the senior squad. That season, he was voted as the junior team’s Most Valuable Player. He would play as a regular on the senior offensive and defensive line for the following three years for the Queen’s Golden Gaels. Nick won the Johnny Evans Trophy as MVP as a lineman in the 1939 season. Graduated in engineering in 1940, Nick was the only one of five children from a Ukrainian-Polish immigrant family to receive a university education.

Nick also was an outstanding player for the Sarnia Imperials and the Regina Roughriders. As it turns out, his football experience would figure greatly during the war. Nick played centre and linebacker for the 1940 Sarnia Imperials where he was an all-star and won the 1940 Imperial Oil Trophy as the Ontario Rugby Football Union (ORFU) league MVP. In 1941, Nick played one year for the CFL Regina (later Saskatchewan) Roughriders. In April 1942, Nick enlisted with the Royal Canadian Engineers, later becoming a lieutenant. He arrived overseas around August 1943. During his time overseas, one of Nick’s highlights was playing in two famous football games in London, England.

The idea for the first football game originated when Major Dennis Whitaker, a former quarterback for the Hamilton Tigers of the CFL and a Dieppe survivor, and an American Special Services lieutenant met in a pub, and began talking football. The result of the chance meeting was the **Tea Bowl**. The game was to be a hybrid, with the first half played under American rules, and the second under Canadian. The Canadian Army team, named the “Mustangs”, had a number of Sarnians (Nick Paithouski at center, Charles Henry Living—including in this Project, and Ken Withers) and several CFL players. The Tea Bowl was played on February 13, 1944 before over 30,000 fans in White City Stadium in London and was even broadcast on British radio. With the threat of German bombers, RAF Spitfires were deployed to cover the skies around the stadium during the game. The Canadian Army “Mustangs” defeated the U.S. Army Central Base Station “Pirates” team by a score of 16 to 6.

Stung by the loss, the Americans called for a rematch. Their new team, the U.S. 29th Army team, named the “Blues”, was reinforced with a contingent from the University of Iowa Cornhuskers and a former NFL all-star. The rematch, played on March 19, 1944, again in White City Stadium, this time before a crowd of 50,000, was dubbed the Coffee Bowl. The U.S. “Blues” defeated the Canadian Army “Mustangs” team by a score of 18 to 0. The outcomes of the games were really irrelevant; what counted was the camaraderie, the friendly competitiveness, and a sense of shared purpose. Less than three months later, the Allied forces, including some of the games’ participants, joined together in something much larger – the D-Day landings in France.

As a platoon leader with the Royal Canadian Engineers, Nick Paithouski was responsible for supplying the equipment and building of bridges, 51 of them in 45 days in France, Belgium, Germany and the Netherlands between March 24 and May 5, 1945. In late 1945, Lieutenant Nicholas Paithouski was awarded the decoration “Mention in Despatches”. The award reads, “The KING has been graciously pleased to approve the award of Mentions in Despatches, in recognition of gallant and distinguished services.” After the war, the United States military authorities recognized his distinguished service and bravery, awarding Nick the USA Bronze Star for his efforts, an honour bestowed on a very small number of non-American servicemen, for supplying bridging parts and equipment to Allied Forces in North West Europe. After the war, Nick Paithouski married ‘Effie’ Barbara Paul in 1946 in Hamilton. Nick went on to play two seasons with the Hamilton Tigercats (Wildcats at the time), in 1947 and 1948, while working at Stelco. He then returned to Sarnia to start a family with ‘Effie’ Barbara Paul. They were successful, as ‘Effie’ gave birth to Janet Elizabeth (1951, later Janet Baker) and Joseph Paithouski (1953).

‘Effie’ Barbara Paul was the daughter of Lt. Charles Marr and Frances (nee Williams) Paul. ‘Effie’ was born

in London, England in November of 1917 during a Zeppelin air raid. Her parents Charles and Frances decided that mother and child should travel to Sarnia, Ontario and await the father's discharge from the army. In September 1918, baby 'Effie' Barbara and her mother Frances Paul left Southhampton, England bound for New York aboard the *RMS Olympic* (one of *Titanic's* sister ships), under the constant threat of U-boat attack. The British Government had paid for their tickets, a special deal for English wives and children of colonial soldiers to reduce the number of people to be fed. Both Frances' and Effie's names are recorded on the American Immigrant Wall of Honor at Ellis Island in New York Harbor. When mother and daughter Paul arrived in Sarnia, Frances received a telegram informing her that her close sister "Lou" had died back in England. Frances' husband Lt. Charles Marr Paul was still fighting in Europe (more on Lt. Charles Paul below).

Nick and 'Effie', along with their children Janet and Joseph Paithouski, moved to Ottawa in 1960. Nick supported his family working there as a civil engineer for the Federal Department of Transport. 'Effie' Barbara Paul earned a Bachelor of Arts degree and became a teacher with the Carleton Board of Education. 'Effie' Barbara Paul Paithouski passed away in July of 1976.

Nick Paithouski returned to Sarnia in 1984 to receive a local award - he was inducted into the Sarnia-Lambton Sports Hall of Fame for football in 1984. Trip Trepanier, the Hall of Fame Director, former teammate and long-time friend of Nick Paithouski, described him as "one of the best centres in Canada, not just one, but for a couple of years... He never bragged about anything; he just took everything as it came." On September 15, 1985, Nick Paithouski passed away at the age of eighty-seven. Both Nicholas Joseph Paithouski and Effie Barbara Paithouski are buried in Lakeview Cemetery in Sarnia.

In the autumn of 1987, Nick Paithouski was posthumously accepted into the Queen's University Football Hall of Fame. The Paithouski Prize, honouring his memory, is awarded annually at Queen's University to the graduating engineering student who has demonstrated the most consistent improvement in academic performance. Twenty-five years after his death, on May 15th, 2010, Lieutenant Nick Paithouski was inducted into the Canadian Veterans Hall of Valour in Carleton Place near Ottawa.

Nick Paithouski's induction into the Hall of Valour was doubly moving for the Paithouski family. 'Effie' Barbara Paul's father, Lieutenant **Charles Marr Paul**, was also inducted into the Hall of Valour on the same day. Charles Marr Paul was born in Sarnia and was in the first contingent of Canadians to leave for battle in the First World War, leaving Val Cartier with the CEF on October 3, 1914. Charles joined the 8th Battalion of the 90th Winnipeg Rifles, nicknamed the Little Black Devils and was later credited with saving many lives. Lieutenant Charles Paul received the Military Medal for courage and gallantry under fire while holding the line during the first German attack with poison gas at Ypres in April 1915. He also earned a Meritorious Service Medal for saving more lives during the Battle of the Somme in 1916. His unit was also at Vimy Ridge and Passchendaele in 1917 and the following year he was made officer in the field. It was during the war that Lt. Charles Paul met and married Frances Williams in England. After returning to Sarnia with his British bride, Charles and Frances Paul raised eight children: Francis (would serve in the Royal Canadian Navy); Robert, Elva, Lillian, Edna Jean, Edith (married Roy Telfer--served with Canadian Army); Betty Elizabeth (married Jack Stevens who served in the Canadian Army and was wounded at Dieppe); and Effie Barbara who would become Nick Paithouski's future wife. More information on Charles Paul, including portions of two letters that he wrote to his mother from the Front in April of 1915 are included in this Project on page 116.

Lt. Nick Paithouski - World War II

Lt. Charles Marr Paul - World War I

Michael Joseph Paithowski was born December 7, 1916 in Hamilton. NOTE: Many of the documents in Michael's Military Service File, including his Death Certificate, record his birthdate as December 7, 1917. In fact, he was born in 1916.

Michael Paithowski was a member of St. Joseph's Catholic Parish in Sarnia, and prior to enlisting worked for approximately six months as a labourer at Kellogg Construction Limited in Sarnia. He was twenty-four years old when he enlisted in the Canadian Navy, Royal Canadian Naval Volunteer Reserve (RCNVR), on January 23, 1941 in London, Ontario. He stood five feet seven and one-quarter inches tall, had blue eyes and fair hair, was single, and lived with his parents on Vidal Street at the time. He recorded his occupation as fireman, C.S.L. After the war he planned to gain employment as a stationary engineer. Michael initially received training in London, then in April 1941, continued training at the naval base Stadacona (Halifax), and then Hochelaga (Quebec). On September 17, 1941, he became a member of the crew of the *HMCS Drumheller*, a Flower-Class corvette. He served on the *Drumheller* until December 16, 1943. The ship had a number of assignments, including part of the Sydney Force, Newfoundland Command, the Newfie-Derry run, and Mid-Ocean Escort Force escorting convoys across the Atlantic.

Beginning on the opening day of the Second World War, the **Battle of the Atlantic** would be the longest continuous campaign of the war, and one in which Canada played a central role. The Royal Canadian Navy, along with the Royal Canadian Air Force (RCAF) and Canada's Merchant Navy, played a vital role in defending the country's eastern coast and escorting convoys of ships carrying men and essential machinery, arms, fuel and basic resources between North America and Europe.

On November 30, 1943, Michael Paithowski married Miss Eloise Victoria Johnston (born 1920), the only daughter of John Eugene Johnston and Florence Johnston of 332 Confederation Street at St. George's Chapel in Sarnia. At the wedding ceremony, Mrs. Hazel Smith served as the matron of honour and George Kumchy served as the best man. Following the ceremony, the immediate families were entertained at the Colonial Hotel for a reception before the newlyweds left on a short wedding trip. On their return, the couple lived at 332 Confederation Street and later 215 Confederation Street, Sarnia. Michael and Eloise Paithowski had one child together, a son, John Michael, born August 22, 1944.

Michael's wife, Eloise Victoria Johnston, had two brothers, both of whom also served in the war. One brother, Eugene, served in the infantry, his life forever altered by his wartime experiences. Her other brother Jay Syver Johnston, became a Flying Officer-Wireless Operator/Air Gunner with the Royal Canadian Air Force. Jay Johnston (Michael's brother-in-law) lost his life during the war when the Liberator aircraft he was in crashed into Black Mountain in Quebec in October of 1943. The crash took twenty-four airmen's lives, the largest single-crash loss of life in the history of the RCAF. The plane was listed as missing, and its remains were not found until after the war. Jay Johnston's story is included in this Project. Michael and Eloise Paithowski married just one month after Eloise had lost her brother Jay.

After serving aboard the *HMCS Drumheller* until mid-December 1943, Michael Paithowski was then stationed at the base Stadacona in Halifax for a time, and on June 13, 1944, he was transferred to the *HMCS Shawinigan*, with the rank of Petty Officer Stoker.

Before he joined the *Shawinigan*, Michael returned to Sarnia on a few weeks leave, to visit his parents, his new wife and his many friends. It would be the only time he would see his young son Johnny. When he returned to duty, Michael sent his new wife Eloise and their young son three letters while aboard the *Shawinigan*. Less than one year after getting married, Michael Paithowski lost his life.

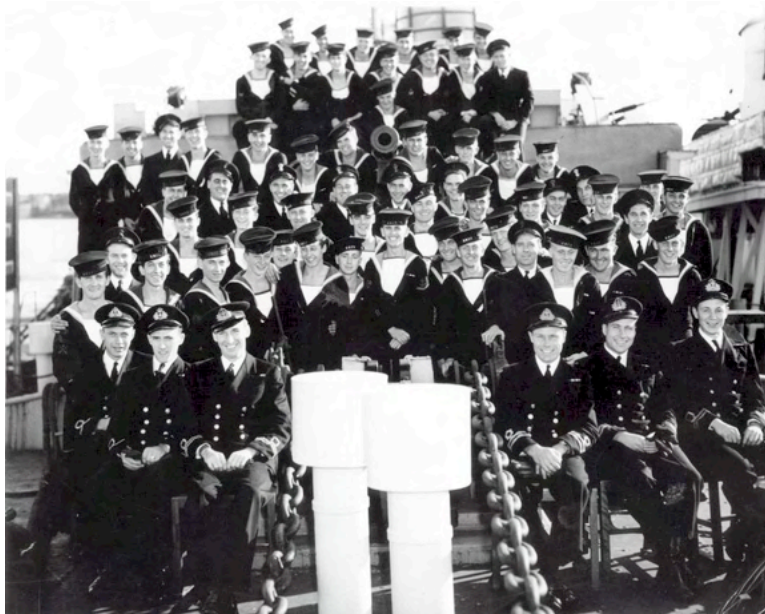

The *HMCS Shawinigan (K136)* was a Flower-class corvette, originally designed to accommodate a standard crew of less than fifty. Commissioned on September 19, 1941 at Quebec City, it was one of the sturdy little "work horses" of the RCN and was to become the 9th corvette and 19th Canadian warship lost in the war. She was in the navy's convoy escort and patrol fleet. Her sea miles totaled more than 150 000, and she had been one of the busiest vessels of her class, escorting convoy runs in the Atlantic Ocean and off the east coast of Canada. Few ships of her class spent more time at sea during the period when German U-boats were most active in the North Atlantic. During the two years prior to her sinking, she did not lose a ship under her charge. Men who served aboard her had been acclaimed for fighting efficiency, for rescue work and attacks on enemy U-boats. She escorted hundreds of thousands of vital war supplies and shipping to Allied ports.

On November 24, 1944, the *HMCS Shawinigan* and a United States Coast Guard Cutter *Sassafrass* escorted the ferry *Burgeo* from Sydney, Nova Scotia to Port aux Basques, Newfoundland. Ferries on this route were always

escorted after the tragic loss of the passenger ferry *SS Caribou* two years earlier. In mid-October of 1942, the *Caribou* had been torpedoed on the same route and 136 lives were lost, including ten children. In November 1944, the three ships made an uneventful crossing to Port aux Basques, at which time the *Shawinigan* detached to continue doing an independent anti-submarine patrol in the area. The *Shawinigan* was scheduled to rendezvous with the *Burgeo* the following morning for the return to Cape Breton. But the *Shawinigan* never made it.

Petty Officer-Stoker Michael Joseph Paithowski

Crew of the *Shawinigan* 1944

On that fateful November 24 moonlit night, the *Shawinigan* maintained radio silence while performing anti-submarine patrol in the Cabot Strait between Newfoundland and Cape Breton Island. Nearby, German U-boat *U-1228* was trying to repair a faulty snorkel without success and had decided to return to Germany for repairs. It was now 9:30 p.m. As soon as *U-1228* started her return route into the Atlantic, she sighted the *Shawinigan*. In its first recorded attack on enemy shipping, *U-1228* fired a single T-5 Gnat torpedo that struck the corvette in the stern.

Four minutes after the attack, the *Shawinigan*, with its entire crew, disappeared in a plume of frigid Atlantic water and a shower of sparks. The ship had no time to transmit any messages and authorities later speculated that the *Shawinigan's* depth charges exploded as she sank, adding to the destruction. The next morning, the *Burgeo* left Port aux Basques on schedule in the fog but could not find the *Shawinigan*. They maintained radio silence and did not inform command of *Shawinigan's* failure to appear.

Flower Class Corvette *HMCS Shawinigan K136*

Unescorted, the *Burgeo* made for Sydney and arrived on November 25 at 6 pm. Suspecting something had happened to *Shawinigan*, naval officers in Sydney ordered an air and sea search for the missing corvette, but bad weather put a stop to much of that. A day or so later, searching ships came upon fragments of wreckage, an empty Carley float and six bodies, which were all that remained to indicate what had happened to the *Shawinigan*.

A third of *Shawinigan*'s crew were twenty years old or younger and no crewmember survived the tragic sinking. Seven officers and 84 crew members, including Michael Paithowski, were lost. It is impossible to record exactly what happened to *Shawinigan* during her final moments. Some sailors were probably killed instantly by the horrific explosion; others inevitably died in the icy water as the ship sank. Those fortunate enough to get into their life vests and survive the explosion would later die in the freezing North Atlantic.

The *Shawinigan* was one of only three RCN ships lost with all hands. Twenty-three-year-old Petty Leading Coder William Anderson, another Sarnian, was also on board and perished in the sinking. His name is also inscribed on the Sarnia cenotaph and his story is included in this Project.

In late November 1944, Michael Sr. and Rosa Paithouski in Sarnia received a telegram from the Department of National Defence informing them that their son, PETTY OFFICER MICHAEL PAITHOUSKI HAS BEEN REPORTED MISSING AT SEA. The message contained no other information and intimated that a letter would follow. The message was received exactly one year to the day that Michael had married Eloise Victoria Johnston.

On November 29, 1944, Eloise Victoria Paithowski at 332 Confederation Street, received the following letter from the Secretary, Naval Board:

Dear Mrs. Paithowski:

It is with deepest regret that I must confirm the telegram of the 29th November 1944, from the Minister of National Defence for Naval Services, informing you that your husband, Michael Paithowski, Stoker Petty Officer, Official Number V-17380, Royal Canadian Naval Volunteer Reserve, is missing at sea.

The only information that can be given at this time is that your husband is missing at sea when the ship in which he was serving was lost. Please be assured, however, that as soon as further particulars can be released, you will be informed.

It is regretted that slight hope is held for your husband's survival. When it is considered, beyond all reasonable doubt, that no further hope exists and should no information be received to the contrary, an official presumption of death will be made by the Canadian Naval Authorities.

It is requested that, for security reasons, you regard the name of the ship in which your husband was serving, as confidential until such time as an official announcement is made. Please accept the sincere sympathy of the Department in your anxiety.

On December 7, 1944, Eloise received the following letter from the Secretary, Naval Board:

Dear Mrs. Paithowski:

Further to my letter of the 29th of November, 1944, details of the disaster in which your husband has been reported missing are now being released.

H.M.C.S. "SHAWINIGAN", a Royal Canadian Navy corvette, was lost while on operational duty at sea. Seven officers, including her Captain, Lieutenant W.J. Jones, R.C.N.R., and seventy-eight ratings are missing. The bodies of five other ratings have been recovered and identified. There are no known survivors.

It is requested that you will regard this information as confidential until an official announcement is made. May I again express sincere sympathy with you in your anxiety.

On December 7, 1944, in a dispatch from Ottawa, the Hon. Angus L. Macdonald, Minister of National Defence for Naval Services, announced the loss of the *H.M.C.S. Shawinigan* while on operational duty in the North Atlantic. He gave no details but said the ship's complement had been lost and five bodies have been recovered and identified. It was announced locally that two Sarnia seamen, Michael Paithowski and William Anderson, were members of the crew of the *Shawinigan* and were reported missing.

In mid-February 1945, the Paithouski family in Sarnia received a telegram from Ottawa informing them that their son, PETTY OFFICER MICHAEL PAITHOUSKI WHO WAS REPORTED MISSING AT SEA LAST NOVEMBER IS OFFICIALLY PRESUMED LOST. Also in February 1945, Eloise received the following letter from the Secretary, Naval Board:

Dear Mrs. Paithowski:

Further to my letter of the 7th of December, 1944, I regret to inform you that in view of the length of time which has elapsed since your husband, Michael Paithowski, Stoker Petty Officer, Official Number V-17380, Royal Canadian Naval Volunteer Reserve, was reported missing from H.M.C.S. "SHAWINIGAN", and as no news has since been received to the contrary, the Canadian Naval Authorities have now presumed his death to have occurred on the 24th of November, 1944.

Please allow me to express sincere sympathy with you in your bereavement on behalf of the Minister of National Defence for Naval Services, the Chief of the Naval Staff, and the Officers and men of the Royal Canadian Navy, the high traditions of which your husband has helped to maintain.

Michael Paithowski's death was later officially recorded as, *Missing, presumed dead, when the ship in which he was serving, H.M.C.S. 'Shawinigan' was lost while on operational duty at sea.*

In late August 1945, Eloise, then at 215 Confederation Street, received a War Service Gratuity of \$817.95 for the loss of her husband. Also in late August 1945, she received the following letter from the Secretary, Naval Board: *Dear Mrs. Paithowski:*

Further to my letter of the 15th of February, 1945, the Department is now able to release additional information regarding the loss of your husband's ship and I am accordingly passing on the following particulars which will, no doubt, be of interest to you.

H.M.C.S. "SHAWINIGAN" sailed from Sydney, N.S., on the 24th of November, 1944, to escort a merchant ship to Port Aux Basques, Newfoundland, and arrived off Port Aux Basques that night. In accordance with orders she was then to carry out a patrol in the area for the duration of the night, after which she was to meet the same merchant ship the next morning and return with her to Sydney.

The merchant ship arrived in Sydney unescorted on the night of the 25th of November and after it was ascertained that "Shawinigan" had not appeared at the designated rendezvous to provide escort as instructed, searches were instituted and "Shawinigan" was discovered to be missing.

It was the opinion of the Department at the time that the ship had been torpedoed by an enemy submarine during the night of the 24th/25th of November, 1944, as submarines were known to be operating in that area; and this has since been confirmed from German evidence. Although no survivors were found, a few bodies were recovered by later searches, due to tidal movements, some distance from the area in which "Shawinigan" was known to be operating. As a result, the position of the sinking can not be exactly ascertained, although from German evidence and the Department's computation, it is estimated to be in the vicinity of the three mile limit off Channel Head, near Port Aux Basques, Newfoundland.

It was not until after the war ended and U-1228 surrendered, that the details of what had happened to the *Shawinigan* that night were uncovered. When the U-boat commander was interrogated in May 1945, he stated the ship sank quickly, followed by two underwater explosions. He saw no survivors in the water.

Michael Paithowski, 27, has no known grave. He is memorialized on the Halifax Memorial, Nova Scotia, Canada, Panel 12. On the Sarnia cenotaph, his name is inscribed as M. Paithouski. The page displaying Michael's name in the Book of Remembrance in the Memorial Chamber of the Peace Tower on Parliament Hill, Ottawa is open each year every September 1st.

Michael left behind his new wife Eloise and their three-month old son Johnny Paithouski. For Eloise, she did not have clear closure of her brother's death or her husband's death until after the war ended. Eloise would go on to be employed at Bell Canada as a switchboard operator, working midnight shifts and leaving their son Johnny to be cared for by Michael's sister Mary and her husband Earl Wynne. Years later, Eloise remarried, to Tom Rue, a Norwegian Merchant Marine, stationed in Canada.

Fifty-three years after the sinking, on June 14, 1997, at Trois Rivieres, Quebec, the Prime Minister of Canada Jean Chretien and his wife took part in a Royal Canadian Navy ceremony to officially commission the new *HMCS Shawinigan (704)*. A memorial monument dedicated to the 91 lost was also unveiled. In attendance were Johnny Paithouski and his wife Paulette. They were there with other families who had lost loved ones on board the *HMCS Shawinigan* on that fateful night in November of 1944. Johnny had married Paulette, her second marriage, and she had a son from her first marriage, Shawn. A number of years later, with his step-son's full approval, Johnny in the first legal case of its kind in Ontario, adopted Shawn who then became Shawn Paithouski.

PARSONS, Arthur Edward (#J/11636)

Arthur Edward ("Ted") Parsons trained for two years in Canada and the United Kingdom to be an RCAF flying officer. Less than three months later, he sacrificed his life for the Allied cause while serving in one of the most dangerous postings in the war.

Ted Parsons was born in Sarnia on November 26, 1916, the third child of Arthur Edwin and Olive Sarah (nee

Cornish) Parsons, both of whom were born in Portsmouth, England. At some point they both immigrated to Canada, and married each other on March 18, 1913 in Point Edward, Ontario. Arthur Parsons supported his family working as a civil and stationary engineer. The Parsons family lived at 286 Kathleen Avenue, later 170 Proctor Street, and then 263 North Vidal Street, Sarnia. Arthur and Olive Parsons had five children together: sons John (the eldest son), Arthur Edward (Ted) and Thomas; and two daughters, Gwendolyn (the eldest daughter) and Shirley. Note: Thomas and Shirley were fraternal twins, the youngest of the Parsons children. Many years later, brother Thomas Parsons would name his only son Ted, after his older brother who had such an impact on Thomas.

Ted Parsons attended three elementary schools in Sarnia from 1925 to 1931: London Road, Lochiel Street and Devine Street Public Schools. He then attended Sarnia Collegiate from September 1931 until June 1934. Ted was a member of the SCITS rugby and basketball teams, was active in swimming and track, and enjoyed his hobby of photography. According to his family members, Ted was hard-working, well-liked and well-respected. With his charming, out-going and fun-loving personality, he developed quite a reputation as a ladies man during his youth.

Ted Parsons had a number of jobs prior to enlisting: as a clerk at Clement Drug Company in Sarnia, 1929-1930; as a salesman with Parson's Gift Shoppe in Sarnia, 1934 to 1936; as a jeweller at C.A. Remus Jewellers in Timmins, 1936 to 1940; and then as a jeweller at W.H. McCreery Jewellers in Windsor, from September 1940 until early 1941. Reference letters written by two of Timmins business people on behalf of Ted in his RCAF application included the following comments: *I have always found him honorable and trustworthy in every respect. I would say that Mr. Parsons exemplifies our finer type Canadian Youth and I am sure that he would not be found lacking in any trust imposed with him; and I have found him to be a willing, honest and able worker at all times. He has resided in Timmins for the past four years, and is well known here, and well-liked by business associates and personal acquaintances.*

Twenty-four-year-old Arthur "Ted" Parsons joined the Royal Canadian Air Force on February 24, 1941 in Windsor, Ontario. He stood five feet seven inches tall, had blue eyes and brown hair, was single, and was residing at 1019 Pelissier Street, Windsor at the time. He recorded his permanent address as 286 Kathleen Avenue, and his next-of-kin as his mother Mrs. Olive Parsons, of 286 Kathleen Avenue, Sarnia. He also recorded that he had applied to join the RCAF in September 1940 in North Bay, the result being he transferred to Windsor. He had already begun working on his flying license prior to enlisting, with 9 ½ hours of dual flying and 2 ½ hours of solo flying experience. He requested flying duties with the RCAF, with a preference to be a pilot.

Arthur Edward "Ted" Parsons

Ted Parsons (kneeling)

From the Recruiting Centre in Windsor and #1 Manning Depot in Toronto, Ted Parsons received his air training at #5 Service Flying Training School (SFTS) in Brantford; and #1 Initial Training School (ITS) in Toronto; followed by #12 Elementary Flying Training School (EFTS) in Goderich; and Composite Training School (KTS) in Trenton; continuing at #7 Air Observer School (AOS) in Portage la Prairie; and #3 Bombing and Gunnery School (B&GS) in MacDonald, Manitoba; and then #1 Air Navigation School (ANS) in Rivers, Manitoba. The Chief

Instructor and Commanding Officer at #1 ANS commented that Ted Parson was, *Above average student. Conscientious worker, excellent navigator. Good appearance and personality, and Excellent officer material – would make a good instructor.*

Just over one year after joining the Air Force, Ted lost his father Arthur Parsons who died March 8, 1942. Ted was training at #3 B&GS in Manitoba at the time and was given a 15-day leave to return home. The following month, on April 11, 1942, Ted Parsons was awarded his Air Observer's Badge at #3B&GS. One month later, on May 11, 1942, Ted received his commission as Pilot Officer at #1 ANS in Rivers, Manitoba. Ted then spent his two-week pre-embarkation furlough with his widowed mother Olive in Sarnia. By July 1942, he was posted east, to #31 Operational Training Unit (OTU) in Debert, Nova Scotia and then #31 Personnel Depot (PD) in Moncton, New Brunswick.

On July 20, 1942, Ted Parsons embarked overseas, arriving in the United Kingdom ten days later. Initially posted to #3 Personnel Reception Centre, he was transferred to #9 (Observer) Advanced Flying Unit (AFU), and then #14 Operational Training Unit (OTU) on August 8, 1942. On February 6, 1943, Ted became a member of RAF #77 Squadron, part of Bomber Command. In March 1943, his mother Olive in Sarnia received news that her son Arthur "Ted" Parsons had been promoted to Flying Officer from Pilot Officer by the R.C.A.F. "somewhere in England".

At the start of the war, RAF #77 Squadron was based at RAF Driffield and equipped with Armstrong Whitworth Whitley aircraft--twin engine, medium bombers. Initially, the squadron played a role in the propaganda war, dropping leaflets "Nickels" over Germany. By March 1940, as part of No. 4 Group, they had begun bombing missions against Germany, operating from several different RAF bases over a couple of years: Kinloss, Linton-on-Ouse, Topcliffe and Leeming. In the period between September 1939 and May 1942, it is believed that #77 Squadron carried out more raids and suffered more losses than any other Whitley squadron. From early May to October 1942, the squadron was loaned to Coastal Command, where they carried out convoy escorts, anti-submarine patrols and shipping strikes from RAF Chivenor, off South West England. In October 1942, RAF #77 Squadron returned to **Bomber Command** and converted to Handley Page Halifax aircraft--four engine, heavy bombers.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

No. 77 Squadron also became the first occupant of the newly-built RAF Elvington airbase, just outside of York. RAF Elvington station was a recently constructed temporary camp with wooden buildings and Nissen hut accommodations, with far less luxury and comfort than their previous base. The airfield and squadron were declared fully operational at the end of January 1943 as part of Bomber Command with No. 4 Group.

F/O-Navigator Arthur Edward Parsons

Ted Parsons at RAF Elvington (3rd from right)

As an RCAF member of RAF #77 Squadron “Esse Potius Quam Videri” (To be, rather than seem), Ted Parsons attained the rank Flying Officer-Navigator. He would serve with #77 Squadron for less than three months, aboard Halifax II aircraft JB803. In that short time, the crew flew twelve missions: March 11-Stuttgart, March 12-Essen, March 29-Berlin, April 2-Lorient, April 3-Essen, April 8-Duisburg, April 10-Frankfurt, April 14-Stuttgart, April 16-Pilsen, April 20-Stettin, April 26-Duisburg and April 27-Mining.

During February and March 1943, the squadron flew 152 sorties on 22 raids, with the loss of only 3 aircraft, a loss rate of 2%. However, during the months of April, May and June 1943, when the squadron carried out 356 sorties on 29 raids, 19 aircraft went missing and 2 were lost in take-off accidents. The average loss rate was 5.8% which meant that only about 1 crew in six could be expected to complete a tour of 30 operations.

On the night of April 30/May 1, 1943, Ted Parsons was a member of the crew of seven (5 British and 2 Canadian) aboard Halifax II aircraft JB803 (markings KN-G) on its thirteenth mission. Five of the seven crew members of JB803 flew on all thirteen missions, including Ted Parsons, Thomas Scharff, Ian Crawford, Leon Hannam and Gordon Watson. William Louth flew the last six, and Raymond Shepherd flew the last four missions. Weighing almost 30-tons, the aircraft departed at 23:53 hours (April 30) from RAF Elvington. The night mission, consisting of 305 heavy bombers, was an operational sortie targeting the city of Essen, in the Ruhr Valley of Germany. Crossing the North Sea was relatively uneventful but after crossing the Dutch coast it did not take long before the flight was picked up by German Radar operators at their Zander station near Zandvoort. German pilot Feldweibel Heinz Vinke, in his twin-engine Messerschmitt Bf110, was one of the many night fighters sent out to intercept the bombers. Nothing was heard from Halifax JB803 after take-off, and it was later reported missing.

With a high concentration of German anti-aircraft guns in north Holland, especially around Amsterdam, Allied bombers tended to avoid this area. With British operations being carried out at night, most of their losses in this area was not due to anti-aircraft fire, but were the result of German night fighters. On this night, soon after 02:00 hours (May 1), Vinke's German night fighter caught up with JB803 above North Holland and started his attack at an altitude of 6,300 meters. It is most likely Vinke started his attack from the rear, a common tactic. The attack damaged the Halifax significantly and was forced to start its descent into the thick cloud layer below them. The conditions over Holland that pitch black night were not the best, with drizzle and a low, thick cloud base. Now engulfed in flames, the Halifax circled around the villages of Muiden, Muiderberg and IJsselmeer Lake, likely in an effort to establish their position in order to bail out over land instead of water.

During the perilous descent, twenty-year-old pilot Gordon Watson gave the order to jump. Five of the seven crewmen bailed out of the bomber exit, including Ted Parsons. Tragically, the strong winds pushed them over nearby IJsselmeer Lake. Four of the parachuters, including Parsons, landed in the ice-cold waters of the lake where they drowned. Pilot Watson remained on board in order to give the crew the time to jump. Gunner Thomas Scarff also remained on board, either because he was wounded or he was trying to assist Watson in an emergency landing. We will never know. The aircraft crashed at approximately 02:26 hours (May 1) between Muiden and Muiderberg (about 15 km east of Amsterdam). It exploded instantly and fires at the crashsite were observed for the rest of the night.

The next day, the bodies of Sgts. Watson and Scarff were found outside the aircraft. It was determined that they had died instantly in the crash. The two victims were quickly coffined by the Germans on the Saturday morning (May 1), and Frans Nell brought the bodies by horse and wagon to the community cemetery in Muider Woods. Doctor Hakman, who cared for the two bodies, recalled years later that the Canadian Scarff had an ID bracelet on his wrist and a small bible in his pocket, plus a photograph of a young woman. The two airmen were buried that night

after 8 o'clock, with the mayor of Muiden present at the burial.

In the days following, the bodies of four of the airmen who parachuted out of the aircraft washed ashore, with no signs of life vests on any of them: F/O Ted Parsons, Sgts. Ian Crawford, Leon Hannam and Raymond Shepherd. Ted Parsons was the first drowned victim found, by the 15-year-old son of the Stoop family from Muiden, on Sunday, May 2, a good 24 hours after the crash. The next day, on May 3, the three other bodies washed up. By May 4, the bodies of Ted Parsons, Ian Crawford, Leon Hannam and Raymond Shepherd were buried in the presence of Muiden mayor Coops, by the German authorities in Muiden General Cemetery. The body of the seventh airman, Sgt. William Louth, was initially not recovered.

For missing airman Sgt. William Louth, it was determined later that an airman with no means of identification on him was found severely wounded on the day of the crash. He was taken to hospital where he died of his injuries on May 13 without ever waking up. Louth's body was buried in Amsterdam in a grave inscribed with the words; AN AIRMAN OF THE 1939-1945 WAR, A SERGEANT, ROYAL AIR FORCE 13TH MAY 1943 KNOWN UNTO GOD.

Perishing with Navigator F/O Arthur Ted Parsons were Sgt. Thomas Deuel Scarff (RCAF, born and raised in Winnipeg, age 23, tailgunner); and Sgts. Ian Douglas Crawford (RAF, age 21, flight engineer), Leon Hannam (RAF, age 22, bomb aimer/air gunner), Raymond Shepherd (RAF, age 21, top gunner), William Robert Louth (RAF, age 29, wireless operator, and the only married crew member) and Gordon Watson (RAF, age 20, pilot). In England, British High Command considered the Essen mission a success, for of the 305 aircraft that took part in the raid, only twelve were lost.

The crew of Halifax JB803
Arthur Parsons (kneeling front right)

The graves of crew JB803 in Muiden Cemetery
(photo taken soon after the war)

Halifax JB803 was shot down by German Luftwaffe night fighter ace Heinz Vinke, his 19th kill since joining flying as a night fighter. Awarded the Knight's Cross of the Iron Cross in September 1943, he was credited with shooting down 54 enemy aircraft, all at night, and is ranked as the eighteenth most successful night fighter pilot in the history of aerial warfare. At age 23 while flying a Messerschmitt Bf110, he was shot down by two British Typhoons and killed on February 26, 1944 while on a search and rescue mission over the English Channel. His body was never found.

On May 2, 1943, Olive Parsons, then living at 170 Proctor Street, Sarnia, received the following telegram from the RCAF Casualties Officer: REGRET TO ADVISE YOU THAT YOUR SON FLYING OFFICER ARTHUR EDWARD PARSONS J ONE ONE SIX THREE SIX IS REPORTED MISSING AFTER AIR OPERATIONS OVERSEAS MAY FIRST STOP LETTER FOLLOWS. Later, Ted Parson's death was officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead.*

In August 1945, widowed mother Olive Parsons, then residing on Vidal Street, received a War Service Gratuity of \$317.79 for the loss of her son. Many years later, Ted's sister Shirley (McKenzie) would say, "When mother got the news, she was heartbroken". For the rest of her life, Olive never believed that her son was dead. She always held out hope that someday her "Tedums" would return home and come through the front door.

Following are five accounts from eyewitnesses of the events on the night of April 30/May 1:

Sake van Huissteden is 12 years old and on his way home with his father. They are in the Noordpolder (a hamlet on a low-lying tract of land enclosed by dikes). Behind them they drag a cart with a slaughtered sheep. They hear a strange, thunderous sound. When they reach the Echobos (a wooded site on the western edge of Muiderberg), they hear a great explosion, but do not know what is going on.

The four Heynis sisters are in bed in their house on the Herengracht in Muiden. Hetty is awake. She hears the sound of an airplane and leaves her bed. When she looks out the window, she sees a burning plane flying over the barracks. It scatters light bullets. She opens the window and just at that moment someone jumps out of the plane with a parachute... Later the sisters heard that the plane crashed in the Noordpolder when it wanted to make an emergency landing. Two crew members are found at the wreck, but the rest are lost. The Germans begin house searches the next day.

Gerrit Wegman is 12 years old and lives on the Zuidpolderweg. He also wakes up from the noise of the bomber and the explosion. From his bedroom window, he sees a sea of fire on the other side of the canal, a few hundred meters away from him. Not long after, the Germans do a house search.

Ben Hottentot lives on the farm at the Hakkelaar and is woken up by the explosion. He looks out the window and sees a red glow. He can not determine the distance in the dark. He thinks the Kruitfabriek (gunpowder factory) or a factory is bombed somewhere in Amsterdam-North and goes back to bed. An hour later, a pounding on the door. The farm is surrounded by Germans. They ask for English fliers, but it soon becomes clear that they are not on the farm. The next morning, Hottentot sees how close the wreck is in the pasture. It was guarded by the Germans. On 2 and 3 May, the bodies of the dead crew members who had jumped out of the plane with their parachutes and drowned in the IJsselmeer, are washing up.⁹¹

Frans Nell and his brother on the Slothoeve farm on the northpolder road in Muiden, after hearing the huge bang and seeing a sea of fire in the meadows just east of the road, got dressed to investigate the area. On the third meadow along the waterway, they saw a huge piece of the bomber which did not burn. The entire area was full of wreckage pieces and there was still evidence of fire on places where the 800 kg Rolls-Royce engines were sunken into the ground. They came across the still bodies of two crewmen laying next to each other (Watson and Scharff) beside the wreckage, not pinched in the remains. Frans Nell recalled years later that neither of the bodies was burnt, mutilated or bloodied, but appeared to have had serious head wounds.

Note: The bomber crashed on land owned by the Nell family.

In the spring of 1946, the RAF Missing Research and Enquiry Unit (MREU), conducted an investigation into the crash of Halifax JB803, and the burial of its crew. Following are portions of the Investigating Officers report:

2. ... *I called at the Town Hall at Muiden on March 7th, 1946, and interviewed the burgomaster, a Mr. Koops a very helpful man. Mr. Koops told us he remembered the crash. No one of the police had been allowed near it. It occurred at 0230 hrs. on the morning of May 1st, 1943, in Polderland near the IJsselmeer (Zuider Zee). The aircraft burnt furiously for several hours, but there was no explosion. The burgomaster stated that all remains of the aircraft were taken away by the Germans.*

3. *The bodies of Sgt. Scraff and Sgt. Watson were found near the aircraft. A doctor who visited the aircraft after it had burned out stated that he could not find the remains of any more bodies in the wreck. A couple of days later the body of F/O Parsons was washed ashore from the IJsselmeer at Muiden and the bodies of Sgts. Crawford, Shepherd and Hannam were washed ashore at Diemen, about 3 miles westwards.*

4. *The burgomaster had not heard of a seventh body, that of Sgt. Louth, being found. It is possible that he baled out, as apparently the other members of the crew did, and that he came down in the IJsselmeer and has either never been discovered or was washed ashore some considerable time afterwards, having no remaining means of identification.*

5. *Next day, we called at the Oosterbegraafplaats, Amsterdam GSGS Sheet 2A Z 095203, as many airmen, who were found in the IJsselmeer have been buried there, and we discovered that there is an unknown who was buried in May 13, 1943, in grave 49, topmost coffin, Section 69. The body was brought from the IJsselmeer. This body will be exhumed. There are many unknowns buried in the period of 3 months after the crash, at this cemetery, who one of which might be Sgt. Louth...*

6. *It was the custom of the Germans to take wounded airmen and the bodies of the killed to the Wilhelmina Gasthuis at Amsterdam, a large hospital. Thinking that it might be possible to find out something about Sgt. Louth there, we next called on the doctor in charge, but perusal of the books did not provide any enlightenment.*

7. *Further efforts will be made to discover the fate and burial place of Sgt. Louth.*

In July 1946, Olive, then residing at 263 North Vidal Street, received the following letter from the R.C.A.F. Casualty Officer, for Chief of the Air Staff in Ottawa:

Dear Mrs. Parsons:

A report has now been received from a Missing Research and Enquiry Unit on the Continent which contains additional information concerning the death and place of burial of your son, Flying Officer Arthur Edward Parsons, of which, although it is of a distressing nature, it is felt you would wish to be advised.

According to local inhabitants who were interrogated by a representative from the Missing Research and Enquiry Unit, the aircraft of which your son was a member of the crew crashed at approximately 2:30 A.M. on May 1st, 1943, near the IJsselmeer, (Zuider Zee) near Muiden, 6 ½ miles East South East of Amsterdam, Holland. The bodies of Flight Sergeant Scarff and Sergeant Watson were recovered near the wrecked aircraft and the body of your son was recovered from the IJsselmeer at Muiden. The bodies of Sergeant Crawford, Sergeant Shepherd and Sergeant Hannam were also recovered from the sea about three miles distant, at Diemen. The six members of the crew were buried by the German Authorities in the General Cemetery at Muiden, Holland, and your son was buried in Grave No. 85, Row 1, rather than Grave No. 80 as previously advised.

The reverent care of the burial places of all who served in the Forces of the British Empire is the task of the Imperial War Graves Commission. Already eminent architects are at work planning the construction of beautiful cemeteries and each individual grave will be supported and sustained by the nations of the Empire. I hope it may be of some consolation to you to know that your gallant son's grave is in sacred care and keeping.

May I again offer you and the members of your family my deepest sympathy in your great loss.

In March 1947, Olive received the following letter from the Wing Commander for Chief of the Air Staff in Ottawa:

Dear Mrs. Parsons:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son, Flying Officer A.E. Parsons. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

Arthur Ted Parsons, 27, is buried in Muiden General Cemetery, Netherlands, Row E, Grave 85. On his headstone are inscribed the words, GOD'S GREATEST GIFT, REMEMBRANCE. Since 1943, the municipality of Gooise Meren along with the Commonwealth War Grace Commission have maintained the six war graves. Since 1946, every May 4 is Hollands national Remembrance Day, a solemn occasion and one the Dutch mark with ceremonies at the Canadian War Cemeteries. On that day, people all over the country observe two minutes of silence at 8:00 p.m. In Muiden, the citizens attend church and then walk in silence to the Muiden Cemetery to pay their respects to the six airmen of Halifax JB803 buried there. Schoolchildren lay flowers before the headstones and candles are placed on the graves of the six fallen.

Much of Halifax JB803 was salvaged in 1943 by the Germans (it took about a week), including one of the four engines, however some bits and pieces remained at the crash site. After the war, collectors found two engines to salvage, but the fourth engine sat in the ground for 60 years. In the summer of 2003, the son of Frans Nell kindly

Guus Kroon of Muiden remembered as a child in 1964 cycling with his parents along the dyke through the Noordpolder when his father pointed at a white house in the direction of the polder and told him that a plane had crashed over there during the war. Guus was immediately fascinated and so began his search for more information. Also, over the years as he rode his bicycle throughout the Netherlands he noticed several monuments for other Allied aircraft that had crashed and he wondered why there was no monument in his hometown. So in 2017, Guus Kroon founded the Workgroup Halifax Monument Muiden. He and his group of volunteers, that included David van Coolwijk, Wouter Wormhoudt, Willem Kroon and Frans-Jan Ter Beek, developed plans to erect a monument to honour of the crew of Halifax JB803 at the crashsite in Muiden.

The group established a foundation and a website in 2018, advertised nationally, and began fundraising through crowdfunding and accepting public and personal donations. They needed to raise €4000 to finance the construction and the maintenance of the monument. In January 2019, the group began construction of the monument. They also ran special fundraising events, for example, on April 28, 2019, the group ran a “Ted Parsons Look Alike Contest.” In early 2020, the group received approval at a new site on the Zuidpolderweg, on the curve of a bicycle path, about 150 metres from the crash site.

The monument is an impressive structure standing three metres tall. The pedestal is a concrete base covered in red bricks and affixed to it is the plaque from 2018. Atop the pedestal is an airplane propeller that is attached to the base by a steel tube. The propeller is an original blade from a Halifax bomber acquired from the Aircraft Recovery Group in Heemskerk, Netherlands, but not the Halifax JB803.

928

Using a metal detector, historian and Monument Muiden group member David van Coolwijk had recovered pieces of the Halifax JB803. A number of these pieces were sent to family members of the seven crewmen around the time of the monument unveiling. Family members had been invited to the monument unveiling ceremony but COVID travel restrictions prevented them from attending. Sharon McDonald of Sarnia, Ted Parsons' niece, was one of those unable to attend. Sharon's mother Gwendolyn (Parsons-Waite) was Ted Parsons' sister. Gwen and Ted were very close to each other growing up. Gwen passed away in 2009 and was cremated. In September 2020, around the time of the monument unveiling, some of Gwen's ashes were sent to David van Coolwijk so that he could scatter them on the grave of her brother Ted. A wonderful website has been created by the Halifax Monument Muiden volunteers: www.halifaxmonumentmuiden.nl

POLE, Douglas Campbell (#J/35541)

Douglas Campbell Pole had just finished high school when he enlisted with the RCAF at age eighteen. An outstanding athlete and husband to Ivy Mae Logan, Douglas planned to further his education when he returned from the war. One year and one day after getting married, Douglas, 21, was killed in a bombing mission over Essen, Germany. He has no known grave.

Douglas Pole was born in Sarnia on October 15, 1923, the middle son of Willard Harford and Muriel Grace (nee Proctor) Pole. Willard Harford Pole, the son of Charles and Mary Pole, born August 4, 1892 in Strathroy, Ontario, had served in WWI. At the age of twenty-four, Willard enlisted in the Canadian Over-Seas Expeditionary Force on February 19, 1917 in London, Ontario. He stood five feet nine and a half inches tall, had blue eyes and light brown hair, was single and was living with his parents at 440 Wellington Street, Sarnia at the time. He recorded his next-of-kin as his mother, Mary Pole on Wellington Street (later 194 Kathleen Avenue), and his trade or calling as druggist. He was appointed the rank of Sergeant, with Canadian Army Medical Corps (C.A.M.C.) Training Depot, No. 1, CEF. Less than two months later, on April 12, 1917, he embarked overseas from Halifax, arriving in Liverpool on April 29.

One month later, on May 31, 1917, Sergeant Willard Pole arrived in Havre, France, a member of the CAMC. He served as a medic initially with the 5th Canadian Field Ambulance and in late August 1917 was transferred to the 29th Company, Canadian Forestry Corps. In the early part of 1919, he returned to England and was attached to No. 9 Canadian Stationary Hospital. He was discharged on July 17, 1919 in Halifax, based on "demobilization consequence upon cessation of hostilities".

Willard Pole graduated from the College of Pharmacy the same year and returned to Sarnia. Willard married Sarnia-born Muriel Grace Proctor Pole on October 11, 1919 in Sarnia. Muriel Grace went by her middle name Grace. Willard and Grace Pole were blessed with three sons: Ross Norman, the eldest (see below); Douglas Campbell; and the youngest Neil Proctor (born June 13, 1927). The Pole family lived at 208 Essex Street and Willard was a druggist in Sarnia, operating the successful Pole's Drug Store.

Doug Pole attended George Street Public School in Sarnia from 1929 to 1936, and then Sarnia Collegiate from September 1937 until April 1942. At high school, he was extremely active in many sports; Douglas played basketball, rugby, baseball, lacrosse, water-polo and football and was a member of WOSSAA hockey. He was also a badminton star, having received a championship cup while playing at the local Armouries. Outside sports, Doug was a member of Central United Church and its Central Century Club where, not surprisingly, the athletic Pole played hockey, softball and basketball. He also found time to indulge in his hobby of collecting old coins and in the summer of 1941, he worked at Imperial Oil Limited as a watchman on the *SS Iocolite*, an Imperial Oil tanker.

At age eighteen, Doug Pole enlisted in the Royal Canadian Air Force on March 27, 1942 in Sarnia (three months after his older brother Ross had enlisted). He stood five feet eight and a half inches tall, was single, and was residing at home with his parents on Essex Street at the time. He recorded his occupation as student and stated that he was planning to return to school after the war. He requested flying duties, with a preference to be a pilot or observer. From #9 Recruiting Centre in London and #5 Manning Depot in Lachine, Quebec, Doug received his air training at #13 Service Flying Training School (SFTS) in St Huberts, Quebec; at #5 Initial Training School (ITS) in Belleville; at #20 Elementary Flying Training School (EFTS) in Oshawa; and then at #1 Air Observer School (AOS) in Malton, Ontario. Doug was awarded his Navigators Badge and commission as Pilot Officer at #1 AOS in Malton on September 17, 1943.

On September 18, 1943 one day after his graduation, Doug married Miss Ivy Mae Logan, the youngest

daughter of Joseph A. and Jessie Logan of Sarnia Township at St. George's Anglican Church in Sarnia. At the wedding ceremony, the bride was given in marriage by her brother, Bert Logan. The maid of honour was Miss Jacqueline Davison and Neil Pole, the brother of the groom, served as the best man. Following the ceremony, a reception was held at Dell's for fifty guests. Afterwards, with Doug on his 14-day pre-embarkation leave, the newlywed couple left for a wedding trip to points east.

Doug & Ivy at SCITS

Doug & Ivy

Doug & Ivy

Douglas & Ivy – September 1943

One month after getting married, on October 22, 1943, Doug Pole embarked overseas from Halifax for the United Kingdom. While Doug was overseas, his wife Ivy Mae resided with her sister, Mrs. A.G. Knight, of 245 Stuart Street, Sarnia. In early November 1943, Ivy Mae received a cable from Doug telling her of his safe arrival overseas. In the U.K., Doug was initially posted to #3 Personnel Reception Centre before being transferred to #6 (Observer) Advanced Flying Unit (AFU) on January 4, 1944. In late February 1944, he was transferred to #24 Operational Training Unit (O.T.U.), and in mid-May 1944 was transferred to #1664 Heavy Conversion Unit (H.C.U.).

On April 6, 1944, Doug Pole wrote a letter to his friends in Sarnia--Lorraine Mara (Ivy Logan's best friend) and her boyfriend at the time Bert Logan (Ivy's brother). Lorraine and Bert later married, on June 21, 1947. Following is that letter, written on a Thursday evening at R.A.F. Station, Honeybourne:

Dear Bert & Lorraine,

The wonderful parcel I received the other day contained a note which was signed "Bert & Lorraine" so I'm addressing this letter that way. Gee but that sounds nice together doesn't it? In fact I won't be surprised if I get an invitation some of these weeks. HA HA. However I'm terribly sorry but I don't think I'll be able to make it so wait till I get home. How about it kids????

Well now to come down to earth again. Your parcel arrived in first class condition and boy was I ever glad to get it!! You folks have no idea how much boxes of food mean to us over here, but let me tell you it certainly is a lot. So thanks again for the swell parcel folks. Also, thank you Lorraine for the box you put in one of Sandy's parcels. [Doug's nickname for Ivy Logan was "Sandy"]. Gee but it's great to have a second best girl like you. P.S. Don't tell my wife (HA).

Gee but I hope we can soon get home again! Now that summer is coming on I'm beginning to think of other swell times we used to have together (the four of us). Gee but didn't we have fun! I'll certainly be glad when we can start all over again with our picnics, wiener roasts, etc. Oh how I long to be home again. I hope you folks are having a good time for me too, because I'm certainly leading a lonely old life over here. All I do is fly, eat and sleep. Not very exciting is it!

I hope I'm not asking too much but would you folks help me out by seeing that Sandy doesn't get down-hearted while I'm away. I know she worries a bit about me but I hope you will try to keep her smiling. Then I'll soon be home and we can resume our old partnership. Gee but when I think of coming home I really get excited.

I suppose you will be out home again now Bert. If so don't work too hard and mind all those late nights. I hope you still have all the gas you need to go to all the places I know you like to go to on the weekends. [Bert had a family farm in the community of "Blackwell". During the winter, he worked in Sarnia delivering oil to homes. The other three seasons, he worked on the family farm in Blackwell]. And Lorraine, I suppose are still busily engaged at the Imperial [Lorraine was employed at Imperial Oil]. From what Sandy tells me you two have some hectic "cat sessions" in bed till all hours of the morning. I only hope you leave a bit of me intact. Please say hello to all your folks for me Lorraine. I hope this little note finds you all well and having wonderful times at "Kenwick Gardens".

They have been working us like the dickens the last month or so, but as you know as well as I do something big is going to happen. It's a good thing we don't know where or when because if we did I'm afraid we wouldn't like it so much. But I hope "we" all come out on top okay. [the "something big" Doug refers to is D-Day].

I see I must close now so I'll say cheerio for now and take care of yourselves. I'll be seeing you before you know it. So long.

Doug

P.S. Thanks again for the swell parcel.

Doug Pole

Doug Pole (on right) with a flying comrade

Two months after writing the above letter, on June 12, 1944, Doug Pole became a member of RCAF #429 Bison Squadron "Fortunae Nihil" (Nothing to chance), part of **Bomber Command**, No. 6 Group. He was promoted to the rank of Flying Officer-Navigator while on operational duty in June of 1944. Also in June 1944, Doug would lose his brother, RCAF Flying Officer Ross Pole. In mid-June 1944, Willard and Grace Pole in Sarnia received a telegram from Ottawa informing them that their eldest son, FLYING OFFICER ROSS POLE WAS REPORTED MISSING ON JUNE 13 AFTER ACTIVE OPERATIONS OVER ENEMY TERRITORY. No other details were given. Four months later, Willard and Grace Pole would lose a second son, Douglas.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

No. 429 Squadron was formed in November 1942 as a night bomber squadron, based at East Moor and was equipped with Vickers Wellington aircraft. In August 1943 the squadron converted to Handley Page Halifax aircraft and moved to RAF Leeming, Yorkshire remaining there for the rest of the war. In March 1945, the squadron converted to Avro Lancasters. At the end of the war, the squadron was used to transport troops and liberated POWs back to the U.K.

While on a bombing mission in August 1944, Doug Pole's Halifax aircraft was damaged by flak but was able to return safely to base. Between August 14 and September 21, 1944, Doug was in hospital recovering from painful leg wounds that he received on the flight when the bomber was hit by flak. He recovered nicely and returned to active duty.

Flying Officer-Navigator Douglas Campbell Pole

On October 4, 1944, Doug mailed a postcard from Scotland to Jessie Logan—Ivy's mother and his mother-in-law.

Dear Mom,

I was in Edinburgh to-day so I decided to see the famous Forth Bridge while I was here [the postcard featured a photo of the bridge]. I hope you like what I saw. It was a sunny but rather windy day. I enjoyed my visit to Edinburgh very much indeed. It certainly is a beautiful city. The nicest I've seen here so far. Hope this finds you all well & enjoying decent weather. Say hello to Bert for me. Cheerio & all the best.

Love - Doug

On October 23, 1944, one month after being released from hospital, Doug Pole was aboard Halifax Mk. III aircraft MZ906 (markings AL-H) that took off from RAF Leeming on a day bombing operation targeting Essen, Germany. It was one of 1055 aircraft involved in the operation—a record, and was the heaviest raid on Essen so far. Most of the bombs dropped were high explosives. There were only 8 aircraft lost, however one of them was Halifax

MZ906 that failed to return from the Essen operation. Perishing with F/O Douglas Pole were FS.s George Theodore Hallam and Lorne Joseph Moore; F/O. Norman Charles Muir; P/O.s Lloyd John Innes and Peter John Felix Mitchell; and Sgt. John Michael Wemyss (RAF).

Doug Pole was killed one year and one day after getting married in Sarnia. In late October of 1944, his parents Willard and Grace in Sarnia were advised by Squadron Leader Caufield of the St. Thomas R.C.A.F. station that their son, FLYING OFFICER DOUGLAS POLE HAD BEEN REPORTED MISSING ON OCTOBER 23 PRESUMABLY WHILE ON OPERATIONS OVER ENEMY TERRITORY.

In late October 1944, Ivy Mae received a letter from the Wing Commander, No. 429 Squadron, R.C.A.F. Following is a portion of that letter:

Dear Mrs. Pole,

Prior to the arrival of this letter you will have received a telegram informing you that your husband, Flying Officer Douglas Campbell Pole, has been reported missing as the result of air operations. I am sorry to have to confirm the fact that this is, at least temporarily, true.

Your husband and his crew were engaged in an operational flight over Essen, Germany, on the evening of October 23rd, and no news of them has yet been received. There is, however, every chance that they are prisoners of war, or with luck, among friends who will help them to evade capture and return to this country. Indeed, it is the sincere hope of all of us here that this is the case; in which event either you will hear from your husband directly, or will be advised by R.C.A.F. Headquarters, Ottawa, who will receive advice from the International Red Cross Society....

Any further news received in the meantime will be passed on to you by R.C.A.F. Headquarters at Ottawa with whom you may communicate if you wish.

It is desired to explain that the request in the telegram notifying you of the casualty to your husband was included with the object of avoiding his chance of escape being prejudiced by undue publicity in case he is still at large. This is not to say that any information about his is available, but is a precaution adopted in the case of all personnel reported missing.

It may give you some satisfaction to know that your husband was regarded as a particularly good navigator and that his loss is a severe blow, not only to ourselves as his colleagues, but to the Squadron as an operational unit. Please accept, on behalf of all his friends here, my most sincere sympathy in your present anxiety. We join you in hoping that Douglas and his crew are safe and well and that good news will not be long in coming through.

In late July 1945, Ivy Mae, still living on Stuart Street, received another letter, this one from the R.C.A.F. Casualty Officer, for Chief of the Air Staff in Ottawa:

Dear Mrs. Pole:

It is with deep regret that, in view of the lapse of time and absence of any further information concerning your husband, Flying Officer Douglas Campbell Pole, since he was reported missing, the Air Ministry Overseas now proposes to take action to presume his death for official purposes.

Will you please confirm by letter that you have not received any further evidence or news concerning him. The presumption of death will proceed after hearing from you, and on completion you will receive official notification by registered letter from Chief of the Air Staff.

May I extend to you and the members of your family my sincere sympathy in this time of great anxiety.

Doug Pole's death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas (over Essen Germany)*. The Wing Commander for Chief of the Air Staff in Ottawa sent this letter to Ivy Mae in February 1947:

Dear Mrs. Pole:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your husband, Flying Officer D.C. Pole. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

In July 1952, Grace, Doug's mother, received the following letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff:

Dear Mrs. Pole:

It is with reluctance that after so long an interval, I must refer to the loss of your son, Flying Officer Douglas Campbell Pole. A report has, however been received from our Missing Research and Enquiry Service which states that their efforts to locate your son's grave have been unsuccessful. Under the circumstances, therefore, it must be regretfully accepted and officially recorded that he does not have a "known" grave.

Due to the extreme hazards attending air operations there are, unhappily, many thousands of British aircrew boys who do not have "known" graves and all will be commemorated on General Memorials that will be erected at a number of locations by the Imperial War Graves Commission (of which Canada is a member), each Memorial representative of a theatre of operations. One of these Memorials will be erected at Runnymede, England, and the name of your son will appear on that Memorial.

I realize that this is an extremely distressing letter and that there is no manner of conveying such information to you that would not add to your heartaches. I am fully aware that nothing I may say will lessen your great sorrow, but I would like to express to you and the members of your family my deepest sympathy.

Douglas Pole, 21, has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom, Panel 247. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II. Douglas left behind his wife of just over one year, Ivy Mae Pole. Years later, Ivy Mae remarried, becoming Ivy Mae Palmer and residing at Oakwood Corners, R.R.#3 Sarnia. For parents Willard and Grace Pole, tragedy struck twice. Doug was their second son lost in the war; their oldest son Ross of the RCAF was killed only four months earlier when his Lancaster bomber was shot down over France.

For youngest son Neil Pole, the loss of his two older brothers was devastating. He was certainly successful in life in that he took over his father's business, Pole's Pharmacy in Sarnia. He married Fay Terry, and together, they had three children together: their first-born Ross Douglas, and Janet and Dianne Pole. But the loss of his brothers was something that affected him deeply for the rest of his life. Neil always remembered the day in June 1944 when his father closed up the drug store and walked over to SCITS to pick him up. When they got home, his mother Grace was distraught, sitting on her bed crying and praying, having just received the news of Ross' death. Four months later, they received the news of Douglas' death overseas.

Neil never talked about his brothers. Parents Willard and Grace were much the same. For Neil, every birthday, June 13, was a reminder of Ross' death, who was shot down over France on the same day. Even in his 90's, memories of his brother's evoke strong emotional responses for Neil. The Pole family's lives were forever changed by the loss of the two boys. Every birthday, every holiday, every Remembrance Day, and every anniversary of their deaths were perpetual reminders of what they lost.

POLE, Ross Norman (#J/28873)

When Sarnian Ross Norman Pole decided to enlist in the RCAF during his final year of university, a recruiting officer described him as *splendid and officer material*. On June 12, 1944, a week after D-Day, Flying Officer-Navigator Ross Pole was on an operational night raid targeting the marshaling yards at Cambrai, France. Ross was killed when his Lancaster aircraft crashed during the return flight to its base in England.

Ross Pole was born in Windsor, Ontario on September 24, 1920, the eldest son of Willard Harford and Muriel Grace (nee Proctor) Pole. Willard Harford Pole, the son of Charles and Mary Pole, born August 4, 1892 in Strathroy, Ontario, had served in WWI. At the age of twenty-four, Willard enlisted in the Canadian Over-Seas Expeditionary Force on February 19, 1917 in London, Ontario. He stood five feet nine and a half inches tall, had blue eyes and light brown hair, was single and residing with his parents at 440 Wellington Street, Sarnia at the time. He recorded his next-of-kin as his mother, Mary Pole on Wellington Street (later 194 Kathleen Avenue), and his trade or calling as druggist. He was appointed the rank of Sergeant, with Canadian Army Medical Corps (C.A.M.C.) Training Depot, No. 1, CEF. Less than two months later, on April 12, 1917, he embarked overseas from Halifax, arriving in Liverpool on April 29.

One month later, on May 31, 1917, Sergeant Willard Pole arrived in Havre, France, a member of the CAMC. He served as a medic initially with the 5th Canadian Field Ambulance and in late August 1917 was transferred to the 29th Company, Canadian Forestry Corps. In the early part of 1919, he returned to England and was attached to No. 9 Canadian Stationary Hospital. He was discharged on July 17, 1919 in Halifax, based on “demobilization consequence upon cessation of hostilities”.

Willard Pole graduated from the College of Pharmacy the same year and returned to Sarnia. Willard married Sarnia-born Muriel Grace Proctor Pole on October 11, 1919 in Sarnia. Muriel Grace went by her middle name Grace. Willard and Grace Pole were blessed with three sons: Ross Norman, the eldest; Douglas Campbell (see above); and the youngest Neil Proctor (born June 13, 1927). The Pole family moved to Sarnia when Ross was only a few months old. The Pole family lived at 208 Essex Street and Willard was a druggist in Sarnia, operating the successful Pole’s Drug Store.

Ross Pole attended Lochiel Street Public School from 1926 to 1933, and then Sarnia Collegiate from 1933 to 1938. While at school, he was active in track, basketball, hockey and swimming. At Sarnia Collegiate, he also achieved being Field Day Champion and was the business manager of the High School magazine. Ross was a member of both the Central United Church and of the Central Century Club.

After completing high school, Ross attended the University of Western Ontario in the Business Administration program beginning in 1938. He completed three years of the program and during his fourth year, while working on his Honours degree, he enlisted to serve. While at Western, Ross took the Canadian Officer

Training Course (COTC), from 1940 until he enlisted, passing his 1st and 2nd Lieutenant exams. He was not shy about working and had an industrious spirit. During his summers, Ross worked a number of jobs to earn some extra money. He was a clerk and deliveryman at his father's pharmacy, Pole's Drug Store, while he was in high school; a clerk and deliveryman at Dominion Stores in Sarnia, June-September 1939; a sheet metal worker at H.H. Robertson Company in Arvida, Quebec, June-September 1940; and a deck steward at Canadian Steamship Lines in Sarnia, aboard the passenger steamship *SS Hamonic*, June – September 1941 (Historical Note: ship was destroyed by fire on July 17, 1945 while docked in Point Edward).

Ross Pole UWO

Ross & Douglas Pole circa 1942

Twenty-one-year-old Ross Pole enlisted in the Royal Canadian Air Force on December 19, 1941 in London, Ontario (his younger brother Douglas would enlist three months later). Ross stood five feet nine inches tall, had brown eyes and medium brown hair, was single, and was a student at the time residing at 1040 Patricia Street, London (he recorded his permanent address as 208 Essex Street, Sarnia). After the war, he planned to complete his education, and then seek employment in accounting or selling. He requested flying duties, with a preference to be a pilot or observer. The Recruiting Officer recorded Ross as being, *Clean cut, alert, intelligent, young man, amiable & well poised. Sr. Matriculation, will complete four year Business Administration course at University of Western Ontario in Jan. 1942. Splendid aircrew & officer material.*

From #9 Recruiting Centre in London and #1 Manning Depot in Toronto, Ross received his air training at #1

Initial Training School (ITS) in Toronto; at #9 Elementary Flying Training School (EFTS) in St. Catharines; at #16 Service Flying Training School (SFTS) in Hagersville, Ontario; and then at #4 Air Observer School (AOS) in London, Ontario. Ross Pole was awarded his Air Navigators Badge and commission as Pilot Officer on August 6, 1943, graduating from the #4 AOS in London. After his 14-day pre-embarkation leave, he was posted to #1 Y Depot in Halifax, Nova Scotia.

On August 26, 1943, Ross Pole embarked overseas from Halifax for the United Kingdom. There, he was initially posted to #3 Personnel Reception Centre before being transferred to #9 (Observer) Advanced Flying Unit (AFU) on October 19, 1943. On December 28, 1943, he was transferred to #24 Operational Training Unit (O.T.U.), and in late May 1944, was transferred to #1659 Heavy Conversion Unit (H.C.U.). On May 19, 1944, Ross became a member of RCAF #419 Moose Squadron "Moosa Aswayita" (written in Cree, not Latin, means Beware the moose-a ferocious fighter), part of **Bomber Command**. Ross was also promoted to the rank of Flying Officer Navigator.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

RCAF #419 Squadron was formed at RAF Mildenhall, England in December 1941, and named after its first commanding officer, Wing Commander John "Moose" Fulton. The unit moved to various bases throughout the war, including Leeming, Topcliffe, Croft and Middleton St. George. Initially operating Wellington bombers, in November 1942 the squadron converted to Handley Page Halifax bombers, and in March 1944 to Avro Lancasters.

The **Battle of Normandy** began for the Canadians with the June 6, 1944 D-Day landings at Juno Beach. After breaching the "Atlantic Wall" of "Fortress Europe", Allied armies, supported by the Navy and Air Force, began their break out from the narrow Normandy bridgehead to carve out a foothold on the French mainland. It would take a whole summer of tenacious fighting, pushing against fierce and ruthless German forces to advance east across France.

Flying Officer-Navigator Ross Norman Pole

On June 12, 1944, one week after the invasion of Europe and in the breakout from Normandy, Flying Officer-Navigator Ross Pole was aboard Lancaster Mk. 10 aircraft KB714 (markings VR-Y) that took off from its Middleton St. George base at 21.35 hours. It was one of a 671 aircraft force that was tasked with further hampering lines of communications leading to the Normandy area that night. Ross Pole's Lancaster KB714 was targeting the marshaling yards at Cambrai, France. This was Flying Officer Ross Pole's sixth operation.

After take-off, no further word was received from the aircraft that was scheduled to return to base at approximately 02.35 hours. It was determined later that the aircraft had been shot down by a night-fighter near Courcellette, France. Along with F/O Ross Pole, also killed were Flying Officer's Russel Nelson Wilson, Charles

Robert McOrmond, Douglas James McMullen, Pilot Officer's Max Ennis Gates, Richard William Francis, and Sgt. Captain Clayton White. It was a costly raid for 419 Squadron, with the loss of three Lancaster aircraft: KB714, KB731 and KB726 (the latter included P/O A.C. Mynarski, who was awarded the Victoria Cross for his actions in the damaged aircraft). Of the 671 aircraft involved in the operation, 23 aircraft were lost.

In mid-June of 1944, Willard and Grace Pole on Essex Street received a telegram from Ottawa informing them that their son, FLYING OFFICER ROSS POLE WAS REPORTED MISSING ON JUNE 13 AFTER ACTIVE OPERATIONS OVER ENEMY TERRITORY. No other details were given. Days later, Willard received the following letter from the Wing Commander of No. 419 (R.C.A.F.) Squadron:

Dear Mr. Pole:

I deeply regret the necessity of confirming the information, which you have already received, that your son, Flying Officer Ross Norman Pole, is missing from operations on the night of 12/13th June, 1944. This operation was an attack on a very important objective in enemy occupied territory, which has since proved to have been very effective. Unfortunately, nothing has been heard of your son's aircraft since time of take-off and its loss can only be attributed to enemy action. There is still quite a possibility that all or part of the crew may have escaped or, at worst, be prisoners of war, but news of this could not be expected for some considerable time.

Your son was with us for a period of three weeks, during which time he took part in five successful attacks on the enemy. He was a cheerful, quiet, hard-working Navigator who produced very good results and certainly had the complete confidence of his crew and was invariably trying to improve his knowledge.

If any further news comes to hand, you may rest assured you will be notified immediately. F/O Pole's kit and personal effects have been collected and forwarded to the Central Depository, Colnbrook, Slough, Bucks. who, after completion of necessary details, will communicate with you as to their disposal. May I convey my sincere sympathy to you in your great loss and hope with you that better news may follow.

In mid-July of 1944, Flying Officer Ross Pole's name appeared on the Department of National Defence for Air casualty list as, *Missing on active service after air operations overseas*. Ross Pole's death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas (over Cambrai France)*.

After the war, the RAF Missing Research and Enquiry Unit (MREU) conducted an investigation into the crash of Lancaster KB714. Following are portions of the investigator's reports from August and October 1946:

...It was evidently the custom of the Germans at Rosieres to send out crash parties to bring back bodies etcetera after crashes occurred possibly for checking by intelligence sections, then bury them at Meharicourt...

Place of Crash: 1 kilometre South of Courcellette

Place of Burial: Believed Communal Cemetery of Meharicourt

1. I checked details of this crash as given in your letter..., with inhabitants of Courcellette, and also went to the scene of the crash. All debris was gone, having been removed by the Germans.

2. Monsieur HENRIEUX, Secretary to the Mayor of Courcellette, told me that six bodies were collected by the Germans about two days after the crash and taken away, it was believed, to ROZIERES EN SANTERRE.

3. The seventh body was found on about 21st June 1944 by PIERRE JONSE, Courcellette, Somme. From this body, which was about 300 yards from the crash in a cornfield JONSE took a pair of underpants marked "WILSON" This body was again taken away by the Germans to ROZIERES

4. A helmet marked "POLE" was also found at the crash but this has since been lost.

5. At the Communal Cemetery of Meharicourt close to ROZIERES EN SANTERRE the Germans buried in Graves Nos. 41-48 inclusive eight airmen who were killed on 13/6/44...

(After later exhuming the graves, the MREU determined that Grave 44 was that of Ross Pole, as the identity disc of F/O R.N. Pole was in the coffin).

Casualty Enquiry of Lancaster KB726 and Lancaster KB714

1. Canadian officer P/O A.C. Mynarski (of Lancaster KB726) has recently been awarded the Victoria Cross. It is essential that final burial details for this officer be ascertained immediately, and you are therefore requested to investigate this case under the highest possible priority...

2. Both the above aircraft were missing on the night of 12/13th June, 1944. KB726 was airborne from Middleton-St-George at 2144 hours, and KB714 from the same station at 2135 hours. The target in each case was Cambrai.

3. German documents report two crashes on the 13th June in the vicinity of Albert, situated on the River Ancre, 25 kilos. N. of Amiens. Unfortunately the German documents confused the two crashes, and it is not possible to sort

them out with any certainty, or gain from them exact information....

KB726 crashed at 0035 hours, near Acheux. This aircraft is known to have been on the outward journey when shot down by a night fighter, as it was still carrying bombs, one of which exploded when the aircraft crashed in flames.... The body of a Canadian airman was recovered 10 days after the crash on the 23rd June, and was reported to have been buried in the cemetery at Meharicourt near Rosieres....

4. The second aircraft (KB714) crashed between 0130 and 0200 hours, when returning from the attack, which was evidently successfully completed. The location of this crash is given as one kilometer south of Courcellette. The body of Sgt. White was identified by his identity discs and together with six unknown he was buried in the cemetery at Meharicourt....

In December 1946, Willard received the following letter from the Wing Commander for Chief of the Air Staff in Ottawa:

Dear Mr. Pole:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son, Flying Officer R.N. Pole. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

In August 1948, Willard received the following letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff in Ottawa:

Dear Mr. Pole:

I would like to refer please, to my letter of June 27, 1947 concerning the resting place of your son, Flying Officer Ross Norman Pole, whose grave was located in Meharicourt Communal Cemetery, Meharicourt, Department of Somme, France.

A report has been received from our Overseas Headquarters that the re-arranging of the cemetery has been completed and your son's grave is numbered 44. The members of his crew are resting beside him, Sergeant C.C. White in Grave No. 43, Flying Officer C.R. McOrmond Grave No. 45, Flying Officer R.N. Wilson Grave No. 47 and Flying Officer D.J. McMullen, Pilot Officer R.W. Francis and Pilot Officer M.E. Gates (who could not be individually identified) are resting in collective graves numbered 48 and 49.

The resting place of your son and his crew will be reverently and perpetually maintained by the Imperial War Graves Commission (of which Canada is a member). The Commission will also erect a headstone at your son's grave. Unhappily, there are great numbers of these headstones to be erected and it will quite naturally take considerable time. It is not necessary to write to the Imperial War Graves Commission as you will be contacted by them before the stone is prepared.

May I take this opportunity of again extending to you and the members of your family my deepest sympathy in the loss of your gallant son.

Four months after the death of their son Ross, Willard and Grace Pole received news that they lost another son, RCAF Flying Officer Douglas Pole, who was shot down in a Halifax bomber over Germany. Ross Pole, 23, is buried in Meharicourt Communal Cemetery, Somme, France British Plot, Grave 38.

For youngest son Neil Pole, the loss of his two older brothers was devastating. He was certainly successful in life in that he took over his father's business, Pole's Pharmacy in Sarnia. He married Fay Terry, and together, they had three children together: their first-born Ross Douglas, and Janet and Dianne Pole. But the loss of his brothers was something that affected him deeply for the rest of his life. Neil always remembered the day in June 1944 when his father closed up the drug store and walked over to SCITS to pick him up. When they got home, his mother Grace was distraught, sitting on her bed crying and praying, having just received the news of Ross' death. Four months later, they received the news of Douglas' death overseas.

Neil never talked about his brothers. Parents Willard and Grace were much the same. For Neil, every birthday, June 13, was a reminder of Ross' death, who was shot down over France on the same day. Even in his 90's, memories of his brother's evoke strong emotional responses for Neil. The Pole family's lives were forever changed by the loss of the two boys. Every birthday, every holiday, every Remembrance Day, and every anniversary of their deaths were perpetual reminders of what they lost.

POWELL, Stephen Bruce (#N/3333)

Stephen “Bruce” Powell had a strong desire to join the Royal Canadian Navy, even before he was of age to do so. He finally succeeded in becoming a member at the age of seventeen, several months before war was declared. He would become Sarnia’s first casualty of the Second World War.

Stephen Bruce Powell was born at Royal Victoria Hospital in Barrie, Ontario on January 23, 1922, the eldest son of Ernest John “Ernie” Powell Jr., a railroad switchman at the time, and Cora Irene (nee Court) Powell. Stephen Bruce Powell went by his middle name Bruce, and was known as “Buster” to his family and friends. Bruce’s story can be linked to his father, for Ernest or “Ernie” served in the Great War when he was a teenager.

Ernie Powell was born on August 3, 1899 in Waltham Abbey, Essex, England, but was living in Barrie, Ontario when the Great War started. Weeks before his seventeenth birthday, on July 21, 1916, Ernie enlisted in the Canadian Expeditionary Force, 177th Overseas Battalion at Camp Borden. Ernie was residing in Barrie at the time, and recorded his birthplace as Reading, England, his occupation as expressman, and his next-of-kin as his father Ernest Powell (Sr.) in Barrie, Ontario. Approximately three months later, Ernie was discharged from the 177th, CEF at Camp Borden.

On September 4, 1917, when he was eighteen years old, Ernie Powell enlisted again in the Canadian Expeditionary Force, this time at the Railway Construction & Forestry Depot in Toronto with the York and Simcoe Foresters, CEF. He was residing in Barrie, Ontario at the time, and recorded his birthplace as Middlesex, England, his occupation as chauffeur, and his next-of-kin as his father Ernest Powell (Sr.) at 147 Peel Street, Barrie, Ontario. He also recorded that he had prior military experience, serving for three months with the 177th Battalion. He stood five feet seven and three-quarter inches tall, had blue eyes and light brown hair, and was single. It was also recorded that his mother was no longer alive. Though it was recorded on his file that he was, “not to be sent overseas until 19 years of age”, eighteen year-old Private Ernie Powell embarked overseas from Halifax aboard the *SS Metagama* on December 4, 1917.

Private Powell of the Canadian Forestry Corps (CFC) arrived in Liverpool, England on December 14, 1917, and was initially posted at C.F.C. base depot at Sunningdale. The CFC established its English headquarters at Smith’s Lawn, Sunningdale, Berkshire, in the midst of Windsor Great Park. The Canadian Forestry Corps cut trees in England’s forests, where the timber was squared, sawed and transported. The cut wood was used on the Western Front including for duckboards, trench construction, railway ties, corduroy roads, ammunition crates, and barracks and hospitals. In mid-July 1918, Ernie Powell was hospitalized at Beech Hill, Englefield Green for eight days as a result of influenza. Private Powell’s entire service was in the United Kingdom. Seven months after the Great War ended, on June 7, 1919, he embarked for Canada, where he would be discharged on demobilization on June 18, 1919 in Toronto.

In early 1921, Ernie Powell, 22, was residing at 147 Peel Street in Barrie, Ontario with his thirteen year-old sister Ellen Laura and their forty-seven-year-old widowed father Ernest Powell Sr. Living in the Powell household was their twenty year-old servant Cora Irene Court (she had been a house maid since the age of fourteen). In that same year, on August 2, 1921, Ernie Powell married Woodstock native Cora Irene Court (born September 1, 1901) at The Rectory in Barrie, Ontario. Ernie was employed with the railroad at the time. Cora and he were blessed with five children together: the eldest Bruce; Allan John (born October 28, 1924); Robert Grant (born October 28, 1926); and twins Ernest James and Mary Ann (born October 1, 1933) Powell. During the war, both of Bruce’s younger brothers also served: Allan with the Royal Canadian Air Force in Newfoundland; and Robert served as a “Boy Soldier” in Canada.

The Powell family moved to Sarnia in 1929, when Bruce was seven years old. They lived at 462 Cromwell Street, and later 433 Lydia Street. Ernie had come to Sarnia to work with the Canadian National Railroad, and later found work with Canada Customs as a Customs Officer at the Post Office. When World War II began, Ernie, now 40, was eager to enlist; however, being a Customs Officer, the government refused to allow him to join.

One of the things he did during the war was on Sunday nights at the Imperial Theatre – he led sing-songs to help raise money for the war effort. During the war, Cora was also active with the local Navy Mother’s Auxiliary and the local Red Cross – knitting Afghans and squares of cloth for the inside of soldiers’ helmets; wrapping up bandages; and collecting milkweed pods (the silk was used to stuff into life vests or to provide insulation for flight suits). Ernie and Cora Powell also billeted sailors at their home, who were in town to build the sub-chasers at Mac-Craft.

After the war, Ernie Powell spoke to children in their schools about the war. Every year on the Sunday closest to Remembrance Day, Ernie read the list of soldiers who had been killed in action at Canon Davis Church where he was a parishioner. Ernie was one of the originators of the local Sarnia Air Cadets – he was a Flying Officer with the Air Cadets from 1942 – 1955, and was a member of the Royal Canadian Legion, Branch #62, and for a time was on the Board of Directors. He would retire from Canada Customs after 35 years of service. Undoubtedly Bruce, his oldest child, was influenced by his father's service in the military.

Stephen "Bruce" Powell was educated in Sarnia public schools and then at Sarnia Collegiate for two and a half years, where he completed a course in electricity. Bruce was a responsible student who did well in school and he was also a successful runner. He was a member of the Servers' Club of St. George's Anglican Church and was active in much of the young people's work in the church. He was a member of the 26th Lambton Field Battery, Royal Canadian Artillery, Non-Permanent Active Militia in Sarnia from April 12, 1937 to April 19, 1939. At one point during his militia training in 1938, he was stationed at Petawawa. While there, he wrote the following on a postcard with a two-cent stamp attached, to his grandfather Ernest Powell Sr., in Orillia:

Dear Grampa

This is a typical soldier. Having a good time. Fired the guns for the first time today and fell off the gun seat. I'll be home Monday. Write.

Bus

Even at fifteen years old, Bruce was eager to join the Navy. In January 1937, his father Ernie wrote the following letter to the Naval Secretary, Department of National Defence in Ottawa:

Dear Sir:

Will you please send me a list of age limitations, educational qualifications and physical requirements necessary for enlistment in the Canadian Navy. If you have application forms will you also send me a set?

In August 1938, Sarnia M.P. Ross W. Gray, wrote the following letter (on House of Commons stationery with its distinctive letterhead) to the Department of National Defence, Naval Service:

Dear Sirs,

I am writing on behalf of Stephen Bruce Powell, a young man of this City who is anxious to join the Royal Canadian Navy. The recommendations from his teachers and all others who have known him intimately are very fine and I desire to add my own recommendation that he be given every possible consideration as soon as his name is reached. Circumstances prevent his being able to return to school this Fall and I am wondering if you can give me any encouragement as to his name being reached before he becomes seventeen in January.

Following is the Assistant Naval Secretary's reply to Sarnia M.P. Ross W. Gray:

I am directed to acknowledge your letter of 23rd August regarding the application of Mr. Stephen Bruce Powell of Sarnia, Ontario, candidate for entry in the Royal Canadian Navy as a Boy (Seaman Class). As Mr. Powell does not reach the minimum age limit of 17 years required for entry until the 23rd January, 1939, consideration cannot be given to his application until after that date. I assure you, however, that your recommendation of the above-mentioned candidate has been noted and same will be borne in mind when his name is reached and he is being considered for entry.

On February 4, 1938, sixteen year-old Bruce Powell ("Buster" or "Bus" to his family), standing five feet seven and a half inches tall, completed his "Application for Entry in the Royal Canadian Navy" forms. The application required a written consent paper to be signed by a parent, which his father Ernie provided. More than a year later, on April 24, 1939, seventeen year-old Bruce Powell became an official member of the Royal Canadian Navy. It was more than four months before Canada declared war on Germany. Bruce stood five feet eight and three quarter inches tall, had blue eyes and blonde hair, was single, and was a student residing at home on Cromwell Street with his parents at the time. Initially given the rank of Boy Seaman, he received his Navy training in Halifax at HMCS Stadacona base, and on HMCS Venture (a three-masted schooner). On August 27, 1939, while still in Halifax, Bruce wrote the following on a postcard to his father Ernie at 462 Cromwell Street, Sarnia:

Dear Dad,

I won't be writing for a while as it will be impossible.

Love to all, Bus

On November 1, 1939, Bruce attained the rank of Ordinary Seaman. Two months later, on January 11, 1940, Ordinary Seaman Bruce Powell became a member of the crew of HMCS Fraser.

Beginning on the opening day of the Second World War, the **Battle of the Atlantic** would be the longest continuous campaign of the war, and one in which Canada played a central role. The Royal Canadian Navy, along with the Royal Canadian Air Force (RCAF) and Canada's Merchant Navy, played a vital role in defending the country's eastern coast and escorting convoys of ships carrying men and essential machinery, arms, fuel and basic resources between North America and Europe.

Even with the protection of armed escorts, it was always a treacherous voyage for the dozens of merchant ships traveling in a zig-zag fashion across enormous tracts of ocean. Captains had to manoeuvre in crowded ranks, without lights, wireless or navigational aids and using haphazard communication. Not to mention the constant risk of fierce attacks by German U-boats or air attack; the danger of collision; underwater mines; rough water; and the hazardous weather—the fog, gales and ice conditions--in the North Atlantic.

The *HMCS Fraser (H48)* was a C-class destroyer built for the Royal Navy launched in September 1931, originally named the *HMS Crescent*. In late 1936, it was sold to the Royal Canadian Navy and renamed the *HMCS Fraser*. Initially stationed on the Canadian west coast, with the outbreak of war, she was transferred to the Atlantic coast for convoy escort duties.

On June 25, 1940, the *HMCS Fraser* was proceeding to Bordeaux, France in the Gironde River estuary to help in the rescue of an estimated 4000 refugees trapped in the area by German military forces. Bruce Powell was an Ordinary Seaman aboard the *Fraser*. Accompanying the *HMCS Fraser* were Canadian destroyer *HMCS Restigouche* and the British cruiser *HMS Calcutta*. At 10:30 pm, in rough seas and in poor visibility, the captain of the *Fraser* decided that the three ships should move closer together and ordered a turn to port to bring his ship behind *HMS Calcutta*. In doing so, the two ships collided, the bow of the heavier *Calcutta* slicing into the side of the lighter *Fraser* and cutting it into three pieces. Forty-five members of the *Fraser* crew and nineteen men on the *Calcutta* lost their lives. Bruce Powell survived this incident.

Following the sinking of the *Fraser*, back in the U.K., Bruce took a course in anti-aircraft gunnery. He had a close call from death on one occasion when the ship he was on was bombed at a London dock and a number of the crew were killed. On September 6, 1940, Bruce and many of the *Fraser* survivors were transferred to duty aboard the *HMCS Margaree*. In October 1940, only one month into her service as the *HMCS Margaree*, the ship met the same fate as the *Fraser*.

The *HMCS Margaree (H49)* was a D-class destroyer launched as the *HMS Diana* in June 1932, originally with the Royal Navy, where she spent most of her career as part of the Mediterranean Fleet. She was transferred to the Royal Canadian Navy September 6, 1940 and renamed the *HMCS Margaree*, to serve as a River class destroyer. She was transferred to the RCN to replace the *HMCS Fraser*, the RCN C-class destroyer, which had been lost in the tragic accident on June 25, 1940.

Seaman Bruce Powell with his mother Cora
(photo taken at 462 Cromwell Street)

River Class Destroyer *HMCS Margaree H49*

On October 20, 1940, the *HMCS Margaree* left Londonderry, Northern Ireland as escort of Convoy *OL8* bound for Canada. She was the sole escort for a small, fairly fast *OL8* convoy of five ships heading for Halifax. The five-ship convoy was disposed in two columns: freighters *MV Port Fairy* and *Jamaica Planter* on the port side and the other three vessels in column to starboard. At over 14 knots, the speed of the convoy was comparatively fast and for that reason *OL8* did not zig-zag. On the evening of October 21, *Margaree* was 1 ½ miles ahead of the convoy's port column and the weather had started to deteriorate. By midnight, in rough squalls and poor visibility, *Margaree* and the convoy had lost track of each other.

Then, at 1:00 a.m. on October 22, as the *Margaree* veered to port, she suddenly appeared crossing *Port Fairy's* bow, much too close for the freighter to avoid her. So only two days at sea, in the mid-Atlantic 450 miles northwest of Iceland, the *Port Fairy* collided with the *Margaree*. The *Port Fairy's* bow sliced through *Margaree* just under the bridge, severing the forward section of the ship. The whole bow and bridge portion of the *Margaree* sank almost immediately, taking virtually everyone in the forward section, 142 seamen, swallowed by the sea in an instant. Of those, 86 of them were survivors of the *HMCS Fraser* collision of just four months earlier. For Ordinary Seaman Bruce Powell, this was the second sea disaster in which he had been involved.

When Lieutenant Bill Landymore, who was off duty in the wardroom during the collision, came forward he heard only the whistling of the wind and the slam of the sea against *Margaree's* hull. He later reported, "There was no noise at all. No shouts even in the after part. Not even the sound of escaping steam." Others recalled the grinding of steel on steel, as what was left of *Margaree* rubbed against the towering sides of *Port Fairy*. Only six officers and 28 ratings survived the collision. The thirty-four survivors were all aboard the aft section, which remained afloat until the men were rescued by the *Port Fairy*. Thirty-two of them scrambled safely up the side of *Port Fairy*, the two others slipped from the ropes and were crushed between the vessels. By dawn, the stern of *Margaree* was still afloat, despite attempts by *Port Fairy's* little four-inch gun to sink it. The wreck was last seen adrift and sinking slowly by the stern.

The survivors were dropped off by the *Port Fairy* at Bermuda. No reason for the collision has ever been determined since all the officers who were in a position to know were in the bridge or bow. Ordinary Seaman Bruce Powell was one of the 142 who were lost in the tragedy. Although the official casualty list cited him as an Ordinary Seaman, he had received his Able Seaman papers while on the *Fraser*, but these records were lost with that ship.

Bruce's parents Ernie and Cora Powell in Sarnia were notified of the loss of their son by telegram from the Minister of National Defence for Naval Affairs, just prior to the release by the Canadian naval authorities of the public announcement of the sinking of the destroyer. A day later, they received a dispatch from Ottawa that drew attention to the fact that errors were possible in the naval list of survivors and the missing, owing to the difficulties of wireless communication at sea in wartime. The Powells hoped that their son had survived, but felt the chances were remote in view of the fact that only 31 survivors (at that time) were reported accounted for.

Bruce Powell had been home the previous Christmas. In two letters received by his parents days after learning of his death, Bruce had expressed the hope that he might get a trip home to Sarnia soon. It was indicated in dispatches that many of the crew of the *Margaree* were looking forward to spending Christmas with their families. Bruce Powell left behind his parents Ernie and Cora, and his younger siblings Allan, Robert and twins Ernest and Mary Ann. Able-Bodied Seaman Bruce Powell was Sarnia's first casualty of the Second World War.

In early November 1940, Ernie Powell received the following letter from the Naval Secretary at his home on Lydia Street:

Dear Sir:

It is with deep regret that I must confirm the telegram sent out by the Minister of National Defence, reporting that your son, Stephen Bruce Powell, Ordinary Seaman, O.N. 3333, R.C.N., was missing, believed killed.

Few details are available, but it is known that H.M.C.S. "MARGAREE" was sunk in collision in the North Atlantic whilst steaming without lights, on convoy duty, and in the submarine zone. 142 Officers and ratings are missing and must be presumed lost at sea.

I am requested to express to you the sincere sympathy of the Minister of National Defence for Naval Services and the Chief of the Naval Staff in your bereavement. Any further information, which is received, will be at once communicated to you.

One month after Bruce's death, a memorial service was held at St. George's Anglican Church, where he had been active in the organizations for the young people in the church. At the memorial service, Rev. F.G. Hardy said, *We will remember Stephen Bruce Powell because of his uprightness and splendid physical, mental and spiritual characteristics.* After speaking of the fact that it is often the youngest and best who are taken from the world, Rev. Hardy quoted from "In Flanders Fields" and urged the congregation to hold the torch high and go out to establish God's Kingdom in society so that war might not happen again.

Even decades later, Bruce's sister, Mary, could still recount the details of her parents learning of Bruce's fate. In the summer of 1940, Mary recalled as a young girl, aged six, the children all out on the street playing when a telegraph boy, in uniform, rode his bike down their street. All the children stopped playing and became silent as they watched the boy go down the street. They waited expectantly to see at which house he would stop. He pulled into the Powell house, and delivered the news that the *Fraser* had been damaged, and that Bruce was O.K.

Mary recalled the events months later when another telegraph boy rode his bike down their street and pulled into their Lydia Street home. Mary entered her home to find her mother Cora slouched in a chair, clenching the telegram and sobbing. Cora ordered Mary to cross the Gordon Street Park and to get Mrs. Worsley, a neighbour. Mrs. Worsley came and saw the telegram that informed Cora that the *Margaree* had been sunk, and that her son Bruce was missing. For the next week, Mary and her twin brother, Jim, were sent to live with the Baldwin family, friends from their church.

Ernest John Jr. and Cora Powell

Ernest John Powell (Jr.)

Cora Irene (Court) Powell

A few months later, around Christmas, Ernie and Cora Powell went out to a local movie theatre. Preceding the movie, as was customary, were a newsreel and a cartoon. On this particular night, the newsreel showed a series of war clips, one of them being a scene of three young sailors in their pea coats (wool outer jackets) on the deck of a bobbing ship in stormy weather, walking toward the camera. One of those sailors was Bruce Powell. Cora Powell

fainted right there. The next night, a Sunday in which the theatre was always closed, the theatre manager invited the Powell's back for a private viewing of the newsreel footage and movie.

In July 1941, a Memorial Cross was issued by the Government of Canada to Cora Powell on Lydia Street for the loss of her son. Also referred to as the Silver Cross, it was engraved with Bruce's name, rank and service number. The card accompanying the Memorial Cross read: *This Memorial Cross is forwarded to you by The Minister of National Defence for Naval Services, on behalf of the Government of Canada, in memory of one who died in the service of his Country.* In April 1945, Ernie and Cora Powell received a War Service Gratuity of \$196.42 for the loss of their son.

In the years after the war, British born father Ernie Powell evinced the "stiff upper lip" approach and never talked about the war or his son Bruce. Cora Powell spent much of her time compiling a scrapbook of memories of her son. Until she passed away in 1978, Cora always held out hope that her son would someday return home and walk through their front door.

Cora Irene (Court) Powell passed away at the age of seventy-seven on September 10, 1978 in Sarnia. Ernie John Powell passed away at the age of eighty-six on July 22, 1986 in Sarnia. At the time of his death, Ernie left behind his four children (Mary, Robert, Allan and James), and fourteen grandchildren and twelve great grandchildren. Both Cora and Ernest Powell were interned at Grandview Memorial Gardens. Stephen Bruce Powell, 18, has no known grave. His name is inscribed on the Halifax Memorial, Nova Scotia, Canada, Panel 4.

POWELL, Thomas Edward (#R/78675)

Thomas Edward Powell, 24, received consistently strong endorsements from others as he trained to become a pilot with the RCAF. One superior noted that Thomas was *bright and shrewd [with] quick and sound reactions*. Another observed that Powell was *Serious and responsible. [A] conscientious worker*. In October 1942, Thomas' Wellington aircraft was shot down over The Netherlands. All the crew were killed in the crash.

Thomas Powell was born in Sarnia on April 21, 1918, the only child of Edward Scott (born December 6, 1889 in London, England) and Annie May (nee Dobbie, born September 16, 1893 in Halton, Ontario) Powell. Edward Powell was a British Home Child, sent by Barnardo Homes, who arrived in Canada from Liverpool in 1900. In 1901, Edward, now eleven, was recorded as being a domestic who was residing with the Morton family in Plympton Township. The Morton family consisted of parents Evan, a farmer, and Elizabeth Morton, as well as their two young children George (age 3) and Alice (age 2). In 1911, Edward was rooming at 171 Victoria Street, Sarnia, and was employed as a sailor on a steamer.

On December 25, 1916, twenty-seven-year-old Edward Powell, then a teamster residing in Sarnia, married twenty-three-year-old Annie May Dobbie in Kitchener, Ontario. They had only the one child, Thomas Edward Powell. In 1921, Edward was working as a labourer at Imperial Oil to support Annie and their three year-old son Thomas Edward. The Powell family were residing at 160 Bright Street and later moved to 218 Proctor Street, Sarnia.

Edward's two brothers were also British Home Children who found homes in Canada. Their sister, Ada Louisa Powell, born 1896, immigrated to Canada (and Lambton) in 1911, along with their widowed mother Fanny (nee Bennett) Powell. Years later, on May 22, 1935, thirty-eight-year-old Ada Powell, then a cook, residing at 109 N. MacKenzie Street, married thirty-three-year-old Nelson Roy Yeates, a farmer in Sarnia Township, in Sarnia. Ada Louisa (nee Powell) Yeates is buried in Blackwell Cemetery, Sarnia.

Edward Powell's two brothers were Henry John (born 1894 in England; arrived in Canada in 1902) and Thomas Edwin (born 1892 in England; arrived in Canada in 1904). Both brothers served with the Canadian Expeditionary Force in World War I – and both died in action. Henry Powell, 23, was killed in action on August 15, 1917 during an attack on the Lens in France. Thomas Edwin Powell, also age 23, was killed in action on April 30, 1915 during an attack on St. Julien in Belgium. His story is included in the WW I section of this Project on page 352.

Thomas Edward Powell was educated at Confederation Street and Johnston Memorial Public Schools in Sarnia from 1923 to 1931. He then attended Sarnia Collegiate from September 1931 until June 1938. At Sarnia Collegiate he was a member of the Cadet Corps and was very active in athletics, especially gymnastics. He also participated in track, basketball, tennis, rugby, hockey and marksmanship (was Senior All-round champion). His life wasn't only sports though. He graduated with Honour standing in English Composition and Literature, Algebra, Geometry and Trigonometry, Physics, Chemistry and French. Thomas also worked part time as a delivery boy for

seven years for Pralls Flower Shop in Sarnia from 1931 to 1938. From October 1938 until he enlisted in late 1940, Thomas worked as a chemist's laboratory assistant at Imperial Oil Limited Research Lab in Sarnia.

Thomas Powell had originally applied to join the R.C.A.F. in 1938 in London, Ontario before the war began. He was accepted then but turned it down. In September 1940, he started his studies in maths and physics at the University of Toronto; however, after being there for a month and a half, he was called by the R.C.A.F. On November 7, 1940, Thomas Powell, 22, enlisted with the Royal Canadian Air Force in London, Ontario. He stood five feet seven and a half inches tall, had hazel eyes and brown hair, was single, and was residing at home on Proctor Street with his parents at the time. He requested flying duties, with a preference to be a pilot. After enlisting, his co-workers at Imperial Oil presented him with a wallet.

From the Recruiting Centre in London, #1 Manning Depot in Toronto, and then #22 Manning Depot in Debert, Nova Scotia, Powell began his air training at #3 Initial Training School (ITS) in Victoriaville, Quebec. His Commanding Officer at #3ITS had this to say about the Sarnian: *This man is bright and shrewd. He saved enough money working to put himself through University and interrupted his freshman year to join R.C.A.F. Quick and sound reactions.* Thomas continued his training at #17 Elementary Flying Training School (EFTS) in Stanley, Nova Scotia and at #8 Service Flying Training School (SFTS) in Moncton, New Brunswick. He was awarded his Pilot's Flying Badge at #8SFTS in Moncton on September 13, 1941, where he stood seventh in the class of 31 students. His Squadron Leader at #8SFTS remarked that Thomas was, *Very intelligent and [had a] keen sense of humour. Serious and responsible. Conscientious worker.* In mid-September 1941, Thomas Powell was transferred to #13 Operational Training Unit (OTU) and weeks later was posted to #1 Y Depot in Halifax.

W/O II-Pilot Thomas Edward Powell

Thomas Powell embarked overseas from Halifax for the United Kingdom on October 7, 1941. Initially posted to #3 Personnel Reception Centre, he received further training in the U.K., including at #3 Service Flying Training School (SFTS), based at RAF South Cerney; and at #23 Operational Training Unit (OTU), based at RAF Pershore; and then at #1651 Heavy Conversion Unit (CU) based at RAF Wrattling Common. On July 24, 1942, Thomas became a member of RCAF #419 Moose Squadron "Moosa Aswayita" (written in Cree, not Latin, means Beware the moose—a ferocious fighter), part of **Bomber Command**, with the rank of Warrant Officer Class II-Pilot.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

RCAF #419 Squadron was formed at RAF Mildenhall, England in December 1941, and named after its first commanding officer, Wing Commander John "Moose" Fulton. The unit moved to various bases throughout the war, including Leeming, Topcliffe, Croft and Middleton St. George. Initially, the squadron was equipped with Vickers Wellington bombers—twin engine, long-range, medium bombers. In November 1942 the squadron would convert to Handley Page Halifax bombers, and in March 1944 to Avro Lancasters.

Approximately ten weeks after becoming a member of #419 Moose Squadron, on October 5, 1942, Thomas Powell was part of a crew aboard Wellington III aircraft BJ729 (markings VR-R) that set off from Croft at 1821 hours on a Nickels (Leaflets) raid with other #419 Squadron aircraft targeting Aachen, Germany. A total of 237 aircraft were involved in the operation. The conditions for taking off, let alone flying, were less than ideal. Wartime operations, however, continued in spite of the weather.

The squadron ran into very heavy cloud cover over the south of England that forced back a number of the Wellingtons. Severe icing had been reported by the four aircraft returning to base after encountering an electrical storm. Not only icing but damage to electrical equipment forced the aircraft to return early to base. One of the Wellingtons forced back fell 2,000 feet because of the loss of control due to icing. Its rear turret became completely frozen and was inoperable so it returned to base. The returning aircraft also experienced electrical problems with intercoms, wireless sets and the Gee system after passing through these electrical storms.

Warrant Officer Thomas Powell and his crew aboard BJ729 continued on to the target after passing through the severe icing conditions. The bad weather continued into Germany. Their aircraft was only one of four Moose Squadron Wellingtons to continue on. Sometime before 2230 hours, BJ729's crew came under attack from enemy night fighters. The attack brought down Powell's aircraft at Maastricht (Limburg) Netherlands at 2230 hours. The entire crew was killed. The Squadron summary records show that of the eight aircraft assigned to the Aachen operation, only two aircraft took part in bombing runs - one on the primary target, and one on the secondary target. Four aircraft returned due to damaged electrical equipment and/or mechanical problems due to icing. Of the 237 aircraft that took part in the operation, there were 10 lost and a further 6 lost on take-off from England due to the severe weather.

Perishing in BJ729 with Warrant Officer Class II-Pilot Thomas Powell were FS.s Joseph Leonard O'Grady, Guy James Herman McElroy, and Howard Broom; and P/O. Francis Lionel Todd. Originally the crew were buried at Venlo, and were later carefully exhumed and reverently reburied in Jonkerbos War Cemetery, Nijmegen. In late October of 1942, Edward and Annie Powell on Proctor Street in Sarnia received information that their son and only child Thomas was reported missing as the result of air operations. Months later in June of 1943, Thomas Powell's death was officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas*. Thomas Powell, 24, is buried in Jonkerbos War Cemetery, Netherlands, Coll grave 20.C.1-3.

SOURCES: A, B, C, D, E, F, G, J, L, M, N, 2C, 2D, 4B, 6G, 7C, 8X, 8Y, 10B, 10U, 10V

QUINN, James Edward (#R/90077)

James Edward Quinn led an active life before he enlisted in the RCAF in January 1941. He impressed officers with his confidence and knowledge and was assessed as being *bright and very enthusiastic*. The Air Gunner from Sarnia lived up to their words. He flew many missions over enemy territory until his Lancaster was shot down nearly two years after he enlisted. James, 21, perished in the crash and Sarnia honoured him fifty years later by naming Quinn Drive in his honour.

James Quinn was born in Sarnia General Hospital on December 6, 1921, the eldest son of William Edward (born in Mooretown, Ontario) and Marjorie Jean (nee Raeburn, born in Port Franks, Ontario) Quinn. William and Marjorie Quinn were blessed with nine children together: daughters Dorothy Isabella (born 1913); Marjorie Jean (born 1916); Mary Louise (born 1931); Katherine Ann (born 1935); and Frances Emma (born 1938). They also had four sons: James Edward; David Gerald (born 1924); William Donald (born 1927); and Maurice Allen (born 1929). The Quinn family lived at 364 Shepherd Street, and William supported his large family working as a boilermaker at Imperial Oil in Sarnia.

James attended Wellington Street public school in Sarnia from 1927 to 1935, and then Sarnia Collegiate from 1935 to 1940-41. His high school years were busy. He took general technical courses and specialized in drafting and was very active in tennis, basketball and baseball. James participated in hockey and sport shooting and found time to enjoy such hobbies as model building, woodworking and hunting. While at Sarnia Collegiate, he was also a member of the Cadet Corps for five years with the rank of Sergeant-Major. He was at one time a carrier boy for the *Canadian (Sarnia) Observer* and, before enlisting, was employed at the Imperial Theatre in Sarnia as a doorman (night duty, as he was still a student) for a year and a half in 1939 to 1941.

Nineteen year-old James Quinn enlisted in the Royal Canadian Air Force on January 28, 1941 in London, Ontario. He stood five feet eight and a half inches tall, had blue eyes and dark brown hair, was single, and was

residing at home with his parents on Shepherd Street at the time. He requested flying duties with a preference to be an air gunner. After the war, he planned to take up drafting. The Recruiting Officer in London wrote of James, *Smart country youth, very quick and keen... Will develop rapidly under training and should make excellent air gunner material. Well dressed, clean, bright and very enthusiastic, will measure up I'm sure.*

From #2 Manning Depot in Brandon, Manitoba, James Quinn received his air training at #3 Service Flying Training School (SFTS) and then at #2 Wireless School (WS), both in Calgary, Alberta. He was then stationed at #7 Bombing and Gunnery School (B&GS) in Paulson, Manitoba and later at Composite Training School (KTS) in Trenton, Ontario. The Chief Instructor at #7B&GS wrote of James, *Confident and alert, keenly interested and thinks for himself. Has a good basic knowledge of subject.* From November 11th to 23rd, 1941, James spent his 12-day pre-embarkation leave with his parents and friends in Sarnia. In early December 1941, he was posted to #1 Y Depot RAF Trainees Pool in Halifax, where he celebrated his 20th birthday.

James Quinn embarked overseas from Halifax for the United Kingdom on December 9, 1941. From #3 Personnel Reception Centre, James continued his air training in the U.K., at #7 Air Gunnery School (AGS) at RAF Stormy Down and then at #19 Operational Training Unit (OTU) at RAF Kinloss. On June 4, 1942, he became a member of RAF #106 Squadron "Pro Libertate" (For freedom), part of **Bomber Command**, with the rank of Warrant Officer Class II, Air Gunner.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

When the war began, RAF #106 Squadron was a training unit, based at RAF Cottesmore, and equipped with Handley Page Hampden and Avro Anson aircraft. In September 1940, the squadron became an operational bomber squadron which was carrying out mine-laying duties, before joining the strategic bombing campaign over Germany. The squadron operated from a number of bases over the course of the war, including RAF Finningley, Coningsby, Syerston and Metherringham. Early in 1942, RAF #106 became one of the small number of squadrons equipped with the flawed Avro Manchester. By May 1942, the much superior Avro Lancaster began to arrive that the squadron used until the end of the war.

Warrant Officer II-Air Gunner James Edward Quinn

James flew in seventeen bombing operations in a number of Lancaster Bombers as a tail gunner. The majority of the missions took place at night and ranged from seven to ten hours of flying time. Targets included locations mostly in Germany--Bremen, Wismar, Aachen, Osnabruck, Cologne, Hamburg and Mannheim; however, Le Creusot, France was targeted as were Genoa, Milan, Turin in Italy. In a collection of letters James wrote to his father, he indicated that he took part in almost thirty raids over enemy territory and was slated for furlough to Canada

soon. He described raids over Italy and Germany, including the historic raid in late May 1942 that blasted the historic city of Cologne. The attack on the night of May 30/31, 1942 on Cologne was the first ever “Thousand Bomber Raid.”

Nearly eight months later, on January 13, 1943, Warrant Officer II-Air Gunner James Quinn took part in what would be his final mission. He was aboard Lancaster I aircraft W4261 (markings ZN-C) that took off from RAF Syerston. The Lancaster was on a night bombing raid targeting Essen, Germany. Unfortunately, the aircraft was shot down over Dusseldorf, Germany and the entire crew was killed. Perishing with James Quinn were Warrant Officer’s Maurice Andrew Phair, Russell C. Zavitz, and Joseph Aleo; and Pilot Officer Duncan Hugh Alexander Dewar. Two of the crew, not Canadians, were initially reported missing but later killed in action: F/S Leslie William Cronk (RAFVR) and Sgt. George Ernest Patrick O’Connor (RAFVR).

Not long after the crash, William and Marjorie Quinn in Sarnia received a telegram from the R.C.A.F. Casualty Officer informing them that their son, WO JAMES EDWARD QUINN WAS REPORTED MISSING AFTER AIR OPERATIONS. He had been reported missing a few days after British and Canadian air forces staged a devastating raid on Essen, Germany. Several days later, the Quinns received another telegram from the Casualties Officer of the R.C.A.F. in Ottawa with a message that the International Red Cross Society received information from German sources indicating that Flight Sergeant Quinn had been killed in the Essen raid. German information had stated that Flt. Sgt. Quinn was shot down over Essen on January 13 and was buried at Military Burial Field in North Dusseldorf, Germany, on January 18. The R.C.A.F. Casualty Officer said that further information would follow in a letter.

After a time when no further information was received, William and Marjorie continued to live in the hope that their son James was still alive, that he may have escaped and was confined as a prisoner of war in Germany. Some time later, William and Marjorie received a telegram informing them that their son James, PREVIOUSLY REPORTED MISSING AFTER AIR OPERATIONS NOW FOR OFFICIAL PURPOSES PRESUMED DEAD OVERSEAS.

In mid-November of 1944, William and Marjorie Quinn received word that their son James Edward was promoted from Flight Sergeant to Warrant Officer in the autumn of 1942. Six months later, in May 1945, they received a War Service Gratuity of \$344.92 for the loss of their son James. James Quinn, 21, was originally buried in Grave No. 202, Section 111, in the Military Cemetery at Dusseldorf, Germany. His remains were later carefully exhumed and reverently reburied in the Reichswald Forest War Cemetery, Kleve, Germany, Grave 8.G.13. Quinn Drive in Sarnia is named in his memory.

RAMESBOTTOM, Edward (#A/2858)

Edward Ramesbottom had a younger brother who served in the Great War and died as a result of his service. Approximately twenty years later, fifty year-old Edward, with a son serving in the navy, decided to serve his country. He would die less than three years later of natural causes while serving in the Royal Canadian Naval Reserve during the longest continuous campaign of the war.

Edward Ramesbottom was born in Byng Inlet, Parry Sound, Ontario on March 25, 1888, the son of Jonathan and Mary Jane (nee Pilon) Ramesbottom. [Note: The 1891 census records Edward’s birth year as 1883. However his Death Certificate, Circumstances of Casualty Card and gravestone record his birth year as 1888]. Jonathan (born 1846 in Weston, Ontario, a mill labourer) and Mary Jane (born 1860 in Algoma, Ontario) Ramesbottom were blessed with twelve children together: Robert (born 1875); John (born 1876); James (born December 1877, died 1938, buried Lakeview Cemetery, Sarnia); Mary-Margaret (born 1881); Percival (born 1885); Jennie (born March 1890, died 16 days later); Edward; Leah (born 1891); Harvey (born 1893); Earl Ernest (born March 28, 1896); Lola (born 1899); and Gertrude (born 1900). In March 1911, when Edward was 23 years old, he lost his father to heart disease. Seven years later, in 1918, he suffered the loss of his mother Mary Jane. Both Jonathan and Mary Jane Ramesbottom are buried in Byng Inlet, Parry Sound.

Edward’s younger brother Earl Ramesbottom served in the Great War. At the age of twenty, Earl (born in Parry Sound) enlisted in the Canadian Over-Seas Expeditionary Force on July 27, 1916 in Parry Sound, becoming a member of the 162 Battalion. He recorded his next-of-kin as his mother, Jane, in Byng Inlet. He stood five feet five and a half inches tall, had gray eyes and dark hair, was single and living in Byng Inlet at the time. He was employed as a lumber inspector in the lumbering trade. He was transferred to the 234th Battalion in Toronto in November 1916. Nine months after enlisting, he sailed from Halifax in mid-April 1917, arriving in Liverpool on April 29.

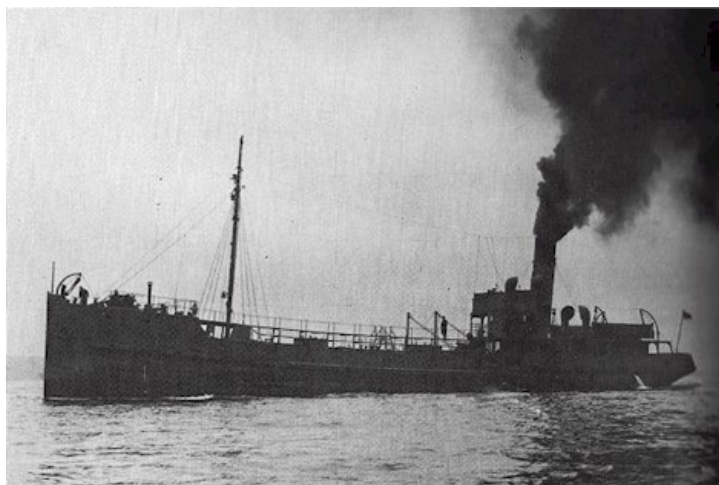

Five weeks later, on June 7, 1917, Earl Ramesbottom arrived in France becoming a member of the Infantry, 75th Battalion with the rank of Private. On several occasions in the latter part of 1917 he was treated for a painful, chronic ear infection. Nine months into the new year, on September 30, 1918, he was seriously wounded during the Battle of Cambrai. He was unconscious lying on the field for 24 hours before being admitted to #33 Casualty Clearing Station “dangerously wounded” by a gun shot wound to the head (frontal region of his skull). He was operated on the first time in France and then sent to England. He was operated on again, treated and remained in various hospitals there until being invalided back to Canada in February 1919. On arrival, he was admitted to Spadina Military Hospital in Toronto and was eventually discharged from St. Andrew’s Military Hospital in mid-September 1919. He was discharged from the CEF as “medically unfit” on September 18, 1919 in Toronto. Only one-and-a-half years later, on March 17, 1921, Earl Ramesbottom died in Davisville Hospital, Toronto, the result of his military service. He is buried in Byng Inlet, Parry Sound.

On September 29, 1913, twenty-five-year-old Edward Ramesbottom, a marine engineer residing in Kenora at the time, married twenty-three-year-old Marion Hutchinson in Kenora, Ontario. Marion, the daughter of Frank and Annie (nee Heslop) Hutchinson, was born in Southport, England, and had immigrated to Canada in 1911, initially residing in Ottawa. Edward and Marion Ramesbottom had only one child together, a son, John Edward, born in 1915. At some point, the Ramesbottoms moved to Sarnia. In 1921, the Ramesbottom family were living at 192 Lochiel Street, and later moved to 150 Talfourd Street, Sarnia.

Years later, their son John Edward, would be employed for a time on Great Lakes ships. John Edward also served in World War II, joining the Royal Canadian Navy, and attaining the rank of Chief Stoker. In October 1940, Petty Officer John Edward Ramesbottom was transferred from *HMCS St. Francis* to *HMS Eyebright*. So for a time, both father Edward and his son John Edward were serving in the Royal Canadian Navy at the same time.

Prior to enlisting, Edward Ramesbottom was employed as a marine engineer on a Standard Oil tanker, and before that, he had been on the *SS Maplecourt*, which operated out of Sarnia for a time. The *SS Maplecourt* was well known in this city--it was owned by United Towing and Salvage Company Limited which had a branch in Sarnia. In May 1940, the 3,388 ton steam merchant vessel left Sarnia for overseas service. In early February 1941, on its way from Montreal to Preston, England, the *Maplecourt* was torpedoed and sunk by a German submarine in the North Atlantic. Her entire crew of 37 was lost. Though none of the crew on board were from Sarnia, the attack on the *Maplecourt* made big news in Sarnia.

Edward Ramesbottom joined the navy, becoming a member of the Royal Canadian Naval Reserve. Beginning on the opening day of the Second World War, the **Battle of the Atlantic** would be the longest continuous campaign of the war, and one in which Canada played a central role. The Royal Canadian Navy, along with the Royal Canadian Air Force (RCAF) and Canada’s Merchant Navy, played a vital role in defending the country’s eastern coast and escorting convoys of ships carrying men and essential machinery, arms, fuel and basic resources between North America and Europe.

HMCS Moonbeam

Edward was in the navy for 2 ½ years, and at sea all that time. His last post was as Chief Engine Room Artificer, Third Class, aboard the *HMCS Moonbeam*. The Quebec-built ship, originally the *M & F Hopper Barge No. 1*, was launched in 1913, later becoming the Department of Transport *D.M. Hopper Barge No. 1*. Early in the war,

she was acquired by the Royal Canadian Navy and renamed. The RCN acquired two Department of Transport hopper barges in December 1940, converting them to fuel oil carriers, commissioning them *HMCS Moonbeam* and *HMCS Sunbeam*. Based out of Halifax, they carried fuel oil for use on the east coast and at St. John's, Newfoundland. After the war, the *HMCS Moonbeam* would be sold in 1946 becoming the *Oakbranch*, and would be sold again in 1960, becoming the *B.L.L. 24*. It was eventually scrapped in 1971.

On December 25, 1942, Christmas Day, fifty-four-year-old Edward Ramesbottom of the RCN Reserve, died of natural causes aboard ship in St. John's, Newfoundland. Only days later, his wife Marion in Sarnia received a telegram from Ottawa informing her that her husband Edward had died suddenly. No particulars were given of the circumstances of his death, but the message stated that a letter would follow. When the message was received, their son John Edward of the R.C.N. was home in Sarnia on convalescent leave as the result of an injured hand.

Edward Ramesbottom, 54, is buried in Forest Road Anglican Cemetery, St. John's, Newfoundland, Plot 24 Section D, Grave 25. On his headstone are inscribed the words, EDWARD RAMESBOTTOM E.R.A. 3RD CLASS, RCNR A/2858 H.M.C.S. "MOONBEAM" 25TH DECEMBER 1942 AGE 54 SADLY MISSED BY WIFE AND SON. REST IN PEACE.

RAMSAY, Melvin Henry (#J/9904)

Melvin Henry Ramsay was a promising young barrister-at-law in Sarnia when he made the decision to serve his country. He would go on to serve in Ferry Command, delivering essential aircraft to the front line squadrons overseas. Thirteen months after marrying, and on his final trip before taking his Christmas leave and reuniting with his wife and family, his aircraft crashed in Iceland.

Melvin Ramsay was born in Sarnia on April 1, 1914, the youngest son of Percival (Percy) Earl and Jean Frances (nee Burr) Ramsay. Both born in Wanstead, Ontario, Percy and Jean were married on September 14, 1910, in Wyoming, Ontario. Percy and Jean were blessed with four children together: sons Robert Drummond (born March 20, 1912); and Melvin Henry; and daughters Dorothy Jean (born 1915); and Marion Earline Ramsay (born 1918). Percy supported his family working as a C.N.R. locomotive fireman, and the family lived at 147 Kathleen Street, and later 294 Mitton Street, Sarnia.

Tragedy struck the Ramsay family when Melvin was three years old—his father Percy was killed in a railway collision east of Hamilton on December 18, 1917. Melvin's older brother Robert would also serve in the war, becoming a Major in the Canadian Army and would also lose his life in service (see below). Melvin's sisters Dorothy Jean later became Mrs. Allan Douglas, of London, Ontario; and Marion Earline Ramsay became a teacher at Johnston Memorial School.

Melvin was educated at Lochiel Street Public School from 1921 to 1929 and then Sarnia Collegiate from 1929 until 1934. In his upper school year, he took courses in English literature and composition, history, algebra, geometry, physics, Latin, trigonometry and French. He was very active in athletics, particularly tennis and badminton, along with bowling, skating and swimming. He spent five years training in the Sarnia Collegiate Cadet Corps, and in the last year he was second in command of the corps. While at Sarnia Collegiate, he was also president of the Debating Club shortly after its inception, which then won the WOSSA Championship in 1933-34. Later he became president of the Alexander MacKenzie Club, an organization of young liberals interested in politics. From 1930 to 1934, Melvin worked part-time after school as a clerk, employed by W. Sole, druggist at Poles Drug Store in Sarnia.

After graduating high school in December 1934, Melvin Ramsay began his work to become a promising young "barrister-at-law". He was employed as a student-at-law with the firm Pardee, Gurd, Fuller and Taylor Barristers in Sarnia from 1934 to 1939. He attended Osgoode Hall Law School, Toronto for three years where he graduated with Honours in Law in 1939. While at Osgoode, he was also the president of the Gladstone Liberal Club. Melvin was called to the bar on September 21, 1939. He then joined the staff of the same law firm he had articulated with, as a barrister-at-law, continuing to practice law with them until he enlisted. H.M. Taylor, of H.M. Taylor, Barrister and Solicitor, Crown Attorney and Clerk of the Peace for the County of Lambton, wrote the following reference letter on behalf of Melvin, as part of his RCAF application:

The bearer of this letter Melvin H. Ramsay of Sarnia, Ontario, is well-known to me and I can recommend him as a proper man for enlistment in the Royal Canadian Air Force. He is a barrister practicing in the City of Sarnia and has been practicing here for one year and at this date is the Acting Crown Attorney of the County of Lambton.

He was born at the City of Sarnia and at the present time is twenty-six years of age, and has a splendid record as to character.

Following is a portion of another reference letter, this written by Harold Fuller, of Pardee, Gurd, Fuller and Taylor Barristers and Solicitors, on behalf of Melvin:

... During his employment here (1934 to 1939) he has always carried out his work in a proper and efficient manner. He is a man of the highest character, conscientious and with a good deal of ability and I have no hesitation whatever in giving him the very highest recommendation possible as a fit and proper person to become a member of the Royal Canadian Air Force.

Twenty-six-year-old Melvin Ramsay enlisted in the Royal Canadian Air Force on December 18, 1940 in London, Ontario. He stood five feet nine and a half inches tall, had brown eyes and brown hair, was single, and was living at home with his mother on Kathleen Street at the time. He requested flying duties, with a preference to be a pilot. The Recruiting Officer wrote the following in reference to Melvin, *This chap has everything, fine physique, splendid appearance, poise, culture, highly intelligent, forceful personality, aggressive fighter type, will make splendid Air Crew and has all qualifications for commissioned rank. Highly recommended.*

From #1 Manning Depot in Toronto and Auxillary Manning Depot in Picton, Melvin Ramsay received his air training at #31 Air Observer School (AOS) in Mount Hope; then at #1 Initial Training School (ITS) in Toronto; and at #6 Elementary Flying Training School (EFTS) in Prince Albert; followed by RCAF Station Trenton; then #5 Air Observer School (AOS) in Winnipeg; continuing at #7 Bombing and Gunnery School (B&GS) in Paulson, Manitoba; and then at #1 (Advanced) Air Navigation School (ANS) in Rivers, Manitoba. At #1 ANS on December 20, 1941, Melvin was awarded the A.W. Starrett Memorial Award for Proficiency in Navigation, along with his Air Observers Badge and commission as Pilot Officer. In mid-January 1942, Melvin received a 10-day leave. In February 1942, he continued his training at an advanced Navigation Reconnaissance Course at #31 General Reconnaissance School (GRS) in Charlottetown, PEI.

Flying Officer-Navigator Melvin Henry Ramsay

In mid-March 1942, Melvin Ramsay was transferred to #31 Operational Training Unit (OTU) in Debert, Nova Scotia. Three months later, he was attached to **RAF Ferry Command** at Dorval, near Montreal, Quebec. RAF Ferry Command formed in July 1941 to “ferry” aircraft from American and Canadian factories to the front line squadrons overseas. Aircraft were first transported to Dorval, and then flown to RCAF Station Gander in Newfoundland for the trans-Atlantic flight to the United Kingdom. The Command’s operational area was the north Atlantic, bringing the larger planes, the twin-engine and four-engine aircraft that had the range to fly over the ocean. This was pioneering work in 1940: the distance, inadequate navigation instruments, and frequent bad weather over the Atlantic were considered too much of a risk. The program became so successful that in 1941 a second route was created for smaller-range aircraft that called for re-fueling at bases in Labrador, Greenland and Iceland. A third route, the South Route, would link the U.S. to Egypt.

In March 1943, Ferry Command was reorganized when all ferrying functions were grouped under a single command, so Ferry Command became No. 45 (Atlantic Transport) Group of the RAF's Transport Command, still headquartered in Dorval. Once the planes were delivered overseas, the crews were flown back to Canada for the next run. Trans-Canada Airlines (TCA) bought a few Lancasters and modified them to carry passengers and freight. This was the forerunner of Air Canada and the company's first transatlantic flights. During the war, over 9,000 aircraft were ferried across the Atlantic to Allied fighter, bomber, maritime patrol and transportation squadrons.

Melvin Ramsay made his first trip across the Atlantic in mid-July 1942. In one of his August 1942 trips flying new bombers across the Atlantic, he was able to meet up with his older brother Robert in England.

During his annual 14-day leave in late October-early November 1942, Melvin Ramsay married Dorothy Lorraine Brittain in London, Ontario on October 31, 1942. Dorothy Lorraine, was the only daughter of Mr. and Mrs. Frank Brittain, of London, formerly of Sarnia. Dorothy was employed at Canada Trust Company in London. In order to receive the required "military permission" to marry, Melvin submitted the following reference letter written by the Canada Trust Company on behalf of Dorothy Brittain: *Miss Dorothy Brittain has been in the employ of this Company for several years, and at all times has been very highly regarded. I have always been impressed with the fine moral character of Miss Brittain, and have no hesitation in recommending her as a young lady of the highest standards in every respect.*

After their marriage, Melvin and Dorothy lived in an apartment on Queen Mary Rd. in Montreal. Melvin soon returned to duty, ferrying aircraft across the ocean. In mid-September 1943, on another 14-day leave, Melvin was able to visit his family and friends in Sarnia. On October 10, 1943, he attained the rank of Flying Officer-Navigator, as a member of the newly reorganized Ferry Command RAF No. 45 Group (Atlantic Transport). Late in 1943, Dorothy Ramsay joined her parents at their home at 181 Devonshire Avenue in London, Ontario. She was there to celebrate Melvin's upcoming Christmas homecoming.

On December 18, 1943 in Iceland, Melvin Ramsay was the navigator in a Mitchell aircraft FW165. This was Melvin's final trip before taking his Christmas leave. At the end of the flight, the Mitchell aircraft crashed into marshy ground two miles north-west of the airfield at Reykjavik, Iceland. Perishing with Melvin Ramsay was Captain W.V. Walker of Ingersoll and another occupant.

Several days later, his widowed mother Jean Ramsay in Sarnia received an official telegram from Ottawa informing her that her son, FLYING OFFICER MELVIN H RAMSAY WAS REPORTED MISSING WHILE FLYING FROM CANADA TO ENGLAND AS A MEMBER OF THE RAF FERRY COMMAND. One day later, Melvin's wife Dorothy in London received a telegram from Ottawa informing her that her husband, MELVIN RAMSAY HAS BEEN OFFICIALLY REPORTED KILLED AND THE BOMBER IN WHICH HE WAS FLYING AND THE BODIES OF THE CREW HAVE BEEN FOUND WHERE THEY CRASHED IN ICELAND ON DECEMBER 18.

In December 1943, a few days before Christmas, Dorothy received the following letter from a Flight Lieutenant, Personnel Staff Officer:

Dear Mrs. Ramsay,

It is with very deep regret that a telegram was sent to you yesterday informing you that your husband Flying Officer Melvin Henry Ramsay had been listed as missing believed killed. Please let me express the very sincere sympathy that all the personnel of this Group feel with you in your sorrow.

The aircraft on which your husband was navigator crashed near Reykjavik, Iceland at 3.10 p.m. Greenwich Hour Time on the 18th December 1943. It crashed into marshland and I am very sorry to say that there is no doubt that your husband and his companions were killed instantly. The forepart of the fuselage was buried in the marshland and despite all the efforts that have been made it has not so far been possible to recover your husband who has therefore been listed as missing believed killed. Immediately any further information is received a telegram will be sent to you giving all the information available.

The cause of the accident has not so far been ascertained and this is being investigated by an official Court of Inquiry. If there are any other matters of any description of which I can be of assistance to you please do not hesitate to write.

Flying Officer-Navigator Melvin Ramsay's death was later officially recorded as, *Killed in flying accident, overseas (Iceland)*. Melvin died three years to the day he enlisted in the air force and twenty-six years to the day after the death of his father Percy in a tragic railway accident. In February 1945, Dorothy Ramsay in London, Ontario,

received a War Service Gratuity of \$610.56 for the loss of her husband. Melvin Ramsay, 29, is buried in Reykjavik (Fossvogur) Cemetery, Iceland, Grave C48.6. On his headstone are inscribed the words, HUSBAND OF DOROTHY L. BRITAIN, SON OF PERCY & JEAN RAMSAY, SARNIA, CANADA.

At the time of Melvin's death, his widowed-mother Jean Ramsay was living at 147 Kathleen Avenue, Sarnia. Eight months after Melvin's December 1943 death, she would lose her second son, Major Robert Ramsay, who was killed while serving with the Canadian Army in France in August 1944. In November 1944, Jean Ramsay offered a Sarnia Collegiate Institute scholarship in memory of her two sons who lost their lives in the war. The Sarnia Board of Education gratefully accepted the gift of \$50, to be an annual scholarship in memory Robert and Melvin Ramsay. Both young men had graduated from the Collegiate Institute and both had belonged to the Central United Church. Mrs. Jean Ramsay expressed that she would like the annual gift to be awarded to the boy attaining the highest standing in any nine Sarnia Collegiate departmental exams.

RAMSAY, Robert Drummond (#1805)

Robert Drummond Ramsay had graduated as a mechanical engineer and was two years into his career with Canadian General Electric when he made the decision to serve his country. He achieved rapid promotions in the Army in recognition of his talent and duty. He sacrificed his life in action against the enemy during the battle to liberate France.

Robert Ramsay was born in Sarnia on March 20, 1912, the oldest son of Percival (Percy) Earl and Jean Frances (nee Burr) Ramsay. Both born in Wanstead, Ontario, Percy and Jean were married on September 14, 1910, in Wyoming, Ontario. Percy and Jean were blessed with four children together: sons Robert Drummond and Melvin Henry (born April 1, 1914); and daughters Dorothy Jean (born 1915); and Marion Earline Ramsay (born 1918). Percy Ramsay supported his family working as a C.N.R. locomotive fireman, and the family lived at 147 Kathleen Street, and later 294 Mitton Street, Sarnia.

Tragedy struck the Ramsay family when Robert was five years old— his father was Percy was killed in a railway collision east of Hamilton on December 18, 1917. Robert's younger brother Melvin would also serve in the war, becoming a flying officer-navigator in the Royal Canadian Air Force and would also lose his life in service (see above). Robert's sisters Dorothy Jean later became Mrs. Allan Douglas, of London, Ontario; and Marion Earline Ramsay became a teacher at Johnston Memorial School.

Robert Ramsay was educated at Lochiel Street Public School from 1918 to 1925 and then Sarnia Collegiate in 1925 until he graduated in 1930. Robert then worked at Imperial Oil Limited in Sarnia for four years. In 1934, he attended Queen's University at Kingston, Ontario where he obtained his Bachelor of Science degree, graduating as a Mechanical Engineer in 1938. While in Kingston, Robert was a member of the militia, Queen's University Contingent, Canadian Officers Training Corps--Artillery, attaining the rank of Second Lieutenant. Robert took a position with the Canadian General Electric Company in Peterborough and was employed there for two years as the assistant to chief engineer. He continued in the militia, a member of the 4th Field Battery, Royal Canadian Artillery with the rank of Lieutenant.

Twenty-eight-year-old Robert Ramsay enlisted in the Canadian Army on April 17, 1940 in Ottawa, Ontario. He stood five feet ten and a quarter inches tall, had blue eyes and dark brown hair, was single, and was living at 234 Reid Street, Peterborough, Ontario at the time. He began his training in Ottawa as a member of the No. 1 Artillery Holding Unit, Royal Canadian Artillery, with the rank of Lieutenant. After training there for less than two months, he embarked overseas from Halifax for the United Kingdom on June 9, 1940.

Initially posted to #1 Canadian Army Reinforcement Unit (CARU), and then #2 CARU, Robert continued his army training in the U.K. at Bordon Military Camp. He earned qualifications as a driver (motorcycle) and trained with #3 Anti-tank Regiment, where he was promoted to Captain. In July 1942, he was attached the 1st Canadian Army Head Quarters. In August of 1942, Captain Robert Ramsay was able to visit with his younger brother Melvin of the RCAF while he was also in England.

In March 1943, Captain Ramsay was a member of 7th Army Field Regiment, Royal Canadian Artillery. In May 1943, he attended a 16-week staff course at Camberly Military College. Standing highest among the Canadians, he received First Class honours while at the college in September 1943. He was promoted to the rank of Acting Major on October 8, 1943, becoming Chief of Staff to the Commander of the Royal Canadian Artillery (RCA) attached to Head Quarters 2nd Canadian Division.

Acting Major Robert Ramsay embarked from the U.K. on July 3, 1944, arriving in France two days later (one month after D-Day). The **Battle of Normandy** had begun for the Canadians with the June 6, 1944 D-Day landings at Juno Beach. After breaching the “Atlantic Wall” of “Fortress Europe”, Allied armies began their break out from the narrow Normandy bridgehead to carve out a foothold on the French mainland. It would take a whole summer of tenacious fighting, pushing against fierce and ruthless German forces to advance east across France. In a brutal campaign of attrition, the Canadians faced fierce battles and vicious counterattacks as they clawed their way forward liberating villages and towns including Bretteville, Carpiquet, Caen and Falaise.

After the Allied breakout from Normandy, Canadian forces were assigned the “**Long Left Flank**”. This offensive included the less glamorous but vital tasks of clearing coastal areas in the north of France and Belgium of German occupiers; opening the English Channel ports for supplies essential to the Allied advance; and capturing the launching sites of German V-1 rockets. In a series of stop-and-start advances against stiff resistance in fortified positions, the Canadians liberated ports and villages including Rouen, Dieppe, Dunkirk, Boulogne and Calais.

In mid-August 1944, Robert Ramsay was promoted to the rank of Major. He served with the 7th Army Field Regiment, Royal Canadian Artillery as they advanced through Normandy and into the Long Left Flank of France. Less than three months after arriving in France, Major Robert Ramsay lost his life in battle. On August 31, 1944, he was killed in action during the fighting in Rouen, France. Robert Ramsay’s remains were originally buried at a location recorded on the Army Field Service Card as “France M.R. 223089 near Rouen”. His remains were later carefully exhumed and reverently reburied in Calais Canadian War Cemetery.

Major Robert Drummond Ramsay

His original burial location near Rouen

In early September 1944, his widowed mother Jean Ramsay in Sarnia received a telegram from Ottawa informing her that her eldest son, MAJOR ROBERT RAMSAY WAS KILLED IN ACTION IN FRANCE ON AUGUST 31. Beyond the fact that her son went to France early in July, she had no further indication of where he might have met his death. Eight months prior to Robert’s August 31, 1944 death, Jean Ramsay lost her first son, RCAF Flying Officer Melvin Ramsay, who had been killed in a flying accident in Iceland in December 1943. Major Robert Ramsay’s death was later officially recorded as, *Overseas casualty, killed in action, in the field (France)*.

In October 1944, Jean received the following letter from the Major-General, Adjutant-General:

Dear Mrs. Ramsay:

It was with deep regret that I learned of the death of your son, Major Robert Drummond Ramsay, who gave his life in the Service of his Country in the Western European Theatre of War, on the 31st day of August, 1944.

From official information we have received, your son was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

In November of 1944, Jean Ramsay offered a Sarnia Collegiate Institute scholarship in memory of her two sons who lost their lives in the war. The Sarnia Board of Education gratefully accepted the gift of \$50, to be an annual scholarship in memory Robert and Melvin Ramsay. Both young men had graduated from the Collegiate Institute and both had belonged to the Central United Church. Mrs. Ramsay expressed that she would like the annual gift to be awarded to the boy attaining the highest standing in any nine Sarnia Collegiate departmental exams.

In July 1945, Jean Ramsay received a War Service Gratuity of \$1512.07 for the loss of her second son to war, Robert. In May 1946, she received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Madam:

Information has just been received from overseas that the remains of your son, Major Robert Drummond Ramsay, have now been carefully exhumed from the original place of interment and reverently reburied in grave 7, row C, plot 8, of Calais Canadian Military Cemetery, St. Inglevert, France. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

Major Robert Drummond Ramsay

Major Robert Ramsey was posthumously awarded the decoration: Mention in Despatches, the award stating, *The King has been graciously pleased to approve the award of Mentions in Despatches in recognition of gallant and distinguished services.* In September 1946, Jean Ramsay wrote the following letter to the Director of Records, Department of National Defence in Ottawa:

Dear Sir,

I would like to acknowledge receiving the Certificate denoting that my son, Major Robert D. Ramsay, was mentioned in despatches. Thank you for forwarding this certificate to me. I also want to take this opportunity to thank the Department of National Defence for the fine way they looked after my late son's effects. Also all the letters of sympathy from the Department, and those that came through the Department, also photographs sent to me at different times. I do appreciate all this.

Robert Ramsay, 32, is buried in Calais Canadian War Cemetery, Leubringhen, France, Grave 8.C.7. On his headstone are inscribed the words, THEY SHALL RECEIVE A GLORIOUS KINGDOM.

RICHARDS, Charles Valentine (#A/20124)

Just shy of his 24th birthday and leaving his job at Imperial Oil, Charles Valentine Richards enlisted to serve his country one week before it officially entered the war. He served for 4 ½ years in Canada, the United Kingdom and across the Northwestern European theatre of war. He lost his life while fighting during the liberation of Holland, just two months before the war in Europe ended.

Charles Richards was born in Sarnia on September 12, 1915, the youngest child of William and Maud Charlotte (nee Punchard) Richards, both born in Devonshire, England. William, a farmer, immigrated to Canada in 1905, and Maud immigrated to Canada in 1906. William and Maud were married in Cathcart, Brant County, Ontario on August 30, 1906. They had four children together: Charles Valentine; Edith Kathleen (born 1907); William George (born 1909); and Harry John (born 1913). The Richards family moved to Sarnia sometime between 1911 and 1913 and lived at 152 John Street. William Richards supported his family working as a brakeman. On August 4, 1930, one month before Charles' fifteenth birthday, he lost his mother Maud, who died at the age of fifty.

Charles graduated from Sarnia Collegiate in 1934. He was very active in the work of St. John's Anglican Church, Devine St., being secretary of the Sunday school for some years and being an active member of the Dramatic Club. Charles was also an active member of the old Sarnia Drama League in its heyday before the war. Prior to the war, Charles was employed for several years at Imperial Oil Company as a laboratory assistant. He was also a member of the Non-Permanent Active Militia (N.P.A.M.) for six years, and was qualified as a Sergeant, Infantry and Engineering.

One week before his twenty-fourth birthday, Charles Richards enlisted for active service in the Canadian Army on the first day of mobilization, September 4, 1939, in Sarnia. One week later, Canada officially entered the war against Germany. Charles stood five feet eight and a half inches tall, had blue eyes and light brown hair, was single, and was living at home with his widowed father on John Street at the time. As a member of the 11th Field Company, Royal Canadian Engineers (R.C.E.), Charles trained in Sarnia and London, attaining the rank of Acting Lance Sergeant.

Charles embarked overseas from Halifax bound for the United Kingdom on August 8, 1940. He continued his training in Aldershot as a member of the 11th Field Company, R.C.E., Canadian Army. In mid-February 1940, he attained the rank of Lance Sergeant. In November 1942, Charles returned to Canada for further training, first to #1 District Depot in London. In December 1942, he was transferred to A6 Canadian Engineering Training Center (CETC) in Chilliwack, British Columbia, where he was appointed to the rank of Acting Sergeant. He continued his training in the new year at CETC Chilliwack and then Canadian Small Arms School (CSAS) in Nanaimo, British Columbia. In early July 1943, now with the rank of Sergeant, Charles was posted to No. 1 Transit Camp in Windsor, Ontario.

On August 28, 1943, Sergeant Charles Richards again embarked overseas from Canada bound for the United Kingdom. He was initially posted with #1 Canadian Engineers Reinforcement Unit (CERU), where he continued his training. By late September 1943, he was again a member of the 11th Field Company, Royal Canadian Engineers (RCE). In late June 1944, Charles Richards of the 11th Field Company, R.C.E. sailed from the U.K. to France and arrived there on June 27, 1944.

The **Battle of Normandy** had begun for the Canadians with the June 6, 1944 D-Day landings at Juno Beach. After breaching the "Atlantic Wall" of "Fortress Europe", it would take a whole summer of tenacious fighting, pushing against fierce and ruthless German forces to advance east liberating villages and towns across France. After the Allied breakout from Normandy, Canadian forces were assigned the "**Long Left Flank**". This offensive included the less glamorous but vital tasks of clearing coastal areas in the north of France and Belgium of German occupiers; opening the English Channel ports; and capturing the launching sites of German V-1 rockets (late August-early October 1944).

In early October 1944, the Canadians were entrusted with grueling task of liberating the Belgian-Dutch border estuary connecting Antwerp to the North Sea. The **Battle of the Scheldt** (early October-early November 1944) was among the most difficult and grueling struggles of the war. After that Battle, over the winter of 1944-1945, the weary Canadians were given a "rest", stationed along the **Nijmegen sector** in the Netherlands. However, the front was never quiet, with patrols and large-scale raids remaining constant.

In March 1945, the 1st Canadian Corps (which had been fighting in Italy) joined their comrades of the 2nd Canadian Corps (which had fought through France, Belgium, and Germany). For the first time in history, two Canadian Army corps fought together. The two Canadian Corps were tasked with the **Liberation of the Netherlands**, on two fronts--northeastern Holland and northern Germany, and Western Holland. This offensive was never easy, and many Canadians were killed in the Liberation.

Sergeant Charles Richards served with 11th Field Company, Royal Canadian Engineers as they moved across the Northwestern European theatre of war. The RCE troops enabled the army to move--they repaired and built

roads, airfields and bridges; cleared mines and road blocks; and filled in craters and anti-tank ditches; all while working alongside combat troops at the front and often under fire.

On March 18, 1945, Sergeant Charles Valentine Richards of the Royal Canadian Engineers, lost his life while fighting in Germany, during the Liberation of the Netherlands. Charles' remains were buried on the day he was killed at a location recorded on the Army Field Service Card as "Germany Canadian Temporary Cemetery at Bedburg, 932527 Calcar 4203 1/25,000". His remains were later carefully exhumed and reverently reburied in Groesbeek Canadian War Cemetery.

On March 22, 1945, Charles' father William in Sarnia received the following telegram from the Director of Records in Ottawa: REGRET DEEPLY A20124 SERGEANT CHARLES VALENTINE RICHARDS HAS BEEN OFFICIALLY REPORTED KILLED IN ACTION EIGHTEENTH MARCH 1945 STOP YOU SHOULD RECEIVE FURTHER DETAILS BY MAIL DIRECT FROM THE UNIT IN THE THEATRE OF WAR STOP TO PREVENT POSSIBLE AID TO OUR ENEMIES DO NOT DIVULGE DATE OF CASUALTY OR NAME OF UNIT. In late March 1945, a short memorial service for Charles Richards was held during the regular evening service at St. John's Church, Devine Street, Sarnia.

In early April 1945, William received the following letter from the Major-General, Adjutant-General:
Dear Mr. Richards:

It was with deep regret that I learned of the death of your son, A20124 Sergeant Charles Valentine Richards, who gave his life in the Service of his Country in the Western European Theatre of War on the 18th day of March, 1945.

From official information we have received, your son was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

In September 1945, William received the following letter from the Colonel, Director of Records, for Adjutant-General:
Dear Sir:

Information has now been received from the overseas military authorities that your son A20124 Sergeant Charles Valentine Richards, was buried with religious rites in a temporary cemetery located at Bedburg, approximately one and a half miles South-East of Cleve, Germany. Marked map is enclosed.

The grave will have been temporarily marked with a wooden cross for identification purposes and in due course the remains will be reverently exhumed and removed to a recognized military burial ground when the concentration of graves in the area takes place. On this being completed the new location will be advised to you, but for obvious reasons it will likely take approximately one year before this information is received.

In August 1946, William received another letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:
Dear Sir:

Information has just been received from overseas that the remains of your son, A20124 Sergeant Charles Valentine Richards, have been carefully exhumed from the original place of interment and reverently reburied in grave 11, row D, plot 5, of Nijmegen Canadian Military Cemetery, four miles South-East of Nijmegen, Holland. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

Charles Richard's death was later officially recorded as, *Overseas casualty, killed in action, in the field (Germany)*. Almost two months after Charles Richards' death, the war in Europe ended. In January 1948, widowed father William Richards received from the Director, War Service Records in Ottawa, a photograph of the grave and marker over the burial place in Holland of his youngest son Charles. Charles Valentine Richards, 29, is buried in Groesbeek Canadian War Cemetery, Netherlands, Grave V.D.11. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

RIDDOCH, George (#R/259938)

Days before his 19th birthday, George Riddoch made the decision to serve his country. In November 1944, his parents in Sarnia received a letter from him in which he spoke of plans for Christmas and the difficulties he was experiencing in finding suitable presents for his relatives. His final line was, "Oh, I lead a good life now." Tragically, he had lost his life a week earlier, while training for one of the most dangerous postings of the war.

George Riddoch was born in Aberdeen, Scotland on August 19, 1924, the second son of Andrew and Georgina (nee Harrison) Riddoch. Both born in Aberdeen, Scotland, Andrew Riddoch (born July 1889) and Georgina Harrison (born May 1899) were married in Aberdeenshire, Scotland on August 18, 1917. Andrew and Georgina Riddoch had nine children together: sons Andrew Jr. ("Andy", born 1918); George; John McKenna (born 1929); Gilbert Harrison (born 1931); Robert T. (born 1933); and daughters: Elsie McRae (born 1919, later Mrs. Neil Chalmers, 265 Cobden Street); and Jessie C. (born 1922, became a Corporal with the RCAF in Toronto). There were two other Riddoch children, but they died at an early age: James, born in Scotland in March 1920, died less than three months later; and Douglas, born in Sarnia in October 1934, was stillborn.

The Riddoch family immigrated to Canada when George was just nine months old. They departed from Glasgow, Scotland aboard the passenger ship *Letitia* and arrived at a port in Quebec on May 31, 1925. Patriarch of the family Andrew Riddoch recorded his occupation as farmer. The Riddoch family moved to Sarnia, living at 187 Cobden St., where Andrew supported his large family working as a labourer.

George Riddoch was educated at S.S. #17 Public School in Warwick, Ontario from 1930 to 1938, leaving after completing grade eight. He was active in hockey, rugby and swimming, and was a member of the Sea Cadets for one year. He then worked at a farm in Watford (B. McKay) in 1938-39, and then a farm in Sarnia (H. McEwen) in 1939-40. Finally, he worked as a service station attendant from 1940 to 1943, at Rakirk Service Station on the corner of Russell and Wellington Streets.

Just days before his 19th birthday, George Riddoch enlisted in the Royal Canadian Air Force on August 16, 1943 in London, Ontario. He stood five feet eight inches tall, had brown eyes and black hair, was single, and was living with his parents on Cobden Street at the time. He requested flying duties, hoping to be a pilot, but realizing his limited education, was willing to serve in any capacity with an air crew.

From #1 Manning Depot in Toronto, and then Technical Training School (TTS) in St. Thomas, George received his initial air training at #4 Bombing and Gunnery School (B&GS) at Fingal, Ontario; and then at #9 B&GS at Mont Joli, Quebec where he was awarded his Air Gunners Badge on February 25, 1944. He graduated as a Sergeant-Air Gunner. His Commanding Officer recorded that George was a, *Good type of student, states what he means clearly, has no difficulty in understanding. Willing to help others, shows good initiative.* In March, George continued his training at #3 Aircrew Graduate Training School (AGTS) in Three Rivers, Quebec. In April 1944, he was posted to #1 Y Depot in Lachine, Quebec.

Sergeant-Air Gunner George Riddoch

Nine months after enlisting, on May 3, 1944, George Riddoch embarked overseas from Halifax bound for the United Kingdom for further air training. Initially posted to #3 Personnel Reception Centre, he continued his training with #82 Operational Training Unit (OTU). On September 6, 1944, he was transferred to #61 (Training Base) with RCAF #1659 Heavy Conversion Unit at R.A.F. Station Topcliffe, England. With the introduction of new heavy bombers, the four-engine Stirling, Lancaster and Halifax, the Royal Air Force introduced heavy conversion units (HCU) in late 1941 to qualify crews trained on medium bombers to operate the heavy bombers before final posting to operational squadrons. Along with training recruits, some of the heavy conversion units carried out roles that included planting mines, patrolling for submarines, and bombing enemy targets.

RCAF #1659 Heavy Conversion Unit (HCU) formed at RAF Leeming in October 1942 as a Canadian conversion unit with the Handley Page Halifax, a four-engine heavy bomber. In March 1943, it moved to RAF Topcliffe. In November 1944, the unit received some Avro Lancasters.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in **Bomber Command** operations. Next to Britain itself, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war. There was no easy way to learn how to fly the heavy bombers, and training crews suffered a litany of disasters, crashes and deaths. By the end of the war, Bomber Command lost over 8,000 Allied airmen who were killed in training or by accidents alone.

Only five months after arriving overseas, on October 22, 1944, Sergeant-Air Gunner George Riddoch was part of a crew aboard a Halifax Mark V Bomber LL505 that was on a navigation cross-country training exercise. The aircraft took off from its base at Topcliffe, Yorkshire at approximately 1402 hours. The estimated time of arrival was 1909 hours, but at approximately 1900 hours, the aircraft was heard calling "DARK". The bomber had run into thick cloud and lost its bearings. Instructions were passed on to the aircraft to maintain 4000' and fly 090°. Though the message was received and acknowledged, the directions were not carried out. The aircraft was observed circling at very low altitude before it crashed into the hillside of Carris Hill at approximately 2015 hours (Carris Hill was near RAF Station Millom, Cumberland, Scotland).

A fighter was dispatched but arrived only in time to observe the crash. The Halifax aircraft burned and disintegrated on impact near Haverigg, Cumbria, England--the entire crew was killed. Sergeant-Air Gunner George Riddoch sustained multiple injuries and died. His remains were buried on October 28, 1944 in Chester Cemetery, Cheshire. Perishing with George Riddoch were F/O.s Robert Newton Whitley and John Armstrong Johnston; P/O. Frank Aubrey Bell; Sgt.s Calvin George Whittingstall, Harvey Ellsworth Pyche, and Donald Fraser Titt; and Sgt. William Brisbane Ferguson (RAF).

In late October 1944, Andrew and Georgina Riddoch on Cobden St., received a telegram from the Casualty Officer in Ottawa informing them that their son, SERGEANT GEORGE RIDDOCH HAS BEEN KILLED ON ACTIVE SERVICE ON OCTOBER 22. No other details were given. Andrew and Georgina presumed that their son was killed in an accident. In a letter that they had received the previous week from their son, George told them of flying in a Halifax bomber and intimated that he had not completed his training.

In early November 1944, Andrew and Georgina received the particulars of the flying accident in Britain that had cost their son's life. In a letter written by Air Vice Marshall J.A. Sully, he confirmed, with regret, that the Sarnia boy had been killed on active service. He revealed that George Riddoch was a member of the crew in an R.C.A.F. plane that crashed into a hillside near Millon, Cumberland County, England, during flying operations. The R.C.A.F. Officer stated; *I realize that this news has been a great shock to you and I offer you my deepest sympathy. May the same spirit which prompted your son to offer his life give you courage. You may be assured that any further information received will be communicated to you immediately.*

In the same week that they received the above letter from Vice Marshall Sully, the Riddochs also received a letter from their son George, dated October 20, and posted the next day, only 24 hours before he flew on the fatal mission. In it, George referred to mail from home, and spoke of plans for Christmas and difficulties he was experiencing in finding suitable presents for his relatives. He closed with the observation that it was about ten minutes to 10 p.m. and time for him to be heading for bed and a final line, "Oh, I lead a good life now. So-long for now."

In November 1944, Andrew received a letter from the Group Captain, Commanding No. 1659 RCAF

Conversion Unit. Following is a portion of that letter:

Dear Mr. Riddoch,

Before you receive this letter you will have had a telegram informing you of the very sad loss of your son, Sergeant George Riddoch.

Your son, along with a full crew, took off on a normal training exercise at 2.0 o'clock on the afternoon of October 22nd. They had been airborne and carrying out the exercise for over six hours when a message was received that the aircraft had crashed into a hillside. It has not yet been ascertained what caused the accident - death was instantaneous to your son and the rest of the crew.

Owing to the time taken to communicate under present conditions, it was not possible to ascertain your wishes regarding the funeral in the time available, and arrangements were, therefore, made for his burial without reference to you. I thought that you would like your son to be buried beside his comrades, who were buried at the same time, and I arranged accordingly. I am sure that you will understand the necessity for the action that was taken, and I sincerely trust that the arrangements we were able to make were what you would have wished.

The funeral took place at 1100 hours on Saturday October 28th at the R.A.F. Regional Cemetery in the City of Chester, county of Cheshire. The service was conducted by S/L E.L. Curry, Protestant Padre of R.C.A.F. 'R' Depot. Full Service honours were accorded. Officers and airmen were in attendance and the coffin was carried by aircrew personnel. A wreath was sent by the officers of this Unit as well as by the Sergeant's Mess. Your son's grandmother, Mrs. A. Riddoch, of New Machar, Aberdeenshire, was immediately contacted and notified of the funeral arrangements but she was unable to attend the ceremony. Photographs of the service are enclosed.

You will wish to know that all War Graves are taken care of by the Imperial War Graves Commission, who will erect a temporary wooden cross, pending provision of a permanent memorial. I am instructed to explain that the question of reinterment, if this were desired, could be considered only at the conclusion of hostilities...

May I now express the great sympathy which all of us feel with you in the sad loss which you have sustained. Your son, along with his crew, was just about to join an Operational Squadron. I sincerely believe that he had the makings of an excellent Air Gunner and I have no hesitation in saying that the crew as a whole, the members of which came from all parts of Canada and Scotland would have been outstanding.

Please believe me when I say that the sense of loss which you feel is shared by all of us. George was very popular with the other members of this Unit, and highly regarded by all. I can only say, in closing, how extremely sorry I am to have to write this letter to you. I hope you will find consolation in the fact that your son has sacrificed his life in the cause of Freedom, and in the service of his Country. If there is anything that I can do for you at any time, please do not hesitate to advise me.

George Riddoch's death was later officially recorded as, *Killed in flying accident, overseas (England).*

George Riddoch's funeral was held on October 28, 1944 at the R.A.F. Regional Cemetery in Cheshire, England. At the same time as George's funeral in England, a private service was held for relatives and close friends at his parents' Cobden Street home. Rev. James Milroy of Rogers Memorial Presbyterian Church, Toronto and the Rev. Charles E. Ficher of Corunna conducted the service. George Riddoch's citations include: Defence Medal, Canadian Volunteer Service Medal and Clasp, and War Medal 1939-1945.

A permanent memorial to the crew is set up at the crash site, where all eight crew members died. George Riddoch, 20, is buried in Chester (Blacon) Cemetery, Cheshire, United Kingdom, Section A, Grave 1028. On his headstone are inscribed the words, HE WILL NOT AGE HIS SONG IS SUNG AND HE REMAINS FOR EVER YOUNG. REST IN PEACE.

RIGBY, Robert Charles (#V/41295)

Robert Charles Rigby enlisted in the Royal Canadian Naval Volunteer Reserve (RCNVR) on July 2, 1942. One year after enlisting, he became an Ordinary Telegraphist aboard the Canadian destroyer *HMCS St. Croix*. On September 20, 1943, a torpedo from a U-boat sank the *St. Croix*. Only one crew member survived; the 147 men who perished on the *St. Croix*, including Robert Rigby, made it the heaviest single loss suffered by the R.C.N. in the war.

Robert Charles Rigby was born in St. Andrew's, Charlotte, New Brunswick on April 3, 1915, the only child of Robert Desbrisay Rigby Sr. and Charlotte Elvada (nee Worrell) Rigby. Robert Sr. and Charlotte Worrell were both born in New Brunswick, and were married in St. Andrew's, New Brunswick on September 18, 1907. In 1927, when Robert Jr. was twelve years old, the Rigby family moved from New Brunswick to Ontario.

Prior to enlisting, Robert Jr. completed his high school education at age eighteen and worked for six years as a builder's hardware salesman with Aikenhead Hardware on Temperance Street in Toronto. In 1942, the same year that Robert Jr. enlisted, his mother Charlotte passed away at the age of sixty-six in St. Andrew's, New Brunswick. Robert Rigby Sr. was employed by Anglin-Norcross Ontario Limited in Sarnia during the time his son Robert Jr. was serving in the war.

Twenty-seven-year-old Robert Charles Rigby enlisted in the Royal Canadian Naval Volunteer Reserve (RCNVR) on July 2, 1942 in Toronto. He stood five feet eight and a half inches tall, had blue eyes and fair hair, was single, and recorded his permanent address as St. Andrew's, New Brunswick. His post-war ambition was to either return to the hardware store in Toronto or become involved in marionette entertainment. Taken on at Divisional Strength at *HMCS York* (Toronto), Robert Jr. entered Active Service on October 10, 1942, where he received training at *HMCS York* until February 1943. He continued his training at *HMCS St. Hyacinthe* (Quebec) until mid-June 1943 where he advanced from Ordinary Seaman to Ordinary Telegraphist in March 1943. On June 16, 1943, he was transferred for further training to *HMCS Stadacona* where he was stationed until early July 1943. On July 8, 1943, one year after enlisting, Ordinary Telegraphist Robert Rigby became a member of the Canadian destroyer *HMCS St. Croix*.

Beginning on the opening day of the Second World War, the **Battle of the Atlantic** would be the longest continuous campaign of the war, and one in which Canada played a central role. The Royal Canadian Navy, along with the Royal Canadian Air Force (RCAF) and Canada's Merchant Navy, played a vital role in defending the country's eastern coast and escorting convoys of ships carrying men and essential machinery, arms, fuel and basic resources between North America and Europe.

Town Class Destroyer *HMCS St. Croix 181*

The Canadian Town Class destroyer *HMCS St. Croix (181)* operated in the North Atlantic. Aboard the same ship was Coder Joseph Griffiths Bell of Sarnia (included in this Project), and Stoker Second Class William Norman Roder of Arkona. The *St. Croix* was one of the "four-stacker" destroyers acquired by Great Britain from the United States Navy in September 1940, in exchange for sites for air and naval bases on British territory in the Atlantic area (she was formerly the *U.S.S. McCook*). The *St. Croix* and six other destroyers, transferred to the Royal Canadian Navy at the time, were manned immediately by Canadian crews and performed invaluable service on Atlantic convoy duty. Of note, one of those transferred destroyers was the *St. Clair*.

Despite repeated problems with minor equipment failures, the *HMCS St. Croix* had put to sea time and time again and distinguished herself in the early days of the Battle of the Atlantic. Guarding vital convoys and patrolling for German submarines, she was credited with two U-boat kills (*U-90* in late July 1942 and *U-87* in early March 1943) and picked up many survivors of German U-boat attacks on Allied ships. The *St. Croix* was to be the first of the destroyers to be lost. Not long prior to the sinking of the *St. Croix*, Robert Rigby was in Sarnia on leave visiting his father and friends.

In August 1943 *St. Croix* was transferred from the Mid-Ocean Escort Force (MOEF) to the Royal Navy's Western Approaches Command. Along with the RCN Town Class destroyer *St. Francis* and the RCN corvettes

Chambly, *Morden* and *Sackville*, the *St. Croix* became part of Escort Group 9, a support group of North Atlantic convoys. The support groups were designed to reinforce the close escort of endangered convoys or to hunt submarines in mid-ocean and kill them.

In mid-September 1943, Escort Group 9 was ordered to reinforce Escort Groups B 3 and C 2, which were guarding the westbound convoys ONS-18 and ON-202, respectively. ONS-18, the slower convoy, had sailed from the United Kingdom on September 13; the faster ONS-202 had departed several days later on a similar track and was now approaching the south of Iceland, just behind the first convoy. At sea, a patrol line of U-boats awaited.

On September 20, after the Admiralty picked up increasing signs of a German submarine concentration, they ordered the two convoys to merge, a combined assemblage of 63 merchant ships. As the convoys closed their gap, the escorts were picking up U-boat signals. Undoubtedly, the U-boats were gathering in large numbers and the wolf pack was maneuvering into position for a night attack. They were about to measure the success of their newest "secret weapon", the Gnat acoustic torpedo. Fired in the direction of the intended victim, the Gnat was designed to circle until it picked up the appropriate propeller noise, then hone in on it.

Escort Group 9 took up outer screening positions ahead and astern of the merchant ships, on the port (south) side of the convoy. Unfortunately, as the collection of escorts and merchant vessels headed west, fog and rain engulfed them. On the night of September 20, *St. Croix* was on station to the rear of the merging convoys when it was ordered to proceed farther astern to check out a possible U-boat sighting reported by an orbiting Coastal Command aircraft. In the gathering gloom, *St. Croix* turned eastward and headed back along the convoy track, zigzagging at 24 knots. As it approached the spot where the sighting was reported, her captain ordered the *St. Croix* to begin an asdic sweep.

At 9:51 pm, the German U-boat *U-305* struck the *HMCS St. Croix* with two Gnat torpedoes near her port propellers. With the two massive explosions, the ship glided to a stop and listed immediately and uncontrollably. To the British frigate *HMS Itchen*, a few miles away, *St. Croix* sent the cryptic message, "*Am leaving the office.*" It was the last word from the *St. Croix*. Seconds later, a third electrically directed torpedo, the final blow, hit the stern of the *St. Croix*. A tremendous explosion occurred, flames shot into the air, and within three minutes, the *St. Croix* was gone. Eighty-one members of her crew remained on life rafts and Carley floats, clinging to whatever they could.

Two RN ships from the escort force, the *HMS Itchen* and the RN corvette *Polyanthus*, rushed to the area, to see what had taken place and what could be done. The frigate *HMS Itchen* signaled: "*St. Croix torpedoed and blown up. Forecastle still afloat. Survivors in rafts and boats. Torpedoes fired at me. Doing full speed in vicinity. Will not attempt to P.U. survivors until Polyanthus arrives.*" But the RN corvette *Polyanthus* was herself torpedoed by *U-952* just after midnight. It sank rapidly with the loss of all hands save one. *Itchen* then had to become involved in attempting to locate the attacking U-boat. Later, in the foggy daylight of September 21, the *Itchen* was eventually able to pick up one *Polyanthus* survivor and 81 *St. Croix* survivors, but only after they had been in the very cold water for thirteen hours. Most of those lost had perished in the sea after abandoning the ship.

The few hours of rescue came to an ironic and bitter end two days later. On September 23, 1943 at approximately 2:00 am, the German U-boat *U-666*, using a Gnat torpedo, struck the *HMS Itchen*. Apparently hit in its magazine, the *Itchen* exploded with an ear-splitting roar and a spectacular display of pyrotechnics and then vanished into the sea. Only three men survived this time: two from the *Itchen* and one from the *St. Croix*, 23-year old Stoker William Allan Fisher of Black Diamond, Alberta. In total, 147 lives were lost from the *St. Croix*, including Ordinary Telegraphist Robert Rigby.

In October 1943, the sole survivor of the *St. Croix*, Stoker William A. Fisher, told his story in a newspaper account. Following is a portion of his account:

We were part of an escort detailed to a large convoy. We received a signal that submarines were about. We stayed astern of the convoy, but on September 20, we had come up and take on oil from a tanker in the convoy. On our way back to our position we saw a Canadian four-motored Liberator signaling us. We were told that they spotted a submarine and dropped depth charges. We flashed two boilers and made for the spot at 24 knots. As we neared, we had to reduce speed. As we slowed up we were hit in the screws. Fisher said there was no panic and no one thought of abandoning ship. But in two minutes another torpedo struck, this time near the mess deck, and water began to pour in. The captain, Lieutenant Commander Dobson, then issued orders to abandon ship.

Some men were injured by the explosions which followed the torpedoes; some were burned and cut. They were put in the motor launch before it was lowered over the side. The motor boat pulled away. Meanwhile attempts

were made to lower a 60-passenger oar-driven whaler... Carley floats were dumped over the side and the men began jumping into the water. *No one seemed worried then, many of the crew laughed that they would be due for 29 day survivors' leave.* The rowboat pulled away from the sinking destroyer, and picked men out of the water. *Even then I thought the ship would be saved. Then I saw the captain dive off the boat. I knew everyone was off then and that the captain had given up hope.*

Fisher was in charge of the motor boat. *No one in the boats died during the night. It was morning that everything happened. Men on the Carley floats insisted on getting into the rowboat. As the men got in, it settled lower in the water. Just before the rescue ship came along, it sank. The whaler did not have any injured men aboard. They were oil-grimed and cold. I saw men who were tough, big men. They hung out all night in the hope a boat would pick them up. Then when the boat did not come into view they died. I guess they couldn't hang out any longer. We dropped them into the sea.*

Sixty men were still alive on the whaler. The ship that headed to their rescue was the Royal Navy frigate *Itchen*, completed last September. As the frigate steamed through the lifting morning mist, the men in the whaler received the signal that the *Itchen* would come directly to their rescue. As the *Itchen* neared, a torpedo was seen to explode 30 yards to her stern. A message was flashed to the *Polyanthus*, a corvette of the Flower class, to come out of the convoy escort and circle the *Itchen* while the men were taken aboard. *The Polyanthus was just coming in and she was struck. I guess she went down in about 10 minutes. We rescued 10 men in our whaler. The Itchen headed for the convoy.... On September 2, two days after we were rescued, we were ordered to our action stations because submarines were around. We had three orders. The first started at 6 at night. There was another one at 7 and again at 9. At 9 o'clock I was standing beside the funnel when a torpedo struck. I was knocked 30 feet and landed against a gun platform. As I crawled toward the rail I kept yelling for my pal... He didn't answer and I jumped over the side. As I hit the water there was another explosion and I felt that my stomach was being squeezed through my ears. The water just cracked. When he reached down to tug off his boots, his left boot was missing. It had been blown off. Fisher grabbed a board and looked to see other men jumping from the ship. Most of them drowned. A Carley float drifted by and Fisher jumped on. During the night others jumped on, but most of them died.*

Last known photograph of the *St. Croix* ship's company
St. John's, Newfoundland May 30, 1943

Toronto Daily Star October 1, 1943

In late September 1943, widowed father Robert Rigby Sr. received a cable from the Navy informing him that his son, ROBERT CHARLES RIGBY, R.C.N., HAS BEEN REPORTED MISSING AT SEA. Soon after, Robert Rigby Sr., c/o Anglin Norcross Company, Sarnia, received a letter from the Secretary, Naval Board. Following is a portion of that letter:

Dear Mr. Rigby:

I deeply regret that I must confirm the telegram of the 28th of September, 1943, from the Minister of National Defence for Naval Services informing you that your son, Robert Charles Rigby, Ordinary Telegraphist, Royal Canadian Naval Volunteer Reserve, Official Number V-41295, is missing on war service.

According to the report received, your son is listed as missing, due to enemy action, while serving on Convoy duty in the Atlantic. For reasons of security further details of this incident of war cannot be released at this time. It is requested that you will regard as confidential anything beyond the fact of your son's loss on war service until such time as an official announcement is made, as this information might prove useful to the enemy....

While your son is listed as missing and virtually no hope can be held out for his having survived, Canadian Naval Authorities are unable to make an official presumption of death until a period of not less than three months has elapsed. If further information has not been received at that time, it is probable that official certification of death will then be made and you will be informed accordingly.

Please allow me to express sincere sympathy with you on behalf of the Minister of National Defence for Naval Services, the Chief of the Naval Staff, and the Officers and men of the Royal Canadian Navy, the high traditions of which your son has helped to maintain.

It was not until October 1, 1943 that the Honourable Angus L. MacDonald, the Minister of National Defence for Naval Services officially announced the sinking of the destroyer *St. Croix*. No details of the sinking were released, other than the list of names of 147 men who lost their lives, which included Surgeon-Lieutenant William Lyon MacKenzie King, nephew of the prime minister; Stoker Second Class William Norman Roder of Arkona; Coder Joseph Griffiths Bell of Sarnia (included in this Project); and Ordinary Telegraphist Robert Charles Rigby.

In late December 1943, Robert Sr. in c/o Anglin Norcross Co., Sarnia received the following letter from the Secretary, Naval Board:

Dear Mr. Rigby:

Further to my letter of the 27th of September, 1943, in view of the length of time that has elapsed since your son, Robert Charles Rigby, Ordinary Telegraphist, Official Number V-41295, Royal Canadian Naval Volunteer Reserve, was reported "missing" after the sinking of H.M.C.S. "ST. CROIX", and as no information has since been received of his having survived, the Canadian Naval Authorities have now presumed his death to have occurred on the 20th of September, 1943. May I again express the sincere sympathy of the Department in your bereavement.

Robert Rigby would later be officially recorded as, *Missing, presumed dead. He was serving on H.M.C.S. "St. Croix" which was lost on Convoy duty in the Atlantic, due to enemy action.* In September 1945, widowed Robert D. Rigby received a War Service Gratuity of \$106.00 for the loss of his only child, Robert Charles Rigby, in the sinking of the *HMCS St. Croix*.

The sinking of the *St. Croix* was the heaviest single loss suffered by the R.C.N. in the war. Within weeks of this incident, the Royal Navy and the Royal Canadian Navy began to equip their escorts with towed decoy devices to counter the homing torpedoes – the British used Foxer, and the Canadians utilized the simpler and lighter CAT gear – thus effectively neutralizing one of Germany's most important new innovations.

Robert Charles Rigby, 28, has no known grave. His name is inscribed on the Halifax Memorial, Nova Scotia, Canada, Panel 10. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

ROBERTS, Maurice James (#A/28520)

While overseas with the Royal Canadian Artillery, 3rd Anti-Tank Regiment, Gunner Maurice James Roberts met a young Englishwoman, fell in love and was engaged to be married. Sadly, the nuptials would never happen. Maurice was killed in a freak training accident in May 1944. Maurice, 23, left behind his grieving mother in Toronto and a distraught fiancée in England.

Maurice James Roberts was born in Brantford, Ontario on June 16, 1920, the only child of Herbert James and Doris May (nee Jefferies) Roberts. Herbert and Doris were married in Collingwood, Ontario on December 24, 1919, but things became unsettled between them by 1929. After ten years of marriage, Herbert left Doris and his nine-year-old son, Maurice. Herbert Roberts, a salesman, moved to Wolverly Bld. in Toronto, while Doris Roberts and Maurice resided at Cambridge Avenue and later Dearbourne Avenue in Toronto. Doris raised her son by herself. Maurice received his schooling in Collingwood, 1933-37 and Welland, 1937-39 Ontario, completing two years of technical school in 1939. Soon after, Maurice Roberts moved to Sarnia where he was employed as a grocery store clerk at Loblaw's Groceteria on North Christina Street (he recorded that he had been employed there for two years). He was helping to financially support his mother.

Twenty year-old Maurice Roberts enlisted in the Canadian Army on March 19, 1941 in London, Ontario. He stood five feet eleven and three-quarter inches tall, had brown eyes and dark brown hair, was single, and was residing at 176 ½ Front Street, Sarnia at the time. He recorded his next-of-kin as his mother Doris, on Cambridge Avenue in Toronto. After the war, he planned to return to his job at the grocery store in Sarnia, and possibly to undertake draughting (drafting).

From #1 District Depot in London, Maurice received his army training at #10 Basic Training Centre (BTC) in Kitchener, and at A2 Canadian Artillery Training Centre (CATC) at Camp Petawawa. In July 1941, Gunner Maurice Roberts was posted to Debert, Nova Scotia. He continued his training there as a member of the 3rd Anti-Tank Regiment, 94th Battery. Approximately seven months after enlisting, in early October 1941, Maurice embarked overseas from Halifax bound for the United Kingdom.

Maurice Roberts disembarked in Liverpool, England on October 6, 1941, as a member of the Royal Canadian Artillery, 3rd Anti-Tank Regiment, with the rank of Gunner. He continued his training and service in the U.K. and by November 1942, had risen in rank to Bombardier, stationed near Ringwood.

While in the U.K., Maurice met and fell in love with a British girl, who was in her early twenties. By the spring of 1944, they had even made plans to marry. Maurice applied to the military for permission to marry her, but the marriage, tragically, would not come to be.

During training that mid-spring of 1944, Bombardier Maurice Roberts was involved in a tragic vehicle accident and was killed while trying to save a comrade. On May 13, 1944, Maurice was killed in Romsey, Hampshire, England in a Mortar Carrier tracked vehicle accident that happened at approximately 13.30 hours.

An enquiry was held into the circumstances of the crash afterwards. Investigators determined the following facts about the accident: Maurice Roberts was the passenger in the tracked vehicle #C.T. 163562 (like a Bren Gun carrier) driven by another soldier (Gunner Doucett) travelling along the Southampton Road; the vehicle was part of a convoy that was travelling at a moderate speed of 15 to 20 m.p.h.; the qualified driver was a good driver but hadn't much experience in this type of vehicle; the road was clear and dry; about one mile out of Romsey while driving down a long fairly steep hill and taking a right hand bend, the driver saw a truck coming from the opposite direction; the driver applied the brakes causing the vehicle to swerve a little to the right; the driver steered to the left and the vehicle left the road on the left; the vehicle went through a hedge and momentarily balanced on the crest of a hidden steep embankment, before tipping over and falling down the slope, a drop of 20 feet; Maurice Roberts shouted to the driver to jump when the vehicle crashed through the hedge; Maurice Roberts went to jump out but came back for the driver as the carrier rolled over; the carrier rolled over twice and the two men were thrown out; an unconscious Maurice Roberts was brought by ambulance to the Camp Reception Station, Halterworth, Romsey in the Parish of Romsey Extra; he was bleeding, with weak pulse, and not breathing; Maurice Roberts died about forty minutes later (between 1410 and 1420 hours), evidence of cerebral hemorrhage and internal injuries consistent with his having been crushed by the heavy vehicle; death was due to loss of blood and shock subsequent to his internal injuries; the driver suffered a fracture of the right arm, dislocation of the right shoulder and other injuries; cause of accident was determined to be unknown.

One of the witnesses who gave testimony was the driver of the vehicle. Following is a portion of Gunner Regis Doucett's own words:

...I was driving a Carrier down a long fairly steep hill,, near Romsey. I was almost half way down the hill when I saw a truck coming from the opposite direction. I brought the carrier into my near side of the road and applied the brakes which caused the carrier to swerve a little to the right. I brought it back to the side of the road, but it went through the hedge and came to a standstill before it tipped over. Bombardier Roberts (the deceased) who was with me, shouted for me to jump when we crashed through the hedge.

He went to jump but came back for me and at the same time the carrier rolled over. It rolled over twice, we were thrown out the first time...

On May 14, 1944, Doris Roberts, then on Dearbourne Avenue in Toronto, received the following telegram from the Director of Records: REGRET DEEPLY A28520 BOMBARDIER MAURICE JAMES ROBERTS OFFICIALLY REPORTED DIED THIRTEENTH MAY 1944 DUE TO MORTAR CARRIER ACCIDENT WHILST ON DUTY STOP FURTHER INFORMATION FOLLOWS WHEN RECEIVED.

Maurice Roberts remains were buried on May 19, 1944 in Brookwood Cemetery, England. In late May 1944, Doris received the following letter from the Major-General, Adjutant-General:

Dear Mrs. Roberts:

It is with deep regret that I learned of the death of your son, A28520 Bombardier Maurice James Roberts, who gave his life in the Service of his Country in the United Kingdom on the 13th day of May, 1944.

You may be assured that any additional information received will be communicated to you without delay. The Minister of National Defence and the Members of the Army Council have asked me to express to you and your

family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

In late January 1945, the Colonel, Acting Director of Records, for Adjutant-General mailed a letter to the grieving Doris. Following is a portion of that letter:

Dear Madam:

With reference to the regretted death of your son, the marginally named, as you are probably aware his remains have been buried in grave 3, row B, plot 49, of Brookwood Military Cemetery, near Woking, Surrey, England.

The grave will have been marked with a temporary wooden cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, you may rest assured that before it is carried out you will be communicated with and given an opportunity of submitting a short personal inscription for engraving at the foot of the memorial...

Maurice Robert's death was later officially recorded as, *Overseas casualty, accident, crushed by a mortar carrier vehicle when it left the highway and rolled down an embankment. Cause of death was loss of blood and shock from internal injuries (England)*. Soon after Maurice's death, Miss Pitt, his fiancé, learned that she was pregnant with their child. The twenty-three-year-old was devastated at the loss of her future husband and her condition.

Among the items Maurice left behind were two diaries, a New Testament, 40 snapshots and two letters addressed to him yet unopened. In February 1946, Doris Roberts received from the Colonel, Director of Records, for Adjutant-General, a photograph of the grave and marker over the burial place in England of her only son. Maurice Roberts, 23, is buried in Brookwood Military Cemetery, Surrey, United Kingdom, Grave 49.B.3.

ROGERS, William John (#J/10753)

Anson and Ethel Rogers knew pain in their lives as the parents of two children. Their only daughter died when she was twelve and their only son, RAF pilot William John "Jack", was killed in an aircraft crash in January 1944.

William John (Jack) Rogers was born on November 1, 1918 in Galt (Waterloo County), Ontario, the only son of Anson Percival and Ethel (nee St. Clair) Rogers. Anson Rogers and Ethel St. Clair were both born in Galt, Ontario, and were married there on September 14, 1910. They had two children together: Helen Margaret, born in Galt in 1914 who was the older sister to William. Anson supported his family with his job as a knitter of textiles, but in the fall of 1926 tragedy struck the Rogers family. Jack's sister, Helen, passed away at the age of twelve on September 28, 1926.

Jack Rogers attended Fairfield Public School in Aldershot, Ontario from 1923 to 1931 and then Waterdown High School from 1931 to 1935. He was an avid sportsman who was active in skiing, rugby, baseball, tennis, swimming and basketball. His hobby was playing the piano. Jack was obviously a well-rounded individual who was adept in different disciplines and activities. At Bishop University in Lennoxville, Quebec, Jack obtained his three-year Bachelor of Science degree in 1938, where he majored in physics and chemistry. While at Bishop's, he was a member of the McGill University Contingent of the Canadian Officers' Training Corps (C.O.T.C.), 1936 to 1937 with the rank of Private.

Jack then attended the University of Toronto for two years where he obtained a Master of Arts degree in Chemistry in 1940. Shortly after, he became a member of the Canadian Institute of Chemistry and the American Chemical Society. While at U. of T., he enlisted with the Non-Permanent Active Militia and was a member of the U. of T. C.O.T.C. from October 1939 to March 1940. After successfully obtaining two university degrees, he went to work as a chemist from 1940 to 1941 with the Technical and Research Department of Imperial Oil Limited Refinery, Sarnia.

Twenty-two-year-old Jack Rogers enlisted in the Royal Canadian Air Force on July 21, 1941 in London, Ontario. He stood five feet eight inches tall, had blue eyes and brown hair, was single, and was residing at 256 London Road in Sarnia at the time (he recorded his permanent address as 160 Baldwin Ave., Coaticook, Quebec). From #4 Manning Depot in St. Hubert, and then #5 Auxiliary Manning Depot in Valcatier, Quebec, Jack received his air training at #3 Initial Training School (ITS) in Victoriaville, Quebec; at #17 Elementary Flying Training School (EFTS) in Stanley, Nova Scotia; and at #8 Service Flying Training School (SFTS) in Moncton, New Brunswick, where he finished first in a class of fifty-one. He was awarded his Pilot's Flying Badge on March 27, 1942 at SFTS in Moncton.

In April 1942, Jack was training at #1 General Reconnaissance School (GRS) in Charlottetown, PEI. The Chief Instructor at GRS Charlottetown recorded that Jack was, *Above the average. A very keen and conscientious pupil who has worked hard to obtain exceptional results. This Officer has been outstanding on the Course, due to his keenness and ability, strongly recommended for Flying Boats... A good Officer who will make a sound and reliable G.R. Pilot.* In early July 1942, Jack was posted to #31 Personnel Depot in Moncton for two weeks before being transferred to #31 (Coastal) Operational Training Unit (OTU) in Shelburne, and later Debert, Nova Scotia. In late October-early November 1942, Jack received his 14-day pre-embarkation leave. In mid-November 1942, he was posted to #1 Y Depot in Halifax.

Flying Officer-Pilot William "Jack" Rogers

In late November, Jack Rogers embarked overseas from Halifax and arrived in the U.K. on November 30, 1942 at RAF Station Feltwell. From #3 Personnel Reception Centre, Jack continued training and serving with a number of units and at a number of bases over the following fourteen months: at #1 (Coastal) Operational Training Unit (OTU) at RAF St. Thornaby; at #421 Squadron, RAF Redhill; at RAF Gosport, #48 Squadron; at 1509 Beam Approach Training Flight (1509 Bat Flt); at RAF Valley; and at RAF #3 General Reconnaissance School (GRS) at Squires Gate, Lancashire, England.

General Reconnaissance Schools trained pilots and air observers in the techniques required for ocean patrol, as conducted by **RAF Coastal Command**. Coastal Command played a pivotal role in the Allied war effort, most notably against U-boats during the Battle of the Atlantic, along with sinking enemy warships and merchant vessels, protecting Allied shipping from aerial attacks, reconnaissance and carrying out air-sea rescue.

General Reconnaissance Schools were the equivalent to an Operational Training Unit (OTU) and was the last stop before aircrew were assigned to operations. No. 3 GRS was equipped mainly with Blackburn Botha and Avro Anson aircraft and was concerned with maritime reconnaissance training. The Avro Anson was a British twin-engine, multi-role aircraft. There was no easy way to learn how to fly the heavy bombers and training crews suffered a litany of disasters, crashes and deaths. By the end of the war, over 8,000 Allied bomber airmen were killed in training or by accidents alone.

On January 22, 1944, Flying Officer-Pilot William "Jack" Rogers was the pilot of a crew aboard RCAF Anson I aircraft #EG321 that was on an air/sea rescue search. When returning to base, at approximately 12.50 hours, the aircraft crashed into a drainage dyke at Warton, Lancashire, England. The major part of the aircraft was submerged in the dyke and all three airmen aboard were killed, including Jack Rogers who sustained multiple injuries. Perishing with Flying Officer-Pilot Jack Rogers were Wireless Operator W.S.T. Wardrope (RAF) and Pupil Navigator R.M. Belpaire (Belgian). In the enquiry that followed into the circumstances of the crash, investigators determined that bad weather contributed to the crash and the aircraft went in under power with the starboard wing slightly down.

In late January 1944, Anson P. Rogers in Coaticook, Quebec, received the following letter from the Squadron Leader, R.C.A.F. Casualties Officer, for Chief of the Air Staff in Ottawa:

Dear Mr. Rogers:

It is my painful duty to confirm the telegram recently received by you which informed you that your son, Flying Officer William John Rogers, was killed on Active Service.

Advice has been received from the Royal Canadian Air Force Casualties Officer, Overseas, that your son, who was a member of the crew of an aircraft, lost his life during flying operations near Warton, Lancashire, England, at 12:50 P.M. on January 22nd, 1944. His funeral took place at 2:00 P.M. on January 26th at Sealand, Chester, England.

You may be assured that any further information received will be communicated to you immediately. May I take this opportunity to offer you and the members of your family my deepest sympathy.

Jack Roger's death was later officially recorded as, *Killed as a result of a flying accident (Overseas) near Warton, Lancashire, England.* In July 1944, Anson and Ethel Rogers in Coaticook, Quebec, received a letter from the Squadron Leader, Chaplain, R.C.A.F. "R" Depot, Warrington, Lancashire. The letter was in response to the Roger's request for photographs of their son's funeral, which had been sent previously, but they had not received them. The Chaplain was sending a second set, and added:

.... It is with deep regret that I learned that Jack (William) was your only child and having lost your daughter only a few years ago will, I am sure, only make it more difficult for you at this time.

Our Canadian boys are doing a very good job over here and I hope as you do that out of their sacrifice will come a world of peace and decency which will enable us to look back on them with thankfulness for what they are doing for us we can indeed be proud of the part they are playing. One thing is certain, they are giving us an opportunity to make a better world and the fault will be ours if we do not have it.

I trust the knowledge that Jack did his part will be a matter of satisfaction and consolation to you both.

In June 1945, Anson and Ethel Rogers received a War Service Gratuity of \$472.35 for the loss of their only son. William "Jack" Rogers, 25, is buried in Chester (Blacon) Cemetery, Cheshire, United Kingdom, Section A, Grave 946. On his headstone are inscribed the words, HE IS NOT DEAD BUT LIVES ON IN THE HEARTS OF HIS LOVED ONES. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

ROSS, John Douglas Carlisle (#J/41679)

John Douglas Carlisle Ross was Sarnia born and educated, the only brother to six sisters. He was killed two weeks before the war ended when his Halifax bomber collided with another Halifax bomber en route to a mission in Germany. John, 21, has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom.

John Douglas Carlisle Ross was born in Sarnia on September 1, 1923, the only son of John James and Martha Anne (nee Maxwell) Ross. John James Ross and Martha Anne Maxwell, both born in Durham, England, were married there on December 15, 1901. At some point the Ross family immigrated to Canada and resided at 252 Emma Street, Sarnia. John supported his family with his work as an electrical machinist in Sarnia. He had many mouths to feed, for Martha and he had seven children together--John Douglas and six daughters. The six girls later became Mrs. W. Walker (Wallaceburg); Mrs. E. Rowe (Detroit, Michigan); Mrs. W.R. McNeil (Detroit, Michigan); Mrs. D. Abrams (Toronto); Miss L. Ross (Sarnia); and Miss Jean R. Ross (Sarnia). Jean Ross also served during the war. She joined in July 1942 and became a Sergeant with the Canadian Women's Army Corps (CWAC). She embarked overseas on the same transport as her brother.

John Douglas Ross was educated at Devine Street Public School from 1929 to 1935 and then at Sarnia Collegiate from 1935 to 1942. He was an avid sportsman who was active in baseball, volleyball, tennis, bowling, basketball and swimming. After completing high school, John found work in Sarnia as a part-time clerk at Agnew Surpass shoe store from 1939 to 1942. He then worked as a carman's helper at C.N.R. for six months in 1942 and later as a Lab Helper (student) at Imperial Oil Company in 1942 for six months until he enlisted.

Nineteen year-old John Ross enlisted with the Royal Canadian Air Force on November 12, 1942 in Sarnia, Ontario. He stood six feet tall, had blue eyes and light brown hair, was single, and was residing at home with his parents on Emma Street at the time. After the war, his ambition was to attend college to become an apprentice in Tool and Dye making. He requested flying duties, eager to be part of an air crew. From #9 Recruiting Centre in London and then #2 Manning Depot in Brandon, Manitoba, John Ross received his air training at #20 P/A E.D.; and

at #7 Initial Training School (ITS), both in Saskatoon; at #7 Air Observer School (AOS) in Portage la Prairie; and then at #1 Aircrew Graduate Training School (AGTS) in late February 1944. In mid-June 1943, he was able to spend part of a 7-day leave visiting his parents and sisters on Emma Street in Sarnia before returning to duty. Eight months later, on February 11, 1944, John was awarded his Navigator Badge. Days later, he received his 14-day pre-embarkation leave.

John Douglas C. Ross

Sgt. Jean Ross, CWAC

On April 10, 1944, Flying Officer John Ross embarked overseas from Halifax bound for the United Kingdom. From #3 Personnel Reception Centre in the U.K., he continued his training at #8 (Observer) Advanced Flying Unit (AFU); at #86 Operational Training Unit (OTU) at RAF Gamston; and then at #22 Operational Training Unit (OTU) at RAF Wellesbourne Mountford. On March 8, 1945, John Ross became a member of RCAF #426 Thunderbird Squadron “On Wings of Fire”, part of **Bomber Command**, with the rank of Flying Officer-Navigator.

During the course of the war, one of this country’s most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

No. 426 Squadron was established at RAF Dishforth, Yorkshire, on October 15, 1942, as part of No. 4 Group. In January 1943, it was transferred to No. 6 (RCAF) Group. The squadron was equipped with Vickers Wellington aircraft to deliver bombs and mines to the enemy. In June 1943, the squadron transferred to RAF Linton-on-Ouse and switched to Avro Lancaster bombers. Later, in April of 1944, the squadron began to convert to Handley Page Halifax aircraft, four-engine heavy bombers that they used until the end of the war in Europe. The thunderbird crest used by the squadron originates from North American natives and, according to myth, signifies disaster and death to anyone on the ground who perceives it. No. 426 Squadron took part in many daring raids over enemy territory, including raids on Berlin, Leipzig and Frankfurt.

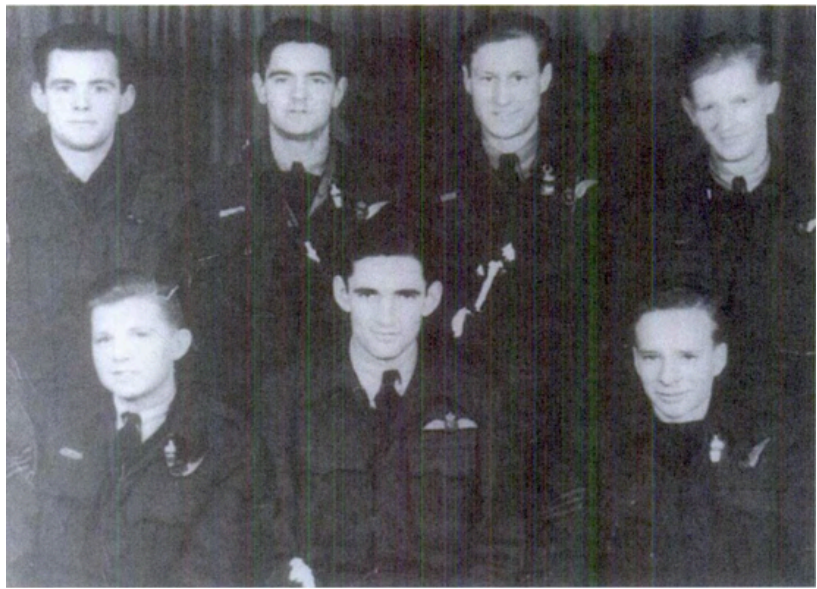

On April 25, 1945, John Ross was part of a crew aboard Halifax Mk. VII aircraft NP820 (markings OW-W) that took off at 15.04 hours from RCAF Station Linton-on-Ouse, Yorkshire. Circling the airfield for the last time, Halifax NP820 climbed to its designated flight altitude, and from there, followed the navigator’s course to Wangerooge. Along with some 482 aircraft (twenty from #426 Squadron), it was part of an operation to carry out a bombing mission on Wangerooge, Germany, intended to destroy coastal batteries that controlled the approaches to Bremen and Wilhelmshaven. During the flight to their target, the crew may have been preoccupied with rumours that were making the rounds that #426 Squadron might be back in Canada before summer was out. They were excited about the prospect of going home and seeing their families again.

Unfortunately, nothing further was heard from Halifax NP820 after it left its base. Airmen who returned from the mission reported that, about one hour from the target, Halifax NP820 was in a mid-air collision over the

North Sea with #408 Squadron Halifax aircraft NP796. F/L Mercer of #426 Squadron, an eyewitness flying in Halifax NP824 who saw the collision and watched the aircraft crash into the sea said of Jim Tuplin's aircraft (NP820), *When the plane over Jim's hit that air pocket, it crashed Tupp's kite into the North Sea. His Halley was on my right side, but we had to keep going to drop our bombs on Wangerooge. On the way back to England, we dropped low over the crash area and saw no survivors.*

F/O-N John Douglas Carlisle Ross

Crew of Halifax NP820

Back L/R: Reg Evans, Dennis Curzon, **John Ross**, Ronald Roberts
Front L/R: **Stanley Teskey**, James Tuplin, Earl Hicks

F/L Mercer who safely returned to base later wrote, *The accident on April 25 happened about 3:30 (p.m.). We went in and bombed and turned around, coming straight back to the accident. We were the first to notify air-sea rescue about it. There was nothing to be seen but two little rubber dinghies and bits of two aircraft. The flying boat (air-sea rescue) arrived about an hour and a half after the accident and whether they landed (on the North Sea), I am not in a position to say as they were not from our station.*

Less than two weeks after the crash, the Wing Commander of #426 Squadron wrote a letter to the wife of Jimmie Tuplin, one of the airmen of NP820. A portion of the letter read, *Your husband and his crew were detailed, along with other members of the squadron, to carry out an attack on enemy installations at Wangerooge, Germany. Before reaching their objective, other crews from the squadron saw your husband's aircraft collide with an aircraft from another squadron that also operates from this station. Both aircraft were seen to disintegrate in the air and crash into the sea. From the information obtained from other crew participating in this operation, I cannot hold very much hope for the survival of your husband and the members of his crew.*

Perishing with Flying Officer-Navigator John Douglas Ross were P/O.s Stanley James Teskey (also of Sarnia, and is included in this Project), James Chester Tuplin, Dennis Rupert Humphrey Curzon and Earl William Hicks; F/Sgt.'s Ronald Roberts (RAF) and Reginald Gordon Evans (RAF). All seven airmen in Halifax aircraft NP796 were also lost. Seven aircraft were lost on this operation and six of them were due to collisions, despite weather conditions being almost perfect. This was the last operation of the war for RCAF #426 Squadron.

On April 26, 1945, John Ross Sr. on Emma Street in Sarnia received the following telegram from the RCAF Casualties Officer; REGRET TO ADVISE THAT YOUR SON FLYING OFFICER JOHN DOUGLAS CARLISLE ROSS J FOUR ONE SIX SEVEN NINE IS REPORTED MISSING AFTER AIR OPERATIONS OVERSEAS APRIL TWENTYFIFTH STOP LETTER FOLLOWS. Two weeks after John's death, the war in Europe ended. John Ross' death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas (Germany).*

In mid-June 1946, John Sr. and Martha Ross received a War Service Gratuity of \$411.80 for the loss of their only son. In mid-February 1947, Martha received the following letter from the Wing Commander for Chief of the Air Staff in Ottawa:

Dear Mrs. Ross:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son, Flying Officer J.D.C. Ross. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

John Douglas Carlisle Ross, 21, has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom, Panel 279. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

RUSSELL, Ernest Frederick (#A/57044)

Ernest "Ernie" Frederick Russell, Sarnia born and raised, was a terrific athlete who planned to pursue gold mining when he returned from the war. Unfortunately, Ernie was killed in action during fighting on the "long left flank" on the border of France and Belgium. He was 24 when he died, five days shy of his 25th birthday. On his headstone in France are inscribed the words, ASLEEP IN JESUS.

Ernie Russell was born in Sarnia on September 12, 1919, the son of James Ernest and Annie May (nee Benstead) Russell. James Ernest Russell, a Providence, Rhode Island native, married Annie May Benstead, born in Deep St. Nicholas, England, on April 12, 1905 in Strathroy, Ontario. At some point, the Russell family moved to Sarnia and resided at 240 Essex Street. James Russell found work as a trainman here and fortunately he did, for Annie and he had ten children together. Joseph William (born 1906); James Herbert (born October 1917); and Ernie Russell were their sons. The birth of their seven daughters was spread out over fourteen years: Marion Marguerite (born 1907); Grace Adeline (born 1909); Agnes Jean (born 1910); Lillian Loreen (born 1913); Helen Louise (born 1915); Ruth A. (born 1916); and Anna Lois (born 1921). At the time of Ernie's death, six of his sisters were married and residing in Sarnia. They were known individually as Mrs. Joseph Simmons, Mrs. Ivan Wise, Mrs. Frederick Gray, Mrs. Maurice Edginton, Mrs. Orville Whitsitt, Miss Anna Russell, and Mrs. Robert Doyon who lived in Collingwood. Perhaps because she was only 23 when Ernie died, Anna was single in 1944.

Ernie's brother, James Russell, also served in the war. He enlisted in Sarnia in September of 1939, three days after the outbreak of war with the 26th Battery. James Russell married Kathleen Pascoe of Camlachie who served as a WREN stationed at Cornwallis, Nova Scotia. James Russell embarked overseas in September of 1940. At the time of Ernie's death, James was a Sergeant in the Canadian Army, Royal Canadian Artillery, 26th Battery serving in France. During his time overseas, James was wounded once and also served in Germany. James Russell returned to Sarnia on furlough in May of 1945 after five years of overseas service. Ernie would not be as fortunate.

Ernie Russell attended Central United Church and was educated in Sarnia until he completed grade eight. After completing his education, he was employed by B. Neal as an assistant manager of a bowling alley in Sarnia from 1937 to 1939. Anything to do with sports, especially bowling, suited Ernie just fine. According to the *Sarnia Observer*, Ernie was one of the best bowlers that the city had ever produced. He was also well known in the local rugby circle as he played City League rugby. Ernie was also active in swimming, softball, golf and he enjoyed hunting and fishing. From 1939 to 1940, he was employed in Kirkland Lake as a pipefitter. He returned to Sarnia in 1940 and found work as a machine operator at Electric Auto-Lite until he enlisted.

Twenty-one-year-old Ernie Russell enlisted in the Canadian Army on June 5, 1941 in London, Ontario. He stood five feet ten inches tall, had hazel eyes and dark brown hair, was single, and was residing at home with his parents on Essex Street at the time. After the war, he planned to get into gold mining. Ernie was initially posted to the 62nd Light Anti-Aircraft Battery, Royal Canadian Artillery in London, Ontario for training. Just over two months later, on August 23, 1941, Ernie embarked overseas from Halifax bound for the United Kingdom as a member of the 4th Light Anti-Aircraft Regiment (4LAA).

Disembarking in Glasgow on September 2, 1941, he continued his army training in the U.K.. In February 1943, he was transferred to the 11th Light Anti-Aircraft Regiment. During his training in England, he won the tabloid sports championship medal in 1943. In January 1944, he was transferred to #3 Canadian Army Reinforcement Unit (CARU) and then in March 1944 to #2 CARU. On April 1, 1944, he was transferred to 8th Light Anti-Aircraft Regiment (8LAA), Royal Canadian Artillery (RCA).

Almost three years after arriving overseas, on July 22, 1944, Gunner Ernie Russell arrived in France. The **Battle of Normandy** had begun for the Canadians with the June 6, 1944 D-Day landings at Juno Beach. After breaching the “Atlantic Wall” of “Fortress Europe”, Allied armies began their break out from the narrow Normandy bridgehead to carve out a foothold on the French mainland. It would take a whole summer, into late August, of tenacious fighting, pushing against fierce and ruthless German forces to advance east across France. In a brutal campaign of attrition, the Canadians faced fierce battles and vicious counterattacks as they clawed their way forward liberating villages and towns including Bretteville, Carpiquet, Caen and Falaise.

After the Allied breakout from Normandy, Canadian forces were assigned the “**Long Left Flank**”, the less glamorous but vital tasks of clearing coastal areas in the north of France and Belgium of German occupiers; opening the English Channel ports for supplies essential to the Allied advance; and capturing the launching sites of German V-1 rockets. In a series of stop-and-start advances against stiff resistance in fortified positions, the Canadians liberated ports and villages including Rouen, Dieppe, Dunkirk, Boulogne and Calais.

Gunner Ernest Frederick Russell

Gunner Ernie Russell served with the 8th Light Anti-Aircraft Regiment, RCA, as they advanced through Normandy and northern France towards Belgium. Less than two months after arriving in France and just five days before his birthday, Gunner Ernie Russell was killed in action on September 7, 1944, during fighting on the “long left flank” on the border of France and Belgium. His remains were buried on September 8, 1944, at a location recorded on the Army Field Service Card as “Cemetery in village of Quaedyre France 281725 sheet 40”. His remains were later carefully exhumed and reverently reburied in Calais Canadian War Cemetery.

On September 16, 1944, Annie May Russell on Essex Street received the following telegram about her son, MINISTER OF NATIONAL DEFENCE DEEPLY REGRETS TO INFORM YOU THAT A57044 GUNNER ERNEST FREDERICK RUSSELL HAS BEEN OFFICIALLY REPORTED KILLED IN ACTION SEVENTH SEPTEMBER 1944 STOP IF ANY FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED. On that same day, James and Annie Russell received another telegram – this one informing them that their other son, SGT JAMES HERBERT RUSSELL WAS WOUNDED AUGUST 23 WHILE IN FRANCE WITH THE ARTILLERY UNIT.

In early October 1944, the Brigadier, Vice Adjutant-General mailed this letter to the grieving mother;
Dear Mrs. Russell:

It was with deep regret that I learned of the death of your son, A57044 Gunner Ernest Frederick Russell, who gave his life in the Service of his Country in the Western European Theatre of War on the 7th day of September, 1944.

From official information we have received, your son was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Ernie Russell's death was later officially recorded as, *Overseas casualty, killed in action, in the field (France)*. In October 1945, James and Annie May Russell received a War Service Gratuity of \$628.24 for the loss of their son. In mid-October 1947, the Director, War Service Records in Ottawa, sent Annie Russell a photograph of the grave and marker over the burial place in Calais France of her late son Ernest. Ernie Russell, 24, is buried Calais Canadian War Cemetery, Leubringhen, Pas de Calais, France, Grave 4.A.11. On his headstone are inscribed the words, ASLEEP IN JESUS.

SCHILDKNECHT, Arnold Charles

Arnold Charles Schildknecht gave his life while serving with the fourth arm of service of the Royal Canadian Navy. While making the treacherous journey across the Atlantic delivering the vital supplies necessary for the Allied cause, his ship was lost to what British Prime Minister Winston Churchill said was "... the only thing that ever really frightened me during the war..."

Arnold Schildknecht was born in Sarnia on April 4, 1914, the son of Henry Anton and Grace Ellen (nee Smith) Schildknecht. Henry Schildknecht (born in London, England) and Grace Ellen Smith (born in Lambton) were married in Sarnia on June 17, 1914 and resided at R.R. #3, Sarnia. Henry supported his family working as a labourer. Arnold's grandfather was Charles J.H. Smith, and his Uncle Hubert H. and Aunt Agnes M. all lived in Port Franks. Arnold's brother was Henry Doring Schildknecht (born December 1917), who during the war, served aboard the *SS Calgarian*. When Arnold was twelve years old, he lost his father Henry, who passed away in Sarnia in March 1926 at the age of thirty-two. Grace Ellen remarried in April 1927, to Angus Malcom Martell, in Sarnia. Arnold's half-brother was James Edward Martell (born June 1935).

Arnold Schildknecht attended Sarnia Collegiate from 1927-1930. At wartime, he joined the **Canadian Merchant Navy**, recording his occupation as a labourer and his residence as Port Franks, Ontario.

Canada's Merchant Navy was the "fourth arm of service" of the Royal Canadian Navy. It played a vital role in carrying men and essential machinery, arms, fuel and basic resources between North America and Europe in the **Battle of the Atlantic**, the longest continuous campaign of the war and one in which Canada played a central role. Cargo was also shipped to and from ports in the Caribbean, the Mediterranean, the Indian Ocean, the Pacific, the Arctic, and in European waters.

Even with the protection of armed escorts it was always a treacherous voyage for the dozens of merchant ships travelling in a zig-zag fashion across enormous tracts of ocean in convoys. The ships maneuvered in crowded ranks, without lights, wireless or navigational aids and using haphazard communication. The many risks included the constant threat of fierce attacks by German U-boats or air attack, the danger of collision, underwater mines, rough water and the hazardous weather, along with fog, gales and ice conditions in the North Atlantic.

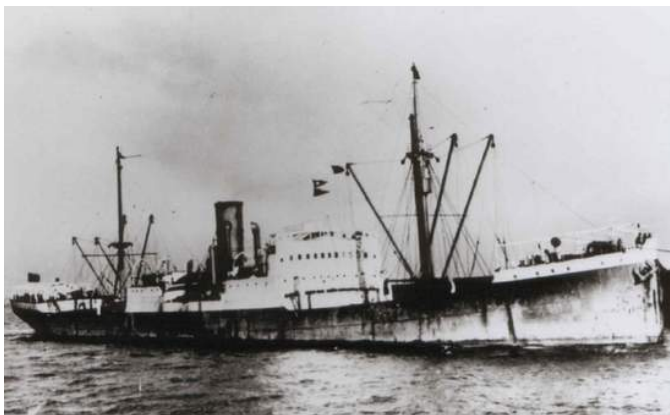

Canadian mariners served in the Canadian merchant fleet and in all manner of vessels from other nations. By the end of the war, an estimated 12,000 Canadian and Newfoundland men and women served in the merchant navy. More than 1,600 Canadian and Newfoundland Merchant Navy men and women lost their lives in the war.

Arnold Schildknecht served aboard the Belgian cargo ship *SS Indier* as Able Seaman. The WWI B-class standard cargo ship was completed in Southwick, Britain in August 1918. Originally named *War Redcap*, it was built for British Shipping Controller, one of many merchant ships built to supply the United Kingdom with materials, especially in the Great War. In 1919, it was transferred to a company based out of Antwerp, Belgium, and renamed the *SS Indier*. Made of steel and powered by steam, it was a transport carrier of 5409 tonnes. It continued its role as a merchant carrier in World War II.

In mid-March 1941, the *SS Indier* left ports in Philadelphia and New York, before departing from Halifax on March 20 bound for Glasgow. With its cargo of 6300 tons of steel and general cargo, it was part of convoy SC-26, bound for Liverpool and Glasgow. North Atlantic convoy SC-26 was made up of 22 ships, leaving North America with a single escort, the armed merchant cruiser *HMS Worcestershire*. As the convoy sailed across the Atlantic, it was first sighted by a U-boat on April 1. A patrol line of eight U-boats soon formed and by April 2nd, began to shadow and target the convoy for the next several days.

The first U-boat assault was made during the night of April 2/3, 1941 in the mid-Atlantic, south-southwest of Iceland. Just after midnight, a single U-boat fired on three different ships in the convoy, sinking one immediately. Just after 4:00 a.m. several other U-boats joined in the attacks on the convoy. In the early morning hours of April 3,

at 5:08 a.m., German U-boat *U-73* hit the British steam cargo ship *SS Westpool* with one torpedo and one minute later, missed a presumed armed merchant carrier with another torpedo. The *SS Westpool* sank in less than one minute. Thirty-five of a crew of forty-five aboard the *Westpool* were lost.

SS Indier

At 5:12 am, *U-73* fired a third torpedo, which struck the *SS Indier* under the bridge, causing the ship to sink within one minute. Forty crew members and two gunners on the *Indier* were lost. Four survivors were picked up later and landed at Liverpool. Arnold Schildknecht was one of the crew of the *SS Indier* lost at sea, one day before his 27th birthday.

Through the night of April 2/3, four U-boats attacked the convoy, sinking 6 ships, including the *Indier*. The next day, as ships in the convoy begin to scatter, escort ships from the U.K. arrived. However, during the following night of April 3/4, three more ships were sunk. The next day, one more ship was sunk. In total, nearly half of *SC-26* had been lost; 10 ships were sunk and 3 ships were damaged, including one warship, while only one U-boat was destroyed.

Merchant mariner and Able Seaman Arnold Schildknecht, 26, has no known grave. His name is inscribed on the Halifax Memorial, Nova Scotia, Canada, Panel 19. Arnold Schildknecht's name is also inscribed on the Thedford cenotaph in the Village of Thedford and is inscribed in the *Merchant Navy Book of Remembrance* located in the Peace Tower on Parliament Hill, Ottawa. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

SHANKS, James Roger (#J/14860)

James (Jimmy) Shanks was an exceptional athlete whose sports prowess led him to successes on and off the field. His skills and abilities transferred to the air force where he became an *exceptionally popular and a splendid* [pilot] *instructor*, described as *energetic, dependable...* [a] *good leader type who instills considerable confidence*. When he lost his life in a training accident, he did so in order to save the life of his student flier.

James Roger Shanks was born in Sarnia on February 9, 1918, the only son of John Harrison and Christina Taylor (nee Rogers) Shanks. John Shanks (born in Detroit, Michigan) and Christina Rogers (born in Glasgow, Scotland) were married in Chatham, Ontario on September 28, 1915, and were blessed with two children together: James and his sister Betty Gene Shanks. The family moved to Sarnia and lived at 125 Cameron Street. John Shanks supported his family working in the contracting business, and was prominent in local sports activities, including serving as the president of the Midget-Juvenile Baseball League.

James Shanks was educated in Sarnia, attending Durand Street Public School from September 1924 to June 1928, and then London Road Public School from September 1928 to June 1931. He then attended Sarnia Collegiate from September 1931 to June 1937. James was a well-rounded young man who was active in the community and in sports. He was a Boy Scout for one year, a member of the Cadet Corps for three years, and a member of St. Andrew's Young Men's Club. James was especially active football, baseball, basketball and rugby, and also participated in hockey, tennis and badminton. He played quarterback for the Sarnia Collegiate football team the year it won the WOSSAA championship. James was also an outstanding quarterback and halfback for the Sarnia Imperial Football Club in the late 1930s, and an all-Canadian selectee in pre-war competition. He was also coach of the Sarnia Junior O.B.A. team that won a provincial baseball title and was the catcher for Sarnia's senior M.O. baseball team. Active in

so many local sports, James Shanks was described as, *A hard, clean player, he was the kind of chap athletes liked to compete with or against. Always gentlemanly and clean in sports endeavors, he nevertheless was an aggressive player with the true fighting heart of a great athlete.*

From September 1937 to June 1938, James attended North Bay College, where he coached teams of Scollard Hall to a Northern Ontario football championship and to a Dominion interscholastic hockey title. By October 1938, James was back in Sarnia, employed with Imperial Oil Limited in Sarnia. He worked there as a chemist's assistant in the Research Department laboratory until he enlisted. In October 1940, the Minister at St. Andrew's Presbyterian Church in Sarnia wrote a reference letter to the RCAF Recruiting Officer on behalf of James Shanks. Following is a portion of that letter; *...he is a young man of excellent moral character. He is of good habits, a conscientious and altogether trustworthy young man; a leader among the youth of this city interested in good clean sports. Since it is his desire to join the RCAF, it is a pleasure for me to bear this testimony to his genuine worth.*

Twenty-two-year-old James Shanks enlisted with the Royal Canadian Air Force on November 26, 1940 in London, Ontario. He stood six feet tall, had blue eyes and medium brown hair, was single, and recorded his address as 125 Cameron Street, residing with his younger sister and parents. He also resided for a time at 398 Davis Street, Sarnia. James requested flying duties, expressing his preference to be a pilot or observer. After the war, his ambition was to enter the field of engineering.

From the Recruiting Centre in London and #1 Manning Depot in Toronto, and then #1 Technical Training School (TTS) in St. Thomas, James received his air training at #1 Initial Training School (ITS) at Eglington Hunt Club in Toronto; followed by #12 Elementary Flying Training School (EFTS) in Goderich; and at #1 Service Flying Training School (SFTS) at Camp Borden. He was awarded his wings as a Pilot at Camp Borden on August 20, 1941. His parents came from Sarnia to attend the ceremonies and witnessed the presentation of the coveted wings to their son. While training at Camp Borden, James starred as a baseball player with the Camp Borden Fliers team that won the district honours from the Trenton Air Base Nine.

The Commanding Officer of #1 ITS recorded that James was an *Energetic, dependable Airman with considerable enthusiasm for his work. Very calm under pressure and will apply himself to the best of his abilities. Has ability to size up situations and act accordingly. Good leader type who instills considerable confidence. Recommend for Commission.* The Chief Flying Instructor at #12 EFTS recorded the following about James: *This man thinks quickly and flies well, should make a good service pilot.* The Commanding Officer of #1 SFTS recorded that James was an *excellent pupil who is keen and conscientious and has proven himself to be a good pilot. Recommended for Bomber.*

Pilot Officer-Pilot James Roger Shanks

In October 1941, James Shanks began an RCAF Flying Instructor's course at Central Flying School (CFS) in Trenton, Ontario. Graduating in late November 1941, the Chief Instructor and the Commanding Officer at CFS Trenton both recorded that James *is a steady capable student, high average ability as a pilot, should make a good instructor.*

During his training, James Shanks had flown in Fleet Finch, Yale, Harvard, Fairey Battle, Bolingbroke and Anson aircraft. In late November 1941, he was posted to Conversion Training School (CTS) at RCAF Station Rockcliffe near Ottawa, with the rank of Warrant Officer II-Pilot Officer. James became a Pilot-instructor at RCAF Station, Rockcliffe. This air station was opened in 1918 and underwent several name changes before taking the name RCAF Station Rockcliffe in 1940 as part of the British Commonwealth Air Training Plan. As the nearest airport to the centre of the capital, many training schools sprang up during the war at Rockcliffe and many kinds of activities took place here, including different kinds of testing, training, and transport operations.

Approximately ten months after arriving at Rockcliffe, James Shanks was killed during a training exercise. On September 13, 1942, James was one of four RCAF men who lost their lives when two training planes collided in mid-air, crashing to the ground approximately five miles west of Richmond, Ontario. The mid-air accident occurred between Oxford aircraft BG297 and Harvard trainer aircraft 3106. James Shanks was in the slower Oxford aircraft that collided with the speedy Harvard trainer aircraft. The Oxford (nicknamed the 'Ox-box') was a twin-engine aircraft manufactured in England by Airspeed Limited that saw widespread use for training aircrews for RAF Bomber Command in navigation, radio-operating, bombing and gunnery roles. The North American Harvard was a single engine aircraft, known as "the pilot maker" because of its important role in preparing pilots for combat.

James died as a result of his injuries that included a fractured skull, crushing injuries to his chest and a fractured left femur. Perishing with Pilot Officer-Pilot James Shanks in the Oxford aircraft were Sgt. Stanley Victor Patterson and LAC. Franklin Leroy Rash. Pilot Officer C.E. Cuisson of Quebec managed to parachute to safety. Killed in the Harvard aircraft was LAC Walter Kenneth Dean.

John and Christina Shanks in Sarnia received the news of the death of their only son the next day. In the investigation that followed, officials asserted that had Pilot Officer James Shanks not elected to "stick with the ship", in the hope of landing it and thereby saving the life of a student flier, he might have saved his own life by parachuting.

Squadron leader Doug Macklin arrived in Sarnia to assist the family in making the funeral arrangements. He said, *James was to have been recommended for a commission. He was exceptionally popular and a splendid instructor. It was the first accident of the kind my men have had.*

James Shanks was accorded full military honours at his funeral held at a packed St. Andrew's Presbyterian Church in Sarnia and at a graveside service attended by an estimated crowd of 1,000 people. Among those in attendance were several members of the Imperial football teams of other years. The ceremony included a 26-piece band, a firing party of fourteen, an escort and attending party of fifty. At the church service, Reverend Dr. Macgillivray expressed his sympathy to the parents and relatives and said that the death of Warrant Officer Shanks *would strengthen our resolve to see this thing through to victory.* He added, *Jimmy Shanks was one of the finest lads I ever knew. He lived a clean life and played hard, yet fair and never violated the rules of sportsmanship. He was straightforward, modest and highly esteemed by all who knew him. Although young in years, had attained a fine Christian manhood.* The air force blue casket draped with the Union Jack was carried to the gravesite escorted by six R.C.A.F. warrant officers who marched beside it. Three volleys were fired at the graveside, the band playing snatches of a hymn between each volley. After bayonets had been fixed, the "Last Post" was sounded.

James Shanks, 24, is buried in Lakeview Cemetery, in Sarnia, Ontario, Section E. Lot 131. In late October 1942, John and Christina Shanks received from the R.C.A.F. the wings that had been taken from the uniform of their only son. On James Shanks' headstone are inscribed the words, REST IN PEACE. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

SHEA, Edward Thomas (#A/17019)

Edward Shea was only 17 years old and his mother's sole support when he enlisted to serve in the Canadian Expeditionary Force in World War I. He survived the horrors of France and Belgium and returned home after the war. Twenty years later, the 41 year-old Edward joined the army again. Soon after marrying he embarked overseas where he took part in the invasions of Sicily and Italy. He survived another World War, but two years after V-J Day, Edward lost his life to what officials determined were related to his military service.

Edward Thomas Shea was born in Toronto on November 28, 1898, the only son of Thomas Patrick (O'Shea,

born in Kilarney, Ireland) and Mary (nee Hynes, born in Ireland) Shea, of 54 Palmerston Avenue, Toronto, Ontario. Thomas and Mary Shea had four children together: Edward, the youngest, and three daughters: Mary Bertha, Margaret and Annie. Edward was baptized on December 24, 1898 in St. Mary's Church, Toronto. At the time of Edward's death, his sisters Mary resided in Toronto; Annie in Midland; and Margaret resided at 314 Bright Street in Sarnia, married to Ernest Latour.

When Edward Shea was only three years old, he lost his father Thomas, who passed away around 1901. Edward attended Toronto Separate Schools from age six to twelve, completing grade five. When he was twelve years old in 1910, he left school to support his widowed mother. From 1910 to 1916, Edward worked as an apprentice at Sheppard & Sons harness mountings business.

On April 1, 1916, seventeen year-old Edward Shea enlisted with the Canadian Expeditionary Force (CEF) in Toronto to serve in the First World War. On his Attestation Paper, he recorded his birth year as 1896 (not 1898), so the recruiter believed that he was nineteen years old. Underage, he stood only five feet and three quarters of an inch tall, had brown eyes and brown hair, was single and lived with his mother on Palmerston Avenue in Toronto at the time. Also recorded at his enlistment paper was that Edward was his widowed mother's "only son" and her "sole support", giving her \$40 per month. Later, after he arrived overseas, Edward assigned \$20 per month of his pay to his mother (as a Private, he earned just over \$30 per month). Edward recorded his occupation as brass finisher and was initially a member of the 216 Battalion. In early January 1917, still in Canada, Edward spent eight days at the Base Hospital in Toronto recovering from influenza.

Private Edward Shea embarked overseas from Halifax bound for the United Kingdom aboard the *SS Scandinavian* on April 18, 1917. Arriving in England eleven days later, he was transferred to the 3rd Canadian Reserve Battalion at West Sandling. More than fifteen months later, on August 9, 1918, he was transferred to the 2nd Regiment, Canadian Mounted Rifles at Camp Witley, and the next day he arrived in France with that unit. Within a week, he was on the front lines taking part in the Hundred Days Campaign.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the "beginning of the end" of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. As part of the Canadian Mounted Rifles, Private Edward Shea participated in Hundred Days offensives including the Battle of Amiens, the Battle of Arras and Breaking the DQ Line, the Battle of Canal-du-Nord and Cambrai, and the Pursuit to Mons. The greatest victories of the Canadian Corps took place in this critical period, but it came at a high price, approximately 46,000 Canadian casualties.

Edward Shea celebrated with the rest of the Allies when the war ended on November 11, 1918. Three months later, in mid-February 1919, he departed France and returned to England. One month after that, he embarked from Liverpool aboard the *RMS Baltic*, and returned to Canada. He was discharged on demobilization on March 24, 1919, and returned to live with his mother, then at 84 Dundas Street, Toronto.

Following the Great War, from 1920 to 1931, Edward worked as a labourer at various jobs in Toronto, including the pressing of clothing and road construction. From 1931 to 1937, he was self-employed, running his own tobacco and confectionary shop in Toronto. From 1937 to 1940, he worked at various jobs, including farming. It was sometime between 1937-1940 that Edward Shea lived with his sister Margaret Latour at 314 Bright Street in Sarnia. Edward was a member of Our Lady of Mercy Catholic Parish.

On June 25, 1940, forty-one-year-old Edward Shea enlisted in the Canadian Army in London, Ontario. He stood five feet three inches tall, had brown eyes and dark brown hair, was single, and lived at 314 Bright Street at the time. He recorded his occupation as labourer. He planned to re-open his own cigar store in Toronto after the war. From #1 District Depot in London, he was posted to the Royal Canadian Army Medical Corps (RCAMC) in Ottawa in July 1940 with the rank of Private.

Less than four months after enlisting, on October 15, 1940, Edward Shea married Anne Carmel Watters, of Russell Avenue, Ottawa, the daughter of Patrick Henry Watters and Johanna (nee Murdoch) Watters. The wedding took place at St. Joseph's Church in Ottawa, Ontario. They couple lived at 260 Laurier Avenue, and later 205 Charlotte Street, Ottawa. Edward and Anne Shea had one child together, daughter Joan Maureen Shea, born in Ottawa on September 5, 1941 (while Edward was overseas in the U.K.).

On December 21 1940, two months after getting married, Edward Shea embarked overseas from Halifax bound for the United Kingdom. He arrived in Liverpool on December 31, 1940. Initially with the RCAMC at

Borden, on January 21, 1941, he would be attached to the No. 4 Canadian Field Ambulance (4CFA) with the rank of Private. During his service in the Second World War, Edward did not carry out medical work, but instead carried out general labour duties, that included serving as a steward in a Sergeant's mess, and serving as a driver and a batman (personal servant to a commissioned officer).

On June 13, 1943, Private Edward Shea of the 4CFA, embarked from Glasgow, Scotland for the Italian Theatre. The **Italian Campaign**, the first sustained Canadian Army operation of the War, began with the invasion of Sicily on July 10, 1943. The fierce fighting on the island would last more than four weeks, during which the Canadians advanced through difficult mountainous terrain, against an ever-stiffening German resistance. By August 17, the Germans had evacuated the island to the Italian mainland. In early September, Canadian and Allied forces invaded Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl, lasting 20 months, over a range of landscapes, through challenging weather, and against a series of well-protected defences held by some of the German army's best troops.

Edward Shea disembarked in Sicily on July 10, 1943, on the day of the island invasion. On September 3, 1943, he disembarked at Reggio, Italy, on the day of the invasion of Italy. Edward served in Sicily and Italy for thirteen months, with the No. 4 Field Ambulance. In June 1944, still in Italy, Edward was attached to the X-9 List--a Base Reinforcement Unit, where he was not available as a reinforcement. On July 31, 1944, due to health issues, he was evacuated from Italy, disembarking in the U.K. on August 13, 1944.

Once back in the U.K., Edward was attached to the Canadian General Reinforcement Unit (CGRU). In mid-February 1945, he was returned to Canada, attached to No. 3 District Depot in Ottawa. In early May 1945, he was attached to #32 Company, Veterans Guard of Canada. On May 8, VE Day was celebrated after Germany's unconditional surrender. In June 1945, Edward was awarded two Good Conduct Badges, and in July 1945, was awarded the 1939-45 Star, the Defence Medal and the Italy Star. In March 1946, Private Shea continued his military service at the National Defence Headquarters in Ottawa, attached to the Royal Canadian Army Pay Corps (RCAPC).

On August 31, 1947, two years after V-J Day, Edward Shea lost his life. He died at approximately 20:45 hours at his home on Charlotte Street in Ottawa at the age of forty-eight. The cause of death was listed as coronary thrombosis, and officials determined that "his death was related to his military service". Edward Shea's remains were buried on September 3, 1947 at Notre Dame Cemetery in Ottawa, with a full military funeral. In early September 1947, Anne Shea received the following letter from a Brigadier, Acting Adjutant-General in Ottawa:

Dear Mrs. Shea:

It is with deep regret that I learned of the death of your husband, A17019 Private Edward Thomas Shea, who died in Canada on the 31st day of August, 1947, after having served his country Overseas. The Minister of National Defence has asked me to express to you and your family his sincere sympathy in your bereavement.

In mid-November 1947, Anne received the following letter from the Director, War Service Records in Ottawa:

Dear Mrs. Shea:

The Honourable, the Minister of Veterans Affairs, wishes to extend his sincere sympathy on learning of the death of your husband which has recently been reported to this Department.

As the death of your husband was related to his service in the Canadian Army (Active), you will shortly receive a Silver Memorial Cross given by the Canadian Government as a slight token of appreciation of the sacrifice you have made.

Also in November 1947, Anne Shea received a War Service Gratuity of \$1289.55 for the loss of her husband, a veteran of two world wars. Edward Shea, 48, is buried in Ottawa (Notre Dame) Roman Catholic Cemetery, Ottawa, Soldiers plot 4, Grave 9. He left behind his wife of less than seven years, Anne, and their daughter Joan, who was one week shy of six years old.

SOURCES: A, B, C, D, E, F, L, 2C, 2D, 7C, 8X

SMITH, Alexander Gordon (#J/3118)

Alexander Smith was 25 years old and working as an agricultural engineer when he made the decision to serve his country. As a member of the Royal Canadian Air Force, he took part in the North African Campaign. In December 1941, while on a navigational night exercise over Egypt, his Blenheim bomber disappeared without a trace. The aircraft and crew were never located. Alexander Smith has no known grave.

Alexander Gordon Smith was born in Vancouver, British Columbia on September 20, 1914, the son of Alexander Smith Sr. and Jeanie (nee Giffen) Smith. Scottish-born parents Alexander Smith Sr. (born Aberdeen) and Jeanie Giffen (born Strathaven) were married on November 10, 1909 in Vancouver, British Columbia. Alexander Sr. and Jeanie Smith had four children together: daughters Margaret Craig and Jane Ross Gordon Smith, and sons: Alexander Jr. and James Giffen. James also served during the war, as a Leading Aircraftman with the R.C.A.F. The Smith family moved to Ontario when Alexander Jr. was nine years old, and lived at 277 Kathleen Avenue, Sarnia. Alexander Sr. supported his family working as a draughtsman in Sarnia.

Alexander Jr. was educated in Vancouver, Rossland, B.C. and Sarnia public elementary schools from 1920 to 1928. He then attended Sarnia Collegiate School from 1928 until 1933. He was very active in swimming and rugby, and participated in boxing, wrestling and soccer. He was a member of the Sarnia Collegiate orchestra in which he played violin and was a member of the Cadet First Aid Team in 1931. His hobbies included photography and horticulture.

After graduating high school, Alexander attended Ontario Agricultural College in Guelph in 1933, and graduated in 1937, specializing in Agricultural Science (Agricultural Engineering degree). During the summers of 1934, '35 and '36, he was employed at Imperial Oil Refinery in Sarnia in the greenhouse. From April to December 1938, he was employed as a tractor mechanic with Massey Harris in Toronto. From December 1938 to May 1939, he was employed at the Agricultural Engineering Department, O.A.C. in Guelph as a physics demonstrator. From May 1939 until he enlisted, he was employed as a field supervisor for Greenmelk Company in Wallaceburg.

Twenty-five-year-old Alexander Smith Jr. enlisted in the Royal Canadian Air Force on May 10, 1940 in London, Ontario. He stood six feet tall, had blue eyes and light brown hair, and was single at the time. He recorded his occupation as engineer, his present address as c/o Greenmelk Co. Wallaceburg, and his permanent address as 277 Kathleen Avenue, Sarnia. Alexander requested flying duties with a preference to be an observer.

From the Recruiting Centre in London, and then #1 Manning Depot in Toronto, Alexander received his air training at #1 Initial Training School (ITS) in Toronto; followed by #1 Air Observers School (AOS) in Malton, Ontario; and at #1 Bombing and Gunnery School (B&GS) in Jarvis, Ontario. He was awarded his wings as an Air Observer at B&GS in Jarvis on October 28, 1940. He continued his training in late-October through November 1940 in a four-week course at #1 Air Navigation School (ANS) in Trenton, Ontario and Rivers, Manitoba. From December 1 to 10, 1940, he was able to spend a few days of his leave at his home in Sarnia on his way from Rivers to Ottawa where he was stationed next.

Alexander Smith Jr. embarked overseas bound for the United Kingdom on December 15, 1940. He continued his training there for approximately one year before he departed the U.K., arriving in Egypt on December 5, 1941. Upon arrival in the Egypt/Sudan frontier, he served as a member of RAF #72 Operational Training Unit (OTU), Middle East, with the rank of Pilot Officer-Observer.

Alexander arrived more than a year into the **North African Campaign**. The campaign had begun in June 1940 and continued for almost three years, as Allied and Axis forces pushed each other back and forth across the desert. Battles between British Commonwealth, U.S. and French forces against Italian-German Axis and Vichy France forces took place across Libya, Egypt, Morocco, Algeria and Tunisia. Canadians fought as part of British army units, as members of the RAF or the Royal Canadian Air Force and served in the Royal Canadian Navy.

No. 72 OTU was formed in June 1941 at RAF Carthago, Port Sudan, to train light bomber crews in tropical conditions. One of the aircrafts used here to train crews was the Bristol Blenheim, a twin engine British light bomber. During the early years of the war, the Blenheim was the mainstay of the RAF's light bomber forces. There was no easy way to learn how to fly the bombers, and training crews suffered a litany of disasters, crashes and deaths. By the end of the war, over 8,000 Allied airmen were killed in bomber training or by accidents alone.

Approximately one year after arriving overseas, and less than two weeks after arriving in Egypt, Pilot Officer-Observer Alexander Smith lost his life. On December 17, 1941, Alexander Smith was the Air Gunner-Observer in a crew of five aboard Blenheim Mk. IV aircraft Z7628 on a navigational night exercise. After almost two hours into their night flight, the aircraft ceased transmitting and was not heard from or seen again. It was later learned that the aircraft crashed in the Red Sea Hills area in Egypt. All five airmen onboard were lost and presumed dead. Perishing with RCAF Pilot Officer Alexander Gordon Smith were; Sgt's C. Freeman, P.P. Hussey, W. Armour (all RAF), and Sgt. P.W. Wheeler (RAAF).

Approximately one week after the aircraft disappeared, Alexander Sr. and Jeanie Smith in Sarnia received a cable informing them that their son, ALEXANDER SMITH HAS BEEN REPORTED AS MISSING OVERSEAS.

A Royal Air Force investigation was held into the circumstances of the “accident to Blenheim Z7628”, and following are portions of the results of that investigation:

1. *The above crew was detailed to carry out a cross-country exercise at night, from Wadi Gazouza to Sollum Junction, to Ras Asis, to Wadi Gazouza. The crew consisted of a staff pilot, observer, and wireless operator, together with an observer and wireless operator/air gunner under training.*
2. *The aircraft left the ground at 21.15 hours, and established communication with the base, and exchanged strength of signals at various times. At 21.49 he asked for a bearing and was given 185° which was approximately correct. He maintained two-way communication until 22.14 hours, when he sent the following message originated by him at 22.01 hours: ‘POSN SALLUM JUNCTION, TR 134° G/S 196 NEXT POSN RAS ASSIS E.T.A. 22.29’. At 22.35 hours, he again exchanged signals with base and was given strength ‘6’ which was acknowledged. No further contact was made after this signal. An extensive search has been carried out for three days without any results.*
3. *The weather conditions during the night were good for this area, there being only the usual belt of low cloud over the range of hills to the East of this aerodrome. It was a dark night, but with brilliant starlight, and at no time was there more than three tenths low cloud over the aerodrome, although there was a belt of ten tenths low cloud within 5 miles to the East....*
5. *The pilot (Sgt. Freeman) of this aircraft was well experienced in night operational work, flying Hampdens in England. The navigator, P/O A.G. Smith, had also had previous experience as an observer in Wellingtons.*
6. *From the wireless communications, it is apparent that the flight proceeded normally until the last message was received, and I am unable to suggest any reason for the failure of this aircraft to return.*
7. *An air search over a wide area for three days has provided no success.*

In mid-January 1942, Alexander Sr. received the following letter from Group Captain, Commanding No. 72 O.T.U., Royal Air Force, Middle East:

Dear Mr. Smith,

I regret very much that I must confirm the sad news which you will already have received that your son, Pilot Officer A.G. Smith did not return from a flight carried out from this Unit on active service, on the 17th December, 1941. Together with four other members of the crew, your son started off on a night flight at 21.15 hours, and the aircraft signals were heard up to 22.59 hours after which all trace was lost and it cannot be hoped that the aircraft and its crew are safe. Extensive search has been made and any further news will be forwarded to you at once.

Your son had been with me only a short time, but I had begun to appreciate his good qualities and he was popular with his brother officers. He was one of a number of young Dominion Officers who are serving with me, all of whom are doing their utmost in the cause for which we are all fighting.

His kit has been carefully packed and sent to the President of the Standing Committee of Adjustment, Royal Air Force, Middle East, and you will be hearing from this Officer in due course.

In July 1942, the Smiths received the news that their son Alexander was now officially listed as, *Previously reported missing after air operations, now for official purposes presumed dead, overseas*. In August 1945, they received a War Service Gratuity of \$353.30 for the loss of their son.

In December 1952, Alexander Sr. received a letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff. Following is a portion of that letter:

Dear Mr. Smith:

It is with reluctance that after so long an interval, I must refer to the loss of your son, Flying Officer Alexander Gordon Smith, but due to the lack of any information concerning him since he was reported missing, it must be regretfully accepted and officially recorded that he does not have a “known” grave.

Due to the extreme hazards attending air operations there are, unhappily, many thousands of British aircrew boys who do not have “known” graves and all will be commemorated on General Memorials that will be erected at a number of locations by the Imperial War Graves Commission (of which Canada is a member), each Memorial representative of a theatre of operations. One of these Memorials will be erected at El Alamein, and the name of your son will appear on that Memorial....

I realize that this is an extremely distressing letter and that there is no manner of conveying such information to you that would not add to your heartaches. I am fully aware that nothing I may say will lessen your great sorrow,

but I would like to express to you and the members of your family my deepest sympathy.

Alexander Smith, 27, has no known grave. His name is inscribed on the Alamein War Memorial, Column 245, Egypt.

SOURCES: A, B, C, D, E, F, G, J, L, M, N, R, 2C, 2D, 4B, 6O, 7C, 8X, 8Y

SMITH, Mitchell (#J/18222)

Mitchell Smith was 19 years old when he made the decision to serve his country. Two and a half years later, he was a member of a crew aboard a Wellington bomber that took off from Yorkshire, England on a night “gardening” operation. Nothing further was heard from the crew after it took off, and the aircraft was not heard from or seen again. All five airmen onboard were lost and presumed dead. Mitchell Smith has no known grave.

Mitchell Smith was born in Toronto, Ontario on May 2, 1921, the son of Roy and Bessie (nee Dillon) Smith, of 2006 Bathurst Street, Toronto. Roy Smith (born in Russia) and Bessie Dillon (born in London, England) were married in Toronto on January 27, 1914, and were blessed with two children together: Mitchell and his brother Murray. Murray Smith also served in the war overseas, as a member of the RCAF. Roy Smith supported his family as a partner in the London Clothing Company in Toronto.

Mitchell Smith grew up in Toronto, attending Grace Public Elementary School, 1929-1935, and then Central Technical School in Toronto, 1935-1937. He was active in skating, badminton, tennis and swimming, and his hobbies were model airplane building and stamp collecting. From 1938 to 1940 when he enlisted, Mitchell was employed at London Clothing Company in Toronto, as a salesman and in charge of shipping. At some point early in the war, his parents Roy and Bessie Smith moved to Sarnia, living at 512 Wellington Street.

Nineteen year-old Mitchell Smith enlisted in the Royal Canadian Air Force on December 27, 1940 in Toronto. He stood five feet ten and three-quarter inches tall, had brown eyes and black hair, was single, and was living with his parents on Bathurst Street in Toronto at the time. Of the Hebrew religion, he was fluent in both English and Jewish. After the war, his ambition was to enter the field of aeronautics. Mitchell also recorded his desire to live in Sarnia after the war. He requested flying duties, with a preference to be an air gunner.

From the Recruiting Centre, then #1 Manning Depot in Toronto, and then #1 Auxillary Manning Depot in Picton, Mitchell Smith received his air training at #1 Equipment Depot (ED) in Toronto; followed by #1 Wireless School in Montreal; and at #4 Bombing and Gunnery School (B&GS) in Fingal. On October 13, 1941, he graduated as a Sergeant-Wireless Air Gunner from #4B&GS at Fingal. He then received his 11-day pre-embarkation leave. On November 3, 1941, Mitchell Smith embarked overseas from #1 Y Depot in Halifax bound for the United Kingdom.

Initially posted to #3 Personnel Reception Centre, Mitchell continued his training in the U.K. at #1 Signals School, and in March 1942 as a member of #19 Operational Training Unit (OTU). He served with a number of units based in the U.K., including #158 Conversion Flight (from August 6, 1942); #158 Squadron (from September 17, 1942); #405 Squadron (from December 8, 1942); 427 Squadron (from May 8, 1943); #22 Operational Training Unit (from June 2, 1943); and with #1659 Conversion Unit (from July 7, 1943). On July 23, 1943, Mitchell Smith became a member of RCAF #432 Leaside Squadron “*Saevitir Ad Lucem*” (Ferociously towards the light), part of **Bomber Command**, with the rank of Pilot Officer-Bomb Aimer.

During the course of the war, one of this country’s most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

RCAF #432 Leaside Squadron was formed on May 1, 1943 around a nucleus of eighteen crews provided by No. 427 Squadron. Part of No. 6 Group of RAF Bomber Command, the town of Leaside officially “adopted” the squadron and it took the town’s name as its nickname. The squadron crest displays a cougar leaping down in front of a full moon, symbolizing the many night-bombing operations and the fight for the “light of freedom against the darkness of oppression.” Based at RAF Skipton-on-Swale, Yorkshire, it was equipped with Vickers Wellington aircraft, a twin-engine, long-range medium bomber. In September 1943, the squadron moved its base to RAF East Moor, and later converted to Avro Lancasters and then Handley Page Halifax aircraft.

Approximately three weeks after joining #432 Squadron, Mitchell Smith lost his life in action. On the night of August 12, 1943, Pilot Officer-Bomb Aimer Mitchell Smith was part of a crew aboard Wellington X aircraft HE348 (markings QO-P) that took off at 20:23 hours from RAF Station Skipton-on-Swale, Yorkshire. The aircraft

was on a night mission to carry out a “gardening” operation off Brittany ports and was scheduled to return at 02:36 hours on August 13, 1943. Nothing further was heard from the crew after it took off, and the aircraft was not heard from or seen again. All five airmen onboard were lost and presumed dead. Perishing with Pilot Officer Mitchell Smith were Pilot Officer Steven Noble; FS. Kenneth Reid Bourne; and Sgt.s James William Neal (RAF), and Donald Ruston (RAF).

Mitchell Smith’s death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas*. In September 1945, Roy and Bessie Smith in Sarnia received a War Service Gratuity of \$588.63 for the loss of their son Mitchell.

In October 1946, Bessie received the following letter from the Wing Commander for Chief of the Air Staff in Ottawa:

Dear Mrs. Smith:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son, Pilot Officer M. Smith. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these “Wings”, indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

Mitchell Smith, 21, has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom, Panel 178.

Mitchell Smith and thirteen other local men had their names engraved on a plaque honouring fourteen Jewish members of the armed services from Sarnia. The plaque was unveiled in the Ahavas Isaac Synagogue, Davis Street, Sarnia on March 30, 1945. The men, all from Sarnia, honoured on the plaque were; M. Berger, S. Bernard, R. Heller, I. Haber, M. Kirk, Dr. I. Mann, A. Rosen, G. Shabsove, M. Skosov, Mitchell Smith, Murray Smith, L. Swartz, I.B. Zierler, Isaac Zierler. Three of the men--Mitchell Smith, Max Berger and Isaac Buck Zierler--made the supreme sacrifice. Mitchell Smith is also honoured in the memorial book “Canadian Jews in World War II”.

STEVENS, Ross Edward

In 1943, Ross Edward “Buddy” Stevens enlisted with the Canadian Merchant Navy when he was only sixteen. Unfortunately, while serving as a 4th Engineer aboard the Imperial Oil tanker *SS Sunset Park*, Buddy was critically injured at sea during a storm. He died in a hospital in Barbados, a day before he turned eighteen.

Ross (who went by his nickname “Buddy”) Stevens was born in Petrolia on March 21, 1927, the son of Mr. and Mrs. Hubert Stevens. The Stevens family moved to Sarnia around 1936 when Buddy was nine and resided at 407 London Road. Ross’ grandmother was Mrs. Edward Shannon of Petrolia. Buddy had one sister who, at the time of his death, was Mrs. S. Round of Sarnia. After beginning his education at Central School in Petrolia, Buddy attended Johnston Memorial School in Sarnia. In 1943, Ross Stevens joined the Canadian Merchant Navy on his 16th birthday, becoming a member of the crew of the Imperial Oil tanker *SS Sunset Park*, with the rank of Oiler. He later obtained the rank of 4th Engineer.

Canada’s Merchant Navy was the “fourth arm of service” of the Royal Canadian Navy. It played a vital role in carrying men and essential machinery, arms, fuel and basic resources across the Atlantic in the **Battle of the Atlantic**, the longest continuous campaign of the war. Cargo was also shipped to and from ports in the Caribbean, the Mediterranean, the Indian Ocean, the Pacific, the Arctic, and in European waters. When the war began, Canada had only 38 ocean-going merchant ships, including 10 tankers of Imperial Oil Limited, and about 1,500 sailors. By war’s end, Canadian shipyards had manufactured 403 merchant ships.

The Allied merchant fleet suffered significant losses in the early years of the Battle of the Atlantic as a result of U-boat attacks. In the face of the now urgent need, Canada embarked on a massive shipbuilding program to help replace the lost vessels and to administer the movement of materiel. Two main types of cargo ships were produced under the Canadian program: “Fort ships” and “Park ships”. Park Steamship Company was created by the Canadian government in April 1942. The *Sunset Park* was one of the “Park ships”. Built as a tanker by Foundation Maritime Limited in Pictou, Nova Scotia, it was completed on November 24, 1944, as a modified Scandinavian-class cargo ship of 2894 tonnes. After the war, the *Sunset Park* would become *Siderurgica Cinco* and was scrapped in 1965.

Even being protected by armed escorts and even by traveling in zig-zag patterns, the merchant ships in convoys usually had a treacherous voyage across enormous tracts of ocean. Maneuvering in crowded ranks without

lights and wireless or navigational aids and using haphazard communication added to the risks the ships faced. They were under the constant threat of fierce attacks by German U-boats or air attack; the danger of collision and underwater mines; and the natural dangers of rough water, hazardous weather, fog, gales and ice conditions.

Canadian mariners served in the Canadian merchant fleet and in all manner of vessels from other nations, and by the end of the war, an estimated 12,000 Canadian and Newfoundland men and women served in the merchant navy. More than 1,600 Canadian and Newfoundland Merchant Navy men and women lost their lives in the war.

Buddy Stevens had been home on furlough the Christmas before his death in December of 1944. Three months later, in March of 1945, he was critically injured in a storm while at sea on board the Imperial Oil tanker *SS Sunset Park*. On March 20, 1945, Merchant Marine Ross Stevens lost his life in St. Michael's Hospital in Bridgetown, Barbados, British West Indies. He died one day before his eighteenth birthday.

On March 21st 1945, parents Mr. and Mrs. Hubert Stevens in Sarnia received word on their son's 18th birthday that he had died in the Barbados, British West Indies while serving with the Imperial Oil marine department. In late April of 1945, the Rev. J.F. Anderson of St. Paul's United Church, Sarnia conducted a memorial service in memory of Ross Edward Stevens. Eighteen year-old Ross Stevens is buried in the Barbados. His name is inscribed on the Sarnia cenotaph and on the Petrolia cenotaph and is also inscribed in the *Merchant Navy Book of Remembrance* located in the Peace Tower on Parliament Hill, Ottawa.

STOKES, Edward Samuel

Edward Samuel "Sammy" Stokes was born in Petrolia on July 26, 1921, the only son of Lieutenant-Colonel Samuel Gladstone Stokes and Jennie Louise (nee Pollard) Stokes. To fully understand Sammy's story and background, one has to look at the life of Sammy's father. Born in Petrolia on July 29, 1893, Lieut-Col Samuel Stokes served with distinction during the Great War and was decorated with the Volunteer Officers' Decoration and the Military Cross.

Samuel Gladstone Stokes completed his Officers' Declaration Paper with the Canadian Expeditionary Force on September 8, 1916 at Camp Borden and was given the rank of Lieutenant with the 149th Battalion. Residing in Petrolia at the time, age 23 and single, he had been a member of the 27th Militia Regiment and recorded his next-of-kin as his mother Margaret Stokes in Petrolia and his occupation as oil refiner. He also recorded that as the only son, he supported his widowed mother Margaret with \$50 per month prior to enlisting. He would continue to support her during his service, allocating \$30 per month of his pay.

Lt. Samuel Stokes embarked overseas from Halifax aboard the *SS Southland* on March 28, 1917. On his arrival in Liverpool, he became a member of the 25th Reserve Battalion stationed at Bramshott where he continued his training. More than eight months later, on December 11, 1917, he arrived at Canadian Corps Reinforcement Camp in Etaples, France as a member of the 18th Battalion. He joined the 18th Battalion at the front on March 20, 1918 and soon found himself taking part in the **Hundred Days Campaign**, August 8 – November 11, 1918 in France and Belgium. This campaign was the "beginning of the end" of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences.

During his time in France, Lt. Samuel Stokes was granted 14-day leaves in the U.K. on two occasions in 1918, one in late July and another in late December (the latter, one month after the Great War ended). His actions on the day before the armistice were recognized with him being awarded the Military Cross. The award reads; *For conspicuous gallantry and initiative on 10th of November 1918. He went forward as scout officer through the enemy's line, entered the village which was occupied by the enemy, locating their positions and strength and brought back information which enabled the battalion to attack and capture the village with slight casualties.*

In mid-February 1919, Lt. Samuel Stokes proceeded to England attached to Western Ontario Regimental Depot for a course at Khaki University. Six months later, in late August 1919, he began his journey home aboard the *SS Celtic* and arrived in New York on September 4, 1919. He was struck off strength on September 13, 1919 in Ottawa on general demobilization and returned to the U.K. one more time. This visit had nothing to do with the war. On May 19, 1919, Samuel Stokes married Jennie Louise Pollard in Ripon, Yorkshire, England. The couple moved to Petrolia and later moved to Sarnia where they resided at 294 Wellington Street. Samuel worked at Imperial Oil and also gave his services during World War II as an officer commanding the 11th Field Company, local reserve army Royal Canadian Engineers Unit.

Samuel and Jennie Stokes had two children together: Edward Samuel “Sammy”, born 1921 and Nancy Louise, born in 1931. Sammy Stokes was educated at Sarnia public schools and then Sarnia Collegiate in 1934, graduating in 1939. He was an active man and loved most sports. While in high school, he played WOSSAA rugby, hockey and baseball and was also on the Sarnia Collegiate rifle team. Sammy was a member of the Central Century Club and, while there, played basketball, hockey and softball for the club teams. After completing high school, Sammy proceeded to prepare himself for a military career by entering the Royal Military College (RMC) in Kingston, in August 1939. During his two years of military training at Kingston, he held the rank of Corporal. Sammy was captain of the basketball team in his second year and also managed the Royal Military College rugby team.

In mid-May 1941, Sammy Stokes graduated from the Royal Military College in Kingston with a commission in the Royal Canadian Dragoons at the age of nineteen. A total of 32 cadets graduated from the College that day and the ceremony was attended by the Governor-General, the Earl of Athlone, and Princess Alice. On June 10, 1941, Sammy completed his Officer’s Declaration Paper at Camp Borden and joined the Royal Canadian Dragoons with the rank of Gentleman Cadet. Nineteen years old, he stood five feet seven and three-quarter inches tall, had hazel eyes and dark brown hair, and was single at the time. Sammy received further instructional work there, and by July 1941, had attained the rank of Lieutenant.

Lieutenant Edward “Sammy” Stokes

Sammy Stokes embarked overseas for the United Kingdom on November 11, 1941. He was posted with No. 1 Canadian Armoured Corps Reinforcement Unit (CACRU), with the rank of Lieutenant. He continued his training and instructing in the U.K. with the CACRU at a number of schools, taking courses including mechanics, armoured warfare, battle tactics, small arms and anti-tank warfare. In February 1943, he was transferred to the 1st Armoured Car Regiment, Royal Canadian Dragoons.

On October 24, 1943, Sammy Stokes departed the U.K., and arrived in the Italian theatre in early November 1943. The **Italian Campaign**, the first sustained Canadian Army operation of the war, had begun with the invasion of Sicily on July 10, 1943. The fierce fighting on the island would last more than four weeks, during which time the Canadians advanced through difficult mountainous terrain, against an ever-stiffening German resistance. By August 17, the Germans had evacuated the island to the Italian mainland. In early September, Canadian and Allied forces invaded Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl, lasting 20 months, over a range of landscapes, through challenging weather, and against a series of well-protected defences held by some of the German army’s best troops.

Lieutenant Sammy Stokes served in the Italian Theatre as a member of the Royal Canadian Dragoons, Royal Canadian Armoured Corps (R.C.A.C.), “C” Squadron, 1st Armoured Car Regiment.

Seven months after arriving in Italy, in June 1944, Sammy Stokes was wounded when he was blown up by a

German mine while in action there. His regiment, the Royal Dragoons, was participating in a crossing of the Melfa River at the time. In a letter he had written home to his parents three days later, he said that he had escaped with slight cuts over one eye. He also described how he had visited Rome on June 14, 1944. He spoke with regret of the death of "Mickey" McBride, one of his classmates at the Royal Military College, Kingston, who had succumbed to wounds. He also mentioned how he had been listening with considerable amusement to a German woman radio announcer, whom the Canadians in Italy have dubbed "Axis Sally." She invited the first Allied soldier reaching Berlin to call on her, but said that he would never live to accept. Sammy also sent a handkerchief home as a gift to his younger sister, Nancy. His mother, Jennie Louise, was grateful not only for his frequent letters home, but for snapshots which showed her son with his best pals in their winter quarters in "sunny" Italy, surrounded by snow which probably reminded them of Canada.

In July of 1944, Lieutenant Sammy Stokes was mentioned in a report sent by Bill Boss, a Canadian correspondent reporting from one sector of the Italian front. His report states:

With the Canadian Corps in Italy

Operations of a squadron of the Royal Canadian Dragoons, commanded by Major Bill Veitch, Montreal, were in two phases of the Italian campaign after they were committed to the pursuit battle which followed the break-through of the Adolf Hitler line. The first phase saw them chase the Germans from Pontecorvo where they entered the battle, to the crossing of the Melfa river. Later, the squadron was asked to find a suitable ford across the river, one which might be developed as a divisional axis of advance. Lt. Peter Crerar, Ottawa, leader of the regiment's Engineer Troop, was given the task.

While troops commanded by Lt. Sammy Stokes, Sarnia, Ontario and Lt. Dick Rigby, St. Catharines, Ont., placed themselves in position to give covering fire, Crerar and his section camouflaged themselves for the job. They crawled 1,000 yards on hands and knees through a mined area before reaching a spot from which to make a detailed reconnaissance. They were engaged with small-arms fire, but they completed the task. On the way out the group was mortared and suffered casualties.

Lieutenant Edward "Sammy" Stokes

Six weeks after Boss' report, Sammy Stokes lost his life on September 3, 1944, while fighting during the Italian Campaign near Rimini on the northern Adriatic coast of Italy. Approximately one week later, Samuel and Jennie Stokes on Wellington Street in Sarnia received a telegram from Ottawa informing them that their only son, LIEUT. EDWARD SAMUEL STOKES WAS OFFICIALLY REPORTED KILLED IN ACTION. The dispatch gave no other details on where or how he met his death. In late September 1944, Col. Samuel Stokes received the following letter from the Major-General, Adjutant-General:

Dear Sir:

It was with deep regret that I learned of the death of your son, Lieutenant Edward Samuel Stokes, who gave his life in the Service of his Country in the Mediterranean Theatre of War, on the 3rd day of September, 1944.

From official information we have received, your son was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Edward Samuel Stokes' death was later officially recorded as, *Overseas casualty, killed in action, in the field (Italy)*. He was recommended for the Military Cross at the Melfa River action and was awarded the decoration Mention in Despatches posthumously. The award stated, *The King has been graciously pleased to approve the award of Mentions in Despatches, in recognition of gallant and distinguished services*. On May 16, 1945, Sammy Stokes' remains were reverently exhumed from their original burial location, and reburied in Gradara British Empire Cemetery in Gradara, Italy.

In February 1946, Samuel and Jennie Stokes received a War Service Gratuity of \$808.44 for the loss of their only son. Fifteen months later, in mid-May 1947, they received from the Director of Records, for Adjutant-General, a photograph of the grave and marker over the burial place of their son in Gradara, Italy. Edward Sammy Stokes, 23, is buried in Gradara War Cemetery, Italy, Grave I, H, 57. On his headstone are inscribed the words, ROYAL MILITARY COLLEGE ROYAL CANADIAN DRAGOONS TRUTH, DUTY, VALOR.

STONE, Geoffrey William (#R/205656)

Geoffrey William Stone had so much to look forward to when his mother gave him permission to enlist underage with the RCAF. He was not yet eighteen, but planned to make the Air Force his career after the war. In England, he had met a girl and they talked of marriage and a member of his crew, Clarence Britton, had become his best friend. Cruelly, Geoffrey's life and dreams were shattered when his crew and he were killed in a training flight over England on November 8, 1944. He was only 19.

Geoffrey Stone was born in Sarnia on April 10, 1925, the son of George William and Enfield Ellen (nee Butler) Stone. George and Enfield, both born in Sussex, England, were married at Waltham Abbey, Essex, England on December 31, 1918. Their union blessed them with five children: sons Geoffrey and George Ronald; and three daughters, who at the time of Geoffrey's death were Mrs. Peggy Barnes (500 George Street, Sarnia); Mrs. Phyllis Kerwin (165 Mitton Street, Sarnia); and Miss Beverley Stone (165 Mitton Street, Sarnia). When Geoffrey was younger, his father had abandoned the family to serve in the Canadian Army overseas. Enfield Ellen Stone was solely responsible for raising and supporting their children.

Geoffrey's brother George Ronald, who was employed on the Polymer Corporation construction, also served in the war. He enlisted in October 1942 and became a Guardsman with the Canadian Infantry.

Like many others in his generation, Geoffrey had much energy. He attended Johnston Memorial Public Elementary School from 1931 to 1939 and then Sarnia Collegiate from 1939 to 1942. He was an excellent student, a member of the Air Cadets for one year, and was very active in athletics, including rugby, swimming, basketball, softball and especially hockey. In the summer of 1942, Geoffrey worked as a labourer with Union Gas Company in Sarnia. His plan was to return to school in the fall.

Geoffrey Stone was eager to enlist in the RCAF; however, he was not the official legal age to do so. His mother supported and respected his decision, so she gave him her permission to enlist. At the age of seventeen and a half, Geoffrey joined the Royal Canadian Air Force on November 17, 1942 at No. 9 Recruiting Centre in London, Ontario. He stood five feet ten inches tall, had blue eyes and dark brown hair, was single, and was residing at home at 165 South Mitton Street with his mother at the time. Geoffrey requested flying duties and to be part of an aircrew. After the war, his ambition was to stay on in the Air Force.

From #9 Recruiting Center in London, and then #2 Manning Depot in Brandon, Manitoba, Geoffrey Stone received his air training at #4 Initial Training School (ITS) in Edmonton; at #7 Initial Training School (ITS) in Saskatoon; and at #6 Elementary Flying Training School (EFTS) in Prince Albert, Saskatchewan. In late September 1943, while stationed at No. 6 E.F.T.S., Prince Albert, Saskatchewan, Geoffrey was able to return to Sarnia on a short 6-day leave to visit his family and friends. On his return to Sarnia, he accompanied the body of Sarnian LAC Leonard Raymond Meere, who had been killed in a flying accident at Prince Albert, Saskatchewan (Leonard Meere is included in this Project).

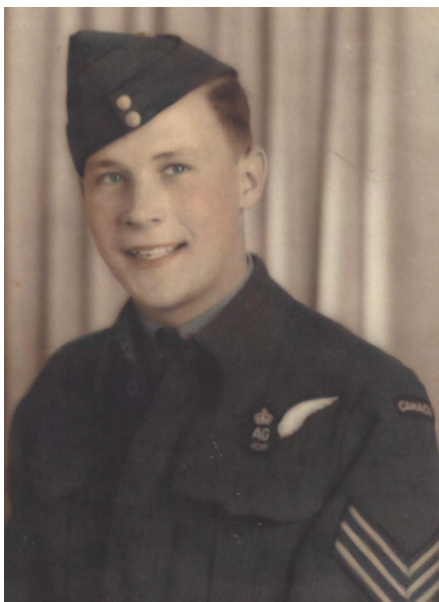

In October 1943, Geoffrey was again posted to #2 Manning Depot in Brandon before continuing his air

training at #1 Air Gunners Ground Training School (AGGTS) in Quebec City, and then at #3 Bombing and Gunnery School (B&GS) in MacDonald, Manitoba. Geoffrey was awarded his Air Gunner's Badge on January 28, 1944 at #3 B&GS in Macdonald, Manitoba. After graduating, he was again able to return to Sarnia to visit his family and friends while on his two-week pre-embarkation leave. It would be the last time they saw one another.

In mid-February 1944, Geoffrey continued his training at #3 Aircrew Graduate Training School (AGTS) in Quebec. In mid-March 1944, he was posted to #1 Y Depot in Halifax. He embarked overseas from Halifax bound for the United Kingdom on March 25, 1944. Upon arrival, he was initially posted to #3 Personnel Reception Centre (3PRC) in Bournemouth, before being transferred in late April 1944 to #10 Operational Training Unit (OTU) at RAF Abingdon.

Stone became a member of an RCAF crew flying Halifax Mk. III aircraft HX356 (markings NP-G). The flying crew of Sgt. Geoffrey Stone, along with P/O Clarence Britton, F/Sgt. Gerald Patterson, F/O William Cook, F/Sgt. William (Bill) Freeman and F/O Andrew Sharp, had received an award as "Best Crew" against 13 other crews, during their training course that concluded in July 1944. Geoffrey and Clarence Britton (of Windsor), who was three years older than Geoffrey and had been in the RCAF since May 1942, became best friends while serving together. Clarence's mother had hoped that once the war was over, the boys would come to Windsor for a visit. Also while overseas, Geoffrey Stone met a special lady and the two of them talked of getting married to one another following the war.

On October 28, 1944, Geoffrey Stone was promoted to the rank of Flight Sergeant, but in his letters home to his mother, he had not revealed to her whether he was serving in a bomber or a fighter squadron. On November 3, 1944, nineteen year-old Flight-Sergeant-Air Gunner Geoffrey Stone became a member of RAF #158 Squadron "Strength in Unity" stationed at RAF Lissett, flying Handley Page Halifax Mk. III aircraft, part of **Bomber Command**.

Flight Sergeant-AG Geoffrey William Stone

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war. There was no easy way to learn how to fly the heavy bombers, and training crews suffered a litany of disasters, crashes and deaths. By the end of the war, Bomber Command lost over 8,000 Allied airmen who were killed in training or by accidents alone.

No. 158 Squadron had been formed in February 1942, originally flying Vickers Wellington aircraft based at RAF Driffield. In June 1942, the squadron converted to Handley Page Halifax, a four-engine heavy bomber, retaining that aircraft for the rest of the war. As part of the strategic bomber force, the squadron changed its base a number of times during the war, including at RAF East Moor, Rufforth, Lissett and Stradishall. Five days after being posted to #158 Squadron, Geoffrey Stone lost his life.

On November 8, 1944, Geoffrey Stone and his crew lifted off at 8:17 p.m. from Lissett, East Yorkshire, U.K. Their Halifax Mk. III Bomber HX356, bore the distinctive name and noseart "Goofy's Gift". It was a night bombing training flight and they headed for the local bombing ranges, probably their last training flight before regular operational bombing duties. Two to three minutes after take-off, after climbing slowly to 400 feet, the aircraft went into a shallow dive and crashed, two miles west of the runway, killing all seven on board instantaneously by the force of the impact. Perishing with Flight Sergeant-Air Gunner Geoffrey Stone were his best friend P/O. Clarence William Arthur Britton; F/S.s William (Bill) Max Freeman and Gerald William Henry Patterson; F/O.s Andrew Sharp (of Point Edward, Ontario), and William Wilfred Cook; and Edwin Sampson Powell (RAF).

All were laid to rest on November 13 in Harrogate (Stonefall) Cemetery, Yorkshire, United Kingdom. Their average age was 22, with Sgt. Stone being the youngest at nineteen. Geoffrey Stone, who had been overseas for only seven months, was officially recorded as, *Killed as a result of a flying accident, overseas (England)*.

On the morning of November 13, 1944, his mother in Sarnia received a letter from her son Geoffrey. Only a few hours later, she would receive a telegram from the Director of Records at Ottawa informing her that her son, FLIGHT SERGEANT GEOFFREY WILLIAM STONE HAS BEEN KILLED IN ACTION OVERSEAS WHILE SERVING WITH THE RCAF. The message also promised that further particulars would be forwarded as they become available.

Three months earlier, in late-August 1944, Enfield Ellen Stone had received a telegram from Ottawa informing her that her other son, GUARDSMAN GEORGE RONALD STONE WAS WOUNDED ON AUGUST 14 ON ACTIVE SERVICE IN FRANCE. The message also stated that further details as to the nature and the extent of the wounds would be forwarded as soon as they were ascertained. When she received the November telegram, son George Ronald was still in a British hospital recovering from his wounds. Geoffrey's father, who had abandoned the family years earlier to serve in the Army, was overseas when his son Geoffrey was killed.

Not long after, Mrs. Stone received another telegram from the R.C.A.F. Casualties Officer:
MRS GEORGE STONE,
DEEPLY REGRET TO ADVISE THAT YOUR SON R TWO NOUGHT FIVE SIX FIVE SIX SERGEANT
GEOFFREY WILLIAM STONE WAS KILLED ON ACTIVE SERVICE OVERSEAS NOVEMBER EIGHTH
STOP HIS FUNERAL TAKES PLACE AT 10.30 AM NOVEMBER THIRTEENTH AT REGIONAL CEMETERY
HARROGATE YORKSHIRE ENGLAND STOP PLEASE ACCEPT MY PROFOUND SYMPATHY STOP
LETTER FOLLOWS.

RCAF CASUALTIES OFFICER

In mid-November 1944, Enfield Ellen Stone of 165 S. Mitton Street received the following letter from the Wing Commander, Commanding No. 158 Squadron, R.A.F.:

Dear Mrs. Stone,

Before you receive this letter you will have been notified by R.C.A.F. Headquarters, Ottawa, of the very sad loss of your son, Sergeant Geoffrey William Stone.

Unfortunately it was not possible for Service reasons to ascertain your wishes regarding the funeral in the time available, and I had therefore to arrange for his burial without reference to you. You will, I am sure, understand the necessity for this action, and I sincerely trust that the arrangements we were able to make were what you would have wished.

Your son's funeral took place at the R.A.F. Regional Cemetery, Harrogate, Yorkshire, at 10.30 a.m. on 13th November, the service being conducted by a Canadian chaplain. Owing to war operations it was not possible to accord full Service honours, but the coffin was carried by men of the Royal Canadian Air Force and was covered with the Union Jack. The Last Post was sounded at the end. Two wreaths were sent from the officers and men of this Squadron, and I hope to send a photograph of the grave, together with its number.

You will wish to know that all war graves are taken care of by the Imperial War Graves Commission, Wooburn House, Wooburn Green, Buckinghamshire, whose duty it is to arrange both for the temporary marking of the grave by a wooden cross and ultimately for the erection of a permanent headstone. I am instructed to explain, also, that questions of re-interment, if this were desired, could only be considered at the conclusion of hostilities.

You will, of course, be anxious to know further details of this accident, which occurred at twenty minutes past eight on the evening of 8th November, 1944. The aircraft had just taken off on a training flight when it crashed about two or three minutes later. There was no fire, but your son and all the crew were killed instantaneously by the force of the impact. I am afraid I cannot tell you the cause of this tragic accident, as this is unknown. The matter will,

of course, be investigated, but it is very unlikely that the exact cause will ever be established in view of the death of the entire crew and the complete destruction of the aircraft.

Your son and his crew only arrived on this Squadron a few days before the accident, but they impressed me as very keen and enthusiastic and I had anticipated that they would have developed into an excellent operational crew. It is the more tragic that this accident should have occurred just as they had completed their training and were about to start on operational duties. Your son's personal belongings have been carefully collected and forwarded to the R.A.F. Central Depository and in due course you will receive a further communication concerning these from the Administrator of Estates, Ottawa.

I should like to assure you how much we all honour the unselfish sacrifice your son has made so far from home in the cause of freedom and in the service of the British Commonwealth of Nations. May I now express the great sympathy which all of us feel with you in the sad loss you have sustained.

In mid-November of 1944, a memorial service to honour Flight Sergeant Geoffrey Stone was held during a morning service in St. George's Church, Sarnia. Three months later, on February 13, 1945, Enfield Ellen received the following letter from the RCAF Casualty Officer:

Dear Mrs. Stone,

I have been directed to inform you that your son, Geoffrey William Stone, has been promoted to the rank of Flight Sergeant with effect from October 28th, 1944. May I again express my deepest sympathy to you and the members of your family in the loss of your son whose qualities and ability have thus been recognized.

Ten months later, in December 1945, Enfield Ellen received a War Service Gratuity of \$256.11 for the loss of her son Geoffrey. Geoffrey Stone, 19, is buried in Harrogate (Stonefall) Cemetery, Yorkshire, Section H. Row B. Grave 14. On his headstone are inscribed the words, SAFE IN THE ARMS OF JESUS.

At Lissett Airfield, there is an impressive Memorial to RAF 158 Squadron that was unveiled and dedicated in May 2009. Created by artist Peter Naylor, it is in the form of seven airmen and stands as part of a wind farm at the aerodrome. At the unveiling, Adrian Hammond of the 158 Squadron Association said, "We are pleased the 851 men and women who lost their lives while based at the site are to be honoured. The 158 Squadron had members from all over the Commonwealth who took part in bombing raids almost every day. The sculpture is a fantastic tribute to the memory of all the crew and personnel who kept our shores safe."

STRONACH, James Gatherum (#J/5665)

James Gatherum Stronach was the adopted son of Scottish parents who immigrated to Sarnia in 1930, when James or "Jimmie" was twelve. By all accounts, Jimmie was a popular and efficient airman. *Exceptional. A pupil whose work has the hallmark of hard work and intelligence* was one senior officer's assessment of the Sarnian. On June 14, 1943, Jimmie was piloting a twin-engine medium bomber on an anti-submarine patrol in the Sea of Biscay area. After leaving its base in England in 13:30 hours, neither the plane nor its four-man crew was ever seen again. James "Jimmie" Stronach, 24, has his name inscribed on the Runnymede War Memorial, Surrey, England.

James Stronach was born in Dundee, Scotland on December 21, 1918. He was the adopted son and only child of Henry Bullion Stronach and Margaret (nee Gatherum) Stronach. Henry Stronach and Margaret Gatherum were born in Scotland, in Dundee and St. Andrew's respectively, and when James was 12, the Stronach family immigrated to Canada around 1930. They ended up residing at 198 Bright Street in Sarnia and Henry supported his family by working as a Guard Inspector in the Electrical Department at the Sarnia Imperial Refinery.

James Stronach was a busy young man in and out of the classroom. He was educated in the Dundee, Scotland public school from 1923 to 1930 but from 1930 to 1932 he attended George Street Public School. He then spent five years at Sarnia Collegiate School before graduating in 1937. For a number of years he was a carrier for the *Canadian Observer* in Sarnia. He was active in sports, including tennis, hockey, football, baseball, golf and swimming, and his hobbies included model aircraft building, automobile racing mechanics and scouting work.

After graduating high school, James worked as a Laboratory Assistant with the Technical and Research Department at the Sarnia Imperial Refinery from September 1937 until he enlisted. Following are portions of two reference letters that his bosses, research chemists at Imperial Oil, wrote for the RCAF Recruiting Officer on behalf of James' application: *I have found him to be capable and trustworthy at any task he has been asked to perform. He has a good personality and is well liked by his fellow workers.; and During his time he has shown himself to be conscientious and capable in all classes of routine testing that has been assigned to him. We have great pleasure in*

recommending him for service.

Twenty-one-year-old James Stronach enlisted in the Royal Canadian Air Force on September 12, 1940 in London, Ontario. He stood five feet five and a half inches tall, had blue eyes and light brown hair, was single, and was residing at home with his parents on Bright Street in Sarnia at the time. After the war, his plan was to return to Sarnia and work as a chemist. He requested flying duties, with a preference to be a pilot or observer.

From #2 Manning Depot in Brandon, Manitoba, he received his initial air training at #2 Initial Training School (ITS) in Regina, Saskatchewan; at #8 Elementary Flying Training School (EFTS) in Vancouver (Sea Island), British Columbia; and at #3 Service Flying Training School (SFTS) in Calgary, Alberta. On May 28, 1941, James was awarded his Pilot's Flying Badge, when he received his wings at Calgary, Alberta, with the rank of Sergeant-Pilot.

In early June 1941, James spent a three-week leave at home in Sarnia, before transferring to an Operational school in Eastern Canada. He spent three months taking a Navigation Reconnaissance Course at #31 General Reconnaissance School (GRS) in Charlottetown, Prince Edward Island, until mid-September 1941. The Chief Instructor at #31 GRS wrote that James was *Exceptional. A pupil whose work has the hallmark of hard work and intelligence. He should be a valuable man in a G.R. Squadron.*

James was then posted to #1 Y Depot in Halifax. In early October 1941, he embarked overseas bound for the United Kingdom. Initially posted to #3 Personnel Reception Centre, on November 4, 1941 James became a member of RCAF #415 Swordfish Squadron "Ad Metam" (To the mark), with the rank of Sergeant-Pilot.

RCAF #415 Squadron was formed in August 1941 as a torpedo-bomber squadron at RAF Thorney Island, Hampshire, England operating a mix of Bristol Beaufort, Bristol Blenheim and Handley Page Hampden aircraft over the next two years. **RAF Coastal Command** played a pivotal role in the Allied war effort, most notably against U-boats during the Battle of the Atlantic, along with sinking enemy warships and merchant vessels, protecting Allied shipping from aerial attacks, reconnaissance and carrying out air-sea rescue.

As part of Coastal Command, #415 Squadron carried out anti-submarine patrols and shipping strikes in the English Channel and the Bay of Biscay, initially with bombs but later with torpedoes. While Stronach was with #415, the squadron moved its base a number of times, including at RAF St. Eval, North Coates, Wick, Leuchers, and Predannack. In September 1943, the squadron converted to Vickers Wellington and Fairey Albacore aircraft, attacking German E-boats, enemy merchant ships and larger warships. In July 1944, the squadron converted to Handley Page Halifax aircraft and joined No. 6 (RCAF) of Bomber Command.

"BULLY" is the aristocratic and well-favored mascot of an RCAF Coastal Command Squadron overseas. Here he is in an off-duty moment with four officers of the squadron. Left to right they are: FO. R. P. U. VAUGHAN, Montreal, the engineering officer; FO. JIM STRONACH, Sarnia, Ont.; FLT. LT. R. A. PATTERSON, Lindsay, Ont., the adjutant and (standing) FO. TOM FISHBOURNE, Montreal, the intelligence officer. R.C.A.F. Photo.

Montreal Gazette, August 11, 1942

G.K. Crummy, A.B. Clegg, W.A. Trask, J.G. Stronach

In June 1942, James was promoted from Sergeant-Pilot to Pilot Officer. In August, his parents received a cablegram in Sarnia informing them that their son had been promoted again, this time to the rank of Flying Officer in the R.C.A.F. While overseas, on various short leaves, James was able to visit some of his relatives in Scotland. In February 1943, Henry and Margaret Stronach received the news that their son James had been promoted to Squadron Leader, one of the youngest squadron leaders with the R.C.A.F. While overseas, aside from his official duties, he gave much of his time to executive work in the management of air force sports.

James Stronach October 1942

The Handley Page Hampden was a twin-engine medium bomber with a crew of four: pilot, observer, gunner/wireless operator and air gunner. It was often referred to by aircrews as the "Flying Suitcase" because of its cramped crew conditions. On June 14, 1943, Squadron Leader-Pilot James Stronach was part of a four-man crew aboard RCAF Hampden aircraft X2961. The aircraft took off from R.A.F. Station St. Eval at 13.30 hours. The bomber was on an anti-submarine patrol in the Bay of Biscay area. No word was received from the aircraft after it was airborne and it failed to return. Neither the crew or aircraft were ever recovered. Perishing with Squadron Leader James Stronach were Warrant Officer Woodrow Arnold Trask; Flying Officer George Kenneth Crummy; and Pilot Officer Alan Bernard Clegg.

Not long after, Henry and Margaret received a telegram from Royal Canadian Air Force headquarters at Ottawa advising them that their son, SQUADRON LEADER JAMES STRONACH WAS REPORTED MISSING AFTER AIR OPERATIONS ON JUNE 14. In the third week of June 1943, Henry received a letter from the Flight Lieutenant, R.C.A.F. Casualties Officer, for Chief of the Air Staff in Ottawa. Following are portions of that letter: *Dear Mr. Stronach:*

It is my painful duty to confirm the telegram recently received by you which informed you that your son, Squadron Leader/James Gatherum Stronach, is reported missing on Active Service.

Advice has been received from the Royal Canadian Air Force Casualties Officer, Overseas, that your son was a member of the crew of an aircraft which failed to return to its base after air operations, due to enemy action on June 14th, 1943. There were three other members of the Royal Canadian Air Force in the crew and they also have been reported missing. Since you may wish to know their names and next-of-kin, we are listing them below...

This does not necessarily mean that your son has been killed or wounded. He may have landed in enemy territory and might be a Prisoner of War. Enquiries have been made through the International Red Cross Society and all other appropriate sources and you may be assured that any further information received will be communicated to you immediately.

Your son's name will not appear on the official casualty list for five weeks. You may, however, release to the Press or Radio the fact that he is reported missing, but not disclosing the date, place or his unit. May I join with you and Mrs. Stronach in the hope that better news will be forthcoming in the near future.

At the end of June 1943, Margaret received the following letter from the Wing Commander, Officer Commanding, No. 415 R.C.A.F. Squadron:

Dear Mrs. Stronach:

It is with deep regret that I confirm that your son Squadron Leader James Gatherum Stronach is missing on air operations since the afternoon of Monday June 14th.

On that particular day Jimmie piloting his regular crew took off from the aerodrome at 1.30 p.m. on anti submarine patrol in the Bay of Biscay. Warrant Officer Woodrow Trask of Hanley, Saskatchewan was his navigator, and Flying Officer Kenneth Crummy of Grand Prairie, Alberta, and Pilot Officer Alan Clegg of 222 Aldine Street, St. James, Manitoba, were his wireless operator air gunners. They were due back at 8.30 p.m. but failed to return. Other crews of this squadron who were on a similar patrol had seen nothing of them nor were any wireless messages received from their aircraft.

Your son had filled a most important position in our squadron as flight commander. His sound judgement, tact in dealing with men, and his experience on air operations, particularly qualified him in this respect. His service with our unit was exemplary. Efficiency and harmonious relations with his men were characteristic of Jimmie. On air operations he had established a long record of effective sorties against the enemy. He possessed great courage and determination and pressed home his attacks in spite of fierce opposition.

Jimmie was very popular in or mess and with all members of the squadron. Officers and other ranks respected him highly and airmen felt free to seek his advice. His off handed manner and genial smile made him a welcome member of any group. His loss is a severe experience and is being keenly felt by all who knew him.

Jimmie's belongings and personal effects have been taken care of and will be forwarded to the Central Depository at Colnbrook for safe keeping in accordance with Air Ministry's instructions. May I now on behalf of the squadron express our very great sympathy to you in the distressing and uncertain word which you have received of your very dear son.

Also at the end of June 1943, Margaret received the following letter from the Flight Lieutenant, for Air Officer Commanding-in-Chief, RCAF, Overseas in London, England:

Dear Mrs. Stronach,

It is with deep regret that I must confirm the information which you already received from Air Force Headquarters, Ottawa, which stated that your son, Squadron Leader James Gatherum Stronach, was reported missing as the result of air operations on the 14th June, 1943.

Your son was Pilot of a Hampden aircraft, which took off at 1.30 p.m. on the 14th June on an anti-submarine patrol in the Bay of Biscay area and failed to return. No information has since been received concerning him, however, enquiries are continuing through the International Red Cross Committee and all other available sources, and any news which may be forthcoming will be communicated to you at once by Air Force Headquarters, Ottawa.

Please accept my deepest sympathy with you in your great anxiety.

In late July 1943, the Air Marshal in London, England, sent a response to Margaret's query for any information about her only son:

Dear Mrs. Stronach,

As soon as your letter of the fourth of July was received I made enquiries regarding your son, Squadron Leader James Stronach, whose present status of missing after air operations must have brought you great sorrow and anxiety.

Unfortunately there is nothing I can add to the information already given to you and no official advice has yet been received from enemy sources that your son is a prisoner of war. No one in No. 415 Squadron can make any observations which might be connected with the loss of the aircraft of which he was the captain. The aircraft failed to return from operations over the Bay of Biscay and I can assure you that there was a feeling of genuine regret when your son, whose fine leadership and valour had gained for him the honour of being Flight Commander of "A" Flight, did not return to his squadron. His loss to the Service at the present time is being keenly felt, as is his absence by his comrades who loved, respected and admired him.

The uncertainty will be hard to endure until you receive more definite word and you have my sincere sympathy. I earnestly hope you will receive good news as early as possible and that you will write to me if you think there is anything I can do at any time.

In January 1944, seven months after James Stronach had disappeared, the Stronachs received official notification from Ottawa stating that their son, *Squadron Leader James Stronach is now reported as missing, presumed dead.* James Stronach's death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas (Bay of Biscay).* In August 1945, Henry and

Margaret received a War Service Gratuity of \$670.74 for the loss of their only child. In mid-August 1946, Margaret received the following letter from the R.C.A.F. Records Officer in Ottawa:

Dear Mrs. Stronach:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son Squadron Leader J.G. Stronach. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

In May 1952, Henry and Margaret Stronach received the following letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff:

Dear Mrs. Stronach:

It is with reluctance that after so long an interval, I must refer to the loss of your son, Squadron Leader James Gatherum Stronach, but due to the lack of any information concerning him since he was reported missing, it must be regretfully accepted and officially recorded that he does not have a "known" grave.

Due to the extreme hazards attending air operations there are, unhappily, many thousands of British aircrew boys who do not have "known" graves and all will be commemorated on General Memorials that will be erected at a number of locations by the Imperial War Graves Commission (of which Canada is a member), each Memorial representative of a theatre of operations. One of these Memorials will be erected at Runnymede, England, and the name of your son will appear on that Memorial.

I realize that this is an extremely distressing letter and that there is no manner of conveying such information to you that would not add to your heartaches. I am fully aware that nothing I may say will lessen your great sorrow, but I would like to express to you and the members of your family my deepest sympathy.

James Stronach, 24, has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom, Panel 172. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

SUTHERLAND, Leslie Gordon (#R/99732)

Leslie "Les" Sutherland lived most of his life in Corunna before enlisting with the RCAF at age 22. One RCAF official assessed him as *Bright, enthusiastic type, calm and reserved personality. Very good material for Aircrew*. Leslie was eventually assigned to 426 Squadron as a pilot. After almost completing a tour of operations in the hope of becoming an instructor and receiving his commission, Leslie and his crew were killed when his aircraft was shot down after a night attack on Dortmund, Germany. The Royal Canadian Legion, Branch 447 in Corunna, is named in Leslie Sutherland's honour. He was the first known "killed in action" serviceman from Moore Township during World War II.

Leslie "Les" Sutherland was born in London, Ontario on November 26, 1918, the only son of Donald Gordon and Maude Louise (nee: Lossing) Sutherland. He was also the step-son of Arthur Stanley Turnbull of Corunna, Ontario.

Donald Gordon Sutherland, known by his middle name, was born on October 9, 1878 in Wallaceburg. On August 18, 1902, twenty-three-year-old Gordon Sutherland, then a brakeman, married twenty-one-year-old Watford born Maude Lossing (born June 1881), a domestic at the time in St. Thomas, Ontario. Gordon later worked as a steamfitter. The Sutherlands had three children together: daughters Maura Jean, born in 1908; and Sarah Ruth, born July 22, 1915, and their youngest, Leslie. Both girls were known by their middle names, and Ruth later married Captain George Boulton Albinson of Mooretown on December 19, 1936 in Corunna.

On December 30, 1915, thirty-seven-year-old Gordon Sutherland enlisted in the Canadian Expeditionary Force in London, Ontario. He was residing on Wilson Avenue in London at the time, with his wife Maude and their two children Jean, age 7, and Ruth, age 5 months. He stood five feet five inches tall, had grey eyes and dark brown hair, was working as a steamfitter and recorded his next-of-kin as his wife Maude Sutherland. He became a Private with the 135th Overseas Battalion.

Gordon did not have the opportunity to serve overseas. During his service in Canada he experienced periods of aggravated asthma and periods of relief. Treatment included anti-asthmatic medication, fresh air in tents and tonics. On August 18, 1916, he was transferred to the 111th Battalion at Camp Borden, and the following day the transfer was amended to Casualties Manning Depot #1, London—in hospital. In early September 1916, Gordon

underwent a medical assessment at #2 Manning Depot in Toronto. There he was diagnosed with chronic asthma.

Medical officials determined that Gordon “had asthma almost constantly from 1900 until about 1910 when he went west where he was more or less free from it. Came back to London 1913 and since then has had frequent attacks, only able to work about half of the time. Between attacks feels well. Felt well at time of enlistment, had first attack since enlistment in July, this attack severe and lasted until last of August, during the attack quite unable to carry on... Will probably always be subject to attacks and will never become an efficient soldier.” His asthma was determined to be a chronic disease, a permanent condition with periods of aggravation and periods of relief that had merely undergone a natural course during his service. They recommended him for discharge as medically unfit. So with less than one year of service and only in Canada, Gordon was struck off service on October 16, 1916 in Toronto. Just over two years later, Maude gave birth to their third child, Leslie.

Tragedy struck the family on June 5, 1920, when Leslie was about one-and-a-half years old. At the age of 41, his father, Gordon, died in London due to “exhaustion from chronic mental disease”. His Veterans Death Card records his death as “Died at hospital for insane, London, Ont. on 5th June 1920 of paralysis”. After Gordon’s death, widowed Maude Sutherland lived on Marantete Avenue in Windsor for a time. One of the people to visit Maude after the loss of her husband was Arthur Stanley Turnbull. Arthur, a World War I veteran, was very connected to the men who served and visited families of those who did not return and those who died as a result of their experiences.

On May 17, 1922 in London, Maude Sutherland, a 40 year-old widow and a housekeeper who was residing on Duchess Avenue in London, married Arthur Turnbull, age 35, a farmer living in Corunna. Arthur, Maude and their children--Jean, Ruth and Leslie--made their home in Corunna. Arthur later became a customs officer on Stag Island.

Arthur Turnbull was no stranger to serving his country and was a veteran of the Great War. Born May 12, 1887 in Strathroy, Arthur was the adopted son of James and Isabella (nee Harris) Turnbull. James and Isabella had no sons of their own. Since they needed help on their farm, located on the south side of the creek in Froomfield, they adopted Arthur from another family. This was a common practice at the time. In 1901, James, a farmer, and Isabella Turnbull were living in Lambton West, Moore Township, with their adopted daughter Jessie, 22, and adopted son Arthur, 13. Arthur’s early military career was with the Moore Mounted Infantry (his uniform from that time is in the Moore Museum in Mooretown).

Arthur Turnbull enlisted in the Canadian Expeditionary Force on January 11, 1915 in London, Ontario. A farmer at the time, he recorded that he had 11 years militia experience and was a Sergeant-Major. The twenty-seven-year-old stood five feet seven and a half inches tall, had grey eyes and light brown hair, was single and recorded his next of kin as his father, James Turnbull, in Corunna. Arthur became a member of the 7th Canadian Mounted Rifles (CMR).

On June 22, 1915, he arrived in the United Kingdom aboard the *S.S. Caledonian*. His trip overseas must have been an unpleasant one – he was dealing with measles for 13 days. On July 1, 1915, he was promoted to Sergeant at Dibgate Camp, a member of the 2nd Canadian Divisional Cavalry.

On September 15, 1915, he arrived in France. In January 1916, he became a member of the 1st Canadian Hussars, Special Service Squadron. He was hospitalized twice while in France: in late February 1916 for four days due to myalgia; and in early March 1916 for sixteen days due to influenza. In May 1916, he became a member of the Canadian Corps Cavalry Regiment (later renamed the Canadian Light Horse). In November 1916, he was promoted in rank to Squadron Sergeant-Major (Warrant Officer Class 2).

On August 17, 1918, he was awarded the “Medaille Militaire by the President of the French Republic for distinguished service rendered during course of campaign”. He served in France for more than three years, until the Great War ended on November 11, 1918.

He was discharged on demobilization in late April 1919 in Toronto. Arthur returned to his parents’ home in Moore Township and resumed working on the farm. In 1921, the 34 year-old was living with his parents, James and Isabella, in Moore Township and the other member of the Turnbull household was a 50 year-old lodger, Eva Bailey. The following year, Arthur Turnbull married widowed Maude Sutherland and, along with her children Jean, Ruth and Leslie, settled in Corunna. Years later, Regimental Sergeant Major (WO2) Arthur Turnbull of the 1st Hussars was awarded the Colonial Auxiliary Forces Long Service Medal.

Leslie Sutherland received his education at Corunna Public School from 1928 to 1934 and then Sarnia

Collegiate from September 1934 to April 1939. Records show that Leslie was a well-rounded individual who found time to pursue many interests. He took a variety of senior courses at SCITS ranging from Canadian History, Ancient History, and algebra to chemistry, physics and geometry. He was an avid sportsman who enjoyed playing football, hockey, baseball, swimming and golf. Leslie's passion was golf and he played as often as he could although he found time for his hobbies of stamp collecting, wireless radio, boating and woodcraft. He also spent many summers on one of his favourite places, Stag Island. He was a very good swimmer, received a Certificate in Life Saving from the Humane Society, and was also a member of the Central Century Club. His nephew, John Albinson, recalls that his uncle being described as "gregarious and outgoing" by other family members.

After graduating high school, Leslie worked as a deckhand with Sarnia Steam Ship Company for one full season, from June to December 1939. From January to March 1940 he was unemployed for those months. On March 1, 1940, he began employment with Sarnia Imperial Oil Refinery as a pipefitter, where he worked until the time he enlisted. He was also a member of the 2nd-11 Royal Canadian Engineers (Reserve) in Sarnia where he had military training as a Sapper from August 15, 1940 until May 12, 1941.

Twenty-two-year-old Leslie Sutherland underwent his Royal Canadian Air Force medical and completed his Attestation Paper on May 3, 1941, in London Ontario. He was sworn in and formally accepted into the RCAF on May 16, 1941. He recorded his occupation as pipefitter with Imperial Oil and his next of kin as his mother, Maude Louise Turnbull in Corunna. He also recorded that his father, Donald Gordon, a steamfitter, was deceased.

He requested flying duties, with a preference to be a pilot. Two of his references included Mr. W. Lyford, a foreman at Imperial Oil, and Dr. R. MacGregor, a dentist in Corunna. In a reference letter written for the RCAF Recruiting Officer, Bryan Cathcart, a merchant in Corunna wrote, *I have known Leslie from boyhood and can recommend him as a young man very highly respected in this community. He has good morals, character, temperate, steady and reliable in his work. I am sure you will have no regrets for anything you may be able to do for him.*

Leslie stood five feet eight inches tall, weighed 144 pounds, had brown eyes and dark brown hair, was single, and was residing at home with his parents in Corunna at the time. He requested flying duties, with a preference to be a pilot or observer. At his interview, the Recruiting Officer recorded that Leslie was *Clean, courteous, intelligent looking, rather shy, well mannered. Pleasing personality. Necessary qualifications for pilot. Well recommended. Splendid pilot material.* The Medical Board described Leslie as *Bright, enthusiastic type, calm and reserved personality. Very good material for Aircrew.*

From the Recruiting Centre in London and then #1 Manning Depot in Toronto, Sutherland began his training at RCAF Station Trenton on May 28, 1941. He continued his air training at #1 Initial Training School (ITS) in Toronto beginning on July 15, 1941; at #7 Elementary Flying Training School (EFTS) in Windsor beginning on September 1 (flying in Finch Fleet aircraft); and at #14 Service Flying Training School (SFTS) at Aylmer, Ontario beginning on October 25. Leslie was awarded his Pilot's Flying Badge on January 16, 1942. On February 14, 1942, he was posted to #1 Y Depot in Halifax. From February 14 to 23, 1942, he received his 10-day pre-embarkation leave. On March 12, 1942, Leslie embarked overseas from Halifax bound for the United Kingdom.

Arriving in the U.K. on March 23, 1942, he was initially posted to #3 Personnel Reception Centre. On May 1, Sutherland was transferred and continued his training at RAF Station Colerne before being posted to #2 (Pilots) Advanced Flying Unit (2AFU), based at RAF Brize Norton, on June 24, 1942. Approximately three weeks later, on July 15, he was posted to #3 (Pilots) Advanced Flying Unit (3AFU), based at RAF Cranwell. On August 11, 1942, Leslie became a member of #22 Operational Training Unit (O.T.U.), based at RAF Station Wellesbourne Mountford. On November 7, 1942, Leslie became a member of RCAF #426 Thunderbird Squadron "On Wings of Fire", part of **Bomber Command**, with the rank Warrant Officer Class II – Pilot.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

No. 426 Squadron was established at RAF Dishforth, Yorkshire, on October 15, 1942, as part of No. 4 Group. In January 1943, it was transferred to No. 6 (RCAF) Group. The squadron was equipped with Vickers Wellington aircraft (nicknamed "Wimpey"), a twin-engine medium bomber, to deliver bombs and mines to the enemy. In June 1943, the squadron transferred to RAF Linton-on-Ouse and switched to Avro Lancaster bombers. Later in April of 1944, the squadron began to convert to Handley Page Halifax bombers that they used until the end of the war in Europe. The thunderbird crest used by the squadron originates from North American natives, and according to myth, signifies disaster and death to anyone on the ground who perceives it. No. 426 Squadron took part in many daring raids over enemy territory, including raids on Berlin, Leipzig and Frankfurt.

In mid-May 1943, Leslie Sutherland and his crew were able to avoid near disaster. On the night of May 13, 1943, their Wellington bomber HE320 took off from Dishforth airfield at 23.38 hours to undertake an operational flight to bomb Bochum, Germany. Just after approaching the last turning point before reaching the target, the aircraft was held in searchlights for fifteen minutes and damaged by flak at the same time. Pilot Leslie Sutherland took evasive action and descended to 12,000 feet. Due to the damage, the crew jettisoned all of their bomb load live in the Krefeld area at 02.15 hours from 13,000 feet and made for home. Despite the damage, the crew were able to make a safe return to Yorkshire and land safely at Catfoss airfield at 05.25 hours on May 14, 1943.

WO II-Pilot Leslie Gordon Sutherland

Ten days later, after almost completing a tour of operations in the hope of becoming an instructor and receiving his commission, the pilot from Corunna was killed. On the night of May 23/24, 1943, Leslie Sutherland and his same five-man crew were aboard Vickers Wellington X aircraft HE281 (markings OW-) of 426 Squadron that left its base at Dishforth. It was part of a group of 826 bombers from different squadrons that joined together on a night attack on Dortmund, Germany, an industrial centre in Germany's Ruhr region. It was the largest operation since the 1000 bomber raids, and was to be the last sizeable raid on Dortmund for exactly one year.

The Pathfinder Force met with clear conditions and marked the target accurately, leading to a good raid. After successfully dropping its 4,500 pound payload and confirming the strike, Sutherland and the crew of Wellington HE281 headed northwest towards RAF base Dishforth, England 1,000 kilometres away. Wellington HE281 failed to return to its base. The aircraft had been shot down by a Messerschmitt Bf 110 night-fighter, reportedly by Wolfgang Thimmig, a German Luftwaffe night fighter ace who by the end of the war, had achieved 24 aerial victories and reached the rank of Oberstleutnant (equal to Lieutenant Colonel). Wellington HE281 crashed in Haaksbergen, Holland, killing all on board. Perishing with Leslie Sutherland were WO.s Kenneth Howard Masterson and Levie Afrien Rivest; and Sgt.s William Dunkerley (RAF) and Sydney Jepson (RAF). There were 38 aircraft lost in the raid.

Not long after, his mother, Mrs. Maude Turnbull, received official notification in Corunna that her son, SERGEANT LESLIE GORDON SUTHERLAND WAS REPORTED MISSING AFTER AIR OPERATIONS OVERSEAS. At least five weeks later, she learned that her son had been pronounced dead on May 25, 1943. In October 1943, Leslie was officially listed on the R.C.A.F. casualty list as, *Previously reported "missing" after air operations (overseas), and subsequently reported "missing believed killed" now "presumed dead" for official purposes*. In late-May 1946, Maude Turnbull received a War Service Gratuity of \$383.71 for the loss of her only son. Leslie Sutherland's medals included the 1939-45 Star, the A/C Europe Star, the Defence Medal, the AMR and CVSM Medal and clasp.

Locals in the area of the charred Wellington bomber initially buried the crew members including Leslie Sutherland, 24, who was buried as an unknown soldier. After the war, his body was exhumed, identified and re-buried in Haaksbergen General Cemetery, Netherlands, Plot 4, Row 2, Grave 11. On Leslie Sutherland's headstone are inscribed the words, THE LORD GIVETH AND THE LORD TAKETH AWAY BLESSED BE THE NAME OF THE LORD. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II. Leslie's name is also inscribed on two memorial plaques in Corunna: one on a brass altar in Christ Anglican Church in Corunna; and one in the entrance foyer of Branch 447 Corunna of the Royal Canadian Legion. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

The Royal Canadian Legion, Branch 447 in Corunna, is named in Leslie Sutherland's honour. He was the first known "killed in action" serviceman from Moore Township during World War II. The Corunna Legion branch was chartered on December 4, 1946 and the Charter President was Arthur Turnbull, World War I veteran and Leslie Sutherland's stepfather. The Corunna Legion was named the Honourable Leslie Sutherland Branch from its beginning. The first meetings of the branch were held in the Anglican Church Hall and moved to its Bereford Street location in 1948. In April 1988, Branch 447 held the official opening of its current location on Albert Street.

Many years later in 1977, a nephew of Leslie's, John Albinson, visited a friend in Holland. While there, John happened to mention that his uncle had been killed in the war when his aircraft had been shot down in Haaksbergen. The friend stated that it wasn't far away from where they were, so the next day, John and his friend visited Haaksbergen. Somehow, they located the property on which Leslie's aircraft had crashed. Despite the fact that 34 years had passed, they met the farmer who owned the property and who witnessed the crash. He was still living in the same house and tending the same farm in 1977. The farmer vividly remembered the circumstances of the crash.

He stated that in the early morning darkness he heard the aircraft and the noise of the engines getting louder. When he looked through the farmhouse window, he saw the aircraft engulfed in flames and heading towards the house as it plummeted from the dark sky. Fearing that the aircraft was going to hit the house, the farmer got his wife and two young girls out of the house. They watched in horror as the aircraft overshot the house and crashed in a copse of trees about 300 meters past the house but still on the farmer's property.

After John asked the farmer where the aircraft had crashed, the farmer escorted him and his friend to the copse of trees on his property. Thirty-four years later, the charred aircraft was still lying in the trees in the exact spot where it had crashed. To honour his uncle, John took a small piece of the aircraft, a turnbuckle perhaps.

Sometime around 2008, Marg Emery, a long time member and volunteer with the Legion, took on the project of recognizing and paying tribute to the Corunna Branch namesake. Thanks to her efforts, the Honourable Leslie Sutherland Royal Canadian Legion Branch in Corunna proudly keeps alive the memory of its namesake. In the foyer hangs a photo of Leslie and a large plaque bearing his name. The Legion's main room features other memorabilia, a

photo album of Leslie's life and his medals mounted on the wall, including his mother's Silver Cross. Thanks to John Albinson, behind a piece of Plexiglas is the small charred turnbuckle he picked up in 1977, which is an original piece of the Wellington HE281. Thirty-four years had passed but still lying in a copse of trees on the farmer's property was the burnt wreckage of the bomber.

TESKEY, Stanley James (#J/95517)

So much of Stanley James Teskey's short life had to do with timing. He was only seventeen when he enlisted, so he needed written permission from his parents to do so. On an April 1945 bombing mission that claimed his life, his Halifax bomber collided with another en route to Germany and all crew members of both planes were killed. Ironically, Stanley Teskey, 19, of Russell Street, died two weeks before the war in Europe ended.

Stanley Teskey was born in Sarnia on December 15, 1925, the son of Charles Joseph and Mary Elizabeth (nee Peers) Teskey. Sarnia born Charles Teskey married Wallaceburg born Mary Peers in Sarnia on May 8, 1921 and they had three children together: Douglas Charles (born Nov. 4, 1922), Stanley James and Gordon Wilfred. Gordon was born at Sarnia General Hospital on March 8, 1932, but unfortunately, he was a stillborn birth. The Teskey's lived at 334 North Russell Street and Charles supported his family by working as a toolmaker in Sarnia. George Teskey, Charles' brother and Stanley's uncle was living nearby at 558 Confederation Street.

Before Stanley enlisted in the service, his older brother, Douglas, joined the RCAF. In June 1943, Doug graduated from the #1 Service Flying Training School at Camp Borden and the next month married Frances Mary (nee Warwick). Later that July, Doug Teskey arrived overseas. He was posted to an R.A.F. Bomber Command squadron, where he participated in raids on Leipzig, Ludwigshaven, Anheim, Cologne, Essen and other Nazi industrial centres. Of these, he thought the "toughest" target was Leipzig, where the gunners of the plane that he piloted shot down one German fighter and damaged another.

F/Lt. Douglas C. Teskey

It was a tribute to his ability to "stickhandle" with a heavy bomber that neither the plane nor any member of its crew was hit while Douglas Teskey was at the controls. While overseas, Douglas was twice promoted, from Pilot Officer to Flying Officer, and again to the rank of Flight Lieutenant. At the time of Stanley's death in April of 1945, Douglas was a Flight Lieutenant, serving in England. In May 1945, Douglas Teskey, a veteran of thirty bombing raids over Germany, returned home to Sarnia on leave to be with his parents and his wife Frances. Stanley's experience, unfortunately, differed from his older brother's.

After receiving his education at Confederation Street Public School from 1931 to 1939 and then Sarnia Collegiate from September 1939 to March 1943, Stanley Teskey worked at Sarnia Imperial Oil as a laboratory assistant for four months from March 1943 until he enlisted. His hobbies were hunting, fishing and camping, and he was a member of the Sarnia 44th Air Cadets from September 1942 to June 1943.

Now seventeen, Stanley Teskey enlisted in the Royal Canadian Air Force on June 22, 1943 in London, Ontario. He stood five feet eight inches tall, had blue eyes and light brown hair, was single, and was residing at home on Russell Street with his parents at the time. Being only seventeen-and-a-half years old when he enlisted, he was required to bring a note signed by both his parents giving their permission for him to join the RCAF. The note he received from his parents read, *We the undersigned do give permission for our son Stanley James Teskey to join the Royal Canadian Air Force*. Stanley requested flying duties, keen to serve as part of an aircrew. After the war his plan was to remain with the RCAF as an airman.

From #9 Recruiting Centre in London and #1 Manning Depot in Toronto, Stanley began his air force training at #1 Air Gunners Ground Training School (AGGTS) in Quebec City and then at #4 Wireless School (WS) in Guelph before being posted in early December 1943 to RCAF Station Trenton. He received a five-day Christmas leave between December 24-28, 1943. In the new year, he continued his training at #6 Initial Training School (ITS) in Toronto and at #9 Bombing and Gunnery School (B&GS) in Mont Joli, Quebec. He was awarded his Air Gunner's Badge on June 2, 1944 at #9B&GS at Mont Joli. He then received a 14-day pre-embarkation leave. On June 17, 1944, he continued his training at #3 Aircrew Graduate Training School (AGTS) in Three Rivers, Quebec. In mid-July, he was posted to #1 Y Depot in Lachine, Quebec. On July 20, 1944, Stanley Teskey embarked overseas from Halifax bound for the United Kingdom.

Disembarking in the U.K. on July 27, 1944, Stanley was initially posted to #3 Personnel Reception Centre. On August 22, 1944, he continued his air training in England at #86 Operational Training Unit (OTU) at RAF Gamston. On October 13, 1944, he was transferred to #22 Operational Training Unit (OTU) at RAF Wellesbourne Mountford, and in early December 1944 was transferred to 76 Base, RAF Topcliffe. In mid-December 1944, the *Canadian (Sarnia) Observer* reported that Stanley was celebrating his 19th birthday in England, while his brother Douglas had celebrated his second wartime birthday overseas on November 4th. It also reported that the brothers had recently spent three leaves together while in England.

Pilot Officer-Air Gunner Stanley James Teskey

In mid-January 1945, Stanley was serving with #1659 Conversion Unit at RAF Topcliffe. On March 8, 1945, he became a member of RCAF #426 Thunderbird Squadron "On Wings of Fire", part of **Bomber Command**, with the rank of Pilot Officer-Air Gunner.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

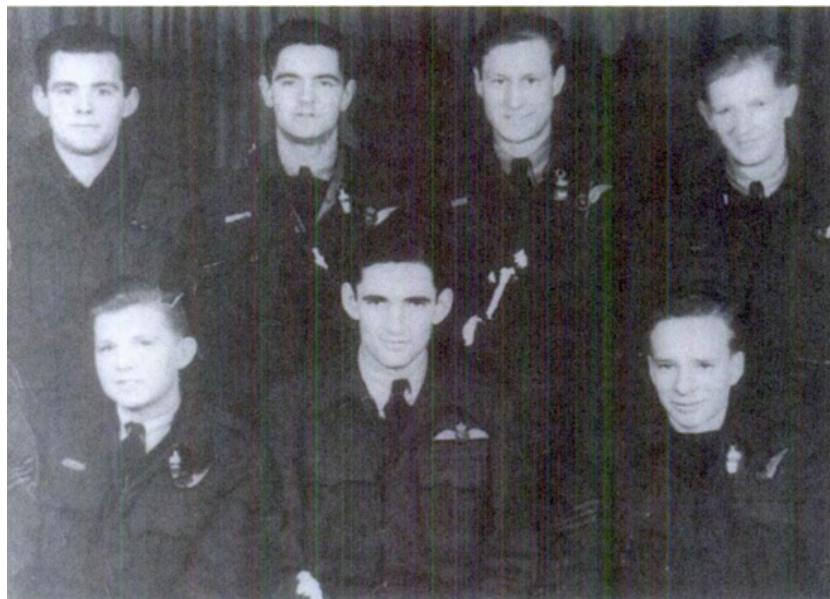

No. 426 Squadron was established at RAF Dishforth, Yorkshire, on October 15, 1942, as part of No. 4 Group. In January 1943, it was transferred to No. 6 (RCAF) Group. The squadron was equipped with Vickers

Wellington aircraft to deliver bombs and mines to the enemy. In June 1943, the squadron transferred to RAF Linton-on-Ouse and switched to Avro Lancaster bombers. Later in April of 1944, the squadron began to convert to Handley Page Halifax aircraft, four-engine heavy bombers that they used until the end of the war in Europe. The thunderbird crest used by the squadron originates from North American natives, and according to myth, signifies disaster and death to anyone on the ground who perceives it. No. 426 Squadron took part in many daring raids over enemy territory, including raids on Berlin, Leipzig and Frankfurt.

On April 25, 1945, Stanley Teskey was part of a crew aboard Halifax Mk. VII aircraft NP820 (markings OW-W) that took off at 15.04 hours from RCAF Station Linton-on-Ouse, Yorkshire. Circling the airfield for the last time, Halifax NP820 climbed to its designated flight altitude and from there, followed the navigator's course to Wangerooge. Along with some 482 aircraft (twenty from No. 426 Squadron), it was part of an operation to carry out a bombing mission on Wangerooge, Germany, intended to destroy coastal batteries that controlled the approaches to Bremen and Wilhelmshaven. During the flight to their target, the crew may have been preoccupied with rumours that were making the rounds that #426 Squadron might be back in Canada before summer was out. They were excited about the prospect of going home and seeing their families again.

Unfortunately, nothing further was heard from Halifax NP820 after taking off from its base. Airmen who returned from the mission reported that, about one hour from the target, Halifax NP820 was in a mid-air collision over the North Sea with #408 Squadron Halifax aircraft NP796. F/L Mercer of #426 Squadron, an eyewitness flying in Halifax NP824 who saw the collision and watched the aircraft crash into the sea said of Jim Tuplin's aircraft (NP820), *When the plane over Jim's hit that air pocket, it crashed Tupp's kite into the North Sea. His Halley was on my right side, but we had to keep going to drop our bombs on Wangerooge. On the way back to England, we dropped low over the crash area and saw no survivors.*

F/L Mercer who safely returned to base later wrote, *The accident on April 25 happened about 3:30 (p.m.). We went in and bombed and turned around, coming straight back to the accident. We were the first to notify air-sea rescue about it. There was nothing to be seen but two little rubber dinghies and bits of two aircraft. The flying boat (air-sea rescue) arrived about an hour and a half after the accident and whether they landed (on the North Sea), I am not in a position to say as they were not from our station.*

Crew of Halifax NP820

Back L/R: Reg Evans, Dennis Curzon, **John Ross**, Ronald Roberts
Front L/R: **Stanley Teskey**, James Tuplin, Earl Hicks

Less than two weeks after the crash, the Wing Commander of #426 Squadron wrote a letter to the wife of Jimmie Tuplin, one of the airmen of NP820. A portion of the letter read, *Your husband and his crew were detailed, along with other members of the squadron, to carry out an attack on enemy installations at Wangerooge, Germany. Before reaching their objective, other crews from the squadron saw your husband's aircraft collide with an aircraft from another squadron that also operates from this station. Both aircraft were seen to disintegrate in the air and*

crash into the sea. From the information obtained from other crew participating in this operation, I cannot hold very much hope for the survival of your husband and the members of his crew.

Perishing with Pilot Officer Stanley Teskey in the Halifax were Flying Officer John Douglas Carlisle Ross (of Sarnia, included in this Project); Pilot Officer's James Chester Tuplin, Dennis Rupert Humphrey Curzon and Earl William Hicks; F/Sgt.'s Ronald Roberts (RAF) and Reginald Gordon Evans (RAF). All seven airmen in Halifax aircraft NP796 were also lost. Seven aircraft were lost on this operation and six of them were due to collisions, despite weather conditions being almost perfect. This was the last operation of the war for RCAF #426 Squadron.

In late April 1945, Charles and Mary Teskey on Russell Street in Sarnia received a telegram from Ottawa informing them that their son, FLIGHT SERGEANT STANLEY JAMES TESKEY HAS BEEN REPORTED MISSING ON AIR OPERATIONS OVERSEAS ON APRIL 25. Approximately two weeks after Stanley's death, VE Day was declared, ending the war in Europe.

In early May 1945, Mary received the following letter from the Wing Commander, Officer Commanding, 426 Squadron, R.C.A.F. Overseas:

Dear Mrs. Teskey:

Before you receive this letter you will have been informed by telegram that your son, Flight Sergeant Stanley James Teskey, is missing as the result of air operations. I deeply regret that I have not been able to write to you sooner to give you such details as are available.

Your son and his crew were detailed along with other members of the Squadron, to carry out an attack on enemy installations at Wangerooge, Germany. They took off at 3.00 P.M. on the afternoon of the 25th April 1945 and set course for the target. Approximately forty minutes before reaching their objective, other crews from this Squadron saw your son's aircraft collide with an aircraft from another Squadron which also operates from this Station. Both aircraft were seen to disintegrate in the air and crash into the sea. From the information obtained from other crews engaged in this operation, I cannot hold very much hope for the survival of your son and the other members of the crew. For official purposes, and because of the lack of concrete evidence, the members of the crew are still listed as missing.

The personal effects of your son have been gathered together and forwarded to the Royal Air Force Central Depository where they will be held for a period of at least six months before being forwarded to you through the Administrator of Estates, Ottawa, Ontario.

The loss of your son was sustained with great regret by the members of this Squadron, for although he had only been with us a short time, he was rapidly developing into a very capable Air Gunner. He was fast becoming popular with the members of the Squadron and was particularly admired by his own crew mates. I can say personally that he set a splendid example to all ranks and his loss is being felt very keenly.

On behalf of the entire Squadron I would like to take this opportunity to tender to you our sincere sympathy in your great anxiety. In closing I would like to assure you that if any further information should be received it will be immediately communicated to you.

Stanley Teskey's death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas (Germany)*. In March 1946, Charles and Mary Teskey received a War Service Gratuity of \$311.65 for the loss of their son.

In mid-February 1947, Mary received the following letter from the Wing Commander for Chief of the Air Staff in Ottawa:

Dear Mrs. Teskey:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son, Pilot Officer, S.J. Teskey. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

In April 1952, Charles received the following letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff:

Dear Mr. Teskey:

It is with reluctance that after so long an interval, I must refer to the loss of your son, Pilot Officer Stanley James Teskey, but due to the lack of any information concerning him since he was reported missing, it must be regretfully accepted and officially recorded that he does not have a "known" grave.

Due to the extreme hazards attending air operations there are, unhappily, many thousands of British aircrew boys who do not have "known" graves and all will be commemorated on General Memorials that will be erected at a number of locations by the Imperial War Graves Commission (of which Canada is a member), each Memorial representative of a theatre of operations. One of these Memorials will be erected at Runnymede, England, and the name of your son will appear on that Memorial.

I realize that this is an extremely distressing letter and that there is no manner of conveying such information to you that would not add to your heartaches. I am fully aware that nothing I may say will lessen your great sorrow, but I would like to express to you and the members of your family my deepest sympathy.

Stanley Teskey, 19, has no known grave. He is memorialized on the Runnymede War Memorial, Surrey, United Kingdom, Panel 281. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II. SOURCES: A, B, C, D, E, F, G, J, L, M, N, 2C, 2D, 3J, 4B, 7C, 7E, 8X, 8Y, 10B, 10U, 10V

THAIN, Clare Kenneth (#J/17937)

To lose one family member in war is terrible, but for John Thain WWII must have been horrible and tragic. Already a widower, John lost two of his three sons eleven months apart. Clare, 23, his middle son, died in May 1944 during a flight which crashed in a remote, hilly region of India.

Clare Thain was born in Sarnia on June 18, 1920, the middle son of John and Isabella (nee Miller) Thain. Born in Birmingham, England, John Thain married Belfast, Ireland born Isabella Miller in Toronto on October 17, 1914. John and Isabella Thain had four children together: daughter Myrtle (later Myrtle James), and sons Jack Alexander (see below), Clare and Donald B. John Thain supported his family working as a bricklayer with Imperial Oil in Sarnia, and the Thains lived at 200 Bright Street. All three Thain brothers were newspaper carriers for the *Canadian Observer* in Sarnia for a time. When Clare was fourteen years old, his mother, Isabella, died in 1934 at the age of forty-five from cancer.

All three Thain brothers served during the war and all three were members of the RCAF. At the time of Clare's death, oldest brother Jack Thain, a Flying Officer- Navigator/Bomb Aimer, had already been reported missing over the Bay of Biscay since early June of 1943. It was believed that Jack had been on an anti-submarine operation at the time. Clare's younger brother, Flight Sergeant Donald Thain, had enlisted in the R.C.A.F. on August 2, 1943 and trained at Toronto; Winnipeg; and Paulson, Manitoba where he received his wings in June of 1944.

Donald's graduation was a bittersweet moment for widowed-father John Thain. He was proud of Donald's success, yet his other two sons, also R.C.A.F. flying officers, were already casualties of war at the time. Donald was stationed at Patricia, Vancouver Island for a time and returned to Sarnia in September 1946, after serving in the RCAF in Newfoundland. Like Jack, he was also involved in anti-submarine warfare. After the death of the two Thain boys, the RCAF would not allow Donald to serve overseas.

Clare Thain was an active young man. Clare was educated at Devine Street Public School from 1927 to 1934 and then Sarnia Collegiate from September 1934 until June 1939. His senior courses included English Composition, English Literature, Canadian History, mathematics, chemistry and French Authors. He was active in many sports, including swimming, hockey, baseball, rugby, gymnastics, weight-lifting and track and field. Outside of school and sports, Clare was very busy: he completed four years of cadet training; he was involved in scouting; his hobby was photography; and he attended St. John's Anglican Church.

During his high school years, he worked for the *Canadian Sarnia Observer* as a paper carrier and wrapper from 1935 to 1939. In a reference letter as part of his RCAF application, the Circulation Manager at the *Observer* wrote of Clare; *He is thought very highly of by this department and by all his customers. He is personable, ambitious, courteous, honest... He was one of the best boys on our list of carriers.* In 1939-1940 Clare worked as a messenger and clerk for Ligett's Drug Store in Sarnia. In 1940 he was employed as an assistant manager and clerk at the National Club Building (Harris Brothers - Tobaccos, Confections, 168 North Front Street), working there until he enlisted.

On May 17, 1941, Clare Thain served as best man at his older brother Jack's wedding (Jack had joined the RCAF in July 1940) to Miss Rhoda Leona Westlake in Wyoming, Ontario. Eleven days after serving as best man, twenty year-old Clare Thain enlisted in the Royal Canadian Air Force on May 28, 1941 in London, Ontario. He stood five feet six inches tall, had hazel eyes and brown hair, was single, and was residing at home with his father on

Bright Street at the time. Clare requested flying duties, specifically wanting to be a pilot. His post-war ambition was to enter the field of commercial advertising. The Recruiting Officer wrote this of Clare: *Calm, painstaking, pleasing personality and appearance, courteous, honest and ambitious. Already has a brother in the R.C.A.F. as an Observer and is most anxious to join the same service.*

From the Recruiting Centre in London and #1 Manning Depot in Toronto, Clare received air force training at #1 Technical Training School (TTS) in St. Thomas; at #1 Initial Training School (ITS) in Toronto; at #1 Wireless School (WS) in Montreal; and at #1 Bombing and Gunnery School (B&GS) in Jarvis. He was awarded his Air Gunners Badge on March 30, 1942 at B&GS at Jarvis. The Chief Instructor and Commanding Officer at B&GS had the following remarks about Clare: *A bright, enthusiastic student, can be relied upon to carry any job through, and a pleasant chap, good humoured at all times. Very popular with his classmates.* Clare then received a 15-day pre-embarkation leave, before being posted to #1 Y Depot in Halifax. Clare Thain embarked overseas from Halifax bound for the United Kingdom on April 30, 1942.

Initially posted to #3 Personnel Reception Centre, Clare continued his training in the U.K. at #4 Signals School (SS) at RAF Madley and then at #3 Radio Direction Finding (RDF) School at RAF Prestwick. In June 1942, while in Scotland, Clare unexpectedly met his brother. Clare had just arrived at an unnamed railway station terminal with a detachment of R.C.A.F. men en route to the south of England when outside the coach window, he saw standing on the station platform his brother Jack. Jack was waiting on the platform for another train and Clare was fortunate enough to hail Jack from the train window. The two brothers were able to meet up for a happy reunion during a 10-minute stop. On August 18, 1942, Clare became a member of #1 (Coastal) Operational Training Unit (OTU) at RAF Silloth.

On October 25, 1942, Clare was transferred to **RAF Eastern Air Command** in India. He was initially a member of RAF #217 Squadron. He received a 14-day leave during the first two weeks of April 1943. In mid-July 1943, Clare became a member of RAF #194 Squadron “*Surrigere colligere*” (To arise and to pick up), with the rank of Flying Officer-Wireless Operator/Air Gunner.

No. 194 Squadron was formed in October 1942 based at Lahore, India. It began its existence as a Transport Squadron equipped with Lockheed Hudson aircraft. Its role was to provide mail and passenger flights in India with destinations including Lahore, Colombo, Cairo, Chittagong, Bombay, Delhi, Calcutta and Columbo (Ceylon). In May 1943, the squadron began to convert to Douglas Dakotas, a twin-engine transport aircraft. In September 1943, the squadron was reclassified as an Airborne Forces Squadron. RAF #194 operated from a number of bases over the course of the war including at RAF Lahore, Palam, Basal, Comilla and Agartala.

In June 1943, John Thain in Sarnia received news that his eldest son, Flying Officer Jack Thain, was reported missing during air operations overseas. Two months later, in August 1943, John received a cable informing him that his middle son Sgt. Clare Thain had been promoted to Pilot Officer, and in March 1944, John was informed that Clare had been given the promotion to Flying Officer from Pilot Officer. It was soon after that RCAF officials declared that eldest son Jack Thain, who had been previously reported missing after air operations, was now for official purposes presumed dead overseas.

For Clare, in January 1944, RAF #194 Squadron moved to the Burma front. **The Burma Campaign** had begun in December 1941 when the Japanese moved through Thailand and invaded the British colony of Burma. The Japanese saw Burma as a stepping-stone to India as well as protection for their troops fighting in the Malayan peninsula and in Singapore. It would be one of the longest campaigns of the war, fought primarily by British Commonwealth, Chinese and U.S. forces against the forces of Imperial Japan and their allies.

The campaign had a number of notable features that included dense jungles, mountainous terrain, lack of roads for transport, prevalent disease, and weather conditions that included severe heat and monsoon seasons. Approximately 8,000 Canadians, including Sarnians, served in the Burma Campaign. Many of them were part of RAF squadrons carrying out duties that included; reconnaissance, convoy protection, dropping supplies and troops, escort operations, patrol and bombing missions, and as part of fighter squadrons.

In February 1944, the Japanese began their last major offensive in Burma--the attack led to the battles of Kohima and Imphal. RAF #194 Squadron immediately switched to the role of **Air Support**, dropping supplies and paratroopers into battle zones (often behind enemy lines) and carrying casualties out. Most of the sorties in February were flown over the Arakan, but in March the squadron played a major part in the Allied victory at Imphal. In April the squadron flew fighter aircraft and supplies into Imphal and casualties out.

On the night of May 5/6th, 1944, Clare Thain, along with three crew members, was aboard Dakota aircraft FZ599 that was on an operation dropping paratroopers behind the Japanese lines in India. Along with the four crew members, ten army passengers and four mules were on board. The aircraft reportedly left "Broadway" at 23.40 hours on route to Chandina. After its take off from base, no further signal was received from the aircraft. The aircraft failed to return from its operation on this stormy night and was later found in a remote, hilly area. It had crashed, killing all on board. Crew members perishing with F/O Clare Thain were F/L P.W. Wood, Sgt. R. Roberts (RAF) and W/O R.W. Jefferies (AUS).

In mid-May 1944, John Thain in Sarnia received an official announcement informing them that his son, FLYING OFFICER CLARE THAIN HAS BEEN REPORTED MISSING IN ACTION SINCE MAY 5. The last word the family had from him was from India and they presumed he was flying in Burma. At the time, John was still dealing with the news of his eldest son Jack Thain, who was reported missing in early June of 1943 over the Bay of Biscay and had since been reported presumed dead. His other son, LAC Donald Thain was stationed at Paulson, Manitoba at the time.

In late May 1944, John received the following letter from the Squadron Leader, Commanding No. 194 Squadron, South East Asia:

Dear Mr. Thain,

Before you receive this airgraph you will have been informed by R.C.A.F. Headquarters, Ottawa that your son has been reported missing as the result of air operations.

Clare, or Tarzan as he was affectionately known to all the Squadron and his crew were engaged in landing the personnel and equipment of the late General Wingate's forces far behind the Jap lines in Burma. It was from a trip of this nature on the night 5/6th May that Tarzan and his crew failed to return. Every effort has been made and is still being made to obtain some definite information and you may rest assured that any further information that may be received will be passed on to you immediately.

The absence of Tarzan and his crew is a sad blow to the Squadron. Tarzan was extremely popular with everyone and is greatly missed in the Officer's Mess. His personal effects have been carefully gathered together and forwarded to the R.A.F. Central Depository, and in due course you will receive a further communication concerning these from the Administrator of Estates, Ottawa.

May I now express the great sympathy which all of us feel with you in your great anxiety and I should like to assure you how greatly we, his comrades in the Royal Air Force admire Tarzan's gallant sacrifice made so far from home in the service of the British Commonwealth of Nations. By his continued absence I feel I have lost one of my most valuable Air Gunners, a fine Officer, and a good friend.

In June 1944, five weeks after the crash, a party of officers from RAF #194 Squadron Air Command, South East Asia, visited the site of the crashed aircraft presumed to be Dakota aircraft FZ.599. Their purpose was to identify the remains of the personnel killed in the crash; to bring away the remains for interment; and to salvage any small useable parts. The crash site was in an isolated and remote area near Ampu, Tripura. The terrain was both hilly—featuring peaks ranging in height from 3,000 feet to 6,000 feet—and covered by jungles. The RAF officers required the aid of local police, a guide, four bearers for their gear and an interpreter to make the long arduous trek.

Following are portions of the RAF officers report on their findings:

It is a complete wreck. The wings had been torn off; the outer portion of the starboard wing, one engine and undercarriage, and both propellers had fallen elsewhere and could not be found. The bulk of the fuselage lay at the head of a gulley. The tail portion from the aft of the main door was laying some 25 yards below... Fire had destroyed all the fabric, even on the tail Unit. The nose and the cabin was a mass of fused and torn metal. The starboard wing centre section lay a little way from the fuselage on the right. To the left were the port wing and undercarriage and near them the port engine. Everything was torn, buckled, twisted and burnt.

The O.C. Police told me that the bones of eight human bodies had been found in a heap at a point near the port wing and another some five yards away. He said the bodies had been buried in the hillside by Tripura State Levies... We erected a cross made of bamboo, on the place where the remains had been buried and F/O. Forrester offered an appropriate prayer to the departed.

It was impossible to determine the cause of the crash, but the following assumption was made. The starboard wing struck a tree, the wing breaking off and falling onto another hill, the undercarriage and engine probably breaking away. The aircraft swung and crashed into the gulley, the port wing breaking off with the undercarriage

and the engine fell out. From the thickness of the remaining stump of the tree which was struck it was probably 60 to 70 feet tall. Fire followed the crash, trees all around being scorched.

The tail portion was broken away by the impact and fell lower down the gulley. The bodies of the crew and passengers were either thrown out by the force of the shock which also ripped open the side of the fuselage or hillmen may have removed the bones and placed them outside. The latter was not admitted and since natives are loath to handle dead bodies it must be assumed that they were thrown out. Death must have been instantaneous.

The hillmen at the tiny village of Milchi declare that they neither heard nor saw anything of the crash or ensuing fire at the time, and did not discover the crash until some days after the incident. Since the aircraft was missing after the storm on the night of May 5th, this is understandable, as storms in these hills are very heavy. Our party reached the crash about five weeks after it occurred and mud was already covering parts of it. There is a perpendicular wall to the gulley going straight up from the aircraft for a further 15 feet which is crumbling away and it is likely that this, encouraged by the rains, will soon fall and completely bury the aircraft and the site of the grave.

The extreme damage which the aircraft has sustained, the absence of all land communications during and after the rain, the difficult river journey with many complete blockages across narrow places and the difficult terrain in the country around the crash makes me venture to suggest that no further effort be made to visit this crash as such journeys entail some considerable risk of injury and even loss of life except those intimately acquainted with the hill country.

In late July 1944, John received a letter from the R.C.A.F. Casualty Officer, for Chief of the Air Staff in Ottawa. Following is a portion of that letter:

Dear Mr. Thain:

Further to my letter of June 22nd a reply has now been received to my inquiry despatched Overseas regarding the other members in your son's crew. We are listing their names and next-of-kin below and you may address correspondence as shown in the example... You may be assured that as soon as further information becomes available regarding your son it will be forwarded to you immediately. May I express my sincere sympathy in this very anxious time.

In mid-March 1945, the RCAF completed an internal investigation into the circumstances of the downed aircraft. Following is a portion of the findings:

- 1. B.P.O. Bombay reported that Dakota FZ.599, with a crew of four and ten army passengers, failed to return from air operations. It was detailed to evacuate equipment from Central Burma to India, after which no further news was received.*
- 2. Later information received from Personnel Bombay, stated that a search party found Dakota aircraft FZ.599, in the hills near Ampu, Tripura, India. The bodies of eight human remains were found in a heap near the aircraft, and another some five yards away. Two revolvers were recovered from the wreckage and were identified as the property of P/O Thain and F/Lt. Wood (RAF)...*
- 3. The crash occurred in Allied territory, and as far as is known the aircraft was never over enemy territory, which eliminates the possibility of the occupants being taken Prisoners of War, had they bailed out...*

In the early part of 1946, John Thain had still not received any further information about the fate of his son Clare. Frustrated and anxious, he wrote a letter to J.W. Murphy, M.P. House of Commons in Ottawa asking if he could use his influence in helping him obtain some information about his son. John wrote a similar letter to the Wing Commander, R.C.A.F. Casualties Officer. Following is a portion of the Wing Commander's response:

Dear Mr. Thain:

I wish to acknowledge your letter concerning your son... and I regret indeed that no further information has been received than was conveyed to you in previous correspondence.

I can well understand the distress that you and the members of your family have undergone but difficulties were experienced in the Far East owing to the Japanese Government not observing the Geneva Agreement in communicating to the International Red Cross Committee information that might be known to them to our personnel who were missing and on that account the Air Ministry deferred all action to officially presume the death of personnel reported missing in Japanese occupied territory. As in practically all instances Royal Canadian Air Force personnel were attached to the Royal Air Force, it was necessary for this Service to observe the same procedure and the Royal Australian Air Force and Royal New Zealand Air Force also followed the same procedure.

It was obvious that after the cessation of hostilities with the Japanese some information would be received

and a certain amount has been received, but it is far from complete. The Royal Air Force, Royal Australian Air Force and Royal New Zealand Air Force, as well as this Service, have in all thousands missing in the Far East and this matter has received the greatest possible attention, but it is still felt that until all available sources of information have been tried and exhausted, official Presumption of Death should be deferred. There may be information disclosed from Japanese casualty records and there may be isolated cases of survival in scattered islands brought to light and when all available documents have been examined and all sources of information available exhausted, authorities on the spot in the Far East are being consulted as to the possibility of survival of any personnel still unaccounted for.

The investigations that I have noted are in process and have been for some time, and it is altogether likely that these investigations will be completed in the not too far distant future, when those who are to be officially presumed to have died will then, unhappily, be actioned.

While I must regretfully advise you that there is no information that would indicate that your boy may have survived, I do trust that you will appreciate the extreme care and caution that is being taken... I would like to express my sincere sympathy in the anxiety that has been yours for so long.

Clare Thain's death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas (India)*. In November 1946, widowed-father John Thain received a War Service Gratuity of \$686.35 for the loss of his second son to war, Clare. In mid-March 1947, he received the following letter from the Wing Commander for Chief of the Air Staff in Ottawa:

Dear Mr. Thain:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son, Flying Officer C.K. Thain. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

Clare Thain, 23, has no known grave. His name is inscribed on the Singapore War Memorial, Malaya, Column 443.

THAIN, Jack Alexander (#J/8431)

Married just over two years, John Alexander Thain, 24, was killed in action in the Bay of Biscay in June 1943. His Halifax aircraft was attacked by enemy aircraft on an anti-submarine patrol. Less than a year later, his younger brother, Clare, was killed in action in India. Both losses were devastating for their widowed father in Sarnia.

Jack Thain was born in Sarnia on September 20, 1918, the eldest son of John and Isabella (nee Miller) Thain. Born in Birmingham, England, John Thain married Belfast, Ireland born Isabella Miller in Toronto on October 17, 1914. John and Isabella Thain had four children together: daughter Myrtle (later Myrtle James), and sons Jack, Clare Kenneth (see above) and Donald B. John Thain supported his family working as a bricklayer with Imperial Oil in Sarnia, and the Thains lived at 464 Devine Street, and later 200 Bright Street. All three Thain brothers were newspaper carriers for the *Canadian Observer* in Sarnia for a time. When Jack was sixteen years old, his mother, Isabella, died in 1934 at the age of forty-five from cancer.

All three Thain brothers served during the war and all three were members of the RCAF. At the time of Jack's death, middle brother Clare Thain, a Flying Officer- Wireless Operator/Air Gunner was serving in Europe. Clare was later to lose his life, on an operation dropping paratroopers behind enemy lines in India. Jack's younger brother, Flight Sergeant Donald Thain, had enlisted in the R.C.A.F. on August 2, 1943 and trained at Toronto; Winnipeg; and Paulson, Manitoba where he received his wings in June of 1944.

Donald's graduation was a bittersweet moment for widowed-father John Thain. He was proud of Donald's success, yet his other two sons, also R.C.A.F. flying officers, were already casualties of war at the time. Donald was stationed at Patricia, Vancouver Island for a time and returned to Sarnia in September 1946, after serving in the RCAF in Newfoundland. Like Jack, he was also involved in anti-submarine warfare. After the death of the two Thain boys, the RCAF would not allow Donald to serve overseas.

Jack Thain was educated at Devine Street Public School from September 1923 to June 1930; at Wellington Street Public School from September 1930 to June 1931; and then at Sarnia Collegiate from September 1931 to June 1936. His Upper School Honour courses included English Composition and Literature, trigonometry, biology, physics and chemistry. He was very active in gymnastics (a member of the Dominion Championship team); wrestling

(won the 125 lb. championship at the Assault at Arms); weightlifting, boxing, swimming and rugby. His hobbies were reading and physiology.

Back: Rodolfo Mendizabal, Bill Lester, **Jack Thain**, Doug Simpson

Middle: Mr. O'Donhue, Mr. A. Mendizabal

Front: Gordon Perry, Walker Humphrey

Note: Rodolfo Mendizabal is also included in this Project

He also completed Cadet training for four years. He worked for the *Canadian Sarnia Observer* as a paper carrier and press-worker from August 1936 to February 1937, and then at the Canadian Bank of Commerce in Sarnia as a clerk from February 1937 to October 1938. He worked as an instructor of physical training at the Kiwanis Boys Club in Sarnia during evenings from October 1937 to March 1938, and again from October 1938 to March 1939. After leaving the Bank of Commerce, he was employed as a salesman and manager at the United Cigar Store at Lochiel and Christina Streets in Sarnia from October 1938 until October 1940.

Twenty-one-year-old Jack Thain enlisted in the Royal Canadian Air Force on July 1, 1940 in London, Ontario. He stood five feet seven inches tall, had brown eyes and light brown hair, was single, and was residing at 136 North Front Street in Sarnia at the time. He requested flying duties, specifically wanting to be a Pilot or Observer. The Recruiting Officer recorded that Jack Thain was, *Excellent material. This boy has everything, splendid physique, keen mind, smart, alert, very strong personality, the determined aggressive type. Will make good in any classification. Recommended for Pilot or Observer.*

In early October 1940, Jack Thain completed his RCAF Attestation Papers and underwent his medical examination in London, Ontario. From #1 Manning Depot in Toronto and then in Trenton, Jack received his air training at #1 Initial Training School (ITS) in Toronto; at #12 Elementary Flying Training School (EFTS) in Goderich; and at #2 Service Flying Training School (SFTS) in Uplands, Ontario, before being posted again to #1 Manning Depot in Toronto in late April 1941. While in Toronto, and after obtaining permission from the military, and a brief leave, Jack Thain was able to do something special in May 1941.

On May 17, 1941, Jack Thain married Miss Rhoda Leona Westlake (born in Exeter, Ontario), the eldest daughter of Mrs. W.J. Westlake and the late Mr. Westlake of Wyoming, Ontario. The wedding was held at the home of the bride's mother in Wyoming, officiated by Rev. D.M. Guest. The bride was given in marriage by her uncle, Mr. A. Parsons. Serving as bridesmaid was Miss Wilma Westlake, the sister of the bride, and serving as best man was Jack's younger brother, Clare. Following the ceremony, a wedding dinner was held at the Wyoming Hotel for twenty-five guests. After the reception, the newlywed couple left for points east on a wedding trip. On their return, Jack and Rhoda resided at 136 North Front Street, Sarnia. Later, when Jack went overseas as a member of the RCAF, his wife resided with her mother in Wyoming.

The newly married Jack Thain continued his air training in late May 1941 at #1 Air Observers School (AOS) in Malton, Ontario and then at #1 Bombing and Gunnery School (B&GS) in Jarvis, Ontario where he was awarded his Air Observer's Badge on September 27, 1941. He then attended an advanced air navigation course at #2 Air

Navigational School (ANS) at Pennfield Ridge, New Brunswick, and graduated second in the class. He received a 3-week pre-embarkation leave until November 21 1941 and was then posted to #31 Operational Training Unit (OTU) in Halifax, Nova Scotia. In early December 1941, he was posted to #1 Y Depot in Halifax. On December 8, 1941, Pilot Officer Jack Thain, married less than seven months, embarked overseas from Halifax bound for the United Kingdom.

Disembarking in the U.K. on December 18, 1941, Jack was initially posted to #3 Personnel Reception Centre. He continued his training as an RCAF Officer in the U.K., and in March 1942, was transferred to #1 (Coastal) Operational Training Unit (OTU). In late May 1942, he became a member of RCAF #407 (Demon) Squadron, part of RAF Coastal Command. RCAF # 407 Squadron's wartime history is divided into two parts: from mid-1941 to January 1943, equipped with Lockheed Hudson twin-engine light bombers, it operated as a "strike" (bombing) squadron attacking enemy shipping; and in late January 1943, it was re-designated #407 General Reconnaissance Squadron, protecting friendly shipping from the U-boat threat operating Vickers Wellington aircraft.

In June of 1942, while in the U.K., Jack unexpectedly met his brother Clare. Jack was standing on an unnamed station terminal in Scotland waiting for a train. While waiting on the station platform, Jack was hailed from a troop train window by his brother Clare. Clare had just arrived at the Scotland station en route to the south of England with a detachment of R.C.A.F. men. The two brothers were able to meet up for a happy reunion during a 10-minute stop.

Later that month, Jack was in the *Sarnia Observer* news for his part in a Nazi raid. The *Observer* report described how, as part of the "Demon Squadron" of the R.C.A.F., Pilot Officer Jack Thain and his fellow crew members on Coastal Command, had bombed a medium-sized enemy vessel in the face of "heavy opposition", bringing their Hudson bomber home unscathed. In the latter part of 1942, father John Thain in Sarnia was informed that his son Jack, had been promoted to Flying Officer while overseas.

On April 14, 1943, Jack Thain became a member of RAF #58 Squadron "Alis Nocturnis" (On the wings of the night), with the rank of Flying Officer-Navigator/Bomb Aimer. At the start of the war, #58 Squadron was part of RAF Bomber Command, equipped with Whitley bombers. In April 1942, the squadron was transferred permanently to **RAF Coastal Command**. Like RCAF #407 Squadron, RAF #58 Squadron as part of Coastal Command played a pivotal role in the Allied war effort, most notably against U-boats during the Battle of the Atlantic, along with sinking enemy warships and merchant vessels, protecting Allied shipping from aerial attacks, reconnaissance and carrying out air-sea rescue.

In April 1942, RAF #58 Squadron was based at RAF St. Eval, tasked primarily with anti-submarine duties over the Western Approaches. Later that year, the squadron converted to Handley Page Halifax aircraft—four-engine heavy bombers.

On June 1, 1943, Jack Thain was part of a 7-man crew aboard Halifax aircraft BB257 that took off from RAF Station St. Eval at 1518 hours on an anti-submarine patrol. At 1911 hours, a signal was received from the Halifax that it was being attacked by enemy aircraft. No further signals were received, and at 2330 hours, the estimated time of arrival back at base, "overdue action" was taken, but without result. The aircraft failed to return from operations and was reported missing over the Bay of Biscay. Perishing with Flying Officer Jack Thain were Pilot Officer Joseph Roy Bickerton and Sgt. Laurence Edward Daw (RCAF), F/Lt. F.W. Gilmore and Sgt's C.W.H. Makin and B.W. Wyatt (RAF) and F/Sgt. S.F. Miller (RAAF).

A few days later, Jack's father John on Bright Street in Sarnia, and Jack's wife Rhoda in Wyoming, received the news that, FLYING OFFICER JACK THAIN HAS BEEN OFFICIALLY REPORTED MISSING SINCE JUNE 2 DURING AIR OPERATIONS OVERSEAS. Jack Thain's death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas.*

In January 1944, Rhoda received the following letter from the Air Marshal, Chief of the Air Staff:
Dear Mrs. Thain:

I have learned with deep regret that your husband, Flying Officer Jack Alexander Thain, is now for official purposes presumed to have died on Active Service Overseas on June 1st, 1943. I wish to offer you and the members of your family my sincere and heartfelt sympathy.

It is most lamentable that a promising career should be thus terminated and I would like you to know that his loss is greatly deplored by all those with whom your husband was serving.

In February 1945, Rhoda received a War Service Gratuity of \$584.83 for the loss of her husband of two years, Jack Thain. In mid-August 1946, Rhoda received the following letter from the R.C.A.F. Records Officer in Ottawa:

Dear Mrs. Thain:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your husband Flying Officer J.A. Thain. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

Years later, Rhoda re-married, becoming Rhoda Davidson and residing in Wyoming, Ontario. Less than a year later, widowed-father, John Thain, would lose another son, Clare, a Flying Officer with the R.C.A.F.

In February 1952, John received the following letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff:

Dear Mr. Thain:

It is with reluctance that after so long an interval, I must refer to the loss of your son, Flying Officer Jack Alexander Thain, but due to the lack of any information concerning him since he was reported missing, it must be regretfully accepted and officially recorded that he does not have a "known" grave.

Due to the extreme hazards attending air operations there are, unhappily, many thousands of British aircrew boys who do not have "known" graves and all will be commemorated on General Memorials that will be erected at a number of locations by the Imperial War Graves Commission (of which Canada is a member), each Memorial representative of a theatre of operations. One of these Memorials will be erected at Runnymede, England and the name of your son will appear on that Memorial.

I realize that this is an extremely distressing letter and that there is no manner of conveying such information to you that would not add to your heartaches. I am fully aware that nothing I may say will lessen your great sorrow, but I would like to express to you and the members of your family my deepest sympathy.

Jack Thain, 24, has no known grave. His name is inscribed on the Runnymede War Memorial, Surrey, United Kingdom, Panel 175.

THOMPSON, Arthur Cameron (#J/85408)

Arthur Cameron Thompson was the first member of his family to enlist and he made a terrific impression on the Recruiting Officer who recorded this about Arthur: *Very good appearing young man. Well spoken, good athlete, very likeable. Manly.* The airman from Sarnia also made a wonderful impression on Edwina Toms, a young English woman he married in February 1942 while stationed in England. Thirteen months later, the young couple celebrated the birth of their son.

That happy event was preceded by the death of Arthur's older brother, Fraser, who was killed in action with the RCAF in June 1942. More tragic news occurred when Arthur, 22, was killed in late January 1944, in a bombing mission on Berlin.

Arthur Cameron Thompson was born in Sarnia on July 22, 1921, the middle son of Picton, Ontario born Howard Bell and Margaret (nee McDonald, born in Embro, Ontario) Thompson. Howard and Margaret had three sons together: Arthur Cameron; Howard Fraser, who also served in the RCAF (see below); and the youngest son, Robert Brock. The Thompson family lived at 292 North MacKenzie Street, and father Howard supported his family working on the staff of Sarnia Refinery Engineering Department as a Mechanical and Electrical Engineer.

Arthur attended Lochiel Public School from 1926 to 1934 and then Sarnia Collegiate from 1934 to 1937, and again from 1939 to 1940. In 1937-1938, he attended Pickering College in Newmarket, Ontario and in 1938-1939, he attended Assumption College. Arthur was very active in football and hockey and also participated in swimming, golf and skiing, and his hobby was model aircraft building.

Eighteen year-old Arthur became the first Thompson boy to join the war when he enlisted with the Royal Canadian Air Force on June 4, 1940 in London, Ontario. His older brother, Howard Fraser, enlisted three months later. Arthur stood five feet nine and a quarter inches tall, had blue eyes and dark brown hair, was single and was still a student at Sarnia Collegiate when he enlisted. He was residing at home with his parents on MacKenzie Street at the time. He requested flying duties, with a preference to be an air gunner.

The Recruiting Officer recorded the following about Arthur: *Very good appearing young man. Well spoken, good athlete, very likeable. Manly.* From #1 Manning Depot in Toronto, Arthur received his air training at #1 Initial Training School (ITS) in Toronto; at #2 Air Observer School (AOS) in Edmonton, Alberta; at #2 Bombing and Gunnery School (B&GS) in Mossbank, Saskatchewan; and at #1 Air Navigation School (ANS) in Rivers, Manitoba. Arthur was awarded his Air Observer's Badge on December 9, 1940 in Rivers, Manitoba.

In late January 1941, Arthur was posted to #3 Manning Depot in Rockcliffe, Ontario. On February 15, 1941, he embarked overseas from Halifax bound for the United Kingdom. Later that month, parents Howard and Margaret in Sarnia received a cablegram from Arthur, informing them that he had arrived safely in England. Arthur was initially posted to #3 Personnel Reception Centre at Uxbridge before being transferred in early March 1941 to #3 (Coastal) Operational Training Unit (OTU) at RAF Chivenor.

In late April 1941, he became a member of RAF #217 Squadron, part of Coastal Command, an anti-shipping squadron based at St. Eval. In February 1942, the squadron was split with most of its aircraft at St. Eval, while a detachment was at RAF Thorney Island. In May 1942, the squadron moved to Malta, carrying out attacks on enemy shipping across a wide section of the Mediterranean. After two months, the squadron then moved to Ceylon where it carried out anti-submarine patrols.

Approximately one year after arriving in the U.K., on February 28, 1942, Arthur married an English girl - Edwina Joyce Toms (of Cornwall, England) in the Parish Church of St. Merryn, Cornwall, England. Sadly for Arthur, four months later in late June 1942, he would learn that his older brother (Howard) Fraser was reported missing on operations. A few months later, Fraser Thompson would be reported killed during air operations overseas.

In the early part of 1943, Arthur was scheduled for a leave to return to Canada, but because his wife was pregnant, he had it cancelled. On March 13, 1943, Arthur and Edwina Thompson had a son together, whom they named Richard Fraser Thompson. Arthur, Edwina and Richard resided near Padstow, Cornwall, and later Three Banks Terrace, Croft near Darlington, Durham, England.

On December 5, 1942, Arthur Thompson became a member of RCAF #431 (Iroquois) Squadron, part of **Bomber Command**. In March 1943, his father Howard in Sarnia wrote a letter to Honourable Charles Power, Minister of National Defence for Air in Ottawa. Following is a portion of that letter:

Dear Sir,

On behalf of Mrs. Thompson and myself I wish to thank you for your words of sympathy and gratitude on the loss of my oldest and dearest son Fraser R68407 RCAF who was missing and lost in the Middle East Bomber Command. His loss is dearly felt by us all here but I trust that his life so freely given has not been sacrificed in vain.

I hesitate to make a request but as you no doubt know my second son Flt Sgt. A Cameron Thompson RCAF has been in the Air Force since June 1940 when he enlisted and took his training in Canada going overseas in Jan 1941 and arrived in England early in February. He was immediately connected with the R.A.F. Coastal Command and after some training there was stationed at St. Eval...

He married a young fine English girl in Cornwall and now just recently has been connected with No. 431 Squadron located in Yorkshire England. Early this year he was posted to be returned to Canada but on account of his young wife's condition he had it cancelled. HE is an Observer in the Command and I am writing you that you may have this before you and to request that he be posted for Canada within the next two or three months when conditions are favourable.

It would be a great boost and relief to Cameron's mother who has been ailing a great deal particularly since Fraser's loss. Also I feel that he has done a real service to his country with the ten or 12 months of actual operational flying and now he should have sufficient experience so that he would be valuable as an instructor in Canada.

If I am not asking too much may this humble request have your consideration.

On July 1, 1943, Arthur became a member of RAF #22 Operational Training Unit (OTU) based at RAF Wellesbourne. In August 1943, Member of Parliament for Lambton West Ross W. Gray, in Sarnia, made a written request in regard to his nephew, Arthur Thompson, to the Wing Commander (James Sharpe), Air Secretary in Ottawa. Following is a portion of that request:

I am taking this opportunity of writing you in regard to one of my nephews who has been in England since 1940, being on coastal command, bombing operations, grounded due to sinus trouble, hospitalized and operated on for sinus, acted as warrant officer, married in England with one baby and wife to take care of, now, I understand, in the North of Scotland taking a further course...

...He is a brother of Fraser Thompson who was reported missing in Egypt and whose body was later found there and buried by the Royal Engineers.

It would appear to me that seeing that leaves are in order for a great number of the Air Force boys that this young fellow might be given an opportunity of returning to Canada to visit his parents.

This airman's mother has not been well for several months and the loss of her son Fraser has affected her health greatly.

In view of the above may we be advised as early as possible whether consideration has been given to the possibility of this N.C.O. being repatriated for employment in Canada and if so, the approximate date he might be expected to arrive.

Ross Gray was unsuccessful in arranging Arthur Thompson's return to Canada.

In mid-September 1943, Arthur was transferred again, becoming a member of #1664 Heavy Conversion Unit (HCU) at RAF Croft. One month later, on October 18, 1943, he returned to RCAF #431 Iroquois Squadron "The Hatiten Ronteriios" (Warriors of the Air), part of **Bomber Command**, with the rank of Pilot Officer-Bomb Aimer.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

RCAF #431 Squadron had formed in Britain in November 1942, based at RAF Burn and was equipped with Vickers Wellington aircraft. In July 1943, it moved to RAF Tholthorpe and converted to Handley Page Halifax aircraft—four-engine heavy bombers. In December 1943, the squadron moved again, to RAF Croft. The squadron remained at Croft for the remainder of the war, and in October 1944 began to convert to Avro Lancasters.

P/O-BA Arthur Cameron Thompson

On the night of January 28/29th, 1944, Arthur Thompson was a member of a 7-man crew aboard Halifax V aircraft LL181 (markings SE-Q) that was on a night operation targeting Berlin, Germany. It was the third day of a heavy aerial offensive on Germany. Just after midnight, at 00.12 hours, the aircraft took off from Squadron 431's Croft base, part of a group of 677 aircraft involved in the raid. No news was received from Halifax LL181 after take-off and it failed to return to base. It was learned later that Pilot Officer-Bomb Aimer Arthur Thompson and the crew of Halifax LL181 were shot down by an enemy aircraft east of Zinndorf, Germany, near their target Berlin, Germany. Perishing with Pilot Officer Arthur Cameron Thompson were Flying Officer Roy MacLean, Pilot Officer William Russell Hewetson, and Sgt. Norman Andrew Bell (all RCAF), and F/S George Thomas Moody, and Sgt's George Frederick Carter and James McIver (all RAF). There were 46 aircraft lost in this raid.

Several days later, Howard and Margaret Thompson in Sarnia received a telegram from Ottawa informing them that their son, SGT ARTHUR CAMERON THOMPSON HAS BEEN REPORTED MISSING FOLLOWING AN ALLIED RAID OVER BERLIN. Another set of Sarnia parents, John and Mary Ellen McKeown, received the

same information on the same day about their son, Victor Herbert McKeown, who was also listed as missing in the same bombing raid over Berlin (he is included in this Project).

Arthur's wife Edwina Joyce Thompson and ten-month old son Richard Fraser were in England at the time of Arthur's death. For parents Howard and Margaret Thompson, Arthur was their second son they had lost to war. Approximately one year earlier, on New Year's Day 1943, they had received news that their eldest son, Howard Fraser Thompson of the RCAF, had been killed during air operations overseas (Egypt).

In early-February 1944, Edwina, residing in Croft, Durham, England, received the following letter from the Wing Commander, for Air Officer Commanding-in-Chief, R.C.A.F. Overseas:

Dear Mrs. Thompson,

It is with deep regret that I must confirm the communication you have recently received which stated that your husband, Sergeant Arthur Cameron Thompson, was reported missing as a result of air operations on the 28th/29th January, 1944.

Your husband was a member of the crew of a Halifax aircraft, which took off for an attack on Berlin and failed to return. This does not necessarily mean that he has been killed or wounded as it is possible he may be a prisoner of war or even free, which I hope may prove to be the case.

The request that no information be given to the press is made in order that your husband's chances of escape will not be jeopardized, by undue publicity, if he is still at large. This does not mean that information is available concerning him but is a precaution adopted in the case of all personnel reported missing.

I can assure you that enquiries are being made through every available source and any information which may be forthcoming will be communicated to you at once. Please accept my sympathy with you in your great anxiety.

In mid-February 1944, Howard received a letter from the Squadron Leader, R.C.A.F. Casualties Officer, for Chief of the Air Staff. Following is a portion of that letter:

Dear Mr. Thompson:

It is my painful duty to confirm the telegram recently received by you which informed you that your son, Sergeant Arthur Cameron Thompson, is reported missing on Active Service.

Advice has been received from the Royal Canadian Air Force Casualties Officer, Overseas, that your son was a member of the crew of an aircraft which failed to return to its base after a bombing raid over Berlin, Germany, on the night of January 28th and the early morning of January 29th, 1944. There were three other members of the Royal Canadian Air Force in the crew and they also have been reported missing. Since you may wish to know their names and next-of-kin, we are listing them below....

This does not necessarily mean that your son has been killed or wounded. He may have landed in enemy territory and might be a Prisoner of War. Enquiries have been made through the International Red Cross Society and all other appropriate sources and you may be assured that any further information received will be communicated to you immediately.

Your son's name will not appear on the official casualty list for five weeks. You may, however, release to the Press or Radio the fact that he is reported missing but not disclosing the date, place, or his unit. May I join with you and the members of your family in the hope that better news will be forthcoming in the near future.

Also in mid-February 1944, Howard received the following letter from the Wing Commander, Commanding RCAF No. 431 Squadron, Overseas:

Dear Mr. Thompson,

Before you receive this letter, you will have had a signal informing you that your son R63728 Sergeant Arthur Cameron Thompson is missing as a result of air operations.

At approximately 12:30 P.M. on the night of the 28th January, Tommy, and members of his crew took off from this aerodrome to carry out operations over BERLIN, but unfortunately failed to return. He, and his crew were due back at this aerodrome on completion of the sortie, but no news has been received from either the crew or aircraft since the time of take-off.

There is always the possibility that your son may be a prisoner of war, in which case, you will either hear from him direct, or through Air Ministry, who will receive advice from the International Red Cross Society. To be a prisoner of war is not the happiest thought in one's mind, particularly for you, who are so fond of your son, but on the other hand, I hope you will bear with me that it carries a certain gratifying thought in knowing that our loved ones are alive, and well, and will some day return home safely.

May I offer my most sincere sympathies as well as those of my Officers, and men in your anxiety.

In late May of 1944, Howard and Margaret Thompson were advised by R.C.A.F. Headquarters at Ottawa that their son, *Flight Sergeant Arthur Cameron Thompson, had been promoted to pilot officer as of January 25, 1944.* This was the first word from Ottawa about their son since he had been reported missing on January 28, 1944.

Ten months later, Howard was still waiting for more information about the fate of his son. In a November 1944 letter to the Office of Air Ministry in Ottawa, Howard wrote *I thought you might give us some information as regards P.O. A.C. Thompson No. J85408 who was reported missing Jan. 28th over Berlin... We have heard very little of anything since. One of the crew, P.O. Roy MacLean, Glace Bay, N.S. body was reported to have been found and identified. Other than this very meagre information, nothing has come through to us, and as far as I know little has been received by his wife Joyce. If you could obtain any information about Cameron, I would appreciate it very much.* In early January 1945, one year after his aircraft was shot down, an R.C.A.F. casualty list was released listing Pilot Officer Arthur Cameron Thompson as, *now for official purposes presumed dead, after previously being reported missing.*

Arthur Thompson left behind his parents in Sarnia, Howard and Margaret (who had already lost one son in the war), his "British bride" of less than two years, Edwina Joyce, and their ten-month old son, Richard Fraser Thompson. In late May of 1945, Edwina and two-year old son Richard Fraser arrived in Sarnia to spend some time with Howard and Margaret Thompson. The *Sarnia Observer* described Edwina Thompson as a slim, blue-eyed rather shy and extremely attractive young English girl.

Edwina spoke highly of the reception given her by the Red Cross, V.A.D. nurses and other organizations on her arrival in Canada. Her son and she had made the cross-Atlantic crossing aboard the liner *Brittany (Brittanic)*, in the company of 600 other brides and 400 children. Edwina was the daughter of Commander E.E. Toms, Royal Navy Fleet Air Arm of Cornwall, England. She had one sister who was preparing to return to New Zealand with her serviceman husband; another, who was engaged to an Australian; and a third sister, who was to go to India with her husband on British government business. For a time during the war, Edwina and husband Arthur had resided in Portsmouth, where he was stationed, during a period when the city was under heavy and constant air raid attack.

Edwina described training schools for Canadian war brides that were set up in London and other large metropolitan areas, but were not available in the smaller centres; however, invitations to attend were sent to prospective candidates in outlying areas. Although she was "instructed" by her husband Arthur about Canada, she found it different from what she expected. Shop windows full of clothes and shoes, the abundance of food and the luxury of bananas and ice cream were difficult to comprehend after the sparse fare of England. She described the diet as adequate, though plain and uninteresting; and the fuel shortage of the last winter as rather grim, but they managed somehow. Edwina said that she was quite prepared to like Canada and things Canadian and was looking forward with pleasure to becoming acquainted with her Sarnia relatives. In August 1945, Edwina, now residing at 292 North MacKenzie Street in Sarnia, received a War Service Gratuity of \$982.60 for the loss of her husband Arthur.

In July 1947 the RAF Missing Research and Enquiry Service released their findings on the investigation of the crash of Halifax aircraft LL181 on January 28/29th, 1944. Following is a portion of those results:

Herr Rothschuh, burgomaster of Zinndorf stated that on the night of the 29th Jan., 1944 a British bomber crashed in the fields, East of the village of Zinndorf, after having been shot down by a German night fighter. It was believed that the bomber was still carrying its full bomb load as on crashing there was a terrific explosion, consequently wreckage and even limbs etc. of several of the crew were strewn over a wide area.

The following morning after the crash a Luftwaffe detachment and the Fire Brigade from Straussberg collected together all the remains of the crew and the aircraft. Before the wreckage was removed, the Oberleutnant i/c Luftwaffe detachment reported that the a/c was a British four engined bomber. No positive identification was found as to type of a/c and no. However, as one of the crew of this a/c, namely J/21633 R. MacLean was identified at the scene of the crash, this a/c must be Hal. V. LL.181.

Six members of this crew were found, according to Herr Rothschuh. As stated previously several of the crew were more or less blown to pieces, none of the six bodies were complete. The Luftwaffe detachment searched through the papers etc. found on the bodies but only one member was identified (MacLean). After having a Mil. Funeral the crew were buried in two large boxes, 3 bodies in each, in Zinndorf Gemeinde Friedhof on the 2.2.1944.

It appears that the seventh member of this crew was blown to pieces and the Luftwaffe not knowing how many airmen there were in the crew buried what little remained of the seventh crew member with another smashed deceased...

The exhumation of this crew were carried out on the 14th May, 1947... Unfortunately only one member of

the crew was identified, the navigator... F/O R. MacLean. The bodies are now reinterred in Brit. Cem. Berlin Heerstrasse.

CONCLUSION

... The aircraft concerned in this Cas. Enq. was shot down by night fighters on the night of 28/29th Jan. 1944. The aircraft crashed, exploding on impact, in the fields, East of the village of Zinndorf. The aircraft was believed to be carried a full bomb load when shot down. Naturally therefore, only small pieces of wreckage remained which was removed by a Luftwaffe detachment to Straussberg airfield.... At daybreak on the morning of the 30th Jan 44, the Luftwaffe detachment recovered six badly smashed members of this crew from the scattered wreckage. One of the six, R. MacLean was identified.

Unfortunately from the exhumations only one member of the crew can be identified, i.e. the navigator namely F/O R. MacLean. Therefore it is suggested that F/O R. MacLean have a cross erected over his grave and the remainder have a collective grave made with the six names written on one cross.

From the information given... it is reasonably certain to state that the seventh member of this crew was blown to pieces in the fierce explosion when the Halifax crashed...

The crew is now reinterred in the Brit. Mil. Cem. Heerstrasse, Berlin.

In July 1950, Edwina, then residing at Three Banks Terrace, Croft near Darlington, Durham, England, received the following letter from RAF officials:

Dear Mrs. Thompson,

I regret having to refer again, after so long an interval, to the loss in action of your husband, Sergeant A.C. Thompson, Royal Canadian Air Force, but I am sure you will wish to know the result of investigations undertaken by the Royal Air Force Missing Research and Enquiry Service in Germany.

These investigations have established that his aircraft was shot down near Zinndorf, south of Berlin, and the seven members of the crew, who must have been killed instantly, were buried by the Germans in the local cemetery. Unfortunately, upon exhumation, it was only possible to individually identify the navigator, Flying Officer McLean.

Your husband and the other five crew members have been re-interred in a communal group of graves numbered 33-37, Row G, Plot 8, in the British Military Cemetery at Berlin (Heerstrasse), and these graves have been registered collectively with the Imperial War Graves Commission in the names of all six airmen. Flying Officer MacLean lies in an adjacent grave.

This reburial is in accordance with the policy agreed upon by His Majesty's and the Commonwealth Governments, that our fallen should be transferred to specially selected military cemeteries, where graves will be maintained, for all time, by the Imperial War Graves Commission.

I am sorry that owing to the formidable task of our search teams it has not been possible to let you have this information earlier, but I do hope this news, belated as it is, will afford you a small measure of comfort in your sad loss.

In August 1950, Howard of 292 N. MacKenzie Street, Sarnia, received a letter from the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff. Following is a portion of that letter:

Dear Mrs. Thompson,

It is with regret that I refer to the loss of your son, Pilot Officer Arthur Cameron Thompson. A report has however been received from our Missing Research and Enquiry Service concerning your son and the members of his crew.

Our Investigating Officers on visiting Zinndorf were informed by the Burgomaster that your son's aircraft had crashed in a field just east of the village after being shot down by a German night fighter. The remains of the crew were recovered from the wreckage by a German Air Force Detachment and the fire brigade from Strausberg which is situated 5 ½ miles north of Zinndorf. They were given a military funeral and buried in Zinndorf Cemetery. The burial details conveyed to you in our letter of 20th October, 1945 which were obtained from captured German documents were incorrect and apparently a German clerical error. Although German documents have on the whole been of great assistance in locating missing airmen they often proved inaccurate. One can appreciate that even with a desire to be accurate, the chaotic conditions which existed in those days could easily lead to inaccuracies. Exhumation was carried out but unhappily, Flying Officer MacLean was the only one who could be individually identified....

In accordance with the agreed policy of the Nations of the British Commonwealth that all British aircrew buried in Germany would be moved to British Military Cemeteries located in Germany, your son and the members of

his crew were moved to the permanent British Military Cemetery in Berlin. The cemetery is known as the Berlin (Heerstrasse) British Military Cemetery. Your son and the other five members of the crew who could not be individually identified were laid to rest in multiple graves 33/37 in Row G, Plot 8 and these graves will be registered collectively with their names. Flying Officer MacLean was laid to rest in Grave No. 32.

This British Military Cemetery and the graves will be reverently cared for and maintained in perpetuity by the Imperial War Graves Commission (of which Canada is a member). The Commission will also erect a permanent headstone at your son's resting place.

It is my earnest hope that you will be comforted with the knowledge that your son's resting place is known, and that it will be permanently maintained, and I would like to take this opportunity of expressing to you and the members of your family my deepest sympathy in the loss of your gallant son.

In early February 1954, Howard and Margaret Thompson, then residing on Highland Road in London, Ontario, wrote a letter to the Wing Commander, R.C.A.F. Casualties Officer, for Chief of the Air Staff in Ottawa. They informed him that in the spring, they were hoping to visit their son Arthur's grave in Berlin and possibly Howard Fraser's grave in Egypt. They were seeking his advice on whom to contact and on possible safety matters in these parts of the world. Following is a portion of the response letter from the Wing Commander:

Dear Mr. Thompson,

I wish to acknowledge your letter of February 11, and note your intended visit to Europe this coming spring, and the possible visit to the resting place of your son, Pilot Officer Arthur Cameron Thompson. Since my letter of August 15, 1950, the name of the cemetery has been changed from Berlin (Heerstrasse) British Military Cemetery to the Berlin 1939-1945 War Cemetery.

As far as I am aware there is no difficulty in going to Berlin. Your travel agent can advise you, passports are necessary and can be secured through the Department of External Affairs... You should also write to the Imperial War Graves Commission... informing them of your visit and asking for full information...

I had the privilege of visiting the Berlin 1939-1945 War Cemetery last October. The first permanent headstones 250 had arrived and the foundations for the stones were underway... The cemetery is in a beautiful location and of course with construction going on, was not at its best when I was there, as all flowers and shrubs had been removed to make way for the Headstones. The flowers and shrubs will be replaced when the stones are erected, so I hope that by the time of your visit many of the stones will be erected and the blooms back in their regular places... I trust that your visit to the resting place of your gallant son, will be of comfort and solace.

In the spring of 1954, Howard and Margaret Thompson travelled to Western Europe to visit the grave of Arthur Cameron. Their son, 22, is buried in the Berlin 1939-1945 War Cemetery, Germany, Coll. Grave 8.G.33-37. On his headstone are inscribed the words, NEVER HAVE SO FEW GIVEN SO MUCH FOR SO MANY, TO THE UTMOST, TO THE END.

THOMPSON, Howard Fraser (#R/68407)

Howard Fraser Thompson, who always went by his middle name, enlisted in the RCAF in September 1940, three months after his younger brother, Arthur. The Dean of Western University wrote of Fraser that *There is absolutely nothing that for which we can criticize Mr. Thompson's character, personality, initiative, ability to mix with his fellows. His personality rating would be high.*

Unfortunately, in late June 1942, only six days after arriving in the Middle East and becoming a member of RAF #40 Squadron, Fraser was killed in a bombing mission during the North African campaign. Fraser, 23, left behind a young daughter in England and his parents in Sarnia. Sadly, little more than a year later, Fraser's younger brother, Arthur, was killed in a bombing mission over Berlin.

Howard Fraser Thompson, who went by "Fraser" most of his life, was born in Sarnia on December 16, 1918, the eldest son of Picton, Ontario born Howard Bell and Margaret (nee McDonald, born in Embro, Ontario) Thompson. Howard and Margaret had three sons together: Fraser; Arthur Cameron, who also served in the RCAF (see above); and the youngest son, Robert Brock, who was age 13 at the time of Fraser's death. The Thompson family lived at 292 North MacKenzie Street, and father Howard supported his family working on the staff of Sarnia Refinery Engineering Department as a Mechanical and Electrical Engineer.

Fraser attended Lochiel Street Public School from 1925 to 1932 and then Sarnia Collegiate School from September 1932 to June 1936. Like many other young men and women, he had a variety of interests that grabbed his

attention. Fraser was active in sports, including track, hockey, rugby, swimming and fencing; his hobby was wood carving; and he was a member of St. Andrew's Presbyterian Church. He then attended Pickering Collegiate in Newmarket from September 1936 to June 1938. In September 1938, he attended the University of Western, and at the end of the 1938-39 session, he had secured credit in six and a half credits of the first year College of Arts Chemistry program. While at Western, he also attended Canadian Officer Training Corps (C.O.T.C.) from September 1938 to June 1939. In a reference letter written by the Dean of Western University to the RCAF Recruiting Office on behalf of Fraser, the Dean wrote, *There is absolutely nothing that for which we can criticize Mr. Thompson's character, personality, initiative, ability to mix with his fellows. His personality rating would be high.*

Beginning in September 1939, Fraser was employed by Imperial Oil Limited in Sarnia as an assistant in the Technical and Research Laboratories. The Chief Research Chemist at Imperial Oil, R.K. Stratford, wrote a reference letter to the RCAF Recruiting Officer on behalf of Fraser. His comments included, *he has shown himself to be conscientious and capable in all classes of routine testing that have been assigned to him. The young men who work in this department as laboratory assistants are all very carefully chosen before being employed, and we feel confident that providing they pass their medical examination they will be above the average for their age and experience. We, therefore, have great pleasure in recommending this young man.*

Major W.P. Doohan, Canadian Officers Reserve, who supervised Fraser at Imperial, also wrote a reference letter on behalf of Fraser. Major Doohan wrote of Fraser that *I have always found him a painstaking and dependable assistant. I can recommend this man as suitable for enlistment, he has initiative and a keen sense of duty, and should make an efficient soldier.*

Twenty-one-year-old Fraser Thompson enlisted in the Royal Canadian Air Force on September 12, 1940 in London, Ontario three months after his younger brother, Arthur, had enlisted. Fraser stood five feet six and a half inches tall, had brown eyes and dark brown hair, was single, and was residing at home with his parents on North MacKenzie Street at the time. He requested flying duties, with a desire to be a pilot. His plan for after the war was to return to College with the intent of becoming a geologist.

Flt-Sgt-Nav. Howard Fraser Thompson

From #2 Manning Depot in Brandon and then #2 Training Command in Winnipeg, Manitoba, Fraser Thompson received his air training at #2 Initial Training School (ITS) in Regina; and then at #5 Elementary Flying Training School (EFTS) in Lethbridge, Alberta. In February 1941, he returned to #2 Manning Depot in Brandon, before continuing his training in April 1941 at #3 Air Observer School (AOS) in Regina; and then at #5 Bombing and Gunnery School (B&GS) in Dafoe, Saskatchewan. Sergeant-Observers Fraser Thompson was awarded his Air Observers Badge on September 1, 1941, along with two other Sarnians, Sergeant-Pilot Wesley K. McDermid and Sergeant-Pilot Robert A. McCallum (McCallum is included in this Project). In September 1941, Fraser continued his training at #1 Air Navigation School (ANS) in Rivers, Manitoba. On October 1, 1941, he was posted to #1 Y Depot in Halifax.

On October 20, 1941, Fraser embarked overseas from Halifax bound for the United Kingdom. Initially

posted to #3 Personnel Reception Centre at Bournemouth, he continued his training with #20 Operational Training Unit (OTU), and in February 1942 with #15 Operational Training Unit (OTU). At some point during his time in England, Fraser met Amy Bapty at a Royal Air Force base in the country's south. They would fall in love and have a daughter together, Marlene Weaver, who was born on December 16, the same date as her father Fraser. Sadly, Marlene would never get to know her father.

After training and serving in Britain for some time, in early June 1942 Fraser Thompson was transferred to the **Middle East Command**, with #2 Middle East Training School (METS), Royal Air Force. He became a member of RAF #40 Squadron "Hostem A Coelo Expellere" (To drive the enemy from the sky), part of Bomber Command, with the rank of Flight Sergeant-Navigator.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

RAF #40 Squadron had begun the war as part of the Advanced Air Striking Force, one of the first squadrons to be sent to France. In November 1940, the squadron converted to Vickers Wellington aircraft—twin-engine, long-range medium bombers--and spent the next two years operating as a night bomber squadron with Bomber Command. In October 1941, the squadron moved to Malta, where they operated against targets in Italy and North Africa until May 1942. The surviving aircraft were then transferred to Egypt. There, it began to fly operations against the Axis forces in North Africa. In December 1943, the squadron moved to Italy where it carried out Bomber Command duties during the Italian Campaign.

As part of #40 Squadron, Fraser took part in the **North African Campaign**. The campaign had begun in June 1940 and continued for almost three years, as Allied and Axis forces pushed one another back and forth across the desert. Battles between British Commonwealth, U.S. and French forces against Italian-German Axis and Vichy France forces took place across Libya, Egypt, Morocco, Algeria and Tunisia. Canadians fought as part of British army units, as members of the RAF or the Royal Canadian Air Force and serving in the Royal Canadian Navy.

Fraser's parents, Howard and Margaret in Sarnia, received two cables from him not long before he was lost in action. In the first cable, dated June 10, 1942, he informed them of his safe arrival by air in Gibraltar. In the second cable, dated June 22, 1942, he informed them that he had been sent to the headquarters of the Middle East Command.

Only days after arriving in the Middle East and becoming a member of RAF #40 Squadron, Fraser Thompson lost his life near Hohalfa, Egypt. On June 27, 1942, at 4:05 a.m., his RCAF station received the last word from Fraser Thompson's Wellington aircraft after bombing operations during the North African Campaign. Flight Sergeant-Navigator Fraser Thompson was part of a crew that crashed just south-east of the Siwa Road near the railway line, at El Alamein, Egypt. Perishing with Flight Sergeant-Navigator Fraser Thompson were FS.s Stanley Gregory and Orville Martin Kileen; one RNZAF, and one RAF member of the crew. In his report following the crash, the Wing Commander of RAF #40 Squadron wrote of Fraser Thompson, *This airman was only on the strength of this Unit for three days. During that time, however, his qualifications, character and general conduct appeared to be eminently satisfactory.*

Fraser Thompson was reported *Missing on operational duties* on June 27, 1942 by military officials. More than a week later, his parents received a cable from the Chief of Air Staff in Ottawa, informing them that their eldest son Fraser had been, REPORTED MISSING FOLLOWING A FLIGHT PRESUMABLY IN LIBYA. His remains were later found and initially buried on December 28, 1942 at a location recorded on the Burial Return Card as "Missing 27th June 1942. Body found by 58 R.S.U. and identified by papers on his body. Buried on the spot. Exact location of grave Latitude 30 degrees, 39 minutes, 40 seconds North, Longitude 29 degrees, 8 minutes, 30 seconds East."

On New Year's Day, January 1943, Howard and Margaret Thompson received a telegram from the R.C.A.F. Casualties Officer in Ottawa that read, DEEPLY REGRET TO INFORM YOU FURTHER ADVICE HAS BEEN RECEIVED FROM THE ROYAL CANADIAN AIR FORCE CASUALTIES OFFICER OVERSEAS THAT YOUR SON FLIGHT SERGEANT HOWARD FRASER THOMPSON PREVIOUSLY REPORTED MISSING ON ACTIVE SERVICE ON JUNE 27 1942 IS NOW REPORTED TO HAVE LOST HIS LIFE HIS BODY HAVING BEEN RECOVERED. ACCEPT MY PROFOUND SYMPATHY. LETTER FOLLOWING. Fraser Thompson's death was later officially recorded as, *Killed during air operations, overseas.*

Ftl-Sgt-Nav. Howard Fraser Thompson

In January 1943, St. Andrew's Church in Sarnia held a memorial service for three parishioners, all members of the Royal Canadian Air Force, who had paid the supreme sacrifice in the previous year—George William Knowles, Donald Cameron MacGregor and Howard Fraser Thompson. The service was arranged at the request of family members with Rev. Dr. J.M. Macgillivray officiating. In his brief address, Dr. Macgillivray's words expressed the sentiment of many at the time:

These men, as well as others like them, went forth possessed, perhaps, of a spirit of adventure not unnatural in young men. But it was not only the call of adventure that led them to the King's service in the clouds. There was a deeper motive than that. They had a vision of a new and better world; a world free of tyranny, oppression, injustice and fear. They knew that the only way to secure such a world was by overthrowing forever the forces of evil now threatening mankind; and to that holy task they dedicated their lives. They have entered into the larger life; and to God's keeping we commend them in the Easter hope of a final resurrection to eternal life.

It is my personal conviction that they are not now far away from us, and I read to you as suggestive and appropriate some words written by a French soldier killed in 1915 during the First Great War: 'I believe the dead live close to the living, invisible but present; and perhaps it is they whom God sends to us in answer to our prayers, so that their spirit, which is His, may continue to guide us and inspire us.'

In August 1945, Howard and Margaret Thompson received a War Service Gratuity of \$262.70 for the loss of their son Fraser. Howard Fraser Thompson, 23, was initially buried near the Hohalfa Railway Station and later exhumed and reburied in the Halfaya Sollum War Cemetery, Egypt, Coll. Grave 15. B. 2-3. On his headstone are inscribed the words, GIVING ALL, DARING ALL TO THE UTMOST, TO THE END, HE DIED THAT WE MIGHT LIVE. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

Fraser's younger brother, RCAF Flight-Sergeant Arthur Cameron Thompson, had seen two years of service at the time of Fraser's death. About a year and a half after Fraser's death, Pilot Officer Arthur Thompson of RCAF #431 Squadron would also lose his life, shot down over Germany. Parents Howard and Margaret Thompson in Sarnia lost two of their three sons in the war. On the Sarnia cenotaph, Howard Fraser Thompson's name is inscribed as F.F. Thompson.

THURLOW, Jack Alvin (#J/11980)

You wanted Jack Thurlow in your corner—a competent pilot and a large and popular man, affectionately nicknamed "Tiny". The Woodstock native came to Sarnia from Woodstock to work at Imperial and played for the Sarnia Imperials in 1939 before he enlisted in the RCAF in 1941. Weeks before the war ended, Thurlow was killed in action when his plane exploded over France. His body was never found, but his quick actions saved the lives of the seven crew members under his command. His name is inscribed on the Runnymede War Memorial in Surrey, England and on the Sarnia Refinery Plaque.

Jack Alvin Thurlow was born April 25, 1918 in St. Catharines, Ontario, the eldest son of Alfred Andrew and Olive Blanche (nee Davis) Thurlow. Alfred Thurlow and Olive Davis were married on July 3, 1912 in Woodstock,

Ontario, where they would reside and raise their one daughter and two sons. Their first child was daughter Irene Elizabeth, born in January 1914. Tragically, baby Irene Elizabeth Thurlow passed away in Woodstock on March 5, 1914, at only two months of age, the result of the bacterial infection erysipelas. The two boys were Jack Alvin and Robert Charles Thurlow, born April 1924. Tragedy struck the Thurlow family again when Jack was only seven years old. On July 30, 1925, Alfred, his father, a machinist by trade, passed away at the age of thirty-three in Woodstock. Olive Thurlow later remarried, to R.A. Heymes, and they had one child together, Ronald Heymes, a step-brother for Jack.

Jack attended Woodstock Public Schools from 1925-31 and then Woodstock Collegiate from September 1931 to June 1935. He left school at the age of seventeen and then went to work, employed at Thomas Organ and Piano Company in Woodstock as a finisher and doing office work from 1935-39. In 1939, Jack Thurlow moved to Sarnia, where he was employed as a pipefitter and did construction at Imperial Oil Limited. He worked at Imperial for 2 ½ years. While in Sarnia, he gained some military experience as a Gunner with the 26th Reserve Field Battery, Royal Canadian Artillery from August 1940 to June 1941. For a time, Jack also played football with the Sarnia Imperials.

On June 27, 1941, Jack Thurlow, now twenty-three years old, enlisted with the Royal Canadian Air Force at the RCAF Recruiting Centre in London, Ontario. He stood six feet three inches tall, had an athletic build of just over 200 pounds, had brown eyes and brown hair, was single, and was residing at 150 Crawford Street in Sarnia at the time. He was active in rugby, baseball, basketball, swimming and track and field and recorded his hobby as physical training. His plan was to remain in the RCAF after the war.

Jack Thurlow received his air force training at #3 Initial Training School (ITS) in Victoriaville (Quebec); at #4 Elementary Flying Training School (EFTS) in Windsor Mill (Quebec); at #13 Service Flying Training School in St. Hubert (Quebec); and then at #4 Bombing and Gunnery School (BG&S) in Fingal (Ontario). He was awarded his Pilot Flying Badge on June 5, 1942. When Air Commander Billy Bishop, V.C., pinned on Jack Thurlow's wings, he asked for a box to stand on to reach the chest of the six foot, three inch, 200-pound-plus airman. From #1 "Y" Depot in Halifax, he embarked overseas bound for the United Kingdom on November 16, 1943. After arriving, from #3 Personnel Reception Centre, he continued his training at #18 (Pilot) Advanced Flying Unit (AFU) at Church Lanford; and #12 Operational Training Unit (OTU) at Chipping Wardley; and then at #1657 Heavy Conversion Unit (CU) at Stradishall. On November 13, 1944, Flight Lieutenant Jack Thurlow became a member of RAF 199 Squadron (Let Tyrants Tremble), part of No. 100 Group with **Bomber Command**.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

RAF No. 199 Squadron was formed on November 7, 1942, based at RAF Blyton equipped with Vickers Wellington aircraft, as a standard night bomber squadron within Bomber Command. By July 1943, the squadron was based at RAF Lakenheath and was re-equipped with Short Stirling III four-engine heavy bombers. In May 1944 the squadron was transferred to No. 100 Group to become a radio counter-measures group, based at RAF North Creak. The squadron aircraft were equipped with advanced radar jamming equipment to disrupt the German air defences, supporting the heavy bomber raids over Germany.

Thurlow was well-liked and being a big man, was affectionately nicknamed "Tiny" by members of 199 Squadron. On the night of March 5, 1945, F/L Jack Thurlow was the Pilot and captain aboard Stirling III aircraft LJ617 (markings EX-E) with its seven other crew members. His aircraft was one of a part of the 199 squadron that took off to provide support for a night bombing mission to an unknown location in Germany. Thurlow's aircraft took off for France from RAF North Creak, Norfolk at 1642 hours, during a continuous light drizzle and low cloud mist. As part of a Bomber Support Operation, LJ617 was tasked with orbiting a specific position over France for a period from 1855 hours to 2050 hours, at no less than 15,000 feet – to deploy a Mandrel screen. That night, there was cloud up to and above this height, and the majority of aircraft in the vicinity, including Thurlow's Stirling LJ617, flew at approximately 18,000 feet.

After completing four orbits and at approximately 1930 hours, Thurlow's aircraft was fired on and hit by anti-aircraft gunfire (90 mm guns) while completing its fifth orbit. The starboard outer engine was hit and fire spread along the mainplane. The Captain of the aircraft, Pilot Jack Thurlow, ordered the crew to bail out and all the crew,

with the exception of the Captain Thurlow, obtained their parachutes. They were in the process of abandoning the aircraft when it exploded and disintegrated in mid-air, throwing seven members of the crew clear. Thurlow had stayed at his station to allow the other members of the crew to bail out, and he was unable to put on his parachute before the explosion took place.

No escape hatch had been opened and the time from the first hit to the final disintegration was approximately twenty seconds. None of the airmen escaped out of the hatches--all were blown out when the aircraft exploded and disintegrated in mid-air. Seven airmen parachuted safely to the ground and landed in friendly territory approximately 15 miles in front of the German lines. The aircraft crashed to the ground in the vicinity of Thionville, France, where parts were scattered far and wide in the midst of a large forest. The remnants of the aircraft burned for four hours. No traces of F/L Jack Thurlow were ever found. Surviving crew members were F/O's R.G. Noonward and R.A. Twaddle; P/O J.R. Nichols; F/Sgt's J.G.A.G. Evans and L.G. Phillips; F/Lt F. Fenning; and Sgt. A. Plumtree.

Pilot Jack Alvin Thurlow

Days later, the Mid Upper Gunner, F/L F. Fenning, recalled his final moments in the aircraft; *The starboard outer burst into flames and a large hole was also made in the centre of the mainplane between the outer and inner engines. Captain Thurlow immediately ordered 'Bale out'. I vacated my turret, donned parachute, retained helmet on and made for the rear escape hatch. The Special W/AIR was immediately in front of me and the rear gunner was coming from his turret and dropping on his knees preparatory to opening the hatch. I plugged in the intercom at the hatch in order to advise the captain that three had gone out of the rear exit. Immediately on plugging in I heard the captain say 'Quick give me my chute' almost simultaneously a tremendous explosion occurred behind me and I opened my eyes to find I was descending and that my parachute was open. I should mention that there was a very pronounced smell of petrol inside the aircraft... I have since verified with the Bomb Aimer that he got as far as getting his hands on the captain's parachute when the explosion took place.*

An ensuing investigation determined that Thurlow's Stirling LJ617 aircraft had been hit by a U.S. Army anti-aircraft shell. Investigators concluded the American A.A. Battery had made a serious mistake. The following day after the crash, Lt.-Col. Sam C. Russell of the 38th A.A.A. Brigade, A.P.O. 403 US Army, called the hospital and expressed his deepest sympathy with the crew at what he termed a *regrettable accident which should never have taken place.*

In expressing regret and accepting responsibility at the mistake the Americans made, Brigadier C. Hines, Commander of the 38th A.A.A. Brigade wrote the following in a letter to the Air Officer Commanding No. 100 Group: *I wish to express my deepest sympathy for an avoidable (sic) loss of an aircraft of your Command, and the probable loss of one of the crew. Units of this Brigade have been extremely proud of their record since 1st August, 1944, and have been particularly careful in their I.A.Z. duties. This unfortunate misunderstanding of a message by our battalion is regretted. One of the other conclusions of the RAF investigation into the accident was that, Once again it is proved that pilots of heavy bomber type aircraft should be equipped with parachute that can be worn permanently in the cockpit.*

The October 1945 Official RCAF Casualty Notification recorded Pilot Jack Alvin Thurlow as *Previously reported "missing" 5-March-45 after air operations (overseas). Aircraft abandoned near Thionville France and subsequently reported "missing believed killed" (Bomb aimer could find no trace amongst aircraft wreckage). Now "presumed dead" 5-March-45 for official purposes.*

In March 1945, the Wing Commander of 199 Squadron wrote to Jack's mother, Mrs. Olive Heymes at 584 George Street in Woodstock: *Tiny was one of the most popular members of the Squadron, held in high esteem by all. Always cheerful and happy-go-lucky, he was one of our best pilots. He is greatly missed by his comrades and his loss is deeply regretted by all of us.* In January 1946, Olive received a War Service Gratuity of \$627.72 for the loss of her son. A year later, the Wing Commander for Chief of the Air Staff sent her the Operational Wings and Certificate in recognition of the gallant services rendered by her son. In May 1952, she received a letter from the Wing Commander, RCAF Casualties Officer for Chief of the Air Staff. Following is a portion of that letter:
Dear Mrs. Heymes:

It is with reluctance that after so long an interval, I must refer to the loss of your son, Flight Lieutenant Jack Alvin Thurlow, but due to the lack of any information concerning him since he was reported missing, it must be regretfully accepted and officially recorded that he does not have a "known" grave...

RCAF Flight Lieutenant Jack Alvin Thurlow, 26, has no known grave. His name is inscribed on the Runnymede War Memorial in Surrey, England on Panel 278. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

TOTTEN, Walter Frederick (#A/57816)

Walter Frederick Totten was 21 when he joined the army, and planned to return to farming after the war. After training in the U.K., he served in France and Belgium in the fight to rid those countries of the German oppressors. He was wounded in twice while in action. The second wounding proved to be fatal. His commanding officer wrote of Walter that, *he was an inspiration to the rest of us. His gallantry and devotion to duty did not go unnoticed... he will not be forgotten by those who fought beside him...*

Walter Frederick Totten was born in Sarnia on January 24, 1920, the son of Isaac and Charlotte Totten who were married in Norwich, Norfolk, England. At some point, the Totten family immigrated to Canada, and lived at 499 George Street in Sarnia. Isaac supported his family working in the Process Department at Plant No. 2, with the Sarnia Imperial Refinery. Isaac and Charlotte had five children together: Edward (the oldest), Walter, Clarence, and Clifford (both younger than Walter). Their fifth child, Ernest, died on April 12, 1923. At the time of Walter's death, his three brothers were all serving in the war: Clarence was a Private with the Canadian Army in British Columbia; Clifford was a seaman/gunner with the Canadian Navy; and Edward was a gunner with the Canadian Army who was in a hospital in London, Ontario recovering from frostbite that he had received while on duty in the Arctic.

Walter Totten completed his schooling at the age of sixteen. He worked as a farm hand for various farmers throughout Southwestern Ontario from 1936 to 1940. For a short time prior to enlisting, Walter worked as a yardman at Imperial Oil Limited in Sarnia.

Twenty-one-year-old Walter Totten enlisted in the Canadian Army on July 3, 1941 in Chatham, Ontario. He stood five feet five inches tall, had blue eyes and medium brown hair, was single, and lived with his parents on George Street at the time. He recorded his occupation as farmer. He planned to return to farming after the war. He had joined #12 Canadian Army (Basic) Training Centre in Chatham several weeks prior to enlisting. From #1 District Depot in London, Ontario, Walter began his army training at #12 Basic Training Centre (BTC) in Chatham. In late August 1941, he began his advanced training at A17 Canadian Machine Gun Training Center (CMGTC) in Three Rivers, Quebec. On December 13, 1941, Walter embarked overseas bound for the United Kingdom.

Disembarking in the U.K. on December 26, 1941, Walter Totten became a member of the Canadian Machine Gun Holding Unit (CMGHU). In May 1942, he became a member of the Cameron Highlanders of Ottawa (CHofO), Royal Canadian Infantry Corps (RCIC). Walter continued to train in the United Kingdom for two and a half years, including mortar training and time with a machine gun reinforcement unit. In late March 1944, he was attached to #6 Canadian Infantry Reinforcement Unit (CIRU), and in mid-May 1944, was returned to the Cameron Highlanders. Walter embarked from the UK and sailed across the English Channel on July 10, 1944.

On July 12, 1944, one month after D-Day, Private Walter Totten disembarked in France with the Cameron Highlanders. The **Battle of Normandy** had begun for the Canadians with the June 6, 1944 D-Day landings at Juno Beach. After breaching the “Atlantic Wall” of “Fortress Europe”, Allied armies began their breakout from the narrow Normandy bridgehead to carve out a foothold on the French mainland. It took a whole summer of tenacious fighting, pushing against fierce and ruthless German forces to advance east across France. In a brutal campaign of attrition, the Canadians faced fierce battles and vicious counterattacks as they clawed their way forward liberating villages and towns including Bretteville, Carpiquet, Caen and Falaise.

Only ten days after arriving in France, on July 22, 1944, Private Walter Totten was wounded in action. He was returned to the United Kingdom on July 30, 1944, where he would recover from his wounds in an English hospital. While recovering, he was attached to the #6 Canadian Infantry Reinforcement Unit (CIRU).

One month after being wounded, Walter was returned to his unit, disembarking in France on August 26, 1944. After the Allied breakout from Normandy, Canadian forces were assigned the “**Long Left Flank**”, which included the less glamorous but vital tasks of clearing coastal areas in the north of France and Belgium of German occupiers; opening the English Channel ports for supplies essential to the Allied advance; and capturing the launching sites of German V-1 rockets. In a series of stop-and-start advances against stiff resistance in fortified positions, the Canadians liberated ports and villages including Rouen, Dieppe, Dunkirk, Boulogne and Calais. Walter Totten served with the Cameron Highlanders as they advanced along the “long left flank” from late August to early October 1944 towards Belgium and the Netherlands.

In early September 1944, Allied forces had captured the inland port of Antwerp, Belgium, the second greatest port in Europe at the mouth of the Scheldt River. However, German forces still controlled the 45-mile-long Scheldt estuary (the Belgian-Dutch border area) that connected the port of Antwerp to the North Sea. In early October 1944, the Canadians were entrusted with liberating the estuary. The **Battle of the Scheldt** was among the most difficult and grueling struggles in the war. The bitter fighting against a well-fortified and heavily entrenched enemy took place in a bleak environment made worse by the winter cold in a flooded and freezing muddy quagmire.

Less than two months after rejoining his unit, Private Walter Totten was wounded again. On October 18, 1944, he was wounded in action in Antwerp, Belgium, during the Battle of the Scheldt. Succumbing to his injuries, he lost his life four days later on October 22, 1944. Walter Totten was buried on October 23, 1944, at a location recorded on the Army Field Service Card as “Belgium Eccloo Notre Dame de L’Epire 087948 Plot 1-Row3-Grave 8”.

Five days after their son’s death, on October 27, 1944, Isaac and Charlotte Totten in Sarnia received information from Ottawa informing them that their son, PTE WALTER FREDERICK TOTTEN WAS INJURED IN ACTION IN FRANCE ON OCTOBER 18. The message informed them that Walter had suffered a compound fracture of the tibia when wounded in action on October 18, 1944. One week later, Isaac and Charlotte received a telegram from the Director of Records in Ottawa informing them that their son, PRIVATE WALTER FREDERICK TOTTEN HAD SUCCUMBED TO HIS INJURIES ON OCTOBER 22. Isaac and Charlotte later received a letter from Hon. Capt. (Rev.) Gordon Walker who officiated Walter’s funeral in the military cemetery in Eccloo, Belgium.

In mid-November 1944, Charlotte received the following letter from the Major-General, Adjutant-General:
Dear Mrs. Totten:

It was with deep regret that I learned of the death of your son, A57816 Private Walter Frederick Totten, who gave his life in the Service of his Country in the Western European Theatre of War on the 22nd day of October, 1944.

From official information we have received, your son died as the result of injuries received in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Walter Totten’s death was later officially recorded as, *Overseas casualty, died of injuries, in the field (Belgium)*. In late January 1945, Charlotte wrote a letter to the Estates Branch. She had sent her “darling son” a new watch in May 1944, and two “expensive and valuable parcels” in early September and early October 1944. In her letter, she wrote, *...I would very much like to receive something of His; but realise that it takes time I have lost a wonderful kind good loving son. But wars always take the Best only a mother knows that heart-ache believe me.*

In early February 1945, Isaac and Charlotte received the following letter from Major R.G. Armstrong, the Commanding Officer of their son Walter’s unit, D Company, Cameron Highlanders of Ottawa:

On behalf of your son's friends in this company I write you this letter. We hope that you will not grieve too much for him but rather be proud that you have had such a man as your son. To say that we are proud of him is an understatement for he was an inspiration to the rest of us. His gallantry and devotion to duty did not go unnoticed. We assure you that he will not be forgotten by those who fought beside him for so long, and it remains to us who are left to carry on his splendid work. Again may I express my regrets.

In September 1945, Isaac and Charlotte received a War Service Gratuity of \$668.82 for the loss of their son. In early January 1946, Charlotte received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Madam:

Information has just been received from overseas that the remains of your son, A57816 Private Walter Frederick Totten, have been carefully exhumed from the original place of interment and reverently reburied in grave 12, row A, plot 5, of Adegem Canadian Military Cemetery, Adegem, Belgium. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

Walter Totten, 24, is buried in Adegem Canadian War Cemetery, Belgium, Grave V.A.12. On his headstone are inscribed the words, GOD'S KINGDOM THE HOPE OF THE WORLD. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

VAIL, Donald (#R/99576)

Donald Vail had been a teacher, principal and salesman prior to making the decision to serve his country. He was also 34 years old, married and had three young children at home. He gave his life for the Allied cause while serving in one of the most dangerous postings of the war.

Donald Vail was born in London, Ontario on January 6, 1907, the son of Newbury, Ontario born Charles Wesley and Watford, Ontario born Laura Winnifred (nee Jones) Vail. Charles and Laura Vail had four children together, all boys: Cecil Victor (born 1890); Wilfred Barrie (born 1899); Donald, and Allan Douglas (born 1908). The Vail family lived in Middlesex County until about 1911, and then moved to Watford, Ontario. Donald's father, Charles Vail, a former C.N.R. station agent and operator, passed away in December of 1935. Donald's mother, Laura Vail, later moved to 480 King William Street in Hamilton, Ontario.

Donald Vail attended Watford Public School from 1912 to 1920, then Watford High School from 1920 to 1924, and then London Central Collegiate in 1926-1927. He attended the University of Western Ontario (UWO) in 1927-1928, obtaining 11 credits, and then London Normal School in 1930-1931. While attending the University of Western, Donald played hockey there, as well as with the Strathroy team. He was also very active in track and field, boxing and baseball in Sarnia. Once employed, he continued to take UWO Faculty of Arts extension courses between 1935-1938, including in psychology, economics, English and history. Donald began his teaching career at S.S. #3 Wolfe Island in 1931-1932, and then #2 Oneida in 1932-1933. From 1933 to 1938, Donald was the principal at Wyoming Public School in Wyoming, Ontario.

On December 31, 1932, Donald Vail married Vera Doreen Miller (of Watford, Ontario) in Ilderton, Ontario. The couple were blessed with three children: Patricia Anne (born September 2, 1934 in Petrolia); Nancy Jane (born June 24, 1936 in Petrolia); and Donald Paul (born July 13, 1939 in Sarnia). In the latter part of 1938, Donald joined the London Life Insurance Company in Sarnia, where he worked as a bookkeeper and insurance salesman for two and a half years until he enlisted in 1941. From July 30, 1940 to April 12, 1941, Donald served with the 2-11th Field Company, Royal Canadian Engineers (RCE) in Sarnia, attaining the rank of Lieutenant-Corporal.

Thirty-four-year-old Donald Vail enlisted in the Royal Canadian Air Force on April 15, 1941 in London, Ontario. He stood five feet nine and a half inches tall, had blue eyes and brown (greying) hair, and lived at 532 Devine Street, Sarnia at the time with his wife and three children. He requested ground duties, specifically as a radio mechanic. In a reference letter written by Horace Palmer (a C.N.R. conductor and veteran of the Great War) for the RCAF recruiter on behalf of Donald, Mr. Palmer wrote, *This is to certify that I have known members of the Vail*

family for a number of years and I consider Mr. Donald Vail a young man of very fine character not only in a business capacity but also in home life. I have always found him industrious, sober and reliable. He has been a Schoolmaster, is a fine athlete, and while employed as Schoolmaster he had sufficient ambition to learn the telegraph. I served four years in the army during the last war and I have no hesitation in saying that I think Mr. Donald Vail would be an asset to any branch of the R.C.A.F. to which he may apply...

From the Recruiting Centre in London, and then #1 Manning Depot in Toronto, Donald received training at the RCAF Detachment at Western University in London (Fundamental and Applied Theory) and #31 Radio School in Clinton, Ontario. Upon completion of an RCAF radio mechanics course in December 1941 at Western University, the course instructor wrote of him, *Lab work excellent. Thoroughly reliable and conscientious. Is superior in maturity of judgement. Assessment – Exceptional.* In mid-February 1942, Donald was posted to #31 Personnel Depot in Moncton, New Brunswick.

In late February-early March 1942, Donald enjoyed his two-week pre-embarkation leave. On March 12, 1942, Donald embarked overseas from #1 Y Depot in Halifax bound for the United Kingdom. Initially posted to RAF #3 Personnel Reception Centre, he was transferred on May 5, 1942 to RAF #15 Operational Training Unit (OTU), based at RAF Harwell, with the rank of Corporal, where he was a radio technician/mechanic.

Corporal Donald Vail

RAF #15 Operational Training Unit (OTU) was formed in April 1940 as part of No. 6 Group RAF Bomber Command at RAF Harwell. Instructors trained night bomber crews on the Vickers Wellington aircraft, a twin-engine, long-range medium bomber.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in **Bomber Command** operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war. There was no easy way to learn how to fly the heavy bombers, and training crews suffered a litany of disasters, crashes and deaths. By the end of the war, Bomber Command lost over 8,000 Allied airmen who were killed in training or by accidents alone.

Two months after arriving at RAF #15 OTU, on July 9, 1942, Donald Vail was a passenger aboard Wellington IC aircraft DV932 that took off from RAF Harwell on a day training exercise. At approximately 1630 hours, on its return approach to Harwell, the pilot overshot the landing and attempted a take-off to go around again. The aircraft failed to gain sufficient height and stalled when the pilot tried to turn away from some trees. The Wellington aircraft accidentally crashed in a field adjacent to the aerodrome at Harwell, Didcot, Berkshire, England. Donald suffered abdominal injuries and fourth degree burns and died in the crash. Perishing with Corporal Donald Vail were LAC Gordon Stewart Miller and RAF airmen P/O Herbert Edward James Giles and Sgts Donald Bradshaw and John Simon DaSilva Haley.

Just days after the crash, his wife Vera Vail in Watford received the cablegram informing her that Donald

was listed as, KILLED DURING AIR OPERATIONS OVERSEAS. Upon his death, Donald Vail left behind his wife Vera, their two daughters, Patsy (age 7 1/2), Nancy (age 6), and their son Paul (age 3). In February 1945, Vera Vail received a War Service Gratuity of \$144.89 for the loss of her husband Donald.

Donald Vail, 35, is buried in Brookwood Military Cemetery, Surrey, United Kingdom, Grave 32.G.4. On his headstone are inscribed the words, HE IS NOT DEAD WHILE HIS MEMORY LIVES IN THE HEARTS OF THOSE WHO LOVED HIM.

VOKES, Myles Keith (#A/99627)

Myles Keith Vokes was only eighteen years old when he was called to serve his country. He never had the opportunity to serve overseas. He died as a result of a tragic accident while serving with the Military Staff Clerks in London, Ontario.

Myles Vokes was born in London, Ontario on August 23, 1922, the youngest son of William (born in Peel County) and Alice May (nee Mason) Vokes who were married on July 24, 1912 in Forest, Ontario. The Vokes family moved to Sarnia only weeks after Myles' birth, and lived at 137 John Street. William supported his family working as a stationary engineer in Sarnia. William and Alice Vokes had three children together: Martha Eva (born 1913); William Mason (born July 11, 1914); and Myles. Myles' brother William also served in the war, as a member of the Royal Canadian Air Force. Myles Vokes was educated in Sarnia including four years of high school, and eleven months at a Sarnia Business College.

William Mason Vokes, RCAF

Myles Keith Vokes

Eighteen year-old Myles Vokes was called out under General Orders (GO) on September 5, 1940, and was attached to #11 Non-Permanent Active Militia Training Centre in Woodstock, Ontario as a Private. From August 14, 1940 to April 15, 1941, Myles served in the 26th Field Battery, Royal Canadian Artillery (RCA) in Sarnia, with the rank of Gunner. On April 16, 1941, Myles completed his Canadian Active Service Force (CASF) Attestation Papers in London, Ontario, becoming a member of the Active Force (AF). He stood five feet seven and three-quarter inches tall, had blue eyes and brown hair, was single, and lived at home with his parents on John Street at the time. He recorded his occupation as stenographer, an occupation he planned to pursue after the war. Myles became a member of the #1 Detachment Corps of Military Staff Clerks (CMSC), based in London, Ontario. In mid-July 1941, he was made a Lance Corporal, and in October 1941 he advanced in rank to Corporal.

On January 9, 1942, Myles Vokes lost his life in London, Ontario, the result of a motorcycle accident. The tragic mishap occurred at the corner of Piccadilly and Colborne Streets on the night of January 8, 1942. The motorcycle, with sidecar attached, was involved in a collision with an automobile. Driving the motorcycle was Petrolia soldier Gunner Robert F. Burns, 18, and in the sidecar were passengers Private Frederick R. Heatherly, 18, of London and Corporal Myles Vokes. All three soldiers were on duty at the time--Burns and Heatherly were employed as dispatch riders, stationed at No. 1 District Depot, Wolsely Barracks.

The motorcycle was proceeding along Piccadilly Street at about 30 m.p.h. and at the corner of Colborne Street there was a manhole covered by a windlass over it in the centre of the intersection. A car approached up Colborne Street from the south, on the wrong side of the road. As the road was slippery from frozen snow and ice, and thinking the driver of car was slowing down, the motorcycle driver thought there was enough room to pass the automobile. The civilian car struck the right front of the motorcycle side-car.

Out of control, the motorcycle careened into a curb and the impact hurled Myles Vokes twenty feet through the air onto the roadway. When police and an ambulance arrived, Myles was lying face down on the road. Both Burns and Heatherly were lying conscious beside the completely wrecked motorcycle. They were all taken to Trafalgar Hospital. Gunner R. Burns suffered a fractured right radius, and Private F. Heatherly suffered shock and contusion, and skin abrasion of the left hip. Corporal Myles Vokes was dead upon arrival.

Myles Vokes, 19, is buried in Sarnia (Lakeview) Cemetery, Sarnia, Ontario, Canada, Sec. E. Lot 154. On his headstone are inscribed the words, AT THE GOING DOWN OF THE SUN AND IN THE MORNING WE WILL REMEMBER HIM.

WADE, John Robert (#A/105041)

John Wade was working hard and saving money to buy his own farm when, at age 19, he made the decision to serve his country. Two years later, after being wounded a second time, he lost his life for the Allied cause during the fierce fighting to liberate Italy.

John Robert Wade was born in Sarnia on May 4, 1923, the eldest son of John William and Evelyn Maude Wade who were married in Sarnia on March 24, 1913. John Sr. and Evelyn Wade had six children together: sons John Jr. and Frederick (the youngest in the family); and four daughters: (who at the time of John's death were) Mrs. Edith Mae Waghorne (residing in Edmonton); Mrs. Grace Annie (Robert) Ferguson and Mrs. Evelyn Maude (Donald) May (both at R.R. #1, Sarnia); and Mrs. Marion (Joe) Soper (residing on Stuart Street, Sarnia). John Wade Sr. supported his family working as a carpenter, and the Wade family lived at R.R. #1, 6th Concession, Sarnia Township.

Growing up on a farm, John Wade Jr. attended school for eight years and completed his grade eight at the age of fourteen in 1936. He was a member of his church choir, and was active in rugby, softball and hockey. He started his first year of high school at Sarnia Collegiate in 1937 but quit on his own accord to go to work. He worked as a carpenter's helper for one year, and then on his father's 30-acre market garden and dairy farm for a couple of years. He was employed for two years at Electric Auto-Lite plant in Sarnia as a press operator prior to enlisting.

Nineteen year-old John Wade Jr. enlisted in the Canadian Army on October 28, 1942 in London, Ontario. He stood five feet nine and a half inches tall, had hazel eyes and brown hair, was single, and lived at home with his parents at R.R.#1 in Sarnia at the time. He planned to have a farm of his own after the war. The Recruiting Officer notes on John Wade included, *Liked working at Auto-Lite Mfg, was making 80 cents per hour. Has been saving money...war bonds so as to set himself up in a farm... Excellent health all his life... goes to theatre, parties, reads a lot of light fiction. Tall, well-built chap... Good stability. Good personality.*

From #1 District Depot in London, John Wade received his army training at #13 Basic Training Centre (BTC) in Listowel; followed by #6 Basic Training Center in Stratford; and then at #8 Canadian Armoured Corps (Advanced) Training Centre (CACATC) at Camp Borden. While at CACATC, he attained the rank of Trooper in February 1943, and he qualified as a Dispatch Rider. In mid-May 1943, he was transferred to #1 Canadian Armoured Corps Training Regiment (CACTR). In late May-early June 1943, John received a 14-day pre-embarkation furlough.

On June 11, 1943, Trooper John Wade embarked overseas bound for the United Kingdom, where he became a member of #3 Canadian Armoured Corps Reinforcement Unit (CACRU). He continued his training in the U.K., including a period with the 21st Armoured Regiment and with the firefighters at #1 Canadian Army Reinforcement Unit (CARU). In May 1944, he was transferred to #3 Canadian Infantry Reinforcement Unit (CIRU), reverting to the rank of Private.

On June 8, 1944 Private John Wade departed the U.K. bound Italy. He disembarked in the Italian Theatre on June 22, 1944, as a member of the 48th Highlanders. The **Italian Campaign**, the first sustained Canadian Army operation of the war, had begun with the invasion of Sicily on July 10, 1943. The fierce fighting on the island would last more than four weeks, during which the Canadians advanced through difficult mountainous terrain, against an

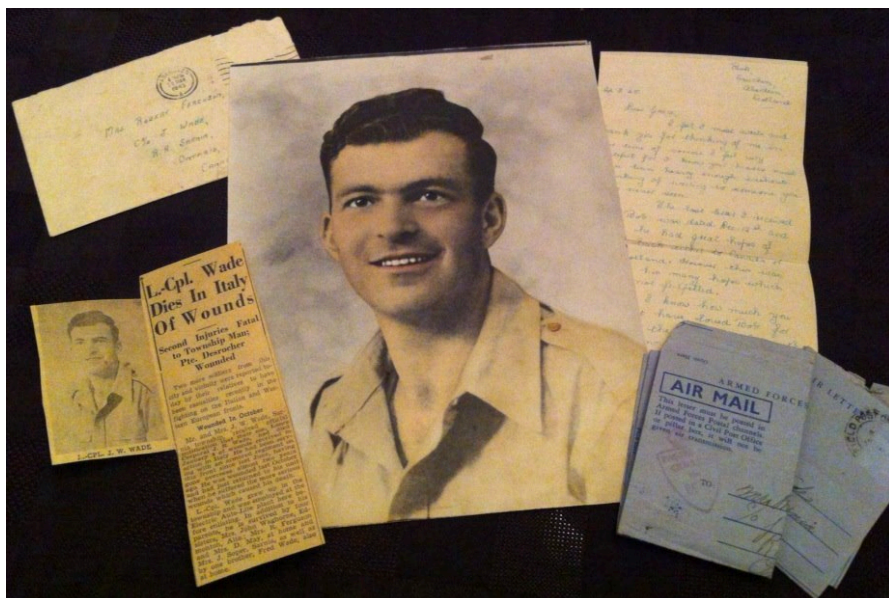

ever-stiffening German resistance. By August 17, the Germans had retreated to the Italian mainland. In early September 1943, Canadian and Allied forces invaded Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl, lasting 20 months, over a range of landscapes, through challenging weather, and against a series of well-protected defences held by some of the German army's best troops.

John Wade served with the Canadian Forces as they advanced northwards through Italy--first with the 48th Highlanders, and in mid-July 1944, he was transferred to the Light Anti-Aircraft (LAA) Battery.

Four months after arriving in Italy, on October 11, 1944, John Wade was wounded in action, after a bazooka shell exploded close to him. Injuries recorded on the Field Medical Card included: blast trauma, rupture of both tympanic membranes, haemorrhaging into both tympanic, traumatic perforation in both, considerable diminished hearing.

On October 18, 1944, Evelyn Wade of R.R. #1, Sarnia, received the following telegram from the Director of Records in Ottawa: MINISTER OF NATIONAL DEFENCE SINCERELY REGRETS TO INFORM YOU A105041 PRIVATE JOHN ROBERT WADE HAS BEEN OFFICIALLY REPORTED SLIGHTLY WOUNDED IN ACTION ELEVENTH OCTOBER 1944 NATURE OF WOUNDS NOT YET AVAILABLE STOP WHEN ADDRESSING MAIL ADD WORDS IN HOSPITAL IN BOLD LETTERS AFTER NAME OF UNIT FOR QUICK DELIVERY STOP IF FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED.

On November 1, 1944, Evelyn received another telegram from the Director of Records in Ottawa: MINISTER OF NATIONAL DEFENCE WISHES TO INFORM YOU THAT A105041 PRIVATE JOHN ROBERT WADE PREVIOUSLY REPORTED SLIGHTLY WOUNDED IN ACTION NATURE OF WOUNDS NOW REPORTED AS PERFORATION BOTH EAR DRUMS DUE TO BLAST STOP IF ANY FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED. John spent almost three weeks in November recovering from his wounds at #15 Canadian General Hospital.

Pvt. John Wade, along with; letters he wrote to his mother Evelyn and sister Grace Ferguson;
a letter to Grace from John's girlfriend Isabel in Aberdeen, Scotland;
and the death announcement from the newspaper.

On December 28, 1944, Private John Wade returned to Italy, as a member of the Lanark and Renfrew Scottish Regiment, Royal Canadian Infantry Corps (RCIC). Only days later, on New Year's Eve (December 31, 1944/January 1, 1945), he was wounded again, this time more seriously. Injuries recorded on the Field Medical Card at #5 Canadian Casualty Clearing Station included; *hit 0015 hours (Jan 1), large penetrating wound right flank, considerable shock, plasma started, considerable pain, given morphine and blood.*

John was admitted to #4 Canadian Field Surgical Unit at 0400 hours and operated on at 0545 hours (January 1, 1945). Doctor reports included: *two foreign bodies (shrapnel) penetrated the abdomen through the diaphragm,*

right side, which took different courses in the belly, lacerating organs including the liver, gall bladder, pancreas, colon and small intestine. Doctors continued to care for him over the next couple of days, but on January 4, 1945, while being moved to a theatre for further operations, he died at 2200 hours. John Wade's body was buried on January 5, 1945, at a location recorded on the Army Field Service Card as "Ravenna Military Cemetery sh 89 1/100000 MR 564388 Grave H 1".

On January 3, 1945, Evelyn received the following telegram from the Director of Records in Ottawa: MINISTER OF NATIONAL DEFENCE SINCERELY REGRETS TO INFORM YOU A105041 PRIVATE JOHN ROBERT WADE HAS BEEN OFFICIALLY REPORTED AGAIN SERIOUSLY WOUNDED IN ACTION FIRST JANUARY 1945 NATURE OF SECOND WOUND REPORTED AS SEVERE SHELL FRAGMENT WOUND RIGHT SIDE ABDOMEN STOP WHEN ADDRESSING MAIL ADD WORDS IN HOSPITAL IN BOLD LETTERS OVER NAME OF ADDRESSEE FOR QUICK DELIVERY STOP IF FURTHER INFORMATION BECOMES AVAILABLE IT WILL BE FORWARDED AS SOON AS RECEIVED STOP TO PREVENT POSSIBLE AID TO OUR ENEMIES DO NOT DIVULGE DATE OF CASUALTY OR NAME OF UNIT.

On November 7, 1945, Evelyn received another telegram from the Director of Records in Ottawa: REGRET DEEPLY A105041 PRIVATE JOHN ROBERT WADE HAS NOW BEEN OFFICIALLY REPORTED TO HAVE DIED OF WOUNDS FOURTH JANUARY 1945 STOP YOU WILL RECEIVE FURTHER DETAILS BY MAIL DIRECT FROM THE UNIT IN THE THEATRE OF WAR.

In mid-January 1945, Evelyn received the following letter from the Major-General, Adjutant-General:
Dear Mrs. Wade:

It was with deep regret that I learned of the death of your son, A105041 Private John Robert Wade, who gave his life in the Service of his Country in the Mediterranean Theatre of War on the 4th day of January, 1945.

From official information we have received, your son died as the result of wounds received in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

In late January 1945, she received the following letter from the Colonel, Acting Director of Records, for Adjutant-General:
Dear Mrs. Wade:

With reference to the regretted death of your son, A.105041 Private John Robert Wade, I am directed to advise that official information has now been received from Canadian Military Headquarters, Overseas, stating that it has been ascertained that he was wounded in action for the second time on the 31st December, 1944, and became seriously ill on the following day, suffering from severe shell fragment wounds to the right side of the abdomen which caused his death on the 4th January, 1945.

Please accept my sincere and heartfelt sympathy for the irreparable loss you have suffered.

In early February 1945, London Road West United Church in Sarnia held a Sunday afternoon memorial service for two members of the church who had lost their lives recently in the war. Rev. P.S. Banes presided over a ceremony honouring Lance Corporal Robert John Wade, who lost his life January 4, 1945 in Italy; and Private Horace Humble (also included in this Project), who lost his life December 10, 1944 in Italy.

John Wade's death was later officially recorded as, *Overseas casualty, died of wounds received in action, in the field (Italy)*. In April 1946, John Sr. and Evelyn Wade received a War Service Gratuity of \$393.88 for the loss of their eldest son. Twenty-one-year-old John Wade's remains were later carefully exhumed from their original place of internment and reverently reburied in Argenta Gap War Cemetery, Italy, Grave IV, G, 10. While Canadians did not fight in the area of this cemetery, north of Ravenna, the cemetery contains the graves of 77 Canadian soldiers and airmen who were brought here from battlefields farther south. On John Wade's headstone are inscribed the words, FOR HIM LIFE MORE ABUNDANT, FOR US A GUIDING STAR. LOVED AND REMEMBERED.

WALKER, Wilford Russell (#A/108651)

The son of a Great War veteran, Wilford Walker was 27 years old and married with two very young children at home when he made the decision to serve his country. He served in France, Belgium and the Netherlands, losing his life while fighting in horrid conditions in one of the most difficult and grueling struggles in the war.

Wilford Russell Walker was born in Dawn Township on August 18, 1916, the son of Franklin Russell and Stella May (nee Brewer) Walker. Franklin “Frank” Walker was born November 30, 1891 in Sombra Township. In 1911, nineteen year-old Frank Walker was residing in Lambton West with his parents, Christopher and Patience, along with his sister Emma and brother Kenneth. Three years later, on March 9, 1914, Frank Walker married and Stella May Brewer in Sarnia. Less than two years later, Frank Walker made the decision to serve his country in World War I.

Frank Walker enlisted in the Canadian Over-Seas Expeditionary Force in Sarnia on January 22, 1916, becoming a member of the 149th Battalion. The twenty-four-year-old Walker stood five feet eight and a half inches tall, had blue eyes and sandy hair, and recorded his occupation as machinist, and his present address as Point Edward (later 269 Vidal Street, Sarnia). His next-of-kin was his wife Stella Walker, and they had one child at the time, son Roy Sylvester, age one. Seven months after Frank enlisted, Wilford was born. Tragedy struck the Walker family only two weeks before Frank departed for overseas. On March 12, 1917, two-year-old Roy Sylvester passed away in Sarnia due to broncho pneumonia.

On March 28, 1917, Frank Walker leaving behind his wife and surviving son, embarked overseas from Halifax aboard *SS Southland* bound for the United Kingdom. After arriving in Liverpool, he was originally made a member of the 25th Reserve Battalion at Bramshott. One month later he was appointed Lance Corporal, and a month after that, he was taken on strength into the 161st Battalion at Camp Witley. Nine months later, in early March 1918, he reverted to the rank of Private at his own request, and his battalion was absorbed into the 4th Canadian Reserve Battalion returning to Bramshott.

On March 28, 1918, Private Frank Walker embarked for France as a member of the 47th Battalion. One and a half months later, in mid-May, he arrived at the front with the 47th Battalion. He soon found himself part of the **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium). This campaign was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The greatest victories of the Canadian Corps took place in this critical period, but they came at a high price, approximately 46,000 Canadian casualties.

On August 12, Frank Walker of the 47th Battalion, was appointed Lance Corporal in the field, and on September 3, he was promoted to Corporal in the field. On October 22, 1918, during the Battle of Canal-du-Nord and Cambrai in France, Corporal Frank Walker was wounded in action. He was admitted to #2 Casualty Clearing Station suffering a “gun shot wound left leg and compound fracture tibia and fibula.” Three weeks later, the Great War would end.

Frank Walker underwent treatment and operations in France and then England and was finally released from hospital (No. 4 Canadian General Hospital Basingstoke) on March 8, 1919. He returned to Canada and was finally discharged on demobilization on May 31, 1919.

By the time Frank returned home, his marriage to Stella had dissolved, and Wilford was living with his grandparents. In 1921, Frank, a labourer, was living with his son Wilford at 256 Cobden Street, Sarnia. Frank Walker, employed as a hoisting engineer, later remarried to Agnes Walker, who became Wilford’s step-mother. Wilford’s step-siblings included; step-sister Betty Marie Elliot, and step-brothers Lorne Phillip and Russell Leonard Walker. Frank and Agnes Walker and family resided at 349 South Mitton Street, Sarnia. At the time of Wilford’s death, brother Russell was serving in the Royal Canadian Air Force, as a Leading Aircraftmen, having been in England since June 1944.

Wilford Walker attended public school in Sarnia, completing grade eight in 1931 at the age of fifteen. He worked as a farm labourer for six years for several employers and then worked as a machine operator at Insulation Manufacturing Company for 3 ½ years. He then worked as a lathe operator at Mueller’s Brass Works in Sarnia for 1½ years. Prior to enlisting, Wilford was employed as a constable (guard) in the security office of the Polymer Corporation plant in Sarnia for a year and three months. In his spare time, he worked for a taxi company in Sarnia.

On August 19, 1938, Wilford Walker married Beatrice May Weiss of Sarnia, the daughter of Mr. and Mrs. Guy Weiss, who lived just outside the city in the vicinity of Perch Creek. Wilford and Beatrice May Walker lived at 257 Brock Street and had two children together: Franklin Arthur and Shirley May Walker.

Twenty-seven-year-old Wilford Walker enlisted in the Canadian Army on October 28, 1943 in London, Ontario. He stood five feet six and a quarter inches tall, had blue eyes and brown hair, and lived on Brock Street with

his wife and two children at the time. He stated a preference to be a driver in the army or to do artillery work. He planned to take up transport driving after the war.

From #1 District Depot in London, Wilford received his army training at A-2 Canadian Army Training Centre (CATC) in Petawawa; at Canadian Driving and Maintenance School (CD&MS) in Woodstock (qualified as a Driver/Mechanic Group C); and at Canadian Army Training School (CATS) in Hamilton. In mid-June 1944, he returned to A-2 CATC in Petawawa before embarking overseas.

On July 20, 1944, Wilford embarked overseas bound for the United Kingdom. Arriving in the U.K. on July 27, 1944, he was initially made a member of the Canadian Army Reinforcement Unit (CARU). On August 12, 1944, he was transferred to the Winnipeg Grenadiers. He continued to train for only a brief time before departing the United Kingdom to cross the English Channel on September 11, 1944.

On September 18, 1944, Private Wilford Walker disembarked in France, where he was first a reinforcement attached to X-4 Canadian Infantry Corps (CIC). In early November 1944, he became a member of the Lincoln and Welland Regiment, Royal Canadian Infantry Corps (RCIC). He served with the Lincoln and Welland Regiment as they advanced through northern France and into Belgium and the Netherlands.

In early October 1944, the Canadians were entrusted with liberating the 45-mile-long Scheldt estuary (the Belgian-Dutch border area) that connected the port of Antwerp to the North Sea. The **Battle of the Scheldt** was among the most difficult and grueling struggles in the war. The bitter fighting continued into November against a well-fortified and heavily entrenched enemy, taking place in a bleak environment made worse by the winter cold in a flooded and freezing muddy quagmire.

Over the winter of 1944-1945 most of the weary Canadians were given a rest, although the front was never quiet, with patrols and large-scale raids remaining constant. Canadian troops were stationed along the **Nijmegen sector** in the Netherlands. They were tasked to hold and defend the Nijmegen salient and a small piece of Allied-held territory north of the Maas River. This bridgehead would be used as a starting point for crossing the Rhine (in February 1945). The Allies had to give the enemy the impression that an assault was imminent to force it to leave troops in that area. The Germans did their best to push the Canadians out of "the island" by flooding the area and constantly harassing them with mortar fire, artillery and aggressive patrols. Constantly vigilant, the men dug deep slit trenches, covered them with whatever was handy, and tried to keep warm from the snow and cold during one of the most frigid winters on record in northern Europe. During this supposedly quiet period, between November 9 and December 31, 1944, approximately 1,239 Canadians were killed or wounded.

In January 1945, after failed Polish and British attacks, the First Canadian Army received the order to clear a small island north of the Maas River in the Netherlands where German Paratroopers had established a bridgehead. Known as Kapelsche Veer, the flat low-lying island offered no cover aside from deep dykes and was notoriously cold, windy and water-logged in the winter. As part of *Operation Elephant*, the Lincoln and Welland Regiment, with the support of the Argyll and Sutherland Highlanders and the South Alberta Regiment, were to clear the island by January 31. The **Battle of Kapelsche Veer** lasted from January 26-31, 1945. The fierce fighting in horrid conditions and poor weather resulted in a Canadian victory but at a cost. In only six days of fighting, the Lincoln and Welland Regiment suffered more than 183 casualties, including 50 dead--one of those was Wilford Walker.

Approximately four months after arriving in France, on January 28, 1945, Private Wilford Walker lost his life during Battle of Kapelsche Veer, a continuation of the **Battle of the Scheldt**. His remains were buried on February 1, 1945, at a location recorded on the Army Field Service Card as "Holland 4th Canadian Armoured Division Cemetery S'Hertogenbosch sheet M.R. 319479 Plot 2 Row A Grave 1".

A week prior to Wilford's death, his wife Beatrice May Walker had undergone an appendectomy in Sarnia General Hospital and was still a patient there when the telegram arrived at her home informing her of her husband's death. On February 5, 1945, Beatrice Walker received the following telegram from the Director of Records in Ottawa: REGRET DEEPLY A108651 PRIVATE WILFORD RUSSELL WALKER HAS BEEN OFFICIALLY REPORTED KILLED IN ACTION TWENTYEIGHTH JANUARY 1945 STOP YOU SHOULD RECEIVE FURTHER DETAILS BY MAIL DIRECT FROM THE UNIT IN THE THEATRE OF WAR STOP TO PREVENT POSSIBLE AID TO OUR ENEMIES DO NOT DIVULGE DATE OF CASUALTY OR NAME OF UNIT. No other information was provided. At the time, Wilford's family only knew that he had been serving in Belgium and Holland.

Upon leaving the hospital, Beatrice May returned to the couple's Brock Street address, with their two children, Frankie (age 4) and Shirley (age 2), and her sister, Mrs. Gatecliff. In mid-February 1945, Beatrice received the following letter from the Brigadier, Acting Adjutant-General:

Dear Mrs. Walker:

It was with deep regret that I learned of the death of your husband, A108651 Private Wilford Russell Walker, who gave his life in the Service of his Country in the Western European Theatre of War on the 28th day of January, 1945.

From official information we have received, your husband was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Wilford Walker's death was later officially recorded as, *Killed in action, in the field (Holland)*. In June 1945, Beatrice Walker received a War Service Gratuity of \$195.37 for the loss of her husband. In July 1945, she received the following letter from the Colonel, Director of Records, for Adjutant-General:

Dear Madam:

Information has now been received from the overseas military authorities that your husband, A-108651 Private Wilford Russell Walker, was buried with religious rites in grave 1, row A, plot 2, of a temporary Cemetery located at 'S Hertogenbosch, Holland.

The grave will have been temporarily marked with a wooden cross for identification purposes and in due course the remains will be reverently exhumed and removed to a recognized military burial ground when the concentration of graves in the area takes place. On this being completed the new location will be advised to you, but for obvious reasons it will likely take approximately one year before this information is received.

In August 1946, Beatrice received another letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Madam:

Information has just been received from overseas that the remains of your husband, A108651, Private Wilford Russell Walker, have been carefully exhumed from the original place of internment and reverently reburied in grave 5, row H, plot 15, of Nijmegen Canadian Military Cemetery, four miles South-East of Nijmegen, Holland. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

In January 1948, the Director, War Service Records in Ottawa, sent Beatrice a photograph of the grave and marker over the burial place of her late husband Private Wilford Walker. At some point, Beatrice remarried, becoming Beatrice Barrie, residing in Sarnia. Wilford Walker, 28, is buried in Groesbeek Canadian War Cemetery, Netherlands, Grave XV.H.5. On his headstone are inscribed the words, SOME DAY, WE KNOW NOT WHEN, WE HOPE TO MEET IN THE BETTER LAND, NEVER TO PART AGAIN.

WATSON, Elliott Courtney (#J/48690)

Elliott Watson was only eighteen years old when he made the decision to serve his country. As a member of RAF Coastal Command, he protected Allied convoys and carried out reconnaissance and air-sea rescue, all in the mid-ocean of the North Atlantic. In July 1944, flying in poor weather, the aircraft that he was in crashed killing seven of its eight-member crew.

Elliott Courtney Watson was born in Belfast, North Ireland on April 23, 1924, the eldest son of James Elliott and Mary Elizabeth (nee Courtney) Watson, both born in Belfast, who were married in Newtownards, County Down, Northern Ireland on September 12, 1922. When Elliott was two years old, he and his sister along with their mother Mary immigrated to Canada. They left Belfast aboard the passenger ship *Montcalm* and arrived in Montreal, Quebec on May 3, 1926. They soon reunited with husband/father James Elliott, who was then living at 284 King Street, Hamilton, Ontario. The Watson family lived in Hamilton until 1931 and then moved to Toronto. In 1941, the Watson

family moved to Sarnia and lived on 115 Proctor Street. James supported his family working as a salesman in Sarnia. Elliott had one sister, Marilyn Elizabeth, and one brother, Gerald Todd, who also served in the war as a Sergeant with the R.C.A.F.

Elliott was educated at Withrow Public Elementary School in Toronto from 1931 to 1938; then at Eastern High School of Commerce, 1938-1939; and then at Danforth Technical High School, September 1939-June 1940. Elliott was active in hockey, football, baseball and basketball, and enjoyed building model aircraft and radio. He was employed at Murtons Bakery in Toronto, 1940-1941, as a driver and salesman. After that, he was employed at Percy Waters Florist in Toronto during 1941, as a delivery driver, until his family moved to Sarnia. In 1942, prior to enlisting, Elliott was employed at Helen Simpson Limited (retail store on Yonge Street in Toronto) as a truck driver.

Eighteen year-old Elliott Watson enlisted in the Royal Canadian Air Force on June 26, 1942 in Toronto, Ontario. He stood five feet seven inches tall, had blue eyes and fair hair, was single, and was living at 730 Woodbine Avenue in Toronto at the time (though he recorded his permanent address as 115 Proctor Street, Sarnia). He requested flying duties with no specific preference for a specific role.

From the #11 Recruiting Centre then #1 Manning Depot in Toronto, Elliott received his air training at #16 Service Flying Training School (SFTS) in Hagersville; at #3 Wireless School (WS) in Winnipeg, Manitoba; and at #2 Bombing and Gunnery School (B&GS) in Mossbank, Saskatchewan. He graduated from #2 B&GS in Mossbank as a Wireless Air-Gunner (4th in the class of 45), and was awarded his Air Gunner's Badge on May 31, 1943. After graduating, Elliott returned to Sarnia on a 14-day leave during the first two weeks of June 1943, spending it with his friends and family. In mid-June 1943, he was posted #1 Y Depot, and then to Eastern Air Command (EAC) Headquarters in Halifax. In mid-July 1943, he was posted to #160 Squadron, Bomber Reconnaissance stationed in Yarmouth, Nova Scotia.

Pilot Officer-WAG Elliott Courtney Watson

RCAF #162 Squadron, Canso aircraft #11062

Back: A. Hildebrand, W. H. Lloyd, G. G. Bradshaw, J. E. Bowler
Front: R. D. Harvey, **Elliott C. Watson**, J. H. Knight (survivor), R.W.E. Townsend

In late-September 1943, Elliott Watson became a member of RCAF #162 Squadron "Sectabimur Usque Per Ima" (One time, one purpose), with the rank of Wireless Operator/Air Gunner. RCAF No. 162 Squadron was formed as a **Bomber Reconnaissance** squadron on May 19, 1942 at RCAF Station Yarmouth, Nova Scotia. Equipped with Consolidated Catalina aircraft (also known as the Canso), #162 was part of Coastal Command that played a pivotal role in the Allied war effort, most notably against U-boats during the Battle of the Atlantic. Other vital contributions included the sinking enemy warships and merchant vessels and the protection Allied shipping from aerial attacks. The squadron also provided reconnaissance and carried out air-sea rescue.

In October 1943, the squadron moved to Dartmouth, Nova Scotia where #162 Cansos carried out anti-submarine duties on the East Coast and the Gulf of St. Lawrence. In January 1944, #162 Squadron was seconded to **RAF Coastal Command** and stationed at RAF Reykjavik, Iceland. Here #162 Cansos covered the mid-ocean

portion of the North Atlantic convoy routes. In May 1944, the squadron moved east to RAF Wick, Scotland to support the invasion of Normandy. Their task was to intercept U-boats operating from Norwegian ports. No. 162 sank four German U-boats and shared in the sinking of a fifth that tried to break through the North Transit Area (Shetland Islands) to attack the Allied D-Day invasion fleet. No. 162 returned to Camp Maple Leaf at RAF Reykjavik later in the summer of 1944 and remained there until it returned to Canada in June 1945.

From June 3 to June 16, 1944, Elliott enjoyed a 14-day leave in which he was able to return to Sarnia, spending time with his parents, family and friends. He was even able to see his brother Gerald, who had been on furlough from the RCAF in late May 1944. As Gerald was returning to Three Rivers, Quebec in early June, and Elliott was just beginning his furlough, the two brothers were able to spend a few hours together between trains. After his leave, Elliott returned to #162 Squadron which continued to operate at its base in Iceland.

On July 29, 1944, Elliott Watson was with his crew aboard Vickers Consolidated Canso aircraft #11062 that took off from Reykjavik Iceland on an anti-sub patrol. The Canso aircraft was scheduled to land at RAF Wick, but stormy weather and heavy fog had moved into the area. The flight destination was moved from Wick to RAF Stornoway on the island of Lewis in the Outer Hebrides, but the heading they were given was faulty. The aircraft took the turn to the new destination, but never arrived. In the thick fog, it flew on a course towards Foula Island, in the Shetland Islands north-west of Scotland. Foula's barren landscape is dominated by Hamnafield Hill, a 1,100-foot high hill of rock and moss. The Canso's altimeter was at 920 feet when it slammed into the hill. The aircraft burst into flames, fuel tanks and ammunition exploded. Wreckage tumbled down the mountain. Seven of the eight crew members were killed.

Perishing with Pilot Officer-WAG Elliott Watson were F/O.s Willis Hilson Lloyd, Abram R. Hildebrand, and George Gordon Bradshaw; P/O. James Edwin Bowler; FS. Robert Wilford Ernest Townsend; and WO. Robert Densmore Harvey. FS. John H. Knight was the only survivor.

Elliott Watson's death was later officially recorded as, *Killed as a result of a flying accident (overseas), at Foula Island, West of the Shetland Islands (anti-submarine patrol)*. In September 1944, James on Proctor Street in Sarnia received the following letter from the R.C.A.F. Casualty Officer, for Chief of the Air Staff in Ottawa:

Dear Mr. Watson:

Advice has been received from the squadron of your son, Flight Sergeant Elliott Courtney Watson, which states that he was buried in the Lerwick Cemetery, Shetland Islands on August 3rd, 1944. The service was conducted by the Royal Canadian Air Force Chaplain, Squadron Leader Davidson. May I extend to you and the members of your family my deepest sympathy.

In December 1944, James received another letter from R.C.A.F. Casualty Officer, for Chief of the Air Staff in Ottawa:

Dear Mr. Watson:

I have been directed to inform you that your son, Elliott Courtney Watson, has been commissioned with the rank of Pilot Officer with effect from July 20th, 1944. His Officer's number is J48690. May I again express my deepest sympathy to you and the members of your family in the loss of your son whose qualities and ability have thus been recognized.

In September 1945, James and Mary Watson received a War Service Gratuity of \$399.85 for the loss of their eldest son. More than a year later, in mid-October 1946, Mary received the following letter from the R.C.A.F.

Records Officer in Ottawa:

Dear Mrs. Watson:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son, Pilot Officer E.C. Watson. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

Pilot Officer-Wireless Operator/Air Gunner Elliott Watson, 20, is buried in Lerwick New Cemetery, Shetland, United Kingdom, Terrace 7B. Grave 20. On his headstone are inscribed the words, THE LAST PRIVILEGE OF LOVE IS MEMORY.

Funeral for Canso 11062 crew

Source: <http://www.canso11062.mikeharvey.ca/funeral.htm>

The lone survivor of Canso aircraft #11062 crash, FS John H. Knight, always remembered the "fallen 7". After the crash, he spent most of the next year recovering from his injuries at various hospitals in England and Canada. He returned to Canada, raised six children, and worked with the Department of Veterans Affairs, and on hydro projects in Northern Manitoba and Newfoundland. He helped First Nations locals land jobs at these project sites and was elected councilor. John Knight passed away in 2006. After John Knight's funeral, his son Joe was

bequeathed his father's framed photo of Foula Island and the barren Hamnafield Hill, which had always been kept in a place of prominence in the Knight family home. Joe hung the faded colour photo in the den of his home, unaware of the photo's significance. He found himself wondering why that cliff of rock and moss meant so much to his dad.

Growing up in Winnipeg, the Knight children only knew that their father John was the lone survivor of a plane crash, and he did not wear shorts or short-sleeved shirts because of the scars from his injuries. Joe said of his father, "He didn't complain, he didn't brag about himself." A few years after John Knight's death, his family learned the full story of their father's survival and life-long dedication to his fallen crewmates. They learned the details of the crash including the fact that just before the crash, John Knight had gone to one of the dome blisters along the fuselage of the bomber to smoke a cigarette; the weather was so foggy that John could not see the end of the plane's wings; when the plane crashed into the hill, he was knocked unconscious by the impact; when he came to, he was able to push open the blister and drop to the ground where he crawled behind a rock to shield himself from the flames and flying shrapnel; three local men hiked up the hill and found John badly injured, his pelvis was broken, and his arms and legs seared from the flames; and that the locals loaded John Knight onto a stretcher and descended the steep hill saving his life.

In 1995, John Knight and his wife travelled to Scotland to pay their respects to the fallen aircrew who were all buried at the Commonwealth Cemetery in Lerwick. After his death, Joe Knight said of his father's public service, "I now think Dad felt he had to pay back for the fact he survived and his comrades didn't." John Knight's family commissioned a brass plaque memorializing the crash and the heroics of the Foula citizens in saving John's life. The bronze plaque is mounted on a cairn atop Hamnafield Hill.

WILCOX, Robert Joy (#7012597)

His mother's job at the American Consulate in this city brought Robert Wilcox to Sarnia. After graduating from SCITS, the eighteen year-old began the process of joining the U.S. Naval Reserve. He successfully completed two and a half years of flight, radio and gunnery training. He lost his life aboard a Navy torpedo-bomber over the Gulf of Mexico during a night navigation flight, three weeks after VE Day.

Robert Joy Wilcox was born on May 18, 1924 in Vigo, Spain, the youngest child of Henry Tabor and Agnes Winona (nee Johnson) Wilcox. Henry (born April 1888 in Asheville, North Carolina) and Agnes (born March 1886 in Bonn, Germany) were married on January 7, 1913 and were blessed with three children together: daughter Inez W., born December 11, 1915 in Jamaica; Henry Tabor Jr., born October 29, 1919 in Vineland, New Jersey; and Robert. Years later, Robert's brother Henry Jr. resided on Calhoun Street in Battle Creek, Michigan.

Henry Sr. worked as a Consul of the United States of America and Agnes worked for the American Consulate. In 1900, the Wilcox family was living in Vineland, New Jersey where Henry Sr. was employed at a Trust Company. By 1912, Henry Sr. was employed as an American consular agent in Port Maria, Jamaica. He later worked as a consul in Port Antonio, Jamaica, then Guadeloupe, French Guiana and then Vigo, Spain (where Robert was born). When Robert Wilcox was less than one year old, he lost his father who passed away on June 21, 1925 in Vigo, Galicia, Spain at the age of thirty-seven. After Henry Sr.'s death, the U.S. asked Agnes Wilcox where she wanted to go. She said that she wanted to go as close as possible to home (Vineland, New Jersey). She would be stationed in Canada.

In 1925, thirty-nine-year-old Agnes Wilcox travelled from Cherbourg, France aboard the *SS America*, arriving in New York on July 8, 1925 with her daughter Inez (age 9) and her sons Henry Jr. (age 5) and Robert (age 1). The family moved to London, Ontario where Agnes and her three children resided at 14 Craig Street, and where she worked for the U.S. Government, American Consulate as a clerk. Robert attended Victoria Public Elementary School in London, graduating in June 1937, and then attended London South Collegiate from September 1937 until the summer of 1940. At London South, Robert played tennis and was a very valuable member of the school football team as the first string centre for two years. In a reference letter written by the Principal (T.H. Graham) on Robert's behalf in order to join the service, the Principal wrote *during his time here, Robert was studious, intelligent and quite dependable with considerable athletic ability, and was quite popular with the student body.*

After 14 years in London, the Wilcox family moved to Sarnia, residing at 270 North Brock Street. Agnes was employed at the American Consulate in Sarnia. Robert attended Sarnia Collegiate beginning in September 1940. His grade 12 courses included English Composition, English Literature, French Authors, Ancient History, Geometry, Chemistry and Latin Authors. He graduated grade 12 in June 1941. In the summer of 1941, Robert worked for a

construction company and Webster Air Equipment Company in London. In the fall of 1941, Robert returned to SCITS for grade 13, taking courses that included English, French, Modern History, Biology and Latin. He graduated from SCITS in May 1942. He played centre on the SCITS football team and was also a member of St. George's Anglican Church. Throughout, he worked part-time on Saturdays at the A&P store in Sarnia.

On June 25, 1942, eighteen year-old Robert Wilcox began the process of enlisting in the U.S. Naval Reserve by filling in an "Application for Aviation Cadet Training in the United States Naval Reserve" at the Naval Aviation Cadet Selection Board (NACSB) in Detroit, Michigan. Because he was a minor under 21 years of age, he was required to complete a "Consent and Declaration of Parent or Guardian" form that his mother Agnes signed on June 19, 1942 on his behalf. Robert signed up as a Seaman, 2nd Class, to serve for a period of four years.

The NACSB considered Robert Wilcox to be *superior material for flight training leading to commission in the Naval Reserve*, and remarked that Robert was *attentive, serious, well-mannered*. On August 18, 1942, Robert completed his "Application for Aviation Cadet Training in the United States Naval Reserve" at the NACSB in Detroit. He provided one employer's reference--George Lewis of National Grocers Co., Cromwell Street, Sarnia, and three character reference letters from other adults that thought highly of him: Principal T.H. Graham of London South Collegiate; his math teacher/football coach A.M. Freeman at London South Collegiate; and Mr. T. Fawkes, the manager of W. McPhillips Electrical Appliance at 170 N. Christina Street, Sarnia. Eighteen years old, he stood five feet six inches tall and had brown hair and blue eyes. He recorded his occupation as clerk, his citizenship as United States, his home address as 270 N. Brock Street, Sarnia, and his next-of-kin as his mother Agnes Wilcox in Sarnia. Officially becoming a member of the U.S. Naval Reserve, he was given the rank of Aviation Cadet, V-5, with a pay of \$75 per month. He was ordered home to "inactive duty status", and returned to Sarnia awaiting orders to active duty.

Robert Joy Wilcox, USNR

On December 28, 1942, Robert was called to active duty, and ordered to report to the Officer-in-Charge at the Naval Aviation Cadet Selection Board no later than January 5, 1943 in Detroit. On January 5, 1943, eighteen and a half year-old Robert crossed the Blue Water Bridge at Sarnia to Port Huron on his way to Detroit to report to the Naval Aviation Cadet Selection Board (NACSB). Aviation Cadet V-5 Robert Wilcox was first posted to U.S. Naval Flight Preparatory (NPF) School at Wooster College in Wooster, Ohio. He trained there until April 14, 1943 when he returned to NACSB in Detroit, remaining there until July 15, 1943. During that time, he satisfactorily completed CAA-WTS Elementary Pilot Training at Highland Park Jr. College, Highland Park, Michigan. He was then posted to U.S. Navy Pre-Flight School (USNPS) in Iowa City, Iowa, training there until October 5, 1943. The next day, he was transferred for Primary Flight training at Pre-Flight Naval Air Station (NAS) in Memphis, Tennessee, where he remained until January 29, 1944. On January 30, he was posted to Naval Air Training Centre (NATC) in Pensacola, Florida for Intermediate Flight training, remaining there until June 29, 1944.

He spent the summer, June 30-August 22, 1944, training at U.S. Naval Air Training Station (NATS) Great Lakes, Illinois. During that period, on July 3, 1944, he was upgraded in rating from AvCad V-5 to Apprentice

Seaman (A.S.) V-6, and on August 3, 1944, he was upgraded in rating to Seaman Second Class (S2c) V-6. His next training post was NA Tech Training Centre in Memphis, Tennessee, from August 23 to December 25, 1944. There he passed his Naval Aviation Swim Test, completed an 18-week course at Aviation Radioman School (final mark of 90), and a 2-week course at Airborne Radar OP's School (final mark 96). On December 9, 1944, he was upgraded in rating from S2c V-6 to S1c (ARM) V-6 [Seaman First Class--Aviation Radioman]. Robert was next posted to Naval Air Gunners (NAG) School in Miami, Florida, from December 25, 1944, until February 6, 1945 where he satisfactorily completed a ground course in Naval Air Gunnery and was designated a Naval Air Gunner. He was then transferred to VTB-2, Operational Training Unit (OTU)-NAS in Miami, training there from February 6 to April 20, 1945. On April 5, 1945 at VTB-2, OTU in Miami, Robert completed Aircrew Operational Training in VTB (TBF-1 and TBM-1) combat type aircraft and was designated a Combat Air-crewman.

Notes on a few of the above codes:

U.S. Naval Reserve classifications: V-5 = Aviation Cadet vs. V-6 = General Service and Specialists

VTB = Torpedo-bombing plane. Two types are;

TBF = "Avenger", single engine Navy torpedo-bomber manufactured by Grumman

TBM = "Avenger", single engine Navy torpedo-bomber, manufactured by General Motors

*The TBF/TBM Avenger torpedo-bomber was the main torpedo bomber used in the Pacific during WWII.

On April 20, 1945, Seaman First Class (ARM) Robert Wilcox was posted to VT(N), OTU #1, Naval Auxillary Air Station (NAAS) in Kingsville, Texas to begin a 3-month course on night torpedo training. In early May 1945, with approximately 287 hours of total flying time in his two and a half years service, Robert submitted his formal request for training as a Naval Aviation Observer (Navigation) to the Chief of Navy Personnel at NAAS in Kingsville, Texas. Robert passed the physical examination for flying and on May 28, 1945, the Commanding Officer (C.H.B. Morrison) forwarded his approval to the Chief of Naval Personnel recording: *During the limited time in this unit WILCOX has established officer-like qualities. It is recommended that favourable consideration be given his application for training as Naval Air Observer (Navigation).*

Only three days later, on May 31, 1945, and three weeks after VE Day, Seaman First Class Robert Wilcox of the U.S. Naval Reserve, lost his life in a plane crash over the Gulf of Mexico. During that night, five torpedo-bombing planes took off from Northfield, USNAAS, Kingsville, Texas in a scheduled overwater Navigation flight. Robert Wilcox was part of a 3-member crew aboard TBF-1 #24189, an "Avenger" single engine Navy torpedo-bomber. During the flight, the TBF-1 aircraft that Robert was aboard was involved in a mid-air collision, striking the starboard wing of another plane. The TBF-1 aircraft lost control and fell into the ocean. The accident occurred at approximately 11:10 p.m., 100 miles, 110° from Yarbrough Pass, Kingsville, Texas. On June 1, 1945, the U.S. Navy reported Robert Wilcox as, *Missing from routine flight, presumably dead, on May 31, 1945. Last contact about eighty-one miles, bearing 121° True, from U.S. Naval Air Station, Corpus Christi, Texas.* Robert Wilcox and two others were aboard the aircraft that crashed into the ocean, and their bodies were never found. Also killed in the crash were twenty-two-year-old Richard Joseph Chouinard, Naval Aviator and nineteen year-old Floyd Haskel Clark, Aviation Machinist.

On June 2, 1945, the *Sarnia Canadian Observer* had the following report on his death:

Mrs. Agnes Wilcox, 270 north Brock Street, received word today that her son, Robert J. Wilcox, who is serving with the American Navy Air Force is missing and presumed dead, as the result of an aircraft crash in the Gulf of Mexico on Thursday, May 31. He was a well-known Sarnian and received his education at the local schools and was graduated from the Collegiate Institute and Technical School. His mother is attached to the American Consulate in this city. A brother, Captain Henry T. Wilcox, is serving with the American Military Forces and is stationed at Colorado Springs, Colorado, and a sister, Mrs. McLean Bradford, resides with her mother.

On July 8, 1945, Agnes Wilcox on Brock Street in Sarnia received the following letter from the U.S. Navy:

My dear Mrs. Wilcox:

I extend to you my personal condolence in the death of your son, Robert Joy Wilcox, Seaman first class, United States Naval Reserve, which occurred on 31 May 1945. There is little that I can say to lessen your grief, but I want you to know that the Navy shares in your sense of bereavement.

In late August 1945, the U.S. Navy Department in Washington, D.C. Board of Investigation completed their report on the incident. Following are portions of their report:

Re: Mid-air collision between TBF-1 airplane Bu. #24189 and TBF-1D airplane, Bu. #47974

Bodies of: Richard J. Chouinard, Naval aviator, late ensign, A1, USNR

Robert J. Wilcox, late seaman first class, USNR

Floyd H. Clark, aviation machinist's mate third class, USNR

were not recovered, the circumstances attendant upon the plane crash at sea in this case justify a conclusion that they are dead and the deaths occurred on 31 May 1945, not as the result of their own misconduct.

Finding of Facts:

1. On May 31, 1945, Ens. Richard J. Chouinard, A1, USNR; was pilot of a TBF-1 airplane, Bu. #24189, equipped with a Wright engine and said plane was assigned to VT(N) OTU #1, NAAS, Kingsville, Texas; and that Ens. Chouinard was assigned to duty and undergoing instruction as a night torpedo pilot with this OTU.
 2. On May 31, 1945, Robert J. Wilcox, S1c, USNR was the regularly assigned aircrew of Ens. Chouinard; was listed as a passenger on the airplane, and was temporarily certified for flight orders for the month of May 1945; he was regularly assigned to duty and training with VT(N), OTU #1 at the time.
 3. Flight took off from Northfield, USNAAS, Kingsville, Texas on May 31, 1945, a scheduled overwater Navigation flight.
 4. The flight was composed of five planes. The flight was authorized. The actual collision was not observed by any member of the flight, but immediately thereafter the chase pilot, Lt. Batten, saw the plane in 3 or 4 pieces and observed what he thought to be the fuselage and one wing of plane Bu. #24189 dive into the water.
 5. Since TBF-1 airplane, Bu. #24189, and its occupants Ens. Richard J. Chouinard, Robert J. Wilcox, S1c, and Floyd H. Clark, AMM3c, were seen to plunge into the sea and have not been seen or heard from since that time, the occupants are presumed to be dead.
- The collision resulted when some portion of TBF-1, piloted by Ens. Richard J. Chouinard struck the starboard wing of TBF-1D airplane, Bu. #47974, piloted by Ens. George H. Traylor.
6. The ensuing crash was due to the loss of control resulting from the collision.

Robert Wilcox, 21, is memorialized in the Arlington National Cemetery, Virginia, and in the family plot in Vineland, New Jersey. On the memorial headstone in Arlington are inscribed the words, IN MEMORY OF ROBERT JOY WILCOX US NAVY WORLD WAR II MAY 18 1924 – MAY 31 1945. On the memorial headstone at Siloam Cemetery in Vineland, New Jersey are inscribed the words, ROBERT JOY WILCOX DIED IN NAVAL AIR SERVICE 1924 – 1945.

WILLIAMS, Floyd George (#A/69366)

Floyd William's father was a World War I veteran whose death in 1941 was attributed to his war service. One year after his father's death, Floyd was successful in joining the Canadian army. He embarked overseas only four months after getting married. He sacrificed his life in the fight to liberate Italy, but not before he risked his own life to save a wounded comrade.

Floyd George Williams was born in Sarnia on March 9, 1922, the son of Captain Arthur David Williams and Letitia Belle (nee Corcoran) Williams. Arthur Williams was born on March 11, 1880 in Sarnia, and at age 23, married eighteen year-old Letitia Corcoran (born in Iowa) in Sarnia on June 25, 1903. Arthur and Letitia Williams had six children together: Ernest (born 1905, later resided in Philadelphia); Earl (became a Reverend in Brantford); Dorothy Patricia (born 1915, later became Mrs. Robert Koehler of Petrolia); Frederick Arthur (born 1921, and at the time of Floyd's death was a Private serving with the Army in Italy); Floyd; and Randall.

In January 1915, thirty-four-year-old Arthur Williams, married with two children, joined the Royal Canadian Regiment (RCR). In early June 1915, he underwent his medical examine in London. On September 20, 1915, Arthur enlisted in the Canadian Over-Seas Expeditionary Force becoming a member of the 34th Battalion with the rank of Lieutenant. He had been with the 27th St. Clair Borderers Regiment for four years and recorded 13 months of prior military experience--with U.S. Expeditionary Force in the Spanish-American War and in the Philippines and in Cuba. He stood five feet five inches tall, had brown eyes and hair and was employed as a contractor. He and Letitia lived at 360 Maria Street at the time. Arthur Williams embarked overseas bound for the United Kingdom in mid-October 1915.

After arriving in England, Lieutenant Williams spent time at Bramshott, then Shorncliffe Camps receiving Officer's training and gaining qualifications in Signalling and the Lewis Machine Gun. In March 1916, he became a member of the 17th Reserve Battalion. On June 4, 1916, he was transferred to the 7th Brigade Machine Gun

Company and arrived in France. In early September 1916, while in the Ypres Salient, Arthur Williams reported sick with severe myalgia (muscle pain). He was treated in hospitals in France and then England. He was later diagnosed with sciatica (back pain due to problem with sciatic nerve) and acute articular rheumatism. He remained in hospital until early November 1916.

On November 10, 1916, Lieutenant Williams, again a member of the RCR, sailed for Canada on a one-month sick leave. In Canada, medical officials determined Arthur had sciatica; treatment continued, and his leave was extended to April 6, 1917. Health problems persisted, and by April, doctors in London, Ontario determined that he had valvular disease of the heart. He continued to receive treatment and his leave was extended twice into August 1917. The Medical Board ultimately determined that he was no longer fit for service, and his disability was permanent. He was struck off strength on December 19, 1917 by reason of being medically unfit. Arthur returned to his family and home in Sarnia, then at 167 North Brock Street.

Including his pre-war experience, Arthur Williams was a painting contractor and decorator in Sarnia for 30 years. On May 26, 1941, at age 61, Arthur passed away in Sarnia (Floyd was nineteen years old). The Canada War Graves Register (Circumstances of Casualty) record Arthur's death as due to "Cerebral haemorrhage, arterio-sclerosis, etc. Death was due to service." Arthur Williams is buried in Lakeview Cemetery.

Floyd Williams completed his grade 10 and part of grade 11 at Sarnia Collegiate, leaving school at age 16. He was a well-known, all-round athlete in Sarnia, having played lacrosse, hockey, baseball, golf, rugby and tennis. He played the trumpet and euphonium and was a member of the Sarnia Boys Band and Pressy's Transport Band that played at the C.N.E. in Toronto and on tours in the United States. He worked one summer in a sheet metal factory in Sarnia as a checker and shipper. He then worked as a store clerk for three years with the Sarnia Sport Shop on Christina Street, where he earned \$20.00 per week.

Pressey's Band 1941

When father Arthur died in 1941, widowed Letitia and their sons Floyd, Fred and Randall were living at their home at 167 North Brock Street, Sarnia. Years later, Letitia lived at 165 North Vidal Street. Approximately fifteen months after Arthur's death, the Williams family experienced a joyful event. On August 14, 1942, Floyd's brother Frederick Williams married Miss Jean Anna Kemsley, the only daughter of Mr. and Mrs. George Kemsley of Sarnia. The wedding took place in the White Street Gospel Mission in Sarnia, the first wedding solemnized there. Floyd served as best man for his brother, Bombardier Frederick Williams of the 48th Light Anti-Aircraft Battery, Petawawa.

When war broke out in 1939, seventeen year-old Floyd Williams had tried to enlist in the R.C.A.F., but was not accepted because he was under-age. From May 1942 until the date he enlisted, Floyd served with the 2-26th Field Battery, Royal Canadian Artillery (RCA) in Sarnia, with the rank of Gunner.

On August 24, 1942, twenty year-old Floyd Williams enlisted in the Canadian Army in Petawawa, Ontario. He stood five feet eight and a quarter inches tall, had brown eyes and dark brown hair, was single, and was living at home with his widowed mother on Brock Street at the time. He planned to become a sheet metal draftsman or to

operate his own sporting goods store after the war. Gunner Floyd Williams began his army training in Petawawa as a member of the 48 Light Anti-Aircraft (LAA) Regiment, Royal Canadian Artillery (R.C.A.). In December 1942, he was posted to the 9 Light Anti-Aircraft (LAA) Regiment, R.C.A. in Vancouver, where he advanced to Acting Lance Bombardier. In early January 1943, he returned to the 48 LAA in Terrace, British Columbia. He continued his army training in Wainwright, Nanaimo, Prince Albert and again in Terrace where he attended a Mountain Warfare Course in January 1944. He rose to the rank of Bombardier with the 48 LAA. That spring, he experienced a big change in his life.

Wedding of Jean Kemsley & Frederick Williams Aug 1942
Right: Brother & Best Man to Groom Floyd Williams

Floyd & friend Lena Maccio 1941
(Norine Demeray would be Lena's bridesmaid)

In December 1907, Pleneus Wellington Demeray married Alice Mabel Bissell in Sarnia. Pleneus and Alice Demeray lived at 226 Napier St. and raised a large family together that included sons; Ervin Wellington, Lloyd Royden Frederick, Norman Leslie, John Elmer, Donald, Norris Allen, Orville, Ronald Veil; and daughters Verna Gertrude, Margurite Oril, Grace and Averial Norine. Four of the Demeray boys would serve in World War II: Ervin, Lloyd, Donald and Norris. Gunner Norris Demeray was one of at least 36 young men from Sarnia that took part in the fateful Dieppe Raid on August 19, 1942. Norris was among a number of them who was captured there, and spent the duration of the war as a POW.

Averial Norine Demeray was born around 1925 and went by her middle name, Norine. She and Floyd Williams had been dating since sometime in 1941. They enjoyed spending their time together and socializing with their many friends. At age 16, light-brown haired Norine was living at the Demeray Napier St. family home and working at Auto Lite in Sarnia. She was a bridesmaid for one of her close friends, Lena Maccio, when she married John Devereau at Our Lady of Mercy Church in Sarnia.

In the spring of 1944, after being granted permission to marry and obtaining a 25-day leave from April 6 – 30, 1944, the then Sergeant Floyd Williams married Averial Norine Demeray, the daughter of Mrs. Alice Demeray, on April 22, 1944. The wedding ceremony was held at the Parker Street United Church in Sarnia and was performed by the bridegroom's brother Rev. Earl Williams of Port Colborne, who was assisted by Rev. J.N. Gould. The bride entered the church on the arm of her brother, LAC Leslie Demeray. Her maid of honour was Miss Eileen Walker, while Doris Walker acted as bridesmaid and Diane Martin, niece of the bride, was junior bridesmaid. Floyd's best man was Bob Koelher, brother-in-law of the groom, while Bill White and Neil McArthur were the ushers. Following the ceremony, a reception was held in the church basement for approximately 50 guests. Afterwards, the young couple left on a short honeymoon before Sgt. Floyd Williams returned to his duties on the west coast. The newlywed couple's home address was 167 North Brock Street, Sarnia.

In mid-July 1944, Floyd was stationed at #2 Training Brigade Group in Debert, Nova Scotia. Floyd, along with his brother Fred, embarked overseas on August 4, 1944 (less than four months after he got married). They disembarked in the United Kingdom on August 10, 1944. Not long after, Letitia Williams in Sarnia received a telegram from her sons informing her that they had both arrived safely in France with a Canadian army unit.

Floyd Williams on his wedding day

Gunner Floyd Williams was initially posted to #2 Canadian Army Reinforcement Unit (CARU). In early September 1944, he was transferred to #1 Canadian Signals Reinforcement Unit (CSRU) where he continued his training in the U.K. In late September 1944, he became a member of the Winnipeg Grenadiers, reverting to the rank of Private. One month later, he was transferred to #3 Canadian Infantry Reinforcement Unit (CIRU). On November 3, 1944, Private Floyd Williams departed the U.K., arriving in Italy on November 18, 1944. He became a member of the Canadian Army Irish Regiment of Canada, Royal Canadian Infantry Corps (R.C.I.C.).

The **Italian Campaign**, the first sustained Canadian Army operation of the war, began with the invasion of Sicily on July 10, 1943. The fierce fighting on the island lasted more than four weeks, during which the Canadians advanced through difficult mountainous terrain, against an ever-stiffening German resistance. By August 17, the Germans had evacuated the island to the Italian mainland. In early September, Canadian and Allied forces invaded Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl, lasting 20 months, over a range of landscapes, through challenging weather, and against a series of well-protected defences held by some of the German army's best troops. Floyd Williams served with the Irish Regiment of Canada as they advanced northward. He would serve in Italy for only a month and a half.

In December 1944, Floyd sent a Christmas card/letter from Italy to his mother-in-law Mrs. Alice Demeray in Sarnia. On the front of the card were the words, Christmas Greeting; Canadian Army-Central Mediterranean Forces-Italy 1944. Inside the card were the words, Buon Natale; Sincere Christmas Greetings and best wishes for the New Year. He signed the inside with, Love Floyd. On the back of the card he wrote the following;

Dear Mother-in-Law,

I guess I sure owe you a letter, Mrs. Demeray so I shall fulfill two birds with one stone. I am trying to seek Ian and Lloyd but no luck so far. I hope that this Christmas and New Year you will have joy and happiness Mrs. Demeray and next Christmas may we all spend it together in rejoicing. I hope the boys are all okay and soon be home but I guess these are the things we pray for and must continue to... Well now, love and look after that sweet wife of mine and watch her goo goo eyes. (ha, ha)

Floyd

Not long before he was killed in action, Floyd Williams was awarded the Medal of Honour for his heroic actions. In a letter written by Pte. W.E. LeRoy (after Floyd's death) to Floyd's wife Aerial, he described how Floyd had risked his own life to rescue a wounded comrade in his unit. Pte. W.E. LeRoy and Floyd Williams had become close friends during their time together with the Irish Regiment while fighting in Italy. On this occasion, their section was moving from a house under German shell and mortar fire to another house 175 yards away, when Pte. LeRoy was wounded in the stomach and arm.

"I didn't pass out, but I couldn't get up," Pte LeRoy's letter said. "Floyd and the others were okay as they were still going for the house. I think I had just about given up all hope of getting anywhere when I saw Floyd turn his head and look back. I guess he realized I was hit because the next second he was coming across that open field. I tried to holler to him to get the hell into the house, but my voice was no more than a whisper. Even if I could have yelled it, I doubt if he'd have heard me; the mortars and shells exploding all around made too much noise. When he reached me I told him to scram but it was no use talking. He got me on my feet and by half-carrying me we got back across the field to the house. I'll never know how but we did. I was laid on a mattress and Floyd helped to put on the shell dressings. That was the last time I saw Floyd, as they moved on and I was taken out to hospital. I don't think I need tell you how I felt when they told me Floyd didn't come back. And I'll never forget how he looked coming back across that field to get me. People like him never really die, Mrs. Williams. Perhaps they live only in the memory of those who knew them, but they live".

On January 2, 1945, Private Floyd Williams was killed in action while fighting in Italy. In mid-January 1945, widowed Letitia Williams in Sarnia received a telegram from Ottawa informing her that her son, PTE FLOYD WILLIAMS HAS BEEN KILLED IN ACTION IN ITALY. At the time of Floyd's death, his wife Norine was residing with her mother, Mrs. Alice Demary at 226 Napier Street, Sarnia. In mid-January 1945, Norine received the following letter from the Major-General, Adjutant-General:

Dear Mrs. Williams:

It was with deep regret that I learned of the death of your husband, A69366 Private Floyd George Williams, who gave his life in the Service of his Country in the Mediterranean Theatre of War on the 2nd day of January, 1945.

From official information we have received, your husband was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Floyd William's death was later officially recorded as: *Overseas casualty, killed in action, in the field (Italy)*. In August 1945, Aerial Williams received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Madam:

Information has just been received from overseas that the remains of your husband, A69366 Private Floyd George Williams, have been buried in grave 2, row A, plot 2, of 5th Canadian Armoured Division Cemetery, Villanova, seven miles West of Ravenna, Italy. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

Floyd Williams - Scotland 1944

Silver Cross awarded to Norine Williams

In October 1945, Norine Williams received a War Service Gratuity of \$265.05 for the loss of her husband Floyd. In May 1947, the Lt.-Colonel, Director of Records, for Adjutant-General, sent Norine a photograph of the grave and marker over the burial place of her late husband. Floyd Williams, 22, is buried in Villanova Canadian War Cemetery, Italy, Grave II, A, 2. On his headstone are inscribed the words, HE WALKS WITH THEE AN ANGEL KIND FOR GOD IS LOVE AND SERVES MANKIND.

WILLIAMS, Harley James (#A/110154)

Harley Williams, a Chippewa First Nations from the Sarnia Reserve, was eager to follow his cousin and brother who were both serving in the Canadian Army. At the age of eighteen, Harley left his job and his girlfriend to serve his country. He became a member of the Essex Scottish Regiment, Royal Canadian Infantry and sacrificed his life for the Allied cause during a great offensive into Germany.

Harley James Williams was born on the Sarnia Indian Reserve on April 13, 1925, the son of James Bryon and Florence (nee Bressette) Williams of the Sarnia Indian Reserve. James Williams, born on the Sarnia Reserve, supported his family working as a carpenter employed by the Canadian Oil Company. He was also a member of the Native Council. Florence Bressette (born on the Kettle Point Reserve) had a son prior to Harley's birth, Irvine Bressette, a half-brother of Harley. In 1930, when Harley was only five years old, he lost his mother Florence who passed away that year. James later re-married to Mrs. Loveday Williams. Harley had one brother: Floyd Francis, and three half brothers: Reynold Alton, Calvert Vincent and Warren Eric. Harley also had two sisters: Bernice Bula and Virginia Ruth, and one half sister, Verda June.

Harley completed grade seven and attended grade eight, but did not complete the final examinations, finishing his schooling at age sixteen in 1941. He was able to speak and read in both English and Chippewa. He was active in hockey and baseball and enjoyed hunting and reading. Harley worked on a 48-acre farm for five months, then as a labourer for a little over a year at Synthetic Rubber Company in Sarnia. He continued to work as a labourer for three months at Mueller Brass Company in Sarnia, and then two months with Morton Salt Company in Port Huron.

Harley Williams had a first cousin, Lloyd Henry Bressette, who also served in the war. Lloyd Bressette, born June 20, 1924 at Kettle Point, the son of Archibald and Alma Bressette of Ravenswood, Ontario, enlisted in the Canadian Army on August 12, 1943 in Toronto. Nineteen year-old Lloyd trained in Brantford, Camp Borden, and Camp Debert before going overseas in early April 1944. As a member of the Stormont, Dundas & Glengarry Highlanders, Lloyd Bressette's first action against the enemy was on June 6, 1944--the D-Day landings in France. Two days later, he was transferred to the Queen's Own Rifles of Canada, with the rank of Rifleman. One and a half months later, Rifleman Lloyd Bressette was killed in action in France during the Battle of Normandy. Twenty year-old Lloyd Bressette is buried in Beny-sur-Mer Canadian War Cemetery, Calvados, France, Grave XV.E.10. On his

headstone are inscribed the words, "MY HEAVENLY HOME IS BRIGHT AND FAIR AND NO PAIN OR DEATH CAN ENTER THERE" MOM.

One of Harley William's brothers was also in the Army, so Harley was eager to join as well. Eighteen year-old Harley Williams enlisted in the Canadian Army on March 24, 1944 in London, Ontario. He stood five feet six and a quarter inches tall, had brown eyes and black hair, was single, but had a steady girlfriend at the time. He planned to return to Morton Salt Company in Sarnia for employment after the war.

From #1 District Depot in London, Harley received his army training at #12 Canadian Army (Basic) Training Centre (CIBTC) in Chatham, and then at A-29 Canadian Infantry (Advanced) Training Centre (CICTC) at Camp Ipperwash. The Basic and Advanced Training Army Examiner's evaluation comments about Harley included: *Williams is a rugged lad, good natured and strong... has an excellent Army attitude and has made a good adjustment to Army routine. He knows his work well... Williams is above the average in field work... Should make a good rifleman.* After completing his training at CICTC, Harley was granted a 14-day furlough and embarkation leave. By mid-September 1944, he was transferred to #2 Training Brigade Group in Debert, Nova Scotia. On October 12, 1944, Harley Williams embarked overseas from Debert, Nova Scotia bound for the United Kingdom.

Harley was initially posted in the U.K. with #2 Canadian Infantry Reinforcement Unit (2CIRU). In late October 1944, he was transferred to #2 Canadian Infantry Training Regiment (2CITR) where he continued his training. On January 29, 1945, Private Harley Williams sailed from the U.K. bound for the Northwestern Europe Theatre of War, where he was initially posted as an X-4 Reinforcement, Canadian Infantry Corps (CIC).

Over the winter of 1944-1945, most of the weary Canadians were given a rest, although the front was never quiet, with patrols and large-scale raids remaining constant. Canadian troops were stationed along the **Nijmegen sector** in the Netherlands. They were tasked to hold and defend the Nijmegen salient and a small piece of Allied-held territory north of the Maas River. This bridgehead would be used as a starting point for crossing the Rhine (in February 1945), and the Allies had to give the enemy the impression that an assault was imminent to force the Germans to leave troops in that area. The Germans did their best to push the Canadians out of "the island" by flooding the area and constantly harassing them with mortar fire, artillery and aggressive patrols. Constantly vigilant, the men dug deep slit trenches, covered them with whatever was handy, and tried to keep warm from the snow and cold during one of the most frigid winters on record in northern Europe.

In February 1945, the Allies launched a great offensive, the **Battle of the Rhineland** that was designed to drive the Germans eastward back over the Rhine River. There would be two formidable thrusts: one by the Ninth U.S. Army; and one by the First Canadian Army, strengthened by the addition of Allied formations. The resilient Germans had spent months improving their defences. Winter rains and thaw had turned the ground into a thick, muddy quagmire, and the enemy fought fiercely to defend their home soil. During one month of fighting, the Canadians succeeded in clearing the Reichswald Forest, in breaking the Siegfried Line, and in clearing the Hochwald Forest. But victory came at a high cost.

Private Harley Williams served with the Essex Scottish Regiment, Royal Canadian Infantry Corps (R.C.I.C.) as it advanced into Germany. Approximately five weeks after arriving in the NW European Theatre, he lost his life. On March 8, 1945, Private Harley Williams was killed in action while fighting in Germany, during the Battle of the Rhineland. His remains were buried at a location recorded on the Army Field Service Card as "MR 097/411 Xanten sh. Germany". In late March 1945, Mr. and Mrs. James Williams of the Sarnia Reserve received a telegram from Ottawa informing them that their son, PRIVATE HARLEY JAMES WILLIAMS HAS BEEN KILLED IN ACTION ON THE WESTERN FRONT. Exactly two months after Harley Williams' death, the war in Europe ended.

In April 1945, James received the following letter from the Major-General, Adjutant-General:
Dear Mr. Williams:

It was with deep regret that I learned of the death of your son, A110154 Private Harley James Williams, who gave his life in the Service of his Country in the Western European Theatre of War on the 8th day of March, 1945.

From official information we have received, your son was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Harley William's death was later officially recorded as, *Overseas casualty, killed in action, in the field (Germany)*. In February 1946, James Williams received a War Service Gratuity of \$130.07 for the loss of his son

Harley. In August 1946, James received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Sir:

Information has just been received from overseas that the remains of your son, A110154 Private Harley James Williams, have been carefully exhumed from the original place of internment and reverently reburied in grave 9, row G, plot 3, of Nijmegen Canadian Military Cemetery, four miles South-East of Nijmegen, Holland. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

In January 1948, the Director, War Service Records, sent James Williams a photograph of the grave and marker over the burial place of his late son. Harley Williams was the first Native Canadian from the Sarnia Reserve to pay the supreme sacrifice in the Second World War. Harley Williams, 19, is buried in Groesbeek Canadian War Cemetery, Netherlands, Grave III.G.9.

There is also a memorial plaque to honour him on one of the entrance pillars of the Chippewas of Sarnia Cemetery, which reads: "In memory of Harley Williams, April 13, 1925-March 8, 1945, who was killed in action during World War II." Harley Williams' name is also inscribed on the Aamjiwnaang First Nations cenotaph in Sarnia. The central column of the Aamjiwnaang cenotaph is inscribed: "To our glorious veterans who have served our nation and its' allies for peace and freedom – Lest We Forget." One of the side columns is inscribed: "World War II – In memory of the young men and women who loyally served throughout the world 1939-1945 – Harley Williams".

WILLIAMS, William Patrick Logie (A/50442)

William Patrick Williams, the son of a Great War veteran, was twenty years old when he enlisted, and just over four months later he married the love of his life. As a member of the Royal Canadian Regiment he fought with them in the arduous northward crawl to liberate Italy. Five months after recovering from shrapnel wounds, Williams sacrificed his life during the Allied advance to Rome.

William Patrick Logie Williams was born in Sarnia on March 17, 1920, the son of Charles Herbert and Zillah (nee: Worsley) Williams. In 1891, nineteen year-old Charles Herbert Williams, born June 16, 1873 in Sarnia, was residing in Sarnia with his parents David and Melissa (nee: Finch) and his six brothers and one sister. Ten years later in 1901, Charles was a soldier, residing with his mother and six brothers in Sarnia. On April 20, 1905, Charles Williams married Zillah Worsley (born October 1884 in Sarnia) in Port Huron, Michigan (they were residing in Sarnia at the time). Charles and Zillah had six children together: sons Clarence Elmer (born 1908); William Patrick, and Edward Albert (born around 1922); and daughters Beatrice Doris (born 1910); Gladys Pearl (born 1913); and Madeline (born 1914). In 1910, Charles was supporting his family working as a sawmill employee.

At the age of forty-two, and married with four children at the time, Charles Williams enlisted in the Canadian Over-Seas Expeditionary Force on October 8, 1915 in Sarnia. He stood five feet six inches tall, had blue eyes and brown hair, and lived with his family at 273 Cameron Street at the time (it was later changed to 481 George St., then 215 Water St., and then 360 Nelson St.). He recorded his occupation as "acid stiller" and recorded having prior military service--six years with the U.S. Army in the Spanish American War. The recruitment officer recorded Charles' "apparent age" as 35. Charles became a member of the 70th Battalion, CEF. During his training in Canada, he rose in rank from Private to Lance Corporal, to Corporal, and to Sergeant in January 1916.

Charles embarked overseas from Halifax bound for the United Kingdom aboard the *SS Lapland* on April 24, 1916. He arrived in Liverpool on May 5 and trained at Shorncliffe and later West Sandling where he was transferred to the 39th Battalion. Less than four months after disembarking in the U.K., Charles reverted to the rank of Private at his own request in order to proceed overseas. He arrived in France on August 27, 1916, a member of the 18th Battalion, Canadian Infantry. Approximately two weeks later, he joined the 18th Battalion "in the field" at the front lines. In mid-November 1916, he joined the 4th Field Company, Canadian Engineers, serving with them for one month before rejoining to the 18th Battalion.

Charles survived the war that ended in November 1918. He returned to England in April 1919, and to Canada

in mid-May. Charles Williams, age 45, was discharged on demobilization on May 24, 1919, returning to his home in Sarnia, then at 215 Water St.

In 1921, Charles and Zillah, and their children at the time: Clarence (13), Beatrice (10), Gladys (8), Madeline (7), and William Patrick (1) lived at 360 Nelson Street in Sarnia, with Charles supporting his family employed as a pipefitter. He later worked at Imperial Oil where he eventually retired. The Williams family later lived at East Talfourd St., Sarnia.

Another of Charles Williams' sons, Edward, also served in the Second World War, becoming a Corporal with the Canadian Army in England. The Williams' daughters, after marrying, were Mrs. James E. Logan of Port Huron (Beatrice); Mrs. James K. Hamilton, Telford Street, Sarnia (Gladys); and Mrs. Alfred E. Hutcheson, Brock Street, Sarnia (Madeline).

William Patrick Logie Williams, who went by Patrick, was educated in Sarnia, including two years at Sarnia Collegiate, and was a member of the 2-11th Field Company, Royal Canadian Engineers for two and a half months. Prior to enlisting, Patrick was employed as a labourer (rigger) for a year and a half at the Sarnia Elevator Company.

Twenty year-old Patrick Williams enlisted in the Canadian Army on October 22, 1940 in Chatham, Ontario. He stood five feet seven inches tall, had grey eyes and fair hair, was single, and lived with his parents on Talfourd Street at the time. He planned to enter the field of tool and die making after the war. Patrick became a member of the Kent Regiment, and began his training in Chatham. In March 1941, he had advanced in rank from Private to Lance Corporal, and continued his training in London, Ontario. He had to be admitted to London Military Hospital on two occasions: in January 1941 for 10 days with influenza, and in May 1941 for 6 days with colonic stasis.

Just over four months after enlisting, on March 8, 1941, Patrick Williams married Maxine Thelma McGill of London, Ontario, the eldest daughter of Mr. and Mrs. Thomas W. McGill of 311 George Street, Sarnia. At the ceremony held in the manse of Paterson Memorial Church, Miss Edna Allen of Sarnia served as bridesmaid and Private Donald Cranmer of the Kent Regiment R.C.I. of London served as the best man. After the ceremony, a reception and dinner was held at the home of the bride's parents on George Street. The young couple took up residence at 251 Hyman Street in London where Patrick was stationed. By March 1943, Maxine Williams had moved to 122 South Brock Street, Sarnia.

Seven months after marrying, on October 17, 1941, Patrick began his 7-day embarkation leave. In early November 1941, Patrick Williams of the Kent Regiment was transferred to Halifax, Nova Scotia. On November 13, 1941, he embarked overseas bound for the United Kingdom. Initially posted to #1 Canadian Division Infantry Reinforcement Unit (CDIRU), Lance Corporal Williams was transferred to the Royal Rifles of Canada (R.R.C.) in early December 1941 where he continued his training until March 1942.

On March 3, 1942, Patrick was promoted to the rank of Corporal, attached to the Kent Regiment, and returned to Canada attending Canadian Small Arms Training School (C.S.A.T.S.) in Terrace, British Columbia. He continued his training in Canada for just over one year. In February 1943 he was promoted to the rank of Acting Sergeant, and in late April 1943, he was back in London, Ontario, a Corporal in the Kent Regiment.

On May 13, 1943, Corporal Patrick Williams again embarked overseas bound for the United Kingdom. After disembarking, he sent a telegram to Maxine, then residing at 122 South Brock Street, letting her know of his safe arrival overseas. Patrick was initially attached to the #3 Canadian Infantry Reinforcement Unit (3CIRU). In June 1943, still in the U.K., Patrick learned that his father Charles, a Great War veteran, had passed away on June 12, 1943, four days before his 70th birthday.

On September 10, 1943, Patrick completed his Will, bequeathing his entire estate to his wife Maxine on East Talfourd St., Sarnia. The next day, Patrick reverted to the rank of Private at his request in order to proceed on draft. He then embarked from the U.K, arriving in the Italian Theatre on September 13, 1943, as a member of the Royal Canadian Regiment (RCR).

The **Italian Campaign**, the first sustained Canadian Army operation of the War, began with the invasion of Sicily on July 10, 1943. The fierce fighting on the island lasted for more than four weeks, during which the Canadians advanced through difficult mountainous terrain, against an ever-stiffening German resistance. By August 17, the Germans had evacuated the island to the Italian mainland. In early September, Canadian and Allied forces invaded Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl, lasting 20 months, over a range of landscapes, through

challenging weather, and against a series of well-protected defences held by some of the German army's best troops.

Patrick Williams served with the RCR's as it advanced north through Italy. Three months after arriving in Italy, on December 19, 1943, Patrick was wounded in action by shrapnel. On December 26, 1943, Maxine Williams in Sarnia received the following telegram from the Director of Records in Ottawa: SINCERELY REGRET INFORM YOU A50442 PRIVATE WILLIAM PATRICK LOGIE WILLIAMS OFFICIALLY REPORTED WOUNDED IN ACTION NINETEENTH DECEMBER 1943 STOP NATURE AND EXTENT OF WOUNDS NOT YET AVAILABLE STOP FURTHER INFORMATION FOLLOWS WHEN RECEIVED.

Patrick was hospitalized for three weeks, given a brief furlough, and then returned to action as Acting Lance Corporal with the Royal Canadian Regiment in January 1944. On February 5, 1944, Maxine received another telegram from the Director of Records: A50442 PRIVATE WILLIAM PATRICK LOGIE WILLIAMS PREVIOUSLY REPORTED WOUNDED IN ACTION NATURE OF WOUNDS NOW REPORTED ABRASIONS AND CONTUSION LEFT THIGH STOP FURTHER INFORMATION FOLLOWS WHEN RECEIVED. In mid-April 1944, Patrick Williams advanced to the rank of Acting Corporal.

Four months after returning to action, on May 17, 1944, Corporal Patrick Williams lost his life during fighting in Italy during the battle of the Hitler Line and the advance to Rome. His remains were buried on May 18, 1944 at a location recorded on the Army Field Service Card as "MR-805132, Sheet 160 Cassino, 100 yards north on side road west side of road. Italy". On May 24, 1944, Maxine received the following telegram from the Director of Records in Ottawa, REGRET DEEPLY A50442 PRIVATE WILLIAM PATRICK LOGIE WILLIAMS OFFICIALLY REPORTED KILLED IN ACTION SEVENTEENTH MAY 1944 STOP FURTHER INFORMATION FOLLOWS WHEN RECEIVED. In late May, Zillah Williams in Sarnia, who had lost her husband less than a year earlier, received a telegram from the Casualty Officer at Ottawa, informing her that her son, LANCE CORPORAL WILLIAM PATRICK LOGIE WILLIAMS WAS REPORTED AS OVERSEAS CASUALTY KILLED IN ACTION ON MAY 17 IN THE FIELD (ITALY).

In June 1944, Maxine received the following letter from the Major-General, Adjutant-General:

Dear Mrs. Williams:

It is with deep regret that I learned of the death of your husband, A 50442 Acting Corporal William Patrick Logie Williams, who gave his life in the Service of his Country in the Mediterranean Theatre of War on the 17th day of May, 1944.

From official information we have received, your husband was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

Among Patrick's personal items that were returned to his family were two ties, a dress shirt, a snapshot album, a notebook, a personal letter, greeting cards, a shoe charm and a Bible. In early April 1945, Maxine, then residing on Wyman Street in London, received the following letter from the Colonel, Director of Records, for Adjutant-General:

Dear Madam:

Further to correspondence in connection with the regretted death of your husband [though the letter said son], the marginally named, I am directed to inform you that according to information received from overseas military authorities, the remains of Corporal Williams were buried on May 18th, 1944, in a temporary isolated grave located at a point approximately 6 miles South-West of Cassino, Italy, in the immediate vicinity in which his death occurred.

The grave will have been temporarily marked with a wooden cross for identification purposes and in due course the remains will be carefully exhumed and removed to a recognized military burial ground when the concentration of graves in the area takes place. After this has been done, the new grave will be photographed and a print of the picture will be forwarded to you as soon as it is available. It should be borne in mind, however, that for obvious reasons it may be some considerable time before this photographic work can be completed.

Some time after Patrick William's death, Maxine remarried, becoming Mrs. Maxine Thelma Brown, residing on Simcoe Street in London, Ontario. In August 1945, Maxine Brown received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Madam:

Information has just been received from overseas that the remains of your husband, A50442 Corporal William Patrick Logie Williams, have now been carefully exhumed from the original place of interment and reverently reburied in grave 10, row A, plot 5, of Cassino Military Cemetery, Cassino, Italy. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

In mid-February 1948, the Director, War Service Records, sent Maxine a photograph of the grave and marker over the burial place in Cassino, Italy of her late husband Patrick. William Patrick Logie Williams, 24, is buried in Cassino War Cemetery, Italy, Grave V.A.10.

WILSON, John Everette Stanley (#B/144418)

John Wilson had been married just over a year-and-a-half when he enlisted to serve his country. Six months later, he was able to witness the birth of his son. Soon after, he embarked overseas where he became part of the Allied fight to drive the Germans from Italy. When he was killed in action near the Lamone River only days before Christmas, among his personal effects were a lock of his son's hair, and the souvenir icing and candle from his son's first birthday cake.

John Everette Stanley Wilson was born in McIrvine Township (Fort Frances suburbs), Ontario on July 7, 1921, the youngest son of Edward (born in Beechburg, Ontario) and Rose Biddeson (nee Standish, born in Liverpool, England) Wilson. Edward Wilson (a bridgeman) and Rose Standish were married on October 7, 1903 in Fort Frances, Ontario, where they resided. Edward and Rose Wilson had seven children together: sons Edward Standish (born 1905); Walter William (born 1914, who served during the war with the R.C.A.F.); and John Everette; and daughters: Mabel Grace Priscilla (born 1904); Dorothy May (born 1908); Mary Ellen ("Nellie", born 1910); and Ruby Pearl Irene (born 1912, died only 3 months later). John Wilson attended school in Fort Frances completing most of grade eight, leaving school at age sixteen. Growing up in northern Ontario, he was active in baseball and hockey and enjoyed hunting, fishing, skiing and swimming.

John was employed as a maintenance worker with Canadian National Railways in Port Arthur, Ontario from 1938 to 1942. On July 3, 1941, only days before his twentieth birthday, John Wilson married Ellen Ottilia Wilson (of Athabaska, Alberta) in Fort Frances, Ontario. For two months in 1942, he worked with Ontario Sulphide Pulp and Paper Mill in the grinding room in Fort Frances.

In October 1942, the young couple moved to Sarnia, residing at 500 Confederation Street. From October 1942 until he enlisted in March 1943, John was employed with Pigott's Construction Company in Sarnia, as a truck driver and receiver. John lived in Sarnia when he enlisted, and not long after he went to war, Ellen moved back to Fort Frances, and later Bergland, Ontario. The couple later had a son together, James Stanley Wilson, born September 21, 1943 in Fort Frances.

Twenty-one-year-old John Wilson enlisted in the Canadian Army on March 18, 1943 in Toronto, Ontario. He stood five feet five and a half inches tall, had brown eyes and red hair, was married and lived at 500 Confederation Street in Sarnia at the time. He recorded his occupation as truck driver. He planned to become a machinist after the war. Initially attached to #2 District Depot, Infantry, #7 Company in Toronto, he began his army training at #20 Canadian Army (Basic) Training Centre (BTC) in Brantford, Ontario. In June 1943, he was transferred to A-10 Canadian Infantry Training Center (CITC) at Camp Borden for advanced infantry training. In late September-early October 1943, he received a 14-day furlough, in time to witness the birth of his newborn baby son.

On November 25, 1943, John Wilson embarked overseas bound for the United Kingdom. Arriving on December 2, 1943, he was initially posted to the #4 Canadian Infantry Reinforcement Unit (CIRU), where he continued his training. In mid-February 1944, Private John Wilson left the U.K. and arrived in Italy on February 18, 1944. Initially posted to the X-4 Reinforcement List, he became a member of the 48th Highlanders of Canada, Royal Canadian Infantry Corps (R.C.I.C.).

The **Italian Campaign**, the first sustained Canadian Army operation of the War, began with the invasion of

Sicily on July 10, 1943. The fierce fighting on the island lasted for more than four weeks, during which the Canadians advanced through difficult mountainous terrain, against an ever-stiffening German resistance. By August 17, the Germans had evacuated the island to the Italian mainland. In early September, Canadian and Allied forces invaded Italy. Though Italy surrendered shortly after, the occupying Germans made it clear their fight was not over. Liberating Italy would be a painstaking northward crawl, lasting 20 months, over a range of landscapes, through challenging weather, and against a series of well-protected defences held by some of the German army's best troops. Private John Wilson served with the 48th Highlanders as they advanced north through Italy.

Ten months after arriving in Italy, on December 21, 1944, John Wilson lost his life while fighting during the Italian Campaign. His remains were buried at a location recorded on the Army Field Service Card as "Lamone River Cem (48 Highrs) Russi Cemetery sheet 1/50,000 MR 414348". John's death was later officially recorded as, *Overseas casualty, killed in action, in the field (Italy)*. Among John Wilson's personal effects collected and sent home was a copy of the New Testament, some snapshots, a Canadian Legion card, a package with a lock of hair, and the souvenir icing and candle from his son's first birthday cake.

Ravenna Cemetery, Grave V.G.12

In early January 1945, Ellen Wilson in Bergland, Ontario received the following letter from the Major-General, Adjutant-General:

Dear Mrs. Wilson:

It was with deep regret that I learned of the death of your husband, B144418 Private John Everette Stanley Wilson, who gave his life in the Service of his Country in the Mediterranean Theatre of War on the 21st day of December, 1944.

From official information we have received, your husband was killed in action against the enemy. You may be assured that any additional information received will be communicated to you without delay.

The Minister of National Defence and the Members of the Army Council have asked me to express to you and your family their sincere sympathy in your bereavement. We pay tribute to the sacrifice he so bravely made.

In August 1946, Ellen received a letter from the Colonel, Director of Records, for Adjutant-General. Following is a portion of that letter:

Dear Madam:

Information has just been received from overseas that the remains of your husband, B144418 Private John Everette Stanley Wilson, have been carefully exhumed from the original place of internment and reverently reburied in grave 12, row G, plot 5, of Ravenna British Empire Cemetery, five miles West of Ravenna, Italy. Marked map is enclosed. This is a recognized military burial ground and will receive care and maintenance in perpetuity.

The grave will have been marked with a temporary cross which will be replaced in due course by a permanent headstone suitably inscribed. While it cannot now be stated when this work of permanent commemoration will begin, before any action is taken you will be communicated with and an opportunity will be given you to submit a short personal inscription of your own choice for engraving on the headstone...

John Wilson left behind his mother Rose and father Edward, his two brothers and three sisters, Ellen, his wife of a little over three years, and his 15-month old James Stanley Wilson. In June 1945, Ellen received a War Service Gratuity of \$318.90 for the loss of her husband. Ellen later remarried, becoming Ellen Locher, residing in Meanook, Alberta.

John Everette Stanley Wilson, 23, is buried in Ravenna War Cemetery, Italy, Grave V.G.12. On his headstone are inscribed the words, FOR EVER REMEMBERED BY WIFE AND SON.

WILSON, Richard Norman (#CDN/664)

When Richard "Dick" Wilson left university in his second year to enlist in the Officer Training Corps (OTC), he instantly made a good impression. A recruiting officer recorded that Dick "has superior ability and a winning personality." Dick was subsequently posted overseas for further training. Lieutenant Wilson arrived in France and, after less than three action packed months of combat, died in action. As a member of the Queen's Royal Regiment 7th Armoured Division, known as the "Dessert Rats", Dick was killed on October 2, 1944 during the early stages of the liberation of the Netherlands.

Richard "Dick" Wilson was born in Sarnia on December 21, 1920, the son of Norman John (born 1886) and Vera Hannah (nee: Lobb, born 1896) Wilson. Norman and Vera Wilson were blessed with two daughters and two sons and, in 1921, when Dick was a year old, the Wilson family was living at 158 Richard Street. Norman's salary as a teacher supported his family and they later moved to 135 Penrose Street. In 1933, when Dick was thirteen, tragedy struck the Wilson family when Norman Wilson died at the age of forty-seven.

Dick attended Sarnia public schools and Sarnia Collegiate and was in the Boy Scouts for two years. He was very active in sports, playing junior and senior WOSSAA Rugby at Sarnia Collegiate and was also active in hockey, softball, badminton and tennis. He enjoyed swimming, fishing and reading, and was very interested in music, as he was a piano player in a local orchestra. One year while at Sarnia Collegiate, he was on the Editorial Staff for the Collegiate Magazine. He was member of Our Lady of Mercy Catholic Parish, and a member of the Central United Church Century Club, where he played softball for the club.

After graduating from Sarnia Collegiate, Dick worked for two and a half years at Imperial Oil Limited, before going to the University of Western Ontario in September 1941. At Western, he took an Honours Art course, specializing in French and English, and he also played on the football team. At Western, he also received Canadian Officer Training Corps (COTC) training, with the rank of Cadet, from September 22, 1941 until January 1943. After completing his COTC training, he requested a Commission with the Artillery. The COTC Officer Commanding wrote that *Cadet Wilson is highly recommended by his company commander as alert and as a good soldier.*

Dick Wilson, at age 22, enlisted in the Canadian Army on February 10, 1943 in London, Ontario. He stood six feet one and three-quarter inches tall, had grey-brown eyes and brown hair, was single, though he had a steady girlfriend, and was residing at 208 Huron Street in London. He was a second year student at Western but left university hoping to be recommended for Officers Training Corps (OTC). He had little to worry about in this regard. The Army Recruiting Officer, in recommending Dick for OTC, wrote this about Dick: *A tall, loosely built man, with a very pleasant, easy-going manner... This man has superior ability and a winning personality. While his dress is sloppy, this is probably due to his democratic outlook on life, and University custom. He states a preference for R.C.A. but has no particular reason for doing so.*

From #1 District Depot in London, Dick Wilson attended Officers Training Corps (OTC) at Brockville, Ontario beginning on February 19, 1943. After graduating in mid-June 1943, he attended A-4 Canadian Army Training Centre (CATC) in Brandon, Manitoba as a Second Lieutenant, Royal Canadian Artillery (RCA). In August 1943, he was qualified as a Lieutenant, allocated to RCA Anti-Tank Artillery in Brandon, Manitoba. In April 1944, Dick was attached to OTC in Brockville for a Special Infantry course. He volunteered for transfer (on loan) to the British Army, part of the CANLOAN scheme. In early June 1944, Dick was attached to A-34 Special Officers Training Centre (SOTC) in Sussex, New Brunswick before proceeding overseas.

Dick Wilson served as part of the CANLOAN scheme. In the fall of 1943, with the Canadian Army only fighting on one front at the time (Italy), the Canadian Army had a surplus of officers. The Canadian Government offered to loan Canadian Infantry junior officers to the British Army on a voluntary basis, under the code name "CANLOAN". A total of 673 Canadian officers, including Dick Wilson, volunteered and served under the

CANLOAN scheme. Each was given a special serial number with the prefix “CDN”, and once overseas, each was posted immediately to British regiments, where the majority took part in the bitter fighting in North-West Europe in 1944-45.⁷¹

Lieutenant Richard Norman Wilson

On June 16, 1944, Dick Wilson embarked overseas from Sussex, New Brunswick bound for the United Kingdom. He arrived on June 24, 1944, and was attached to the Queen’s Royal Regiment, 1/7th Battalion, a Lieutenant in the Infantry with the British Army. He was stationed at Barnard Castle in England for six or seven weeks, where he took an Advanced Armoured Infantry Course and was in charge of a tank.

On August 17, 1944 Lieutenant Dick Wilson departed from the U.K. and disembarked the next day in the **North-West Europe Theatre** in France (during the Battle of Normandy). He served with the Queen’s Royal Regiment (West Surrey), 1/7th Battalion – 7th Armoured Division. The 7th Armoured Division was an armoured division of the British Army. Prior to Wilson joining them, the 7th Armoured Division had fought in most major battles during the North African Campaign (where it gained the nickname “The Desert Rats”). Later, the 7th Division landed and fought in the Italian Campaign during the early stages of the invasion of Italy, and began its fight in North-West Europe by landing in Normandy during the afternoon of D-Day, June 6, 1944.

After breaching the “Atlantic Wall” of “Fortress Europe” on D-Day, Allied armies began their break out from the narrow Normandy bridgehead to carve out a foothold on the French mainland. It took a whole summer of tenacious fighting, pushing against fierce and ruthless German forces to advance east across France. As part of the Allied force, the 7th Armoured Division was equipped with Cromwell cruiser tanks and Sherman Firefly tanks. The Division took part in operations that liberated villages and towns including Caen, Villers-Bocage and Falaise, and by late August 1944 most of the German Army in Normandy had been destroyed.

Dick Wilson served with the Queen’s Royal Regiment, 1/7th Battalion – 7th Armoured Division in the final days of the Battle of Normandy and then as they advanced across France through Belgium and the Netherlands in months of bitter fighting against a tenacious enemy.

In mid-September 1944, the *Canadian (Sarnia) Observer* printed portions of two letters that Dick had written home to his widowed mother, Vera. Following is a portion of the first letter received:

We left camp in England and marched about 2 ½ miles to the station, with something like 60 pounds on our backs. It’s a bit tiring at first, but you get numb and don’t notice it. A band played for us at the depot and as we pulled out they played, ‘In the Mood’. The quarters on the ship were excellent and the meals wonderful. The next day we saw Normandy. At first all you could see were hundreds of ships and barrage balloons which really says a lot for our superiority when you realize the Allies can leave that much shipping riding at anchor unmolested. We went from the ship to landing craft and then marched another seven or eight miles to the first position. The British Tommies are small and some were just about whipped. In this section of the country there was not much in ruins. It was all in good shape and the army has made new roads.

In his second letter, he described a section of the country 70 miles inland. One morning, he observed 20 Germans from a local prison camp heading out as a work party.

They were a scruffy looking lot, most of them about 15 years old. They seemed very happy though. The Germans left this area just six days ago. On our way in we passed towns where there was absolutely nothing standing except the odd bit of jagged wall lurching into the air. The remainder was nothing but brick and rubble. You have to see this to know what I mean by rubble-it is sort of dust. I saw a few rather peculiar things such as a bombed house with nothing in it but a silly looking yellow chandelier, undamaged, hanging precariously from a split timber.

Among the roads and in the fields, are blown-up tanks and armored cars and vehicles of every type. Occasionally I saw a German grave and the Iron Cross on its marker. The roads are clear of mines, but in most cases they guarantee no safety anywhere more than three feet either side of the road. Many fields are pock-marked with huge bomb craters and I often saw many abandoned positions where Jerry had dug in. Along the roads there is an incessant stream of traffic. Besides army traffic, there are hundreds of French families returning to their homes, although I fear most of them won't find any. They have two-wheel cars loaded high with every domestic article. Two or three horses pull these carts, and others are behind cows and goats. Baby prams and bicycles are also used for transportation.

Dick Wilson took part in fighting around Arnhem in the Netherlands in September 1944, where Allied Paratroopers had been trapped. *Operation Market Garden* was a mission to capture eight bridges that spanned a network of canals and rivers on the Dutch/German border. The plan, devised by British Field Marshal Bernard Montgomery, comprised two operations: "Market" – airborne forces tasked with seizing bridges and other terrain-- and "Garden" – British ground forces tasked with moving northward. The Operation began on September 17, 1944 when British and American airborne divisions descended from the sky by parachute drops and glider landings behind enemy lines.

The operation failed at a bridge over the Rhine River at Arnhem, 'a bridge too far', where British forces encountered far stronger resistance than anticipated. By September 20, the bridge at Arnhem could no longer be defended, and the remaining British forces, with dwindling supplies, sought refuge within the town itself. On September 25, small assault boats manned by British and Royal Canadian Engineers were used to evacuate whatever battered troops they could out of the area. Of a total force of 35,000 Allied soldiers involved in Operation Market Garden, 1,400+ were killed and more than 6,000 were taken prisoner.

CANLOAN officer Dick Wilson of the Queen's Royal Regiment, 7th Armoured Division served in the North-West Europe Theatre for approximately two and a half months as the Allies advanced through northern Belgium and southwestern Netherlands.

In early September 1944, Allied forces had captured the inland port of Antwerp, Belgium, the second greatest port in Europe at the mouth of the Scheldt River. However, German forces still controlled the 45-mile-long Scheldt estuary (the Belgian-Dutch border area) that connected the port of Antwerp to the North Sea. In early October 1944, a series of military operations began led by the First Canadian Army, with Canadian, Polish and British units attached, to open up the shipping route to Antwerp so that its port could be used to supply the Allies in north-west Europe. The operation to liberate the estuary in Northern Belgium and the Netherlands, known as the **Battle of the Scheldt** (October 1 – November 8, 1944), was among the most difficult and grueling struggles in the war. The bitter fighting against a well-fortified and heavily entrenched enemy took place in a bleak environment made worse by the winter cold in a flooded and freezing muddy quagmire.

On October 2, 1944, Lieutenant Dick Wilson was killed in the Battle of the Scheldt during the early stages of the Liberation of Belgium and the Netherlands. After originally being reported as "missing in action", he was later recorded as "missing, now for official purposes presumed killed in action".

In mid-October of 1944, Vera, his widowed mother in Sarnia, received a telegram from Ottawa informing her that her son, LIEUTENANT R.N. WILSON WAS REPORTED MISSING ON OCTOBER 2. No other details were given. Vera suspected that whatever happened to her son likely occurred in Belgium, as she had received a recent letter from him telling of some of his experiences in Belgium.

In late July 1945, more than two months after VE-Day, Dick Wilson's name was mentioned in a newspaper story on the 7th Armoured Division (Desert Rats) and he was described as "missing presumed dead". Vera had not received any notification of her son's death at that point but received the news later that her son was officially recorded as, *For official purposes, presumed killed in action, in the field (Western Europe).*

Of the 673 Canadian officers that served in the CANLOAN scheme, approximately 75% were either wounded, killed or taken prisoners of war. In peaceful Stanley Park on the banks of the Rideau River in Ottawa stands a simple memorial, unveiled on June 3, 1961 by the Governor General of Canada, the Right Honourable Georges P. Vanier. On the memorial are recorded the names of 128 fatal CANLOAN casualties.⁷¹ Lieutenant Richard Norman Wilson is one of those names on the memorial.

Lieutenant Richard “Dick” Wilson, 23, has no known grave. His name inscribed on the Groesbeek Memorial, Netherlands, Panel 10.

WISE, Frederick Ervine (#R/78865)

Sarnia born Frederick Wise, a former employee of the *Canadian Sarnia Observer*, died in Egypt at age 26. After serving in the desert campaign for almost nine months, Frederick, a Sergeant-Pilot with the RCAF, was killed on November 4, 1942. His Hurricane aircraft failed to return from a mission around Alala, in North Africa. Adding to his parents’ grief was that neither their son’s body nor his plane was ever recovered.

Frederick (“Freddie”) Wise was born in Sarnia on June 4, 1916, the son of Adam and Margaret May (nee Cridland) Wise. In Walsingham in Norfolk County on February 18, 1903, Adam Wise (born in Welland County) married Margaret Cridland (born in Norfolk County), a union that would produce six children: daughters Ethel Winnifred and Jennie Agnes; and sons Frank Edwin, Norman Earl and Frederick. Their other son, Herman Allan Wise, died in infancy due to cholera on September 3, 1912. The Wise family lived at 415 Nelson Street, Sarnia. Their son Norman also joined the services, enlisting in August 1942 and becoming a Trooper with the Canadian Army. Norman Wise would serve in England, Italy, France and Germany.

Frederick Wise attended Durand Street and London Road public elementary schools in Sarnia from 1924 to 1930 and then Sarnia Collegiate Institute from September 1930 until June 1937. He was very active in hockey and also enjoyed playing baseball and swimming, and his hobby was mechanics. In 1940, he took an International Correspondence course in advertising. Frederick was an employee of the *Canadian Observer* in Sarnia, working in the circulation department as a clerk for a number of years, until he enlisted. In that time, he had also done some sales and repair work on small motors for Hoover Company.

Twenty-four-year-old Frederick Wise enlisted with the Royal Canadian Air Force on December 20, 1940 in London, Ontario (his father Adam was retired by then). Frederick stood five feet ten inches tall, had blue eyes and fair hair, was single and residing at home with his parents on Nelson Street at the time. He recorded his occupation as “clerk” and preferred to be a pilot, and if not that, then an observer or air gunner.

In a reference letter written for the RCAF Recruiter on behalf of Frederick Wise, P.T. McGibbon of McGibbon’s Drug Store in Sarnia wrote, *I have known Fred E. Wise since he was a child and I have much pleasure in recommending him to any person or corporation requiring his services. He has always been a very industrious, diligent and willing worker and liked by every person who has ever come in contact with him. I also know the rest of the Wise family and they command the respect of every person who has the pleasure of knowing them.*

From a portion of a reference letter written by the Circulation Manager of the Canadian (Sarnia) Observer, R.J. Knowles wrote, *When publisher asked me to supply a boy to fill an office vacancy, I recommended him and for the past two years he has been making himself of real value to this company. He maintains a good appearance, is punctual, courteous, honest and in addition has shown willingness to ‘pull more than his weight’.* The Recruiting Officer wrote this of Frederick: *A smart clean cut chap, good appearance and personality, keen, alert and observant, the determined aggressive type, will respond to training, excellent material for Air Crew.*

From #1 Manning Depot in London and then from #1 Auxillary Manning Depot (AMD) in Picton, Frederick began his air training at #6 Service Flying Training School (SFTS) in Dunnville, followed by #1 Initial Training School (ITS) in Toronto. The Commanding Officer at #1 ITS wrote that Frederick was *Cool, reliable, steady type of Trainee, with fine service spirit. Applied himself well at the school.* Frederick continued his training at #19 Elementary Flying Training School (EFTS) in Virden, Manitoba; and at #10 Service Flying Training School (SFTS) in Dauphin, Manitoba. The Commanding Officers in Manitoba wrote this of Frederick: *Hard worker and keen. Punctuality and deportment good. Flying above average... Very good student. Recommended for Fighter Squadron.* On October 24, 1941, Wise was awarded his wings as a qualified Pilot in the Royal Canadian Air Force, graduating at Dauphin, Manitoba. Following his graduation, he received a 14-day leave in which he was able to return home to visit his parents, siblings and friends in Sarnia.

Frederick embarked overseas from Halifax bound for the United Kingdom on November 11, 1941. He travelled overseas with fellow Sarnian James L. Wright (also included in this Project), who had attended the same training centres as Frederick. Both Sarnians reunited later as members of the R.C.A.F. in the Middle East.

From #3 Personnel Reception Centre in early December 1941, Frederick was posted to #59 Operational Training Unit (59 O.T.U.) at RAF Turnhouse, receiving further training to fly single-seat fighters. In late February 1942, he was transferred to the Middle East where he continued his training. In June 1942, he was posted to #22 Personnel Transit Centre (P.T.C.), RAF Almaza, Egypt, and then to No. 25 P.T.C. In mid-July 1942, Frederick became a member of RAF #238 Squadron "Ad Finem" (To the end), with the rank of Flight Sergeant-Pilot.

No. 238 Squadron, a fighter squadron formed in mid-May 1940, was originally equipped with Spitfire fighters, but converted to Hawker Hurricanes in June. During its first year, the squadron was posted to several RAF bases in England and took part in the Battle of Britain. In May 1941, the squadron began to move to the Middle East, part of No. 258 Wing, Western Desert, Middle East Command. Here, the squadron was used for bomber escort missions and fighter patrols.

In September of 1942, a letter from Fred Wise arrived at the *Sarnia Observer* and the former employee, described his life in the Middle East. The following is a portion of that letter dated August 21, 1942:

On Sunday I was in Alexandria and had a dip in the Mediterranean, but this salty water isn't good for swimming when one is used to Lake Huron. I have been here three weeks, and feel fairly settled after travelling nearly all over Egypt. So far I have made five trips, mostly patrols over Alamein. It was only last Sunday that I saw my first Jerry hits.

Today we had a rather important job and came out of it with flying colors. On this particular we were top cover for a Hurricane bomber squadron, and watched the boys pull off and "drop their eggs." On the way home over Alamein we were attacked by four Messerschmidts. They came down on us like a bat out of hell. We fixed them again, and in the dog fight which followed one of the beggars got in front of me for a second, so yours truly got a good burst in. However I'm afraid I missed, though by mighty little. It was good to get home again, but I'm ready to go back at them anytime.

The **North African Campaign** began in June 1940 and continued for almost three years, as Allied and Axis forces pushed each other back and forth across the desert. Battles between British Commonwealth, U.S. and French forces against Italian-German Axis and Vichy France forces took place across Libya, Egypt, Morocco, Algeria and Tunisia. Canadians fought as part of British army units, as members of the RAF or the Royal Canadian Air Force and serving in the Royal Canadian Navy.

As part of **Middle East Command**, RAF #238 Squadron took part in the Second Battle of El Alamein (October 23 – November 11, 1942). Taking place near the Egyptian railway halt of El Alamein, the battle was won by the Allies and marked the beginning of the end for the Axis in North African Campaign (the campaign would end in May 1943).

After serving in the desert campaign for almost nine months, Frederick Wise was killed in action. On November 4, 1942, Flight Sergeant-Pilot Frederick Wise's Hurricane aircraft failed to return from a ground strafing mission against the enemy around Alala, in North Africa.

In mid-November 1942, his parents received a telegram informing them that their son, Frederick Ervine Wise, was reported missing, and that he had not returned from an operational flight in the Middle East. Days later, they received the following letter from the Flight Lieutenant, R.C.A.F. Casualties Officer, for Chief of the Air Staff: *Dear Mr. Wise:*

It is my painful duty to confirm the telegram recently received by you which informed you that your son, Sergeant Frederick Ervine Wise, is reported missing on Active Service.

Advice has been received from the Royal Canadian Air Force Casualties Officer, Overseas, that your son was the sole occupant of an aircraft which failed to return to its base due to enemy action on November 4th, 1942.

I desire to point out that this does not necessarily mean that your son has been killed or wounded. It might be that he is a prisoner of war and inquiries have been made through the International Red Cross Society and all other appropriate sources. Official announcement that your son has been reported missing will not be made through the Press for at least five weeks, and until then, you are requested not to give any information to the Press or Radio. It is possible that he has landed in enemy territory and in that event publicity at this time might imperil his chance to escape.

This is all the information that we have at these Headquarters but your son's Commanding Officer is writing you a letter which you should receive shortly which will give you all available details. Please be assured that any further information received will be communicated to you immediately. May I join with you and Mrs. Wise in the hope that better news will be forthcoming in the near future.

About the same time that Adam and Margaret Wise in Sarnia received the above letter, they received the following letter from R.C.A.F. Records Officer, for Chief of the Air Staff in Ottawa:

Dear Mr. Wise:

I am directed to advise you that your son, Frederick Ervine Wise, has been promoted to the rank of Warrant Officer Second Class with effect from October 24th, 1942.

This promotion follows a procedure adopted by the Royal Canadian Air Force, that all aircrew members of the service if recommended by their Commanding Officer should at the end of the required lapse of time from their last promotion be promoted to higher rank. This promotion procedure has been made retroactive in order to extend the same recognition to those who have unhappily lost their lives.

It is my sincere hope that you may find sustaining comfort in the knowledge that the qualities of your gallant son are thus recognized, and it is regretted that this information could not be passed to you at an earlier date but the delay in notifying you was unavoidable. May I express to you and the members of your family my profound sympathy.

In early December 1942, the staff of the *Canadian (Sarnia) Observer* received Christmas greetings via telegraph from Frederick Wise, the former member of the *Observer* circulation department. The greeting had been sent from the Middle East, dated October 31, 1942, only a few days before he was reported missing.

In late December 1942, the Royal Canadian Air Force Casualty List still recorded Frederick Wise as, *Missing after air operations in North Africa*. Seven months later, in July 1943, Frederick Wise was officially recorded as, *Previously reported "missing" after air operations (overseas), now for official purposes, presumed dead*.

In August 1945, Adam received the following letter from the R.C.A.F. Casualty Officer, for Chief of the Air Staff in Ottawa:

Dear Mr. Wise:

The Director of Estates has asked me to reply to your recent enquiry concerning your son, Warrant Officer Class II Frederick Ervine Wise. It is indeed regretted that despite all possible efforts no further information has been received concerning your son since he was reported missing.

There are several Services set up in an endeavor to find all particulars possible of crashed aircraft. Some information is available concerning a great many aircraft which crashed or were shot down by the enemy and every possible effort on an organized basis is being put forth to secure all information available. It is the duty of the Graves Registration Units, which are under the control of the Military Authorities to enquire for and locate the graves of all personnel known or believed to have crashed and to have been buried in occupied areas.

A Royal Air Force and Dominion Air Force Missing Research and Enquiry Service has been organized for the purpose of research and enquiry in liberated territories into the circumstances of aircrews reported as casualties. This Service endeavours to obtain additional information to supplement that already received. The civilian population of these areas is being contacted by Radio, Press, and Proclamations through the various civic authorities to centralize through this Service any information or concrete evidence they may have about Air Force personnel or crashed aircraft. Similar instructions have been issued to all Service personnel in these areas.

I wish again to assure you that when any additional information is received concerning your son, it will be forwarded to you. I am sure you will realize that owing to the conditions existing in Europe at the present time and the great number of enquiries confronting these enquiry services, some time may pass before more information is received. May I extend to you and the members of your family my most sincere sympathy.

By February 1946, Adam and Margaret had still not received any further information about their son. Margaret wrote the following letter to the RCAF Estates Branch in Ottawa; *It is 3 years and 3 months and a half today since he was reported missing, but his plane, nor him, nor his grave have ever been found, so we are at a loss to know what did happen to our dear son.*

In late March 1946, she received the following reply letter from the R.C.A.F. Casualty Officer, for Chief of the Air Staff in Ottawa:

Dear Mrs. Wise:

The Director of Estates has asked me to reply to your recent enquiry concerning your son, Warrant Officer Class II Frederick Ervine Wise. It is indeed with regret that I must advise you that despite all possible efforts no

information has been received regarding the fate of your son since the night he was reported missing.

Please be assured that the Missing Research and Enquiry Service and the Graves Registration Units are doing everything in their power to secure definite information regarding the fate of your son and just as soon as any word is received, you will be at once advised. I am sure you will realize, however, that in view of the vast number of enquiries confronting these enquiry services some considerable time may elapse before more information is received. May I again extend to you and the members of your family my most sincere sympathy.

In mid-June 1946, Margaret received the following letter from the R.C.A.F. Records Officer in Ottawa:
Dear Mrs. Wise:

It is a privilege to have the opportunity of sending you the Operational Wings and Certificate in recognition of the gallant services rendered by your son Warrant Officer Class II F.E. Wise. I realize there is little which may be said or done to lessen your sorrow, but it is my hope that these "Wings", indicative of operations against the enemy, will be a treasured memento of a young life offered on the altar of freedom in defence of his Home and Country.

In late November 1952, more than ten years after the loss of their son, Adam and Margaret received a letter from the R.C.A.F. Casualties Officer, for Chief of the Air Staff in Ottawa. Following is a portion of that letter:

Dear Mrs. Wise:

It is with reluctance that after so long an interval, I must refer to the loss of your son, Warrant Officer Class II Frederick Ervine Wise. A report has, however, been received from our Missing Research and Enquiry Service which states that their efforts to locate your son's grave have been unsuccessful. Under the circumstances, therefore, it must be regretfully accepted and officially recorded that he does not have a "known" grave.

Due to the extreme hazards attending air operations there are, unhappily, many thousands of British aircrew boys who do not have "known" graves and all will be commemorated on General Memorials that will be erected at a number of locations by the Imperial War Graves Commission (of which Canada is a member), each Memorial representative of a theatre of operations. One of these Memorials will be erected at El Alamein, and the name of your son will appear on that Memorial....

I realize that this is an extremely distressing letter and that there is no manner of conveying such information to you that would not add to your heartaches. I am fully aware that nothing I may say will lessen your great sorrow, but I would like to express to you and the members of your family my deepest sympathy.

Frederick Wise, 26, has no known grave. His name is inscribed on the Alamein War Memorial, Egypt, Column 264.

WRIGHT, James LeNoury (#J/19602)

James LeNoury Wright, who preferred to be called "Jim", had the opportunity to be discharged from service in mid-August 1944. As a pilot with the RCAF, he had amassed more than 800 hours to his credit and had completed his duties in Africa, the Middle East and other theaters of war. Yet the 28 year old much decorated Sarnian chose to return to service. Nine months later, Jim was killed in a flying accident in Wales.

James Wright, who always referred to himself as Jim, was born as a fraternal twin on August 19, 1916 in Sarnia. Both of his parents were born in England--Thomas William Wright was born in April 1881 in Isle of Guernsey; and Margaret (nee Wisby) Wright, was born in Harston, Cambridgeshire. Thomas Wright had been married previously (in February 1905) to Harriet "Hattie" Wisby, Margaret's younger sister, but tragically Hattie passed away from tuberculosis in February 1912.

Thomas and Hattie had three children together: Herbert Wisby Wright (born February 1906); Ellis John Wright (born December 1910); and Florence Wright (born October 1911). Tragedy struck the Wright family a second time in February 1912 when their infant daughter Florence passed away from meningitis a few days after Harriet had passed away.

Two years later in March 1914, widower Thomas Wright married Margaret Wisby, his sister-in-law who had immigrated to Forest, Ontario from Harston, Cambridgeshire, England around 1905. Margaret Wisby also had a previous marriage. She married Charles Kershaw in June 1910, but he died in August 1911, around the time their daughter, Mary, was born.

Thomas Wright married Margaret Kershaw (nee Wisby) in Forest, Ontario on March 5, 1914. At the time, Thomas recorded his address as Port Huron, Michigan, but their family later resided at 240 Bright Street in Sarnia.

Thomas and Margaret Wright had three children together: Clifford Wright (born September 1914); and twins Edith Selena and James (Jim) Wright, born on August 19, 1916, in Sarnia. Jim was given the middle name Le Noury, which was his grandmother's maiden name (Julia Le Noury of Mount Durand, Guernsey).

In February 1916, 34 year-old father Thomas Wright enlisted to serve in the First World War with the Canadian Over-Seas Expeditionary Force (CEF) in Sarnia and became a member of the 149th Battalion. Employed as a grocer, Thomas and wife Margaret along their six children--Herbert Wisby (11 yrs.); Ellis John (7 yrs.); Mary Umfreville Kershaw Wright (5 yrs.); Clifford Wisby (2 yrs.); and twins James LeNoury and Edith Salina (4 months)--were residing at 128 Penrose Street at the time.

In April 1917, fourteen months after enlisting, Thomas Wright arrived in England and three months later he disembarked in France. He rose to the rank of Acting Lance Corporal, with the 11th Battalion, Canadian Railway Troops. In the final days of the Great War, Thomas Wright lost his life in France. Acting L/Cpl. Thomas William Wright passed away at No. 56 Casualty Clearing Station on November 9, 1918 (two days before the Armistice). The cause of death was the result of the Spanish flu (influenza and broncho-pneumonia).

Many years later, his two former wives, sisters Harriet (nee Wisby, passed away in Forest 1912) and Margaret (nee Wisby, passed away in Sarnia 1964), were both buried in Beechwood Cemetery in Forest. An empty spot lies between them, for their husband Thomas William Wright. The space will always be there, as Thomas is buried in France with his fallen brothers in arms. Thomas Wright, 37, is buried in Grevillers British Cemetery, Pas de Calais, France, Grave XVII.E.8. Thomas William Wright's name is also inscribed on the Sarnia cenotaph on the World War I section. His story is included in this Project in the World War I section on page 406. *Thomas and James (Jim) Wright are the only father and son combination from Sarnia to both lose their lives while serving Canada in two different World Wars.

Jim's mother Margaret Wright (nee Wisby)

Jim's twin sister Edith Wright

So Margaret raised Jim all on her own, along with his other five siblings--Herbert, Ellis, Mary Kershaw, Clifford and Jim's twin sister Edith--at 240 Bright Street, Sarnia. Jim was educated at Russell Street, George Street, and Lochiel Street public elementary schools from 1922 to 1929. He then attended Sarnia Collegiate from 1929 to 1935, where he specialized in drafting and completed two years commercial. Jim loved sports, especially swimming, hockey, football, rugby, softball and tennis, and he had a keen interest in photography. After completing high school, Jim worked as a bookkeeper at Head Laundry Limited in Sarnia for one year in 1935-1936. From 1936 until he enlisted, Jim was employed at Electric Auto-Lite Limited in Sarnia, first as an inspector, and then was promoted to office clerk in 1939.

Twenty-four-year-old Jim Wright enlisted in the Royal Canadian Air Force on December 16, 1940 in London, Ontario. He stood five feet six inches tall, had blue eyes and light brown hair, was single and was living at home on Bright Street with his family at the time. He requested flying duties, with a preference to be a pilot or an observer. His plan for after the war was to possibly go back to school. A reference letter for the RCAF Recruiter on behalf of James Wright was written by the President of Brown & Urquhart Limited (Front Street, Sarnia). In it, he

wrote, *I have known him personally and have had business dealings with him and have always found that he was honest and conscientious and of good character.*

His employer at Electric Auto-Lite also penned a reference letter. Again, he had a sterling recommendation for Jim: *James L. Wright has been in the employ of the Electric Auto-Lite Limited, Sarnia for approximately three and one half years and during that period the writer has known the above to be a steady, conscientious worker, of excellent character, and I am pleased to provide this recommendation of Mr. Wright's qualifications.* After the interview, the Recruiting Officer wrote that Jim Wright, *Has a good knowledge of photography, drafting and mechanical drawing. We recommend him because he is very frank in conversation, honest and conscientious.*

From the Recruiting Centre in London and then from #1 Manning Depot in Toronto and from #1 Auxillary Manning Depot (AMD) in Picton, Jim Wright received his air training at #6 Service Flying Training School (SFTS) in Dunnville; at #1 Initial Training School (ITS) in Toronto; at #19 Elementary Flying Training School (EFTS) in Virden, Manitoba; and at #10 Service Flying Training School (SFTS) in Dauphin, Manitoba. The Chief Instructor at #10 SFTS wrote this of Wright: *First class student has a quiet way about him that is quite attractive. Student type, deportment good. Recommended for Fighter Squadron.*

Graduating on October 24, 1941 in Dauphin, Manitoba, Jim Wright was awarded his wings as a qualified Pilot in the Royal Canadian Air Force. During his training, Jim flew in a variety of planes, mostly Hurricanes, but also Spitfires, Hudsons, Dakotas, and Marauders. Following his graduation, he received his 14-day embarkation leave and was able to return home to visit family and friends. On November 11, 1941, Jim embarked overseas from #1 Y Depot in Halifax bound for the United Kingdom. He travelled overseas with fellow Sarnian Frederick E. Wise (also included in this Project), who had attended the same training centres as Jim. Both Jim Wright and Frederick Wise would be reunited later as members of the R.C.A.F. in the Middle East.

Initially posted to #3 Personnel reception Centre on November 23, 1941, Jim Wright was transferred to #55 Operational Training Unit (O.T.U.) at RAF Usworth on December 9, 1941. There he received further training as a fighter pilot. In early March 1942, he was transferred to the Middle East where he continued his training at #22 Personnel Transit Centre (P.T.C.), RAF Almaza, Egypt. In late June 1942, he was posted to No. 1 Aircraft Delivery Unit (A.D.U.) in Cairo. Jim served overseas in North Africa and the Middle East until August 1944.

Overseas for almost three years, Jim was part of aircraft delivery--flying planes to areas that included North Africa, Egypt, the Middle East and India. This included flying aircraft from the West African coast to the Middle East during the Tunisian Campaign, as well as piloting planes to Iran and transports and fighters to India. In August 1942, James celebrated his 26th birthday somewhere in the Middle East. In November 1942, while stationed in Africa, he was hospitalized for close to two weeks, after contracting malaria. One year later, in November 1943, he received his commission and was promoted to Flight Officer.

In April 1944, the *Sarnia Observer* featured a story on Mrs. Margaret Wright's three children who were serving at the time—Mary, Clifford and James. Her daughter, Flying Officer Mary Kershaw of the R.C.A.F. (W.D.), had attended public school and Sarnia Collegiate Institute. She trained at Strathroy General Hospital and was at the Charlotte Eleanor Englehart Hospital in Petrolia for four years. Prior to enlisting, she nursed for 1 ½ years at the Sanitorium in Weston. She enlisted in the R.C.A.F. sixteen months prior to the newspaper story. Stationed at Trenton during that time, Mary had recently been appointed to the Radio Station Hospital in Clinton where she was in charge of the 25-bed hospital.

Margaret's son, Clifford Wright, who had been employed with Mueller Brass Company of Port Huron, enlisted in January 1944 in the United States Navy (USN). Clifford was stationed at Scott Field, Farragut, Idaho, from where he graduated in February of 1944. Following a 21-day leave in Sarnia, Petty Officer Clifford Wright of the USN was transferred to Santiago, California. Her other son, Jim Wright, was also featured in the story. At the time, Pilot Officer Jim Wright of the R.C.A.F. had been overseas for two years and had been stationed for some time in the Middle East where he had received his commission.

In mid-August 1944, Jim returned home from overseas and made what turned out to be his last trip to Sarnia, a 30-day leave to visit his mother Margaret, twin sister Edith and the rest of his family. Jim had completed his duties in Africa, the Middle East and other areas and had been sent back to Canada with the privilege of taking his discharge if he so elected. He had more than 800 flying hours to his credit; yet, he chose to continue in the service.

While in Sarnia, when asked what things had impressed him on his return to Canada, Jim stated, *There*

certainly is no serious shortage of food in Canada. It is wonderful to be able to go into a restaurant and order a steak, and to see a menu with so many choices on it. In England there are no menus now such as there are here, while in Africa, on the ferry command, food was often pretty grim. On choosing not to take his discharge, he expressed his eagerness to return to the battlefield. *The leave is fine, but I'm not used to having nothing to do, and hope to be sent back overseas again.* He expressed that this time, he wanted to use his training as a fighter pilot to get into the thick of things.

In describing the “grim” accommodations and food to which he became accustomed, he stated that in some of the R.A.F. stations along the ferry routes, native cooks were used with R.A.F. personnel supervising: *We frequently used a native set-up with mud and straw huts, and wooden frames with ropes for mattresses.... The R.A.F. considered it more important to bring in war material first and accommodations later if there was time. The Americans, on the other hand, brought in their equipment first, including prefabricated huts, real beds, complete refrigeration, and so on.*

He was unimpressed with Cairo and Alexandria; in fact, Jim was quite disgusted with the lack of proper sanitation he found, even in new Cairo. He said that the old city was dirty and full of disease spread by flies. Nor was he impressed with the Egyptians he found in his travels there, claiming to have lost many articles to pickpockets. He described Alexandria as cooler than Cairo in the summer, with a breeze from the Mediterranean Sea: *The heat on the West African coast was oppressive with a high humidity, while it was 125 degrees in Iran falling to 100 degrees at night.*

Flying Officer-Pilot James Lenoury Wright

After his 30-day leave at home, Jim Wright reported to Ottawa for posting and returned overseas on September 27, 1944. Part of his new posting was taking a course on Spitfires equipped both as fighters and for photographic work. In late September 1944, the mother of another Sarnia R.C.A.F. officer showed Jim's mother Margaret a letter that her son had written to her. The officer praised Jim Wright's splendid record. The letter said that F/O Wright had earned his month's leave at home by taking part in a particularly hazardous undertaking with two colleagues. It also revealed that Jim, despite three attacks of malaria, had made 46 flights in single-engine fighter planes from the west coast of Africa to Burma and Russia, and had spent 10 days in the desert after being forced down by engine trouble.

In the spring of 1945, Jim Wright was at RAF Hawarden, Wales attached to RAF #41 Operational Training Unit (O.T.U.), part of No. 12 Group **Fighter Command**. No. 41 OTU was formed in September 1941 to train tactical reconnaissance pilots using Lysanders and Tomahawks. By April 1942, the Lysanders were retired and Mustangs arrived to supplement the Tomahawks. In November 1942 the unit moved to RAF Hawarden. In September 1944, it was transferred to No. 12 Group, by which time it was using aircraft that included Hurricanes, Spitfires, and Masters Harvards. In February 1945, the unit was split into two with No. 41 OTU Day Fighter Wing moved to RAF Poulton where it was re-designated No 58 OTU, while the Hawarden element became No. 41 Fighter Reconnaissance Wing and moved to RAF Chilbolton. This latter unit is where Flying Officer Jim Wright was posted.

On March 15, 1945 in Wales, Jim Wright was killed while flying. He was flying low in his Spitfire BM636 when at approximately 18.45 hours, while carrying out low aerobatics, Jim attempted a roll at a low height. He did so with insufficient speed and hit the ground as he was coming out of the roll. The aircraft crashed in a field at Paper Mill Lane, Oakenholt, Flintshire, Wales. A local farmer who witnessed the crash, rushed over and pulled Jim out of the plane, but Jim was already dead. His death was the result of multiple injuries and extensive burns.

Approximately one week later, Margaret Wright on Bright Street in Sarnia received a telegram from Ottawa informing her that her son, PILOT OFFICER JAMES WRIGHT WAS KILLED RECENTLY ON ACTIVE SERVICE WITH THE RCAF OVERSEAS. No further particulars were given in the official message. James Lenoury Wright's death was later officially recorded as, *Killed in flying accident, overseas (Wales)*.

Shortly after receiving the above telegram, Margaret received the following letter from the Air Commodore, Acting Air Member for Personnel in Ottawa:

Dear Mrs. Wright:

It is with deep regret that I must confirm our recent telegram informing you that your son, Flying Officer James Lenoury Wright, was killed on Active Service.

Advice has been received from the Royal Canadian Air Force Casualties Officer, Overseas, that your son lost his life during flying operations at 6:55 P.M. on March 15th, 1945. The aircraft, of which he was the sole occupant, crashed at Paper Mill Lane, Oakenholt, Flint, Wales.

You may be assured that any further information received will be communicated to you immediately. I realize that this news has been a great shock to you, and I offer you my deepest sympathy. May the same spirit which prompted your son to offer his life give you courage.

Shortly after receiving the news of Jim's death, Rev. F.G. Hardy of St. George's Church, Sarnia, spoke in sympathetic terms at a morning service at the church. The rector said that in peace times, before his enlistment, Jim had taken an active part in the young people's work and older members of the Boy Scouts would remember his activities and his talent for leadership. Rev. Hardy added that it was a sad duty to make the announcement of the supreme sacrifice of this young boy.

In May 1945, Margaret received the following letter from E. Plumtree, the RAF Wing Commander, No. 41 R.A.F. Station, Chilbolton, Stockbridge, Hants:

Dear Mrs. Wright,

Before you receive this letter you will have had information of the very sad loss of your son James. He was flying a Spitfire aircraft which was seen to dive into the ground at very high speed, and there is no doubt that he was killed instantly. A searching inquiry has been made in order to try and find any possible cause of the accident, but no real conclusion can be arrived at. There is no evidence of any technical fault in the aircraft which was flying perfectly a few moments before. Your son was an extremely competent pilot and there is certainly no question of it being due to anything within his control. In view of the above, it is considered probable that your son may have lost consciousness due to an unknown reason, causing the aircraft to dive out of control into the ground. I am afraid that it was one of the unfortunate, unexplainable accidents that are part and parcel of the normal risks of flying a fast fighter aircraft.

Owing to the time taken to communicate under present conditions, it was not possible to ascertain your wishes regarding the funeral in the time available and I had therefore to arrange a burial without reference to you. You will, I am sure, understand the necessity for this action and I sincerely trust that the arrangements we were able to make were such as you would have wished.

Your son's funeral took place at the Regional Cemetery, Chester, the service being conducted by a Canadian Padre. Full service honours were accorded, the coffin being carried by men of his own squadron who also provided a firing party. The coffin was covered with the Union Jack and Last Post was sounded. Photographs have been sent to you which I hope you have received.

You will wish to know that all war graves are cared for by the Imperial War Graves Commission, which will erect a temporary wooden cross pending the provision of a permanent memorial by them. Your son's effects have been gathered together and sent to the Royal Air Force Central Depository, by whom they will be forwarded to the Administrator of Estates, Ottawa, who will be writing to you in this regard in due course.

May I now express the great sympathy which all of us in the Unit feel with you in the sad loss which you have sustained. Your son was a most popular and well liked officer throughout the Unit and he could always be depended on to do his work and his flying with great keenness. We all miss him very much indeed.

The chaplain in England that presided over Jim Wright's funeral wrote the following in a letter to his family: *Blacon Cemetery, just outside the ancient walled city of Chester, is a beautiful spot. The heavy mist that has hung over the countryside has lifted, but the sky was clouded over during the funeral; overhead, two aircraft hovered around as though in tribute to your son.*

An inquiry into the circumstances of the flying accident was held in the spring of 1945. Following are some of the findings of that investigation:

F/O J.L. Wright took off in Spitfire aircraft BM636 from R.A.F. Hawarden and completed a combat exercise with F/L Kusel at 5,000 feet. Having completed the exercise F/O J.L. Wright decided to "beat-up" the house of some friends, where he had been to dinner previously, even though he had read Station Flying Station Orders forbidding the practice. F/O J.L. Wright made an attack on the house, at a height of about 50 feet, and as soon as he had gone over the house, he completed a slow roll, as soon as he was level again, he attempted a second roll and flew straight into the ground.

To the witnesses, the aircraft appeared to be gradually but consistently losing height all the time during these slow rolls and did not dive into the ground but flew in his line of flight. The aircraft passed between two trees and struck the ground with its starboard wing tip, falling down on to its nose, it then bounced about 30 yards, disintegrating as it did so. The fuselage burst into flame and began to burn fiercely. Mr. Herbert Ward Hughes fought his way into the flames and extricated the burning body of the pilot. This must have taken Mr. Hughes several minutes as he had only just recovered the body when other witnesses arrived at the scene. The accident is a typical example of the effects of low aerobatics and "showing off" and shows that even experienced Pilots are not immune from this practice.

F/O Wright had total solo flying experience of 745 hours on all types including 95 hours on Spitfire aircraft. The investigating Officer recommends that some form of recognition be awarded to Mr. Herbert Ward Hughes of Oakenholt Farm, Flint, for his bravery in extricating the body of the pilot (F/O Wright), an action which might have saved the Pilot's life had there been any hope.

In March 1946, Margaret received a War Service Gratuity of \$1060.12 for the loss of her son. Jim Wright's well-deserved awards include the Africa Star with 42-43 bar; a Defence Medal; a War Service Medal; and a Canadian Volunteer Service Medal with bar. Flying Officer-Pilot James LeNoury Wright, 28, is buried in Chester (Blacon) Cemetery, Cheshire, United Kingdom, Section A, Grave 97. On his headstone are inscribed the words, BE THOU FAITHFUL UNTO DEATH AND I WILL GIVE THEE A CROWN OF LIFE. REV.2.10.

WRIGHT, John David

The last moments of John "Jack" David Wright's life defined his character. While he was in England during the Blitz, a group of officers and nurses was dancing at a popular nightclub. When a high explosive German bomb ripped through the roof of the building, Jack acted instinctively. He shielded his dancing partner from the explosion, saving her life but sacrificing his own. Lieutenant Jack Wright, 28, was buried in Brookwood Military Cemetery, Surrey, United Kingdom on March 12, 1941.

John "Jack" David Wright was born in Petrolia on March 29, 1912, the only son of David and Florence Ellen (nee Crozier) Wright. David Wright, a liveryman at the time, and Florence Crozier were married on January 18, 1909 in Marthaville, Ontario and they had two children together: John, who went by "Jack" and Elizabeth Mary, who years later married Howard Vince and they resided at 409 Devine Street, Sarnia.

David Wright was an oil-drilling superintendent in Trinidad for a time, so his son, Jack, lived in Trinidad, British West Indies for six years, where he received part of his early schooling. The Wright family returned to Sarnia in 1924, where David was employed with a local automobile sales group. The Wright family lived at 320 Davis Street in Sarnia.

Jack completed his public school education in Sarnia and then attended Sarnia Collegiate from September 1926 to June 1930. While there, he was a member of the high school rifle team. He was also a member of Central United Church. Following his Sarnia Collegiate graduation, Jack began his employment at Imperial Oil Limited in Sarnia as an assistant in the engine-testing laboratory. It was during this time period that tragically, Jack would lose both of his parents in a six-month period: his mother Florence on December 5, 1934 (age 51); and his father David on June 30, 1935 (age 53).

In September 1935, Jack began a five-year education co-operative program with Imperial Oil Limited. The

program involved him spending six months in college and six months working at Imperial Oil. Jack attended college at Lawrence Institute of Technology in Detroit where he studied Mechanical Engineering to obtain his Bachelor of Science Degree in Mechanical Engineering. During this period, Jack, who was always interested in military matters, served for one year in the Non-Permanent Active Militia (NPAM), with the First Field Park Company, Royal Canadian Engineers (RCE) in Sarnia. Initially a Private, he advanced to the rank of Second Lieutenant on October 1, 1938. Jack was in his final year of his Mechanical Engineering co-op program, when the outbreak of war caused him to leave his duties with the chemical staff of the Imperial Oil Limited to enlist for overseas duty.

On September 3, 1939, twenty-seven-year-old Jack Wright was mobilized into service with the Canadian Active Service Force (CASF) of the Canadian Army in Sarnia. He stood six feet tall, had hazel eyes and brown hair, was single and recorded his occupation as engineer. He was residing at 409 Devine Street with his sister at the time. Completing his Officer's Declaration Paper on September 3rd in Sarnia, he was given a commission as Second Lieutenant with the 11th Field Company, Royal Canadian Engineers, headquartered in Sarnia. That day, Britain declared war on Germany, and one week later, Canada and Newfoundland declared war on Germany.

Wright received his army training in Sarnia and London, Ontario as a member of the Royal Canadian Engineers (RCE). He was promoted to the rank of Lieutenant with the RCE on November 27, 1939. In February 1940, he was interviewed by a Major of the 11th Field Company with regard to his offer of active service with the Royal Canadian Engineers overseas. Jack was evaluated based on his previous military service, his education, his civil employment and his references. A portion of the Major's remarks included, *This officer has gained excellent education, both in theory and practical engineering. He is industrious and very keen, and sound in handling men. He has proven himself to be a leader and to be very popular with his associates and men working under him. His habits of living are of a very high standard, also his character and reputation. I desire to highly recommend him for an appointment with a Field Company in the R.C.E., where in my opinion, he would prove himself to be a most capable officer.* In July of 1940, Jack Wright spent his last furlough in Sarnia.

Lieutenant John "Jack" David Wright

Jack Wright embarked overseas from Halifax bound for the United Kingdom on August 22, 1940, as a member of the 11th Field Company, Royal Canadian Engineers (RCE), with the rank of Lieutenant. Upon arrival at Greenock, Scotland in the U.K., he was posted to Badajos House in Aldershot, England. In the spring of 1941, he was still serving in England. It was during the time of the German Blitz—the nightly indiscriminate bombing of major British cities. At one point, London, England was bombed for 57 nights in a row. On a Saturday night, March 8, 1941, Lieutenant John "Jack" David Wright lost his life while in London, during a German bombing raid, a nightly occurrence at that time.

Jack was visiting the popular Café de Paris jazz nightclub, in Leicester Square, London, with a group of Canadian friends, including Canadian Nursing Sisters Thelma Stewart and Helen M. Stevens, and Lieutenant Jack C. Clunie, son of Mr. and Mrs. H. Clunie of 218 Davis Street, Sarnia. During the Blitz, the Café de Paris was considered

to be one of the safest places in the West End of London, due to the fact that the bulk of the club was located several floors underground. Though it was *twenty feet below ground*, in reality it was no safer than any other building in the neighbourhood. The club had an ordinary ceiling and, above that, only the glass roof of the Rialto theater. Built in 1924 in the basement below the theater, with a luxurious interior modeled on the ill-fated ocean liner *RMS Titanic*, the Café de Paris was a famous landmark. It featured performers like Marlene Dietrich, Cole Porter, Dorothy Dandridge, Aga Khan and was where the Charleston was introduced to Londoners. On that tragic night, both Sarnians would display acts of heroism.

On that Saturday night of March 8—the official start of London’s social season—the clear weather under a moon that was three-quarters full, enticed well-dressed young ladies and their gentlemen escorts in suits and uniforms to leave their homes to get out dancing and socializing. The excellent weather was promising for German bombers too. The club was already busy at eight-fifteen when the air raid sirens began to sound. Mary Churchill at a nearby club (the daughter of PM Winston Churchill), could make out the muffled sounds of anti-aircraft bursts and exploding bombs, which she described as “odd bumps and thuds above our chatter and the music.”

At 9:55, with popular bandleader Ken “Snakehips” Johnson in his sleek tux and a red carnation conducting, the band began to play the rousing jazz piece, “Oh Johnny, Oh Johnny, Oh!” Jack Wright and his partner, twenty-three-year-old Canadian nursing sister Thelma Stewart of Toronto, liked the song and continued dancing in the throng. Jack Clunie and his partner, nursing sister Helen Stevens of Dunnville, Ontario, either didn’t care for the song or didn’t care to dance to it, so had left the dance floor and were sitting down at a table on the balcony overlooking the dance floor.

At 9:59, one bomb, weighing 110 pounds, fell through the thin roof of the Rialto theater, penetrated all the way to the basement dance floor of the Café de Paris, and exploded. Survivors later reported seeing a bright blue flash and then a cloud of dust and cordite in the coal-black darkness.

Jack Wright’s last actions were both instinctive and heroic—he threw his body across his dancing partner and took the brunt of the blast, and was killed as a result. Nursing sister Thelma Stewart was saved by his actions, suffering a hand injury that required hospitalization.

Amid the ensuing chaos, Jack Clunie and his partner Helen Stevens, both dazed and injured themselves, administered first aid and helped to extricate the dead and injured. They moved about the debris pouring champagne on the wounds of the injured as an antiseptic, bound gaping wounds with tablecloths and clothing and put broken limbs in makeshift splints. Nursing sister Helen Stevens later described what happened: *The crash sounded like a bunch of firecrackers and stunned me for a few minutes. The whole place filled with smoke fumes. I thought at first it was gas. Lieutenant Wright shielded Miss Stewart as soon as he heard the bomb screaming. He died protecting the Canadian nurse.*

Miss Helen Stevens, 23, not a nurse, but a physiotherapist at a Canadian Military hospital disregarded her own injuries to tend to others. Afterwards, she said she had no thought of doing anything heroic: *I did what any Canadian nurse would be proud to do.* As Jack Clunie moved through the glimmering light, seeking injured under the debris, he found John Wright’s body. According to Helen Stevens, *Jack and those who helped were as cool as a Canadian spring breeze. They worked with might and main. It seemed to give me courage too.* Jack Clunie was “mentioned in dispatches” for his work in the rescue operations.

Nursing Sister Helen Stevens, who lost several of her friends in the bombing, was given official recognition by the Canadian Army. Hailed by the press as a “Canadian heroine in London,” the military recorded her distinguished conduct with these words: *Miss Stevens, who was dining in the restaurant at the time, was slightly injured and considerably shaken by the explosions. However, she unhesitatingly proceeded to render first aid to the injured amidst the scene of confusion and continued to do so for nearly an hour and a half. She was the last woman to leave the building and then only after other services had the situation in hand. Her conduct throughout merited the highest praise and is fully in accordance with the best traditions of the service.* Miss Helen Stevens was the second Canadian woman to be mentioned in military orders.

Following is a story on Miss Helen Stevens published in the *Ottawa Citizen* on March 11, 1941, under the headline *London Newspapers Praise Canadian Nurse’s Heroism*:

A smiling Canadian brunette, Nursing Sister H.M Stevens of Dunnville, Ont., was hailed by London’s press today as a “Canadian heroine of London.” Miss Stevens distinguished herself Saturday night by rendering first aid to victims of the bombing of the Café de Paris by Nazi raiders.

Pictures of the smiling nurse appeared in all papers. The Daily Telegraph carried the story of her heroism under a heading: "Heroic Nurse in Restaurant" and told of the "devoted courage of a party of Canadians who were dancing at a London restaurant which was struck by a high explosive bomb Saturday night.

The Mirror ran a two-column story under the heading: "Nurse Was Bomb Heroine." The Daily Herald called her "A Heroine of Restaurant Bombing." The Daily Mail spoke of her as the "Last Dance Heroine."

An initial casualty count recorded that thirty-four people were killed and at least eighty were wounded in the bomb explosion of the Café de Paris. In the days following, London civil defense authorities cited March 8 as "the worst raid since January." London newspapers gave accounts and pictures of the bombing. The papers gave great credit to the valour of Lieutenant John Wright in giving his life in an effort to shield from injury Nursing Sister Thelma Stewart. Credit was also given to Lieutenant Jack Clunie and Nursing Sister Helen Stevens, who attended the wounded.

Jack Wright and three others (Captain Philip Seagram of Toronto; Corporal G.W. Quinn of Pembroke; and Sergeant R.A. Bradshaw of Ottawa) were killed in the cabaret explosion, and many others were wounded. Captain Philip Seagram, who was killed in the tragedy, was well known to a number of Sarnians. He was a member of Lieutenant-General MacNaughton's headquarters staff and a particular friend of Lieutenant M.J. Chilton and Mrs. Chilton of Sarnia.

On March 9, 1941, Jack Wright's sister, Elizabeth Mary (Mrs. Howard Vince) at 409 Devine Street in Sarnia, received the following telegram from the Officer of Records in Ottawa: REGRET DEEPLY LIEUTENANT JOHN DAVID WRIGHT OFFICIALLY REPORTED KILLED ENEMY ACTION MARCH EIGHTH FURTHER INFORMATION FOLLOWS WHEN RECEIVED. Jack's aunt, Mrs. Margaret Crozier, was also residing at 409 Devine Street at the time of his death. The Commanding Officer of the local garrison, Lieutenant-Colonel S.G. Stokes of the 2-11th Field Company, (Reserve) Royal Canadian Engineers, organized a local memorial service for Lieutenant Wright, "because of the heroic aspects of his death." Jack Wright's death was later officially recorded as, *Overseas casualty, killed due to war operations (enemy action), Charing Cross Hospital, London, England.*

In mid-March 1941, Elizabeth Mary Vince received the following letter from the Major, District Chaplain, Headquarters in London, Ontario about her brother:

Dear Mrs. Vince:

The District Officer Commanding, Brigadier D.J. MacDonald, has asked me to convey to you his sincere sympathy in the death of your brother, Lieut. D.J. Wright, as the result of a bombing raid on London, England.

I would also add to the Brigadier's sympathy that of all the staff of this military headquarters. We had a high regard for your brother and his loss is keenly felt by us all. May I add my personal sympathy to you.

In early April 1941, Jack Wright's relatives in Sarnia received a letter from Lieutenant Arthur Hueston of a Western Ontario Regiment. Hueston had witnessed the large military funeral accorded Jack Wright in England on March 12, 1941. His flag-draped casket was borne on a gun carriage hauled by a military truck. After a church service that was attended by virtually all the officers and men from Sarnia who were in the area, Jack's remains were buried in Brookwood Military Cemetery. Among those there were Lieutenants Jack Clunie, Howard Stuart, Colin Hunter, Jack Williams, Walter Claxton, Tom Richardson, Bill Craig, Charles Kennedy, Tom Doherty, Bill Ewener and Ken Hunter; Captains Frank Payne, Charles Wrenshall, Charles Kindersley; and Major Eric Harris. The cemetery for Canadian war dead contained graves marked by the conventional simple white crosses at that time.

In September 1946, the Colonel, Director of Records, for Adjutant-General sent Elizabeth a photograph of the grave and marker over the burial place in Brookwood Cemetery in Surrey, England of her late and only brother. Lieutenant John "Jack" Wright, 28, is buried in Brookwood Military Cemetery, Surrey, United Kingdom, Grave 30.C.1. His name is also inscribed on the Sarnia Refinery Plaque. Unveiled in 1949, the plaque has the names of 24 Sarnia Imperial Oil employees who made the ultimate sacrifice in World War II.

YORKE, John Haswell (#R/90160)

Like his father and his brother, John Haswell Yorke, 22, served his country in war. When John was killed in action in the Azores in December 1943, the airman became the first casualty from Sombra in World War II.

John Yorke was born at St. Joseph's Hospital in London, Ontario on August 10, 1921, the younger son of Robert Dagmyer and Margaret Amanda (nee Haswell) Yorke, of Sombra. Like his two sons who followed his example, Robert served Canada in war.

Born August 20, 1881 in Wardsville, Middlesex, Ontario, Robert was the son of a farmer. In 1901, nineteen year-old Robert Yorke was residing with his parents Edward and Susannah, and his four siblings on the family farm in Brooke Township, Lambton East. On April 10, 1916, Robert Yorke, 34, enlisted in the Canadian Overseas Expeditionary Force in Sioux Lookout. He stood five feet nine inches tall, had grey eyes and light brown hair, was single and working as a brakeman there at the time. He recorded his next-of-kin as his father Edward, then residing in Strathroy, Ontario. Robert became a member of the 94th Overseas Battalion and served overseas in the Great War for three years.

In October 1918, Robert Yorke married Margaret Haswell in Lewisham, England and the following year, Robert and his British bride were living Canada. Robert and Margaret Yorke had two children together: Oscar Dagmyer, born June 1920, and John Haswell the following year. In 1921, the Yorke family was residing in London, Ontario, where Robert supported the family working as a barber. In 1927, when John was five years old, Oscar and he visited England with their mother Margaret, who was originally from Wales. They returned to Canada in April 1927, arriving in New York from London, England aboard the passenger ship *Minnekahda*. The Yorke family moved to Alvinston for several years before moving to Sombra in 1928, and later to 555 Confederation Street, Sarnia. Oscar Yorke also served during the Second World War, as a Sergeant with the Canadian Dental Corps in Italy.

John Yorke was educated at S.S. No. 7 elementary school in Sombra from 1928 to 1936 and then Sarnia Collegiate from 1936 to 1940. He was active in many sports, including baseball, swimming, basketball, volleyball, rugby, tennis, badminton, boxing and wrestling. While at Sarnia Collegiate, he also received Cadet training for four years. John worked part-time in 1937-1938 as a ferry driver for Frank Johnson in Sombra; and then in 1938-1940 as a farm labourer in Sombra. Prior to enlisting, he worked for several months as a labourer at Wallaceburg Brass Works.

At age nineteen, John Yorke, followed in his father's footsteps and joined the military when he enlisted in the Royal Canadian Air Force on February 7, 1941 in London, Ontario. He stood five feet seven and a half inches tall, had hazel eyes and light brown hair, was single, and residing in Sombra at the time. He recorded his occupation as labourer. His plan for after the war was to enter radio work. He requested flying duties, with a preference to be an air gunner or wireless operator. The Recruiting Officer in London wrote that John was a, *Clean cut boy, smart and intelligent, good appearance, composed and manly bearing, keen and alert, will develop under training into first class material for air crew.*

From the Recruiting Centre in London, John Yorke was initially posted to several Manning Depot's (MD): #2 MD in Brandon, Manitoba; #1 MD in Toronto; and #4 MD in Quebec City. In June 1941, he began his air training at #3 Training Command in Montreal; and then at #4 Wireless School (WS) in Guelph, Ontario. In May 1942, he continued his training at #3 Bombing and Gunnery School (B&GS) in MacDonald, Manitoba where he was awarded his Air Gunner's Badge on June 8, 1942. He continued his training at #33 Air Navigation School (ANS) in Hamilton; and then at #5 Bombing and Gunnery School (B&GS) in Dafoe, Saskatchewan. In late October he received a 14-day pre-embarkation leave. In mid-November 1942, he was transferred to #31 Operational Training Unit (OTU) in Debert, Nova Scotia. He received another 14-day leave during the first two weeks of February 1943 and was then posted to #1 Y Depot in Halifax.

John Yorke embarked overseas from Halifax bound for the United Kingdom on March 8, 1943. Arriving on March 17, he was first posted to #3 Personnel Reception Centre in Bournemouth. On June 1, 1943, he was transferred to #1 (Coastal) Operational Training Unit (OTU), based at RAF Thornaby. Just over two months later, on August 12, 1943, he was transferred again and became a member of RAF #233 Squadron "Fortis et Fidelis" (Strong and faithful), with the rank of Warrant Officer Class I and Wireless Operator/Air Gunner.

No. 233 Squadron was formed in May 1937 as a general reconnaissance squadron equipped with the Avro Anson. In August 1939, the squadron moved to Scotland and began to convert to the Lockheed Hudson, a twin-engine light bomber. After the German invasion of Norway in April 1940, the squadron began to fly anti-shipping sweeps off Norway and to attack enemy airfields. This continued until December 1940 when the squadron moved to Northern Ireland and began patrolling in the North Atlantic. In August 1941, the squadron moved to RAF St. Eval in Cornwall, England to carry out patrols over the Bay of Biscay. In December 1941, a detachment was sent to Gibraltar (British territory on Spain's south coast) and the rest of the squadron joined it in July 1942.

Joining RAF #233 Squadron in Gibraltar in August 1943, John Yorke took part in anti-submarine operations in the Mediterranean area. Part of **Mediterranean Air Command** and still flying Lockheed Hudson aircraft, the

squadron moved its base to Lagens in the Azores in October 1943. Just months earlier, the British had negotiated with the Portuguese government for the rights to have bases in the Azores islands, though Portugal remained neutral throughout the war. John Yorke went to the Azores with the first planes to be assigned to duty there after Portugal gave rights to bases there for the Allies.

Only four months after becoming a member of RAF #233 Squadron, Warrant Officer John Yorke was killed in action. On December 13, 1943, Yorke and his crew were aboard their Hudson FK 735 aircraft that was returning from an anti-submarine patrol. On that day, at approximately 16.45 hours, their Hudson aircraft flew into high ground in very low clouds five miles west of RAF Station Lagens, on the island of Terceira in the Azores. John Yorke received multiple injuries and was killed instantly in the crash. His body was brought to 247 Group (Unit) Hospital on that day. His remains were buried on December 17, 1943 in the Allied Forces Cemetery in Terceira, Azores, his grave marked by a wooden cross with a painted inscription. Perishing with John Yorke were WO. Willis Elnor Ross Machan; and FS.s G.F. Handel (RAF), and A.H. Severn (RAF). John Yorke's death was later officially recorded as, *Killed during air operations, overseas (Azores)*.

In mid-January 1944, a memorial service for John Yorke was held at the United Church in Sombra. The church was filled to capacity as well as the adjoining Sunday school room. The service was conducted by Rev. J.B. Batten of the Anglican Church, assisted by Rev. J.R. Peters, pastor of the church. The service opened with the singing of "Onward Christian Soldiers" during which the school mates of the young airman marched into the church. A former pastor, Rev. R.E. Southcott of Rodney, who knew the young airman personally also paid tribute to him. The Reverend's talk was followed by the playing of "Reveille" and "The Last Post". John Yorke was Sombra's first casualty of the war.

In June 1945, Robert and Margaret in Sombra received a War Service Gratuity of \$392.52 for the loss of their younger son. John Yorke, 22, is buried at Lajes War Cemetery, Azores Region, Portugal, Row A, Grave 9. On his headstone are inscribed the words, GREATER LOVE HATH NO MAN THAN THIS, THAT A MAN LAY DOWN HIS LIFE FOR HIS FRIENDS.

ZIERLER, Isaac Buck (#J/40890)

Isaac "Bucky" Zierler had almost obtained a degree at the University of Toronto when he decided to enlist at age twenty in his fourth year of studies. He joined the RCAF in 1943, and his post-war plans were to resume his studies at university. Sadly, the athletic and academic Sarnian never got the chance. Approximately one month before the war in Europe officially ended, Isaac Zierler, 23, was killed in a bombing mission over Germany.

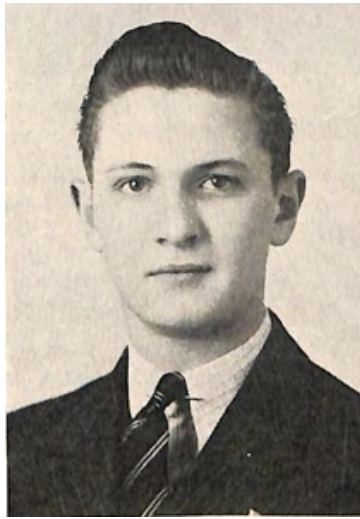

Isaac "Bucky" Zierler was born in Sarnia on March 20, 1922, the son of Abraham and Leah (nee Rathman) Zierler. Abraham and Leah Zierler were both born in Galicia, Poland and were married on June 11, 1911 in Kalusz, Poland. Thirty-two-year-old Abraham Zierler, born about 1889, and Leah immigrated to Canada aboard the SS *Canada* arriving in Quebec on September 18, 1921. They had no money but were determined to make a home in Canada. Abraham's brother had paid his passage over and he arrived with only \$20.00. Determined to reside with his brother, Max, in Sarnia, Abraham found work as a farm labourer and eventually made it to Sarnia to join Max at 145 Front Street.

Abraham eventually became a furniture merchant in Sarnia where Leah and he raised their three sons: Isaac, David Solomen, and Samuel. Tragically, Samuel drowned when he was fourteen. The Zierler family lived at 233 Davis Street and provided much for their children. Isaac was educated in Sarnia, attending Wellington Street (1927-1929); George Street (1929-1931); and Lochiel Street (1931-1934) public elementary schools. He then attended Sarnia Collegiate Institute from 1934 to 1939. Isaac was very active in sports, especially boxing, rugby and basketball, along with baseball, hockey, golf, lacrosse, tennis, swimming and riding. His hobby was music.

In 1939, Isaac attended the University of Toronto in the Commerce and Finance Program. At university, he was extremely busy. He played rugby, was the Athletic Director at the University College, and was the president of his Pi Lambda Phi Fraternity. He won the Reverend Cody Award for his athletic achievements and the Jewish Gold Key Award of the Jewish Inter-Fraternity Council for his "scholarship, leadership, character and games" and for being an outstanding scholar and athlete among the fraternity men on campus.

From September to November 1942, Isaac served with the Canadian Officers Training Corps (C.O.T.C.), the University of Toronto contingent, where he attained the rank of Sergeant. He had a number of jobs before enlisting,

including a porter on the *Noronic*, Canada Steamship Lines in the summer of 1940; an accounting clerk with Imperial Oil Limited in Sarnia in the summer of 1942; and other jobs during summer and Christmas vacations including being a store cashier/clerk and truck driver.

Isaac Zierler 1939
SCITS – Business Manager

In June 1943, Isaac, 20, was expected to earn his Bachelor of Commerce degree after four years at U of T, but he enlisted in the Royal Canadian Air Force on January 7, 1943 in Toronto. He stood five feet nine inches tall, had hazel eyes and dark brown hair, was single, and was residing at 158 St. George Street in Toronto at the time as a graduate student (though he recorded his permanent address as 233 Davis Street, Sarnia). He stated his motivators for serving included his friends and his eagerness to fly. He requested flying duties. His plan for after the war was to take post-graduate work at U. of T., leading to work in the field of personnel management.

From the Recruiting Centre in Toronto, he was posted to #1 Manning Depot in Toronto; and then #9 Pre-Aircrew Education Detachment (PAED) at McGill University. He began his air training at #3 Initial Training Centre (ITS) in Victoriaville, Quebec; and then at #4 Air Observer School (AOS) in London, Ontario. Isaac Zierler was awarded his Navigator's Badge and commission as a Pilot Officer on January 28, 1944 at #4AOS. Isaac then received a 14-day pre-embarkation leave. In mid-February 1944, he was stationed at #2 Aircrew Graduate Training School (AGTS) in Quebec. The next month, he was posted to #1 Y Depot in Lachine, Quebec.

Isaac embarked overseas from Halifax bound for the United Kingdom on April 29, 1944. Arriving on May 7, he was initially posted to #3 Personnel Reception Centre. In mid-May of 1944, Isaac sent his mother Leah a Mother's Day greeting from overseas. The next month, he was transferred to #8 (Observers) Advanced Flying Unit (AFU), and a month later in mid-July he was transferred to #24 Operational Training Unit (OTU). In October 1944, he was transferred to #1664 Conversion Unit (CU). Less than three months later, on January 6, 1945, Isaac became a member of RCAF #433 Porcupine Squadron "Qui S'y Frotte S'y Pique" (Who opposes it gets hurt), part of **Bomber Command**, with the rank of Flying Officer-Navigator.

During the course of the war, one of this country's most significant contributions was the approximately 50,000 Canadians who served with the RCAF and RAF in Bomber Command operations. Next to Britain, Canada was the largest contributor to Bomber Command, making up more than a third of all of Bomber Command personnel. The men who served in Bomber Command faced some of the most difficult odds of anyone fighting in the war.

RCAF #433 Squadron, part of No. 6 (RCAF) Group, was formed on September 25, 1943 at RAF Skipton-on-Swale, Yorkshire, England. The squadron acquired the nickname "Porcupine" because the unit was adopted by the Porcupine District of Northern Ontario. Originally equipped with Handley Page Halifax aircraft, in January 1945, the squadron converted to Avro Lancaster aircraft, the British four-engine heavy bomber.

In early March 1945, Isaac Zierler sent his mother Leah a bouquet of flowers. The following month, on April 10, Isaac Zierler was killed in action while a member of the crew aboard Lancaster MK. I aircraft PB903 (markings BM-F). The aircraft took off from Skipton-on-Swale at 13.13 hours to carry out a day bombing mission detailed to attack the Engelsdorf and Mockau railway yards in Leipzig, Germany. On that evening, their Lancaster was hit by

predicted flak as it approached the aiming point of their target over Leipzig. The starboard inner engine caught fire, but instantly being feathered, the crew extinguished the fire immediately. Witnesses saw the Lancaster lose height to starboard when an explosion flipped the aircraft on its back. The Lancaster then spiralled into the ground, whereupon the bomb load exploded, approximately 15 miles north of Leipzig. Witnesses saw no one parachute from the aircraft.

Flying Officer Isaac Buck Zierler

On April 13, 1945, Abraham and Leah in Sarnia received the following telegram from Ottawa; REGRET TO ADVISE THAT YOUR SON FLYING OFFICER ISAAC ZIERLER J FOUR NOUGHT EIGHT NINE NOUGHT IS REPORTED MISSING BELIEVED KILLED RESULTS AIR OPERATIONS OVERSEAS APRIL TENTH STOP PLEASE ACCEPT MY SINCERE SYMPATHY STOP LETTER FOLLOWS. Less than one month after the Zierlers received this disturbing telegram, the war in Europe ended. Perishing with Isaac Zierler were P/O.s Francis Gerald Seeley, Joseph Michael Hirak, and David William Roberts; F/O.s William Gordon McLeod and Robert James Grisdale; and Sgt. Walter Alfred James Thurston (RAF).

Isaac Zierler's death was later officially recorded as, *Previously reported missing after air operations, now for official purposes, presumed dead, overseas (Germany)*. In June 1947, Abraham and Leah Zierler received a War Service Gratuity of \$383.98 for the loss of their son. Isaac "Buck" Zierler, 23, is buried in Berlin 1939-1945 War Cemetery, Germany, Grave 8.F.9.

Isaac Buck Zierler and thirteen other local men had their names engraved on a plaque honouring fourteen Jewish members of the armed services from Sarnia. The plaque was unveiled in the Ahavas Isaac Synagogue, Davis Street, Sarnia on March 30, 1945. The men, all from Sarnia, honoured on the plaque were M. Berger, S. Bernard, R. Heller, I. Haber, M. Kirk, Dr. I. Mann, A. Rosen, G. Shabsove, M. Skosov, Mitchell Smith, Murray Smith, L. Swartz, I.B. Zierler, Isaac Zierler. Three of the men--Isaac Buck Zierler, Max Berger and Mitchell Smith--made the supreme sacrifice. Isaac Zierler is also honoured in the memorial book "Canadian Jews in World War II".

Prayer for Victory (portion of)

*I stood upon a hill in the fall of the year,
A lovely hill, soft and still green
With the breath of summer.
And the sun reached long golden fingers
Into the valley floor,
And lighted the autumn painted trees
With the fires of God.
This was peace.*

*But over the ridge there was no peace,
Over the ridge was war...
Ghastly and bloody;
The quick and the dead,
Whirling in a mad blasting conflict...
Ripping the skies
And the earth,
And the churning sea...*

*And our men were there,
They were fighting and dying;
Sweating in the desert and the jungles;
Wheeling through the clouds;
Drawing their deadly beads
Under the choppy waves
Of a dozen seas...
This was war...*

Major Dick Diespecker, Canadian Army 1943

THE KOREAN WAR (1950-1953)

Following is a description of important historical events, people and key battles of the Korean War. As in the two World Wars, Sarnia-Lambton's sons participated in every major battle fought by Canadian troops. Some made the supreme sacrifice.

- **THE COLD WAR BEGINS:** The specter of international communism and its spread across the world were always alarming. The Red Menace threat appeared particularly ominous in the 1940s. For example, in Canada in September 1945, Igor Gouzenko walked out of the Russian Embassy in Ottawa carrying 109 documents that revealed the existence of a massive Soviet spy network in North America. Russian espionage activity had been of serious concern in Canada. Six months later, British PM Winston Churchill told the world in a speech that an “**iron curtain**” had descended across much of Europe.

The Cold War refers to a period of time that would begin not long after the end of the Second World War. It would last until the fall of the Berlin Wall in November 1989, and the collapse of the Soviet Union in December 1991. It marked a period of military tensions and distrust between the Western Bloc democratic nations (United States and NATO allies) and the Eastern Bloc communist nations (Soviet Union and its allies). It began with the collapse of the uneasy American-British-Soviet alliance that had won the Second World War, due to differences in ideologies and suspicions of the other side's world plans. Some of the major events that would occur during this time period include: the creation of the “Iron Curtain”; the Berlin blockade and airlift; the formation of NATO; the Korean War; the Warsaw Pact is formed; the Suez Crisis; communist Fidel Castro comes to power in Cuba; construction of the Berlin Wall; the Space Race; the Bay of Pigs (U.S. failed invasion of Cuba); the Cuban Missile Crisis; the Soviet invasion of Hungary and later Czechoslovakia; the Vietnam War; the Strategic Arms Limitation Treaty was signed; the Soviet invasion of Afghanistan; and the reunification of Germany.

- **THE UNITED NATIONS:** The term “United Nations” was first used in January of 1942, during the Second World War, when representatives of 26 nations pledged to continue fighting together against the Axis Powers of Germany, Italy and Japan. The United Nations organization officially began in 1945, replacing its forerunner, the League of Nations that had been created at the conclusion of World War I. As the Second World War drew to a close, a United Nations charter was drawn up by 50 countries, including Canada. The United Nations officially came into existence on October 24, 1945 when the United Nations Charter was ratified. The UN was designed to promote co-operation among sovereign states in which each would give up some of its sovereignty in the common interest of all nations to promote peace, security, economic development, social justice and fundamental human rights and freedoms. The United Nations would first try to impose its will militarily in 1950, when it supported South Korea against North Korea in the Korean War.^{H, 2N, 3W}

- **NATO:** The NATO (North Atlantic Treaty Organization) alliance was signed on April 4, 1949 and included 12 nations; Canada, United States, Iceland, Britain, France, Norway, Denmark, Belgium, Netherlands, Luxembourg, Portugal and Italy. At the core of the treaty was a collective security provision that stated, “an armed attack against one or more of them in Europe or North America shall be considered an attack against them all.” A primary purpose of the treaty was to unify and strengthen the Western Allies' military response to a possible invasion of western Europe by the Soviet Union and its allies.

- **PRELUDE TO WAR:** Korea, known to its people as the “Land of the Morning Calm”—so named because of the softness of the Korean mornings, which is due in part to the mists that cover its mountains at that time of day—became the flashpoint that turned the Cold War hot.

Korea had been a unified nation since the 7th century. Japan occupied it in 1905 and annexed it five years later as part of its empire, but the kingdom was still undivided. In late November 1943, while the Second World War was still raging, the **Cairo Conference** (codenamed *Sextant*) took place in Egypt. Attending the conference were British Prime Minister Winston Churchill, American President Franklin D. Roosevelt and Generalissimo Chiang Kai-shek of the Republic of China. The tense four-day discussion focused on redrawing the world map in anticipation of the end of the war. Their joint declaration included, among other things, that following victory over Japan, “Korea shall become free and independent in due course.” President Roosevelt died in April 1945. His successor, Harry Truman, in August 1945 (as the war drew to a close) suggested that in Korea the Soviets receive the surrender of Japanese forces north of the 38th parallel, and that the Americans receive the surrender of Japanese troops to the south. That seemingly innocuous agreement sealed Korea's fate. The Soviets took the surrender arrangement as a

granting of territorial rights. Suddenly in 1945, there were two Koreas.^{9Y, 9Z}

So in 1945, the Soviet Union occupied North Korea, the United States took over control in South Korea, and the **38th parallel**, from coast to coast, was the dividing line. The split angered Koreans on both sides. It was assumed by both US and USSR governments that their occupation would be temporary and that a unified, independent country would eventually be formed. Over the next several years, the Russians in the north began building both an army and a government they could control, while in the south, the Americans were unable to make great strides in developing a stable form of government. All the while, attempts to negotiate Korean independence failed. Both the Soviet Union and the United States were active members of the UN, where each publicly accused the other of dragging its feet on withdrawal, while quietly training, fortifying and arming Koreans on its side of the divide.

By mid-1948, in the north, the Russians established, and armed, a communist regime—the **Democratic People’s Republic of Korea**; while in the south, the United States set up a shaky democratic state—the **Government of the Republic of Korea (ROK)**. The Soviet Union completed its troop withdrawal in December 1948, and the last American troops withdrew to Japan in June 1949.

Though the desire for a unified Korea remained strong, trouble soon flared up along the border as both sides claimed the right to rule all of Korea. Border fighting became nearly an everyday experience. North Korean patrols began to invade the southern Republic and the United Nations (UN) Commission repeatedly warned of impending civil war. In his New Year’s message for 1950, North Korea’s premier Kim Il Sung vowed to liberate the south, entreating his “People’s Army, frontier defence troops and the police to complete preparedness for war... Long live unified Korea!”^{9D, 2N, 6P, 6R, 9Y, 9Z}

In Canada: When World War II ended in 1945, Canadians looked forward to post-war reconstruction—with families to start, homes to establish, and new lives to be lived after enduring almost a decade of economic depression followed by the war. The wartime measure of rationing was finally abandoned in August 1947; the trade union movement had grown considerably resulting in increased salaries; in almost every city, new “sub-divisions” were created during the post-war housing boom; though radio was still the primary form of home entertainment (television broadcasting did not begin in Canada until September 1952).

The Canadian government introduced universal Mothers’ Allowances and a comprehensive program of veterans’ benefits from free education to generous pensions for the wounded. The government needed the funds to pay for the new programs and promises, and had to pay off the massive debt. One way to do that was to shut down military spending and ramp up social spending. The defence budget and the three armed services were cut to the bone between 1945 and 1947. From the over 400,000 men and women at the end of the war, Canada’s military shrank to 34,000 who were specially trained for the defence of Canada. Canadians, a nation of fourteen million, were in no mood for another war. It is doubtful if many Canadians in the early summer days of 1950 even knew where South Korea was.^{9Y}

• **THE KOREAN WAR BEGINS (also referred to as the Korean Conflict):** Only five years after the end of World War II, the Korean War broke out at four o’clock in the morning of June 25, 1950. Approved in advance by the Russian and Chinese governments, the Soviet-trained and equipped army of North Korea crossed the 38th Parallel invading South Korea, an overt attempt to unify Korea by force. The North Koreans launched a full-scale invasion pouring over 110,000 troops, 1,400 artillery pieces and 126 T-34 tanks across the 38th Parallel into South Korea toward the capital city of Seoul.

World reaction to this first act of aggression since the establishment of the United Nations Organization was swift. At the request of the United States, the UN Security Council met on the afternoon of June 25, and all members (by a 9-0 vote) called for an immediate cessation of hostilities, and a withdrawal of North Korean forces. The Soviet delegates, who were boycotting the meeting, challenged the authority of the UN Security Council to take action on the invasion in their absence. It was soon evident that the North Koreans had no intention of complying with the United Nations (UN) demands. US president Harry Truman stated, “I wasn’t going to let this attack on the Republic of Korea... go forward. Because if it wasn’t stopped, it would lead to a third world war. And I wasn’t going to let that happen... For the first time in history, an aggressor [was] opposed by an international police force [to] save the free world.”

By June 28, the UN had voted to endorse the action already taken by the United States (for their navy and air force to “support the Republic of Korea... but only south of the 38th parallel”), and for its members to “furnish such

assistance to the Republic of Korea as may be necessary to repel the attack and restore international peace and security in the area.” These words took Canada to war.

The UN responded with a call to its members to form a multinational “**police force**” under the command of the United States to restore the peace. A total of sixteen UN member nations would join forces to resist the aggression, under the command of World War II hero and five-star **General Douglas MacArthur** of the United States. Canada’s contribution, exceeded only by that of the United States and Britain, demonstrated her willingness to uphold the United Nations ideals and to take up arms in support of peace and freedom.

Meanwhile, the North Koreans were pushing rapidly forward through the valleys and rice paddies of the Korean peninsula armed with Soviet tanks, weapons and vehicles. They surprised and quickly overwhelmed the lightly armed, inadequately trained and under-strength South Korean forces. The South Korean capital, Seoul, was occupied on June 28, and by the first week of August the South Korean and initial United States forces had retreated and were confined within the “**Pusan Perimeter**,” a small area in the southeast of the peninsula. Here three U.S. divisions, along with five South Korean, attempted to hold out against 15 North Korean divisions and one armoured brigade, and were now in danger of being driven into the sea. Fierce battles took place in August and early September 1950 to hold a perimeter around Pusan.^{H, 4A, 6P, 6R, 9Y, 9Z}

Note: With changes in the Korean alphabet, Pusan now reads Busan.

• **CANADA RESPONDS:** In late June, it was a California senator who first used the phrase “**police action**” as it came to be applied to the Korean War. The senator felt that because North Korea had broken international law by invading the South, the actions of the U.S. were akin to the actions of a police officer who might follow a criminal after a crime had been committed. US President Truman and Canadian Prime Minister St. Laurent would use the phrase the same week.

By the afternoon of Sunday, June 25, news of the events in Korea had been picked up by radio stations across Canada, and listeners heard bulletins during the day that there was a war in a country that most knew nothing about. The June 26, 1950 *Sarnia (Canadian) Observer* front page read, “Korea Reds Push Near Capital – North Urges ‘Surrender’ In Broadcast.” Sarnians learned that North Korean Communist forces had pierced through two full divisions to the outskirts of Seoul and were demanding the surrender of the South Korean army. An estimated 6,000 had been killed or wounded on both sides, and the United States was immediately sending planes and material.

On June 30, 1950, Prime Minister Louis St. Laurent declared that Canada would not participate in any war against another state, but it would take “part in collective police action under the control and authority of the United Nations for the purpose of restoring peace.” The Canadian Government and Prime Minister St. Laurent, while agreeing in principle with the moves made to halt aggression, did not immediately commit its forces to action in Korea. The message that filtered down to many Canadians was that the country would soon be in the war. On June 29 in Toronto for example, local recruiting offices were swamped with men wanting to join the army and go off to Korea to fight.

On August 7, 1950, as the Korean crisis deepened, Prime Minister St. Laurent announced on CBC Radio that Canada would recruit an expeditionary brigade of 5,000 men for duty in Korea. In order to enlist, men had to be physically and mentally fit, preferably veterans, and between the ages of 19 and 35, although tradesmen and married men could be as old as 45. Many of the traditional motives for joining the forces were at play in Canada that summer of 1950, including: seeking adventure; seeing the world; securing work; making up for missing out on the previous war; feeling patriotic; a need to prove oneself; following in the footsteps of a relative from a prior war; escaping small-town life; fleeing debts, family or the law; and to fight communism. By August 18, recruitment had reached the 5,000 mark, and based on the recommendation of the chief of the general staff, Cabinet told recruiting depots they could take up to 10,000 men.

The brigade would become part of Canada’s active regular army (not reserve) and would be known as the **Canadian Army Special Force (CASF)**—later named the **25th Canadian Infantry Brigade Group**. It was to be “specially trained and equipped to be available for use in carrying out Canada’s obligations under the United Nations Charter or the North Atlantic Pact”. Since the ground action wasn’t expected to last very long, Canadian officials believed the troops should be signed for 18 months, allowing five months for training, 12 months in the combat zone and a month to kick about. Everyone who joined was given a bonus of \$50 on enlistment.

Before proceeding overseas, the citizen volunteers, a number of them veterans of Italy and Northwest Europe

had to be trained anew. Training stations were at Chilliwack, Shilo, Borden, Calgary, Wainwright (PPCLI), Petawawa (RCR), and Valcartier (R22ndR). Of the 8,000 who enlisted in the first two months of the Special Force recruitment, more than 2,000 were discharged and more than 1,500 deserted. In the earliest days of the Special Force, problems included: insufficient troop transport; barracks without blankets; shortages of equipment, uniforms and boots; and accommodations that were substandard.

As fall approached and the weather became cooler, defence headquarters in Ottawa started looking for alternative sites where the CASF could complete its preparations for war. Japan and the island of Okinawa were both suggested and rejected, before deciding on Fort Lewis, a large military camp in Washington state. By mid-November, over 5,000 ranks had arrived at the camp.

First Over: The first Canadian military aid was made by the Royal Canadian Navy less than two weeks after the outbreak of hostilities. Three Tribal Class destroyers, named after Native Canadian tribes—*HMCS Cayuga*, *Athabaskan* and *Sioux*, anchored at Esquimalt, B.C. had been slated to rendezvous with three ships in Halifax in late summer 1950, and cross the Atlantic for manoeuvres in Europe. The plan changed on July 5, when the Canadian government placed its Pacific fleet under UN command for duty in the waters off Korea. So on July 5, parents, families, wives and sweethearts gathered to bid tearful farewells to the men as the three ships slipped from their moorings and sailed away to war in the Far East. In the mid-afternoon of July 30, 1950, the three ships arrived into the port of Sasebo, Japan. Sasebo harbour, approximately 100 nautical miles from Korean waters, would be the RCN's home away from home for the next thirty-seven months of fighting.

Also in July, the Royal Canadian Air Force No. 426 (Thunderbird) Squadron, was assigned to air transport duties with the United Nations, ferrying troops and supplies to the Far East. The real demand from the UN was for ground troops. The difficulty for Canada was that in 1950, the army was small, they lacked modern equipment, and the soldiers still used Second World War tanks, artillery and machine guns. On July 27, the US government sent a message to the prime minister requesting a Canadian brigade join UN forces in Korea (Britain, Australia, New Zealand and South Africa had already announced plans to send troops and equipment).

Canada's contributions would grow to include more than 26,000 volunteers, including sailors from eight destroyers; airmen who took part in combat and transport missions; and army battalions that included the Royal Canadian Regiment, the Princess Patricia's Canadian Light Infantry and the Royal 22e Regiment, along with army artillery and service corps.^{D, H, 2E, 2N, 5W, 6P, 6R, 7A, 9Y, 9Z}

• **SARNIA RECRUITS:** In late July of 1950, the Sarnia Armory announced that following receipt of orders from Western Ontario Area Headquarters in London, intensive recruiting for the Canadian Army would begin. Recruits were needed for both the active force and for the reserve units of the Canadian army in response to the outbreak of war in Korea. When Staff Sergeant A.G. Spooner, in charge of the local recruiting drive, was asked if he expected many recruits in the area, he replied, "It certainly looks like it. I got inquiries one on top of the other, just as soon as the *Observer* got onto the street, last night and they started again this morning, almost as soon as I opened the doors at nine o'clock." The prospect of possibly going to Korea, Staff Sergeant Spooner felt, might attract a number of adventurous youngsters. He added, "Though goodness knows, a lad joining the permanent force and electing for a parachute unit would get about as much adventure as he'd ever need."

For their part, the Canadian Army was facilitating the enlisting of recruits. Potential recruits, for example, were being told that the standards for entry to the active force had been considerably reduced; for instance, where previously a recruit was required to have grade 10, and sometimes grade 12 educational qualifications, recruiting officers had now been ordered to take grade 8 qualifications. Sarnia recruits were sent to London for a medical examination, received a refund of their fare from Sarnia, and if they qualified, they were in. A number of Sarnia-Lambton youths also reportedly joined the United States forces at recruiting stations in Port Huron and Detroit, the idea being that there was a better chance of getting into the fray faster via the American forces.^N

In early August 1950 when Prime Minister St. Laurent announced that a special Canadian force of ground troops would be raised for service in Korea, the government stated that because of the world crisis, they would take "all the qualified men" they could get, with no set limitation on the number of men enlisted in the regular and reserve forces. On August 8, 1950, a full page ad appeared in *The Sarnia Observer* with the headline; THE CANADIAN ARMY NEEDS MEN NOW! – For the Canadian Army Special Forces. The special volunteer brigade was being raised "to meet aggression in accordance with the United Nations Charter and the North Atlantic Treaty." Enlistment standards were that recruits had to be physically fit, mentally alert, between the ages of 19 and 35 inclusive (19 to 45

for tradesmen), and either single or married. Preference would be given to veterans of the last war. Canada promised to provide pensions, care for the wounded, veterans' benefits and a guarantee that the men would get their jobs back. A private on entry into the army would receive \$122 monthly in basic pay and a subsistence allowance, with an additional \$30 monthly if married. Men were needed for the Infantry (Royal Canadian Regiment, Princess Patricia's and the "Van Doos" Royal 22 Regiment); Artillery (2nd Field Regiment Royal Canadian Horse Regiment); Army Service Corps; Electrical and Mechanical Engineers; and the Medical Corps.

In the first day following the publication of the above advertisement, the Sarnia Armory reported being besieged by applicants eager to join the Canadian Infantry Brigade. Staff Sergeant A.G. Spooner said he was "swamped." He added, "I think the majority of the men who came in here, went straight off to London after an interview." Canadian army headquarters in London stated that more than 60 Lambton district men were handled during the first two hours of recruiting, including forty from Sarnia.^N

In late August of 1950, the *The Sarnia Observer* featured a story on what was believed to be the first known Sarnian to have been in action in Korea. **Eddie Doyle**, whose parents, Mr. and Mrs. J.A. Doyle of 124 North Mackenzie Street, spent his 21st birthday, August 2, in action against the North Koreans with the 1st Cavalry Division, U.S. Army. Eddie Doyle was born in Detroit, but was educated at Lochiel Street School before working for Electric Auto-Lite and the Lambton Awning and Canvas Company. Eddie enlisted in the U.S. Army in January 1949. After training in Kentucky and being posted with the first Cavalry Division, Eddie and his division were hastily sent to Korea in May 1950. He landed at Taejong, May 16, and had gone into battle immediately. In a letter to his parents in Sarnia he wrote, *"We didn't know it but we were surrounded. I spent my 21st birthday in the thick of the fighting. I dug so many foxholes, I don't remember."* He didn't think much of the country he was in—it was terribly hot, *"Oh, for some blueberry pie and iced tea"* he wrote.

• **UNITED STATES INVADES KOREA:** In mid-September 1950, the military situation in Korea was dramatically reversed. The UN forces, confined within the Pusan Perimeter, were still being hard-pressed when a daring amphibious assault led by U.S. forces was launched at Inchon, the port of Seoul in the **Battle of Inchon**. Over 75,000 troops and 261 naval vessels, including Canada's three RCN destroyers, launched the amphibious invasion on September 15, 1950. The tactically brilliant amphibious landing was the largest since D-Day in 1944. US Marines quickly overcame all resistance in the seaport area, and secured Inchon from the North Koreans within twenty-four hours. By September 26, Seoul was re-captured. Meanwhile, other U.S. Army forces had broken out of Pusan through a series of landings in enemy territory, and by the end of the first week in October, they were driving the shattered enemy across the 38th parallel. By the end of October, UN and South Korean forces had advanced well into North Korea, and had taken many prisoners. With the UN successes, the end of the war in Korea seemed imminent, some predicting the war would be over by Christmas. General MacArthur was confident enough of victory to suggest that "Canada might prefer to send [a] small token force to show the flag."^{9Y, 9Z}

Effect on Canada: Following the Battle of Inchon and the UN successes in September and October 1950, with the tide turning in Korea, for a time it looked as if Canadian ground forces would not get to Korea before the war ended. It was decided that Canada would only send one battalion to the Far East, to be used for occupation duties. The unit chosen to go was the 2nd Princess Patricia's Canadian Light Infantry (2PPCLI). The remaining units of the CASF would be sent for further training in Fort Lewis, Washington during the winter and, should they be needed, would embark on ships to Seattle for the Far East.^{D, H, 2N, 4A, 6P, 6R, 9Y, 9Z}

• **TRAGEDY AT HOME:** The move to Fort Lewis was marred by tragedy on November 21, 1950. On that morning, a troop train—seventeen cars long—was steaming its way west through the Rocky Mountains on one of the most remote sections of the CNR system, a little west of **Canoe River**, British Columbia. A railway communications error had directed the westbound troop train on to the same track as a speeding ten-car eastbound passenger express train. At 10:35 a.m., the westbound train carrying 338 troops of the 2nd Regiment, Royal Canadian Horse Artillery, collided head on with the passenger train. The modern and much heavier steel passenger train heaved the engine of the army train into the air and tossed it backwards and down on the coaches behind it. Several cars were thrown from the rails and the troop train wood coaches buckled like cordwood as steel cars smashed into them. In the carnage of shattered steel, splintered wood, broken glass, many of the soldiers were scalded when steam heating pipes broke in the coaches. Some were trapped in the wreckage, some were scattered about, and others had been dismembered. Trying to assist those crying for help was complicated by the 15 degree below zero Fahrenheit temperature, deep snow and there were no medical supplies on board the troop train. It took three hours before a hospital train arrived

from Jasper. Seventeen Canadian artillerymen were killed (four of the soldiers bodies were never recovered), the four engineers (two from each train) died, and another fifty-two soldiers and six CNR crew were injured in the train collision.^{D, H, 6P, 6R, 9Y, 9Z}

• **THE ENEMY’S TACTICS CHANGE:** After the successful invasion at Inchon, and the advance of UN and South Korean forces well into North Korea in October 1950, complete victory seemed imminent. However, the North Koreans were employing a tactic of withdrawal and retreat, to fortified positions in the mountains. A captured North Korean officer described the strategy this way: “We withdrew because we knew that UN troops would follow us... and spread their troops thinly all over the vast area... the time came for us to envelop and annihilate them.”

China enters the war: At the end of October 1950, with Soviet encouragement, Chinese armies crossed the Yalu River into North Korea, driving UN forces back south. Conducted at night, with great secrecy, these large-scale Chinese movements had gone undetected by UN forward troops and air reconnaissance units. Unsupported reports by prisoners of a massive build-up were not believed.

China, in support of North Korea, unexpectedly launched a major offensive in November as China’s **People’s Liberation Army**, a force with an approximate strength of 180,000 men, retook much of the lost territory within weeks as UN forces retreated to and below the 38th parallel. In western North Korea, the Eighth US Army was in full flight back to P’yongyang, the longest retreat in US military history, nicknamed the “**Big Bug Out.**”

The New Year would open with another crushing Chinese offensive, and by January 4, 1951, Seoul again fell to the communists.^{9Y, 9Z}

• **CANADIAN TROOPS ARRIVE OVERSEAS:** The first contingent of Canadians to leave for Korea was the 2nd Battalion of the Princess Patricia’s Canadian Light Infantry (2PPCLI), commanded by World War II veteran Lieutenant-Colonel Jim R. Stone (today, “Big Jim” Stone is revered by many in the PPCLI as the greatest Canadian soldier who ever fought). On a rainy Saturday, November 25, 1950, nine hundred plus members of the Patricia’s set sail from Seattle across the Pacific. At that time, the war looked to be nearing its end as the North Korean forces had been pushed back almost to the Chinese border. At first, it was uncertain whether or not Canadians, which had yet to do any serious advanced training, would see combat. It was estimated that the battalion would be ready for action, if needed, by March 15, 1951. It was on board the US built Liberty-class ships crossing the Pacific that average Canadian soldiers learned about some basic differences between themselves and their American counterparts. Most of the GIs were draftees, conscripted by US selective service legislation, while most of the Canadian servicemen were enlistees.^{9Y, 9Z}

After enduring a rough twenty-day voyage in a crowded ship across a heaving ocean, on December 14, 1950, the Canadian’s ship pulled into Tokyo Bay and tied up at the port of Yokohama. By the time the Canadian’s ship reached its destination, the war situation in Korea had completely changed. Instead of doing “occupational duty” or time to acclimatize and train, the emphasis had shifted to the speed with which the battalion could be thrown into action. Private Michael Czuboka recalled that on their voyage across the ocean, “*About halfway across the stormy Pacific, we were told that the Chinese had entered Korea in large numbers and that the United Nations forces were in retreat. We were going to a full-scale war and not occupation duties as previously announced.*”

On December 18, the PPCLI boarded trucks and travelled to the city of Mokto, an island on the edge of Pusan. In 1950, Pusan was the second-largest city in the country, though it consisted mostly of mud-huts and endless shacks, the roads were narrow and potholed, and the people were poor. By far the most powerful recollection soldiers had of their first contact with Pusan was “the smell”. Soldier’s descriptions included that human excrement was everywhere (it was used to fertilize the fields), and people were rooting through garbage. Many of the Canadian volunteers thought right then: “What in the world am I doing here?”^{9K, 9Y, 9Z}

The hills of Korea: Up and down the Korean peninsula were cone-shaped, rust-coloured hills that were not the least bit conducive to conventional warfare. Steep, jagged with rocky outcrops, and little natural vegetation except flat, dwarf pine trees, the hills chopped up the countryside. One ridge looked like every other ridge, and beyond each ridge was another, and another, and another. The endless monotony of hills, ranging from 250 to 500 metres and more, were nameless. The Canadians simply numbered them by using their **height in metres**, while the Americans tended to use descriptive names. Much of the Korean War was a “war of the hills”, against an enemy that was both ruthless and elusive, skillful and persistent, often silent and always deadly.

In troughs between the hills were endless winding tiers of rice paddies. Beyond every few ridges was a river

or creek bed that, depending on the season or the variable weather, could be a bone-dry gully one minute, a raging floodway the next, or frozen solid in winter. There was very little space for staging large-scale assaults. The hilltops left even less room from which to defend. A general lack of roads hampered rapid and significant movements of tanks, trucks and mobile artillery. The Korean landscape would dictate the way the war was fought.^{9Y, 9Z}

PPCLI move to the front: Two days after Christmas, the PPCLI battalion moved out of Pusan eighty kilometres north to begin their intensive training in weapons and tactics. Training included extensive hill-climbing, cross-country manoeuvres and battle exercises incorporating their own firearms—.303 Lee-Enfield bolt-action rifles, Bren guns, 81-mm mortars and Vickers medium machine guns.

By February 1951, the Patricias were on the move and had joined the 27th British Commonwealth Infantry Brigade (with two British and one Australian battalion) in a general advance against Chinese and North Korean forces fighting rearguard actions south of the 38th parallel. The Canadians travelled most of the way by truck, about 150 miles. Progress was difficult as hills rose on either side; the narrow up and down roads were terrible with many blind corners and makeshift bridges over gorges to cross; hill positions had to be dug through deep snow; and the weather was bitterly cold. Finally the trucks could go no further, so the troops clambered off, stretched their aching muscles and formed up for the five-mile march to the front lines. Uphill, downhill, through scrub brush, over half-frozen creeks, and over slippery, jagged rocks they advanced when, within a quarter mile of the front on February 19, they stumbled onto something none of them ever forgot.

On that morning, the Canadians came across a **grisly discovery**—littered along the side of the makeshift trail were the broken, bloody, grotesque-looking, half-frozen bodies of 68 black American soldiers. An entire company of American soldiers, ill-trained and ill-prepared, had been ambushed during the night. The Chinese had crept down the valley into the camp and slaughtered the entire company while it slept. Most of the dead were clothed in pajamas or long underwear and almost all were in sleeping bags. All had been shot, bayoneted, or both. From that point, Colonel Stone of the PPCLI ordered that there would be no sleeping bags when troops were in the line, and at night, soldiers were forbidden to pull parka hoods over their heads to hamper their hearing.^{9Y, 9Z}

Once the Canadians found themselves in the line, they began to understand the unpleasantness of war—living 24 hours a day, seven days a week, in hastily dug trenches, sloshing around in soggy snow, with the cold rains of winter pouring down your neck, was far from pleasant. Pierre Berton, a writer for *Maclean's*, described the scene: *“The trenches, waist high, two and a half feet wide, were dug in deep snow and frozen soil. The section was hardly dug in before rain mixed with sleet began to fall... The men's parkas, battledress, and underwear became soaked and then frozen. They crouched into a foot of ice water... Blankets turned to sopping rags.”*^{9Z}

The first battalion objectives for the Patricias included Hills 404, 444, 419 and 532 (while the Australian and British troops fought for Hills 523, 614, 484, and 450.). It was in this area that Canadians first saw **napalm** used against an enemy. This substance, later to gain so much notoriety in Vietnam, is gasoline that is chemically thickened, causing it to spread over the ground while burning. Dropped by attacking aircraft in containers of 100 or 150 gallons, its effects were horrendous and controversial.

In February and March of 1951, the Canadians were thrown into a series of skirmishes and battles chasing Chinese troops northward, not allowing them to break contact or regain strength. Pierre Berton described the advance as, *“slow remorseless plodding from ridge to ridge... clearing mud huts... firing round after round into apparently empty hills... long patrols by day and longer watches by night”*—(that) went on, regardless of weather, casualties, or an elusive, fleeting enemy.^{9Z}

By early April 1951, US forces and the Commonwealth Brigade, including the Patricia's, had reached the 38th Parallel. Later that month, in the valley of the Kapyong River, the communists would begin their spring offensive back into South Korea.^{D, H, 2E, 2N, 5W, 6P, 6R, 9Y, 9Z}

• **THE BATTLE OF KAPYONG, Hill 677:** [Note: With changes in the Korean alphabet, Kapyong now reads Gapyong]

Some of the heaviest fighting Canadian soldiers experienced in the war took place during the Battle of Kapyong in April 1951. The victory here was one of Canada's greatest, yet least-known, military achievements. Some historians feel the against-all-odds triumph by Canadians at Kapyong rivals those at Vimy Ridge and Juno Beach. For two days, a battalion of roughly 700 Canadian troops helped defend a crucial hill in the front lines against a force of about 5,000 Chinese soldiers.^{D, H, 2N, 5W, 6P}

In mid-April 1951, the Chinese withdrew just past the 38th Parallel as part of a plan to lure UN forces into a vulnerable position. On the night of April 22, more than 200,000 Chinese and North Korean soldiers began a major offensive on the UN line. Two regiments of South Korean forces were hurtled back, and when they realized the immensity of the army coming towards them, they simply turned on their heels and fled southward. Intent on recapturing Seoul, the Chinese army advanced south relentlessly preparing to march through the Kapyong Valley, 60 kilometres northeast of the city. About 20 kilometers south of the 38th Parallel, the valley was less than three kilometres across at its widest point, and was dominated by the surrounding hills.

Having arrived only days earlier, the 27th British Commonwealth Infantry Brigade—along with its Canadian contingent—was ordered to dig in and protect the South Korean withdrawal through the Kapyong River valley, and halt the oncoming Chinese offensive. Going up to the line, one PPCLI soldier remembered, *“There was a stream of (South) Koreans heading south and we were heading north. I began to think to myself, ‘Lord Jesus, I am over here supposed to be helping to defend these people and they’re running one way while I am going the other.’ ... I’ve never seen fear and disorganization like those guys going down the road. It was on for hours and it wasn’t all that encouraging.”*^{9Z}

With the Chinese breaking through the first line of defence, all that stood between the Chinese army and the South Korean capital of Seoul was the Canadian PPCLI battalion, an Australian regiment, a New Zealand artillery regiment and a U.S. tank regiment.

The 2PPCLI and the 3rd Battalion of the Royal Australian Regiment were assigned to forward hilltop positions; the Canadians on the west side of the valley on **Hill 677**, and the Australians on the east side, Hill 504. The 700 Canadian troops were ordered to dig in to the steep, rocky, scrub-covered Hill 677 as a large brigade of massing Chinese forces, estimated at nearly 5,000-strong, prepared to attack. Marked by gullies, woods, and uneven terrain, the snow-covered hill was wide making a co-ordinated defence impossible.

The battle of Kapyong began on April 23 shortly after 10:00 p.m. when the Chinese launched their offensive against the Australians and Canadians. The Australians on hill 504 bore the brunt of the initial attack that night. After battling waves of Chinese assault troops for more than sixteen hours, and running low on ammunition, the Aussies were forced to withdraw from Hill 504 in the mid-day of April 24, with 155 casualties. Now, the only infantrymen left to stop the Chinese advance through the Kapyong Valley were the Princess Patricia’s. The PPCLI were deployed in four Company’s across the north face of the hill. Colonel Stone’s specific orders were: “Be steady, kill and don’t give way!”^{9Y, 9Z}

On April 24 at about 10:00 p.m., the communists began their concentrated assaults on Hill 677. Out of the darkness, came the sounds of shrill whistles, bugle blasts, screams, shouts, gunfire and explosions as the enemy advanced up the hill toward the Patricia’s in their slit trenches and behind their parapets (the Chinese launched most of their attacks this way, at night, and in successive waves). Waves of enemy surged forward, outnumbering the 2PPCLI’s almost eight-to-one. Chaos ensued in the close contact fighting, with rifle and machine gun fire, grenades, mortars, and intense bayonet and hand-to-hand combat, some even using their rifles as baseball bats. The relentless human waves of Chinese soldiers surrounded and almost overran some of the Canadian positions. At one point in the battle, 400 Chinese soldiers descended on a single Canadian company of roughly 100 men, but the attack was repelled with numerous examples of valour. Another company of Canadians even called in an artillery strike (by a supporting New Zealand artillery regiment) on their own location to hit the enemy soldiers amongst them. The Canadians took cover while the attackers bore the brunt of 2,300 artillery shells fired in less than an hour. The risky move worked and the enemy was driven off. The desperate fighting continued all that night and into the next day. A Canadian who was there described the situation: *“We were surrounded on the hills of Kapyong and there was a lot of fire. We were pretty well out of ammunition and out of food too. We did get some air supplies dropped in, but we were actually surrounded... that was a scary moment, let me tell you.”*^{1D, H, 2N, 4A, 6R, 9Y, 9Z}

The danger was not yet over and the morning of the 25th, though the Chinese had withdrawn, there was an intermittent exchange of fire, exploding grenades, and bursts of the Chinese burp-guns. Even though the waves of Chinese infantry had stopped swarming the hilltops, the communist forces had nearly encircled the Princess Patricias. With their ammunition and ration supplies depleted, and their supply route cut off, the Patricia’s requested an airdrop. Later that morning, four U.S. Army Air Force C-119’s (flying boxcars) flew over the PPCLI positions at 200 feet and jettisoned pallets with parachutes bearing supplies. While waiting anxiously for a possible enemy re-attack, the 2PPCLI tended to their wounded and recovered their fallen. By the afternoon, American air strikes and patrols from the British Middlesex Regiment had helped to clear the enemy from one side of the Canadians. A supply line

was re-established, and they were eventually relieved on the front line by a battalion of the 1st US Cavalry Division.^{D, H, 2N, 4A, 6R, 9Y, 9Z}

PPCLI honoured: The holding action by the Canadians at Kapyong was vital for brigade defence, and allowed the UN forces to consolidate their troops for the next stage of operations. The Canadians had fought tenaciously against a Chinese army with a much larger force, and inflicted heavy casualties on the enemy (an estimated 1,000 Chinese killed). The heroic efforts of the 2PPCLI and the Royal Australian Regiment did not go unnoticed. Two weeks after Kapyong, the entire 2nd Battalion of the PPCLI was assembled in a field behind the front lines. American general James Van Fleet, the new commander of the Eighth US Army inspected the battalion and read out the United States Presidential Distinguished Unit Citation. The award was the first and only time a Canadian unit had been so honoured. The award reads in part, "...recognition of outstanding heroism and exceptionally meritorious conduct in the performance of outstanding services..." Holding the line at Kapyong was an impressive achievement of skill and courage that cost the Canadians 23 wounded and 10 lost their lives. Today there is a PPCLI memorial on Hill 677, in memory of the epic battle fought there between April 23 and April 25, 1951.^{D, H, 2N, 3O, 4A, 5W, 6P, 6R, 9Y, 9Z}

• **WILLIAM OLDALE (Sarnia):** William (Bill) Oldale was born in Port Arthur (Thunder Bay), Ontario in 1930, the son of Ernest and Ina Oldale. Father Ernest Oldale worked in the mines in Northern Ontario for a time, but when they shut down, he moved the Oldale family to Sarnia in 1941. Ernest Oldale found work at the railroad in Sarnia, and later Imperial Oil. One day in the summer of 1950, twenty year-old Bill Oldale, along with his cousin Paul Densmore, were doing landscaping at his parents home on Lakeshore Road, including the planting of bushes and of sod, using a heavy wheelbarrow with steel wheels. It was on that day that the two of them rationalized that joining the army would be easier. So on August 8, 1950, Bill Oldale, along with his cousin Paul, enlisted in London, Ontario with the infantry as riflemen. Bill's father Ernest was proud of the decision, for the Oldale men had a history of military service, though Ernest himself had been deemed too old to serve in WWII. Mother Ina Oldale was less impressed with Bill's decision.

Private Bill Oldale (1950)

Bill Oldale trained in Calgary, and then the hills of Wainwright, Alberta where they could simulate the hilly terrain of Korea. As part of the Canadian Army Special Force (CASF), his unit embarked overseas from Tacoma, Washington, travelling aboard ship for 28 days, arriving in Pusan, Korea before Christmas 1950. Private Bill Oldale, nicknamed "Red" for his thick, red hair, was a member of the 2nd Battalion, Princess Patricia's Canadian Light Infantry (2PPCLI). They continued their intensive training on the hills at Maryang, Korea. During their acclimatization, one of the changes made was to their footwear. Their leather boots, with spiked cleats on both ends, would slip and skid on the shale, and even create sparks. So the men were issued tank boots, with rubber soles. It was during training in January 1951 that Bill was accidentally shot in the hand by another soldier. He almost lost his finger, but it was saved during his recovery in Japan. After their training, the 2PPCLI were in action, taking part in a series of skirmishes and battles for hill positions.

Then came Kapyong in mid-April 1951. When the 2PPCLI arrived at Hill 677, the steep, wide, snow-

covered hill was unoccupied by the enemy. On April 20, the 2PPCLI were ordered to move up, dig in and hold their positions atop the Hill. Using shovels, picks and spades, they dug their two-man slit trenches and parapets and settled in. Sitting there in the barren landscape, marked by gullies and woods, they couldn't see the enemy, but they knew they were there. Most of the men were in their early 20's, frightened but determined to hold the hill. The platoon sergeants and corporals were older, usually World War II veterans. Bill Oldale fondly remembered one in particular, Sergeant Rushton, who referred to the soldiers of his platoon as "his kids". Before the battle, Sgt. Rushton asked Bill if he was scared. When Bill replied yes, Rushton nodded and said, "Good, you'll be ready then. And anyone who says he isn't frightened, is a liar."

On the night of April 23, the battle began when Chinese troops attacked the Royal Australian Regiment on Hill 504, who bore the brunt of the initial force. After battling waves of Chinese assault troops for sixteen hours, and running low on ammunition, the Aussies were forced to withdraw in the mid-day of April 24. That left the Canadians alone on Hill 677 as a large brigade of massing Chinese forces prepared to continue their attack on them. Like the rest of the Canadians, Bill Oldale didn't wear a helmet, instead a hat and balaclava, and he was armed with his Lee-Enfield (9-pound single bolt action) rifle, five or six grenades, and about 200 rounds of ammunition. On the cold night of April 24, 1951, an anxious Bill Oldale waited in his slit trench, along with the other 700 2PPCLI's.

Suddenly, out of the darkness, came the sounds of shrill whistles, bugle blasts, screams and gunfire as the enemy approached Canadian-held Hill 677. Thousands of Chinese soldiers advanced towards them up the hill, forging into the Canadian lines. Backed by tanks, some of the enemy didn't even have weapons, but many carried Russian-made sub-machine guns. Chaos ensued in the close contact fighting, with rifle and machine gun fire, mortars, exploding grenades, bayonet and intense hand-to-hand combat, some even using their rifles as baseball bats. Waves of enemy continued to surge forward, outnumbering the 2PPCLI's almost eight to one. The Princess Pat's fought on, with no reinforcements, running low on ammunition and supplies. The situation became so desperate at one point that the overwhelmed Canadians ordered the supporting New Zealand artillery regiment to fire on their position. Bill Oldale remembers hearing, "Friendly fire incoming!", and hitting the deck. The Canadians hoped that more of the enemy would be hit than their own troops. Through the hellstorm and carnage that night and into the next morning, the Chinese would eventually withdraw by mid-day April 25. That day, the 2PPCLI tended to their wounded, recovered their fallen, and anxiously awaited another possible attack. It would be another day before they were able to retire back to a rest area, after being replaced by another unit.

Bill Oldale returned home to Sarnia at Christmas in 1952. Physically unscathed, he did have to deal with the mental wounds—suffering nightmares for a while, yelling for his fellow soldiers to be careful and to watch out. The nightmares disappeared and he got on with his life. He married Betty (nee Fyfe) in August 1953, started a family and worked at the railway for a short time before moving on to work as a millright for many years in Chemical Valley. Bill Oldale, like the rest of the 2PPCLI's (and its support groups), along with the Royal Australian Regiment, would be awarded the United States Presidential Unit Citation—the first and only time a Canadian unit had been so honoured. Bill Oldale passed away in Sarnia in April 2018.^{2y}

• **CHANGING UN TACTICS:** By the end of March 1951, the Chinese winter offensive had been stopped and the UN troops were pushing into North Korea. For the second time in the war, the question of how far north the UN armies should advance was debated. For U.S. President Truman and within the higher levels of command, and among most members of the United Nations Command, crossing the 38th parallel became an issue. If the UN forces were to remain in Korea, there were two courses of action open to them:

The first was to try for complete victory, which would require reinforcements, and authorization of operations beyond Korean borders, particularly air strikes against Chinese bases. This is the position that United Nations commander General Douglas MacArthur advocated, even extending the war to Communist China. In the early days of the war, MacArthur had devised some brilliant strategies and military maneuvers that helped save South Korea from falling. Now, MacArthur asked for more and more troops and the ability to bomb military targets so that he could "win the war."

The second option was to accept a "stabilization of the military position" —for the peaceful withdrawal of Chinese forces from Korea and re-establishing the 38th parallel as the stalemate line and hope that UN peace negotiations might end the conflict. United States President Harry Truman and the majority opinion in the United Nations, including Canada, favoured this latter option, the concept of a "limited war".

In mid-March 1951, General MacArthur openly contradicted the foreign policy of the President Truman and

called upon the Chinese to surrender unconditionally. This defiance played a key role in Truman's controversial decision to fire General MacArthur from his command on April 11, 1951. Reactions to the firing among politicians, military officers, business tycoons and leaders around the world was one of shock and contention. In Canada, "the general feeling in Parliament," wrote Lester Pearson, "was one of relief." In his broadcast shortly after to the American people, Truman explained his position against an all-out war in a radio broadcast, "... *by fighting a limited war in Korea, we have prevented aggression from succeeding and bringing on a general war... We are trying to prevent a world war – not to start one.*"^{6R, 9Y, 9Z}

• **REST OF CANADIAN TROOPS SET SAIL:** After the PPCLI had left for Korea in late November 1950, the remainder of the CASF, renamed the 25th Canadian Infantry Brigade Group, remained at Fort Lewis, Washington, and continued their training. On April 19, 20 and 21, 1951, the rest of the Brigade set sail from Seattle aboard troopships. The 25th Canadian Infantry Brigade was comprised of units that included the Second Battalion of the Royal Canadian Regiment (RCR), the Royal 22e Régiment (the "Van Doos"), the Royal Canadian Engineers, the Royal Canadian Dragoons and the Royal Canadian Horse Artillery. While at sea, among the bits of news that they would receive were the results of a new Canadian census reporting a population of just over 14 million; reports of the Princess Patricia's epic stand at Kapyong; and that US President Truman had fired the UN commander-in-chief, Douglas MacArthur.^{9Y}

The rest of the 25th Canadian Infantry Brigade arrived in Korea between May 4-6, 1951, with the fighting troops offloading at Pusan. Changing events at the front only allowed the Canadians only a short period of acclimatization and training—acquainting them with battle tactics in the hilly country and getting them used to some additional American weapons. After approximately a week of climbing the hills around Pusan, the brigade moved north to the front. By then, the communists spring offensive had collapsed and the Chinese had mostly withdrawn north of the 38th parallel, attacking only when their strength was replenished. The UN operation consisted of "a movement forward of regimental groups in line abreast against opposition."^{2D, 2N, 6P, 6R, 9Y}

• **THE ATTACK ON CHAIL-LI and HILL 467:** The Royal Canadian Regiment's first serious engagement was in the early morning of May 30, 1951—the attack on the village of Chail-Li and Hill 467 (Kakhul-bong), a critical feature for the Chinese. The operation began in a driving rainstorm, and initially, three of the four companies reached their objectives with relative ease. However "D" Company, climbing the steep slopes of the main objective, Hill 467, were met with strong resistance and heavy machine-gun fire, and suffered casualties. As the day progressed, all the RCR Company's were forced to withdraw from their positions due to enemy counter-attacks that included relentless small arms, machine-gun, mortar and artillery fire. Though they had failed to achieve their objectives, the Canadians acquitted themselves well in their first major action; their casualties testified to the sharp engagement that was fought—54 wounded and six killed, including one young soldier from Sarnia—**Patrick O'Connor**. All Canadian casualties were recovered and rescued from the scene, leaving no soldier behind.^{6D, 6P, 6R, 9Z}

Sarnia's first fallen soldier: In late May of 1951, the reality of the Korean War hit home in Sarnia with the May 31, 1951 *Sarnia Observer* front page headline, "Sarnia Man, 27, Father of Two, Dies in Korea." Private Patrick O'Connor, was the son of James Philip and Angela Loretta O'Connor of Cameron St., Sarnia, and the husband of Vera Irene O'Connor and father of two young children, both under the age of four, residing on Oak St., Sarnia. Patrick had an older brother, James Michael Barry O'Connor, who had been a member of the Royal Canadian Air Force during World War II. James Barry O'Connor, a member of Bomber Command, lost his life aboard a Halifax bomber in April 1943. James Barry O'Connor's story is included in the WW II section of this Project on page 904.

Private Patrick O'Connor, who was a World War II Navy veteran, enlisted to fight in Korea and became a member of the Second Battalion, Royal Canadian Regiment, "D" Company. Patrick O'Connor was killed in action on Hill 467 only one month after arriving in Korea. On the day of his death, May 30, 1951, while his company was pinned down by heavy enemy fire, Patrick ignored the danger and rushed forward in an attempt to render first aid to a wounded comrade. Patrick O'Connor's story is included in this Project on page 1097.

Ed Haslip (Sarnia): After he had obtained his discharge from an infantry battalion at the end of the Second World War, Ed Haslip had gone to work for Dow Chemical Company in Sarnia. When the Korean War started, he got his severance from Dow, packed his things, and drove the 60 miles to London to join the Royal Canadian Regiment. He would serve in Korea as a stretcher-bearer with "C" Company, 2nd RCR.

Describing his impression of Korea Haslip said, "*I was most impressed by the Korean people. They gave me a greater respect for humanity. After all, the fact that a little nation such as Korea could go through as much over the*"

years, and still refuse to be beaten down and give up, taught me a lot. We learned patience, honesty, and respect from the Koreans. They had nothing but they made do with what they had. Their villages were burnt around them, but they still hung on and never gave up. I loved the Korean kids."

Ed Haslip would never forget his friend Patrick O'Connor, fellow stretcher-bearer with the RCR. He remembered on that May 30th day on Hill 467 when O'Connor moved through the dead and dying, giving them comfort, bandaging wounds, occasionally praying with them, all while ignoring his own exposed position. Haslip saw O'Connor cut down by the enemy machine gun fire while trying to save the lives of the men with him. He felt that O'Connor should have received the Victoria Cross.^{9Z}

• **THE ROYAL CANADIAN ARMY MEDICAL CORPS (RCAMC):** The medics and doctors of the RCAMC were always on the move in order to stay in close proximity behind the front lines. The first point behind the front that wounded were brought by stretcher-bearers for immediate first aid was the Regimental Aid Post (RAP). Wounded were then carried to the Casualty Clearing Station (CCS), where another medical officer would remove dressings, perform minor surgery, administer splints and stabilize the men. Beyond the CCS, the wounded went farther back to the bigger Advanced Dressing Station (ADS), where they could be attended until they were stable enough to move by helicopter to a sixty- to seventy-bed Mobile Army Surgical Hospital (**MASH**) or flown to a hospital in Japan.

The mortality rate during the Korean War was 34 per 1,000 wounded (it had been 66 per 1,000 in the Second World War). A wounded soldier in Korea benefitted from greater accessibility to air-evacuation transportation (helicopters) —for the first time in history, severely wounded men could be moved from the front line of fire to the operating theatre, sometimes within a matter of minutes. Also helping the wounded was the advent of better drugs and antibiotics and quick access to surgical and medical treatment.^{9Y, 9Z}

• **THE NEXT PHASE OF THE WAR:** In the weeks that followed the attack on Hill 467, the 25th Canadian Infantry Brigade continued to advance. The RCR's, the Royal 22e Régiment and the Princess Patricia's were now all fighting together for the first time in the war. North of the Canadians lay territory that, according to the UN Command, had to be cleared of Chinese occupation because it left the capital, Seoul, vulnerable to attack. Through the month of June, UN forces moved the front line in North Korea (just above the 38th parallel) almost to the position it would occupy for the rest of the war.

Tactics changed during this period. Large frontal engagements, either offensive or defensive, were avoided. The advance consisted of establishing patrol bases that could be defended, then sending deep patrols ahead to reconnoiter, probe and seek out new defensive bases. Each new defensive position was dug in deeper, protected with more barbed wire and defended by more entrenched artillery and wider minefields than the last. Anti-personnel landmines, booby traps, sniper attacks, deep penetration patrols and skirmishes in no-man's-land were the new tactics that evolved.^{9Y}

The first phase—the "war for containment"—had attempted to stem the southwest advance of North Korean armies in the summer of 1950. The second phase—the "war for rollback"—had been General MacArthur's attempt to push the communists right out of Korea in the fall and winter of 1950-51. That had drawn the Chinese Communist Forces into the war and they pushed the UN armies below the 38th parallel in the spring of 1951. In the third phase—"stabilization"—UN Command had re-established the 38th parallel as a stalemate line in mid-1951. By then, the lines began to solidify and the two sides dug in with deep defensive positions around the 38th parallel.

• **PEACE TALKS:** Early in July 1951, at the Communists request, **cease-fire negotiations** began. The UN delegation was composed of five U.S. and one South Korean official, while the Communist delegation was composed of two Chinese and two North Koreans. Canada did not participate at any time. The talks began on July 10, but broke off August 23 due to distrust among the negotiators and manoeuvring on the battlefield. The suspicion prevailed that the Communists never intended truce talks to produce an early peace, but were using them to gain military advantage.

Like the war itself, the talks would drag on for the next two years. Over that time, the talks were never amicable, often bitter, and almost always interminably dull. For days, occasionally weeks, the same arguments were tossed back and forth, neither side wanting to concede, particularly when concession was often viewed as weakness. One of the stickiest points in the peace negotiations was the repatriation of prisoners of war; many North Korean POWs refused to be returned back to the north.

As the on-and-off peace talks continued, no one, least of all the soldiers in the front lines, knew where they might be, nor when a diplomatic breakthrough might come. One Canadian soldier wrote, *"I cannot avoid a tightening of the heart at the thought that this night I could be killed and that tomorrow the war would end with a sudden armistice."* Through the intermittent armistice talks, ironically, more Canadians were wounded or killed after, not before, the peace talks began. The reason is that while talks dragged on, UN front-line commanders were not allowed to mount any major offensives. Their orders were to dig in and to hold. One Canadian veteran wrote, *"Everything that occurred in Korea after the fall of 1951 was a waste of time and lives."* ^{D, H, N, 2E, 2N, 6P, 6R, 9Y, 9Z}

• **THE WAR DRAGS ON:** The overall aim of the new UN operation was to relieve pressure on the embattled sectors, force the enemy back behind the mountain barriers along the 38th Parallel, and to prevent the Communist armies from recovering their strength and launching another massive offensive. United Nations forces were not to carry out any major "set-piece" attacks where they "close with and destroy the enemy," like those of the two World Wars. The war was becoming positional and more static. While company-sized attacks were sometimes mounted to improve defences or to keep the enemy off balance, the war was mostly fought from trenches into no man's land with endless patrolling, night raids against hilltop trench positions, repulsing enemy attacks, digging tunnels and trenches, booby traps and minefields, barbed wire, long nights standing guard in slit trenches, and artillery barrages. The enemies faced each other across a no-man's-land ranging from a few hundred metres in width to several kilometres. During this phase of the war, bloody battles raged for strategic high ground. Of Sarnia's four Korean fallen soldiers, three were killed in battles over hilltop positions.

During this time, Canadian troops languished in hilltop defensive positions surrounded by mines and barbed wire, occasionally sending patrols out at night to test the enemy's defences. They subsisted on American C-Rations of ground meat, ham and eggs, hamburger patties, chicken stew, or lima beans with pork that somehow all looked and tasted the same, and the occasional bottle of *Asahi*, Japanese beer. One of the soldier's most trusted tools was his shovel; instead of surviving *on* the hills at the front line, a soldier was expected to survive *in* them. Canadian soldiers became persistent diggers—there were slit trenches, communication trenches, command post trenches, observation posts, ammunition pits, weapons pits, garbage pits, bunkers for living in, cubbyholes, and latrines. They ate cold army rations while dealing with roaches, spiders, snakes, ants, lice and other body diseases. Rats thrived in the bunkers—they chewed everything, crept into sleeping blankets and they carried mites that transmitted the lethal haemorrhagic fever (or Songo fever).

The Chinese still had as their aim the destruction of the opposing forces. The Chinese army's guns—a combination of their Russian-designed SU76 high-velocity assault guns, their 152-mm howitzers, their 122-mm artillery and their mortars—could deliver relentless fire across no-man's-land at any time. The UN soldiers were also subjected to a barrage of propaganda leaflets from the Chinese, showing turkey dinners, tropical climates and comfortable sleeping places, which could belong to the soldiers, if only they would throw down their weapons and utter "tow shong", the word for surrender in Chinese.

Chinese tactics were dominated by their chief asset, manpower. So they struck at will, often with waves of men, and at night (using the darkness for cover against Allied planes), inflicting casualties and wearing down Canadian morale. When a Chinese offensive failed to achieve its objective, they would break contact and withdraw, while reinforcements and supplies were brought forward, and then launch another massive attack. Partial cease-fires often proved one-sided and temporary as the enemy continued to shell UN forces, send out patrols, and carry out offensive attacks. ^{D, H, N, 2E, 2N, 6P, 6R, 9Y, 9Z}

Landmines: Anti-personnel landmines and booby traps were used extensively by both forces. The Chinese and North Koreans used a mixture of relics from the Second World War as well as those manufactured in Russia and China. Some had wooden bodies that made them impossible to find with metal detectors. Others were simply mud-covered grenades, their pins replaced with mud, so that when they were kicked, the exterior would break away, allowing the grenade to detonate. "Bounding Betsies" (used by both sides, also called "bouncing Betties") were the toughest to deal with. Each "Betsie" was about three inches in diameter, eight or nine inches in length, round like a can and buried in the ground. When tripped by wire or trap, a detonator would pop the mine several feet in the air before the mine exploded, scattering deadly shrapnel, waist-high, in every direction.^{9Y}

Patrols: As the war of attrition along the front lines continued, there were endless skirmishes between groups of soldiers in trenches and out in no-man's-land, with little exchange of land. The fighting resembled that of the battlefields of France and Belgium in World War I. Patrols into no-man's-land, especially at night, were the norm.

The South Korean army patrols philosophy was to advance, find the enemy and fight it out. Canadian patrols each had a different strength and a different mandate. A fighting patrol, usually platoon-size (about 30 men), would attack an outpost, capture a prisoner or create a diversion to keep opposing troops off balance. An ambush patrol of 15-30 men would set a trap in an area through which Chinese patrols were sure to operate. A recce patrol (about 5 men), would retrieve information on routes, enemy defences or its movement patterns. An escort patrol worked with engineers or pioneers while they carried out their tasks (eg. detecting and disarming mines and installing minefields). A standing patrol worked out in front of a company position to give early warning of any Chinese activity in the region.^{9Y}

Battle Cries: As in other wars, traumatic stress disorder, referred to as “**battle fatigue**” in the Korean War, began to take its toll on the soldiers as the war dragged on. Gordon Croucher, attached to the Princess Patricia’s, doing double duty as an infantryman and with the Royal Canadian Electrical Mechanical Engineers, wrote a letter home to his mother in September 1951. Following are portions of that letter:

Dear Mother

I hope my letters have been reaching you alright. I write as often as possible at least one a week. I’m just feeling homesick and blue right now. Homesick for civilization and Canada.

I’ve seen a lot here, enough to make a person different. I’ve seen human suffering at its peak. I hate it. This war is a war against common people and its not nice too see starving people on the roads and not being able to help.

A Korean farmer wants to know why his wife and kids were killed. can you tell him,? will he understand? I guess the answer is no! he can’t read or write, he don’t know politics, he just knows feeling and emotion. Its heartbreaking his home is destroyed. His land a battlefield no place too turn for food or shelter he’s one in millions.

Mother sometimes you can’t help crying and I’ve seen tough fighter soldiers do it. You get a different outlook on life here and war. My God but these people suffer.

I want to get home. just to get away from this. before I break down. A person can stand so much and then they call it nervous breakdowns or here they call it battle fatigue. it starts by being jumpy and headaches, which I got both, a continuous headache and I’m jumpy. So’s a lot of other guys... I should be getting to bed, I’m very tired.

Lots of Love Gordon

Sergeant Alex Sim, also of the Princess Patricia’s, had been feeling some of the same pressures arising from the futility of the war and the plight of the Korean civilians. Following is a portion of a letter he wrote to his wife in June 1951:

Hi Darling;

... there’s nothing to be Happy about over here except that I’m a member of the Cdn. Army, which makes me proud but as for being Happy, you can’t do it in this country, all we ever see are Refugees, Women & Kids half dead from Starvation – go into a Village & find Dead civilians everywhere some Shot or Killed by Shellfire others Burned by Napalm or killed by Land Mines, there’s really not much to be happy about over here...

All My Love Darling To You & the Kids

Love. Sonny

Both Gordon Croucher and Alex Sim would make it through the Korean War, and return to Canada.^{7A}

The Koje-Do Incident: Koje-Do (now Geojedo) is an island 40 kilometres southwest of Busan, South Korea. In the spring of 1952, a series of unfortunate events here resulted in the largely unknown island to appear on the front pages of newspapers around the world. It was on this 240-square kilometre island that the United States operated a prisoner of war (POW) camp during the war. There were 17 prisoner enclosures, each designed to hold about 1,000 men. By 1952, the US and its UN allies were taking large numbers of North Korean and Chinese prisoners of war. The island soon became home to 160,000 prisoners.

Discontent and trouble became inevitable with factors that included: extreme overcrowding; problems in the process of screening prisoners for possible patriation; U.S troops killing 77 POWs stemming a camp protest in February; a hardcore group of Communist agitators were part the camp; and rumours of beatings, kangaroo courts, intimidation and murder amongst the prisoners themselves. In late May 1952, the prisoners captured the American camp commandant and held him for four days, releasing him only after concessions were made. News of the concessions and camp conditions reached the world press and was interpreted by some as an “admission” by the U.S. of their inefficient and brutal POW operation.

The US military requested the help of British Commonwealth army units to deal with the rebellion—but did not consult with the governments of those units. On March 25, a company of the 1st Royal Canadian Regiment

(RCR) went into Koje-Do. Over seven weeks and without bloodshed, the 100 RCRs along with a company of British troops, helped to restore order to a portion of the camp and guard some of the prisoners (mostly North Korean officers). On June 10, US forces moved into one compound with infantry and tanks to re-establish control, but both sides suffered casualties. The Canadians left Koje-Do on July 10, but not before they had established peaceful rapport with the prisoners and an excellent reputation with the Americans.

But back in Canada, the politicians were not pleased. The deployment of Canadian troops at Koje-Do without its consent angered the Canadian government and resulted in a public diplomatic protest to the US government.^{2N, 9Z}

Korean Service Corps (KSC): Thousands of South Korean civilians were recruited into service with the UN forces from the early stages of the war. What began as an ad hoc arrangement, by 1951 was established as the Korean Service Corps that grew in strength to more than 100,00 people. Their role was of a non-combatant nature. With no pay, no uniform and no acknowledgement, these Korean men, women and children were put to work behind the lines acting as porters of food, water and ammunition; mess-men; stretcher-bearers; interpreters or translators; women, or mama-sans, served in the rear as laundresses; and boys ranging from mid-teens to mid-twenties served as houseboys for officers.^{9Y}

“Katcoms”: South Korean soldiers had served in American formations for many months. In July 1952, Commonwealth formations were asked to accept “a certain number of basically trained Koreans for service with infantry.” The United Nations command had undertaken the training of Korean nationals as infantry reinforcements. In the spring of 1953, the Commonwealth Division was reinforced by 1,000 Korean soldiers, known as “Katcoms” (Korean Augmentation to Commonwealth). In March 1953 the first of the Katcoms were integrated into the Canadian battalions to increase the fighting strength of the units. They were paid by the Korean government, but equipped, uniformed and armed by the units that accepted them. Although some difficulties were encountered due to differences in language, outlook, customs and pay problems, the scheme worked reasonably well and provided valuable additional manpower.^{D, 6R}

- **HILL 355:** The Canadians were often deployed on or near Hill 355—in fact, every Canadian battalion that served in Korea would spend time there at some point during the war. Known as “Kowang San” to the Koreans, it was nicknamed **“Little Gibraltar”** by UN troops because of its prominent size and many defensive positions. When the Canadians moved onto its heights they simply referred to it as “Three-five-five.” The hill was located about 40 kilometres north of Seoul and was highly valued because it was the highest ground overlooking the surrounding front lines and supply routes. This strategic importance meant it would be the scene of fierce combat as both sides wanted to have it. On two particular occasions, late November 1951 and late October 1952, Canadian troops would be engaged in desperate, fighting against heavy artillery and waves of Chinese soldiers. The Canadians held their positions in both battles, and no ground was yielded—the sacrifices and achievements in the area of Hill 355 would be a significant chapter in Canada’s Korean War history.^{D, 3O, 6R}

In the November 22-25, 1951 battle, the defense of Hill 355 was the responsibility of the 2nd Battalion of the US 7th Infantry Regiment and the Canadian Royal 22e Regiment (Vandoos) on the flank. The enemy began an intense artillery bombardment on the morning of November 22, which was followed by waves of Chinese soldiers storming the hill. The enemy’s frequent refusal to take cover from fire led to widespread belief that the attacking troops were drugged. It was desperate fighting day and night in the snow, bitter cold and mud. The Canadians would endure the same onslaught of shells from tanks, self-propelled guns, artillery pieces, mortars and waves of Chinese infantry. Hill 355 passed from Chinese to American to Chinese hands and back again, but each time, the Canadians held their position. After four days and nights of continual shelling in the rain and freezing temperatures, attacks and counterattacks, Hill 355 was again in American hands. For the Royal 22e Regiment, although in a state of near exhaustion, their resolve to hold their position turned the tide atop Hill 355. Sixteen Canadian Vandoos were killed, thirty-six were wounded, and two Canadians were taken prisoner by the Chinese during the fight, the first Canadian soldiers to suffer that misfortune in Korea. They were imprisoned in camps in North Korea administered by the Chinese.^{9Y}

Throughout October 1952, the Royal Canadian Regiment, then guarding the hill, had experienced periodic enemy bombardments. Between October 17 and 22, very heavy enemy bombardments badly damaged their defences, cutting telephone wires and caving in weapon pits. One RCR Captain said, “For four days they just laid the boots to us with every gun they had.” In the early evening of October 23, another heavy artillery barrage enemy barrage

opened up. Soon after, with bugles blowing and soldiers yelling and screaming, the Chinese launched their large assault force in waves. Under heavy assault and with communications cut off, some of the Canadians were forced to abandon their defensive positions to the surging enemy that overran them. From October 23 night until the early morning of October 24, Canadian artillery, tank and mortar fire on the captured areas halted the Chinese advance and prevented them from resupplying their front line, forcing the Chinese to withdraw. The Canadians counterattacked and succeeded in regaining control of Hill 355 by the early morning of October 24. UN Command estimated that about a hundred RCR troops had defended the base of Hill 355 against two Chinese battalions, or about 1,500 men. The action took a heavy toll on the Canadians with 18 killed, 14 taken prisoner and 35 wounded.^{D, 2N, 3O, 6P, 6R, 6T, 6U, 9Y, 9Z}

One of those who lost his life in the October 1952 Hill 355 battle was **Private Edward Joseph Knight** of Sarnia.

• **BATTLE OF HILL 187:** The 3rd Battalion of The Royal Canadian Regiment (RCR) arrived at the front lines, on Hill 187, on the night of April 19, 1953. Back in October 1951, **Corporal John Richard Toole** of Sarnia had lost his life on Hill 187. In the spring of 1953, the newly arrived 3rd Battalion RCR's immediately set about to improve defences and to increase patrolling in no man's land. Hill 187 held no strategic value, and there was no real warning of the attack that was coming.

Just three weeks after arriving at the front, on the night of May 2, 1953, several RCR platoons, while carrying out their routine patrols, were ambushed by an overwhelming number of Chinese troops. Miraculously, a few of the RCR survived the surprise attack, and made their way through barb-wire and landmines to the safety of Canadian-held positions. It was then that the enemy would launch their attack, beginning with an artillery and mortar barrage. Five separate Chinese forces then surged forward across no-man's-land towards the Canadian lines. The RCR's "C" Company withstood an unusually strong enemy assault on Hill 187. It began with a heavy artillery bombardment, then machine gun and grenade fire as waves of enemy infantry swarmed the Canadians. With ammunition being exhausted, and the enemy overrunning RCR positions, the battle degenerated into rifle fire, grenades, bayonets and hand-to-hand combat. Cursing, screaming, shouted warnings, and cries of agony, all added to the horror of those terrible moments. At the height of the battle, one of the RCR platoon commanders called down an artillery bombardment on his own trenches to disperse a Chinese offensive that may have numbered over 800 troops. Within minutes of the call, a concentrated hail of UN artillery and tank shells, mortar bombs and machine gun fire, rained down on the platoon's position. Continued fire on the infiltrated areas during the early morning hours of May 3 eventually drove the Chinese out of the Hill 187 area.

The attack was repulsed and the Canadians re-occupied their positions, but the RCRs lost more soldiers that night than any other Canadian battalion did in a single engagement during the Korean War—26 killed, 27 wounded and seven taken prisoner (and 4 Katcom soldiers were killed, 14 wounded and 4 missing). It was the Canadian Army's last major firefight of the Korean War. This unfortunate tragedy was not even properly reported in Canadian newspapers. Censors in Korea wanted to keep the enormity of the losses covered up during the last months of the peace talks, while much wrangling and sabre rattling was taking place in the conference hut at Panmunjom.^{D, 4A, 6T, 9Y, 9Z}

The RCRs who fought in the Hill 187 battle were not entirely forgotten. In the Afghanistan War, in 2002 when the base for the 2,000-strong Canadian contingent of the International Security Assistance Force (ISAF) was established in Kabul, Afghanistan, it was named **Camp Julien**. It honoured the memory of Corporal George Patrick Julien, who had fought with his section in the tragic Battle of Hill 187 on the night of May 2-3, 1953. Corporal Julien was one of three Royals who were awarded the Military Medal for bravery in the field.^{6T}

• **A BIT OF HOME:** Previous to the Korean War, civilian services including the Canadian Red Cross Society, the Royal Canadian Legion, the Knights of Columbus and the Salvation Army, had provided for the soldiers by sending such things as scarves, writing paper and cigarettes. During the Korean War, the armed services themselves had decided to take charge of the "welfare" of troops abroad. The Canadian government provided such services as current motion pictures; tape recordings of CBC radio programs; a daily ration of twenty free cigarettes; spot news delivered in cables, magazines, and newspapers; recreational facilities at the Commonwealth leave centre in Tokyo; and sports equipment for field games.

In the winter of 1952 on the frozen Imjin River, engineers had scraped the river's ice surface, and erected waist-high boards and goal nets. The first game at the impromptu "Imjin Gardens" featured a heated contest between a team from the Royal Canadian Regiment against a team from the Royal 22e Regiment. Games on the Imjin River weren't the smoothest, cleanest contests, but they sure helped Canadians forget the war.

Screenings of such annual sporting events as the Grey Cup final, the Canadian Open Golf Tournament and the Stanley Cup finals were flown in. A few sports celebrities even visited the troops, including Detroit Red Wing fan favourite Red Kelly and Regina Roughriders' star half-back Ken Charlton. Behind the lines, soldiers built venues to watch movies, and built volleyball courts, baseball diamonds and horseshoe pitches. There was a parade of entertainment celebrities that visited the troops behind the front lines—a who's who of entertainers from the 1950s. Some Canadian troops managed to attend shows sponsored by the USO featuring such performers as Bing Crosby, Bob Hope, Betty Hutton and Piper Laurie. Canadian positions were visited by a variety of entertainers, musicians and comedians including singer Lorraine McAllister, actor-singer John Pratt, country artist Hank Snow, and radio show performers Johnny Wayne and Frank Shuster along with their ensemble of musicians and performers.^{9Y, 9Z}

- **AIR SUPPORT:** Every phase of the Korean campaign was a combined operation in which United Nations forces on the sea and in the air played a prominent and vital role. From the very early stages of the war, the United Nations forces enjoyed complete supremacy in the air. After only two months of the war, all but 18 of North Korea's 130 combat aircraft had been put out of action. Even after Chinese forces entered the war, their short-range Russian-built MIG-15 fighters required airfields in Korea, and these were successfully destroyed by US bombers. Allied heavy bombers destroyed enemy airfields, railways, bridges, tunnels and troops. Fighters hammered enemy forward positions, while air reconnaissance aided UN ground troops in their operations.

No Canadian fighter squadron was ever sent from Canada, but between November 1950 and July 1953, 22 RCAF pilots were attached to the United States Fifth Air Force (USAF) and flew with Sabre-equipped jet fighter-interceptor squadrons. Pilots who flew jets in Korea went on sorties that usually lasted about an hour and a half. The Canadian pilots were credited with 20 Russian-made jet fighters destroyed or damaged, as well as the destruction of several enemy trains and trucks. A number of Canadians served with the Royal Air Force directing UN artillery fire at Chinese positions; and with the USAF Tactical Air Control Party that provided air strike support for ground troops.

The Korean War was the first conflict in history to use helicopters to deliver cargo to ground troops, land combat units, and evacuate wounded. But while the Americans used choppers widely, Canadians relied on planes, such as the single-engine Auster observation planes for reconnaissance. The Canadian contribution to the air effort began early in the war when No. 426 (Thunderbird) Transport Squadron, RCAF, was attached to the US Military Air Transport Service. By June 1954, the Canadian Transport Company had flown 600 round trips over the Pacific between McChord Air Force Base in the state of Washington and Tokyo, Japan, carrying more than 13,000 passengers, mostly soldiers, and 3,000,000 kilograms of supplies, equipment and mail without loss of life or cargo.

Another Canadian contribution, a means of rapid transit for politicians, diplomats and generals, was a single-engine airplane—the Beaver. Built in 1947 by Canadian manufacturer de Havilland, the Beaver was designed for use in the bush. In 1950, the aircraft caught the eye of those equipping the US Army, who were “looking for a tough short-takeoff-and-landing, utility aircraft capable of carrying six people for a radius of 200 miles and able to land anywhere.” In other words, they needed “a flying jeep.” Instead of the many competing American aircraft, officials of the US Army chose the Beaver. They would be used across the front for dropping food and ammunition in tight spots; for running communication wires from one position to another; for carrying wounded; and for flying military VIPs on their appointed rounds.^{D, 2N, 4A, 6R, 7A, 9Y, 9Z}

- **NAVAL SUPPORT:** The first military aid provided by Canada was made by the Royal Canadian Navy less than two weeks after the outbreak of hostilities. Three Tribal Class destroyers—*HMCS Cayuga*, *Athabaskan* and *Sioux* sailed out of Esquimalt, B.C. to the Far East, arriving on July 30, 1950 into the port of Sasebo, Japan, approximately 100 nautical miles from Korean waters. This would be the RCN's home away from home for the next thirty-seven months of fighting.

A total of eight tribal-class escort destroyers of the Royal Canadian Navy would join the United Nations in providing naval support over the course of the war. They performed a variety of tasks that included: maintaining a continuous blockade of the enemy coast; preventing amphibious landings by the enemy; escorting troop and cargo ships; screening carriers from the threat of submarine and aerial attack; supporting the United Nations land forces by bombardment of enemy-held coastal areas; supporting UN commando raid operations behind enemy lines; searching sampans, junks and coastal islands for infiltrators; clearing coastal waterways of mines; carrying out sea rescue work; and protecting the friendly islands and bringing aid and comfort to the sick and needy of South Korea's isolated fishing villages. They faced the ever-present danger of enemy mines and gun-fire from shore batteries, air and

submarine attacks, as well as the hazards contributed by the geography and climate of the area.

Another popular form of harassment used against the Communists was “train busting.” Running north-south along North Korea’s eastern coastline were the enemy rail lines. That made every supply train chugging down the coast to the 38th parallel a target for UN navy gunners. The activity took on such a high profile that any ship destroying or disabling a Communist Forces train earned membership in “**The Trainbusters Club.**” *HMCS Crusader* was the first Canadian ship admitted to the club, on October 26, 1952, hitting an enemy train from 10,000 yards offshore. *HMCS Haida* and *HMCS Athabaskan* would also join the club. Of the twenty-eight supply trains officially recorded in The Trainbusters Club, RCN ships and gunners accounted for eight.

In early December 1950, a UN naval flotilla, including RCN vessels *HMCS Cayuga*, *Athabaskan* and *Sioux*, traversed through treacherous conditions, successfully evacuated the 7,700 US troops and materiel, and civilians trapped in the North Korea key port of **Chinnampo**, on the west coast of the Korean peninsula. Some called this successful retreat “the most important and most dangerous naval mission of the Korean War”.

In October 1952, the Royal Canadian Navy suffered its first and only battle casualties of the war. While on an east coast patrol *HMCS Iroquois* received a direct hit from a shore battery. Three men were killed in action and ten were wounded. By the time the Armistice was signed in July 1953, approximately 3,621 officers and men of the Royal Canadian Navy had served in Korea.^{D, 2N, 4A, 6R, 7A, 9Y, 9Z}

The Great Imposter: The *HMCS Cayuga* was one of the first RCN destroyers to arrive in Korea in July 1950. In the fall of 1951, the ship became notorious for having one of the most unusual deceptions in Canadian naval history. Her ship’s doctor was an American con artist who was posing as a Canadian Lieutenant Surgeon.

Ferdinand Waldo (“Fred”) Demara Jr., the son of a French-Canadian father and an Irish-American mother, was born in Massachusetts in 1921. He ran away from home at sixteen and entered a monastery in Rhode Island. He failed as a monk, and tried at least two other religious orders but dropped out of both. Then for more than a decade, he held a number of positions in which he was qualified in none of them. At various times he was a doctor of psychology, university lecturer, dean of the school of philosophy at a Pennsylvania college, a law student, a zoology graduate, a teacher at a junior college in Maine, and a Texas prison assistant warden—all posts he had obtained and held on the basis of forged, stolen or nonexistent qualifications. After entering Canada, as a monk named Brother John, Demara had become friendly with Doctor Joseph C. Cyr, who was practicing medicine in Grand Falls, New Brunswick. Demara would disappear with the physician’s credentials.

In March 1951, Demara presented himself as Doctor Joseph Cyr at the naval recruiting office in Saint John, N.B., offering his professional services to the Royal Canadian Navy. With the desperate need for qualified medical officers, he was quickly processed, and his credentials accepted without verification. In fact, “Doctor Joseph Cyr’s” medical experience was limited to a few weeks as an unskilled hospital orderly in the United States.

“Doctor Cyr” worked in naval hospitals in Nova Scotia for three months and then for a short period on the aircraft carrier *Magnificent*. He was then assigned to duty in Korea and in June 1951, “Doctor Joseph Cyr” was assigned to join *HMCS Cayuga* for the destroyers second tour of duty in Korean waters.

“Surgeon-Lieutenant Cyr” managed to cope effectively with the routine illnesses, occasional accidents, a few minor injuries and ailments on board, and he had a capable sick berth attendant who handled most of the routine cases. His first big challenge came when he was forced to act as a dentist, treating an infected tooth from none other than the ship’s captain. After administering a hefty dose of local anesthetic, “Cyr” successfully removed the infected tooth, and by all reports, the ship’s captain had no further trouble with it.

In September 1951, the *Cayuga* took part in commando-type operations against enemy-occupied islands on the Korean west coast. Following one of these successful forays, three seriously wounded casualties (one with a rifle bullet through his lung) —all South Korean guerillas—were brought to “Doctor Cyr” on the *Cayuga*. On her after-canopy deck, “Cyr” did a triage of the wounded and requested an operating area to be readied for a soldier with a punctured lung. In the Captain’s cabin, “Cyr” opened up the soldier’s chest, extracted a bullet (that was close to the heart) from a lung, and sewed the man up and proceeded to deal with all the other wounded on deck. All three wounded men survived and Demara later bragged about the removal of the bullet.

A navy public relations man heard about “Doctor Cyr’s” skills and felt they should be publicized. When a war correspondent featured the story of the *Cayuga* doctor’s work in Canadian newspapers, the real Doctor Cyr, in New Brunswick, began asking questions. In late October 1951, the *Cayuga*’s Surgeon-Lieutenant Joseph Cyr was

uncovered as an unqualified imposter.

On arrival in Canada, Demara appeared before a naval board of inquiry. There is no record of disciplinary proceedings, and service records indicate that “Cyr” was given an honourable release out of the navy and \$1,000 in back pay. The real Dr. Cyr did not press charges saying that Demara “had done a good job and helped people and that’s all that is important.” Fred Demara was deported to the United States where he returned to the religious field, becoming a hospital chaplain. A book about his exploits came out in 1959 and two years later, a Hollywood movie with the same title as the book came out, *The Great Imposter*, starring Tony Curtis in the role of Ferdinand Demara.^{H, 7A, 9Y, 9Z}

• **THE WAR “ENDS”:** The Korean War “ended” on July 27, 1953 with the signing of the Korea Armistice Agreement at Panmunjom. It had been two years, two weeks and three days since the two sides began peace negotiations. On that morning, the UN and communist delegations filed into a newly constructed Peace Pagoda at Panmunjom. The senior UN delegate, Major General William Harrison, and the chief of staff of the Korean People’s Army, Nam Il, each entered the building at 10 o’clock, sat down and signed his name eighteen times to the armistice documents. Not a word was exchanged between them and just as swiftly the two exited. A ceasefire would go into effect twelve hours later. According to the terms of the armistice, opposing sides were given 72 hours to remove all their supplies, ammunition, and equipment from the “demilitarized zone.” They had to disassemble pickets and barbed-wire fences, remove mines and communication facilities, demolish trenches and bunkers and leave the area entirely.

As they set about the job on the day after the hostilities ended, the Canadians along the front noticed a phenomenon that to them was as chilling as it was unexpected. Out of the bunkers immediately opposite them appeared, not just a few, or even a few hundred, Chinese troops, but thousands and thousands of them, swarming through no-man’s land, across the trenches on the Chinese side, and up and over the hills leading back from the front. A captain with the PPCLI who was there that morning said, “No one will ever forget the psychological impact of seeing for the first time the ‘human sea’” of enemy troops opposing them.^{9Y, 9Z}

The *Sarnia Observer* front page headline on that day read, “SHOOTING ENDS IN KOREA – Armies to Retire, Form Buffer Zone.” Following is a portion of the main story:

SEOUL – Shooting stopped along the Korean battlefield at 10 p.m. tonight, 9 a.m. Monday EDT, bringing to an abrupt halt 37 months of death and destruction. While ground fighting was all but nil in the final hours, mounting Communist artillery fire took its toll of Allied soldiers up to the last minute. At 10 p.m., a hush fell over the front. The last man to die may never be named. Nor, perhaps will the last hero. The front, usually aflame at this hour of night, just grew dark. Men heaved sighs of relief, but with great caution. As the clock ticked off the seconds, they grew more brave.

Silence came after a smashing artillery duel between Allied and Red guns that began in mid-afternoon and built up a deafening crescendo shortly before 10 p.m. All day and into the night the Reds sent artillery and mortar barrages screaming into Allied lines east of Kumhwa on the central front... Allied artillery boomed back trying to silence the guns. Associated Press correspondent Randolph said all firing stopped at 9:43 p.m. A few seconds after 10 p.m. wild yells broke out from the U.S. troops. Even as the shooting ended, litter jeeps and ambulances wound down dusty hill trails from outpost ridges, bringing moaning, broken men to rear hospitals.

The July 27 *Sarnia Observer* also published comments from a number of prominent Sarnia citizens on the armistice in Korea. They spoke of having great joy with the signing of the truce and expressed a few cautionary words; for example, Mayor W.C. Nelson said, *Surely the world will welcome this step towards peace, and hope it holds to the day when our young people can plan their future free from the threat of war and its attendant destruction. However, there should be no lessening of our defence program. The policy of the United Nations should be one of unrelenting scientific research and development so that we may attain and never allow to weaken a defensive strength behind which we can feel reasonably safe and which none will dare challenge. Possibly then, some of our effort can be directed toward helping the unfortunate peoples and so assure our own continuing progress. This armistice may thus present a great opportunity for human achievement.*

Prisoners of War: Prisoners of War were a big part of the peace negotiations, and a large sticking point for the signing of the Armistice. The biggest issue with this topic was the potential repatriation of prisoners, specifically with North Korean and Chinese soldiers that didn’t wish to return to North Korea. The first exchange, “Operation

Little Switch” (April 20-May 3, 1953), was the exchange of sick and wounded prisoners at Panmunjom, a crossing point along the 38th parallel known as “Freedom Village.” Over the two weeks, 684 UN prisoners were swapped for 6,670 Chinese and North Korean POWs. On May 3, 1953, the day that Operation Little Switch was completed, Chinese forces overran “C” Company of the 3rd Battalion of the RCR on Hill 187, and seven new Canadian prisoners were en route to POW camps in North Korea.

After the signing of the July 27, 1953 Armistice, the task of exchanging prisoners began approximately one week later. “Operation Big Switch” (August 5-December 23, 1953) would extend over two months, and included the release of an estimated 14 Canadians, 922 British, 3,313 Americans and approximately 8,000 South Koreans, along with 74,000 North Korean and Red Chinese held by the UN Command. Many prisoners held by the UN chose to settle in South Korea, while a few hundred prisoners held by the Communists remained in North Korea.

A total of 33 Canadians were taken prisoner during the course of the war. Most of the Canadian prisoners-of-war were captured by Chinese, not North Korean troops. Neither North Korea or the Republic of China had signed the Geneva Convention of 1949, which guaranteed standards of treatment of prisoners. About 40 per cent of UN prisoners would die in captivity from starvation, disease and untreated wounds. Prisoners were treated harshly, enduring hardships that included solitary confinement, “sweat boxes”, retributive discipline, diets of minimal food and water, primitive medical treatment, and the Chinese applied their so-called “lenient treatment” policy, which considered POWs as “victims of the ruling classes—students who were to be educated and pointed towards the truth.” For the Chinese communists, prisoners-of-war had a distinct propaganda value when kept alive. Through interrogation and indoctrination, efforts were made by the Chinese to “brainwash” POWs in attempts to alter their political perceptions. Threats and torture were used to force prisoners to sign untrue statements including: that they had entered Chinese territory; that they thought the war unjust; and that UN forces were using germ warfare. All of the Canadians would return home after the war. The last Canadian to be released from imprisonment in China was fighter pilot Andy Mackenzie—he was released on December 5, 1954, a year and a half after the armistice.^{D, H, 2E, 2N, 6R, 9Y, 9Z}

Canadians Post-Armistice: Gradually, the Canadian soldiers departed from Korea. Most went by truck to the nearest railhead. From there they travelled in dusty, slow, terribly uncomfortable old rail cars with wooden seats to the port of embarkation. Then they boarded ships for their next stop—Japan. There they received medical checks, blood tests and so on, and many spent time sightseeing and souvenir-shopping prior to leaving for home. After the turmoil and deprivations they had experienced in Korea, Japan was a welcome change. Sergeant Clarence Fisher of London, Ontario, who was posted in Tokyo said, “As far as our soldiers who passed through Japan were concerned, I don’t care if they live to be a hundred, when they speak of Japan their eyes light up. They will always remember Japan as a different happening.”^{9Z}

Whether they were in Seoul, Pusan, Tokyo, or Kure, they then boarded ships for home. They were returning to a country that had grown increasingly tired of the war on the other side of the world. For the most part, they came home quietly. The ships arrived in Seattle generally, and the Canadians on board went by train to Vancouver, for transfer across the country. Occasionally a band played or there were a few “welcome home” speeches, but just as often there was nothing. The happiness the soldiers felt on returning to Canada was tinged with sadness as they saw their buddies leave the train as it travelled eastward. Their exultation turned to disappointment as they saw how little their country seemed to care about where they had been or what they had done.^{9Z}

After the war “ended”, approximately 7,000 Canadians continued to serve in the Korean theatre until the end of 1955, with some troops remaining until June of 1957. As the Koreans began to rebuild their country, Canadian troops remained in South Korea to help with reconstruction, logistics and security. The Canadian sector included some of their former battlegrounds such as Hill 355—a permanent monument to courage, battle and bloodshed. The troops contended with the same natural elements as that of their predecessors—summer heat, dust, torrential rains and the freezing cold of winter. They also lived with the knowledge that theirs was a dangerous mission, for if the North launched another full-scale invasion, the likelihood of their survival would be slim.^{D, H, 2E, 6R, 9Y, 9Z}

Peace in Korea: With the signing of the Korea Armistice Agreement by generals of the United Nations and North Korea on July 27, 1953, the nervous truce began with troops of each side pulling back 1 ¼ miles (2 km). Though the armistice was signed, a peace treaty was never signed—the war did not officially end, so technically the two Koreas are still at war. A buffer ‘demilitarized’ zone (DMZ) 2 ½ miles (4 km) wide and running the entire length of the 155-mile (250 km) front was established.

- **THE COST OF THE KOREAN WAR:** The casualty figures during the Korean War vary depending on what source is used. For example, the UN perspective and the North Korean/Chinese perspectives are different, and no doubt some propaganda is involved. It is generally agreed that more than three million people died in Korea between June 25, 1950 and July 27, 1953, and more than half of those killed would be civilians. The following are common estimates: South Korea had approximately 850,000 military casualties, including 113,000 killed; North Korea had an estimated 1.3 million military casualties, including 316,000 killed; China had an estimated 900,000 casualties, including 460,000 killed; and the United States, which sent over 1.3 million troops, had nearly 64,000 killed or missing in action and 103,000 wounded. South Korea had approximately 550,000 civilians killed, and North Korea had over one million civilian deaths. Sixteen nations participated in the Korean War, and others including the United Kingdom, Turkey, Australia, France, Thailand, Greece, Holland, Columbia, Belgium and Canada also suffered casualties, estimated to be nearly 5,900 killed and missing in action.^{D, H, 6R, 9Y, 9Z}

Canada's Sacrifices: The Korean War was the beginning of a new era of involvement in world affairs that saw Canadian troops deployed around the world in truce teams, peace commissions and emergency forces. Canada's contribution during the Korean War enabled South Korea to evolve into a free society, allowing its people to build a strong and prosperous democracy versus that of the completely totalitarian, impoverished North Korea. Three years of Korean War involved tough fighting on steep hills, across dangerous valleys and through dense jungle, with weather ranging from stifling heat to extreme cold, and with soldiers having to endure long marches, bugs, snakes, bad food and disease.

A total of 26,791 Canadian men and women served in the Korean War, including over 22,000 army soldiers and more than 4,000 sailors and airmen. Over 1,550 Canadians became casualties, including 516 who paid the ultimate sacrifice. Of those killed, 312 were killed in action during the war itself. The others died from various causes in training, in transit, or in the war theatre, between 1950 and 1956.^{D, H, 6R, 9Y, 9Z}

Sarnia's Korean War Sacrifices: It is estimated that more than 50 men from Sarnia-Lambton served in the Korean War theatre (the list of Sarnian's who served in the Korean War is page 1199).^N Four Sarnians lost their lives in Korea—their names are inscribed on the Sarnia cenotaph. Privates Patrick William O'Connor, Edward Joseph Knight and John O'Hara Wright have their remains buried in United Nations Memorial Cemetery in Pusan, South Korea. Corporal John Richard Toole has no known grave, his name is inscribed on the Commonwealth Memorial in Pusan, South Korea. All four Sarnians also have a plaque on Canada's Korean War Memorial Wall in Brampton, Ontario, and their names are inscribed on the Monument to Canadian Fallen in Pusan and Ottawa.

- **REMEMBERING THE FALLEN:** In January 1951, various battlefield cemeteries that had been set up behind the lines were concentrated at Tang-gok, a suburb of Pusan. The land for the cemetery was granted to the United Nations by the Republic of Korea as a tribute to all those who had laid down their lives in combatting aggression and in upholding peace and freedom. Of the almost 2,300 soldiers buried in the **United Nations Memorial Cemetery** in Pusan, 1,588 are Commonwealth soldiers, including 376 Canadians. The remaining Canadian fallen include 16 with no known grave; 24 buried in Yokohama, Japan; 93 buried in Canada (including the 17 killed in the Canoe River rail tragedy); and 5 missing at sea.

Like the military cemeteries in Normandy and Holland, local children regularly tend the graves of Canadian soldiers in South Korea. Also in the United Nations Memorial Cemetery, is a stone memorial with bronze panels, the **Commonwealth Memorial**, that honours the memory of soldiers from Britain, Canada, Australia, New Zealand and South Africa who died in the Korean War and have no known graves. There are 16 Canadians inscribed on it.

The **Canadian Korean War Memorial Garden** is situated in Naechon, northeast of Kapyong and just below the hills that were defended by Canadian Forces in the Battle of Kapyong in April 1951. Three monuments have been erected at this site: a stone cairn commemorating the Princess Patricia's Canadian Light Infantry (PPCLI); a stone tablet with three panels in Korean, English and French listing the units of the Canadian Forces that participated in the Korean War; and a larger memorial, unveiled in 1983, and dedicated by the people of Korea to the memory of the Canadians who served in Korea. A plaque at the front of the memorial reads;

Canadian Contribution to the Korean War

Between 1950 and 1953, Canada participated in the Korean War as part of a United Nations multinational force to protect South Korea from invasion by North Korea. When considered in proportion to the population of the country, Canada's army, navy and air force formed one of the largest contingents of the United Nations forces. Some 27,000 Canadians left behind the comforts of home in the interests of peace and security in a region far removed from their

own country. Five hundred and sixteen of them gave their lives in the name of this noble cause. Recognized for their military skills and the recipients of many military decorations, these valiant Canadians embodied their country's commitment to safeguard the fundamental principles of the United Nations.

In 2001, the **Monument to Canadian Fallen** was unveiled in the United Nations Memorial Cemetery in Pusan. A replica of the monument was also unveiled in Ottawa in September 2003. The monument features an unarmed Canadian soldier holding a young Korean girl and guiding a Korean boy. The children represent the generations of Koreans who live in freedom thanks to those who served and those who made the supreme sacrifice. The girl is holding a bouquet of 21 maple leaves, representing the 16 Canadians with no known grave and the five Canadian sailors lost at sea. The boy is holding a bouquet in which maple leaves are mixed with roses of Sharon, the national flower of Korea, as a symbol of the friendship between the two countries. The monument bears the inscription: "WE WILL NEVER FORGET YOU BRAVE SONS OF CANADA" in English, French and Korean, along with the inscribed names of the 516 Canadian soldiers who died serving in the Korean War.^{D, H, 2E, 3O, 6R}

• **SARNIA'S F-86 RCAF MEMORIAL:** Located in Germain Park is one of Sarnia's military landmarks, the Royal Canadian Air Force Memorial. Along with an RCAF memorial plaque, there is an F-86 MkV Sabre Golden Hawk fighter jet, serial number 23164. The aircraft was a surplus jet, one that had come to Sarnia when purchased by members of Sarnia's Air Force Association from a London, Ontario hanger in 1970 at a cost of \$800. Originally it had been stored in a warehouse and was almost burned beyond repair in a fire there in 1970. It was restored in 1971 by the 403 Wing Sarnia RCAF. In September of 1973, the restored F-86 Golden Hawk was put up on the mount over the Royal Canadian Air Force Memorial in Germain Park, as a memorial to honour the airmen who died in the Battle of Britain of World War II. In 1985, the Golden Hawk underwent a second on-site restoration.

The Germain Park jet is a Canadair CL-13 Sabre, a variant of the North American F-86 Sabre. In 1948, the Canadian government decided that the F-86 would be the next fighter jet of the RCAF. Canadair Limited in Montreal produced the Canadian Sabres, under project number CL-13. Six versions of the CL-13 were produced—from the Sabre Mk. 1 to Sabre Mk. 6. The Germain Park Sabre is a Sabre Mark. 5.

The first Canadair CL-13 Sabre flight took place in 1950. Production of the jet increased during the Korean War, and they were produced until 1958, with a total of 1,815 CL-13s built in Canada. They were used by the RCAF and also exported to several NATO allies. Canada did not send any fighter squadrons to Korea, but it did supply sixty F-86 Mk 2 Sabres to the United States Air Force. Canadian pilots were also sent there on "exchange" with the United States Air Force, where they flew in 1,036 sorties in Korea. For the United States Air Force, the F-86 was used very successfully as its primary air-to-air fighter jet against the Soviet-built MiG-15s. The F-86 was the RCAF's principal fighter during the first decade of the Cold War, with 12 squadrons based in Europe and several stations in Canada. The Royal Canadian Air Force retired the F-86 Sabre from fighter operations in 1963.^{2S, 3G, 4V, 4W}

The F-86 Sabre jet in Germain Park is painted in the metallic gold and red colours of the RCAF "Golden Hawks" aerobatics flying team. The "Golden Hawks" were a Canadian military aerobatic flying team established in 1959 to celebrate the RCAF's 35th anniversary and the "Golden" 50th anniversary of Canadian flight. The initial six-plane team flew Mk V aircraft, later the Mk VI, and the team was very popular, doing many shows a year across North America. The Golden Hawks were the predecessors of the modern-day Canadian Forces "Snowbirds" aerobatics flying team. The Golden Hawks team continued in operation until February 1964. The F-86 in Germain Park was never an active member plane of the Golden Hawks.^{2S, 3G, 4V, 4W}

In the fall of 2013, Sarnia's Golden Hawk was removed from its Germain Park pedestal to undergo an extensive third restoration thanks to the efforts of a volunteer team of aeronautic enthusiasts, including the 403 Wing Sarnia RCAFA, the Canadian Owners and Pilots Association (COPA Flight 7) and members of the Royal Canadian Air Cadets 44 Sarnia Imperial Squadron. The volunteer team dedicated thousands of hours to restore the aircraft to its original state, and support and donations were received from individuals and businesses across the community.

Sarnia's Golden Hawk was remounted on its pedestal in Germain Park in December 2014. The Sarnia F-86 Golden Hawk Memorial was rededicated in May 2015 as part of a tribute in honour of all of the RCAF pilots and personnel who have served for this country, past and present, and also in honour of the Golden Hawks aerobatic team, including the pilots, crew chiefs, and ground personnel. The Sabre jet's most notable Golden Hawk pilot, F/L Jim McCombe and his flight crew—LAC Harnum and LAC Campbell—were honoured by having their names lettered beneath the canopy trim in the tradition of the Golden Hawks. Among those in attendance at the May 2015 re-dedication ceremony were; Lt. Col (Ret) Joseph "Fern" Villeneuve, the first leader of the Golden Hawks

aerobatics team in 1959; Ferne and Karyn McCombe, the wife and daughter of F/L Jim McCombe; and Sarnia-born former Canadian astronaut Chris Hadfield, who remembered being inspired to dream big as a child, after watching the Golden Hawks aerobatic team in action.^N The RCAF Memorial and F-86 Sabre Golden Hawk Monument plaque inscriptions honouring the Golden Hawks aerobatics team is included in this Project on page 1166.

Sarnia F-86 Sabre RCAF Memorial

• **THE KOREAN WAR – “THE FORGOTTEN WAR”:** In the United States, even at the height of the conflict, President Harry Truman referred to it as a “police action” as it was an undeclared military action, conducted under the auspices of the United Nations. UN delegates and political leaders of the sixteen-member nations that contributed troops also described Korea as a “police action.” However, from the very beginning, UN Secretary General Trygve Lie described North Korea’s move across the 38th parallel as “war against the United Nations.”

The Korean War is more often referred to as “The Forgotten War” for three reasons: first, the virtual “stalemate” of the on-going war over time took the war off the front pages of newspapers and Canadians lost interest; secondly, it fell between the Second World War and the Vietnam War, the latter having media coverage which provided people with daily news reports; and lastly, the Korean War ended as an armistice, where there was no victor. Boundaries between North and South Korea were simply readjusted around the 38th Parallel. Even today, technically both North and South Korea are still at war, separated only by the Demilitarized Zone between them.^{D, H, 2E, 2N, 6P}

In Canada, Korean veterans returned to a rather indifferent country, one that was preoccupied with seemingly more important matters, among them: a national pipeline would soon bring Alberta oil to Sarnia; a canal system up the St. Lawrence would soon give Atlantic Ocean freighters access to the Great Lakes; and old-age security cheques were a reality. There were no ticker-tape parades, no brass bands, no civic receptions. Returning veterans were largely forgotten, and in many cases, never even acknowledged for their service despite the bravery shown during the war.

They were not formally recognized as war veterans until the late 1980s when the Canadian government decided that the war was, in fact, a war and not a “conflict”. It was not until 1991 that Korean War veterans were awarded the Canadian Volunteer Service Medal for their service in Korea. During the 60th anniversary of the armistice, the Canadian government designated 2013 as the Year of the Korean War Veteran and made every July 27 **National Korean War Veterans Day**.^{3O, 7A, 9Y, 9Z}

The Korea Veterans Association of Canada: This organization had its beginnings twenty years after the armistice at a small reunion of about 130 Korean War veterans and their wives at Camp Borden. Formed the following year in 1974, its membership would peak to 60-odd branches across Canada. Along with the social aspect, from the beginning, the association worked on behalf of those who served in Korea, including: campaigning to have local cenotaphs to include recognition of the Korean War; representing veterans applying for government support and disability pensions; and lobbying government officials to convince them that Korea was not a “conflict,” but a “war.”^{6T, 9Y}

• **CANADA'S KOREAN WAR MEMORIAL WALL OF REMEMBRANCE:** This memorial is located at Meadowvale Cemetery in Brampton, Ontario. A group of volunteers initiated the Wall Project, forming a committee that collected donations from Legion branches, military associations, service clubs, corporations, businesses, community organizations from across the country and Canadian veterans of the Korean War themselves (no provincial or federal funding was offered). The Wall of Remembrance was dedicated on July 27, 1997, on the forty-fourth anniversary of the Korean War armistice. The curved 61-metre long, 0.6-metre high polished granite wall contains 516 bronze plaques, one for each of the volunteer Canadian soldiers who died serving in the Korea War. The plaques are replicas of those gracing the graves in Busan, South Korea.

On one wall of the Memorial is a poem written by **Jack (John Edward) LaChance**. Jack LaChance was born November 11, 1931 and educated in Windsor, Ontario. He was a veteran of the Korean War, serving two tours of duty with the Princess Patricia's Canadian Light Infantry from August 1950 to September 1952. Jack LaChance was honourably discharged in September 1952. After serving in the war, Jack LaChance married Frances (nee Deschamps) in Windsor in June 1955, and together they raised five children: Wendy, Patti, Jack II, Thomas and James. In 1971, the LaChance family moved to Sarnia where Jack became a well-known and successful businessman. Jack LaChance was also an accomplished writer and poet who published poems and articles in many venues. As long as he was able, Jack LaChance participated in the "Dominion Institute's Memory Project" by speaking in schools on behalf of Veterans of all wars.

In the mid-1990's, when veteran Jack LaChance heard a branch of the Korean Veterans Association of Canada was planning to erect a wall of remembrance of the war, he was overcome with emotion. For many years he had shut his Korean experiences out of his life. He had never even talked to his family about them. As the recollections filled his head, LaChance began jotting them down. He wrote personal anecdotes about Korea, stories for veterans' periodicals and he began an autobiography. The day Jack LaChance received the Wall donation request, he sat down and composed a poem. His poem, entitled *The Korean Veterans Wall*, took him two days to complete. He then mailed it along with his donation to the Wall Committee. Five months later, LaChance was nearly knocked off his chair when he learned that his poem had been chosen to accompany the names on the wall. Jack LaChance would also spearhead a campaign in the Sarnia area to raise funds for the wall. As for his reasoning for getting involved, in 1996 he said, "The war in Korea has almost become a forgotten part of our history. This wall is not a government project but the dream of dedicated veterans who have seen their comrades fall in battle."^N His commitment to having the wall built was a way to honour his friends, who never returned to Canada, and so when the children of Canada see the wall, they will not forget the deaths or the Korean War.

Jack LaChance took part in the dedication of the Korean Wall of Remembrance ceremonies in Brampton in July 1997. Taking part in the ceremony were army cadets, dignitaries, the Queen's Own Rifles of Canada band, the Lorne Scots Pipes and Drums, families of the fallen (including Terri O'Connor, daughter of Patrick O'Connor of Sarnia) and nearly 600 Korean veterans, including Jack LaChance, who paraded to the memorial. As soon as the dedication of the wall was complete, the veterans in the parade broke ranks and removed the poppies they'd been wearing, pinning them on the wall. Some of the men bowed their heads before the plaques; some saluted smartly; others embraced surviving comrades; and many wept. One of the family members to lay a wreath at the memorial that day was Mary Robertson (part of the Wall Committee). Her brother Bernard "Tunny" MacDonald was killed in Korea. About the sense of closure at the wall, Mary said, "It brought me close to [Tunny] again... he was buried in Korea, but we could never go there to see him. But touching the wall, I felt he wasn't in Korea anymore. We have brought their spirits home."

The following is a portion of a story Jack LaChance wrote on his thoughts about that day he visited the wall;

The dedication of the Korean Veterans National Wall of Remembrance on July 27, 1997, was one of the most meaningful and solemn days of my life. Up until that day, I had-for personal reasons-not participated in any Korean War commemorations because I thought it best to bury my thoughts and feelings about the war. But the dedication ceremony at the Meadowvale Cemetery in the southern Ontario city of Brampton was an event I could not miss...

While on board the bus that took the veterans to the cemetery, Jack reflected back to his military training days in the fall of 1950 in Calgary; to his days as an 18-year-old falling in for parade and inspection for the first time 47 years earlier; and of the old rivalries between the different regiments. *My personal feelings were mixed during the short ride to the cemetery... Many of us had still not viewed the Wall, and because of that we were filled with apprehension. We wondered what our reaction would be. A good many of us had visited the United Nations*

Cemetery in Pusan, South Korea, and the cemetery at the Yokohama British Commonwealth War Cemetery in Japan. The visits had been traumatic, to say the least.

After disembarking the bus, participating veterans from all parts of Canada marched to the Wall... It was an absolute honour to be part of that historic event... My impression of Canadian veterans is and always will be awesome. Most of these guys would do it all over again if our country called. Many were fit and still healthy. Others marched to the Wall with canes, wheelchairs, bad backs or sore legs. Yet we all had one thing in common. When the drummer struck his first rat-a-tat, we all had smiles on our faces and enthusiasm and pride in our hearts. These-to me-were some of the emotions that carried us into battle on the desolate hills of Korea. Our gait and cadence may have been slower, but inside we were once again marching soldiers...

As we got closer I heard the songs and cadences we had sung while marching years before. There was the unmistakable click of heavy cleated boots on pavement, and the always present mumbling in the ranks. But most of all I envisioned once again hundreds of young Canadians in full marching order, in unity, and each one willing to put their lives on the line to make our country and this world a better place.

I remember looking around at the crowd to see if I could spot the faces of my wife and four of our five children and their spouses. Perhaps some of the other guys felt the same way I did because most of us had tears running down our cheeks. My thoughts at that moment were: How thankful I am to be alive and having experienced the privilege of having a family, watching our children and grandchildren grow, living in a country as great and as free as Canada. What a blessing it was to be able to say to the Canadian soldiers who never came back from Korea: "Thank you guys, for helping make my dreams come true. I pray you know how much you are appreciated." ...^{2E}

Jack LaChance passed away on September 9, 2018 in Sarnia. He left behind his wife Frances, their five children, thirteen grandchildren and ten great grandchildren. He is buried in Our Lady of Mercy Cemetery in Sarnia.

Following is Jack LaChance's poem that is engraved on the Korean War Memorial Wall of Remembrance:

The Korean Veterans Wall

*Each uniquely mounted nameplate
On this Korea Veterans' Wall
Tells the story of a Person
Who rallied to their country's call*

*With courage and with Vigor
They trained and went to war
And shielded us from danger
On the South Korean shores*

*They gave their lives for freedom
That we all share today
In a far-off foreign country
Where most of their bodies lay*

*We still hear the buglar sounding
Each stirring note of his "Last Call"
While viewing all the nameplates
On this Korea Veterans' Wall*

BIOGRAPHIES OF SARNIA'S KOREAN WAR FALLEN SOLDIERS

KNIGHT, Edward Joseph Michael (#SA2506)

Sarnia born Edward Knight enlisted in the Canadian Army in October 1951 and five months later was deployed to Korea. One year after he enlisted, Edward was killed during the vicious fighting to take control of Hill 355. Edward, age 21, is buried in the United Nations Cemetery in Busan, South Korea and also has a memorial plaque on the Korea Veteran's National Wall of Remembrance in Meadowvale Cemetery, in Brampton, Ontario.

Edward Knight was born in Sarnia on March 14, 1931, the son of William Walter Knight and Violet Winnifred Wynne, of 183 Water Street, Sarnia. Edward's siblings (and ages at the time of his death) were brothers Donald Lawrence (19); Clifford John (17); and Gerald (8); and sisters Mary (25); Charlotte (15); and Theresa (14). Raised in Sarnia, Edward attended Our Lady of Mercy Elementary School and was a member of St. Joseph's Catholic Parish, Sarnia.

Edward, age 20 and single, enlisted in the Canadian army on October 24, 1951 in London, Ontario. He arrived in the Korean theatre five months later and was due to return on rotation leave at Easter of 1953. Private Knight was a member of the Army, the Royal Canadian Regiment (RCR), 1st Battalion.

By mid-1951, UN Command had re-established the 38th parallel as a stalemate line--the two sides had begun to solidify and dig in with deep defensive positions around this line. The war was becoming positional and more static. While company-sized attacks were sometimes mounted to improve defences or to keep the enemy off balance, the war was mostly fought from trenches into no man's land with endless patrolling, night raids against hilltop trench positions, repulsing enemy attacks, digging tunnels and trenches, booby traps and minefields, barbed wire, long nights standing guard in slit trenches, and artillery barrages. The enemies faced one another across a no-man's-land ranging from a few hundred metres in width to several kilometres. During this phase of the war, bloody battles raged for strategic high ground.

In early August 1952, the Royal Canadian Regiment was positioned in areas around **Hill 355**. Through the course of the war, the Canadians were often deployed on or near Hill 355, also known as "Kowang San" to the Koreans, and nicknamed "Little Gibraltar" by UN troops. When the Canadians moved onto its heights, they simply referred to it as "Three-five-five." Located about 40 kilometres north of Seoul, this strategically important hill was highly valued because it was the highest ground overlooking the surrounding front lines and supply routes. This strategic importance meant it would be the scene of fierce combat as both sides wanted to have it.

On two particular occasions, in late November 1951 and in late October 1952, Canadian troops were engaged in desperate fighting against heavy artillery and waves of Chinese soldiers. The Canadians held their positions in both battles, and no ground was yielded. The sacrifices and achievements in the area of Hill 355 were a significant chapter in Canada's Korean War history.

Towards the end of August 1952 when the RCR's were there, torrential monsoon rains caused many bunkers to collapse and made many more unserviceable. In late September, when the skies cleared and the slime began to dry, the soldiers began to repair their positions. It was during this time that the enemy gradually became more aggressive. The Chinese moved into no-man's-land with more strength and proceeded to attack patrols, to raid forward positions with increased harassing fire, and to support raids with more powerful concentrations of mortar and artillery fire. In the first three days of October 1952, RCR positions were bombarded heavily by enemy artillery. The hostile guns and mortars slackened until the 17th, when it began again.

Between October 17 and 22, very heavy enemy bombardments badly damaged their defences, cutting telephone wires and caving in weapon pits. One RCR Captain said, "For four days they just laid the boots to us with every gun they had."

Dawn on the 23rd saw no let up in the heavy shelling and a number of the RCR bunkers were demolished. In the early evening of October 23, another enemy heavy artillery barrage began. Soon after, with bugles blowing and soldiers yelling and screaming, the Chinese launched their large assault force in waves and a firefight ensued. Under heavy assault and with communications cut off, some of the Canadians were forced to abandon their defensive positions to the surging enemy that overran them.

From the night of October 23 until the early morning of October 24, Canadian artillery, tank and mortar fire on the captured areas halted the Chinese advance and prevented them from resupplying their front line. The Chinese

were forced to withdraw. Through the chaos of small arms fire, grenades and mortar fire, and with the support of their own artillery, the Canadians counterattacked and succeeded in regaining control of Hill 355 by the early morning of October 24. The casualties sustained by the Royal Canadian Regiment on October 23 and 24 were eighteen killed, thirty-five wounded, and fourteen prisoners of war. One of those killed was Sarnian Edward Joseph Knight.

Private Edward Joseph Knight

One year after he enlisted, on October 23, 1952, Private Edward Knight was killed in action during fighting at Hill 355. Several days later, his mother Violet in Sarnia received word that her son, PRIVATE EDWARD KNIGHT, WAS KILLED IN ACTION IN KOREA ON THURSDAY OCTOBER 23. Edward Knight, 21, is buried in the United Nations Cemetery in Busan, South Korea, Plot 21, Row 8, Grave 1346. He also has a memorial plaque on the Korea Veteran's National Wall of Remembrance in Meadowvale Cemetery, in Brampton, Ontario. This memorial has plaques for each of the 516 Canadian service men who died while serving with the Canadian Forces in the United Nations operations in Korea. Edward Knight's name is also inscribed on the Monument to Canadian Fallen (Korean War Monument) in Busan and Ottawa. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

O'CONNOR, Patrick William (#A/800440)

Patrick O'Connor, 26, wanted to do his duty to his country. Five years after fighting in WWII, he enlisted in the Korean War despite being a veteran with a new life as a married father of two young children. Affectionately named "Old Man" by the younger members of his unit, the "Old Man" died saving some of his fellow soldiers. He was the first Sarnian to die in the Korean War, and when his body was recovered, among his effects was a stirring twenty line poem on Korea that he had penned the day before his death. Patrick O'Connor is buried in Busan, Korea.

Patrick O'Connor was born in Sarnia on February 5, 1924, the son of James Philip and Angela Loretta (nee Barry) O'Conner. James (born in Oil Springs, Ontario) and Angela (born in St. Mary's, Perth, Ontario) were married on January 2, 1918 at Our Lady of Mercy Church in Sarnia. They had six children together: sons James Michael Barry (born 1919, went by Barry); John Edward (born November 1922); Patrick William; and Joseph Peter (born 1932); and daughters Mary Catherine (born 1921, later Mrs. Lloyd Mathers) and Margaret Lorraine. James supported his family by working as a contractor and the O'Connor family resided at 231 Harkness Street and later lived at 236 Proctor Street. At the time of Patrick's death, the family was living at 356 Cameron Street, Sarnia.

Two of Patrick's brothers served in the Second World War: John Edward, a Private in the Royal Canadian Army Corps, attached to National Defence Headquarters in Ottawa; and oldest brother James Barry O'Connor who, as a member of Royal Canadian Air Force (RCAF) Bomber Command, was killed in action against the enemy in April 1943 (James Barry O'Connor's story is included the World War II section of this Project on page 904).

Patrick O'Connor was born and raised in Sarnia. He was a member of St. Joseph's Catholic parish and was educated at Our Lady of Mercy Elementary School and St. Patrick's Catholic High School from which he graduated in 1941. Patrick was a veteran of World War II, where he served four and a half years with the Royal Canadian Naval Volunteer Reserve (RCNVR) on convoy duty from Newfoundland to Londonderry as a Stoker 1st Class. When Patrick enlisted in WWII, his brother Barry was already overseas serving with the RCAF. They never saw each other again.

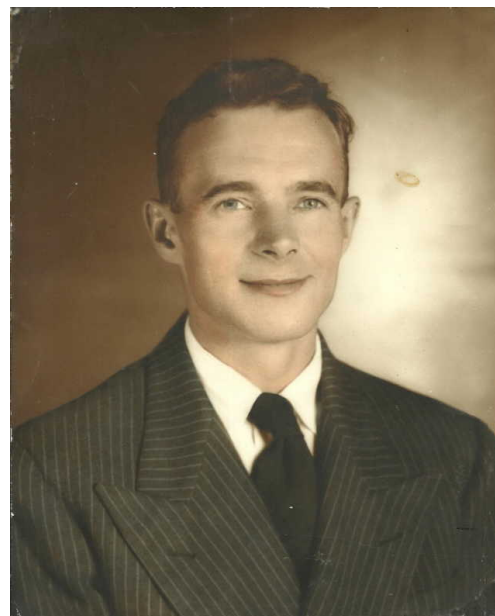

It was while patrolling the Atlantic that Patrick received word that Barry was missing in action. Warrant Officer Class II James Michael Barry O'Connor, along with the rest of his crew, lost their lives when the Halifax Bomber aircraft they were in failed to return from a night operation off the coast of Norway on April 28, 1943. The aircraft and crew were never found, and it was not until early 1944 that Barry O'Connor was officially listed as, *Previously reported missing after air operations, now for official purposes, presumed dead.*

One of the ships that Patrick O'Connor served on during WWII was the Royal Canadian destroyer, *H.M.C.S. Gatineau (H61)*, dubbed one of the "seagoingest" ships in the Canadian service. The ship had been tagged with this nickname because since being commissioned by the RCN in June of 1943, it had spent more than 80 percent of her time at sea. Besides Stoker Patrick O'Connor, other local men in the crew were Seaman Petty Officer A. Horley (son of Mr. and Mrs. C.W. Horley of 131 John Street, Sarnia); Able Bodied Seaman Arthur Forbes (of Forest); and Able Bodied Seaman A. Whitmarsh (of Dresden).

By August of 1944, the *Gatineau* had spent months carrying out convoy sweeps, anti-submarine patrols, forays with the enemy, strenuous rehearsals for D-Day and patrol operations in the English Channel during the assault on France. The *Gatineau's* experiences during that time included the probable destruction of an enemy E-boat in the English Channel; "assists" in successful attacks on two U-boats; and the shooting down of a number German robot bombs (V-1's). Lieutenant Commander Harold Groos said it was likely that the men of the *Gatineau* had seen the first of the V-1 bombs in use during their operations in the English Channel a few days after D-Day.

(and sister Mary Catherine's oldest child, Brian Mathers)

Patrick William O'Connor

Patrick survived World War II and returned to Sarnia. On October 19, 1946, he married Vera Irene (nee Moore) O'Connor at St. Joseph's Roman Catholic Church at a noon ceremony. Vera was the daughter of Mrs. Janet Moore of 213 Cromwell Street and the late W.R. Moore. At the time of their marriage, Patrick's parents, James and Angela, were residing at 236 Proctor Street. Patrick and Vera O'Connor were blessed with four children: their daughter, Terri Patricia, was born August 16, 1947 at St. Joseph's Hospital in Sarnia; their first son, Michael Moore, was born January 14, 1949; and twin sons Jon and Gerald were born December 21, 1949 at St. Joseph's Hospital. Unfortunately, Jon and Gerald died at birth and never made it to the family home at 735 Oak Street. Prior to enlisting, Patrick worked as a driver-salesman with a local Sarnia bakery where he operated a horse-drawn delivery wagon.

Patrick on Oak Street, Sarnia
(the day he left for Korea)

Only five years after the end of World War II, the Korean War broke out on June 25, 1950. Approved in advance by the Russian and Chinese governments, the Soviet-trained and equipped army of North Korea crossed the 38th Parallel invading South Korea, an overt attempt to unify Korea by force. The United Nations responded with a call to its members to form a multinational “police force” under the command of the United States to restore the peace. It was on August 7, 1950, that Prime Minister St. Laurent announced on CBC Radio that Canada would recruit an expeditionary brigade of 5,000 men for duty in Korea, a force known as the Canadian Army Special Force.

Patrick O'Connor and Vera discussed his decision to enlist. Vera was supportive of her husband, but pointed out that they had two small children and only one income. She also reminded her husband he'd served four years as a stoker aboard RCN corvettes escorting North Atlantic convoys during the last war, and maybe it was up to someone else this time. But Patrick insisted that “somebody had to stop the communists.” A short time later, Patrick O'Connor packed up, said his goodbyes at home (the family didn't have the cab fare to get everybody to the train station) and left to join the army.^{9Y}

His plans for when he returned from Korea were to attend medical school. Patrick O'Connor, 26, enlisted for service in the Korean War with the Canadian Army on August 21, 1950 in London, Ontario. He became a member of the 25th Canadian Infantry Brigade, 2nd Battalion, The Royal Canadian Regiment (RCR) – “D” Company, serving as a company stretcher-bearer. He was a little older than the other members of his company. Following initial training with the regiment, the brigade was transferred to Fort Lewis, Washington for further training, before sailing for the Korean war-zone in April 1951. While at sea, among the bits of news that they received were the results of a new Canadian census reporting a population of just over 14 million; reports of the Princess Patricia's epic stand at Kapyong; and that US President Truman had fired the UN commander-in-chief, Douglas MacArthur.

Landing at Pusan in early May, the Canadians had a brief period of acclimatization and training—a time to acquaint themselves with the best battle tactics in the hilly country--before being moved to the front. Patrick carried a notepad with him, and in quiet moments wrote poems and rebus stories (stories with drawings) to his three year-old daughter Terri, and his infant son, Michael. Sometimes the rebus showed stick men or trees or the sun, but every note or story signed off “Love and kisses. Pat.”^{9Y}

By May 27, the 2nd Battalion, Royal Canadian Regiment, along with the Royal 22e Regiment, began an advance north of the 38th Parallel. It halted near the burnt-out North Korean village known as Chail-li, at the foot of a formidable mountain barrier named Kakhul-Bong (Hill 467). This area was a main supply gateway for war materials shipped down from Manchuria and was also an important Communist communications centre, thus was vigorously defended by a highly trained and well-equipped Chinese army. The Hill 467 peak offered a clear view northward some thirty kilometres, and to the south, one could see all the way to the 38th parallel. The Canadians didn't know it, but the Chinese troops on top of Hill 467 had been observing the Canadians' advance and had dug in

for the impending attack. RCR Platoon commander Lt. Don Stickland recalled, *"On May 30, the major [Harry Boates] told us we were moving north toward this huge Gibraltar-of-a-hill... And he says, 'You'll be covered first of all by artillery and then by aircraft. Nothing to it, just go to the top of the hill and occupy it.'"*

The RCR battalion's first full-scale action of the war was to attack **Hill 467** and the adjacent village of Chail-li that lay beyond it. The plan was for "A" Company to seize the village of Chail-li to the north of the hill; "B" Company was to secure the left flank by occupying Hill 162 to the west; and "C" Company was to capture the lower Hill 269 between Chail-li and Hill 467. The main assault on the twin peaks of Kakhul-bong (Hill 467) was assigned to "D" Company.

The operation began in the early morning of May 30, 1951 under a grey, misty and drizzly sky. The weather soon turned into a driving rainstorm making traction in the sloppy mud difficult. "B" Company would reach its objective, Hill 162, with relative ease. "A" Company would reach the village of Chail-li ahead of schedule, but would soon find itself nearly surrounded by approaching Chinese. "C" Company would reach Hill 269 just as quickly, but would soon be pinned down by enemy fire. The scene up Kakhul-bong (Hill 467) was much worse.

"D" Company met strong opposition while climbing the steep rocky slopes. Lieutenant Don Stickland, in charge of No. 12 Platoon in "D" Company recalled, "Our guys were pretty gung-ho when we started. I had one platoon ahead of me and a couple more behind... And there was no problem. Half way up the hill, approaching a small plateau, there was a sudden burst of firing." Stickland first heard moaning ahead of him. Then another machine-gun burst. More shouts. One man had been hit in the stomach, another nicked in the head. A third was hysterical and screaming, "I'm hit! I'm hit! Save me!" To his left, Stickland's corporal, R.A. Edmonds, had been hit and was crumpled over with his Sten gun slung awkwardly around his neck. Edmonds died moments later in the lieutenant's arms.

Meanwhile, the same light machine-gun fire from the Chinese had pinned down the two platoons that were following. They too had sustained wounded, and stretcher-bearer Patrick O'Connor had successfully removed several of the fallen. Fellow Sarnian and RCR stretcher-bearer Ed Haslip would never forget his friend Pat O'Connor. He remembered O'Connor moving through the dead and dying, giving them comfort, bandaging wounds, occasionally praying with them, all while ignoring his own exposed position. In a couple of cases, dying men held his hand and whispered their final words in his ear. To others who were wounded he gave support, told them they would be okay, and occasionally dried their tears of pain and fear that he saw on so many of the young faces around him.

In an attempt to silence the machine-gun fire, Stickland had a sergeant and two section leaders lay down covering fire, and he began a flanking move. When the gunfire from the Chinese position stopped momentarily, Stickland turned to see Patrick O'Connor dashing up toward him to assist in removing the wounded. There was another burst from the machine gun. It caught O'Connor in the body. He stumbled over his stretcher and rolled over dead. Patrick O'Connor and another stretcher-bearer, in their gallant desire to render first aid to a wounded comrade, were killed almost instantaneously.

Ed Haslip saw O'Connor cut down by the enemy machine gun fire. *"He died trying to save the lives of the men with him. In my opinion, he should have received the Victoria Cross. He was a completely selfless and dedicated soldier, as well as a wonderful human being."*⁹²

Patrick O'Connor was considered the "old man" of his platoon, being that he was 27 years old and a veteran of World War II. His fellow soldiers were teenagers, whom Patrick referred to as his "boys". On the day of his death, as the platoon was pinned down by heavy fire, Patrick approached his lieutenant, Lt. Don Stickland, and said, *"To the hell with it, I'm going after my boys"*. These were the last words he is known to have spoken.

Stickland later recalled that it was also about this time in the battle that he realized that none of the air strikes nor any of the artillery cover promised by Major Boates had ever materialized. To add to the discomfort and confusion, the farther up the peak Stickland's platoon moved, the heavier the rain and the muddier the ground became. All the while, Stickland's radio operator, Private Mancuso, kept sending messages and information to the rear where company headquarters was located. The only response heard was the calm voice of company commander Major Boates, saying, "Move on. Move on. They're not firing now!"

Stickland's platoon would win the skirmish for the western peak, but fighting for the eastern peak continued into the afternoon. Repeated attempts failed to dislodge the defenders who took advantage of an extensive trench system, mortar fire and a well placed machine-gun on the pinnacle of the hill. With all four companies in trouble—

“D” Company stuck on the western peak of Hill 467; “A” Company nearly surrounded at Chail-li; and “B” and “C” Companies becoming increasingly isolated from the two main battle areas—brigade headquarters ordered all companies to begin a fighting withdrawal. By 1900 hours, with the 2nd RCHA artillery laying down a screen of fire against the pressing Chinese, the last company had pulled clear of the hills. The Royal Canadian Regiment could not hold Chail-li or take Hill 467. The Canadian casualties that day were six killed (including Patrick O’Connor) and 54 wounded.^{D, 6R, 6S, 9Y, 9Z}

A week after the battle for Chail-li and Hill 467, when he was behind the lines, Don Stickland drew a cartoon in the sketch pad he always carried with him, of the RCR soldiers crawling up Hill 467. Bullets from the Chinese machine guns are ricocheting everywhere, including off the radio set from which the major’s words were still ringing: “Move on. Move on. They’re not firing now!” Following is the account by Lt. Don Stickland, second battalion of The Royal Canadian Regiment, whose platoon was ambushed by a Chinese machine gun group:

"We were given the task of replacing D Company. Half way up the hill we ran into a small enemy machine gun group. We were coming up a well-worn path, more or less spread out. We came just up to the halfway point, to a bit of an open area. When the machine gun opened up, I recognized it was Chinese. Some of our guys got under a rock. Some were left in the open; some were killed outright. I tried to organize a counter attack. Our third section had just disappeared. Seven were wounded in my platoon.

We tried to throw some grenades. There was not much you could do. I could hear all these voices below. Paddy (O'Connor) was the stretcher-bearer for the Company. He came running up with the stretcher over his shoulder and took cover beside me. After a few minutes, he said, 'To hell with it I'm going after my boys' and stood up. He was right beside me. All of a sudden he rolled over dead. We were all so close. He had been shot three or four times. The stretcher hit the ground and then the first aid kit. Corporal Edmunds had been hit, too. He had a Sten gun round his neck and he asked me to remove it because it was uncomfortable. It all happened so fast I can't remember the details. He died.

We went up to the top of the hill eventually. Some people say they saw hordes of Chinese. Apart from the two Chinese I saw dead in the trench, I never saw any. Rockingham ordered us back. Our men performed marvelously.^{6U, 9Y}

On that day of battle, 2nd Battalion RCR also learned something about its allies. Like all United Nations units, it had its attached details of the **Korean Service Corps**. “Our bearers”, wrote Lt. Stickland, “quickly came up, bringing our reserve ammunition. One of their lads, when we first came under fire, grabbed a rifle from one of our wounded and was quite ready to do his share in the fighting. The Koreans waved me aside and took over the task of laying out the three bodies and carrying them to the rear. This they did with a certain reverence, as though it were a privilege to look after our fallen.”^{6S}

Private Patrick O’Connor had been in Korea for only one month, and was in action just five days before losing his life on May 30, 1951, less than one year after enlisting. He was the first Sarnian to be killed in the Korean War. Patrick’s widow, Vera O’Connor, still residing at 735 Oak Avenue, learned of his death from officers of the Regiment. Reverend A.J. Ruth, Roman Catholic Chaplain with the Royals, wrote the following about Patrick: *He died as a soldier trying to help a wounded comrade and your children may be justly proud of their father.* Lt.-Col. Keane, Officer Commanding, Second Battalion, R.C.R.s also wrote Mrs. O’Connor: *Your husband was a very fine man, well-liked by all, and with a courage that can only be part of a fine moral character.* Vera also received a letter from Lt. Don Stickland. He praised the heroism of Patrick O’Connor: *On the day Pat was killed, my platoon was leading an attack on ‘Hill 467’. Half way up the mountain my forward section came under intense fire which killed two and wounded four others. Pat came running up the hill, ignoring the danger to himself in his desire to get to the wounded. A burst of fire hit Pat... He lived only long enough to reach for his missal... He died as he had lived, trying to aid others with his wonderful unselfishness.*

A short time later, Patrick O’Connor’s personal effects arrived at the family home in Sarnia, including that prayer book, a wallet, a bracelet, a comb, some snapshots, a tobacco pouch and a writing pad. Vera hid them from her children because they were splashed with his blood. In December, a letter arrived from the parents of Private Howard Root, a wounded soldier O’Connor had brought away from the battle of Hill 467. Enclosed was a slip of paper and a poem that Patrick O’Connor had written.

A few hours after O’Connor had been killed, Private Root was gathering up O’Connor’s personal belongings for shipment to his widow in Sarnia. While doing so, a sheaf of tattered paper fell to the mud floor of the bunker

where he had spent his last day on earth. On one of the pages was a poem, one that O'Connor was seen writing the night before he was killed. The paper was passed around the bunker, and a clutch of misty-eyed young soldiers with trembling hands read the heart-wrenching words that might well have been an epitaph not only for Patrick O'Connor, but for all the brave young men who lost their lives in Korea.

Following is Patrick O'Connor's poem written May 29, 1951:

Korea

*There is blood on the hills of Korea
T'is blood of the brave and the true
Where the 25th brigade battled together
Under the banner of red, white and blue
As they marched over the fields of Korea
To the hills where the enemy lay
They remembered the Brigadier's order
These hills must be taken to-day
Forward they marched into battle
With faces unsmiling and stern
They knew as they charged the hillside
There were some who would never return
Some thought of their wives and their mothers
Some thought of their sweethearts so fair
And some as they plodded and stumbled
Were reverently whispering a prayer
There is blood on the hills of Korea
It's the gift of the freedom they love
May their names live in glory forever
And their souls rest in heaven above*

The reality of the Korean War hit home in Sarnia with the May 31, 1951 *Canadian (Sarnia) Observer* front page headline, "Sarnia Man, 27, Father of Two, Dies in Korea". Following is a portion of that news article:

The Korea War came right into Sarnia today when it claimed the life of Private Patrick O'Connor, 27, husband of Mrs. Vera Irene (Moore) O'Connor, 735 Oak street (Eastview subdivision). Word of his death was received here last night. The young father of two, who had served his country in World War Two, answered the call for recruits last August when the Canadian Special Service Brigade for Korea was ordered as part of the United Nations Forces... He was in action on the quickly changing battlefield only five days when he was killed yesterday. It was yesterday that Red Chinese troops massed in attack against positions held by the Ontario regiment. Late reports indicated that the battle was still raging for possession of a key position on the central front...

Patrick O'Connor with Vera Irene

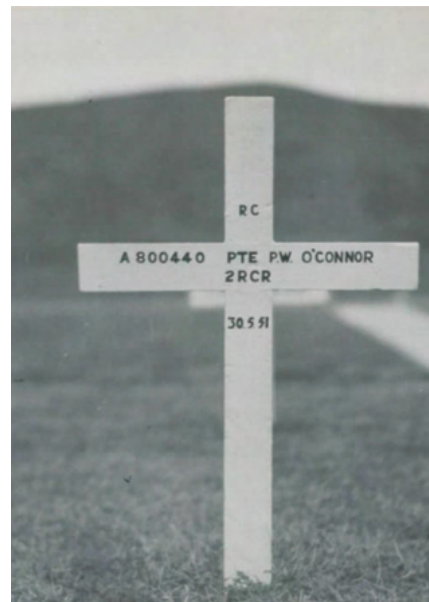

The following is a portion of an editorial from the June 1, 1951 *Sarnia Observer*:

The first Sarnian to make the supreme sacrifice in the Korean War has been Private Patrick William O'Connor... He has died, as did his brother, Warrant Officer Barry O'Connor and others in the Second World War, in an effort to preserve our way of life... Private O'Connor after having served during the previous hostilities and in consideration of the sacrifice of one life already made by his family in that struggle against German domination, might have been excused had he chosen to ignore the call for volunteers to combat the current Communist aggression and remain at home with his wife and young family. The fact that he did not do so but rather again answered his country's call should be an inspiration to others to emulate his patriotism and valor... The sympathy of the community goes out to those who are bereft by the scourge of war. Casualties among our fighting men bring home to us all the tragedy of such conflicts but they also emphasize that our freedoms are not cheaply bought or preserved.

A few days after receiving the news of Patrick O'Connor's death, the Rev. Father A.N. Nolan, pastor of St. Peter's Roman Catholic Church, led a memorial military mass at St. Peter's Church. The *Sarnia Observer* detailed some of the details of his death in early July 1951, under the heading, "Sarnia Veteran Sacrificed Life To Aid Wounded".

Private Patrick William O'Connor

Twenty-seven year old Patrick O'Connor is buried in the United Nations Cemetery in Busan, South Korea. He also has a memorial plaque on the Korea Veteran's National Wall of Remembrance in Meadowvale Cemetery, in Brampton, Ontario. This memorial has plaques for each of the 516 Canadian service men who died while serving with the Canadian Forces in the United Nations. Patrick's daughter, Terri, attended the unveiling of the National Wall of Remembrance in July 1997. Terri, who grew up feeling "I only had a father on Remembrance Day", had pursued legal channels to have his remains returned to Canada; however, she accepted her father being buried in Korea when she kept hearing other veterans say that her father's body belonged where he had fought. According to Terry, "he's where he's supposed to be and we can come here to the monument.

Patrick O'Connor's name is also inscribed on the Monument to Canadian Fallen (Korean War Monument) in Busan and Ottawa. Patrick has many well-deserved citations: 1939-1945 Star; France and Germany Star; Defence Medal; War Medal 1939-45; Canadian Volunteer Service Medal with Clasp; Korea Medal; and United Nations Service Medal Korea. For parents James and Angela O'Connor, they had now lost two sons: Barry of the RCAF in April 1943 and Patrick eight years later. On the November 11, 1952 Remembrance Day ceremony held in Victoria Park in Sarnia, over thirty wreaths were laid at the foot of the Sarnia cenotaph. The first wreath laid that day was by Vera O'Connor, now a widow with two young children--Terri Patricia, age five, and Michael, age three and a half.

Before she had lost the twins, Vera's mother, Janet Moore, and Elsie Moore, one of Vera's sister's, had been residing with Patrick, Vera, Terri Patricia, and Michael. After Patrick was lost in war, Grandma Janet and Aunt Elsie continued to reside with Vera and the two children. Janet Moore passed away in 1953, but Vera and Aunt Elsie

together raised Terri Patricia and Michael in a disciplined, loving environment. Vera supported her family by working at Autolite (later Prestolite) beginning in 1939 or 1940, where she worked for over 36 years.

At various times when she was laid off from Autolite, Vera worked at Patterson's restaurant, Woolworth Five and Dime, the YMCA, the Boulevard restaurant and the Chipican restaurant. Terri and Michael described Vera as an amazing mother and spectacular grandmother. Vera O'Connor passed away in August 2002 at the age of 80 and is buried in Lakeview Cemetery (the same location that Elsie Moore is buried). She wanted to be buried with the twins, but they were in the children's portion of Our Lady of Mercy Cemetery and it was not allowed. Vera O'Connor was, like Patrick, a loving parent and hero.

O.L.M. Cemetery, Sarnia

A memorial headstone in Our Lady of Mercy Catholic Cemetery in Sarnia is inscribed with the names of six O'Connor family members, including; parents James and Angela O'Connor, and their children: Joseph Peter, Mary Catherine, W.O. Barry R.C.A.F. and Pte. Patrick O'Connor R.C.R.

TOOLE, John Richard (#B801850)

Born in Point Edward, John Toole moved to Hamilton with his family when he was twelve. At 21, he enlisted in the Korean War in August 1950 and was in action by February. On October 11, 1951, Corporal Toole was killed in fighting on Hill 187. His patrol engaged an enemy patrol early in the morning and John did not receive the signal to retire with the rest of his patrol. His fellow soldiers heard the firing of his Sten gun and then silence. His body was never recovered.

John Toole was born in Point Edward on March 30, 1929, the son of Charles Elgin (born in Sarnia) and Ellen Sadie (nee Foster, born in Hamilton) Toole of Hamilton. Ellen had formerly lived in Point Edward. Charles and Ellen Toole had five children together: sons John Richard; James Norman (born 1936); and Allan Charles; and daughters Elizabeth Jean and Linda May. John Toole attended Point Edward Public School. At the age of twelve, the Toole family moved to Hamilton. There, John attended high school for two years, after which he worked in the Steel Company of Canada until he enlisted.

Only five years after the end of World War II, the Korean War broke out on June 25, 1950. Approved in advance by the Russian and Chinese governments, the Soviet-trained and equipped army of North Korea crossed the 38th Parallel invading South Korea, an overt attempt to unify Korea by force. The United Nations responded with a call to its members to form a multinational "police force" under the command of the United States to restore the peace. It was on August 7, 1950, that Prime Minister St. Laurent announced on CBC Radio that Canada would recruit an expeditionary brigade of 5,000 men for duty in Korea, a force known as the Canadian Army Special Force.

John Toole, age 21 and single, enlisted in the Canadian Army on August 22, 1950 in Toronto. He trained in Calgary, becoming a member of the Princess Patricia's Canadian Light Infantry (PPCLI) R.C.I.C. – D Company, attaining the rank of Corporal.

Corporal John Richard Toole

Corporal Toole embarked overseas with the first contingent of Canadians to leave for Korea. On a rainy Saturday, November 25, 1950, nine hundred plus members of the Patricias set sail from Seattle across the Pacific. At that time, the war looked to be nearing its end as the North Korean forces had been pushed back almost to the Chinese border. At first, it was uncertain whether or not Canadians, who had yet to do any serious advanced training, would see combat. It was estimated that the battalion would be ready for action, if needed, by March 15, 1951. It was on board the US built Liberty-class ships crossing the Pacific that average Canadian soldiers learned about some basic differences between themselves and their American counterparts. Most of the GIs were draftees, conscripted by US selective service legislation, while most of the Canadian servicemen were enlistees.

After nearly twenty days at sea, on December 14, 1950, the Canadians' ship pulled into Tokyo Bay and tied up at the port of Yokohama. By the time the Canadians' ship reached its destination, the war situation in Korea had completely changed. Instead of doing "occupational duty" or having time to acclimatize and to train, the emphasis had shifted to the speed with which the battalion could be thrown into action.

On December 18, the PPCLI boarded trucks and travelled to the city of Mokto, an island on the edge of Pusan. In 1950, Pusan was the second-largest city in the country, though its inhabitants were impoverished and lived in mud-huts and shacks and travelled on narrow, potholed roads. By far the most powerful recollection soldiers had of their first contact with Pusan was "the smell". Soldiers' remembered the overpowering stench of human excrement which was used to fertilize the fields. They saw people rooting through garbage. And many of the Canadian volunteers remembered asking themselves, "What in the world am I doing here?"

Two days after Christmas, the PPCLI battalion moved out of Pusan eighty kilometres north to begin their intensive training in weapons and tactics. Training included extensive hill-climbing, cross-country manoeuvres and battle exercises incorporating their own firearms--.303 Lee-Enfield bolt-action rifles, Bren guns, 81-mm mortars and Vickers medium machine guns. By February 1951, the Patricias were on the move and had joined the 27th British Commonwealth Infantry Brigade (with two British and one Australian battalion) in a general advance against Chinese and North Korean forces fighting rearguard actions south of the 38th parallel.

Progress was difficult, as hills rose on either side; hill positions had to be dug through deep snow; and the weather was bitterly cold. In February and March of 1951, the Canadians were thrown into a series of skirmishes and battles chasing Chinese troops northward, not allowing them to break contact or regain strength. By early April, US forces and the Commonwealth Brigade, including the Patricias, had reached the 38th Parallel. Later that month, in the valley of the Kapyong River, the communists would begin their spring offensive back into South Korea.

Some of the heaviest fighting Canadian soldiers experienced in the war took place during the Battle of Kapyong in April 1951. The victory here was one of Canada's greatest, yet least-known, military achievements. For two days, a battalion of roughly 700 Canadian troops of the PPCLI helped defend a crucial hill in the front lines against a force of about 5,000 Chinese soldiers.

By mid-1951, UN Command had re-established the 38th Parallel as a stalemate line--the two sides had begun to solidify and to dig in with deep defensive positions around this line. The war was becoming positional and more static. While company-sized attacks were sometimes mounted to improve defences or to keep the enemy off balance, the war was mostly fought from trenches into no man's land. The fighting featured endless patrols; night raids against hilltop trench positions; booby traps, minefields, and barbed wire; artillery barrages; long nights standing guard in slit trenches; and repulsing enemy attacks and digging tunnels and trenches. The enemies faced one another across a no-man's-land ranging from a few hundred metres in width to several kilometres. During this phase of the war, bloody battles raged for strategic high ground.

On October 11, 1951, only a few weeks after returning to front line action, Corporal John Toole lost his life during fighting on **Hill 187** in South Korea. He had gone out on a patrol that night to guard a group of volunteers laying a communication line. At about 3 a.m., his patrol engaged an enemy patrol that was threatening the wiring party. He failed to get a signal to retire with the rest of the patrol and was left behind. Communist soldiers moved into the area and his Sten gun was heard firing until 3 a.m. followed by silence. Four of the Patricia's were wounded and one who had been killed in action was recovered. Corporal Toole was never located, despite a lengthy search.

In mid-October of 1951, Sarnia citizens would read in the *Sarnia Observer* that Corporal John Richard (Dicky) Toole, former Point Edward youth, was reported "missing in Korea". His Sarnia relatives included Mr. and Mrs. John M. Toole, grandparents on East Street; Mrs. John Foster, grandmother; Mrs. Thomas Prudence, Mrs. George Harris, Mrs. Harry Ireland and Mrs. Gordon Burgess, all aunts; and Orville Toole, an uncle.

In early May 1953, the 3rd Battalion of the Royal Canadian Regiment (RCR) took part in a fierce battle on this same Hill 187. The Canadians repulsed a massive attack by Chinese troops but the RCRs lost more soldiers that night than any other Canadian battalion did in a single engagement during the Korean War--26 killed, 27 wounded and seven taken prisoner. It was the Canadian Army's last major firefight of the Korean War.

On July 27, 1953, the day the armistice was signed, ending the Korean War, the Canadian Army issued a list of 45 personnel reported as missing in action or as prisoner-of-war. The air force reported one missing Canadian. Included on the Canadian Army's published "missing in action" list was Corporal John Richard Toole, Hamilton, Ontario. There was hope, although slim, that some soldiers in the missing category might prove to have been captured. Hope dwindled with reports from the Communists that they would return 14 Canadians they were holding as prisoners-of-war.

The task of exchanging prisoners began in early August of 1953 when the North Koreans released 400 Allied POWs, including Cpl. Joseph Pelletier of nearby Chatham, Ontario. Relatives of John Toole in Sarnia anxiously awaited word of his whereabouts. For 22 months, no word was heard from him. His name had been given out as a prisoner, but the U.N. had never been able to confirm the fact. Parents and relatives had received no letters from him, and the first definite word heard was the mention of his name in connection with a Red propaganda broadcast from North Korea. Early reports were that he had been captured and shot in the back. Initially reported as captured in October 11, 1951, it was not until March 5, 1952, that it was reported that he was a prisoner. In August of 1953, his mother, Ellen (Nellie) Toole, in Hamilton said, "Our thoughts were with him all the time. Somehow, I knew he would come back. His buddies on the patrol felt that he would have almost certainly been taken prisoner under the circumstances". Corporal John Toole would later be officially listed as, *Killed in action, October 11, 1951*.

John Toole was awarded several well-deserved citations: Canadian Volunteer Service Medal for Korea, Korea Medal, and the United Nations Service Medal Korea. John Toole, 22, has no known grave. He is commemorated on the Commonwealth Memorial in Busan, South Korea, Plot 21, Row 8, Grave 1346. The memorial is located in the United Nations Cemetery in Tanggok, a suburb of Busan. The stone memorial with bronze petals was erected to commemorate commonwealth soldiers who died and whose burial places are unknown.

Twenty-one Canadians are listed on the bronze plaques, including John Toole of Point Edward, Ontario. He also has a memorial plaque on the Korea Veteran's National Wall of Remembrance in Meadowvale Cemetery, in Brampton, Ontario. This memorial has plaques for each of the 516 Canadian service men that died while serving with the Canadian Forces in the United Nations. John Toole's name is also inscribed on the Monument to Canadian Fallen (Korean War Monument) in Busan and Ottawa. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

WRIGHT, John O'Hara (SB153358)

At age 19 and only two months into his stint in the Korean War, Sapper John Wright was killed in action. While engaged in clearing a road, John was fatally injured by an exploding land mine.

John O'Hara Wright was born in Sarnia on September 20, 1928, the only son of Daniel Dale and Laura Elizabeth (nee O'Hara) Wright. Daniel Wright, 20, the son of John (a farmer) and Jennie Coulter (born June 2, 1905 in Moore Township), married nineteen year-old Laura Elizabeth O'Hara on December 14, 1925 in Wallaceburg, Lambton County. Laura, born May 23, 1906 in Enniskillen, Lambton County, was the daughter of James O'Hara and Laura Smith. They had obtained their marriage license a few days earlier on December 11, 1925 in Sarnia.

Prior to marrying, Laura O'Hara had been residing at 512 Davis Street, Sarnia, while Daniel Wright was living at 109 North MacKenzie Street, Sarnia. Daniel was employed as an electrician, working first at Chambers Electric and later at Goodisons. By 1927, Daniel and Laura Wright were residing at 174 Bright Street, Sarnia where they remained for the next two decades. For many years, Daniel Wright worked at Union Gas.

Daniel and Laura Wright were blessed with four children: daughters Alice Laurine, Orva Jean and Ella May; and their only son John O'Hara. John attended public school in Sarnia, and Sarnia Collegiate Institute, and was a member of Canon Davis Memorial Church. In the mid-to-late 1940s, the Wright family moved to Stratford, Ontario.

Not long after the end of the Second World War was the beginning of the Cold War--a period of military tensions and distrust between the Western Bloc democratic nations (United States and NATO allies) and the Eastern Bloc communist nations (Soviet Union and its allies). The Red Menace threat appeared particularly ominous in the 1940s. Some of the major events that occurred during this period included the creation of the "Iron Curtain"; the Berlin blockade and airlift; and the formation of NATO. Nineteen year-old John O'Hara Wright enlisted for service in the Canadian Army on April 9, 1948 in Toronto, Ontario.

Two years after John enlisted, and only five years after the end of World War II, the Korean War broke out on June 25, 1950. Approved in advance by the Russian and Chinese governments, the Soviet-trained and equipped army of North Korea crossed the 38th Parallel invading South Korea, an overt attempt to unify Korea by force. The United Nations responded with a call to its members to form a multinational "police force" under the command of the United States to restore the peace. In early August, Canada began to recruit an expeditionary force of 5,000 men for duty in Korea. The first Canadian troops set sail for Korea in late November 1950. John Wright became a member of the Corps of Royal Canadian Engineers, with the rank of Sapper, and departed for Korea in June 1951.

Sapper John O'Hara Wright

Changing events at the front only allowed the Canadians only a short period of acclimatization and training--acquainting them with battle tactics in the hilly country and getting them used to some additional American weapons. After approximately a week of climbing the hills around Pusan, the brigade moved north to the front.

By mid-1951, UN Command had re-established the 38th Parallel as a stalemate line--the two sides had begun to solidify and to dig in with deep defensive positions around this line. The war was becoming positional and more

static. While company-sized attacks were sometimes mounted to improve defences or to keep the enemy off balance, the war was mostly fought from trenches into no man's land. The fighting featured endless patrols; night raids against hilltop trench positions; booby traps, minefields, and barbed wire; artillery barrages; long nights standing guard in slit trenches; and repulsing enemy attacks and digging tunnels and trenches. The enemies faced one another across a no-man's-land ranging from a few hundred metres in width to several kilometres. During this phase of the war, bloody battles raged for strategic high ground.

Only two months after arriving overseas, Sapper John Wright lost his life while in action. On August 28, 1951, while engaged in road clearing, he was fatally injured by an exploding mine.

Anti-personnel landmines and booby traps were used extensively by both forces. The Chinese and North Koreans used a mixture of relics from the Second World War as well as those manufactured in Russia and China. Some had wooden bodies that made them impossible to find with metal detectors. Others were simply mud-covered grenades, their pins replaced with mud, so that when they were kicked, the exterior would break away, allowing the grenade to detonate. "Bounding Betsies (used by both sides, also called "bouncing Betties") were the toughest to deal with. Each "Betsie" was about three inches in diameter, eight or nine inches in length, round like a can and buried in the ground. When tripped by wire or trap, a detonator would pop the mine several feet in the air before the mine exploded, scattering deadly shrapnel, waist-high, in every direction.

Following is the report of his death in the August 29, 1951 *Sarnia Observer*;
Sarnia Native Killed In Korea

Sapper John O'Hara Wright, 22, a native of Sarnia, yesterday died in Korea, of wounds received while on active duty with the 57th Independent Field Squadron, Royal Canadian Engineers.

Sapper Wright was born here and lived with his parents on Bright street. He attended Sarnia public schools and Sarnia Collegiate Institute and Technical School and was a member of Canon Davis Memorial Church. He enlisted at Owen Sound when he became 18 and served his basic training at Chilliwack, B.C., and in Montreal. He left for Japan in June, of this year, going from there to Korea.

Only son of Mr. and Mrs. Daniel Dale Wright, now of Stratford, he was interested in Scout and Cub work and liked to assist in camp duties while home on leave.

According to word received by his family, Spr. Wright, 22, was fatally injured by an exploding mine. The injury was suffered while he was engaged in road clearing, it is believed.

Surviving relatives are Mr. and Mrs. Daniel Dale Wright, parents, Stratford; three sisters, Mrs. Lloyd Davey, Sarnia; Jean Wright, Owen Sound; and Ella Mae Wright, Stratford; his grandparents, Mrs. Jennie Wright, Sarnia; and Mr. and Mrs. James O'Hara, Petrolia.

John O'Hara Wright, 22, is buried in the United Nations Cemetery in Busan, South Korea, Plot 20, Row 4, Grave 1153. He also has a memorial plaque on the Korea Veteran's National Wall of Remembrance in Meadowvale Cemetery, in Brampton, Ontario. This memorial has plaques for each of the 516 Canadian service men who died while serving with the Canadian Forces in the United Nations. His name is also inscribed on the Monument to Canadian Fallen (Korean War Monument) in Busan and Ottawa. John's citations include the Canadian Volunteer Service Medal for Korea and the United Nations Service Medal Korea. In November 2019, his name along with 24 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

His parents Daniel and Laura passed away in 1970 and 1972 respectively. They are buried together in Hillsdale Cemetery in Petrolia. On their headstone are inscribed the words, WRIGHT, D.DALE 1905-1970, HIS WIFE LAURA E. 1906-1972, SON JOHN KOREA 1951 22 YRS. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

THE VIETNAM WAR (1954-1975)

Following is a summary of important historical events and people of the Vietnam War. It is estimated that between 20,000 to 40,000 Canadians volunteered for service in Vietnam within the branches of the United States military.

The Vietnam War is also known as the **Second Indochina War**, 1954-1975, and the “American War” in Vietnam (1964-1975). Regarding the Vietnam War, no “official declaration of war” was ever made between North Vietnam (allies China and the Soviet Union) and South Vietnam (principal ally being the United States). Taking place in Vietnam, Laos and Cambodia, the Vietnam War would last until April 1975 with the fall of Saigon.

• **BACKGROUND:** In the late 1800’s, the area of Southeast Asia known as Indochina was under control of the French government. French Indochina included what is now Cambodia, Laos and Vietnam. After World War I, a young Vietnamese nationalist named Nguyen That Thanh (later Ho Chi Minh), attended the Paris Peace talks and hoped to negotiate a Vietnam free from colonial rule. The British and French refused to grant them sovereignty, the promised self-rule for their colonies. Ho Chi Minh (who went to the Soviet Union and China for training) later joined the Communist Party, returned to Vietnam and united, trained and prepared his people (the militant nationalist organization called the Viet Minh) for a revolution against French rule. Vietnamese resistance to French rule continued on and off to the start of World War II.

Early in World War II, after the fall of France to the Nazi’s in June 1940, Japan made demands on French Indochina in order to cut off supplies to China (Japan’s war against China had begun in 1937). On September 22, 1940, Japanese troops invaded Vietnam, and would remain there until the end of the war. The Viet Minh resisted these Japanese oppressors, and grew its base throughout Vietnam. For most of the occupation the Japanese left the French colonial government in place—though its authority was greatly diminished. Japan would receive Vietnam exports, use their transportation routes, and use it as a staging area for Japanese military operations.

Japan’s World War II surrender in August 1945 then raised the question of who would rule post-war Vietnam. The Japanese declared Vietnam independent and gave power to a puppet emperor. Yet Ho Chi Minh and the Viet Minh were confident that they would at last gain control of their country, announcing the creation of the Democratic Republic of Vietnam (DRV). However the British and Chinese were given control of Vietnam by the victorious Allies, and Allied leaders overruled Ho Chi Minh, agreeing that postwar Vietnam would be split in two. As a result, Minh’s nationalist forces didn’t gain control over either the North or the South, and no Western power recognized his Democratic Republic. What’s more, France wanted to reclaim its lost territory, and the British ceded control of the south back to the French, based in Saigon. But Ho Chi Minh and the Viet Minh were well prepared to resist those efforts, leading to the **First Indochina War** (also referred to as the Franco-Vietnamese War).

The First Indochina War, December 1946-August 1954, saw the Viet Minh (with aid from Communist China) and French colonial forces (with aid from the United States) battle for control of Vietnam. After a decisive Viet Minh victory at the battle of Dien Bien Phu in May 1954, French forces surrendered and agreed to a set of treaties. In these **Geneva Peace Accords**, signed in July 1954, the French accepted the Viet Minh’s demands to evacuate all troops from Vietnam. Though northern and southern regions remained “temporarily” divided, the Accords stated that in two years, unification would be possible through the implementation of nationwide free elections—the Vietnamese people would have a chance to decide whether they preferred to unite under a communist regime (based in the north) or under a pro-Western (pro-French) government.

The Geneva Peace Accords signed in July 1954 declared a cease-fire and gave Cambodia and Laos—which had been part of the French colony Indochina—their independence. Vietnam, however, was divided at the 17th Parallel: a communist government in the north, the Democratic Republic of Vietnam (DRV) with its capital at Hanoi; and a new democratic government in the south, the Republic of South Vietnam (RVN) with its capital at Saigon. Communist rebels in the south, the National Liberation Front (Viet Cong), also fought against the South Vietnamese government. The division between north and south was supposed to be temporary, however failed elections to reunify the country in July 1956 and civil unrest ensued.

• **INTERNATIONAL CONTROL COMMISSION (ICC):** Canada’s role in Vietnam began in July 1954, as part of the three-member International Control Commission (predating Canada’s first official peacekeeping force, which was deployed two years later). Canada, Poland and India made up a force of about 1,400 troops and officers that were appointed to oversee the implementation of the Geneva Accords—to supervise the withdrawal of the French, and to

report on the progress of the ceasefires and any violations. The ICC's first responsibility was to implement Vietnam's division—with the communist North controlled by the People's Army of Vietnam, and the South controlled by the French Union. This daunting process included the mass relocation of nearly 900,000 people, all but 4,200 of them heading from north to south. As tensions between the two Vietnams escalated, the ICC members decided that it was the best interest of all involved for it to stay on. They remained until 1973, a poorly funded, under-manned and ultimately ineffectual force that could do little more than stand by as an undeclared proxy war developed between the forces of communism and western democracy.

When the **Paris Peace Accord** was signed in January 1973, the ICC was shut down and replaced with the four-member International Commission of Control and Supervision (ICCS)—Canada, Poland, Hungary and Indonesia. Canada was officially an ICCS member for about six months, until July 31, 1973, when Iran took its place. As a member of ICCS, Canada supervised the American withdrawal and arranged the release and exchange of thousands of prisoners of war.^{2E}

- **THE WAR ESCALATES:** In 1957, with North Vietnamese and the Viet Cong fighting South Vietnamese troops, the United States, hoping to stop the spread of communism in Southeast Asia, sent more aid and military advisors to help the South Vietnamese government. This was a time when U.S. Cold War foreign policy was dominated by the “domino theory”, which believed that the “fall” of North Vietnam to Communism might trigger all of Southeast Asia to fall.

North Vietnamese guerilla forces used the Ho Chi Minh Trail, a network of jungle paths and mountain trails, to send supplies and troops to the communist rebels in South Vietnam. Until 1960 the United States supported the Saigon regime with some 700 advisors for the training of the South Vietnamese army. The United States involvement in the war escalated in the early 1960's. By 1962, in the middle of the Cold War era, the U.S. military presence in South Vietnam had reached some 10,000 troops. By the fall of 1964, there were 23,000 Americans in South Vietnam (the Viet Cong had 35,000 troops in South Vietnam).

In early August 1964, the U.S. destroyer *Maddox* exchanged shots with North Vietnamese torpedo boats in the Gulf of Tonkin. Two days later, the *USS Maddox* and another destroyer reported once again coming under fire (years later, it was concluded that the second attack never occurred). As a result of the **Gulf of Tonkin Incident**, U.S. Congress passed a resolution authorizing a full-scale intervention in the Vietnam War. In early 1965, the United States escalated the war by commencing air strikes on North Vietnam (such as Operation Rolling Thunder) and committing increased ground forces to shore up the struggling South Vietnamese army. Meanwhile, the Soviet Union and China poured weapons, supplies, and advisors into the North. By November 1967, over 500,000 American troops were serving in Vietnam along with over 600,000 South Vietnamese troops. In addition to the United States, South Korea, Thailand, Australia and New Zealand also committed troops to fight in South Vietnam.

- **THE WAR DRAGS ON:** As the United States became increasingly mired in Vietnam, it pursued a strategy of attrition, attempting to bury the Vietnamese Communist forces under an avalanche of casualties. However, the Viet Cong's guerrilla tactics frustrated and demoralized U.S. troops, while its dispersed, largely rural presence left American bomber planes with few targets. The United States therefore used unconventional weapons such as napalm and the herbicide defoliant Agent Orange but still managed to make little headway.

In January 1968, the North Vietnamese Army launched a massive surprise campaign, the **Tet Offensive**, attacking about 100 cities and military bases in South Vietnam. The Offensive failed in its goal of overthrowing the South Vietnamese government, but it became a turning point in the war. Both sides suffered heavy casualties, and the offensive demonstrated that the war would not end soon or easily. It did persuade a large segment of the American population to become disillusioned with the war effort, despite the government's claims of progress toward winning it. Antiwar movements within the United States gained momentum as student protesters, countercultural hippies, and even many mainstream Americans denounced the war and the military draft.

The Vietnam War differed considerably from both World Wars in a number of ways: there was no formal declaration of war; there was no public raising of large military units, no large troop send-offs, and the soldier's return was often equally quiet and unnoticed; it was a war waged for the most part in dense jungles and underbrush; to counter overwhelming American firepower, the enemy usually resorted to hit-and-run battles, thus they controlled the pace of the war; the largely guerrilla war was fought in all areas of South Vietnam amidst the civilian population; the percentage of soldiers who suffered amputation or crippling wounds to the lower extremities was much higher than in previous wars, largely the result of the more extensive use of anti-personnel land mines; and it received large-

scale television coverage that brought the horrors of war to the home front—as one U.S. politician said, “This was the first struggle fought on television in everybody’s living room every day.”^{9X}

From 1968 to 1973, efforts were made to end the conflict through diplomacy, though the fighting continued. During this period, along with the news footage from the war zone broadcast on nightly television news, a number of events occurred that continued to effect public opinion in the United States: in March 1968, the My Lai Massacre; in April 1970, the U.S.-led invasion of Cambodia; in May 1970, U.S. National Guard kill four anti-war demonstrators at Kent State University; and in February 1971, the U.S.-led invasion of Laos.^{9X}

The U.S. Draft (conscription): During the Vietnam War, young American men faced the possibility of being involuntarily drafted into military service. All males between the ages of 18 and 26 were required to register for the draft. [In the U.S., the “Selective Service System” had been in almost continuous operation since before the U.S. joined World War II]. Draft notices were received in the mail, and simply read, “Greeting: You are hereby ordered for induction in the Armed Forces of the United States.”

Draftees had to report to their local draft board (made up of various community members) who evaluated their draft status. The draft board decisions were often seen as unfair, as there were many ways to avoid the draft with certain connections (eg. exemptions and deferments were especially granted to college students and those with wealth and privilege). Most of the men chosen were from poor and working-class backgrounds, people of colour and people from rural towns and farming communities. In December 1969, in an effort to make the draft more fair, the Selective Service System held its first draft lottery, which gave young men a random number corresponding to their birthdays—men with lower numbers were called first. The American draft laws applied to all aliens, including Canadian citizens, living in the United States. The Vietnam War was a major concern of Canadian families in the United States with draft-age sons.^{9X}

U.S. Draft Dodgers: One of the myths about the Vietnam War is that the American soldiers there were mostly draftees. In fact, almost two-thirds of American troops who fought in combat were volunteers. One true fact though is that during the Vietnam War, Canada gained more of a reputation as a haven for U.S. draft dodgers and army deserters than it did as a source of volunteers. “Draft dodger” was the nickname for Americans who were of age to get drafted but instead “Dodged the Draft” by moving into Canada where they didn’t have to go to war. It is estimated that 20,000-30,000 draft-age Americans fled to Canada during the war, in order to avoid military service. In addition, many deserters from the U.S. military made their way to Canada, hoping to find safe haven from military justice. As one U.S. Marine said, commenting on the draft dodgers and the Canadians volunteering to fight with the Americans, *“the worst of ours are going north, and the best of theirs are coming south”*. Estimates show that the total number of American citizens who moved to Canada due to their opposition to the war range from 50,000 to 125,000.^{2E, 2N, 6P}

• **THE WAR ENDS:** On January 27, 1973, after successful peace talks, a cease-fire was arranged—the **Paris Peace Accord**. Though it was signed by all parties, and allowed prisoners of war to be exchanged, the fighting continued. The last U.S. military personnel left Vietnam on March 29, 1973. North Vietnamese forces stepped up their attacks on the South and finally launched an all-out offensive in the spring of 1975. The capture of Saigon by the North Vietnamese Army on April 30, 1975 marked the end of the Vietnam War. North and South Vietnam were reunified the following year under Communist rule as the Socialist Republic of Vietnam, and Saigon was renamed Ho Chi Minh City.

The Cost of War: Some 2.7 million Americans served in some capacity in the Vietnam War zone between August 1964 and May 1975. Over 58,200 American soldiers were killed in the Vietnam War, and over 303,000 were wounded. The average age of Americans fighting in Vietnam was 19, compared with 26 for those who fought in the Second World War. Australia and New Zealand together had some 500 killed and over 2,000 wounded of the almost 50,000 who served. South Vietnam reported 220,000 of its military personnel killed and 500,000 wounded. North Vietnam and the Viet Cong suffered over 600,000 casualties. In North and South Vietnam combined, it is estimated that 400,000 civilians were killed and 1,000,000 were wounded in the war.^{2N, 9X}

The Vietnam Veterans Memorial in Washington, D.C., consisting of an expansive black granite wall (November 1982); a statue of three combat-weary servicemen (November 1984); and the Vietnam Women’s Memorial (November 1993), stands as a tribute to the members of the U.S. Armed Forces who fought in the Vietnam War, including those who died in service, and those who were unaccounted for. Etched on the black polished Vietnam Veterans Memorial wall are the names of over 58,200 American service personnel who lost their lives in

Vietnam, including approximately 1,200 who are listed as missing (MIA's, POW's).

Included in the record of 58,200+ is the name of every Canadian who died fighting for the U.S. in the war. Some are officially on record as being from Canada, while others are listed as being from the American town or city where they enlisted. In author Fred Gaffen's book *Unknown Warriors: Canadians in the Vietnam War* (1990), he documented the identities of eighty of those Canadians.^{9X}

• **CANADA'S ROLE IN THE WAR:** During the Vietnam War, the Canadian Government maintained that it was an impartial and objective peacekeeper, with the aim to help negotiate for peace and to administer aid to victims of the war; however, along with providing technical assistance, the Canadian government and Canadian industry did help the United States by sending medical equipment, military supplies, aircraft engines, ammunition, explosives, and raw materials for the manufacture of napalm and the defoliant herbicide Agent Orange. The herbicide was called "Agent Orange" because it was shipped to Vietnam in orange-striped barrels (some of this defoliant was produced at Elmira, Ontario).

Canadians in Vietnam: During the Vietnam War, the Canadian government did not discourage the enlistment of Canadians in the American forces. As a member of the ICC, Canada was not supposed to compromise its impartiality. Yet, the Canadian departments of External Affairs and Justice refused to prosecute anyone for violating the Foreign Enlistment Act in joining to fight in Vietnam.

During the Vietnam War, the American government followed the letter of the law and did not recruit Canadians on Canadian soil for American military service. It did however expand recruitment offices in towns and cities close to the border. At these offices, "letters of acceptability" for American military service were issued to potential Canadian recruits. These documents enabled the prospective enlistees to receive residency visas from U.S. immigration. The U.S. military then proceeded with induction. American cities, including Detroit, Buffalo, Fargo, Seattle, Maine, Bangor, and Plattsburgh, N.Y. were cities listed on their papers, with no mention of the fact that they were Canadian.

This cross-border enlistment was not unprecedented, for example; since the American Civil War, Canadians have served in the U.S. military (in the American Civil War, an indeterminate number of Canadians enlisted in the armies of both the North and the South); and both the First and Second World Wars saw thousands of Americans join the Canadian Forces before the United States officially declared war on Germany.^{2E, 2I, 3G, 6P, 6W, 6X, 9X}

The true number of Canadians who volunteered, fought and died in Vietnam will likely never be known. For many Canadians who went to Vietnam, the process of enlisting was just a matter of crossing the border and listing that town as their place of residence, or getting a post office box or using a friend's address. Others had dual citizenship or green cards (resided and were employed there so had a U.S. address) and were drafted or enlisted as "Americans", while others were already members of the U.S. military prior to the outbreak of war.^{9X}

It is estimated that between 20,000 to 40,000 Canadians volunteered for service in Vietnam within the branches of the United States military, serving in the army, navy, air force and marines. No Canadian contingent was ever formed—Canadian volunteer soldiers were simply interspersed among the American forces.^{6V, 9X}

Why Canadians joined: Canadians who found themselves fighting in Vietnam came from all social classes and from all parts of the country. Most joined the army, others the marines, the air force and the navy. A major proportion of the Canadians who enlisted were in their late teens or early twenties. A good number of volunteers from Canada had a personal connection with the United States—some had been born there and had moved to Canada as youngsters; others had one parent who had been born in the U.S. Some young Canadians were just seeking adventure, or a change from the boredom of school or a civilian job. Often, young Canadians joined because their father or their brother or uncle had served in the military, and they wanted to maintain the tradition. There was also a significant number of older men, largely army sergeants—career soldiers already in the regular U.S. Army who retained their Canadian citizenship. Those seeking a military career who could not meet the higher physical and educational requirements of the Canadian forces sought their opportunity with the U.S. forces. Some who had previously served in the Canadian forces joined the American forces in order to go to Vietnam. Some were drafted while residing in the U.S., and a good number were already serving in the American forces. Some Canadians joined out of a belief to fight communism, or for other political reasons. Others hoped joining the military might provide them with a trade or other job skills that they could use in future civilian life. Some joined with the attitude that America was our friend and we had to do our bit to help them. Some Quebecois and Acadians simply wanted to learn

English. A significant number of Canadian First Nations, especially those living close to the border, also enlisted to fight in Vietnam. Many young Canadian men simply wanted to experience honour and glory with the intention of returning to Canada as heroes.^{2E, 6P, 6W, 9X}

Reactions in Canada: During the years 1958-68, there was considerable Canadian support for the American cause in Vietnam. Many of the Canadians who joined the Americans in Vietnam did so before casualties began to mount and the anti-war movement gained momentum in the late 1960s and early 1970s. With the beginning of the sustained U.S. bombing of North Vietnam in 1965, the war came to occupy an increasing amount of Canadian newspaper space and television time. TV's coverage of the many protests against the war throughout the U.S. incited similar demonstrations in Canada. Flag-burning and protests at the U.S. embassy and at consulates across Canada, sit-ins, and marches for peace became commonplace. Canadians also crossed the border to join in massive demonstrations against the war. The majority of Canadians however remained silent. But there were some Canadians who strongly disagreed with the demonstrators—among them were those who enlisted to fight with the American forces.^{9X}

American's view of Canadians: Most Americans are unaware that Canadians served with U.S. Forces in Vietnam—Canada is better known as a haven for draft dodgers and deserters. Even in this country, some citizens accused those Canadians who served as mercenaries—yet no Canadian Vietnam veteran could rationally say that he risked his life only for the basic pay offered in the American military (the basic pay of a private in the U.S. Army in May 1968 was \$97.50 per month). Those critical citizens also fail to realize that Canadian companies supplied American firms with billions of dollars worth of materiel for the war, benefitting those businesses and the entire Canadian economy.

To those Americans (who knew about it), Canadians who served with the American forces in Vietnam were considered heroes because they came to America's side in order to fight against Communist aggression. An American Marine Corps Vietnam veteran wrote of the Canadians who served alongside him, *"Initially, I questioned the sanity of these men who, for ideological or frivolous reasons, volunteered to fight a war under a foreign flag that was unpopular and not formally declared. A war that did not directly concern them. I later came to understand that the Canadians shared the same ideals as myself; simply put 'that freedom isn't free' and they literally placed their lives on the line for that belief... I have nothing but respect and admiration for these men."*^{9X}

Canadian sacrifices: The Canadian Vietnam Veterans Association (CVVA) believes that at least 20,000 Canadians enlisted and an estimated 12,000 Canadians would serve in combat roles in Vietnam. Many of these Canadian-born men who served also won US military accolades, including the Purple Heart, the Air Medal, and the Bronze Star, and one Canadian in particular, Peter C. Lemon (a native of Toronto), won the Congressional Medal of Honor—the highest decoration awarded in the US Armed Forces. Of the Canadians who served in Vietnam, an estimated 4,000 were wounded, and estimates for those who lost their lives ranges from 120 up to 400. A number are still listed as "Missing in Action". The Canadian Vietnam Veterans Association has documented 134 Canadians killed in action with U.S. forces in Vietnam, and seven as declared missing in action.^{2E, 3G, 6P, 6V, 6W, 9X}

This author could not uncover any record of any Sarnia or Lambton individual who had lost his or her life while serving in the Vietnam War. There was certainly evidence, however, that a number of men from Sarnia and Lambton County did serve in the Vietnam War and returned to Sarnia/Lambton.

• **VIETNAMESE "BOAT PEOPLE":** For Canada, one positive outcome of the Vietnam War was an influx of Vietnamese refugees who later became Canadian citizens. Migration from Vietnam to Canada occurred in two waves. The first wave began in early 1975, after it became clear that South Vietnam would be taken by the Communists. Between 1975 and 1976, Canada admitted 5,608 South Vietnamese immigrants. Many were middle-class people with professional skills or they had family members in Canada to act as sponsors. Many spoke French, or sometimes English, as a second language.

The second wave came following the end of the Vietnam War in April 1975, when over one million refugees fled the war-ravaged countries of Vietnam, Cambodia and Laos. They were prepared to risk everything. Those Vietnamese who took to the ocean in tiny overcrowded boats and ships were dubbed the "boat people." Facing dangers from pirates, leaky boats, storms, and the hardships of over-crowded boats including starvation, dehydration and disease, many of the boat people perished at sea. The survivors sometimes languished for years in refugee camps in Southeast Asia.

The majority of refugee boat people were resettled in developed countries such as the United States, France, Germany, the U.K., Australia and Canada. Due to the public outcry in 1979, the Canadian government decided that the number of “boat people” brought to Canada should be dependent on public support. In July 1979, it introduced a matching formula: the government would sponsor one refugee for each one sponsored privately. Churches, corporations, and groups of five or more adult Canadian citizens were eligible to sponsor refugees directly.

In 1979 and 1980, Canada accepted more than 50,000 refugee “boat people” from Vietnam. They were a diverse group that included a variety of social classes; both urban and rural dwellers; the majority did not speak English or French; and they had no relatives in Canada. They settled in many places in Canada where there was previously no Vietnamese community. The largest groups settled in Toronto and Montreal, with significant communities in Vancouver, Calgary and Edmonton. Several Sarnia churches sponsored a number of Vietnamese families bringing them to the city.^{2E, 2N, 6B, 6C}

- **CANADA’S VIETNAM VETERANS:** Following the war, Canadian Vietnam veterans experienced much of the same hostilities from their own government as the Americans. Canadian volunteers were generally forgotten or looked upon in an unfavourable light for a number of reasons including, the unpopularity of the war and the negative image of the Vietnam veteran conveyed by the media. American veterans of Vietnam endured years of rejection and lack of support, as the anti-war sentiment of the period blamed them as much as American policy for the atrocities that occurred.

Fred Gaffen, author of *Unknown Warriors: Canadians in the Vietnam War* summarized the situation for Canadian Vietnam veterans as, “While American Vietnam veterans were not given sufficient recognition for their sacrifices, Canadian Vietnam veterans were forgotten.” There were no ‘welcome home’ parades or ceremonies. Michael Carroll, an associate professor of history at MacEwan University in Edmonton said, “Many of the Vietnam veterans who returned to Canada tended to live with their experiences in obscurity. There were relatively few Canadians who could understand what they had experienced, and most wouldn’t have even understood why they went to fight in Vietnam in the first place, especially as the war went on and things went from bad to worse after 1968.”^{9X}

The Canadian government refused to recognize their service, repeatedly rejected requests to erect a memorial to the fallen, and the Royal Canadian Legion denied Vietnam veterans membership until the mid-1990s. They were also prohibited from participating in Remembrance Day celebrations, which only recognize combatants in wars that Canada participated in. Finally, in 2005, the Canadian government officially recognized Canada's Vietnam Veterans. Recognition of these veterans has also been instituted at Remembrance Day ceremonies, and a permanent display was erected at Canada's War Museum.^{2E, 3G, 6P, 6V, 6W, 9X}

The Canadian Vietnam Veterans Memorial

Source: The City of Windsor

• **THE CANADIAN VIETNAM VETERANS MEMORIAL:** Also called the “**The North Wall**”, this memorial is located in Assumption Park, Windsor, Ontario. The wall was funded and built by American Vietnam veterans from Michigan, who wanted to honour the Canadians who fought alongside them. It was dedicated in July 1995, and has the names of approximately 138 known young Canadians who lost their lives or are MIA in the Vietnam War.

The Canadian Vietnam Veterans Memorial monument is made of black granite, and measures eleven feet tall by fourteen feet wide. At the base of the memorial, there is an enshrined Purple Heart, which belonged to Corporal Larry Semeniuk, of Windsor, who served with the U.S. Army's 101st Airborne, and who was killed in action in January 1968. The inscription below the Purple Heart reads:

"Here within this memorial is a symbol that America's first President George Washington fostered. 'The Purple Heart Medal.' Whether they wore the Maple Leaf of Canada or the Stars and Stripes of the United States, these memorialized veterans are heroes believing that freedom knows no borders, and must be defended whenever it is challenged."^{6P}

Following is a poem written by Richard Malboeuf, a Canadian who crossed the border volunteering to fight in Vietnam. He served with the US Army 101st Airborne Division, Vietnam, April 1969 - October 1970.^{6V}

*O' Canada, Our Home And Native Land
We Had Hoped You Would Understand
Why We Left The Safety of Our Land
To Fight For Freedom in Vietnam

Like Our Fathers Before
We Set Off For a Distant Shore
Heeding The Trumpet's Call To Fight
For A Cause We Believed Was Right

And Though We Served As Americans
In Our Hearts We Fought Like Canadians
Be Proud O'Canada, For We Served Well
In That Time We Spent In Hell

Lest We Forget Those Who Gave Their All
Their Names Are Now Engraved Upon This Wall
O'Canada, Our Home and Native Land
We Hope That Now You Understand*

CANADIANS AS PEACEKEEPERS and IN THE SERVICE OF CANADA

After World War II, and especially during the Cold War years, Canada was one of many countries looking for ways to prevent the recurrence of war around the world. Our country played a leading role in the peacekeeping movement from the outset, and for many ensuing years Canadians regarded UN peacekeeping as a national duty. Canadian Armed Forces members have also fulfilled and continue to perform duties for Canadians at home in many capacities. Following is a summary of Canadians in their role as peacekeepers around the world and in their role in the service of this country. Sarnia-Lambton's sons and daughters have served in both of these roles.

- **THE SUEZ CRISIS:** The Suez Canal in Egypt directly links the Mediterranean Sea to the Red Sea. It was built by Egyptian workers under the French and British-owned Suez Canal Company, and opened in 1869. On July 26, 1956, Egypt's President Gamal Abdel Nasser seized control of the Suez Canal—which had been run by the French and British governments. When diplomacy failed to produce a solution, Britain, France and Israel began plotting a military response. Egypt meanwhile, obtained military arms from the Soviet Union, who announced they would send troops if Egypt was attacked. The crisis created a major divide in British/United States relations, as the Americans opposed any use of force.

On October 29, 1956, Israel invaded the Gaza Strip and Sinai Peninsula of Egypt and advanced toward the Suez Canal Zone. Days later, Britain and France started a bombing campaign in order to reopen the Canal Zone. The Middle East was set to explode and there seemed to be a serious threat of a Third World War.

During the 1956 Suez Crisis, Canada's Minister of External Affairs **Lester B. Pearson**, who headed Canada's delegation to the United Nations (UN), proposed and helped develop a multinational UN peacekeeping force to be sent to Egypt to separate the Israeli, British and French troops from the Egyptian troops. On November 2, 1956, Pearson said, *"We need action not only to end the fighting, but to make peace... my own government would be glad to recommend Canadian participation in such a United Nations force, a truly international peace and police force."* These words are now inscribed on Canada's Peacekeeping Monument in Ottawa. On November 4, 1956, the United Nations voted overwhelmingly in support of Pearson's **United Nations Emergency Force (UNEF)** proposal.

First Canadian Peacekeepers: On November 24, 1956, the first Canadian Peacekeepers, as part of the first large international United Nations Emergency Force, set foot in Egypt. The Force included 6,000 men from ten countries under the command of a Canadian Lieutenant-General E.L.M. Burns. It was then that the term **'peacekeeping'** entered popular vocabulary. British and French forces completed their withdrawal from Egypt by the end of 1956; and Israeli forces withdrew in the spring of 1957. In 1957, Lester B. Pearson, who later became Prime Minister of Canada (1963-68), won a Nobel Peace Prize for his initiative in using the world's first, large-scale United Nations peacekeeping force to de-escalate the situation in Egypt. Following is a portion of his acceptance speech, *"I realize also that I share this honour with many friends and colleagues who have worked with me for the promotion of peace and good understanding between peoples. I am grateful for the opportunities I have been given to participate in that work as a representative of my country, Canada, whose people have, I think, shown their devotion to peace."*^{D, 2N, 3G}

Canadians in Egypt: Canadian Armed Forces members took part in the United Nations (UN) peace missions in the Gaza strip and the Sinai Peninsula of Egypt between 1956 and 1967, and again from 1973 to 1979. At times, the total size of the UN peace forces in Egypt was upward of 7,000 troops drawn from 20 countries. More than 150 UN troops died in their peace efforts for Egypt, including more than 50 Canadians. On the edge of the town of Gaza lies a well-tended cemetery filled with the graves of Allied troops who died while serving in the Middle East during the First World War. One small corner of this cemetery, reached through gates adorned with gilded maple leaves, is home to the graves of 22 Canadians who died in the course of the peace efforts to Egypt in the 1950s and '60s.^D

The "Blue Helmets" It was during their time in the Middle East that, in order to distinguish themselves from forces in conflict, it was decided that the UN troops would wear blue headgear (helmets and berets). This would make them easily identifiable as being there for a peaceful purpose and not as combatants. The blue berets and helmets worn by UN peacekeepers have become one of the most well known symbols of today's international peace support movement.^D

- **THE UNIFICATION OF THE CANADIAN ARMED FORCES:** There had been talk of this for years, even as far back as shortly after the Second World War—the merging of the three main military arms into one structure. In

1967, the Canadian Minister of National Defence, Paul Hellyer, introduced a bill for the reorganization and integration of the Royal Canadian Air Force, Royal Canadian Navy, and Canadian Army into a single force. The idea being to reduce duplication of services and the associated costs, and to streamline operations and create greater efficiency. The House of Commons passed the Canadian Forces Reorganization Act (Bill C-243) on April 25, 1967.

The unification of the Canadian Armed Forces officially took effect on February 1, 1968. On that date, the Royal Canadian Navy, the Royal Air Force and the Canadian Army ceased to exist. The Act did away with traditional distinguishing uniforms, rank structure; and the separate legal entities such that the three proud military services were now unified into one, known simply as the **Canadian Armed Forces** (later just Canadian Forces - CF). Six commands were established: Mobile Command (later Land Force Command), Maritime Command, Air Defence Command, Air Transport Command, Training Command and Materiel Command.

The move was met with great resistance and the government was accused of not understanding or respecting the particular heritage and traditions of the separate entities. There were other less pleasant allegations associated with the fact the term “Royal” would be eliminated. Even though all were wearing the same “green” uniform and rank structures, members still tended stubbornly to identify with their units and particular branches of service. Fighting amongst the services over ever-smaller budgets also kept the idea of separate entities alive if not openly, certainly not deeply hidden. By the mid-1980s the tide was being slowly turned back as members were permitted a return to distinctive colours to their uniforms. Also the term “Canadian Army” has since been re-instated, and in August 2011 the “Royal” was returned to the navy and air force. Thus the never popular Maritime Command, Air Command, and Land Force Command are now once again the Royal Canadian Navy, the Royal Canadian Air Force and the Canadian Army.

While still generally referred to as the Canadian Armed Forces, and bases are referred to merely as “Canadian Forces Base” (CFB) such and such, the pride in the individual service arms remained strong throughout the years, continues to be strong, and has to some extent resisted one of the greatest shakeups of Canada’s military.^{3G, 9H}

• **THE PERSIAN GULF WAR:** In August 1988, Iraq had just finished fighting an eight year war against neighbouring Iran which resulted in tremendous bloodshed, destruction and a stalemate. The U.S. had intervened in that war by supplying Iraq with military support when needed. In the late 1980’s, tensions grew between Iraq and Kuwait—another Arab country in the heart of the oil-rich Middle East—over disputed oil fields. On August 2, 1990, the situation came to a head when Iraq, with one of the largest military forces in the world, invaded its smaller neighbour Kuwait.

The United Nations condemned the aggressive act, leading to a number of UN resolutions that included the use of force to liberate Kuwait. The United States lead a 35-country international coalition, that included Canada, tasked with liberating Kuwait. On January 16, 1991, after a UN-set deadline for Iraqi withdrawal was ignored, the coalition forces began a devastating air campaign (*Operation Desert Storm*) against Iraq. This was followed by an armour and infantry offensive (*Operation Desert Saber*) that began on February 24, 1991.

Canada’s contribution to the Gulf War included more than 4,000 Canadian Armed Forces personnel serving in the tense Persian Gulf region, the first time Canadian forces went to war since the Korean War. The first Canadian Forces personnel dispatched to the area were the navy—three ships, the destroyers *HMCS Terra Nova* and *HMCS Athabaskan*, along with the supply ship *HMCS Protecteur*, were tasked with enforcing a United Nations trade embargo. Sea King helicopters were also attached to the Naval Task Group, performing reconnaissance, utility, and command-and-liaison tasks. The Canadian Air Force soon followed, deploying CF-18 Hornet fighters that performed combat air control, escort and reconnaissance missions. Air operations also included Canadian air-to-surface attacks, and Air Command Transport Group using CC-130 Hercules and CC-137 Boeing 707’s providing air transport of personnel and cargo. A Canadian field hospital from Petawawa operated with the British division, caring for both British and Iraqi wounded.

The UN coalition freed Kuwait, suspended the fighting, and Iraq accepted a cease-fire on March 3, 1991. The official end of the war left Iraq's leader, Saddam Hussein, and his military, defeated—but Hussein retained power in Iraq. He remained in control for more than 12 years until the second Gulf War of 2003 finally swept him from power.^{D, 3G, 4A}

After the Gulf-War ended and the Iraqis capitulated in April 1991, Canadian troops remained in the region as part of the UN peacekeeping mission (UNIKOM) along the Iraq-Kuwait border, monitoring the demilitarized zone

between the two countries, investigating cease-fire violations, serving on weapons-inspection teams, clearing land mines and offering humanitarian aid. Following is a portion of a letter written in April 1991, by a Canadian corporal serving there, to his parents;

... again a day to remember we went to Ummqasar [a small Iraqi town] to the hovercraft site. On the way there, we drove through the killing field, and it stunk to death a most terrible stench as you can imagine. The destruction was awesome close up. Tanks APCs [armoured personnel carriers] cars trucks full of holes, piled up, burned, upside down unreal!!... The battle field and destruction went from Kuwait City right to Iraq. I also got to see the burning oil fields even closer than before, it really makes you sick to see it. I counted 68 wells in one and 52 in another and those are just what you can see on the outside cause of the smoke!

We drove through one of the refugee camps and it was terrible. But all the little kids came running and waved. All the people seemed real happy to see us. The little kids run at top speed in bare feet! Over glass and rocks and metal! They wave and laugh hysterically, it's a good feeling... The kids in Iraq I felt more sorry for cause they are not in a good way, living in decrepit buildings with garbage everywhere and they are starving. We were throwing our rations to them. It was quite a sight as they would ask us for food point to their mouths or stomach but all smiles. They wanted our water as much as food...

I saw a little boy being pulled by his brother on a makeshift cart. The little boy had no legs. Also there were kids on crutches all over, and bandaged kids missing feet and arms. It's no wonder, a little boy about 8 years old came up to a guy when we were clearing an area and he was all smiles holding a live grenade! Buddy snatched it from him and told him as best he could not to touch anything.

We found a lot of ordnance I mean a lot and we only cleared a small area!...^{7A}

Canada also had a role in the special commission to seek out Iraq's biological, chemical and nuclear weapons production facilities. On the water, Canadian warships participated in Multinational Interception Force operations and helped to enforce the economic sanctions imposed against Iraq after the Gulf War. No Canadian Armed Forces members died in the course of the Gulf War, although many of the returning soldiers suffered from the anxiety disorder Post-Traumatic Stress Disorder (PTSD), characterized by reliving psychologically traumatic situation, through flashbacks and nightmares.^{D, 3G, 4A}

Women in combat: The Gulf War marked the first time that Canadian female enlisted soldiers operated in combat. It was especially challenging for these trail-blazing women because they were serving in orthodox Muslim countries in the Middle East where traditional gender roles are very different than in Canada.

• **CANADIAN PEACEKEEPERS:** As peacekeepers, Canadian Forces men and women put themselves in harm's way and have provided numerous roles: supervising cease-fires and withdrawal of opposing forces; delivering humanitarian aid; supervising elections; repatriating refugees; disarming warring factions; protecting citizens; restoring shattered landscapes (eg. clearing of mines); and nurturing stable governments and human rights.^D

Through years of commitment, Canada has played a prominent role and established itself as a nation of peacekeepers throughout the world. Canada has participated in the majority of peace support operations mandated by the United Security Council over the years, with Canadians serving in more than forty international peace support operations. This includes peacekeeping missions in Egypt, the Congo, Indonesia, West New Guinea, Yemen, the Dominican Republic, India, Pakistan, Iran-Iraq, Cyprus, Sarajevo, the Middle East, Israel, Syria, Lebanon, Angola, Iraq-Kuwait, Namibia, the Western Sahara, El Salvador, Cambodia, Bosnia, Mozambique, Somalia, Haiti, Uganda-Rwanda, Croatia, Kosovo, the Balkans, Guatemala, East Timor, Ethiopia, East Timor, Sudan, Darfur, the Persian Gulf, Afghanistan and Mali.

As peacekeepers, Canadian soldiers have demonstrated a long-standing willingness to put their lives on the line to help others achieve peace and security; to preserve and defend freedom; to protect human rights and help restore the rule of law. Many have given their lives, and many more have been wounded, their injuries to body and to mind lasting a lifetime. These brave Canadian peacekeepers include a number of men and women from Sarnia.

Canadian Armed Forces members have served and sacrificed in peacekeeping missions over the last six decades in more than thirty-five countries, fulfilling their duties against the constant background of danger. Following are two Canadian peacekeepers known around the world for their exceptional contributions & dedication.

Mark Robert Isfeld was born on August 14, 1962, the son of Brian and Carol Isfeld of Courtenay, British Columbia. He joined the Canadian Armed Forces in 1986, and became Master Corporal Mark 'Izzy' Isfeld, Field Engineer with No. 1 Combat Engineer Regiment, Royal Canadian Engineers. During his three peacekeeping tours in

Kuwait and Croatia, he worked clearing and defusing land mines, bombs and IEDs in these war-torn countries. On his tours, he would often see children who had been injured or were missing limbs because of the land mines. While in Croatia in the early 1990s, he was driving through a village and saw a figure lying prone on the rubble of a house that had been hit by artillery in the civil war there. When he got closer he realized it was not a child, as he feared, but was an abandoned doll. He thought of the need to re-connect a child with the joy that can come from a toy.

When he was home at Christmas, he showed his mom Carol a photo of the doll and said, “Some little girl has lost her doll, and a doll has lost her little girl.” Impacted by the sympathy of her son, Carol started knitting dolls from scrap wool, some with pigtails and floppy hats, some with blue berets, and she sent them along with Mark to give to children who had no toys. Isfeld became known as the soldier who received little handshakes and captured little hearts and made the children smile. Tragically, Mark Isfeld lost his life at age 31, in a landmine explosion near Kakma in Croatia on June 21, 1994. He was guiding a LAV III armoured personnel carrier along a lane when the LAV hit a trip wire setting off an explosion, fatally wounding him. After Mark’s death, his regiment asked Carol if she would continue to make the dolls. Carol Isfeld continued to make them, for more than a decade, for the members of his regiment to give out to children in Mark’s memory. The troops in his regiment named them “**Izzy Dolls.**”

Carol Isfeld recruited other women to make the dolls, and decided to copyright the name and pattern so that Izzy Dolls could only be given in charity and never sold for profit. The pattern for the Izzy Doll was made available to the public by the Isfeld family. After Mark Isfeld’s death, a grass-roots movement began where individual people and organizations from across Canada have continued to knit/crochete “Izzy” dolls. The dolls have been distributed by Canadian soldiers to children caught up in areas of conflict in different parts of the world. Canadian charities and humanitarian organizations (eg. ICROSS, HPIC, DART, Red Cross) providing relief to those suffering from poverty and natural disasters also distribute these dolls to children overseas and even here at home.

The Izzy dolls are about six inches long, knitted with different face colours, and stuffed with light polyester fiber fill so soldiers can easily carry them in their pockets. More than 1.3 million Izzy Dolls have been handed out around the world to children in war-torn and impoverished areas. There is a bronze statue of MCpl Mark Isfeld located in Peacekeeper Park, Calgary and a school in Courtenay, B.C. named in his honour. The book “*In the Mood For Peace – The Story of the Izzy Doll*”, by Phyllis Wheaton, tells the true story of Canadian Peacekeeper Mark Isfeld; his desire to bring joy and goodwill to the needy and the forgotten; how his family coped with the loss of their beloved soldier son; and how a soldier’s simple acts of kindness inspired Canadians to change the world.^{D, 9E, 9F}

Romeo Dallaire was born on June 25, 1946 in the Netherlands, the son of a Canadian military officer who married a Dutch nurse after the Second World War. Romeo grew up in Montreal and joined the Canadian military in 1964. He became a colonel twenty-two years later, but it was in the early 1990s that he came to the attention of the world.

In late 1993, Lieutenant-General Dallaire was appointed Force Commander of the **United Nations Assistance Mission for Rwanda (UNAMIR)**, a small lightly armed force tasked to oversee the peace agreement ending a civil war in that country. Once deployed there, he was supposed to supervise a truce between the Hutus and the Tutsis, but his powers were tightly constricted. He warned UN headquarters that something catastrophic was brewing, and repeatedly pleaded for action and backup. But the world’s major powers failed to act or provide him with troops.

In April 1994, the genocide started. Rwandan military and extremist Hutu gangs armed with machetes, clubs, and guns cut a path of bloody chaos through the Tutsi minority, including torture, rape, mutilation and murder. Confronted with an impossible situation, Dallaire consolidated his troops in a few urban areas and was able to protect some civilians. He, along with a small contingent of Ghanaian and Tunisian soldiers and military observers, disobeyed the command to withdraw and remained in Rwanda to fulfill their ethical obligation to protect those who sought refuge with the UN forces. In the worst genocide since the Holocaust, more than 800,000 Rwandan men, women and children were slaughtered in less than one hundred days, and 2 million became refugees. Dallaire has been widely praised for ignoring the UN orders to pull out and is credited with saving some 32,000 lives.

Dallaire was haunted by the memories of what he saw and heard, by the men who died under his command, and by his inability to spur the UN to take action in Rwanda. His courage and leadership during this mission earned him the Pearson Peace Medal, the Meritorious Service Cross, the United States Legion of Merit, and the affection and admiration of people around the globe. His award-winning autobiography, *Shake Hands with the Devil: The Failure of Humanity in Rwanda*, is a searing account of incomprehensible horror of the genocide and his defiant

dedication to humanity. He is a celebrated advocate for human rights, especially in regards to child soldiers, veterans, and the prevention of mass atrocities.^{2N, 11E, 11F}

Following is Romeo Dallaire's description of how warfare changed after the last World War;

Until the end of the Cold War, in most cases, our military faced a recognizable enemy, fought a trained and willing soldier, on a set battlefield, over clear principles. And after the Cold War, we continued training for these classic wars. This was certainly the conventional warfare I was prepared for.

What I found in Rwanda was not. Neither was Afghanistan. Neither is Syria nor the Central African Republic. Often called "dirty wars," these are complex conflicts about which we know little and on which we impose outdated understanding and methods at our peril.

We may look to the Islamic State, al Qaeda or Boko Haram (or to the all-encompassing idea of terror) for a common enemy, but the majority of belligerents today are more enigmatic. In most post-Cold War conflicts, there have been no "redcoats," no "no man's land." In Rwanda, there was no set battlefield, no front line – or rather, there was nothing but a front line. In a hundred days, we saw almost a million civilians butchered – babies, mothers, elderly women, old men, young men. The trained soldiers we faced? Often children – boys and girls, delirious from booze and drugs and hate propaganda, wielding crude but lethal weapons. Such is warfare in the twenty-first century: no longer nation states spilling military blood, but innocent civilian populations being bled within their own border.

What we face today has not only caught us by surprise but is an assault on the world that makes sense to us. And it renders our resolve to fight, even to the point of the ultimate sacrifice, all the more complicated. The new breed of belligerents plays by no rule of law with which we are familiar, not the law of armed conflict, not humanitarian law. This, of course makes it easy for the general population to shirk from the idea of war, preferring self-protective ignorance to paying the cost of helping to secure human lives and rights in faraway lands. It is easy for those not in uniform to misunderstand the compulsion that drives soldiers to fight for what is right and good and not just hope and pray for it.^{6Q}

• **PEACEKEEPERS' SACRIFICES:** The following is a quote from Romeo Dallaire's father that appeared in *Shake Hands With the Devil*. In it, he describes the special quality of character of Canadian Peacekeepers, "You know, soldiers are very unusual people. On the outside they are the hardest, most demanding people, but underneath that, they are the most human, the most feeling, the most emotionally attached people who exist."

Over 125,000 Canadian military personnel have served in UN peacekeeping operations in countries all over the world since 1947. To acknowledge such service, the Department of National Defence issued a special medal, the Canadian Peacekeeping Service Medal, instituted in 2000. It is awarded to military and civilian personnel who have served for 30 days or more in UN or other peacekeeping operations.

Approximately 130 Canadian soldiers have made the supreme sacrifice while peacekeeping, and many more have suffered physical and mental injury.^{D, E, 2N, 3O}

Peacekeepers' Remembered: Canada's peacekeepers are honoured and remembered on **The Peacekeeping Monument** – titled *Reconciliation* – in downtown Ottawa. The monument, unveiled in October 1992, depicts three peacekeeping soldiers—two men and a woman—standing on two sharp, knifelike edges of stone, cutting through the rubble and debris of war and converging at a high point, which symbolizes the resolution of conflict. The base of the monument includes Lester Pearson's November 1956 quote, "*We need action not only to end the fighting but to make peace...*"^D

In addition to the *Reconciliation* monument, the names of those killed on peacekeeping missions since 1947 are inscribed in the *Book of Remembrance - In the Service of Canada* in the Memorial Chamber on Parliament Hill. More information on the *Book of Remembrance* is on page 1121.

National Peacekeepers' Day: In Canada, August 9 is designated as National Peacekeeper's Day, first established in 2008. It provides an opportunity for Canadians to express the pride and respect they have toward personnel of the Canadian Armed Forces, the Royal Canadian Mounted Police, and provincial and municipal police forces, as well as Canadian diplomats and civilians who have worked in support of international peace and security operations.

This date was selected to recognize the largest single-day loss of Canadian Armed Forces lives on a

peacekeeping mission. On August 9, 1974, a Canadian Forces Buffalo 461 transport aircraft, was on a scheduled supply flight from Ismailia, Egypt to Damascus, Syria. There were nine Canadian peacekeepers aboard the aircraft, serving with the United Nations Emergency Force (UNEF II) in Egypt and Israel. Shortly after crossing the Lebanese-Syrian border into Syria, three anti-aircraft surface-to-air missiles were fired at the aircraft—all three struck it—resulting in the aircraft's destruction and the deaths of all nine Canadian Forces peacekeepers. In Canada, the attack—and the arrival soon after of nine military coffins—attracted little or no attention. It was overshadowed by historic news coming out of the United States—President Richard Nixon's impeachment over his role in the Watergate scandal was going on at the same time.^{D, 2N, 7M}

Warrant Officer William Munden, with Canadian 436 Transport Squadron, was aboard the Hercules aircraft despatched from Germany to Damascus to recover the remains of the nine Canadians. He would learn that day that the pilot of the downed Buffalo 461 was a close friend of his. Following is a portion of his recollection of events on the Damascus tarmac; *By the time the ceremony started, it was very dark. The airport had just a few lights, and we could see two lines of soldiers standing, waiting for the caskets. A few Syrian soldiers were lined up on one side, and Canadian peacekeeping soldiers from the Golan Heights were lined up on the other side. They began bringing the caskets one at a time through this column of opposing military soldiers... On that night, in Damascus, I was the proudest I'd ever been of those Canadian army peacekeepers. These were the soldiers that went out and picked up the bits and pieces of our fallen comrades in the Golan Heights. They found wooden ammunition boxes and fabricated caskets. They stole some wood-grain "mack-tack" and covered the boxes, then put on their best uniforms and stood at attention in that airport while the remains were brought onto the Hercules. I thought, 'Boy, how can you do that?'*^{9K}

• **THE PEACE TOWER and the BOOKS OF REMEMBRANCE:** The **Peace Tower** is the dominant feature on Parliament Hill in Ottawa. Nearly 98-metres in height, it features the Peace Tower clock, Peace Tower carillon (53 bells), and a copper-covered apex that is topped with the Canadian flag. The original "Victoria Tower" was completed in 1878 but in 1916, it crumbled to the ground during a fire that destroyed most of the Parliament Buildings. Reconstruction of the destroyed section began almost immediately, as the First World War raged in Europe. On September 1, 1919, the Prince of Wales laid the cornerstone of the tower and designated it "**The Tower of Victory and Peace.**" Commonly referred to as the "Peace Tower", it is dedicated to all Canadian men and women killed during wartime and the peace which they died to achieve.

Located within the heart of the Peace Tower is the **Memorial Chamber**, built as a tribute to the Canadians who lost their lives during the First World War. The walls of the Chamber display many stone carvings depicting the symbolic history of the Great War, and stained glass windows of heraldic symbolism soar on three walls. The floor is inlaid stone brought from various battlefields in France and Belgium, and laid in the form of a cross. Brass plates in the floor inscribed with the names of major WWI battles, such as the Somme and Passchendaele, were hand-crafted from spent shell casings from the war. The stone walls in the Chamber were originally to have been inscribed with the names of all Canadian war dead – but as the First World War's death toll mounted, it was realized that there were just too many names. The solution was to create a resting place for the names within carefully crafted books, handwritten on vellum parchment.

The centerpiece of the Chamber is a massive stone central altar that is surrounded by seven altars made of stone and bronze. Each altar holds one of the eight **Books of Remembrance** that together contain the names of more than 118,000 Canadians who fought and made the ultimate sacrifice in the service of Canada. The main altar, resting on steps made of stone quarried from Flanders, holds the *The First World War Book of Remembrance* (66,600+ names). Seven other Books of Remembrance are displayed open in glass cases on the other altars; *The Second World War Book of Remembrance* (44,800+ names), *The South African War-Nile Expedition Book of Remembrance* (almost 300 names), *The Korean War Book of Remembrance* (516 names), *The Newfoundland Book of Remembrance* (2,300+ names), *The Merchant Navy Book of Remembrance* (2,200 names), *In the Service of Canada Book of Remembrance* (1,800+ names), and a *War of 1812 Book of Remembrance* (1,600+ names).^{D, 3G}

The *In the Service of Canada Book of Remembrance* lists the names of more than 1,800 members of the Canadian Armed Forces who died while on duty in Canada or serving abroad since October 1, 1947, with the exception of those commemorated in the *Korean War Book of Remembrance*. The *Book* begins with the date of October 1, 1947, the day after eligibility for entry in the *Second World War Book of Remembrance*. This includes those who died in times of conflict, or during peacetime training exercises, peacekeeping deployments abroad or other military duty. Unveiled in 2005, this Book of Remembrance is the final chapter that never ends. It will be

continuously updated to reflect the never-ending sacrifice that is the reality of military service.

The *In the Service of Canada Book of Remembrance* contains the names of at least three Sarnia-Lambton soldiers: Private William Cushley and Corporal Brent Poland who were both killed in action in the Afghanistan War; and Captain Milton David Salmons who lost his life in the Service of Canada.

• **IN THE SERVICE OF CANADA (Canadian Armed Forces at Home):** Canadian Armed Forces members support freedom, democracy, the rule of law and human rights around the world. Aside from contributing to international peace efforts, they also proudly serve Canada by defending its values, interests and sovereignty at home. Members of the Canadian Armed Forces patrol our coasts, monitor our skies, support anti-drug operations, assist with disaster relief (forest fires, floods, avalanches, snowstorms, tornadoes, epidemics, etc.), provide assistance to civil authorities when needed to maintain public order and security, and lead search and rescue missions.^{3G} In all of the above roles, there is sacrifice and risk. In 1980, a Sarnian lost his life in the service of Canada.

SARNIA'S IN THE SERVICE OF CANADA FALLEN SOLDIER

SALMONS, Milton David (C24 733 208)

Those who knew David Salmons fondly recall his multi-faceted personality: respectful and intelligent, sincere and thoughtful, amiable and mischievous. And he was undeniably driven and talented, a young man who knew what he wanted and a husband and father who accomplished much before he died at age 27 while serving Canada.

Milton David Salmons was born in Sarnia on January 29, 1953, the eldest son of Milton Taylor and Myrtle Marie (nee: Farr) Salmons. Milton David always went by his middle name, Dave. Parents Milton (born July 10, 1928 in Sarnia) and Myrtle (born August 15, 1932 in Brigden) Salmons raised four children together. Dave's siblings included; Elizabeth (Beth), born in 1950; Jennifer, born in 1956; and Scott, born in 1963.

Milton Salmons supported his family as a truck driver with Jack Carey, later Duncan Crane and still later Sarnia Cranes. Myrtle worked for a time beginning in the mid-1970s as an office clerk with Point Edward Camping and Trailer and later for many years with the Liquor Control Board (LCBO). Because of Milton's career, the Salmons family moved around for a few years: to Bolton for 4-5 years and then to Rexdale for a year before returning to Sarnia. Beginning in the late 1950s, the Salmons family lived in a variety of houses--at 210 Bright Street, at 455 Wellington Street, at 539 Nassua Cr., at 131 College Ave., S., and at 118 Fairview Place. In the late 1980s, the Salmons moved to 1940 London Road. They lived there for the rest of their lives.

It soon became evident to everyone that Dave Salmons was mechanically inclined. He was educated in Sarnia where he completed grade 8 at Johnston Memorial and received his secondary schooling at Sarnia Collegiate. Outside of school, a hobby he approached enthusiastically was model building. Growing up, he always had a great passion for cars, motorcycles and things that went fast. He was very mechanically inclined and enjoyed working on cars and motorcycles. He worked at Croucher's gas station in Sarnia during high school and later at a gas station in Comox, B.C. when he was first married.

He also was interested in the military. As a teenager, he began his military career with #44 Sarnia Optimist Squadron, Royal Canadian Air Cadets in 1967 (in the late 1980s, it was renamed the 44 Sarnia Imperial Squadron, Royal Canadian Air Cadets). His success was capped on his graduation in May 1970 when he was awarded one of two Flying Scholarships—a course valued at \$700 that enabled him to obtain his private Pilots License and to wear the coveted Air Cadet Wings. David went on to earn his Glider Wings in Chatham and his Power Wings in Trenton. Years later his sister Jennifer said, “It wasn't a surprise that he found his bliss in the Air Force first as an aeroframe tech to ultimately in the cockpit of various aircraft. His first taste of flight came while in Air Cadets as he took his first flight in a glider. He was hooked.”

Dave - Grade 10D

#44 Squadron Air Cadet Salmons (L)
(at Northgate Plaza)

In the summer of 1972, nineteen year-old Dave met the love of his life in Sarnia, eighteen year-old Sandra “Sandy” Ruth Martin. They met at a party at Dave’s friends house, Morris Stuckey, in Brights Grove. The daughter of Arthur James Martin (born 1926 in Burnaby, B.C.) and Ruth Carmela Underwood (born 1930 in Vancouver, B.C.), Sandy was born in Calgary, Alberta on September 15, 1954. The Martin family moved to Sarnia in 1959. She had attended Lake Road Public School and Northern Collegiate. A year after meeting, on July 13, 1973, Private David Salmons married Sandy Martin at Grace United Church on Cathcart Road in Sarnia. Less than five months earlier, David had enlisted in the Canadian Armed Forces.

Canadian Armed Forces members support freedom, democracy, the rule of law and human rights around the world. Aside from contributing to international peace efforts, they also proudly serve Canada by defending its values, interests and sovereignty at home. Members of the Canadian Armed Forces patrol our coasts, monitor our skies, support anti-drug operations, assist with disaster relief, provide assistance to civil authorities when needed to maintain public order and security, and lead search and rescue missions. **In the Service to Canada**, in all of these roles, sacrifice and risk exist.

Jennifer, Scott & Beth Salmons

Twenty year-old Dave Salmons enlisted with the Canadian Armed Forces on February 26, 1973 at Canadian Forces Base (CFB) Cornwallis, Nova Scotia. His plan was to become a mechanic in the military. He underwent his basic training at CFB Cornwallis and did well. A letter received by his mother Myrtle at her Wellington Street home in late June 1973 from Captain T.E. Connors, Base Commander, reveals how successful he was there:

Dear Mrs. Salmons:

It is with pleasure that I inform you that your son has successfully completed an eleven week Basic Recruit Training Course, and will shortly leave Cornwallis for further training and subsequent employment as an Aero Engine Technician with the Canadian Armed Forces.

Milton was particularly successful in his training in that he received the "Commandant's Shield", awarded to the Best All Round Recruit in Course No. 7315.

After graduating as top cadet from CFB Cornwallis, and being awarded the Commandants Shield, he set off for training at CFB Borden in July 1973, the same month that he got married. So newlyweds David and Sandy set off for Barrie where they rented an apartment in the downtown and lived there while David completed his training at CFB Borden. Dave was at CFB Borden from July 1973 to December 1973.

Leaving Sarnia bound for Cornwallis, 1973

Dave with his grandmother Jessie Salmons

Note: Dave's grandfather, Archibald Maynard Salmons, was from a family of seven boys and three girls. One of his siblings was Alfred Charles Salmons, born in December 1916 in London, Ontario, who grew up and was educated in Point Edward and Sarnia. For eight years, Alfred worked in the trucking business with his three brothers in Sarnia. In September 1943, at the age 26, Alfred enlisted in the Canadian Army in London. At the time, he was working as a truck driver with Ford Motor Company and living in Windsor with his widowed mother, Lucy. When he enlisted, two of his brothers were already in the RCAF (Robert, a Pilot Officer in England, and George, a Leading Aircraftman in Montreal) and one was in the Canadian Army (Henry, a Gunner in Italy). Alfred embarked overseas to the United Kingdom in April 1944 and arrived in France in July 1944 during the Battle of Normandy. As a member of the Highland Light Infantry of Canada, R.C.I.C., he served with that unit as they advanced through France, Belgium, the Netherlands and into Germany. He was wounded in action in October 1944 but later returned to action. On March 31, 1945, Lance Corporal Alfred Salmons was killed in action (in the field) in Germany during the Battle of the Rhineland. He was originally buried near Vrsselet, Germany, and was later exhumed and reburied in Groesbeek Canadian War Cemetery, Netherlands.

Dave in his 1969 Camaro (with Scott)

Basic Training Cornwallis June 1973

Due to his high scores or ratings, Dave got his choice of postings after CFB Borden and chose Canadian Forces Base (CFB) Comox in British Columbia. In January 1974, Dave and Sandy drove to B.C. It was so cold during their winter drive west that their car battery froze in Saskatchewan in the middle of nowhere. While at CFB Comox with RCAF #407 "Demon" Squadron, Dave was an aero-engine technician, working on aircraft that included the Canadair CP-107 Argus, a four-engine marine reconnaissance aircraft.

Myrtle, Dave and Milton

Jennifer, Beth and Dave

While at Comox, the military officials recognized his talents and skills and recommended that he become a pilot. At the time, they were accepting people with university entrance marks and you didn't have to go to university. Dave was accepted and began his officer training at Canadian Forces Base Chilliwack in B.C. While there, he injured his Achilles tendon enough that he worried it would put him back in the course. Overcoming his injury, he successfully completed his three months of officer training.

From CFB Chilliwack, Dave went to Portage La Prairie in Manitoba where he attended 3 Canadian Forces Flying Training School (3CFFTS). At this basic flight school, he completed three months of training in small-winged aircraft. Then Dave was posted to CFB Moose Jaw (also known as 15 Wing) in Saskatchewan for an 11-month training course. This higher level included training on the Canadair CT114-Tutor, the same aircraft that the Canadian Forces Snowbirds use. During this training period, Sandy stayed in Comox while Dave was in Chilliwack and Portage La Prairie, but she joined him in Moose Jaw.

Dave with his brother Scott in Moose Jaw 1976

Dave graduated from CFB Moose Jaw as top overall cadet and again with achieving the scores that he did, he was able to get his choice of posting. He chose transport squadron and was sent to CFB Trenton, Ontario, where he became a member of #436 Transport Squadron and attained the rank of Captain.

Sandy & Dave – Graduation Moose Jaw Jan. 1976

Captain Dave Salmons – Moose Jaw 1976

RCAF #436 Transport Squadron "Onus Portamus" (We Carry the Load), was formed in India during World War II in August 1944. Operating from a base in India and equipped with the C-47 Dakota medium range transport,

the Squadron's role was to supply troops and material to the Allied 14th Army in Burma. The squadron was disbanded in June 1946 and reformed in April 1953, where it would eventually be based at CFB Trenton, and by 1960 was equipped with CC-130E Hercules aircraft--a four-engine, fixed-wing turboprop aircraft. In 2006, the squadron began to transition to operating with the "workhorse" of the RCAF transport fleet - the CC-130J Hercules aircraft. Years later, RCAF #436 Squadron received the Afghanistan Battle Honour for their significant contributions to Canada's mission in Afghanistan beginning in late 2001.

Dave inspecting #44 Sarnia Squadron cadets

Dave and Sandy – May 1980

Dave Salmons intelligence, dedication and professional abilities were recognized by military officials. While still a Lieutenant, he was appointed a commander of a Hercules aircraft. Dave's training and career path took him to distant places around the globe including his favourite place, New Zealand, and his least favourite, Greenland, where he did his survival training. One of his missions involved him flying into a tense Middle East situation.

The incident took place in January 1979 during Operation BATON. By 1978, civil unrest had led to several heated anti-government demonstrations in Iran. The escalating protests eventually forced Reza Shah Pahlavi, Iran's leader since 1941, to flee his country on January 16, 1979. The Islamic Republic was formed in February. In early December 1978, as a result of civil unrest in Iran, the Department of External Affairs requested and the Government of Canada authorized the CF to provide for a potential evacuation of Canadian and foreign nationals from Iran. The staging point for the CF aircraft in Operation BATON was Ankara, Turkey. Phase I was the deployment of approximately 105 personnel to Ankara on Dec. 9, 1978 to set up the Airlift Control Element at Ankara Airport.

Phase II of the operation involved the evacuation of Canadian and other foreign nationals. Beginning on December 31, with only four hours notice, a CC-137 and CC-130 aircraft departed CFB Trenton. Dave Salmons was the pilot of the CC-130 aircraft. They arrived in Ankara on January 1 and 2, 1979. Another CC-130 from CFB Lahr, West Germany and two other CC-130 from Trenton joined them in Ankara by January 3.

On January 3, 1979, four flights were made into Tehran by four CC-130 aircraft, one piloted by Dave Salmons. When they landed on tarmac in Tehran, they had been instructed to keep their planes running; there would only be a narrow window of opportunity to load; and to leave immediately once the civilians boarded. All told, the Canadian Forces evacuated 315 civilians from NATO-member nations under extremely dangerous and chaotic conditions as Iran entered a state of near-anarchy, including Canadians, West Germans, British, Americans, Australians, Finnish and New Zealanders. A fifth flight on January 4 picked up 52 more personnel.

One side note to the operation involved Dave. While he was waiting in his cockpit on the Tehran tarmac, someone noticed that he was not wearing a Canadian Forces hat. Rather, in a nod to his love of motorcycles, he had donned a civilian ball cap emblazoned with the word "YAMAHA" across the front. Word spread to superior officers

who were livid and let him know it later. His sister stated, “Dave caught hell for what he did.” After that incident, Dave only wore his “YAMAHA” hat when he was off duty.

In Phase III of the operation a final flight was arranged in late January 1979, with the belief that 160 personnel required evacuation. One Hercules aircraft was involved, departing CFB Trenton on January 31 and returning February 8. The final flight from Tehran on February 6 picked up 58 personnel, including Canadians, Americans, British, New Zealanders, French and Australian. Operation BATON was a complete success.

Captain Salmons in lead CC-130 Hercules

Years after David’s death, his sister Beth recalled an incident that was a foreshadowing of what was to come. At a family gathering in Sarnia in 1980, a few months before Thanksgiving, Dave spoke about his job. His words still send a shiver through his sister, Beth, years after he uttered them. “I don’t think he felt any premonition or meant anything ominous,” Beth stated. “Dave simply said that if anything happened to him, we should not be sad. He had seen more things, done more things and visited more places all over the world doing something he loved doing.”

Dave and Sandy were blessed with two children together. Their plan before children was a new motorcycle, a new TV, and a new stereo system. Their first child, arriving two months after their 5th anniversary, was James (Jamie) Patrick, born in September 1978 in Belleville, Ontario. Their goals of a new motorcycle, TV and stereo were all achieved. Their second child was Ruth Marie, born in June 1981 in Nanaimo, B.C.

The circumstances around Ruth’s birth are particularly heart-wrenching. In September 1980, Dave, Sandy and two year-old Jamie were living on Johnson Road in Middleton Pk., Trenton, Ontario. A month later, on October 13, Thanksgiving Monday, Dave learned that Sandy was now pregnant with their second child. Two days later, Dave Salmons lost his life in the service of Canada.

On October 15, 1980, while flying on a Search and Rescue Mission, #436 Squadron’s Lockheed CC130E Hercules aircraft (#130312) stalled at low level (likely at an altitude of less than 600 metres) and crashed in a forest 13 km west of Chapais, Quebec (about 60 kilometres west of Chibougamau, and 450 kilometres north of Montreal).

The Hercules aircraft was combing Quebec’s north woods for a Trans-Quebec Ltd. helicopter that had gone missing 3 days earlier. The helicopter had two people on board had gone down on a flight from Montreal to James Bay. At about 2:45 p.m. (Oct. 15), the Hercules radioed that it was going down and the transmission was picked up by a Canadian Forces helicopter that was also on the mission. The Hercules crashed and burned. There were scattered clouds when the plane went down and a light covering of snow on the ground. A forces spokesperson said, “*There was a fire. Everything was pretty badly burned.*”

Crash site of CC-130 Hercules aircraft #130312 (Source 10R)

Eight members of the air crew died in the crash, including Sarnia's David Milton Salmons. Two crew members survived. The October 16 *Sarnia Observer* reported details of the incident under the headline, *Eight of 10 crew members killed in crash of Hercules transport*. The following day, on the front page of the *Sarnia Observer*, local citizens would read the headline: *Sarnia man dies in Hercules crash*. Following is the Canadian Press story;

The two survivors of the Canadian Forces C-130 Hercules aircraft that crashed Wednesday in northern Quebec, taking eight lives, are in the forces base hospital in Trenton with serious injuries. Forces spokesman Capt. Jim Carnegie said Thursday that Capt. Dahl Manthorpe, 25, of Coquitlam, B.C. and Master WO William Crosby, 48, of Yarmouth, N.S., are in stable condition but their injuries are considered serious.

Carnegie said the four bodies recovered from the Quebec bushland will be flown to Trenton when they have been released by the Quebec coroner. Forces spokesman Maj. John Weisman said four more victims of the crash remain to be found.

Killed in the crash were aircraft commander Capt. David Salmons, 27, of Sarnia, Ont., navigator Capt. Ronald Kavanaugh, 38, of Bell Island, Nfld., Master Cpl. Aubrey Woodham, 33, of Moorefield, Ont., Sgt. John O'Neill, 42, of Port Dover, Ont., Cpl. Ronald Fisher, 27, of Antigonish, N.S., Col. Richard Cocks, 25, of Woodstock, Ont., Master Cpl. R.J. Taylor, of Simcoe, Ont., and Pte. William Minnis, 20, of Toronto.

A team of defence department investigators arrived from Ottawa a few hours after the Hercules went down Wednesday afternoon 60 kilometres west of Chibougamau and 450 kilometres north of Montreal.

The Hercules was searching for a lost helicopter that Jean-Paul Parent, director of marketing for Trans-Quebec Helicopters Ltd., of Lachine, Que., said was assigned to a workcamp 160 kilometres northwest of Chapais.

The two survivors; Capt. Dahl Manthorpe and Master WO. William (Bing) Crosby (flight engineer) were flown to a hospital at their base in Trenton. Capt. Manthorpe survived by smashing a hole in a window and diving from the cockpit. He escaped with only broken bones. He called for the others, but only Crosby followed.

Perishing with aircraft commander Captain David Salmons were Corporal Ronald John Cocks (25) of Woodstock (rescue specialist); Corporal Ronald Wade Fisher (27) of Antigonish (rescue specialist); Sergeant John Ronald O'Neill (42) of Port Dover (rescue specialist); Captain Ronald Kevin Kavanaugh (38) of Bell Island (navigator); Private William David Minnis (20) of Toronto (spotter); Master Corporal Robert John Taylor (32) of Simcoe (spotter); and Master Corporal Aubrey Alan Woodham (33) of Moorefield (loadmaster).

On October 17, 1980, Myrtle and Milton, then at Nassau Crescent in Sarnia, received the following letter from the Commander of Air Transport Group, Brigadier-General L. Skaalen at CFB Trenton;

Dear Mr. & Mrs. Salmons,
On behalf of all who serve in Air Transport Group, I extend to you our heartfelt sympathy for the loss of your son. We too will sorely miss his presence amongst us.

Dave was dedicated to the service of his country and his fellow countrymen. Regretfully, it was in the course of this honourable calling, trying to save the lives of others, that he gave his own life. We are truly grateful and proud to have served with him.

On October 20, Sarnians read in the *Sarnia Observer* about the special military memorial service that was being held that day in Trenton, Ontario for Sarnia serviceman Salmons and the seven other RCAF members killed in the crash of the Hercules C-130 aircraft in Northern Quebec. The Salmons family members attended the service in Trenton. Dave's body was then flown to Sarnia the next day for a memorial service conducted by R.C.A.F. Wing 403 held at the D.J. Robb Funeral Home. On October 22, Dave's funeral was held at the D. J. Robb Funeral Home followed by cremation.

Dave left behind his wife Sandy and their two children Jamie, age 2, and Ruth, born eight months after her father's death; his parents Milton and Myrtle Salmons; his brother Scott; and his sisters Beth Shute and Jennifer Kilbreath, all in Sarnia.

Dave with his son James in Trenton 1980

James and Ruth

Don Thain was the Commanding Officer of #44 Sarnia Optimist Squadron, Royal Canadian Air Cadets when David was a cadet. Don had lost two brothers in World War II (their stories are included in this Project). Following is the eulogy given by Don Thain at David's memorial service;

Some fourteen years ago a young lad appeared at the Optimist Youth Centre on Philip Street to apply to join #44 Squadron, Royal Canadian Air Cadets. As Commanding Officer at that time I tried to make it a point to get to know the cadets that served in the squadron and thus began a lengthy association with David Salmons.

He was an energetic, keen cadet, the long hair syndrome was just coming into vogue and it took determination and desire to have your hair cut short which was a prerequisite of wearing an air cadet uniform. David, as well as being an excellent cadet, was also a good student. He stayed with the squadron for the full term of service. I recall the first year he attended summer camp at Trenton. He was our main hope for the track team competition. He entered the race without track shoes—not that he didn't have them—but he explained that he could run better without them. So shoeless he ran and how proud I was when he won. The interest and support of his parents was evident throughout his cadet career and created a friendship with them that I cherish. David participated fully in all phases of cadet activities.

He was awarded several special courses with the high point being reached when he was granted a flying scholarship. A member of the splendid drill team the squadron maintained, he ultimately held the key position of right marker. HE represented everything that was good in cadet training and was proud to belong. We were proud of him. His interest in motorcycles surfaced during his cadet career and was a continuing joy to him afterwards.

If ever a young man was meant to fly it was David. His marks and abilities throughout his service career were always at or near the top. He was a superb pilot and on completion of his flying training elected to go multi engine and was posted to Transport Command at Trenton. It was enthralling to listen to David tell of his experiences and visits to so many parts of the world we homebound individuals could only dream of.

He lived his air force career to the fullest and it was an inspiration to us all to hear the pride he had in his service, his squadron, its accomplishments and professional expertise. He exulted in the superiority shown by Canadian airmen when competing with or flying with aircrews from other countries. While he worried about the heavy demands made upon our service personnel due to commitments, extensive work load and tasking, he knew there were no airmen more qualified or dedicated to accomplish the country's obligations. He was truly doing what he wanted to do and how many of us can say this.

To know David was an inspiration and an honour; to be considered his friend, doubly so. I am proud I counted myself in this category. He was keen, dedicated, outgoing with a sharp sense of humour. No matter where he served in his military career he maintained his membership in 403 Wing. He invested money in the purchase of our building; he visited regularly when home on leave.

The tragedy of his passing is eased a bit by the knowledge that David was doing the thing he loved doing – flying. All who came in contact with him admired him and were proud of him and what man could receive a better accolade. In God's wisdom he has departed from our midst to higher heights than earth bound flight could take him.

Don Thain

On October 24, 1980, Myrtle and Milton received the following letter from the Commanding Officer of 436 (T) Squadron, Lieutenant-Colonel P.R. DeTracey at CFB Trenton:

Dear Mr. & Mrs. Salmons,

I wish to extend the sympathies and condolences of the officers and men of 436 Squadron on the tragic loss of your son. Dave willingly served as a Search and Rescue pilot, fully aware of the inherent dangers of this most humanitarian service.

In seven years in the Forces, your son was able to fulfill a dream. His progression from Air Cadet to Serviceman, to Pilot was a most satisfying accomplishment. His appointment as a Hercules Aircraft Commander while still a Lieutenant speaks of his professional ability and the high regard in which he was held by our Squadron. A dedicated officer, his talents will be sorely missed by all.

Your son served his Squadron and Country with pride and distinction. His many achievements will long be remembered by those who shared his comradeship.

Once again, may I express our deepest condolences.

Soon after David's death, the wife of one of his comrades wrote the following about him:

Many a poem has been written about famous and loved people. It is this thought that inspired me to do the same for one certain man. A person who instilled many unforgettable memories in the hearts and minds of numerous individuals. There will only ever be one Dave Salmons. Each letter of his name describes in brief, what type of a man he was in those who knew him well and may it give insight to those who were unfortunate not to have known him.

Dedicated to his occupation, to the few people who were close to him and to the many organizations of which he was a part of.

Ambitious to the point of obsession. It was through his ambition he became known and admired as one of the best in his profession.

Valued, honoured, and revered. He had the quality that commanded respect of his opinions.

Efficiency showed in everything he undertook.

Sincere. His sincerity and integrity was undeniable to his family, his friends, and colleagues.

Amiable. Given the time to know him in depth one came to appreciate his traits. Love and understanding blossomed into a tight bond between close friends, of which there were few.

Lively. One who brought happiness to many through his character. Always occupied with relishing his life to the fullest each day.

Mischievous. A pronounced part of his character to which many fell pray to.

Obliging. He devoted most of his time and services to anyone who was in need of them, without hesitation.

Noble in his rank of Captain, he was regarded highly, and it will always remain so.

Sociable. Where harmless groans were emitted by the wives of his close friends when Dave came to claim the full and devoted attention of his male companions.

This is the man whom is as dear to us and is irreplaceable in many of our hearts. May this prose be in memory of him and may he also watch over us and protect us as our guardian angel under God's name.

Also shortly after David's death, Milton Salmons purchased a military sabre which he donated to #44 Sarnia Optimist Squadron. Every year since David's death, Squadron 44 Air Cadets present the memorial sabre at the annual inspection. The Sabre was donated by Milton and Myrtle Salmons, and is awarded to the air cadet who exemplifies the "Espirit De Corps" each year. The award is a source of much pride for the Salmons family.

Understandably, the loss of David was a devastating blow to all the members of the Salmons family, but life continued.

Elizabeth (Beth) Salmons, who had married Rick Shute in June 1971, had two children: Julie (born 1973) and Steven Shute (born 1974). Beth and Rick later divorced. For son Steven, whether it was growing up hearing stories of his uncle or seeing his portrait on a dresser, David influenced his career choice. At the age of eleven, Steven came to his single mother and said, "We need to talk". He continued, "What I'm about to tell you may upset you. I want to go into the Air Force and do what Uncle Dave did." With his mother's full support, Steven joined the

air cadets with plans to join the air force. But Steven grew to a height of 6'3", making him too tall to be a pilot. Several months after completing a year at Lambton College, he went to the military recruiting office in London. A short time later he was offered and accepted a position with the Royal Canadian Navy (RCN). Steven Shute, based at CFB Esquimalt, served all over the world with the RCN for twenty-one years. Steven Shute married Colleen Bonneau and had one child, Harmony. Julie Shute later married Mike Lewis and had three children: Stephen, Josh and Sarah.

Jennifer Salmons, who had married Steve Kilbreath in November 1973, had three children: Jason (born 1974), Justin (born 1976) and Ryan (born 1979). Later, Jason Kilbreath and his partner Katherine Pild had two children: Emily and Ethan. Justin Kilbreath married Shannon Mutter and had one child, Tyson. And Ryan Kilbreath and his partner Crystal Middleton later had one child, Mary Jane. Jennifer Kilbreath later remarried, to Allan Calvert in 1988.

Scott Salmons married Angela Whitehead in 1984 in Sarnia and had three children: Matthew (born 1985), Alex (born 1988) and Robert (born 1990). Alex later had two daughters, Addison and Maxine; and Robert had one son, Graeyson.

Within six months of David's death, a pregnant **Sandy Salmons** and son James re-located out west where her parents lived, and resided in Parksville on Vancouver Island in British Columbia. The two children of David and Sandy Salmons moved on without their father. James married Ashlee Corpe in 2008 and had three children: Kesler, Aleda and Jemma. Ruth Marie later married David Joseph Powers.

For the many nieces, nephews and extended family of David Salmons, they only remember or know him through fading memories, old stories and photographs. Nearly four decades after his death, his sister Jennifer would say, "His life although short has left an indelible mark on our lives and even after all this time he is missed. We are very proud of his remarkable achievements in the armed forces."

Milton Salmons was totally devastated by his son's death. Daughter Beth recalled that the mere mention of David's name would so upset Milton that he'd shed tears and leave the room. Milton Salmons passed away at age 64 on April 12, 1993 at St. Joseph's Health Centre in Sarnia. Along with his wife Myrtle, and his two daughters and one son, he left behind ten grandchildren and one great grandchild. A funeral service was held from the chapel of the D.J. Robb Funeral Home, along with a memorial service conducted by the R.C.A.F. Wing #403. He was interred at Resurrection Cemetery and Crematorium (Grandview Memorial Gardens) in Sarnia.

Myrtle Salmons passed away at age 73 on September 1, 2005 at Bluewater Health in Sarnia. She had been a longtime member of the R.C.A.F. Association. She left behind her daughters Beth Shute in Sarnia and Jennifer Calvert in Brights Grove; her son Scott in Sarnia; her daughter-in-law Sandy Salmons in Nanoose Bay, B.C.; and many grandchildren and great-grandchildren. After private family cremation services the internment of ashes took place at Resurrection Cemetery and Crematorium (Grandview Memorial Gardens) in Sarnia.

Twenty-seven-year-old Milton David Salmons was posthumously awarded the Canadian Forces Decoration Citation, and is commemorated in Ottawa in the *Book of Remembrance - In the Service of Canada*. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always. SOURCES: D, L, N, 2D, 3G, 6J, 8X, 10R, 3o, 3t, 3v, 3w, 3z

Captain Milton David Salmons

THE AFGHANISTAN WAR (2001-2014)

Following is a description of important events, people and operations of the Afghanistan War. Sarnia-Lambton's sons and daughters participated in every major operation fought by Canadian troops. Some made the supreme sacrifice.

- **THE BEGINNING:** Canada's role in Afghanistan began in late 2001, in response to the September 11, 2001 terrorist attacks in the United States. On that day, thereafter known as **9/11**, four airliners were hijacked in the skies over the eastern United States: two were deliberately crashed into the World Trade Center Twin Towers in New York City; one into the Pentagon in Washington; and one crash-landed in a field in Pennsylvania. These terrorist attacks resulted in the deaths of nearly 3,000 civilians, including many Canadians.

Afghanistan, a rugged country in Southwest Asia, is located between Pakistan and Iran. Its climate can be extreme, with summer temperatures of 50° C, and huge dust storms that sweep across its arid deserts. The various ethnic groups and factions that have made the country home over the centuries have given Afghanistan a rich heritage and diversity, but have also helped make peace and stability difficult to achieve. In the 1980s, the Taliban regime gained control of the country. This extreme fundamentalist regime severely limited civil rights and supported international terrorist groups, including Al-Qaeda (the group that was behind the 9/11 attacks in the United States). Canada would respond to the campaign against terrorism in Southwest Asia through the United Nations (UN) and the North Atlantic Treaty Organization (NATO).^{D, 5A}

On October 7, 2001, the United States and the United Kingdom launched **Operation Enduring Freedom**, a military effort to dismantle the al-Qaeda terrorist network in Afghanistan and to remove the Taliban regime from power. On the same day, Canadian Prime Minister Jean Chrétien announced that Canada would contribute air, land and sea forces to the international campaign against terrorism.^{5A}

Canada had several reasons for participating in the mission in Afghanistan: to defend Canada's national interests; to ensure Canadian leadership in world affairs; to identify and to neutralize al-Qaeda members in that country; to topple the Taliban regime, which was supporting international terrorism; and to help Afghanistan rebuild and create a better governed, more stable and self-sufficient viable country.^{D, 3G}

In late December 2001, the United Nations Security Council authorized the creation of NATO's **International Security Assistance Force (ISAF)** — its mandate to maintain security in and around Kabul so employees of the Afghan Interim Government and the United Nations could operate in a secure environment.

- **CANADA RESPONDS:** The first part of Canada's support was known as **Operation Apollo** which took place on the high seas in the Indian Ocean, the Arabian Sea, and the Persian/Arabian Gulf. In early October 2001, the *HMCS Halifax* was directed to head for the Arabian Sea as part of Canada's counter-terrorism efforts. *Halifax* was soon joined by two more frigates, a destroyer and a replenishment ship, along with *HMCS Vancouver* which was part of an American Aircraft Carrier Battle Group. *Operation Apollo*'s main objective was to prevent the escape of Al Qaeda and Taliban members from Afghanistan to Saudi Arabia and other nearby countries via the seas. The RCN ships also participated in the defence of United States Navy ships transporting US ground and air forces; and supported multi-national counterterrorism activities in the region. The naval component of *Operation Apollo* lasted until December 2003. The Canadian Navy continued to send rotations of its ships—frigates, destroyers, and replenishment vessels until October 2008, conducting intensive patrols throughout the Middle Eastern waters, looking for escaping terrorists.^{D, 3G, 5A}

The second part of the Canadian Forces' role, the land-based segment, began with the first group of approximately 40 Canadian commando soldiers from the elite Joint Task Force 2 (JTF2) that was sent secretly into Afghanistan in early December 2001. The first contingents of regular Canadian troops, the 3rd Battalion of the Princess Patricia's Canadian Light Infantry, arrived in Afghanistan in January-February 2002. After six months of operations—and four soldiers killed and eight wounded in an errant U.S. Air Force bombing—the battalion returned home.

Leaving home: In every war, when young soldiers leave their home and families to go fight overseas, it is an extremely emotional time. The same kind of scenes have played out again and again as young soldiers parted ways with their loved ones, whether it was to fight in the Boer War, World War I, World War II, Korea or Afghanistan. Following is one young soldier's recollection of leaving home to go to Afghanistan. His name was Corporal D. Brett Irwin.

The day I was leaving for Afghanistan, my family came to Petawawa to see me off. My dad and mom, stepmom and stepdad, sister and grandmother-the whole family. All the soldiers who were shipping out were surrounded by their families. But there wasn't a bus in sight... It turned out that because of a volcano in Iceland, all flights were grounded. So the soldiers went on a forty-eight-hour stand-down.

I went back home to Brampton to hang out with family and friends. Two days later, the volcano was still spewing ash. I figured we wouldn't be going anywhere, but I had to report for duty anyway. My mom hopped into the car with me, and we drove back to Petawawa together, arriving right on time at 6:30 in the morning. As we drove around the corner into the base, both of us spotted the buses at the same time. There were about fifteen, all lined up and waiting. My mom broke down. I could tell she was trying to hold it together but couldn't. By the time I had to climb onto my assigned bus, she was sobbing. I hugged her. I couldn't help but think that this might be the last time I ever get to hug her, so I made it a really tight one. All I could see as we drove off was her standing there, in the same spot, crying.^{9K}

Letters Home: Following are portions of several letters written in March and April of 2002 by four of Canada's Afghanistan peacekeeping soldiers;

> Corporal Curtis Hollister (Saskatchewan):

Dear Mom & Dad, Shannon & McKenzie,

Today is my 16th day in Afghanistan, we are doing perimeter security around the airport. I'm looking forward to getting out of the base and into the countryside which is very arid and rugged... I live in a small tent with one other person and space is very cramped as [we] live within sandbag walls which help to protect from mortar & rocket attack... In our platoon with all our duties we're lucky to get 4 hours sleep a day... It's very dirty here, sand gets into everything and it's impossible to stay clean...

> Corporal Shane Brennan (Collingwood, Ontario):

Dear Mom,

... We are living in two-man trenches by day and by night the same... a long time to live in a trench looking out into a few trees, razor wire and loads of dirt. The dust here is crazy. We have had two dust storms and I think I have inhaled enough dust to last three lifetimes... You'll have to excuse the writing – I am writing on a flimsy pad in my trench with my buddy watching outside... So far, my unit and I are all on the outside of the camp/airfield as the first line of defence. This week, I will be leaving camp for six days to observe a certain area for terrorist activity, working alongside the local Afghani army...

> Private Richard Green (Nova Scotia):

Dear Nan,

How are you? Not too worried I hope. Things are O.K. over here so you don't have to worry. Never believe anything you here in the news either. We've been hearing some of the stuff the media has been saying and none of it is even close to the truth... Well I've got to go for now. I miss you and hope to see you soon.

Hey Sweetie! [to his fiancée Miranda]

... Another month has passed. It's very hot over here. It's "slaps you in the face hot" and it's not even summer yet. That's not good... I miss you Princess. How are things going in Edmonton? No problems I hope... I worry about you all the time. Is there anything you need me to try and do for you? I don't know what I can do but I'll try. I love you princess. I miss you so much. Be careful, have fun and don't forget about me.

Hi Sweetie,

How are you? I'm OK. I got your parcel today... I'm listening to your song right now. Thankyou for everything. We have to go to a place called Khost for 3 weeks. We leave tomorrow or the next day. We should have phones so I should be able to call you. I'll try to call you before we leave... I don't have anything else to say for now honey. I really miss you. I love you so much Miranda. Love always, Rick

Private Rick Green didn't tell Miranda in this letter that he'd bought an engagement ring with three diamonds while on leave in Dubai, United Arab Emirates.

> Sergeant Marc Leger (Lancaster, Ontario):

Dear Nan

... Thing's here are kind of boring so far, at first I found [it] strange living 200m from the runway of a airport however you get adjusted to noise quickly. I've had the opportunity to leave the camp a couple of times so far. It's incredible to see this degree of poverty. They honestly live in mud & brick homes... Now I want to thank

[you] for all you have done for me over the years and especially with all that has happened in the last couple of months. It's great knowing that I have some[one] to help me take care of the most special person in my life, Marley...

Marley was Marc's wife. A month before Marc left for Afghanistan, Marley miscarried their first child at fourteen weeks.

Dear Marley,

... I love you very much and I'm thinking of you. I just want you to know that you are my everything. The other night I had a dream that I had you in my arms & we were both lying around on our bed with the dog of course and it was a great feeling knowing that I have such a good life with you...^{7A}

• **FIRST CASUALTIES:** In the early morning hours of April 18, 2002, members of Canadian Forces were carrying out routine live-fire night training exercises at the foot of a craggy mountain range, an old al-Qaeda training base called Tarnak Farm, about 16 km south of their Kandahar base. As they were firing their machine guns and rocket launchers into the desert night, two majors in the U.S. Air National Guard, flying F-16 jet fighters overhead, apparently believed they were under attack. One of them dropped a five-hundred-pound, laser-guided bomb on the firing range below, on a section of the Princess Patricia's Canadian Light Infantry.

In this “friendly fire” incident, eight Canadian soldiers were wounded, including Corporal Curtis Hollister and Corporal Shane Brennan; and four Canadian soldiers were killed, including Private Richard Green and Sergeant Marc Leger (portions of their letters home are above). A tremendous shock to the nation—these were Canada's first military casualties of it's mission in Afghanistan.

Lieutenant-General Mike Jeffery, Chief of the Land Staff wrote the Canadian Armed Forces' formal response to the Kandahar tragedy to the Princess Patricia Canadian Light Infantry. Following is a portion of that response;

Let me begin by expressing my deepest condolences to the families, friends and comrades of the soldiers killed in Afghanistan. Our thoughts and prayers are with you today. Every member of the Canadian Army shares in your sadness. You have lost husbands, sons, and friends and we have lost four of our own. They were a part of your family and they were a part of our family. We will miss them all.

As senseless as this tragic incident may seem, these men did not give their lives for naught. They died fighting for what they believed in. They died serving their country. They gave their lives in the midst of a struggle to restore peace and security to our world. For this we owe these fine soldiers, and their families, a great debt of gratitude.

There is a great sense of shock and grief being expressed here in Canada. Below the surface of this sorrow is something else – a profound sense of pride. Our nation is proud of you and proud of what you are doing. Canadians have known all along that you have a tough job to do and today they have a real sense of the sacrifices being made...^{7A}

The day after the friendly fire disaster, Major Sean Hackett, of Brighton, Ontario, a survivor of the incident, sent his wife an e-mail. Following is a portion of that e-mail;

... We are focused on sending our four home and that will occur later this evening. I'm fine and very occupied ensuring those things I can influence are done correctly, at the same time providing guidance for getting on with the mission... Earlier this evening we conducted a moving ceremony and loaded the remains of the four who died onto a C17 transport plane – for Germany and then home. It was hard to stare into such a large plane while paying respects. Then again there are many images seared into my memory from that night, and to a lesser extent, in the hours following... Now, our attention here must focus on the progress of those on the mend.

Sean Hackett also sent an e-mail to his brother and copies to other family members including his wife. Seeking to “counter the negative and completely counter-productive America bashing” that he was reading about by some Canadians, he wrote;

Very disheartening, when armchair anger is voiced with no concept of what things are like over here on the ground. I can assure you, American air coverage is a pretty important security blanket for us, regardless of the horrible error in judgement of one individual... then again, we could all make errors in judgement that cost lives – the nature of the profession. I could not have asked for a better company of men to have endured our trial by fire the other night. The response was incredible.^{7A}

Captain Nichola Goddard: In May 2006, twenty-six-year-old Captain Nichola Kathleen Sarah Goddard became the first Canadian female soldier killed in combat on the front lines. Her parent unit was the 1st Regiment

Royal Canadian Horse Artillery, based in Shilo, Manitoba. She served in Afghanistan beginning in January 2006 with the Princess Patricia's Canadian Light Infantry as a forward observation officer.

Following is a portion of a letter that Captain Nichola Goddard wrote home to her parents and husband in March 2006 (two months before she was killed). It was written after a particularly tough week: she had attended two emotional Ramp ceremonies; and there had been several IED strikes and rocket attacks against coalition vehicles/convoys.

...The longer that we are in the theatre and the more that we actually interact with the Afghan people, the more I feel that we are serving a purpose here. I think that these people, through the Afghan National Army and Afghan National Police, are trying to achieve something that we in Canada have long since taken for granted. They lay down their lives daily to try to seize something that is so idealistic it is almost impossible to define. It goes beyond women wearing burkas and children being taught to read and write. The Afghan people have chosen who will lead them. Their new government is striving to make Afghanistan a better place. I had never truly appreciated the awesome power of a democratic government before. We are here to assist that legitimate and democratically elected government. It is easy to poke holes in that statement and say that the system is corrupt and that violence and poverty make people easy targets for our own agendas. Those statements are true; however, we have to start somewhere. With the best of intentions, we have started in Afghanistan. There is nowhere else that I'd rather be right now.^{7T}

On May 17, 2006, Captain Nichola Goddard's unit was ambushed, and she was killed during a firefight against Taliban militants west of Kandahar city in the Panjwaye District, Kandahar Province. At the time, she was leading a platoon under *Operation Peacemaker*. The **"first female soldier killed"** is an unfortunate footnote, because it isn't about gender. She was a Canadian soldier serving her country, carrying out risky missions in a dangerous battle zone. Captain Goddard, a wife and daughter, believed that her service would create opportunities for others to build a better life. In a letter she sent her mother from the battlefield, she wrote, *"It seems to me that we have such a burden of responsibility, to make the world a better place for those who were born into far worse circumstances... It is very humbling to be here – part of something so much bigger than myself."*^{D, 2N, 3G, 5A, 7T}

• **DANGERS "OUTSIDE THE WIRE":** Anytime Canadian soldiers left the relative safety of their main camps to go "outside the wire," the danger was very real. Though the Canadian and NATO forces had better equipment than the Taliban, including tanks, artillery, LAV's, helicopters and drones, they were faced with a number of challenges that included: the coalition forces were viewed as an occupying power, so were vehemently attacked; the Taliban were more familiar with the terrain and frequently fought from trenches and village compounds; the Taliban had good communications and were well-led by experienced leaders; they were well-armed with AK-47s, rocket-propelled grenades (RPGs) and mortars; the Taliban riddled the countryside with IEDS (improvised explosive devices); the enemy was not easily identifiable (difficult to distinguish a combatant from a civilian); and suicide bombers could be anyone, including women and children.^{D, 6Q}

• **OPERATION ATHENA – Phase One:** This was the longest-lasting and most difficult Canadian operation of the ISAF mission, beginning in July 2003 and concluding in December 2011. There were two phases to this land-based, main combat mission. In the first phase, the 1,900-strong Canadian task force was deployed to the northern city of **Kabul**, Afghanistan's capital city, where it became the commanding nation in the ISAF mission. There it helped to maintain security in Kabul and surrounding areas, along with providing assistance to civilian infrastructure in helping to rebuild the country. During this peace-support phase, specific tasks performed by Canadians included regular street patrols, surveillance missions, armed raids on illegal weapons caches, collaborating with Afghan and other international authorities on security issues, assisting with operations of the Kabul International Airport, and providing assistance in rebuilding the Afghan national armed forces. Phase One of *Operation Athena* continued until August 2005, when the Canadian task force began transitioning from Kabul in the north to southern Afghanistan until January 2006.^{D, 3G, 5A, 6Y}

• **OPERATION ATHENA – Phase Two:** In this second phase of Canada's main combat mission, Canadian personnel were transferred to southern Afghanistan, their primary base located in the southern city of **Kandahar** – the birthplace of the Taliban. By March 2006, the Canadian battle group was in the field and a Provincial Reconstruction Team (PRT) was in operation in Kandahar, a hotspot of renewed Taliban and terrorist activity. Officials did not anticipate anything more than low-level combat and, although some intelligence officers predicted a coming storm, few anticipated an enemy force of anything more than 200 trained Afghan fighters and some local supporters. Instead, by June, Canadian intelligence put the number of Taliban at 400 to 600. The next month, there

were thousands of men pouring in from Pakistan, including foreign jihadists whose aim was to test the Canadians' resolve and to seize Kandahar.

For more than five years, Canadian Armed Forces (CAF) members fought the insurgency in one of the most volatile province in Afghanistan – Kandahar. At its peak, the Canadian battle group included nearly 3,000 personnel and was augmented by an air wing from December 2008 to August 2011. Throughout the operation, senior Canadian officers commanded coalition battle groups, while CAF members integrated and operated alongside international troops at all levels. Operations were aimed at protecting Afghans where they live, reducing the influence of the insurgency, eliminating insurgent strongholds, and creating a secure environment for development work to take place.^{D, 2E, 3G, 5A, 6Y}

Operation Medusa: This is perhaps the most famous combat operation taking place during *Athena*. Beginning on September 2, 2006, the offensive involved almost 1,400 coalition soldiers, including the main force of more than 1,000 Canadian Armed Forces members, making it our country's largest combat operation in more than 50 years. It was a Canadian-led offensive fought primarily by the 1st Battalion, The Royal Canadian Regiment, with support from NATO ISAF forces including the Afghan National Army, a U.S. Airborne Group and a U.S. Infantry Regiment. Taking place in the Panjwai District, in a bid to clear out the district of Taliban fighters once and for all, the Canadians began a full-fledged combat operation that sought to kill or force into permanent retreat the Taliban forces in the area.

This operation over seventeen days saw heavy combat with artillery, aerial bombings, and armoured vehicles taking their toll on the various villages and compounds in the area. By September 17th, most Taliban forces had retreated, with over 500 killed and over 130 captured. Twelve Canadian Forces soldiers lost their lives in *Operation Medusa*, including Sarnia/Port Lambton's **Private William Cushley** of the Royal Canadian Regiment. The Operation was marked by two other incidents: fourteen British military personnel were killed when their plane crashed; and one Canadian was killed, and thirty-five wounded by American forces in a friendly fire incident.^{D, 2E, 5A, 6S, 6Y}

Operation Achilles: Beginning on March 6, 2007, the objective of this operation was to clear violent northern districts of Helmand province of the Taliban. Led by British forces, it was supported by other ISAF forces including American, Danish, Dutch and Canadian units. It was focused on the Kajakai Dam, which was a major power source for Afghanistan that had not been functioning for a number of years. The mission involved clearing villages and a large Taliban complex near the hydroelectric dam, as well as clearing the dam of all enemy forces.

Operation objectives were successfully completed by May 30, at a cost of thirty-five ISAF soldiers, including six Canadians—members of the 2nd Battalion of the Royal Canadian Regiment. In the early afternoon of April 8, 2007, the 2 RCR's were escorting a convoy of troops and supplies through the desert to the British soldiers when their light armoured vehicle (LAV III) struck a roadside IED (improvised explosive device). Six RCR soldiers were killed in the massive explosion, and four survived. One of those who perished in the attack was Sarnia/Lambton's **Corporal Brent Poland**.

• **OTHER OPERATIONS:** Canadian forces were involved in a number of other Afghan operations over the course of the mission. In *Operation Accius* (November 2002-June 2005), a team of Canadian Forces officers were part of a team of strategic military planners that supported the Afghan government. This included providing advice in support of the peace process, promoting human rights and conducting humanitarian relief, and recovery and reconstruction operations. In *Operation Argus* (September 2005-August 2008), a team of Canadian strategic military planners worked with representatives of the Afghan government to develop key national strategies and mechanisms for the effective implementation of those strategies. In *Operation Archer* (February-July 2006), Canadian personnel in Kabul assisted in re-forming and rebuilding Afghan security infrastructure, including the Afghan National Army and National Police Force. This involved providing mentors and trainers to help organize, train, equip, employ and support the Afghan Army and police. In *Operation Attention* (May 2011-March 2014) Canadian troops delivered specialized training and professional developmental support to the national security forces of Afghanistan – the Afghan National Army, the Afghan Air Force, and the Afghan National Police.^{3G, 6Y}

• **CANADA BEGINS ITS WITHDRAWAL:** Canada withdrew the bulk of its troops from Afghanistan in July of 2011, ending its combat role on the front lines there. Though its combat role was over, Canadian military remained in Afghanistan. Canada's role there was diverse: protecting the future of Afghan children and youth through developing education and health; advancing security by enforcing the rule of law and protecting human rights; promoting regional diplomacy; and helping deliver humanitarian assistance.

In late 2013, approximately 1,000 Canadian Forces personnel were still deployed in Afghanistan as part of the International Security Assistance Force (ISAF). The ISAF was renamed the NATO Training Mission-Afghanistan. Its role was to help train and mentor the Afghan National Army and Afghan National Police. In mid-March of 2014, the remaining Canadian troops left Afghanistan, officially ending Canada's military involvement there as part of NATO. More than 40,000 Canadian troops served in Afghanistan, rotating through different campaigns there in the longest combat mission Canada has been involved in. It was the largest deployment of Canadian troops since World War II. The twelve plus years Canadian mission in Afghanistan came at a cost 159 Canadian soldiers lives and over 2,100 wounded and many more suffering from post-traumatic stress disorder. Fourteen of the Afghanistan fallen soldiers are from Southwestern Ontario, including two from Lambton County.

On March 12, 2014, Canada's military personnel officially withdrew from Afghanistan. At an understated departure ceremony held under heavy guard at NATO headquarters in Kabul, the Canadian ambassador to Afghanistan told the remaining soldiers there prior to their withdrawal, *"Your strength has protected the weak; your bravery has brought hope to hopeless; and the helping hand you have extended to the Afghan people has given them faith that a better future is within their grasp."* The last of the Canadian troops left Afghanistan aboard military transport planes on March 15, 2014.

• **THE HIGHWAY OF HEROES:** On August 24, 2007, the stretch of Highway 401 running from Trenton, Ontario, to Toronto was officially renamed the "Highway of Heroes" in remembrance of Canada's fallen soldiers. This came about five years earlier as a grassroots effort that ordinary people supported before the government got involved, as a means to pay homage to those who served Canada and made the ultimate sacrifice. The first four Canadian soldiers killed in Afghanistan in 2002 were repatriated at Canada's largest military base, CFB Trenton, then transported to the Coroners Building in Toronto for examination, before being released to the families. The fallen soldiers were driven down the 172-kilometre stretch of highway between Trenton and Toronto, and pedestrians spontaneously lined the overpasses, hoping to make a connection with the grieving families.

After five years of this moving display of patriotism, the Highway of Heroes was officially named in the summer of 2007 and has been a gleaming example of the nation's shared grief and its pride. At the dedication ceremony in 2007, Premier Dalton McGuinty said, *"the Highway of Heroes reminds us that our freedom, safety, and prosperity is often purchased by the sacrifice of others. We owe them a great debt – and while we can never repay that debt, we can see to it that their courage and commitment will always be remembered."*

Civilians young and old, paramedics, firefighters, police officers, Canadian Legion members, military personnel, friends of the fallen, and family of fallen soldiers stand atop each bridge along the highway in the rain, blistering heat or bone-chilling cold. They gather to salute and wave flags on the Highway 401 overpasses while motorcades carrying the bodies of soldiers killed in Afghanistan made their way to the coroner's office in Toronto.

• **HONOURING THOSE WHO SERVED IN AFGHANISTAN:** More than 40,000 Canadian Armed Forces members—men and women—served in the Afghanistan theatre of operations between 2001 and 2014. On May 9, 2014, the "**National Day of Honour**" was commemorated across Canada to honour the legacy of the Afghanistan heroes. The Government of Canada set aside this day to mark the end of the country's military mission in Afghanistan. Ceremonies that included vigils, parades and moments of silence were held in towns and cities across the country, including in Ottawa and in Sarnia. This one-time event was set aside by the Government for two principal reasons: to recognize and to honour the members of the Canadian Armed Forces in Afghanistan; and to pay tribute to the fallen, to the sacrifices of the wounded, and to the special burden borne by the Canadian Armed Forces families. Prime Minister Stephen Harper was one of the dignitaries who spoke at the ceremony in Ottawa. Part of what he said included, *"Canadians have always been willing to shoulder our share of the burden in defence of our freedoms and of the values we share with our fellow human beings. In the spirit of Vimy, that is what you did in Afghanistan where the fight was as fierce as any Canadian has ever seen. That is why the dates 2001-2014 will be chiseled into the stone of the National War Memorial."*

In 1982, the National War Memorial had been rededicated to honour, along with veterans of the First World War, those who served in the Second World War (1939-45) and the Korean War (1950-53). On Remembrance Day, November 11, 2014, the National War Memorial was rededicated to honour all who had served Canada in wartime. The "South African War (1899-1902)" and the military mission to "Afghanistan (2001-2014)" were added to the memorial, along with a new inscription: "In Service to Canada."

• **THE SARNIA-LAMBTON AFGHANISTAN MONUMENT:** This memorial was officially dedicated in Veterans Park on October 30, 2016. Through the efforts of the Sarnia 1st Hussars Association, a Light Armoured Vehicle (LAV III) was obtained and anchored on the southeast side of Veterans Park. Three bronze plaques are part of the memorial: one plaque is dedicated to Private William Cushley and Corporal Brent Poland, both of Sarnia/Lambton who died in action while serving in Afghanistan; a second plaque is dedicated to the 40,000 men and women of the Canadian Armed Forces deployed to Afghanistan, and the 159 who lost their lives, between 2001 and 2014; and the third plaque is dedicated to the 86 members of the First Hussars deployed in Afghanistan. More information on the Afghanistan Monument is on page 18. The transcribed plaques are on page 1158.

Sarnia-Lambton Afghanistan Monument

• **ST. PATRICK'S CATHOLIC HIGH SCHOOL REMEMBERS:** The idea to create the plaque was initiated in the spring of 2012 by Tom Slater, former teacher at the school and author of *The Sarnia War Remembrance Project*. The idea was based on the fact that during both World Wars and the Korean War, there were only two secondary schools in Sarnia: Sarnia Collegiate Institute, opened in October 1922; and St. Patrick's High School, founded in 1935. Sarnia Collegiate unveiled a War Memorial plaque in June 1951, honouring former students who fell in World War II (see page 548).

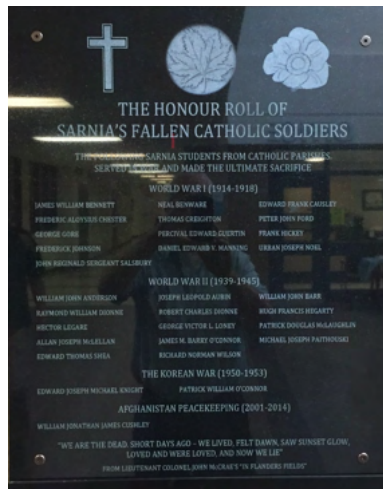

Slater set out to create a similar memorial plaque to honour former St. Patrick's students who fell in war. A starting point for his project was to search for a complete list of all of Sarnia's war fallen; namely, those individuals who had volunteered, fought and died while serving Canada during times of war. He was shocked and surprised to find that no record of Sarnia's fallen soldiers existed. It was then that he began his volunteer research effort that became *The Sarnia War Remembrance Project*.

Along the way, his desire to create a plaque for St. Patrick's continued. Slater derived the list of names from sources that included old St. Patrick's school yearbooks, local church honour rolls (Our Lady of Mercy and St. Joseph's), old *Sarnia Observer* records, and Service Files of the fallen. Through the efforts of Blake Morrison, and support of Lou Giancarlo, Tom St. Amand and Principal Rob Cicchelli, the St. Patrick's plaque became a reality in 2016. On November 10, 2016, a dedication ceremony was held in the school foyer officially unveiling the black granite plaque—**The Honour Roll of Sarnia's Fallen Catholic Soldiers**. Present at the ceremony were dignitaries that included Sarnia-Lambton MP Marilyn Gladu, Sarnia-Lambton MPP Bob Bailey, City of Sarnia Mayor Mike Bradley, Royal Canadian Legion's Bill Chafe and several family members of fallen soldiers on the plaque.

The Honour Roll plaque is inscribed with the names of thirty of Sarnia's fallen Catholic soldiers. The names on the plaque are of ordinary young men who had attended Sarnia-Lambton Catholic schools and/or parishes, including Our Lady of Mercy, St. Joseph's in Sarnia, Sacred Heart in Port Lambton and St. Patrick's High School. The names on the plaque are fallen soldiers from World War I, World War II, the Korean War and the Afghanistan War.

There are three symbols across the top of the plaque: a crucifix, representing God and faith; a maple leaf, representing country (the same leaf design as the one on thousands of fallen soldiers graves overseas); and a poppy, the international symbol of Remembrance. Inscribed along the bottom of the plaque is one line from a poem. The line was chosen specifically to remind young people of the supreme sacrifice of the fallen. They were real people who once lived as the reader does now and who also experienced the same beauty around them and loving relationships with others. The line is from Lieutenant-Colonel John McCrae's iconic poem "In Flanders Fields";
We are the dead. Short days ago – we lived, felt dawn, saw sunset glow, loved and were loved, and now we lie.

The Honour Roll of Sarnia's Fallen Catholic Soldiers at St. Patrick's serves as a tribute to the fallen and to their families. It also serves as a permanent reminder for students to always remember the sacrifices of young men and women not much older than themselves who served, past and present. A transcribed copy of "The Honour Roll of Sarnia's Fallen Catholic Soldiers" is included in this Project on page 1171. The bios of all thirty fallen are included in this Project.

• **SARNIA'S VETERANS PARKWAY:** The idea to name a street to honour local military veterans was initiated by Chuck Toth, City of Sarnia Forestry and Horticulture Supervisor, in November 2018. Many communities across the country and in the area have sections of road dedicated to those who served in the military. Examples in this area include Veterans Memorial Parkway (London), Bluewater Veterans Parkway (Forest), Veterans Way (Petrolia) and Veterans Way (Corunna). Chuck along with volunteers Tom St. Amand and Tom Slater met several times and developed a plan. The goal was to have a street/road designated by Remembrance Day 2019.

Their rationale was that a designated roadway would be another way, a visible way, for people to recognize and to honour the thousands of veterans—men and women of Sarnia and Lambton County who served in the military, including those who made the ultimate sacrifice for their community and country.

The three volunteers decided on a four kilometre section of Highway 40 from the south of Highway 402 to Plank Road. The section of roadway chosen was selected for the following reasons: it is a well-travelled, high-traffic flow road; it is a provincial highway, maintained by Lambton County and the City of Sarnia; and at the half-way point is Heritage Park—the second park in Sarnia dedicated to those who served and sacrificed. Within this park is the World War I Memorial Forest—102 Autumn Blaze maple trees in the formation of a cross. The trees were planted by local Beavers, Cubs and Scouts in 2013, one tree for each fallen soldier listed (at the time) on the World War I section of the Sarnia Cenotaph.

Project leaders Tom St. Amand and Tom Slater were able to gather the support of: Minister of Transportation Hon. Caroline Mulroney; Minister of the Environment Hon. Jeff Yurek; MPP for Sarnia-Lambton Bob Bailey; The County of Lambton Warden Bill Weber and County Council; The City of Sarnia Mayor Bradley and City Council; The Royal Canadian Legion Branch 62, Sarnia; The First Hussars Association of Sarnia; The Royal Canadian Naval Association Sarnia; #403 Sarnia Wing; Aamjiwnaang First Nations, Sarnia; and The Point Edward Ex-Servicemen's Association.

The application was submitted in February 2019 to the Ministry of Transportation Ontario (MTO). In May 2019, the MTO approved the secondary designation "Veterans Parkway". The MTO covered the cost of the manufacture and installation of two highway signs, one at the south end and one at the north end of "Veterans Parkway". The official sign unveiling took place in Heritage Park on October 16, 2019.

• **THE INVICTUS GAMES:** Most of us will never know the full horrors of combat. Many servicemen and women suffer life-changing injuries, visible or otherwise, whilst serving their country. How do these men and women find the motivation to move on and not be defined by their injuries? How can they be recognized for their achievements and not given sympathy? These are the questions Prince Harry asked.

Prince Harry (Henry) of Wales (born 1984) is the younger son of Charles, Prince of Wales and Lady Diana, Princess of Wales, and the grandson of Queen Elizabeth II. On a trip to the Warrior Games in Colorado Springs, USA in 2013, Prince Harry saw how the power of sport could help servicemen and women suffering life-changing injuries physically, psychologically and socially. This inspired him to create the inaugural Invictus Games in London, England, in September 2014, an international sporting event for wounded, injured and sick service personnel.

The Latin word ‘Invictus’ means ‘unconquered’. It embodies the fighting spirit of the wounded, injured and sick service personnel and what these tenacious men and women can achieve, post injury. Invictus Games competitors are the men and women who have come face-to-face with the reality of making a sacrifice for their country. They are the sons, daughters, husbands, wives, fathers and mothers who have put their lives on the line and have suffered life-changing injuries. These people are the embodiment of everything the Invictus Games stands for. They have been tested and challenged, but they have not been overcome. They have proven they cannot be defeated. They have the willpower to preserve and conquer new heights. The Games shine a spotlight on the sacrifices these men and women made serving their country, and their indefatigable drive to overcome.^{9A}

The Invictus Games harness the power of sport to inspire recovery, support rehabilitation, and generate a wider understanding and respect for those who serve their country. The Games is about much more than sport – it captures hearts, challenges minds and changes lives. Prince Harry said, *“These Games have shone a spotlight on the ‘unconquerable’ character of service men and women and their families and their ‘Invictus’ spirit. These Games have been about seeing guys sprinting for the finish line and then turning round to clap for the last man in. They have been about teammates choosing to cross the line together, not wanting to come second, but not wanting the other guys to either. These Games have shown the very best of the human spirit.”*

Other Invictus Games have been hosted in Orlando, Florida in May 2016; in Toronto, in September 2017; and in Sydney, Australia in October 2018.

‘Invictus’ (“unconquered”) comes from the title of a short poem written by English poet William Ernest Henley in 1875. Generations have drawn on the words of Henley’s poem for strength during times of adversity. Henley had come from an impoverished childhood and was himself an amputee, having lost a leg due to complications arising from tuberculosis. These were the inspirations he drew from when coming up with the words for his poem.

‘Invictus’

*Out of the night that covers me,
Black as the Pit from pole to pole,
I thank whatever gods may be
For my unconquerable soul.*

*In the fell clutch of circumstance
I have not winced nor cried aloud.
Under the bludgeonings of chance
My head is bloody, but unbowed.*

*Beyond this place of wrath and tears
Looms but the Horror of the shade,
And yet the menace of the years
Finds, and shall find, me unafraid.*

*It matters not how strait the gate,
How charged with punishments the scroll.
I am the master of my fate:
I am the captain of my soul.*

BIOGRAPHIES OF SARNIA'S AFGHANISTAN WAR FALLEN SOLDIERS

CUSHLEY, William Jonathan James (#N88957698)

Will Cushley of Port Lambton was so anxious to join the military after high school that he tried to join the American and British armies before Canada accepted him. Both parties benefitted. Will, though, was fearful he would show cowardice in battle, but he excelled in combat situations. Unfortunately, he was killed in September 2006 when his company was in a fierce battle with a heavily manned Taliban force. Will, 21, is buried in McDonald Memorial Cemetery, Port Lambton.

William (Billy) Cushley was born in Bristol, England on July 28, 1985, the only son of Errol and Elaine Cushley. Errol Cushley had emigrated from England to Canada in 1977 and was residing in Sarnia where he was employed as an ironworker. In 1984, Errol was vacationing in the UK when he met Elaine. Their marriage was blessed with the birth of William. Four months after his birth, Elaine, along with William and his step-sisters, joined Errol in Sarnia. The Cushley family resided in Sarnia until 1993 when they moved to Sombra, eventually settling for good in Port Lambton. William had three step-sisters: Lisa (born Aug 1, 1967); Tonia (born Oct 10, 1970); and Amanda (born May 26, 1982).

William was a very active and talented child. He enjoyed skateboarding, BMX biking, running, and road hockey as well as playing a few seasons of organized hockey. He also spent some time in the Cubs where his mother Elaine was one of the leaders. William loved to draw, and when others suggested he consider art school, he insisted art was only a hobby and a way to relax. As he got older, William enjoyed fishing and swimming with friends in the St. Clair River by his family home.

He attended St. Benedict's Elementary School in Sarnia for three years. After his family moved, he continued his schooling and graduated from Sacred Heart Elementary School in Port Lambton, and then Wallaceburg District Secondary School. Having a great interest in history, William in his mid-teens began expressing his desire to join the military, specifically the infantry. His father Errol suggested going to university first, which would allow him to enter the military in the officer stream. William, however, wasn't interested and told his father he wanted to go directly into the army like everyone else and work his way up.

Father Errol Cushley surrounded by his children
Back: Amanda and Lisa, Front: William, Errol and Tonia

A number of people in Williams's life undoubtedly influenced him to choose the military as a career. William's maternal grandfather, Ernest Gordon Phillips, was a Private during the Second World War with the British Army "Glorious" Gloucestershire Regiment. He served in Belgium, Holland, Germany, and landed on the beaches of Normandy in France on D-Day. William's paternal grandfather, William Henry Cushley, also served during World War II and beyond. He was a Chief Petty Officer with the British Royal Navy and served from 1938 until 1963, a career which included tours of duty in the Atlantic, the Africa Campaign, the Italian Campaign and in the Arctic.

William's father, Errol, served as an Efficient Deck Hand in the British Merchant Navy from early in 1963 until the end of 1966. He served in Cypress in 1963 as well as in the Atlantic. Another major influence on William was his cousin, James Moloney. Born in 1977, James joined the British military in September of 1993 at the age of sixteen. He was a member of the British Army, Royal Engineers, 59th Independent Commando Squadron, where he served for 14 years, rising to the rank of Corporal. Moloney also served in Northern Ireland (instructor at Lymington, 2001-02); Afghanistan (2002); with the first soldiers in Basra, Iraq (2003); and as an instructor at the training depot in Chatham, England (2003-2007). None of these individuals in William's life overtly encouraged him to join the military; however, growing up with them and hearing of their experiences undoubtedly influenced William's decision to follow in their footsteps.

After graduating from Wallaceburg District Secondary, William submitted his application for the Canadian Forces at a recruitment office in Chatham. So anxious was he to get his army career underway that military recruiters eventually asked William to refrain from calling and emailing to inquire about the status of his application. Frustrated with the delay in hearing a response, William crossed into the U.S. determined to enlist with the U.S. Marines. To his disappointment, however, he was told that the Marines didn't take Canadians and that he should go home and join his own army. Being a dual British-Canadian citizen, William then contacted the Royal Marines in the United Kingdom and was offered a spot in their 42-week basic training program. Upon hearing this, the Canadian Forces quickly offered him a spot in their basic training program.

William got his wish and made the most of it. After joining the Canadian Army, he excelled at basic training at Saint-Jean, Quebec, and later at Battle School. He thrived in the tightly structured environment of the military. William was assigned as a member of the Royal Canadian Regiment (RCR), 1st Battalion, based at CFB Petawawa. He was so proud to be a member of this regiment that he had "RCR" tattooed on his back.

Almost immediately he indicated his interest in going to Afghanistan. He knew that a tour of duty would help him to achieve his goal of having a career in the military: either with the Joint Task Force 2, an elite special operations team of the Canadian Forces; or with a new marine commando unit, similar to the U.S. Navy Seals; or with a special rapid response border unit of the Royal Canadian Mounted Police.

Aside from helping him to achieve his desired career with special forces, William had another motive for stepping into a combat zone. Not long before he went overseas, he had a heart-to-heart discussion with his father. William explained that he wasn't going overseas so that Afghan girls could go to school. Rather, he wanted to do his part to ensure that Afghans had the opportunity to make that choice without someone telling them they couldn't, as had been the case for decades. He wanted them to have the same opportunities that we have here in Canada.

Will also told his father that he was afraid, not of the enemy, but of being a coward under fire. Will was worried about getting his army pals killed if he lost his nerve and turned tail during a firefight. Errol told Will that he'd never know for sure until he found himself in that situation, but he advised his son to think back to his training. Shortly before leaving for Afghanistan, William gave his father Errol two breast patches from his uniform with the name CUSHLEY embossed on them. Once in Afghanistan, Will's fears were soon put to the test. It turned out his fears were completely unfounded. Private Cushley was cool, calm and professional under fire. Just a week before he was killed, William demonstrated a textbook performance as a fill-in gunner aboard a light armoured vehicle (LAV).

The first contingents of regular Canadian troops arrived in Afghanistan in early 2002, part of NATO's International Security Assistance Force (ISAF). *Operation Athena* was the longest-lasting and most difficult Canadian operation of the ISAF mission, beginning in July 2003 and concluding in December 2011. In the first phase of this land-based combat mission, the Canadian task force was deployed to the northern city of Kabul, Afghanistan's capital city. There it helped to maintain security in Kabul and surrounding areas, along with providing assistance to civilian infrastructure that was rebuilding the country. This first phase continued until August 2005.

In the second phase of *Athena*, Canadian personnel were transferred to southern Afghanistan. Their primary base located in the southern city of **Kandahar**, a hotspot of renewed Taliban and terrorist activity. For more than five years, Canadian Armed Forces (CAF) members fought the insurgency in a province also named Kandahar that was considered one of the most volatile provinces in Afghanistan. Kandahar was also the birthplace of the Taliban. Operations were aimed at protecting Afghans where they resided; at reducing the influence of the insurgency; at eliminating insurgent strongholds; and at creating a secure environment for development work to take place.

Perhaps the most famous combat operation taking place during *Athena* was the Canadian-led *Operation Medusa* in September 2006. The seventeen-day offensive involved almost 1,400 coalition soldiers. It included the

main force of more than 1,000 Canadian Armed Forces members, making it our country's largest combat operation in more than 50 years.

Anytime Canadian soldiers left the relative safety of their main camps to go "outside the wire," the danger was very real. Though the Canadian and NATO forces had better equipment than the Taliban—including tanks, artillery, LAV's, helicopters and drones--they were faced with a number of challenges: the coalition forces were viewed as an occupying power, so were vehemently attacked; the Taliban were more familiar with the terrain; the Taliban riddled the countryside with IEDS (improvised explosive devices); the enemy was not easily identifiable (difficult to distinguish a combatant from a civilian); and suicide bombers could be anyone, including women and children.

Private William Jonathan James Cushley

William Cushley with his mother Elaine just before leaving for Afghanistan

William was home for the Port Lambton Gala Days celebration in July 2006, where he celebrated his 21st birthday. Less than two months later, having been overseas for only one month, William lost his life in Afghanistan. On September 3, 2006, William was killed in action alongside three other Canadian soldiers in a fierce gun battle with Taliban insurgents, approximately 15 kilometers southwest of Kandahar City. It happened in the volatile Panjwai district, where the massive Canadian-led offensive *Operation Medusa* was in its early stages of trying to put the Taliban-held region under Afghan government control. NATO's aim was to remove armed militants from the volatile Panjwai and Zhari district region so that displaced villagers could return to their homes and re-establish their livelihoods without living in constant fear of the Taliban.

Panjwai district, an area of small villages and complex defensive terrain, was the spiritual and literal home of the Taliban movement. It was a stronghold the Taliban chose to defend, so they built it up, and they wanted to draw the Canadians into a costly ground conflict. The area had been mostly an American responsibility until the Canadian battle group arrived in early 2006. The area was a place the Canadians knew well, as on August 3, 2006, the PPCLI were involved in a hellish battle, one that combined Taliban attacks and roadside bombings. It led to the deaths of four soldiers and ten wounded.

By the time the Royal Canadian Regiment (RCR) arrived in early August, the Taliban had changed their tactics from small group "hit-and-run" raids to the conventional "come-and-get-me." *Operation Medusa* began at first light on September 2, with the Canadians seizing the high points on the south side of the Arghanbad River across from Pashmul. From these high points, the Canadians set up firing lines of armoured vehicles and proceeded to blast away at targets of opportunity across the Arghandab River throughout the morning and afternoon of September 2.

Waiting ground forces watched as artillery and aerial salvos rained down on insurgent forces and destroyed clusters of the enemy. The plan was to continue to engage the enemy for 72 hours with artillery and air barrages.

Once the enemy forces were weakened enough, an infantry advance would follow. Late on September 2, the battle plan changed – command felt the enemy had weakened and were ready to be exploited. The Canadians, spearheaded by Charles Company, 1st Royal Canadian Regiment, were ordered to attack at first light on September 3, a full 48 hours earlier than planned and without the promised bombardment.^{2E, 6S}

On that September 3rd morning at about 6 a.m., with no reconnaissance and with intel that was either insufficient or wildly wrong, the Canadians crossed the river onto the far bank, and advanced through tall fields of ripening marijuana plants to take Objective Rugby, described as a “guerilla fighter’s paradise”. Right at the centre of the Objective was one of the main Taliban fortifications, a white schoolhouse, then a stronghold for insurgents. Scattered on the ground were leaflets dropped there by NATO in the previous days, warning the locals that an operation was coming through. This was no surprise attack. Unknown to the Canadians, they were severely outnumbered, as 1200 Taliban fighters, dug in and delusional, waited in ambush. Hidden in their trenches and fortified buildings, the enemy fired on the Canadians from three sides. A Corporal in command of one of the LAV’s said, “All hell broke loose... All I know is the entire area just lit up. We were taking fire from at least two sides, maybe three, with everything they had. Rocket-propelled grenades, small-arms fire, the works.”

Sixty-two members of Number 7 Platoon never had a chance and, miraculously, not all were killed. Private Cushley lost his life in the ambush, along with three other Canadian soldiers in a chaotic and bloody battle that ensued for a full 3 ½ hours. Six other Canadian soldiers were wounded in the attack. Military analysts would call this period some of the fiercest combat Canadian troops had seen since the Korean War.

On the morning of Sunday, September 3, 2006, Errol Cushley was training on the backroads not far from his home in Port Lambton. He was preparing for a month-long hike in Spain that Elaine and he were about to undertake. Elaine was tired that morning and had opted to stay home. Partway through the training session, Errol heard a car slowly approaching on the country road behind him. Behind the wheel was a neighbour from town, who tearfully informed Errol that a military officer and chaplain were waiting back at home. As Errol climbed into his neighbour’s car on that Sunday morning, he knew the military would show up at your doorstep for only one reason.

Killed alongside Private William Cushley, 21, were Sergeant Shane Stachnik, 30, and Warrant Officers Richard F. Nolan, 39, and Frank R. Mellish, 38. Mellish was killed when he had gone back to retrieve the body of his best friend, Richard Nolan. The action the next morning was as bad for the Canadians. Charles Company was hit by friendly fire from an American A-10 Thunderbolt II Warthog jet, killing RCR Private Mark Anthony Graham and wounding dozens more. Private Graham was a former member of Canada’s Olympic sprint team in 1992.

Corporal Ryan Pagnacco, born in Simcoe, Ontario, was a comrade of William Cushley’s in Charles Company, First Battalion, Royal Canadian Regiment. Corporal Pagnacco and Private Cushley would have been together sharing the same experiences during those horrific few days in Panjawi.

Following is a portion of Corporal Pagnacco’s account of his experiences leading up to the attack, *as he was stationed* on the side of a mountain overlooking the Arghandab River valley and the Taliban-occupied village of Pashmul. The air force and artillery had begun its bombardment of the village below them;

September 2 evening - *We were told this would be a three-day bombardment. As the sun began to set over the valley, our platoon warrant officer, Frank Mellish, called me over to our platoon’s G-Wagon jeep. He had a green backpack in his hand. In the pack was my set of bagpipes... This was the first time I’d brought them out since I had been in the country. While on work-up training, I had been made the unofficial piper for Charles Company... That evening, when WO Mellish handed me my pipes and asked me to play, I felt as though I were following in the footsteps of the combat pipers of my great-grandfather’s generation. It filled me with pride. I made my way to the edge of the ridge, beside the LAVs as they fired into the valley, overlooking the battlefield with the enemy less than half a mile away. I pieced the pipes together, brought them up and began to play. I expected the troops to complain, as it woke many of them up. I expected someone to yell, as I was out in the open with no protective equipment on and no weapon in hand. I expected the catcalls and hoots I had received from the troops in the past. But there were none.*

The sound of the pipes echoed across the valley, broken only by the sound of the 25s firing. The troops watched, took pictures, and cheered after each tune. Even the U.S. and Afghan National Army soldiers watched, and some took pictures as well... I ended my impromptu concert with a somber slow air, a farewell to the setting sun, and then packed up my pipes. As the sun set over the Arghandab Valley and the cool, sweet-smelling wind drifted across our position on the side of the mountain, we settled in for the night on the sandy slopes, under the protection of the LAVs, snipers and air supports.

September 3 - At 0400, we awoke with orders to eat, police up our gear and be ready to move. We were going in ahead of schedule. Three days of bombardment had been reduced to one day. Needless to say, we weren't very happy with this plan, but ours is not to question why. By 0500, we were in the back of the LAVs and on our way to the assault line. I looked around at the boys: we were ready, we were anxious, we were good to go. And we were all a little scared. This wasn't going to be a ten-minute roadside contact with the enemy... this was going to be combat.

In describing the first moments they were attacked, he wrote, *At 0730, the calm was broken... Within seconds, we found ourselves in a well-planned and well-executed U-shaped ambush. We were under fire from all directions, except the way we had come in... We kept firing, and they kept coming... As the fighting continued, the casualties mounted. Although we were fighting very effectively, we were still surrounded and grossly outnumbered...*

Corporal Ryan Pagnacco was fortunate enough to survive the chaos and horror of the September 3 battle. Charles Company, First Battalion withdrew to their original firing position on the side of the mountain. They were given the rest of the day to recover as best they could and reflect on the day's events. The next morning was no different from the morning before – they woke up at 0500 and had breakfast, in preparation for another attack on Pashmul. While burning their garbage in the dark, chilly hours before dawn, an American A-10 Thunderbolt II Warthog jet attacked them with so-called “friendly fire”. Private Mark Graham was killed in the incident, and dozens were wounded, including Ryan Pagnacco. Severely wounded with shrapnel wounds in both legs, the right arm, lower back and right hand, Pagnacco was airlifted to Kandahar Air Field hospital. After his surgery while in recovery, Ryan wrote of his experience:

Our company sergeant major, who had been wounded the day before in battle, made his rounds of the hospital, visiting briefly with the troops and trying his best to raise morale. With him was our company commander, who was also wounded in the friendly-fire incident. When they got to me, the CSM asked all the usual questions – “How are you doing?” “Can I get you anything?” et cetera. But his next request broke my heart. He asked me if I would be able to play my bagpipes at the ramp ceremony for our fallen troops the next day.

I couldn't feel anything below my right elbow, and when I held my hand up, the wounds in my fingers still looked as bad as they had when I was first hit. I would have played from the gurney if I could have played at all. But I couldn't move my fingers. I couldn't even vocalize a response. I just held up my hand and felt a tear run down my cheek. I wept not for my hand, or my legs, or even my kidneys, but because I wasn't able to pay my last respects to my fallen brothers. I couldn't play the pipes for them.⁷¹

In a solemn ramp ceremony at Kandahar airfield, approximately 800 Canadian soldiers and 100 from other countries bid farewell to their fallen comrades. While Private Cushley's and four other flag-draped coffins were carried onto a C-130 Hercules aircraft, a piper played a mournful melody. William was the first Lambton County resident killed in action since the Korean War. Twenty-one-year-old William Cushley's body was returned home to Canada, along with the four other Canadian fallen. All five men had gone over to Afghanistan together, and all five returned home together.

Repatriation ceremony for Pte. William Cushley – Sept. 6, 2006 at CFB Trenton

Nearly two thousand people paid their respects during the two-day visitation period at Sacred Heart Church, Port Lambton. Over 500 people attended his funeral at Sacred Heart Church on September 13, 2006. On the day of the funeral, much of the town was closed off, with EMS vehicles and fire trucks blocking the streets. A busload of

troops had arrived and proceeded to march on all four roads surrounding the jam-packed church. The overflow area was also full and a screen had been set-up outside for people to watch the service from there. American servicemen were in attendance and, on bended knee, presented Will's mother, Elaine, with an American flag, the first presented to a Canadian since the Korean War.

As the procession passed by Sacred Heart Elementary School, from which he had graduated only seven years before, the entire student body lined up on the curb, most dressed in red, all wearing arm bands that read 'Thank you Will'. Most waved Canadian flags or tossed flowers. Elaine later recalled that as the procession rounded the corner toward the school, it was the sight of the school children lined up to honour her son that finally made her lose it emotionally. Other than a few muffled sobs, the 145 youngsters stood silently as the procession, which was more than 100 metres long, passed by.

Will's full military funeral concluded with a graveside service of three volleys of fire from soldiers, a bagpiper, and then a trumpeter sounding the "Last Post." William Cushley is buried in McDonald Memorial Cemetery, Port Lambton, Ontario. On his headstone are inscribed the words, *Private William Cushley, 1st Battalion, The Royal Canadian Regiment, died on September 3, 2006 fighting against Taliban insurgents near Kandahar City, Afghanistan. Private Cushley fought to bring human rights and democratic values to an oppressed people. He wanted to make a difference in this world and he died doing so.*

A portion of the September 14, 2006 Canadian Press release after William's funeral reads as follows:

In Port Lambton, Ont., the sun burst through the clouds as soldiers greeted the casket containing the remains of Pte. William Cushley, 21, outside of Sacred Heart Church... "He was a deeply spiritual man," said Brig.-Gen. Guy Thibault, Commander Land Force Central Area. "The rank wasn't testimony to his leadership." ... Cushley was remembered by Capt. Rev. Daniel Roushorne as a man "who got back off the bus to give mom a hug and kiss, and it didn't matter that everyone was watching."

In his eulogy, Tyler Atkins paid tribute to his fun-loving buddy and added that Cushley "made a difference for our country." Cushley's three sisters took turns reading stanzas from a heart-wrenching poem, including lines that read: "You were our brother and our friend. We wish we could have been with you at the end." ...

Following their son's death, William's parents received letters he'd written for delivery only if he fell in battle. One letter to his mother harkened back to a bet that the two had placed just before Will climbed aboard a bus bound for the airport to Afghanistan. As he boarded a bus to CFB Trenton, Elaine bet her son \$50 that she wouldn't cry when they parted. Moments after boarding, Will got back off the bus, picked up his mother in a tight embrace and gave her one last kiss before departing. In doing so, Will won their wager of \$50. The last line of William's final letter to his mother reads, *Do not weep too much. I will always be with you in heart and spirit! Love always & forever, Will.*

P.S. You can keep the \$50! LOL

Things will never be the same for the Cushley family. William's youngest sister, Amanda, felt the strong desire to go to Afghanistan and did so one year after his death. She served with the Canadian Forces Personnel Agency (CFPSA) and ended up doing three tours in Afghanistan, one in Dubai (Camp Mirage) and one in Cyprus. Her last tour was at Kandahar Airfield in Afghanistan when it was closed upon Canada's withdrawal from its mission there. His mother Elaine points out that someone will always be missing from family events and festive occasions. But she says they've come to terms with the fact that they still need to live life; and that's exactly how William would have wanted it.

Elaine says her son is with them everyday and everywhere. She spends time talking with William in his basement bedroom where the walls are adorned with pictures, military certificates and mementos. She also visits the nearby cemetery often, placing flowers and putting up balloons for his birthday, something that Errol says with a chuckle, would surely cause William to roll his eyes. Elaine says she grew up not really knowing much about Remembrance Day and not paying a lot of attention to veterans. The Afghanistan mission was a major "wake-up call." She says our war heroes, past and present, should never be forgotten, and thinks children need to understand that freedom has a price—one that the Cushley family will pay for the rest of their lives. The freedom we enjoy now, says Elaine, is because of our heroic veterans and war dead who gave so much.

On December 4, 2010, the sixty-two members of Number 7 Platoon were given a prestigious award for gallantry. The Governor General of Canada awarded the Commander-in-Chief's Unit Commendation to the men and women of the First Battalion, the Royal Canadian Regiment, Battle Group 3-06. The citation reads, *For courageous*

and professional execution of duty in Afghanistan during August and September 2006 that prevented the capture of Kandahar City by insurgents. William Cushley would also receive posthumously the Citation: Sacrifice Medal.

In Wallaceburg, alongside the cenotaph, are the “Rocks of Honour”. These stones are a lasting tribute to all the service men and women from Wallaceburg, Walpole Island, Mitchells Bay, Port Lambton, Sombra and Wilksport who served and returned from WWI and WWII. There are over 577 names from WWI and over 1830 names from WWII engraved on the stones. A separate stone honouring Private William Cushley is inscribed with these words: *The seeds of peacekeeping can be found buried on the battlefields, in the trenches and in the graveyards of Europe and Asia. The men who lived through two world wars never wanted to see another. They believed ending regional conflicts would prevent the world from ever being consumed by war again. For the service men and women of Canada the cost of conflict and the price of peace has been great. Let us as a nation and a community always hold dear the names of those who paid the ultimate sacrifice to make our world a better place to live.*

Private William Cushley, 1st Battalion, The Royal Canadian Regiment, died on September 3, 2006 fighting against Taliban insurgents near Kandahar City, Afghanistan. Private Cushley fought to bring human rights and democratic values to an oppressed people. He wanted to make a difference in this world and died doing so.

In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always. William Cushley is remembered as a courageous man and a proud soldier who was devoted to his country. Though he was a strapping young soldier when he died, his mother Elaine Cushley says she will always see her son as a boy. “I miss cuddling him,” she said. “Every time I close my eyes I see his face and he is always smiling. He was always fun, a dry sense of humour that boy.”

POLAND, Brent Donald (#B88172022)

While growing up in Errol Village, Brent Poland loved athletics and history. When he was 32, Brent followed “his heart and his passion” and enlisted in the Canadian military. While serving in Afghanistan, Brent was killed in action on Easter Sunday 2007. In life and in death, Corporal Brent Poland remains an inspiration. In the event of his death, Brent had written “*I sincerely hope that my death resulted in saving the lives of my fellow brothers in arms.*”

Brent Poland was born October 26, 1969 in Sarnia, the first child of Donald Eldridge and Patricia Evelyn Poland of Camlachie, Ontario. His grandparents were Bill and Evelyn McKenna of Wyoming, Ontario, and Eldridge and Amy Poland (Dawson) and Goldie Dawson of Brigden, Ontario. Brent had a younger brother, Mark Thomas Poland, born September 13, 1971. As youngsters growing up in Errol Village, Brent and Mark, as well as their cousin, Terry, were always on the go. The Poland boys enjoyed sports—playing baseball, soccer, hockey—and Brent was an avid downhill skier. The boys loved being outdoors, and with father Don being a Scout leader, they worked their way up from Beavers to Ventures. Their maternal grandparents had a cottage on an island in Lake Temagami (northeast of Sudbury) where the boys spent time fishing, swimming, boating and canoeing. Brent attended Huron Church Camp where he progressed from a camper to a camp counsellor and eventually a canoe leader.

Brent’s younger brother, **Mark Poland**, who attended Errol Village School and St. Clair High School, also joined the military. After completing grade 11, Mark joined the 1st Hussars as a Trooper in the reserves in 1989. Shortly thereafter, the seventeen year-old enrolled in undergraduate studies in Political Science at the University of Western Ontario (UWO) in London. While in his first year of studies, he was selected from the ranks and appointed as an Officer Cadet with the 1st Hussars, an Armoured Corps Regiment of the Canadian Armed Forces Reserves. During his summer breaks from university, Mark attended Armour Officer Training and graduated as a Lieutenant.

After graduating with an Honours Bachelor of Arts from Western in 1993, Mark completed two years of full time service with the Canadian Forces. During this time he was deployed as a member of the United Nations Protection Force to Bosnia-Herzegovina beginning in the fall of 1994. The Bosnian conflict was an ethnically rooted war that took place in Bosnia and Herzegovina, a former republic of Yugoslavia, between April 1992 until December 1995. After years of bitter fighting, atrocious war crimes and genocide that involved Bosnian Muslims, Serbs, and Croats, as well as the Yugoslav army, NATO became involved. Their strategy was to use a combination of an air bombing campaign, peacekeeping ground forces and diplomacy. During his deployment in Bosnia, Mark Poland served in the rank of Lieutenant as both a Squadron and Regimental liaison officer with the Royal Canadian Dragoons.

As a liaison officer, Poland was responsible for communicating between the Canadian army and the local Serb army. In the fall of 1994, the Serbs, in retaliation for NATO air strikes on Serb airfields in the (Serb-held) Krajina region of Croatia, decided to detain 55 Canadian soldiers. The captive Canadians, including Lieutenant Mark Poland, were held by the Serb army to act as a human shield against NATO bombing of the Serb forces. Lieutenant Poland described the event shortly after being detained:

Well it's now day 2 of our detainment and I (lazy) am finally writing some notes. First the background: It started 23 Nov 94 at 1215 hrs. I was the first one to hear about it (our detention) through SERB Major Miric, who requested a meeting between Major Milner (my OC) and Major Savic (local Serb commander). Miric told me before the OC knew that Checkpoint Papa was closed and that we would become their 'guests'. My first reaction was not surprise, strangely enough. It was more like coping... I thought basically, okay this is the situation, what can we do about it?^{5R}

Through negotiation, Mark and his fellow Peacekeepers were eventually released after 16 days in captivity and would return to their base. A peace agreement that ended the war in Bosnia was eventually finalized in Dayton, Ohio in December 1995. Following the Dayton Agreement, NATO forces continued to serve in Bosnia-Herzegovina to enforce the peace, along with support for humanitarian aid and reconstruction.

Upon redeployment in the spring of 1995, Mark was promoted to the rank of Captain in the 1st Hussars. He enrolled in the Faculty of Law at UWO. He completed his legal studies in 1998 and was granted the degree of Bachelor of Laws. After articling with Siskinds Law Firm in London, Mark was called to the Bar as a member of the Law Society of Upper Canada in February 2000. He began his practice as a civil litigation lawyer but soon transitioned to the field of criminal defence law. Mark then joined the Ontario Ministry of the Attorney General in 2003 and became an Assistant Crown Attorney in the Waterloo Region in 2004. In October 2005, Mark obtained a Master of Laws Degree (LL.M) in criminal law. In October 2012, after a brief appointment as a Deputy Crown Attorney, Major Poland was appointed as the Crown Attorney of Dufferin County in Orangeville. In July 2015, he became the Crown Attorney for the Waterloo Region.

Concurrent to his civilian legal career and academic pursuits, Mark has maintained his commitment to serve in the Canadian Armed Forces Reserves. Upon his call to the Bar in 2000, Mark transferred from the Armoured Corps and joined the Office of the Judge Advocate General (“JAG”) of the Canadian Forces. He initially served as a Deputy Judge Advocate. He was appointed as Counsel in the office of the Director of Defence Counsel Services in 2007. In July 2008, Major Poland completed the Joint Reserve Command and Staff Programme. In May 2010, Mark left the JAG and returned to the Armoured Corps where he was appointed Regimental Second in Command of the 1st Hussars.

In September 2012, Mark took up a position with the Royal Highland Fusiliers of Canada (RHFC), and completed the Army Operations Course. He was appointed Deputy Commanding Officer (DCO), RHFC in December 2013. The following year, he completed the Armoured Reconnaissance Squadron Commander's Course. In October 2015, Mark was appointed Commanding Officer of the RHFC and was promoted to Lieutenant-Colonel.

Mark has been awarded the UNPROFOR medal, the Canadian Peacekeeping Service medal, the Canadian Forces Decoration (CD) with clasp, and the Queen's Golden and Diamond Jubilee medals. His wife, Susan Dube, and he are currently residing in the Kitchener area where he is the Crown Attorney for the Waterloo Region in Ontario. Early in 2019, Mark was appointed a Justice with the Ontario Court of Justice and assigned to the court in London. Mark also has a step-daughter, Shelley, living in the Kitchener area. Approximately 13 months after his brother Brent lost his life in Afghanistan, Mark and Susan had twins – Sophie Poland and Brent Lucas Poland.

Brent Poland attended Errol Village Elementary School where he enjoyed reading and, like his father, was interested in history. Evening television at the Poland house often involved news programs, a routine that helped Brent develop a solid general knowledge base and an understanding of Canada and World affairs. In grade eight, he spent a couple of weeks in Quebec on a French exchange. Near the end of grade ten, the Poland family travelled to Europe, rented a car and spent six weeks travelling through the continent. The trip further enhanced Brent's love for history, a trend that continued through high school and university.

Brent graduated from St. Clair High School in Sarnia and then went on to earn two university degrees. His first degree was a Bachelor of Arts History diploma from York University. After achieving that degree, Brent traveled to Europe where he taught in a small village in the Greek mountains, before heading for Italy to help his aunt at an agriturismo—a resort where guests stay on a working farm. He then returned to Toronto to obtain his second

degree, a Bachelor of Media Arts Honours diploma from Ryerson University. After earning his second university degree in 1998, Brent worked for a time in office environments, a type of work for which he quickly lost enthusiasm.

In 2002, at the age of 32, Brent Poland joined the Canadian Armed Forces also, as his family members stated to “follow his heart and his passion.” Having two university degrees, he immediately entered the officer stream. He completed basic officer training at the Canadian Forces Leadership and Recruit School in St-Jean-sur-Richelieu, Quebec. Brent had his heart set on being in the infantry and attended the required four-phase combat arms training where he competed against significantly younger men and women. Unsuccessful in the final phase of the grueling combat arms training, and having no desire to move to a different branch of the military as a Lieutenant, Brent resigned his officer’s commission and re-enlisted as a Corporal. In this way, he could stay in the infantry and go to Afghanistan. Despite the lower rank, he achieved his goal of being an infantry soldier and was assigned as a member of the Royal Canadian Regiment, 2nd Battalion, based at CFB Gagetown, New Brunswick. Then his focus shifted to another one of his goals: getting to Afghanistan.

Once he knew he had a permanent posting, Brent bought a house in French Lake, New Brunswick, not far from his base in CFB Gagetown. At his own home, he could finally be re-united with his beagle-mix hound “Shorty”. He had acquired Shorty while studying at Ryerson University and the “badly behaved hound” had been living with Don and Pat Poland in Errol Village ever since Brent had joined the army. Brent was anxious to get his dog back and introduce him to the wide-open spaces and fields of his country home. Not long after, Brent received the news that he was being deployed to Afghanistan. Brent was thrilled to be going overseas and excited about the upcoming adventures awaiting him in the mountains and on the dusty plains of Afghanistan.

At a Christmas dinner party shortly before his departure, one of the guests began leaning on Brent about why he wanted to go to Afghanistan, suggesting that Canadians had no business being there. Brent calmly pointed out that the guest had two little girls and asked how she would like it if they were never given the opportunity to go to school and to get an education, as had been the case in Afghanistan for years. Brent’s response terminated the conversation.

Corporal Brent Donald Poland

The first contingents of regular Canadian troops arrived in Afghanistan in early 2002, part of NATO’s International Security Assistance Force (ISAF). ***Operation Athena*** was the longest-lasting and most difficult Canadian operation of the ISAF mission, beginning in July 2003 and concluding in December 2011. In the first phase of this land-based combat mission, the Canadian task force was deployed to the northern city of Kabul, Afghanistan’s capital city. There it helped to maintain security in Kabul and surrounding areas, along with providing assistance to civilian infrastructure that was rebuilding the country. This first phase continued until August 2005.

In the second phase of *Athena*, Canadian personnel were transferred to southern Afghanistan. Their primary base located in the southern city of **Kandahar**, a hotspot of renewed Taliban and terrorist activity. For more than five years, Canadian Armed Forces (CAF) members fought the insurgency in a province also named Kandahar that was considered one of the most volatile provinces in Afghanistan. Kandahar was also the birthplace of the Taliban. Operations were aimed at protecting Afghans where they resided; at reducing the influence of the insurgency; at

eliminating insurgent strongholds; and at creating a secure environment for development work to take place.

Anytime Canadian soldiers left the relative safety of their main camps to go "outside the wire," the danger was very real. Though the Canadian and NATO forces had better equipment than the Taliban—including tanks, artillery, LAV's, helicopters and drones—they were faced with a number of challenges: the coalition forces were viewed as an occupying power, so were vehemently attacked; the Taliban were more familiar with the terrain; the Taliban riddled the countryside with IEDS (improvised explosive devices); the enemy was not easily identifiable (difficult to distinguish a combatant from a civilian); and suicide bombers could be anyone, including women and children.

Taking place during *Athena*, the objective of *Operation Achilles*, beginning in March 2007, was to clear the Taliban from the violent northern districts of Helmand province. Led by British forces, Operation Achilles was supported by other ISAF forces including Canadian, American, Danish and Dutch units. It was focused on the Kajakai Dam, a major power source for Afghanistan that had not been functioning for a number of years. The mission involved clearing villages and a large Taliban complex near the hydroelectric dam, as well as clearing the dam of all enemy forces.

In April 2007, Corporal Poland's "Hotel Company" of the 2nd Battalion of the Royal Canadian Regiment was serving with NATO's International Security Assistance Force (ISAF). Hotel Company was a mechanized infantry company, and Brent served as a light machine gunner in Bravo section, 2 platoon. In the weeks prior to Brent's death, as part of *Operation Achilles*, the men had been providing security for massive convoys of soldiers and material being moved westward from Kandahar City into Helmand province, where the British had a major offensive operation against the Taliban. NATO was trying to re-open the hydroelectric dam in order to supply the region with electricity. During this operation, the men would have been on high alert.

On April 8, 2007, Easter Sunday, the 2nd Battalion was escorting a convoy of troops and supplies through the desert to British soldiers in Helmand province. It was its third escort in three days and the company was looking forward to a much-deserved rest. About 1:30 pm on that day, the light armoured vehicle (LAV III) that Corporal Poland was travelling in struck a roadside IED (improvised explosive device), triggering a massive explosion. The attack occurred around 75 kilometres west of Kandahar. Corporal Poland and five other comrades from 22 Bravo Section, who were all sitting in the rear passenger compartment of the vehicle, were killed instantly in the explosion.

Perishing with thirty-seven-year-old Brent Poland were RCRs Sgt. Donald Lucas, 31; Pte. Kevin Kennedy, 20; Cpl. Aaron Williams, 23; and Pte. David Greenslade, 20. Cpl. Christopher Stannix, 24, a reservist from the Halifax based Princess Louise Fusiliers, was also killed. Four soldiers survived the attack, although one had serious injuries. Captain Simon Bowser, then a Private travelling in the LAV behind the six slain soldiers, said the deaths changed the complexion of the entire regiment. "Suddenly, it was very serious," he recalled. The attack was the largest single-day combat death toll suffered by Canadian troops since the Korean War.

Back in Sarnia on that April 8 Easter Sunday, Don and Pat Poland were in their Bright's Grove church listening to the Easter service when a tremendously dark and gloomy feeling suddenly descended upon Don, shaking him to the core, but then passing quickly. Shortly after, while they were driving home from the church, the same dark premonition of fear descended on Don again. Don was petrified that a black car would be waiting in the driveway to deliver terrible news. Making the final turn home, he breathed a mammoth sigh of relief when he discovered no such car was waiting in the driveway.

Several hours later, after the Poland family finished their Easter dinner, a knock sounded on the Poland's front door. At the door was a man wearing a kilt. Younger son Mark opened the door, where there stood a kilted soldier and a military chaplain. They were there to deliver the devastating news of Brent's death, forever changing the life of the Poland family.

Corporal Brent Poland received the Citation: Sacrifice Medal (posthumously). His repatriation ceremony was held at CFB Trenton on April 11, 2007. A full military funeral with honours was held on April 20, 2007 at a packed Temple Baptist Church in Sarnia attended by more than 1000 people, with younger brother Mark delivering a powerful eulogy. The funeral procession made its way beyond the city limits, down rural roads, and arrived at Brent's final resting spot in a country cemetery among his forefathers not far from the Poland ancestral farm near Brigden. Thirty-seven-year-old Brent Poland is buried in Bear Creek Cemetery in Brigden, Lambton County, Ontario. On his headstone are inscribed the words, *Too dearly loved to ever be forgotten*. Brent's name is also inscribed on the Village of Camlachie's Memorial.

Repatriation Ceremony, CFB Trenton

Funeral Service, Sarnia

Two personal effects were with Corporal Poland at the time of his death, two items that held great significance for Brent and others. Both were returned to his parents. Before Corporal Poland left for Afghanistan, he had become friends with a chaplain, with whom he shared a barrack. Brent had an understanding of religion and the two had many talks. Shortly before his departure, Brent's mother, Pat, had given him a card on which was printed Psalm 23 of the Holy Bible, one of his grandmother's favourite verses. When Brent's personal effects were returned, in the clear plastic window of his wallet sat the card containing the 23rd Psalm.

Brent also had a soft spot for children and another item in his pocket when he died was a letter he had received from a classroom of children taught by one of his mother's friends. With it were the blood-stained rough notes of a letter he was preparing to send back to the students as soon as he returned to the main base at Kandahar. His father Don would transcribe the letter and forward it to the teacher and children.

Brent had been in contact with the children in the grade 4 class of Mrs. Leona Moore at Confederation Central School of the Lambton Kent Public School Board. The students enjoyed writing and receiving letters with Brent and were excited that he was taking the time to reply to their letters. They had many questions when his letters were read to them. When they learned of Brent's tragic death, many students stayed in at recess to make a card to send with Mrs. Moore to the funeral home. The following are the rough notes, *To: Mrs. Moore's 4th Grade Class*, that Brent had with him when he lost his life. They would have been written a week or so before his death:

- *Thanks*
- *We ride in heavily armoured vehicles called LAV III*
- *We patrol our area of operation for suspected Taliban fighters, and go into villages and district centers to provide protection for our bosses who have meetings called Shuras.*
- *We generally provide a presence in our area of operations, to let the Taliban know we are here, and to restrict their freedom of movement so that they can not terrorize the local population. These Shuras are important to ensure the local villagers have a say in the reconstruction process.*
- *Yes there are landmines and the occasional ambush, but our training is world class, so that protects us from being in too much danger.*
- *We sleep in sleeping bags behind our vehicles wherever we stop for the night.*
- *My name is Corporal Brent Poland. A corporal is a rank in the army one step above a private.*
- *We help train the Afghan national police to do things like set up vehicle check points in order to search for weapons and explosives.*
- *The people are generally poor, but things are improving.*
- *Since we have been here there is a new road.*
- *A canal/irrigation project is underway to help the people in the area grow better crops.*
- *They are mostly farmers.*

Brent understood the importance of a good education. In memory of their son, Don and Pat, with the help of the Royal Canadian Regiment, started up The RCR Education Fund for the Children of Fallen Soldiers. The Fund helps with the cost of post-secondary education for the children of RCR soldiers who lost their lives in Afghanistan, or who died in Canada as a result of the physical or mental injuries of war. In Brent's death, others will have the opportunity for a brighter future.

Corporal Brent Poland is remembered as a good, strong and loving man, a proud soldier and proud Canadian. According to a family member, “He told us before he left that he saw this tour as his chance to help in the effort to bring peace and stability for the people of Afghanistan. He was inspired by the thought that his efforts might help to ensure that little girls had the chance to go to school and women might be given an opportunity to thrive in an environment free of brutal oppression.” The following is a quotation from a letter Brent wrote to his family, to be opened in the event of his death:

I sincerely hope that my death resulted in saving the lives of my fellow brothers in arms. I feel it is my obligation to protect the young men in my unit, given that I have been so blessed, so that they may go on to lead fulfilled lives and experience as much as I have.

The timing of the deaths of Corporal Poland and his five RCR comrades had a dramatic ripple effect across the country. The very next day, April 9, 2007, the nation and the Commonwealth marked the 90th anniversary of the famous Battle of Vimy Ridge with the rededication of the Vimy Memorial in France. After a five-year restoration process, in a ceremony broadcast live across Canada and attended by the largest crowd on the site since the 1936 dedication, including Canadian high school students and a handful of Canadian Great War veterans still alive, Queen Elizabeth II rededicated the Vimy Memorial in a moving and emotional ceremony. More information on the Vimy rededication is on page 149.

Through the efforts of Sarnia City Counselor Jim Foubister, a plaque was added to the Sarnia cenotaph in November 2008. The plaque reads: “OTHER THEATRES OF CONFLICT – CPL BRENT POLAND – AFGHANISTAN 2007”. In late October 2015, the Poland family dedicated a memorial in memory of their son at St. John-in-the-Wilderness Anglican Church in Brights Grove. The Poland family had been members of the church for over 45 years, and it was where both Brent and brother Mark attended growing up, and where both boys were baptized and confirmed.

In the fall of 2015, a wooded, garden-like cemetery area at the church’s side was dedicated in memory of Corporal Brent Poland. Engraved on a memorial stone in the serenity garden is, IN LOVING MEMORY OF CPL. BRENT POLAND, KIA IN AFGHANISTAN APRIL 8, 2007. The small plot of land, long bleak and sparse, had stones, mulch and plants added to it to create a shaded refuge for people to pause and reflect in peace. In June 2017, a playground at Errol Village Public School was dedicated in the memory of Brent Poland, a former student of that school. Funds for the Corporal Brent Poland Memorial Playground were raised by the Errol Village School Council.

In November 2019, the plaque that was added to the Sarnia cenotaph in 2008 was replaced. Brent Poland’s name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

“The Man in the Arena”

It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly;...

who spends himself in a worthy cause; who at the best knows in the end the triumph of high achievement, and who at the worst, if he fails, at least fails while daring greatly, so that his place shall never be with those cold and timid souls who neither know victory nor defeat.

Theodore Roosevelt (portion of a speech --1910)

WAR MEMORIALS, PLAQUES & HONOUR ROLLS

BOER WAR MEMORIAL FOUNTAIN

ERECTED BY THE SCHOOL CHILDREN AND CITIZENS OF LAMBTON COUNTY

PAARDEBERG, DRIEFONTIEN, JOHANNESBURG, DIAMOND HILL,
BELFAST, DEWEGENDRIFT, LYNDENBURG
SOUTH AFRICA 1899-1901

NAMES ON THIS MEMORIAL ARE THOSE MEN FROM
LAMBTON COUNTY WHO PARTICIPATED IN THE BOER WAR

NEVILLE, H.M.
NEVILLE, J.F.
REYNOLDS, R.
VAN TUYL, T.

NOTES: In 1902, a contingent of veterans of the Boer War came to Sarnia, from Windsor, Ontario, with the express purpose of creating a monument to commemorate those men from Lambton County who had served in the Boer War (1899-1902).

In January of 1902, at a meeting held in Sarnia, the South African Club, comprising Windsor men who saw service in the Boer War, opened subscription lists for funds for a memorial for their fallen comrades. Public collections would be supplemented by the proceeds from a number of concerts to be given, with the goal to raise \$1,500 for the purpose. It was suggested that the memorial would probably take the form of a public drinking fountain to be located near the post office.

The Boer War Memorial Fountain was erected in Victoria Park in 1908, having been made possible through donations by both citizens and school children of Lambton County over a six-year period.

Around 1960, the memorial was moved and slightly damaged during the demolition of the original Sarnia Carnegie Library. It was later repaired and in 1998, received heritage designation.

The names of sixteen men from Sarnia-Lambton County who served in the South Africa War of 1899-1902 are engraved on the cap of the monument. Also engraved are the South African locations where they served. Daniel Crone was the only Sarnia-Lambton soldier to lose his life while serving in the Boer War.

SALMONS, M. DAVID (1980)

AFGHANISTAN 2001-2014

CUSHLEY, WILLIAM J.J.
POLAND, BRENT

NOTES: The original Sarnia Cenotaph was officially unveiled on November 7, 1921. It consisted of a huge rectangular granite block sitting on a granite foundation. There were three bronze tablets bolted on its sides, enscribed with the names of over 1,000 Sarnians who served and sixty who paid the supreme sacrifice.

On November 11, 1922, the cenotaph was rededicated/unveiled. Added to it was the bronze Canadian "Tommy" soldier in full uniform on top, and another bronze tablet bolted on its side, bearing the names of another forty-two Sarnians who had died in the Great War.

The "new" renovated cenotaph was rededicated on November 11, 1955. The granite monument had been enlarged by the addition of two new "wings", on which were inscribed the names of Sarnia's fallen soldiers from World War I, World War II and the Korean War. The four bronze tablets from the original cenotaph were moved to the outside west wall of the Sarnia Legion.

In November 2019, the names of twenty-six Sarnia fallen soldiers were added to the cenotaph. The names included soldiers from WWI to Afghanistan who had been missed in the past.

THE SARNIA-LAMBTON AFGHANISTAN MONUMENT

(Veterans Park)

There are three plaques on the LAV III Monument

PLAQUE #1:

DEDICATED TO THOSE
40,000 men and women of the Canadian Armed Forces who fought
in the Cause of Peace and Freedom and in the memory of those 159
who gave the ultimate sacrifice.
“Never to be forgotten”

Ils ont combattu pour la cause de la paix et de la liberte

2001 AFGHANISTAN 2014

PLAQUE #2:

IN MEMORY OF

Pte. CUSHLEY, William Jonathan James
1st Battalion, The Royal Canadian Regiment
Hometown: Port Lambton, Ontario
Age 21 years
Killed in Action: September 3rd, 2006

Cpl. POLAND, Brent Donald
2nd Battalion, The Royal Canadian Regiment
Hometown: Camlachie, Ontario
Age 37 years
Killed in Action: April 8th, 2007

PLAQUE #3:

Honouring the members of the 1st Hussars
who served in the Afghanistan Mission
from 2003 to 2014

Hodie Non Cras

NOTES: Led by the Sarnia First Hussars Association, funds for this project were received from the Kiwanis of the Seaway, Sarnia Legion Branch 62, the Sarnia Saints Rugby Club, the Royal Canadian Regiment, the Labourer's International Union of North America, Local 1089, and from private citizens. This monument was unveiled on October 30, 2016.

ROYAL CANADIAN LEGION BRANCH 62

MEMORIAL PLAQUES

NOTE: There are four plaques located on the outside west wall of Sarnia Legion Branch 62. These plaques were part of the original Sarnia Cenotaph unveiled in November 1921 and again in 1922.

IMPERIAL OIL LIMITED – SARNIA REFINERY PLAQUE

NOTE: In April of 1949, the President of Imperial Oil Company unveiled this Memorial Plaque at the Sarnia Refinery, dedicated to the memory of those employees who gave their lives in World War II.

It is mounted on an outside wall at the exit doors facing Clifford Street.

Imperial donated a second identical plaque to Sarnia Legion Branch #62 in 2020.

The restoration and perpetuation of Sarnia's F-86 Sabre MkV Golden Hawk, Serial #23164 is a direct result of the tireless advocacy and stewardship members of the 403 Wing Sarnia RCAFA have shown for this important monument. What you see before you is one of the original Canadian-built Sabre jets that performed with the RCAF Golden Hawk aerobatic team in the late 1950s and early 60s. This project represents their dedication to the memory of their Air Force comrades, past and present, and their commitment to preserving history and keeping that memory alive.

SARNIA WWI TREES OF REMEMBRANCE MEMORIAL PLAQUE

(Heritage Park)

THESE ONE HUNDRED AND TWO TREES WERE
PLANTED TO HONOUR THE MEMORY OF THE SOLDIERS
FROM SARNIA WHO FOUGHT IN WORLD WAR I, AND
IN PARTICULAR THE MEMORY OF THE 102 SOLDIERS
FROM THIS COMMUNITY WHO DIED IN BATTLE –
ONE TREE FOR EACH FALLEN SOLDIER

This Project Was Undertaken By Members Of Scouts Canada – Bluewater Area,
and The Corporation Of The City Of Sarnia, with The Generous Assistance of
Enbridge, Sun Life Financial, The Sarnia Horticultural Society And Union Gas

NOTES: The list of 102 names was derived from the names as they were inscribed on the Sarnia Cenotaph pre-2019.
The 102 (Autumn Blaze) maple trees were planted in the formation of a cross in November 2013, and dedicated in
November 2014. Ten more WWI names were added to the cenotaph in November 2019.

NOTES:

*William C. Andrew – Son of A.G. Andrew (then at 111 North College Avenue in Sarnia), was reportedly a part of the Civilian Technical Corps, and was aboard the *SS Vancouver Island* when it was torpedoed on October 15, 1941 on its way to the U.K. He is not listed in the Canadian veterans database because the Civilian Technical Corps was a British non-military body of paid craftsmen. The CTC was comprised of U.S. male citizens, but according to a November 15, 1941 article in the *Globe & Mail*, two Canadians, including William C. Andrew, were a part of this group. Source: Ian Brown

** Francis Haggerty – the correct spelling is (Hugh) Francis Hegarty

***Hector Legarrie – alternative spelling is Hector Le Gare

The SCITS War Memorial Plaque was unveiled on June 6, 1951.

The SCITS War Memorial Plaque was moved into Great Lakes Secondary School in 2019.

SOURCES:

Central United Church located @ 220 George St., Sarnia.

"The Centurian – A Memorial" published by Central United Church, October 1946.

NOTE: Central United Church traces its roots in Sarnia all the way back to 1837, when a "Chapel" was built on Lochiel Street, near Brock Street. A larger church was built on Vidal Street in 1861 and by 1880, ever larger accomodations were required. The Vidal Street property was sold and the present facility was constructed and finally completed in 1883. The church has undergone a number of expansions and renovations over the years. The church houses one of the largest pipe organs in the area, which can be broadcast over a sound system located in the tower. Chimes in the church were donated in memory of the many from the congregation who lost their lives in World War II.

NOTES:

Names with a star * beside their name were killed in action.

The Devine Street United Church Book of Remembrance is located at the Sarnia Armoury. The book contains photographs and information on the soldiers that includes for most: their rank, regimental number, mailing address, date of birth, name and address of next of kin.

It is estimated that the Book of Remembrance was put together around 1944.

The Devine Street United Church closed its doors in the mid-1990s.

DUNLOP UNITED CHURCH

NOTE: These two Honour Rolls were formerly located in Parker Street Church.

NOTE: Names with a star * beside their name were killed in action.

St. John's Anglican Church, which closed in 2011, also had the following plaque in it's foyer (it is now located in St. John's Anglican Church in Corunna):

TO THE GLORY OF GOD
 AND TO THE SACRED MEMORY OF
 THE REVEREND EDGAR WATT McKEGNEY, M.A., T.C.D.
 BORN AT ST. PAUL MINNESOTA, ON FEBRUARY 6TH, 1892
 RECTOR OF ST. JOHN'S CHURCH, SARNIA, ONT.
 OCTOBER 4TH, 1929 TO HIS DEATH ON CHRISTMAS EVE 1937
 SERVED WITH THE ROYAL INNISKILLING FUSILIERS 1915 TO MAR. 1918
 PRISONER OF WAR 8 MONTHS
 THIS TABLET WAS ERECTED BY THE PARISHIONERS OF THIS CHURCH
 TO PERPETUATE THE MEMORY OF A BELOVED RECTOR
 DEDICATED CHRISTMAS EVE 1939
 "GREAT DEEDS CANNOT DIE:
 THEY, WITH THE SUN AND MOON, RENEW THEIR LIGHT
 FOREVER, BLESSING THOSE THAT LOOK ON THEM."

In 1922, St. Paul's United Church constructed an adjoining Memorial Hall (gym). It was built to honour the sacrifice of the young men of St. Paul's who gave their lives in the Great War. The Memorial Hall was constructed entirely by the volunteer labour of the men of the congregation, and was the only building erected to honour Sarnians who died in the First World War.^k

APPENDIX I

CANADA AND SARNIA WAR STATISTICS

	Served	Wounded	Canadian Fallen	SARNIA Fallen*
South African War (Oct. 11, 1899 – May 31, 1902)	approximately 7 400+	250+	Approximately 270+	1 (16 participated)
World War I (Aug. 4, 1914 – Nov. 11, 1918)	approximately 620 000	172 000+	61 000+**	119 (112)
World War II (Sep. 10, 1939 – Aug. 15, 1945)	1 100 000+	55 000+	47 000+	185 (169)
The Korean War (June 25, 1950 – July 27, 1953)	26 791	1 550+	516	4 (4)
Vietnam War (1964 - Apr. 1975)	estimated 12 000	estimated 4 000	estimated 120-400	
In the Service of Canada*** (as of Sept 2016)	175 000+		approximately 1 800	1 (1)
The Afghanistan War (Dec. 2001–Mar. 2014)	approximately 40 000	2 100+	159	2 (2)

For both World War I and World War II numbers above, they are for Canada and Newfoundland combined. (Newfoundland, though a British Colony, did not join the Confederation of Canada until March of 1949)

* Sarnia Fallen numbers is research based, and are the names included in *The Sarnia War Remembrance Project*. (in brackets below are the number of names inscribed on the City of Sarnia Cenotaph)

* *Some sources, including the First World War Book of Remembrance list this total as 66,000+. This is because several thousand personnel died after the disbandment of the Canadian Expeditionary Force, so includes military personnel who died from August 4, 1914 to April 31, 1922.

***In the Service of Canada

Canadians that gave their lives in service to their country since October 1947 (not including the Korean War). This includes during training, peacekeeping and foreign operations and service in Canada. Source: In the Service of Canada Book of Remembrance, Peace Tower on Parliament Hill, Ottawa.

Note: Sarnia and Canada's approximate populations at the start of the two World Wars;
1914: Sarnia = 10,900 1914: Canada = 7.8 million 1939: Sarnia = 18,240 1939: Canada = 11.2 million

APPENDIX II

SARNIA AT WAR: QUICK FACTS AND NUMBERS

- *The Sarnia War Remembrance Project* has 312 names included in it: 1 from the Boer War, 119 from World War I (114 known*), 185 from World War II, 4 from the Korean War, 1 from In Service To Canada; and 2 from the Afghanistan War. (The City of Sarnia Cenotaph has 288 names inscribed on it: 112 from World War I, 169 from World War II, 4 from the Korea War, 1 from In Service To Canada; and 2 from the Afghanistan War).
*Five names inscribed on the World War I section of the Sarnia cenotaph (and listed in this Project), could not be identified with absolute certainty as to their true identities.
 - The original City of Sarnia Cenotaph was unveiled in November 1921, three years after the end of World War I. The “new” renovated Sarnia Cenotaph was re-dedicated in November 1955, ten years after the end of World War II.
 - The Sarnia Cenotaph includes eleven sets of brothers and two fathers and sons who lost their lives in war. (*The Sarnia War Remembrance Project* includes twelve sets of brothers).
 - A total of 16 men from Sarnia and Lambton served in the Boer War. It is estimated that more than 1100 Sarnia men and women served in World War I, approximately 3000 Sarnia men and women served in World War II, and at least 50 from Sarnia-Lambton served in the Korean War.
 - It was only three months after the town of Sarnia was officially declared a city in May 1914, that its citizens were called upon to fight for home and country.
 - Sarnia’s sons and daughters have always answered the call to fight in far off lands to save the oppressed and occupied, to defeat evil forces, and to defend freedom and liberty. The vast majority were volunteers—ordinary “citizen soldiers”. Those who served comprised people of every class, ethnic origin, religious affiliation, with a wide variety of educational backgrounds, professions and ages.
 - In World War I, there was a locally raised battalion—the Lambton 149th; and in World War II, there was a ship—the Bangor-class minesweeper *HMCS Sarnia*, and an air squadron—the *RCAF No. 414 “City of Sarnia” Squadron*, adopted by the city.
 - On the home front, providing support to those serving overseas and humanitarian relief to those impacted by war have been numerous local volunteer organizations including the Sarnia Red Cross, IODE, Salvation Army, YMCA, Canadian Legion, St. John’s Ambulance, Knights of Columbus, Sarnia Kinsmen Club, Kiwanis Club, Rotary Club, Children’s Aid Society and many local church groups.
 - Industry has always played a critical role in times of war, whether providing soldiers to serve, its know-how or supplying materials. Key to the war effort locally has been Mueller Limited, Electric Auto-Lite Limited, Holmes Foundry, MacCraft Corporation, Dow Chemical, Polymer Corporation Limited and Imperial Oil Company.
 - Sarnia’s first casualty of World War I was 28-year-old Private Roy Iliffe—he lost his life on April 22, 1915, the first day of the Second Battle of Ypres, Belgium. In the week following, two more Sarnia’s lost their lives in the same battle; 24-year-old Private Harry Bury on April 24, and 23-year-old Private Thomas Powell on April 30. These three soldiers lost their lives only eight months after the war had started.
- Sarnia’s first casualty of World War II was 18-year-old Able-Bodied Seaman Stephen Powell—he lost his life on October 22, 1940, thirteen months after the war began. Powell was one of 142 who were lost in the sinking of the *HMCS Margaree* in the mid-Atlantic, after it had collided with another ship. Just over one month later on December 1st, two more Sarnians lost their lives; 20-year-old Able Seamen Paul Brown and 21-year-old Hector Le Gare. Brown and Le Gare were two of twenty-one crew members killed when the *HMCS Saguenay* was attacked by a U-boat in the North Atlantic.
- Sarnia’s youngest fallen soldier is 15-year-old Robert Batey, who lost his life during the Battle of the Somme, France in September 1916 of World War I. Sarnia’s youngest fallen soldier of World War II is 17-year-old RCAF Pilot Officer-Air Gunner John Dowding, who lost his life as a crew member aboard a Whitley bomber that crashed during a nighttime cross-country flight exercise in England in October 1944.

- Sarnia's oldest fallen soldier is 54-year-old Edward Ramesbottom, who died of natural causes in St. John's, Newfoundland in December 1942 while serving with the Royal Canadian Naval Volunteer Reserve in World War II. Sarnia's oldest fallen soldier of World War I is 52-year-old Major David Bentley. A doctor with the Canadian Army Medical Corps, Bentley died in England in April 1917 of ill health, the result of his time spent at the Front.
- Of Sarnia's World War I fallen, the median enlistment age was 24 years old. Eighteen of them, or 15.7% of the WWI enlistees were teenagers (age 19 or under). Of Sarnia's World War II fallen, the median enlistment age was 21 years old. Seventy of the WWII enlistees were teenagers (age 19 or under). This equals 37.8% of Sarnia's WWII fallen enlisted as teenagers. Of the 185 World War II fallen soldiers included in this Project, 113 of them enlisted at age 21 or under, representing just over 61%.
- The median age of Sarnia's World War I fallen soldiers is 26 years old (the average Canadian soldier age was a little over 26 years old). The median age of Sarnia's World War II fallen soldiers is 23 years old (matching Canada's national median). A total of 69.7% of Sarnia's World War II fallen were age 25 or under. Of the 185 World War II Sarnia fallen soldiers included in this Project, 59 of them were between the ages of 17 and 21, representing close to one third of Sarnia's World War II fallen.
- Nine of Sarnia's World War I fallen were conscripted to service under the Military Service Act of 1917. All were called to service in January 1918, and eight of them were killed in action overseas. Five of Sarnia's World War II fallen had enrolled under the National Resources Mobilization Act. Four of them embarked overseas in 1944, losing their lives in action. The fifth man lost his life in British Columbia in 1944.
- There are 5 Sarnia names of WWI fallen soldiers included in this Project who lost their lives after the end of the First World War. There are 10 names of WWII fallen soldiers included in this Project who lost their lives after the end of the Second World War (six of them between VE Day-May 8/45 and VJ Day-Aug 15/45).
- Of the total 307 identified Sarnia fallen soldiers, 215 of them are buried in graves in cemeteries, representing 70% of Sarnia's war dead. These graves are in over 120 cemeteries that are scattered throughout the world, in at least 17 different countries; including South Africa, France, Belgium, England, Netherlands, Germany, Sicily, Italy, Algeria, Portugal, Sri Lanka, India, Egypt, Iceland, Azores, Barbados, South Korea as well as Canada.

The overseas cemeteries with the most Sarnia fallen graves are;

World War I: Lijssenthoek, Belgium – 4, and Etaples, France – 3.

World War II: Groesbeek, Netherlands – 12, Brookwood, United Kingdom – 8, Bretteville-Sur-Laize, France – 7, Calais, France – 5 and Adegem, Belgium – 5

Korean War: United Nations Memorial Cemetery, South Korea – 3

- Of the total 307 identified Sarnia fallen soldiers, 92 of them have no known grave, representing 30% of Sarnia's war dead. This includes 42 of the 114 World War I fallen (37%), and 49 of the 185 World War II fallen (26%), and one of the four from the Korean War.
- For the 92 Sarnia fallen soldiers that have no known grave, their bodies were never recovered. Their names are inscribed on various war memorials around the world including in the countries of France, Belgium, Egypt, Malta, United Kingdom, Malaya, Singapore, China, South Korea, the United States and Canada.

The war memorials with the most Sarnia fallen names are;

World War I: Vimy, France – 28, Menin Gate, Belgium – 9, Arras, France – 3, and Halifax, Canada – 2

World War II: Runnymede, United Kingdom – 23, Halifax, Canada – 14, Alamein, Egypt – 3, Ottawa, Canada – 3, Malta, Floriana – 2, Sai Wan, China – 1, and Singapore, Malaya – 1

Korean War: Busan, South Korea – 1

- Sarnia's fallen soldiers by branch of service is;

Of the 114 identified World War I fallen: 109 served in the Army (95.6%) and 5 served in the Air Force (4.4%).

Of the 185 World War II fallen: 74 served in the Army (40%), 91 served in the Air Force (49%) and 20 served in the Navy (11%).

Of the 4 Korean War fallen and 2 Afghanistan War fallen: all were Army
(Royal Canadian Regiment, Royal Canadian Infantry and Royal Canadian Engineers)

- Of the 91 World War II Sarnia fallen that served in the Air Force, 60 of them lost their lives serving in Bomber Command (66%). Included in Sarnia's Bomber Command fallen are: two-engine medium/light bomber losses were 12 aboard Wellingtons, 4 aboard Hudsons, 2 aboard Hampdens and 2 aboard Blenheims; and four-engine heavy bomber losses were 23 aboard Halifaxes, 20 aboard Lancasters, 2 aboard Stirlings and 2 aboard Liberators. At least 19 of Sarnia's RCAF/RAF airmen lost their lives during training.
- Of the 20 World War II Sarnia fallen that served in the Navy, 15 of them lost their lives during the Battle of the Atlantic (75%). Of Sarnia's Navy fallen, 4 were aboard Corvettes and 7 were aboard Destroyers.
- The deadliest periods for Sarnians were the three months of the Hundred Days Campaign in World War I—33 lost lives; and the three months of August through October 1944 in World War II—35 lives lost.
- Following are the major battles and campaigns in the two World Wars, Korea and Afghanistan along with the number of Sarnia lives lost in each (in chronological order, based on start date):

World War I:

Second Battle of Ypres, Belgium (April 22-May 25, 1915) = 3 fallen
 Battles of Festubert & Givenchy, France (May 18-June 16, 1915) = 3 fallen

Leading Seaman (Sailor 1st Class)
Able Seaman (Sailor 2nd Class)
Ordinary Seaman (Sailor 3rd Class)
*(Seaman ranks renamed in 2020)

APPENDIX VI

ROYAL CANADIAN AIR FORCE CODES

a) In *The Sarnia War Remembrance Project*, for many of the Royal Canadian Air Force airmen, their anecdotal notes may include numbers and words such as the following:

#409 Night Hawk Squadron “Media Nox Meridies”. These refer to;

- “#409” represents the Unit number
- “Night Hawk” is the nickname of the squadron
- “Media Nox Meridies” is the squadron motto, often in Latin, (in this case, the motto translates to “Midnight is our Moon”). Wherever possible, English translations have been included in this Project.

b) Below is a list of some of the main Royal Canadian Air Force Rank codes:

AC: Aircraftman (class I or II)	FS: Flight Sergeant	P/O: Pilot Officer
AG: Air Gunner	G/C: Group Captain	Sgt: Sergeant
BA: Bomb Aimer	LAC: Leading Aircraftman	S/L: Squadron Leader
Cpl: Corporal	N: Navigator	WAG: Wireless Operator/Air Gunner
F/E: Flight Engineer	NB: Navigator/Bomb Aimer	W/C: Wing Commander
F/L: Flight Lieutenant	O: Observer	WO: Warrant officer (class I or II)
F/O: Flying Officer	P: Pilot	W/Op: Wireless Operator

The Anxious Dead

*O guns, fall silent till the dead men hear
Above their heads the legions pressing on:
(These fought their fight in time of bitter fear,
And died not knowing how the day had gone.)*

*O flashing muzzles, pause, and let them see
The coming dawn that streaks the sky afar;
Then let your mighty chorus witness be
To them, and Caesar, that we still make war.*

*Tell them, O guns, that we have heard their call,
That we have sworn, and will not turn aside,
That we will onward till we win or fall,
That we will keep the faith for which they died.*

*Bid them be patient, and some day, anon
They shall feel earth enwapt in silence deep;
Shall greet, in wonderment, the quiet dawn,
And in content may turn them to their sleep.*

*John McCrae, 1917
(his last written poem)*

APPENDIX VII

MILITARY ABBREVIATIONS^F

(Following are a number of official Military abbreviations used in this Project)

AA – Anti-Aircraft	HMCS – His/Her Majesty’s Canadian Ship
AF – Active Force	HMS – His/Her Majesty’s Ship (Royal Navy)
AFU – Advanced Flying Unit	HMT – His/Her Majesty’s Transport or Troopship
AGGTS – Air Gunners Ground Training School	HRH – His/Her Royal Highness
AGTS – Aircrew Graduate Training School	IATC – Infantry Advanced Training Centre
ANS – Air Navigation School	ITC – Infantry Training Centre
AOS – Air Observer School	ITS – Initial Training School
B&GS – Bombing and Gunnery School	KIA – Killed In Action
BTC – Basic Training Centre	KTS – Composite Training School (RCAF)
CAATC – Canadian Army Advanced Training Centre	LAA – Light Anti-Aircraft
CABTC – Canadian Army Basic Training Centre	LAV – Light Armoured Vehicle
CAC – Canadian Armoured Corps	MIA – Missing In Action
CACRU – Canadian Armoured Corps Reinforcement Unit	MC – Military Cross - medal for bravery (officers)
CACTC – Canadian Armoured Corps Training Centre	MD – Manning Depot
CAMC – Canadian Army Medical Corps	MM – Military Medal - medal for bravery (non-officers)
CARU – Canadian Army Reinforcement Unit	MOEF – Mid-Ocean Escort Force
CASC – Canadian Army Service Corps	MREU – Missing Research and Enquiry Unit
CASF – Canadian Active Service Corps	MSA – Military Service Act (Canada 1917)
CATC – Canadian Army Training Centre	NATO – North Atlantic Treaty Organization
CATS – Canadian Army Training School	NCO – Non-Commissioned Officer
CCAC – Canadian Casualty Assembly Centre	NPAM- Non-Permanent Active Militia
CCB – Canadian Cavalry Brigade	NRMA – National Resources Mobilization Act (1940)
CCRC – Canadian Corps Reinforcement Camp	OTC – Officers Training Centre
CCS – Casualty Clearing Station	OTU – Operational Training Unit
CE – Canadian Engineers	POW – Prisoner of War
CEF – Canadian Expeditionary Force	PPCLI – Princess Patricia’s Canadian Light Infantry
CERU – Canadian Engineer Reinforcement Unit	QOR – Queen’s Own Rifles of Canada
CETC – Canadian Engineer Training Centre	R22R – Royal 22nd Regiment (The Van Doos)
CFA – Canadian Field Ambulance	RAF – Royal Air Force (British)
CFA – Canadian Field Artillery	RCA – Royal Canadian Artillery
CFC – Canadian Forestry Corps	RCAC – Royal Canadian Armoured Corps
CFDS – Canadian Field Dressing Station	RCAF – Royal Canadian Air Force
CIC – Canadian Infantry Corps	RCAMC – Royal Canadian Army Medical Corps
CIRU – Canadian Infantry Reinforcement Unit	RCAPC – Royal Canadian Army Pay Corps
CITC – Canadian Infantry Training Centre	RCASC – Royal Canadian Army Service Corps
CITR – Canadian Infantry Training Regiment	RCCS – Royal Canadian Corps of Signals
CLH – Canadian Light Horse	RCD – Royal Canadian Dragoons
CMGC – Canadian Machine Gun Corps	RCE – Royal Canadian Engineers
CMMGB – Canadian Motor Machine Gun Brigade	RCIC – Royal Canadian Infantry Corps
CMR – Canadian Mounted Rifles	RCN – Royal Canadian Navy
CMSC – Corps of Military Staff Clerks	RCNR – Royal Canadian Naval Reserve
CNR – Canadian National Railways	RCNVR – Royal Canadian Naval Volunteer Reserve
COTC – Canadian Officer Training Corps	RCOC – Royal Canadian Ordnance Corps
CPTC – Canadian Parachute Training Centre	RCR – Royal Canadian Regiment
CRT – Canadian Railway Troops	RFC – Royal Flying Corps (British air Force pre-April 1918)
CTS – Composite Training School	RHC – Black Watch (Royal Highland Regiment) of Canada
CU – Conversion Unit	RMC – Royal Military College of Canada
DEMS – Defensively Equipped Merchant Ships	RN – Royal Navy (British)
DFC – Distinguished Flying Cross	RRC – Royal Regiment of Canada
DSM – Distinguished Service Medal	RRC – Royal Rifles of Canada
DSO – Distinguished Service Order	SFTS – Service Flying Training School
EAC – Eastern Air Command	SOS – Struck Off Strength (soldier ceases to be in unit)
EFTS – Elementary Flying Training School	SS – Steamship - transport vessel
ESR – Essex Scottish Regiment	SW – Shell or Shrapnel wound
FIS – Flying Instructors School	TOS – Taken On Strength (soldier enters a unit)
GGFG – Governor General’s Foot Guards	TTS – Technical Training School
GRS – General Reconnaissance School	VC – Victoria Cross
GSW – Gun Shot Wound (bullet)	WAC – Western Air Command
HCU – Heavy Conversion Unit	WOR – Western Ontario Regiment
HLI – Highland Light Infantry of Canada	WS – Wireless School

APPENDIX VIII

SARNIA AND CANADA AT WAR - KEY EVENTS TIMELINE

1700's to the SOUTH AFRICAN (BOER) WAR

1756

- May: Beginning of the Seven Years' War, the first global war, fought in Europe, India, North America, and at sea. In North America, called the French and Indian War, rivals Britain and France struggled for supremacy.

1759

- September 13: The Battle of the Plains of Abraham - pivotal moment in the Seven Years' War. British forces led by General J. Wolfe defeat French troops under Marquis de Montcalm, Quebec surrenders.

1762

- September 15: The British defeat the French at Signal Hill in St. John's, the last battle of the Seven Year's War.

1763

- February 10: Treaty of Paris signed, ending the Seven Years' War, after Great Britain's victory over France and Spain. Canada passed from French control into the British Empire.

1775

- American Revolution begins, rebel forces invade Canada, attacking Montreal, Quebec City and Atlantic ports. (July 4, 1776 - U.S. Declaration of Independence signed)

1783

- September 3: Treaty of Paris signed, concluding the American Revolutionary War. Great Britain formally recognizes United States independence, boundary between U.S. and Canada is established.

1791

- June 10: Constitutional Act enacted by the British Parliament, creating Upper Canada and Lower Canada.

1812

- June 18: United States declares war on Great Britain, the War of 1812 begins.
- July 12: An American force attacks Upper Canada from Fort Detroit, landing near Sandwich (Windsor).
- July 17: A British & First Nation force capture U.S. Fort Mackinac, which was unaware war had been declared.
- August 16: Major-General Isaac Brock and Shawnee War Chief Tecumseh capture Fort Detroit.
- October 13: Major-General Sir Isaac Brock, "the Hero of Upper Canada", is killed in the Battle of Queenston Heights.

1813

- April 27: American forces attack and burn the capital of Upper Canada, York (Toronto).
- June 1: Royal Navy's *HMS Shannon* captures the American frigate *USS Chesapeake*.
- June 22: Laura Secord walks 30 km to warn British troops of an impending American attack.
- October 5: First Nations chief, leader Tecumseh is killed in the Battle of the Thames, near Moraviantown.
- November 11: Battle of Crysler's Farm, a vastly outnumbered British & Canadian force defeat a US force.

1814

- July 25: Battle of Lundy's Lane, one of the bloodiest and deadliest battles of the war, fought on Canadian soil.
- August 24: British troops burn the U.S. capital Washington, DC in retaliation for the burning of York.
- December 24: The Treaty of Ghent is signed, officially ends the War of 1812, and restores Canada-U.S. borders.

1815

- January 8: Battle of New Orleans, the last major battle of the war, US forces repulse British forces.
- July 18: British forces evacuate Fort Mackinac in Michigan following the signing of the Treaty of Ghent.

1836

- January 4: The community known as "The Rapids", changes its name to "Port Sarnia".

1841

- February 10: Colonies of Upper Canada and Lower Canada merge to form the United Province of Canada.

1857

- January 1: Port Sarnia is officially changed to the town of "Sarnia".

1858

- North America's first commercial oil well is established at Oil Springs.

1866

- The threat of Fenian attacks into Canada results in Militia garrisons at various locations, including Sarnia.
- June 2: Battle of Ridgeway – Fenians attack near Fort Erie, the first battle to be fought exclusively by Canadians.

1867

- July 1: Enactment of the British North America Act = Canada Confederation
(the United Province of Canada, New Brunswick and Nova Scotia join together = the Dominion of Canada)
In Sarnia, the first Dominion Day is celebrated in Market Square.
Since 1917 in Newfoundland and Labrador, this day is known as Memorial Day.
In 1983, Dominion Day officially became known as Canada Day.

1869

- July: British-made “Long Tom” cannon is positioned in west end of Market Square, Sarnia.
- Red River Rebellion: Louis Riel led Metis uprising against Canada, leads to creation of the Province of Manitoba.

1871

- Threat of Fenian Raids ends as movement collapses.

1883

- December 21: The Royal Canadian Dragoons and The Royal Canadian Regiment are formed.

1885

- March 18-July 3: North-West Rebellion: Metis uprising led by Louis Riel in what is now Saskatchewan/Alberta.
- May 9-12: Battle of Batoche – Decisive defeat of Riel’s outnumbered Metis & First Nation forces.
- November 7: The Last Spike – Ceremonial final spike driven in, completing the CPR transcontinental railway.

1891

- September 19: The St. Clair Tunnel, the first underwater cross border tunnel opens linking Sarnia to Port Huron.
- Market Square in Sarnia is renamed “Victoria Park” in honour of Queen Victoria.

1899

- October 11: The South African War begins when the Boer Republics declare war on the British Empire.
- October 30: First Contingent of Canadian soldiers leave for South Africa.
- December 10-15: British troops suffer three major defeats, in what became known as “Black Week”.

1900

- January 25: Nursing Sisters receive the rank and pay of lieutenants.
- February 18-27: Battle of Paardeberg. First major action by Canadian Infantry; results in a significant victory.
- February 18: Bloody Sunday – 1st day of Paardeberg battle, Canada’s bloodiest single day of fighting in the war.
- November 7: Battle of Leliefontein. Canadian military units valiantly & successfully cover a British withdrawal.

1902

- March 31: Battle of Hart’s River –the second bloodiest day of the war for Canada.
- May 31: War ends (Treaty of Vereeniging) with a British victory & annexation of both republics by British Empire.

1903

- November: Carnegie Library, Sarnia’s first public library is built in Victoria Park.

1908

- The Boer War Memorial Fountain was erected in Victoria Park, Sarnia.

WORLD WAR I YEARS

1910

- May 4: Under the Naval Services Act, the Canadian Navy is established.

1911

- August 29: Canada’s Navy is renamed, with the new designation, the Royal Canadian Navy (RCN).

1912

- April 14/15: Luxury liner *RMS Titanic*, on her maiden voyage, sinks in the North Atlantic, over 1,500 lives lost.

1914

- May 7: Sarnia is officially proclaimed as a city, having reached a population of 10,00 residents.
(adopt the nickname “Imperial City” because of the visit of H.R.H. the Duke of Connaught)
- May 18: The Royal Naval Canadian Volunteer Reserve is established.
- May 29: *Empress of Ireland*, a CP passenger ship collides with a Norwegian freighter in Gulf of St. Lawrence, the *Empress* sinks in 14 minutes, 1,015 perish, Canada’s worst maritime disaster.

- June 28, 1914: Assassination of Archduke Franz Ferdinand of Austria and his wife in Sarajevo.
- July 6: Germany agrees to support Austro-Hungarian action against Serbia.
- July 28: War officially begins, when Austria-Hungary declares war on Serbia.
- August 1: Germany declares war on Russia.
- August 3: Germany declares war on France.
- August 4: Germany invades Belgium.
- August 4, midnight: United Kingdom, including Canada and Newfoundland declare war on Germany.
- August 7: First troops of British Expeditionary Force (BEF) land in France.
- August 19: The first volunteers of approximately 32,000 men, begin to arrive at Valcartier Camp, Quebec.
- October 3: Over 30,000 men of the Canadian Expeditionary Force (CEF) depart en route to Europe, the largest convoy ever to sail from Canada.
- October 14: 1st Contingent of Canadian Expeditionary Force arrives in a massive convoy in England.
- December 21: The Princess Patricia's Canadian Light Infantry arrives in France, the first Canadian unit committed to battle in the Great War.
- December 25: Soldiers of opposing armies fraternize at points along the Western Front in the "Christmas truce."

1915

- January 6: The Princess Patricia's Canadian Light Infantry arrives at the trenches in France.
- February 4: The 1st Canadian Division embarks for the trenches in France.
- April 22: Canadians see first major action at Ypres; first use of poison gas against Canadian troops.
- April 22-May 25: Second Battle of Ypres, Belgium; Canada's first series of major battles.
- April 24: Canadians targeted with poison chlorine gas. In the first 48 hours at Ypres, more than 6,000 casualties.
- April 25-January 9, 1916: The Battle of Gallipoli. Approximately 46,000 Allied troops killed.
- May 3: Lt-Col. John McCrae of the Canadian Expeditionary Force composes "In Flanders Fields".
- May 7: Luxury ocean liner *RMS Lusitania* is sunk by a German submarine near Ireland, over 1,100 casualties.
- May 15-25: Battle of Festubert, France: Canada's second major engagement, they suffer 2,600 casualties.
- May 25: Second Canadian Division formed in Canada
- June 1: Prohibition begins to go into effect, province by province.
- June 15: Battle of Givenchy, France: Canada suffers 400 casualties.
- November 26: The Lambton 149th Battalion (raised exclusively in Lambton County) begins recruiting.
- December 8: British *Punch* magazine publishes "In Flanders Fields" by Lt-Col. John McCrae.
- December 25: Third Canadian Division is formed.

1916

- March 27-April 16: The Battle of St. Eloi, Belgium. Over 1,370 Canadians killed or wounded.
- April 25: The first ANZAC Day is held, an annual day of Remembrance originating in Australia and New Zealand.
- June 2-13: The Battle of Mont Sorrel, Belgium. Over 8,700 Canadians killed or wounded.
- July 1: Beaumont Hamel. The first battle of the Somme, where the 1st Newfoundland Regiment was virtually wiped out, over 700 casualties in less than half an hour.
- July 1-November 18: The Battle of the Somme, France. More than 24,000 Canadians were killed.
- September 15-22: The Battle of Courcellette. First use of the tank and rolling barrage, 7200+ Canadian casualties.
- September 16: The Ontario Temperance Act took effect, prohibiting the sale of alcohol in the province.

1917

- April 6: The United States declares war on Germany (first U.S. divisions would not arrive until late in the year).
- April 9-12: Battle of Vimy Ridge, France. "Canada becomes a nation", cost of 7,000 wounded and 3,600 lives lost.
- June 7: Battle of Messines. Allied engineers, many of them Canadian, use underground explosives in this victory.
- July 1: Newfoundland and Labrador begin to observe this date as Memorial Day to commemorate their sacrifices.
- August 1: Hospital ship *SS Letitia* carrying 546 wounded Canadian soldiers runs aground off Halifax harbour.
- August 15-25: The Attack on Hill 70, France. The victory cost more than 9,100 Canadian killed or wounded.
- August 29: PM Robert Borden's Military Service Act passes through Parliament, making conscription mandatory.
- Sept. 20: Income War Tax Act is introduced (personal income tax), a "temporary" measure to help finance the war.
- Sept. 20: Wartime Elections Act gives select groups of women the right to vote, for first time, in federal elections.
- October 26-November 10: The Second Battle of Passchendaele, Belgium. 12,000 Canadians wounded, more than 4,000 killed.
- December 6: The Halifax Explosion - French munitions vessel *SS Mont Blanc* collides with *SS Imo* and explodes in Halifax Harbour, killing approximately 2,000 people, and injuring another 9,000.

- December 17, 1917: For the first time, some Canadian women are given the right to vote in a federal election.

1918

- March 30: The Battle of Moreuil Wood, France: Canadian Cavalry carry out “the last great cavalry charge.”
- April 21: Canadian airman Roy Brown is credited with shooting down German fighting ace known as “Red Baron”.
- June 27: Attack and sinking of Canadian Hospital Ship *HMHS Llandovery Castle*, 234 lives lost, the most significant Canadian naval disaster of the war.
- August 8-November 11: Canada’s Hundred Days Campaign, France and Belgium. In final 3 months of war, over 39,000 Canadians and Newfoundlanders wounded, and more than 6,800 killed.
- August 8-14: The Battle of Amiens, France that begins the Allied offensive. Canadians advance through German defences.
- August 26-September 3: The 2nd Battle of Arras, France. Canadians break Hindenberg Line and DQ Line.
- September 27-October 11: The Battle of Canal-du-Nord and Cambrai, France. A great tactical achievement.
- November 1-2: The Battle of Valenciennes, France - The Canadian Corps last major battle of the War.
- November 10-11: Canadians liberate the city of Mons, Belgium.
- November 11, 11:00 a.m.: Armistice of Compiègne signed, ending the Great War.
- December 13: Canadian troops cross the Rhine River into Bonn and Cologne, Germany.

1919

- January 18: Paris Peace Conference opens, to establish the terms of the peace. Canada took part, having gained international recognition for its great contribution during the War.
- March: The first OHA Memorial Cup is awarded to the national junior hockey champions of Canada.
(in remembrance of the many young men and women who paid the supreme sacrifice for Canada in WWI)
- June 28: Signing of The Treaty of Versailles, the Peace treaty ending war between Germany and the Allied Powers. It includes a plan to form a “League of Nations” (precursor of the United Nations), in which Canada gains an independent seat.
- November 11: The first “Armistice Day” declared by King George V, taking place throughout the Commonwealth.

1920

- January 10: The League of Nations is established, designed to maintain global peace.
- February 1: The Royal Canadian Mounted Police (RCMP) are created with the merger of the North West Mounted Police and the Dominion Police.

1921

- July 5: Canada adopts the red poppy as its national flower of Remembrance.
- November 7: The original Sarnia Cenotaph Memorial is officially unveiled in Victoria Park.

1922

November 11: The Sarnia Cenotaph is rededicated, with the addition of the bronze “Tommy” soldier atop it.

1923

- January 31: The Royal Canadian Naval Reserve and RCN Volunteer Reserve are established.

1924

- April 1: During WWI, Canadians flew with the Royal Flying Corps and Royal Naval Air Service. On this date, a permanent national air force is established in Canada, the Royal Canadian Air Force (RCAF).

1925

- November: Canadian Legion of the British Empire Service League (Canadian Legion) is founded in Winnipeg.
(formerly the Great War Veterans Association, which had been founded in 1917).

1929

- October 29: Known as “Black Tuesday”, the stock market crash on this day is often cited as the beginning of the Great Depression, a period of economic slump that would last for approximately ten years (millions of Canadians would be left unemployed, hungry and often homeless).

1931

- November 11: Armistice Day renamed to “Remembrance Day” & is ensured that it will always be November 11th.
- December 11: Statute of Westminster passed, Canada gains its legislative (declaration of) independence from U.K.

WORLD WAR II YEARS

1934

- August 2: Adolf Hitler becomes dictator of Germany, with absolute power, declaring himself as Der Fuhrer.

1935

- September 15: German Jews stripped of rights by Nuremberg Race Laws.
- October 3: Italian army invades Abyssinia (Ethiopia) on order of Mussolini. League of Nations does little in response to this aggression, it's credibility is undermined.

1936

- March 7: German troops occupy the Rhineland.
- July 17: Beginning of vicious Spanish Civil War, Nationalists vs. Republicans, would last for more than 2 ½ years.
- July 26: The Canadian National Vimy Memorial is unveiled by King Edward VIII, on Hill 145 on Vimy Ridge.
- August 1-16: Summer Olympic Games in Berlin, Germany. 109 Canadian competitors, 9 medals won (1G, 3S, 5B).
- October: Suiyuan Campaign begins, Japanese-backed forces attack into Suiyuan province in Republic of China.
- November 1: Nazi Germany and Fascist Italy announce a Rome-Berlin Axis.
- December 23: Dr. Norman Bethune began administering blood transfusions to injured people in the Spanish Civil War out of a station wagon, the first mobile blood unit of its kind in medical history.

1937

- June 29: Canadian Prime Minister Mackenzie King visits Adolf Hitler in Nazi Germany (King impressed by him).
- July 7: Japan invades China, initiating World War II in the Pacific.

1938

- March 12: Germany invades Austria.
- October 1: German troops occupy the Sudetenland (a portion of Czechoslovakia).
- October 10: The Blue Water Bridge (cantilever truss bridge) opens connecting Point Edward to Point Huron.
- November 9: "Kristallnacht" - Wave of violence carried out against Jews throughout Nazi Germany.

1939

- March 15: Germany invades Czechoslovakia.
- mid-May: King George VI and Queen Elizabeth embark on month-long tour across Canada.
- May 31: King George and Queen Elizabeth officially unveil the National War Memorial, *The Response*, in Ottawa.
- June 7: Thousands of Sarnia/Lambton citizens travel to London, Ontario to see the King and Queen.
- August 26: All Canadian merchant ships passed from owner control to the control of the Royal Canadian Navy.
- September 1: Germany invades Poland in a blitzkrieg, the official start of the War in Europe.
- September 3: Britain, France, Australia and New Zealand declare war on Germany.
- September 3: Montreal-bound passenger ship *SS Athenia* sunk by a German submarine; 117 were killed including four Canadians.
- September 3 (lasts until May 8, 1945): The Battle of the Atlantic begins. The longest continuous battle of the war.
- September 10: Canada and Newfoundland declare war on Germany, officially entering the Second World War.
- September 16: The first convoy for Britain sails from Halifax, escorted by the Canadian destroyer *St. Laurent*.
- September 29: Germany and the Soviet Union divide up Poland between them.
- December 17: Main body of the First Division of Canadian troops arrive in Scotland.
- December 17: The British Commonwealth Air Training Plan agreement – Canada to provide facilities and training

1940

- April 9: Canada creates a Department of Munitions and Supply to manage the production of war material.
- April-June: Germany invades & takes control of Denmark, Norway, Luxembourg, Netherlands, Belgium & France.
- May 26-June 4: Miracle of Dunkirk - 340,000 trapped Allied troops are successfully evacuated from France.
- June 10: Italy declares war on Britain, including Canada, and France.
- June 10: North Africa Campaign begins, battles fought in Libya, Egypt, Algeria, Morocco and Tunisia.
- June 21: National Resources Mobilization Act enacted in Canada – registration of eligible men for home defence.
- July 10-October 31: The Battle of Britain - RAF fighter pilots, including Canadians, stop German air advance.
- September 15: Battle of Britain Day – RAF defend against a massive Luftwaffe assault, a decisive RAF victory.
- September 22: Germany, Italy, and Japan sign the Tripartite Pact creating the Axis Alliance.

1941

- February 12: Germany sends the Afrika Korps to North Africa to reinforce the Italians.
- April 6: Germany invades Yugoslavia and Greece.
- May 27: Germany's most famous battleship, the *Bismarck*, is sunk by the British Royal Navy.
(a handful of Canadians involved; gathering intelligence, air strikes and gunnery action, several were killed)
- June 22: Germany launches massive invasion of the Soviet Union under the codename *Operation Barbarossa*.

- November 27, 1941: First war vessel, a submarine chaser, the *Fairmile HMC Q062* is built and launched in Sarnia.
- December 7: Japan attacks Pearl Harbour, declares war on Britain, Canada, United States and allies.
- December 8: Canada, the United States, the Commonwealth, and the Netherlands declare war on Japan.
- December 11: Germany declares war on the United States.
- December 8-25: The Battle of Hong Kong. Japan attacks and overtakes vastly outnumbered Canadian defenders.

1942

- February: Polymer Corporation is established in Sarnia, in order to manufacture synthetic rubber for the war effort. (13 months later, Sarnia facility began production)
- February 15: The Fall of Singapore to the Japanese Army, one of the worst disasters of the British Army.
- June 4-7: Battle of Midway. Decisive battle in the Pacific Theatre, a major American victory over the Japanese.
- August 13: The Royal Canadian Navy minesweeper *HMCS Sarnia* is commissioned for service in Toronto.
- August 19: The Dieppe Raid (*Operation Jubilee*). One of Canada's worst military disasters, with more than 1,940 taken as POW's, and over 900 losing their lives during the single day.
- September: Camp Ipperwash opens, a basic training centre for infantry troops.

1943

- January 19: Princess Margriet of the Netherlands is born in Ottawa (the Dutch royal family had fled from the Nazi occupation of the Netherlands). The annual Canadian Tulip Festival in Ottawa emerged from this event.
- May 13: Axis forces in Tunisia surrender to the Allies, ending the North African Campaign.
- July 10-August 6: Battle of Sicily (*Operation Husky*). Allied invasion of Sicily, launching the Italian Campaign.
- September 3, 1943-February 25, 1945: Italian Campaign continues; Allies invade mainland Italy.
- September 8: Unconditional surrender of Italy is announced. They now join the Allied forces against the Germans.
- December 20-28: Battle of Ortona, Italy: 1372 Canadians killed in fierce urban warfare.

1944

- January 22: Battle of Anzio begins with the landing of 36,000 Allied soldiers at Anzio, Italy.
- March: RCAF No. 414 Squadron is officially adopted by the city, becoming the RCAF *City of Sarnia* Squadron.
- March 19: Germany occupies Hungary.
- March 24: Commonwealth airmen tunnel out of a German Stalag in Poland, became known as "The Great Escape".
- May 11-early June: Battle of Liri Valley – Canadians break through Gustav and Hitler Lines in Italy.
- June 4: U.S. Forces (and Canadian FSSF) enter Italy's capital city Rome, a major symbolic victory.
- June 6: D-Day (*Operation Overlord* begins): 14,000 Canadians land in Normandy, France (Juno Beach).
- June 6-August 21: The Battle of Normandy. Allies push into France, with over 5,300 Canadians killed.
- August 25: Paris, France is liberated by Allied Forces.
- August 25-September 21: Canadians break through German defensive Gothic Line in Italy at a cost of 1,000+ lives.
- September 17-25: *Operation Market Garden*. Unsuccessful Allied operation to cross the Rhine (a 'bridge too far').
- October 1-November 8: The Battle of the Scheldt. Allies push into Belgium and the Netherlands; more than 6,300 Canadian casualties, including over 800 Canadians killed.
- November 22: National Resources Mobilization Act amended – Sending Canadian conscripted soldiers overseas.
- December 16: Germany launches their last major offensive in Belgium/France, known as the Battle of the Bulge.

1945

- January: 13,000 Canadian conscript soldiers proceed to Britain, but only a few thousand enter combat.
- January 27: Auschwitz-Birkenau camp is liberated. This date is now International Holocaust Remembrance Day.
- February: *Operation Penknife* – 1st Canadian Corps leave Italy to reunite with the First Canadian Army in Europe. (Over 20 months of fighting in Italy, more than 26,000 Canadian casualties including nearly 6,000 killed).
- February 8-March 10: The Battle of the Rhineland; more than 5,300 Canadians killed.
- February 7-May 5: The Liberation of the Netherlands; over 7,600 Canadians killed.
- May 7: Germany signs unconditional surrender. The next day, May 8, is declared "V-E Day" (Victory in Europe).
- July 26: The U.S., U.K. and China issue the Potsdam Declaration, calling for the surrender of Japan.
- August 6: First atomic bomb ("Little Boy") dropped on Hiroshima, Japan. Three days later, second atomic bomb ("Fat Man") dropped on Nagasaki.
- August 15: Japan surrenders. Due to the time zone difference, surrender is announced August 14 in North America. Date is declared "V-J Day" (Victory over Japan Day).
- September 2: Japan signs the official "Instrument of Surrender" aboard the *USS Missouri* in Tokyo Bay.
- October 24: The United Nations organization is created with the signing of the United Nations Charter.

- November 20, 1945: The Nuremberg War Crimes trials begin. Verdicts on 22 defendants announced Oct 1, 1946.

THE COLD WAR BEGINS and THE KOREAN WAR

1947

- Cold War begins: Military tensions between the Western Bloc democratic nations (United States and NATO allies) and the Eastern Bloc communist nations (Soviet Union and its allies).
- November 20: Princess Elizabeth (future Queen) marries Prince Philip Mountbatten in Westminster Abbey, London ("The People's Wedding" - more than 200 million people around the world listened to the BBC broadcast)

1949

- March 31: Newfoundland joins Canada Confederation, becoming the 10th province.
- April 4: The North Atlantic Treaty Organization (NATO) alliance is signed by 12 nations, including Canada.

1950

- June 25: War begins when North Korean forces cross the 38th parallel into South Korea, three days later, they capture the capital city Seoul. Sixteen UN nations join to resist the aggression, led by the United States.
- July 1: Lead elements of the first United States forces land in Pusan, South Korea.
- July 5: Three Canadian destroyers sail for Korea, the *HMCS Cayuga*, *Athabaskan*, and *Sioux*.
- August 7: Canadian government creates the Canadian Army Special Force brigade to serve in Korea.
- late October: China joins forces with North Korea, launching their first phase offensive against South Korea.
- December 18: The first Canadian battalion, the 2nd Princess Patricia's Canadian Light Infantry, arrive in Pusan.

1951

- April 23-25: Battle of Kapyong – Victory by Canada's 2PPCLI, against overwhelming odds, 10 Canadians killed.
- May 4-6: The 25th Canadian Infantry Brigade arrives in Korea, landing at Pusan.
- May 30: Battle of Chail-Li and Hill 467, results in sixty Canadian casualties.
- July: Intermittent Peace talks begin and would continue intermittently throughout the war.
(more Canadians would be wounded or killed after the talks began).
- November 22-24: Canadians successfully defend Hill 355 against heavy Chinese attack 11 Canadians killed.

1952

- October 2: Canadian Tribal class destroyer *HMCS Iroquois* is shelled off the Korean coast, 3 Canadians killed.
- October 23: Canadians lose, and then regain control of positions on Hill 355, resulting in 67 casualties.

1953

- May 2-3: Enemy attack on Hill 187 results in heaviest Canadian battalion casualties of the war, 26 Canadians killed.
- June 2: Coronation of Queen Elizabeth II as monarch of the Commonwealth at Westminster Abbey.
(first coronation to be televised, more than 350 million around the world tuned in).
- July 27: Korean War ends* with the signing of the Korean Armistice Agreement at Panmunjom.
(*technically, the two countries are still at war)

1955

- November 11: The "new" Sarnia Cenotaph Memorial is officially unveiled in Victoria Park, with the inscribed names of Sarnia's fallen soldiers from World War I, World War II and the Korean War.

THE VIETNAM WAR and U.N. PEACEKEEPING BEGINS

1940's

- Mid 1940s: No official declaration of war, but conflict in the Vietnam region begins.

1954

- May: Vietnam War essentially begins (nine years after the end of WWII, and during the Cold War).
North Vietnam (allies China and Soviet Union) vs. South Vietnam (USA ally).

1956

- July 26: Egypt's President Nassar seizes control of the Suez Canal, sparking the 1956 Suez Crisis.
- November 4: UN votes in favour of Canadian Lester Pearson's proposal of a United Nations Peacekeeping Force.
- November 24: The first Canadian Peacekeepers, as part of the United Nations Emergency Force, set foot in Egypt.

1962

- October 16-28: Cuban Missile Crisis – Tense 13-day political and military confrontation between the U.S. & the Soviet Union concerning U.S. missiles in Italy & Turkey, and the Soviet plan to install missiles in Cuba.

1965

- February 15: The Red Ensign is replaced by the new Maple Leaf flag, becoming our official flag of Canada.
- March 2: U.S. commence air strikes, then introduce full active combat units into the war against North Vietnam.

1967

- Canada's Centennial: Celebrations, activities, events across Canada throughout the year mark it's 100th year.
Highlighted by Expo '67 in Montreal, a world's fair that ran from April 28-October 27.
- March 15: Parliament approves "O Canada" as the national anthem, replacing "God Save the Queen".

1968

- January 30: North Vietnamese launch *Tet Offensive*, a turning point in the war, and antiwar movements in America.
- February 1: The Canadian Armed Forces came into being with the merger of the Canadian Army, the Royal Canadian Navy and the Royal Canadian Air Force. By 2011, the historic names were restored.

1973

- January 27: All warring parties in the Vietnam War sign a ceasefire.
- March: The last United States military personnel leave Vietnam, though some remain protecting U.S. installations.
- September: Sarnia's F-86 Sabre Golden Hawk fighter jet is unveiled, part of the RCAF Memorial in Germain Park.

1975

- April 30: Vietnam War ends with the capture of Saigon by the North Vietnamese Army.
- Canada begins admitting Vietnamese immigrants to the country, reaching 5,608 in one year.
- Over one million refugees flee Vietnam, Cambodia and Laos, became known as "boat people".

1976

- July 2: Vietnam is unified as a communist country, the Socialist Republic of Vietnam.

1979/80

- Approximately 50,000 "boat people" from Vietnam settle in Canada.

1982

- April 17: Queen Elizabeth signs the Proclamation of the Constitution Act, enshrining the Canadian Charter of Rights and Freedoms, and completing Canada's independence from Britain.

1983

- July 1: Known as Dominion Day since 1867, this date officially becomes known as Canada Day.

POST COLD WAR and THE AFGHANISTAN WAR

1989-1991

- Cold War ends with the fall of the Berlin Wall in November 1989. Borders open, free elections oust Communist regimes, and the formal dissolution of the Soviet Union in December 1991.

1990

- August 2: Iraq invades Kuwait, start of Persian Gulf War involving UN coalition forces, including Canada.

1991

- January 16: *Operation Desert Storm* – Combat phase of Gulf War begins with a massive U.S.-led air offensive.
- March 3: UN coalition forces liberate Kuwait, Iraq cease-fire, end of Persian Gulf War.

1995

- July 2: The Canadian Vietnam Veterans Memorial (The North Wall) is unveiled in Windsor, Ontario.

1997

- July 27: The Canadian Korean War Wall of Remembrance is unveiled in Brampton, Ontario.

1998

- November 11: Sarnia's Victoria Park is officially renamed Veterans Park.

2000

- May: Canada's Tomb of the Unknown Soldier is created at National War Memorial in Ottawa.
(contains the remains of an unidentified Canadian soldier who died at Vimy Ridge, France in WWI).

2001

- September 11: Four coordinated terrorist attacks by Islamist extremists on U.S targets including the World Trade Center and the Pentagon. Referred to as "9/11", approximately 3,000 people killed from over 90 nations.
- October 7: United States begins *Operation Enduring Freedom* against Al-Qaeda & Taliban regime in Afghanistan.
- October 9: As part of *Operation Apollo*, first Canadian warship proceeds to Arabian Sea.

- December 22, 2001: United Nations Security Council creates an International Security Assistance Force (ISAF).
- December: Canada's Afghanistan mission begins with the arrival of commandoes from Joint Task Force 2.

2002

- January: First Canadian troops arrive in Afghanistan.

2003

- April 9: Government of Canada declares this date annually as "Vimy Ridge Day".
- August: Under the mandate of *Operation Athena*, Canadian forces deploy to Kabul, in northern Afghanistan.
- September 3: Canadian Parliament declares this date annually as "Merchant Navy Veterans' Day".

2005

- August: Under *Operation Athena II*, Canadian forces transition to Kandahar Province in southern Afghanistan.

2006

- January: Canadian forces begin conducting main combat operations in Kandahar.
- January 27: The first commemoration ceremony of International Holocaust Remembrance Day.
- September 2-17: *Operation Medusa* in Panjwai District results in 12 Canadians killed in action.

2007

- March 9-May 30: British-led *Operation Achilles* in Helmand Province, results in 6 Canadians killed in action.
- April 9: The restored Canadian National Vimy Memorial is rededicated by Queen Elizabeth II.
- August 24: A stretch of Hwy 401 running from Trenton to Toronto, is officially renamed the Highway of Heroes.

2008

- August 9: National Peacekeeper's Day was established in Canada.

2011

- July: Withdrawal of the bulk of Canadian troops from Afghanistan, ending its combat role on the front lines there.

2013

- July 27: Canadian government designates 2013 as the Year of the Korean War, and makes every July 27 "Korean War Veterans Day".

2014

- March 12: Official withdrawal of all Canadian military personnel from Afghanistan.
- May 9: National Day of Honour commemorated across Canada to honour the legacy of the Afghanistan heroes.
- September 10-14: The inaugural Invictus Games are held in London, England.
- November: Dedication of WWI Trees of Remembrance Memorial (Scouts Canada project) in Heritage Park, Sarnia.

2015

- November: The "Big Tom" cannon is returned to Veterans Park, it's original home since 1869.

2016

- October 30: Sarnia-Lambton Afghanistan Monument is unveiled in the southeast corner of Veterans Park.
- November 7: The Veterans Park Storyboard is unveiled, documenting the history of the park and it's artifacts.

2017

- May: Sarnia's Vimy Ridge Memorial is unveiled in Veteran's Park, commemorating the Battle's 100th anniversary.
- September 27: Canada's National Holocaust Monument is unveiled in Ottawa.

2018

- October: Two storyboards are unveiled in Veterans Park commemorating Sarnia sacrifices in both World Wars: World War I – Sarnia At War, and World War II – Overseas and The Homefront.

2019

- October 15: Four kilometre section of Highway 40 in Sarnia (south of Hwy 402) receives the secondary designation of "Veterans Parkway".
- November 11: The Royal Canadian Legion, Branch 62, adds to the Sarnia cenotaph, inscribing the names of 26 fallen soldiers.

Sonnet 55 (2nd quatrain)

*When wasteful war shall statues overturn,
And broils root out the work of masonry,
Nor Mars his sword nor war's quick fire shall burn
The living record of your memory*

By William Shakespeare, 1609

 Pg. 1221 – “Sonnet 55”, William Shakespeare (1609).
 Pg. 1240 – “Canada’s Men”, from a postcard written by an unknown Canadian soldier (1916).
 Pg. 1243 – “Imagine”, John Lennon (1971).

Canada’s Men

*From the Grand Old Home of the Maple Leaf,
 That lays o’er the Rolling Sea;
 In response to the Call – come Canada’s Men,
 These Sons of the Empire – Free.*

*Boldly they stand for the Cause of Right,
 And Britain’s Might – uphold;
 Sons of the Grand Imperial Race,
 They can Fight as in Days of Old.*

*From the Days when Wolfe scaled High Quebec,
 That overlooks the Plain;
 The Gallant Deeds of Canada’s Men.
 Shall Ring through the World again.*

*From City, and Prairie, and Distant Farm,
 They Respond to their Empire’s Call;
 To avenge their fallen Comrades,
 True Patriots – one and all.*

*We are proud to-day of Canada’s Men,
 And very good reason to be!
 The Bravest Men – we’ve seen of late,
 That have crossed the Atlantic Sea.*

*And when the War is finished,
 And our Lads go Home once More;
 What a Rousing Welcome shall be theirs,
 On their fine Canadian Shore!*

*From a post card written by a Canadian soldier to his mother, 1916
 Author unknown*

ACKNOWLEDGEMENTS

The Sarnia War Remembrance Project is a completely volunteer, non-profit undertaking by its author. The successful completion of this project was possible only with the gracious support and contributions of a number of key individuals. Project author Tom Slater wishes to express a very special thank-you to the following for their invaluable support and assistance. Their admiration and respect for all the men and women who served and continue to serve is abundantly evident and inspiring. These individuals saw the value of *The Sarnia War Remembrance Project* as a means to pay tribute to all of Sarnia's fallen soldiers, to all those who served, and to the families of those who served. These individuals were instrumental in ensuring that the men and women of Sarnia-Lambton who served are remembered with honour.

Lou Giancarlo and Tom St. Amand – These two gentlemen wholeheartedly volunteered countless hours of their expertise in proofreading, organizing, revising and editing the research. They offered insight, suggestions, critical analysis, encouragement and advice. Their invaluable expertise ensured that the stories of Sarnia's fallen are told with clarity and eloquence and that the memory of these brave souls and their families is preserved with reverence and respect.

Randy Evans – After the release of the first edition, Randy offered to assist in identifying any possible Sarnia World War I fallen who may have been missed on the cenotaph. Collaborating over several months, a number of potential candidates were investigated, leading to several new fallen being added to the World War I section of this Project.

Mayor Mike Bradley – When Slater first began his search for a record of the local fallen, he ran into numerous dead ends and disappointments in trying to obtain any information at all. Slater—a complete stranger to Mayor Bradley at the time—met with the mayor one day and described what he was hoping to achieve. Mayor Bradley's enthusiasm, his eagerness to help, and his belief in the value of the project had a major impact in Slater's desire to continue the pursuit to his goal. From the outset, Mayor Bradley provided names of people to contact, potential resources to access and was an on-going support for information on Sarnia's war contributions.

After completion of the project in 2020, Mayor Bradley and the City of Sarnia provided support for the printing of copies of this two-volume edition. Mayor Bradley and the City also posted the entire PDF version of the Project on the City of Sarnia website: www.sarnia.ca. In this way, *The Sarnia War Remembrance Project* is accessible to all worldwide.

Family members of the fallen – Slater is forever grateful to the countless family members of Sarnia's fallen who provided him with invaluable information. Their contributions were instrumental in recording the stories of their loved ones and in making this project become a reality. Bearing the burden of the loss of their loved ones and the thoughts of what could have been for their entire lives, they were willing to share their joys, love and special memories of their fallen family members. Their rich, emotional recollections, in some cases many years after the loss of their loved one, left an indelible impression of the lasting pain and heartache felt in the loss of son, uncle or father to war.

Local media – Many members of the local media were instrumental from the outset by putting the word out to the community about the goal of the project and of Slater's request for information. Many family members contacted Slater as a result, who then provided information about their loved ones. The local press has also used *The Sarnia War Remembrance Project* as a source to continue to tell the stories of Sarnia's sacrifices during war. Thanks to many including George Mathewson, Carl Hnatyshyn, Tyler Kula, Paul Morden, Tara Jeffrey, Troy Shantz, Barbara Simpson, Melissa Schilz, J.D. Booth, Holly Wenning, Sue Storr, Barry Wright and Heather Young.

Donors – **The City of Sarnia; Bluewater Power Group of Companies; the Royal Canadian Legion, Branch #62, Sarnia; and the Sarnia Historical Society** generously provided financial support for the printing of this two-volume project. All printed copies have been donated to local groups and organizations including city and county government records, libraries, museums, archives, military service groups, schools, retirement and long-term care residences and local media. The generosity of these donors has ensured that there is a lasting record of Sarnia's wartime contributions; and that the sacrifices made by those who have served and those who have fallen, as well as the families of all servicemen and servicewomen, will always be remembered. The Sarnia Historical Society has also posted a PDF of the Project on their website: www.sarniahistoricalsociety.com

The following is a list of many of the people who contributed to the successful completion of this Project. Information, details and support that they provided through e-mails, telephone calls and meetings since the inception of this project, added to the thoroughness and accuracy of the story's of Sarnia's fallen. The author is indebted to and gratefully recognizes all of the following individuals for their significant contributions.

Imagine (portion of)

*Imagine there's no countries
 It isn't hard to do
 Nothing to kill or die for
 And no religion too
 Imagine all the people
 Living life in peace...*

*Imagine no possessions
 I wonder if you can
 No need for greed or hunger
 A brotherhood of man
 Imagine all the people
 Sharing all the world...*

*You may say I'm a dreamer
 But I'm not the only one
 I hope someday you'll join us
 And the world will live as one*

John Lennon, 1971

INDIVIDUAL PATRONS

The following provided support for the printing of this two-volume project. All printed copies have been donated to local groups and organizations including city and county government records, libraries, museums, archives, military service groups, schools, retirement and long-term care residences and media.

The generosity of these donors has ensured that there is a lasting record of Sarnia's wartime contributions; and that the sacrifices made by those who have served and those who have fallen, as well as the families of all servicemen and servicewomen, will always be remembered. Their personal dedications are in loving memory of family members who served their country, never to be forgotten.

In memory of **all who served**, from Donald and Catherine Wardell.

Dedicated in memory of **Wilfred Ernest Pike**, from Steven Duncan Pike and family.

In memory of **Joe Egan**, RCNVR, from the Egan family.

In memory of **Sarnia's fallen soldiers**, from John and Lesley DeSotti.

In memory of **Wallace Carman Horley**, RCNVR, lost at sea *HMCS Alberni* August 1944.
From the Horley family.

In memory of **Douglas Earl Aiken**, RCAF, killed in action June 1944.
From the Lloyd Hillier family.

In memory of Leading Seaman **Joseph Fisher**, Royal Canadian Navy, from the Fisher family.

In memory of **Keith Fisher**, Royal Canadian Navy.
From Diane Fisher and Susan Fisher Savignac and family.

In memory of **Private Melvin Fisher**, killed in action while serving with the Perth Regiment, R.C.I.C..
From Randy Evans and the late Randy Fisher.

In memory of **Thomas Edwin Brydges**, Royal Canadian Artillery, killed in action March 1945.
From Helen (Brydges) & Michael O'Leary, Debra Brydges.

In memory of **Sgt. Arthur F. Gander**, RCAF, killed in action November 1943.
With love from Esme.

In memory of **Harold Johnston**, killed in action June 1942 in North Africa. Buried at the Tobruk War Cemetery. Father and Grandfather lovingly remembered. The Bradley family.

In memory of **Fred Henry**, RCAF, who proudly served Canada during World War II.
From the Giancarlo family.

In memory of **Rolly St. Amand**, who served with the RCAF during World War II.
From the St. Amand family.

In memory of **Oliver Slater**, who served with the RCNVR during World War II.
From the Slater family.

GREATER LOVE HAS NO MAN THAN THIS: THAT A MAN IS WILLING TO
LAY DOWN HIS LIFE FOR HIS FRIENDS AND COUNTRY.

Sarnia, like thousands of other communities across Canada, had many of its sons and daughters answer the call of duty to serve their country during times of war. These “ordinary” local citizens left the comforts of their homes, as well as their schools, farms, jobs, trades and careers. They left their loved ones—grandparents, parents, aunts, uncles, brothers, sisters, husbands and wives, children and friends—in response to this nation’s call to fight in far off lands.

The men and women from Sarnia who volunteered and served did so with pride, valour and honour in the fight to save the oppressed and occupied; to defeat evil forces; and to secure for others the peace, liberty and freedoms that we enjoy in this great country. For the veterans who returned home, their experiences in war forever changed their lives. For the fallen, they lost the opportunity to live full lives, enriched by friends and family. Their deaths affected their loved ones and Sarnia and Lambton community as a whole for decades.

The Sarnia War Remembrance Project is a comprehensive record of the contributions and sacrifices Sarnians made during times of war. Included in this project are the history of Veterans Park and its Sarnia cenotaph; an overview of those who sacrificed; details on key events and summaries of the major battles and important campaigns in which Canadians participated; local news stories relating to these key war events; descriptions providing insight into the conditions and experiences of soldiers; letters local soldiers wrote home; biographies on over 300 of Sarnia’s fallen; Sarnia war facts and statistics; a Sarnia and Canada at war key events timeline; epitaphs of all of Sarnia’s fallen; and a record of all war memorials, plaques and honour rolls located throughout the City.

The Sarnia War Remembrance Project is an enduring tribute to all the brave men and women of Sarnia who served in war. It commemorates the sacrifices made by all the veterans, their families and those who made the supreme sacrifice for their love of home and country.
