

THE SARNIA

WAR REMEMBRANCE PROJECT

THE BOER WAR • WORLD WAR I • WORLD WAR II
KOREAN WAR • AFGHANISTAN WAR

TOM SLATER

The Sarnia War Remembrance Project is a completely volunteer, non-profit undertaking by its author.

The *Project* was initiated in 2012 when the author discovered that no formal record existed of those individuals from Sarnia who had lost their lives while serving in the military during times of war.

Sarnia, like thousands of other communities across Canada, had many of its sons and daughters answer the call of duty to serve their country during times of war.

These “ordinary” local citizens left the comforts of their homes,
as well as their schools, farms, jobs, trades and careers.

They left their loved ones—grandparents, parents, brothers, sisters, husbands and wives,
children and friends—in response to a nation’s call to fight in far off lands.

In the fight to save the oppressed and occupied, to defeat evil forces, and to secure for others the peace,
liberty and freedoms that we enjoy in this great country, some made the supreme sacrifice.

The author’s hope is that the courage, fortitude and sacrifices of the fallen and their families
will be forever commemorated and remembered.

DEDICATION

Though this project’s focus is on Sarnia’s fallen soldiers from the aforementioned wars, it is dedicated to all the young men and women who served, as well as to their families, who all sacrificed so much.

“LEST WE FORGET”

**The Sarnia War Remembrance Project – 3rd Edition
November 2020**

A letter from the Mayor of the City of Sarnia:

It is an honour as Mayor of the City of Sarnia to write the foreword for *The Sarnia War Remembrance Project*.

A poignant book that contains the life stories of those Sarnians and Lambton County residents who served their country from the Boer War to Afghanistan and who paid the ultimate sacrifice. *The Sarnia War Remembrance Project* gives us grateful citizens the opportunity to look back and to remember those who volunteered to serve their country and who rest today forever in eternal peace. This project is a labour of love which ensures that the memory of those who died protecting our liberty and freedom will live on.

For generations, Sarnians have gathered every Remembrance Day in Veterans Park to mourn and to honour our fallen. Each year as we stand at the cenotaph, who of us has not wondered about the personal stories behind the 288 names inscribed on it? Who were these men? What did they do in civilian life? What were their hopes and dreams? Now we know through *The Sarnia War Remembrance Project* that they were ordinary men who had the courage to serve their country. They were men from all walks of life and backgrounds who left family and friends and sadly never returned. We know their passing left deep grief and forever changed the lives of their loved ones. We know also their sacrifice left Canada a diminished nation without their youth, intelligence and talents.

As we remember and honour the heroes of our past, *The Sarnia War Remembrance Project* will ensure in the words from Ecclesiasticus 44:14: "Their bodies are buried in peace; but their name liveth for evermore." We will remember them.

Mayor Mike Bradley
November 2020

Message from the Project author:

Mayor Mike Bradley and the City of Sarnia; Bluewater Power Group of Companies; the Royal Canadian Legion, Branch #62, Sarnia; and the Sarnia Historical Society generously provided financial support for the printing of this 3rd edition of the two-volume *The Sarnia War Remembrance Project*.

All printed copies have been donated to various local groups and organizations throughout the Sarnia-Lambton area including to: the City of Sarnia records; the Corporation of the County of Lambton; Aamjiwnaang First Nations; Lambton County Library; Sarnia Library; Lambton County Archives; Lambton Heritage Museum; Plympton-Wyoming Museum; local military service organizations including the Sarnia and the Corunna Royal Canadian Legions, the First Hussars (Sarnia), the Royal Canadian Naval Association (Sarnia), and the Point Edward Ex-Servicemen's Association; all Sarnia and Lambton County High Schools; retirement and long-term care residences; St. Joseph's Hospice; and local media including *The Sarnia Observer*, *The Sarnia Journal*, *Sarnia This Week*, and Blackburn Radio Inc. Sarnia.

A PDF of all of *The Sarnia War Remembrance Project* research has also been donated to the City of Sarnia; the Sarnia Historical Society; the Sarnia and Lambton County Libraries; and Lambton County Archives. The research is available to all and can be accessed for free through their websites.

Tom Slater
November 2020

The following provided financial support for the printing of this two-volume project. All printed copies have been donated to local groups and organizations including city and county government records, libraries, museums, archives, military service groups, schools, and retirement & long-term care residences.

The generosity of these donors has ensured that there is a lasting record of Sarnia's wartime contributions; and that the sacrifices made by those who served and those who have fallen, as well as the families of all servicemen and servicewomen, will always be remembered.

*Individual patrons are on page 1244.

O Valiant Hearts

*O valiant hearts who to your glory came
Through dust of conflict and through battle flame;
Tranquil you lie, your knightly virtue proved,
Your memory hallowed in the land you loved.*

*Proudly you gathered, rank on rank, to war
As who had heard God's message from afar;
All you had hoped for, all you had, you gave,
To save mankind – yourselves you scorned to save.*

*Splendid you passed, the great surrender made;
Into the light that nevermore shall fade;
Deep your contentment in that blest abode,
Who wait the last clear trumpet call of God.*

*Long years ago, as earth lay dark and still,
Rose a loud cry upon a lonely hill,
While in the frailty of our human clay,
Christ, our Redeemer, passed the self same way.*

*Still stands His cross from that dread hour to this,
Like some bright star above the dark abyss;
Still, through the veil, the Victor's pitying eyes
Look down to bless our less Calvaries.*

*These were His servants, in His steps they trod,
Following through death the martyred Son of God:
Victor, He rose; victorious too shall rise
They who have drunk His cup of sacrifice.*

*O risen Lord, O Shepherd of our dead,
Whose cross has bought them and Whose staff has led,
In glorious hope their proud and sorrowing land
Commits her children to Thy gracious hand.*

Sir John Stanhope Arkwright, 1917

Autumn, 1917 (portion of)

*Are there young hearts in France recalling
These dream-filled, blue Canadian days,
When gold and scarlet flames are falling
From beech and maple set ablaze?*

*Pluck they again the pale, wild aster,
The bending plume of golden-rod?
And do their exiled hearts beat faster
Roaming in thought their native sod?*

*Dream they of Canada crowned and golden,
Flushed with her Autumn diadem?
In years to come when time is olden,
Canada's dream shall be of them -*

*Shall be of them who gave for others
The ardour of their radiant years; -
Your name in Canada's heart, my brothers,
Shall be remembered long with tears!*

By Helena Coleman, 1917

PREFACE

The Origin of this Project: The idea for this project originated in the spring of 2012 when project author Tom Slater, a teacher at St. Patrick's Catholic High School at the time, was attending a meeting at Sarnia Collegiate Institute and Technical School (SCITS). On a wall outside of the main office, Slater noticed a plaque with the names of former SCITS students who had made the ultimate sacrifice during World War II.

Knowing that St. Patrick's, founded in 1935, was the only other secondary school in Sarnia during World War II (1939-1945) and the Korean War (1950-1953), he wondered why St. Patrick's High School did not have a similar plaque to honour its former students. So Slater set out to find the names of former St. Patrick's students who had served and those who had fallen during these two wars. Slater's goal initially was to create a war memorial plaque for St. Patrick's School that would recognize and honour these heroes.

One of the starting points for his war memorial project was to search for a complete list of all of Sarnia's war fallen; namely, those individuals who had volunteered, fought and died while serving Canada during times of war. Initial sources sought for such a list included the Sarnia Cenotaph War Memorial in Veterans Park; the Sarnia Public Library; Lambton County Archives; Lambton Heritage Museum; the Royal Canadian Legion Sarnia Branch 62; the Sarnia Royal Canadian Naval Association; the #403 Sarnia Wing (Airmen's Association); the Sarnia Armoury (the 1st Hussars Association); and Sarnia City Hall records. Slater was shocked and surprised to find that no record of Sarnia's fallen soldiers existed, at least not in the form that he had hoped. Sarnia's only record of its fallen soldiers was the list of names inscribed on the Sarnia cenotaph. The cenotaph records only a last name and an initial (or two). No first names are provided.

Project Objective: With the above discovery, Slater decided to change his objective. He began to create a comprehensive list of all of Sarnia's soldiers who had lost their lives while in service to this country during the Boer War, World War I, World War II, the Korean War and the Afghanistan War.

Slater sought to uncover as much information as he could about each individual soldier. His plan was to collect this information and to create a permanent record of Sarnia's local heroes. This entirely volunteer project would be made available for the City of Sarnia records; for local military service clubs; for Lambton County Archives; for all Sarnia and Lambton County libraries; for local churches; and for all Lambton County elementary and high schools.

Desired goal: Slater's desire was that Sarnia-Lambton residents would use *The Sarnia War Remembrance Project* to take a deeper interest in the lives of Sarnia's fallen. He hoped that the general public would be interested in learning about these local heroes; that teachers would advocate and encourage local students to learn about the young men and women who sacrificed for their country; and that family members of the fallen, some generations removed from the men and women who died, might discover new information about their relatives.

The more Slater researched, the more he appreciated the incredible sacrifices that these brave young souls made. These individuals were active in local churches, in local sports, in volunteer activities, in cultural societies and in community organizations. They voluntarily left their homes, their schools, their farms, their jobs, their trades and careers; and they left their loved ones—grandparents, parents, aunts, uncles, brothers, sisters, wives, children and friends. They responded to a call by this nation to fight in far off lands to save the oppressed; to defeat evil forces; and in the defense of liberty and freedom. Sarnia's fallen lost the opportunity to live full lives, enriched by friends and family. Their deaths affected their loved ones and the Sarnia and Lambton community as a whole for decades.

Fallen vs. Veteran soldier: A note regarding two key terms; a **"Fallen"** soldier refers to any individual who fought and died while in service (war dead); a **"Veteran"** soldier refers to any who served, survived war and returned home. This project's focus is on the fallen soldiers. These heroes who made the ultimate sacrifice deserve the honour of being remembered by their full names. Slater has always believed that it is very important to remember who these people were, what deeds they accomplished, and what sacrifices they made. If we don't remember them, Slater reasoned, it would be as if they never existed. And that would be wrong.

Creating the Project: Beginning with the original list of last names with initials on the Sarnia Cenotaph, Slater undertook extensive research using as many reference sources as he could uncover. Sources of information included numerous government, military, war museum and war memorial websites and a myriad of written sources

such as military history books, reference magazines and reference books. A number of local churches had Honour Rolls that helped in verifying names of the fallen. Slater spent countless hours at the Sarnia library reading and transcribing old *Sarnia Observer* newspaper articles from microfilm. Local media made the community aware of the project, and as a result, many family members of the fallen contacted Slater to provide information on their fallen loved ones.

First and Second Editions: After 18 months of research, Slater released the 170-page first edition of *The Sarnia War Remembrance Project* in the fall of 2013. The first edition included information on the Boer War and World War I, but focused primarily on Sarnia's fallen soldiers from World War II, the Korean War and the Afghanistan War. Not long after its release, many more family members came forward offering new information.

Slater, newly retired, now had more time to devote to research. Local historian, Randy Evans, also helped search for any World War I names that may have been missed on the cenotaph. After another year of research, in November 2014, Slater released a 400-page Second Edition of *The Sarnia War Remembrance Project*. This edition was a more detailed record of all of Sarnia's fallen soldiers, from the Boer War, World War I, World War II, the Korean War and the Afghanistan War.

Third Edition of the Project: After the November 2014 release, Slater continued his war research. He gathered more information on Sarnia and Canada's many contributions and sacrifices made during times of war, along with accumulating additional input from more relatives of Sarnia's fallen. In 2016, two new major sources of information became available to the public: the Service Files of World War II Fallen Soldiers became available on-line through Ancestry.ca; and Library and Archives Canada began the process of digitizing and making available the Personnel Records of every one of Canada's First World War soldiers. Slater then researched the Personnel Records and Service Files of every one of Sarnia's fallen soldiers. He also explored the family genealogical records of all of the fallen; collected more information from family members; and continued to explore dozens of other new sources of information. Slater's final edition of *The Sarnia War Remembrance Project*, a comprehensive record of the contributions and sacrifices Sarnians made during times of war, was completed in November 2020.

Included in this Project are the history of Veterans Park and its Sarnia cenotaph; an overview of those who sacrificed; details on key events and summaries of the major battles and important campaigns in which Canadians participated in during the Boer War, two World Wars, the Korean War, the Afghanistan War, as Peacekeepers, and In the Service of Canada; local news stories relating to these key war events; descriptions providing insight into the conditions and experiences of soldiers; letters local soldiers wrote home; biographies on over 300 of Sarnia's fallen; Sarnia war facts and statistics; a Sarnia and Canada at War key events timeline; epitaphs of all of Sarnia's fallen; and a record of all the war memorials, plaques, and honour rolls located throughout the City.

For the most part, the events are organized in chronological order (based on the start date of the event, battle or campaign). Sarnians served in almost every major battle and campaign that Canada participated in during all of these wars. Summaries of the battles and campaigns provide a preamble for the biographies of Sarnia's fallen and offer a perspective as well as a broader view of the big picture for context. What, for example, was it like to spend time in the WWI trenches, to be aboard a WWII corvette during the Battle of the Atlantic, or to fly in a Lancaster as part of Bomber Command? The goal is not only to relate events but also to provide insight into the conditions endured by the soldiers and a sense of what they were experiencing.

About the Project author: Tom Slater was born in Thunder Bay (Fort William), Ontario, the younger of two sons, to parents Oliver and Frances Slater. In 1941, Manitoba-born Oliver, 16, enlisted with the Canadian Army Militia in Kenora. At age 17, he joined the Royal Canadian Navy and served during WWII as a member of the RCNVR off the east coast of Canada and Newfoundland and on convoy duty across the Atlantic Ocean to Ireland and Great Britain. In 1948, he married Frances, who during the war worked for a time at Canadian Car and Foundry in Fort William where Hawker Hurricane fighter aircraft for the Royal Air Force were built.

Raised and educated in Thunder Bay, Tom obtained a Bachelor of Science (Biology) degree from Lakehead University followed by his Bachelor of Education degree from Nipissing University in North Bay. His wife, Jodi, and he began their teaching careers in Northern Alberta before moving to Lambton County. Tom was a teacher with the St. Clair Catholic District School Board and spent most of his career at St. Patrick's Catholic High School where he taught science, biology and special education. Tom is the proud father of daughter Megan and son Bennett and has always surrounded himself with loving pets.

Veteran Soldiers: This project does not include biographical information on the thousands of Sarnia veteran soldiers who survived any of these wars. Many returned home bearing the physical, psychological and emotional wounds of their experiences. The vast majority of Sarnia's veteran and fallen soldiers volunteered to serve their country and their families with pride and honour. Their loyalty to country, faith, family, to their unit and comrades is commendable.

Source of names in this Project: As mentioned previously, the initial source of names used in this project was derived from the Sarnia Cenotaph War Memorial in Veterans Park. Through the course of research, Slater discovered a number of names not on the Sarnia cenotaph, but connected to Sarnia. Sources for these additional names included: local newspaper (*Sarnia Observer*) reports on their deaths at the time; local Sarnia church honour rolls; local memorial plaques including at Sarnia Collegiate (SCITS), the Sarnia Imperial Refinery and the Sarnia Bank of Commerce; Canadian government websites; various Canadian military and war memorial websites (where "Sarnia" was used as a search item); the Personnel Records and Service Files of the fallen; and information from relatives of the fallen soldiers.

For the fallen soldiers profiled in this project, being linked to Sarnia means one of the following: they were born and/or raised here; they or their families moved here; they were employed here; they enlisted here; or they married someone from Sarnia and resided here.

The Sarnia Cenotaph War Memorial has 288 inscribed names in total: 112 from WWI, 169 from WWII, 4 from Korea, 1 from In Service to Canada and 2 from Afghanistan.

The Sarnia War Remembrance Project has **312 names** in total: 1 from the Boer War, 119 from WWI, 185 from WWII, 4 from Korea, 1 from In Service to Canada and 2 from Afghanistan. The following names are not inscribed on the Sarnia Cenotaph in Veterans Park, but are included in this project:

Boer War:

Daniel Crone (the Boer War Memorial lists the names of 16 men who participated in that war. D. Crone is included)

World War I:

Nelson Brown	Thomas Creighton	Walter McKenzie	John D.B. Rae
Earl S. Simmons	George Turner	John Wilson	

World War II:

Robert Alexander	Jack Brunette	Carl Burke	Maurice Church
Ross E. Clark	John Esselment	Frederick Irwin	Rowland Jamieson
William Lavers	Charles McIsaac	John McKernan	John McLagan
Donald Neal	William Rogers	Jack Thurlow	John Yorke

NOTE: Though this project lists the names of 119 Sarnia World War I fallen, the details of 114 are included. The author could not verify with absolute certainty the true identities of five individuals whose names are inscribed on the World War I section of the Sarnia cenotaph. Despite using all the Canadian WWI Personnel Records and military files available, Mr. Slater could not prove conclusively that A. Bell; G.J. Janes; M.J. Summers; W. Wilkinson; and C.B. Wilson were linked to Sarnia.

Every effort has been made to ensure that the list of Sarnia's fallen is complete and accurate. If an individual is missing or inaccuracies exist, the omissions and errors are unintentional. Researching documents and records that in some cases are over a century old elicits the possibility of errors. As much as possible, all information was corroborated by using multiple sources.

Sarnia cenotaph omissions and errors: The Sarnia Cenotaph has a few omissions and a number of spelling errors on it—not unusual for that time. No official government body or military agency was in charge of recording the names of the fallen or in matching them to specific home centers. Across the country, these kinds of lists were generally assembled by word of mouth rather than through official documents. The lists were often compiled years after the end of a war by volunteer groups, typically committees consisting in part of parents who had lost a son or widows who had lost a husband. Also, a number of the fallen had no real roots or family in the community; for example, they might have been labourers who came to work in Sarnia. As well, the inconsistencies may be the result of, for instance, a misunderstood or a mispronounced name. Note: 26 names were added to the cenotaph in the fall of 2019 as a result of this research project.

The spelling of names used in this project is based on the official Canadian Military and Government websites: Library and Archives Canada; Commonwealth War Graves Commission; Veterans Affairs Canada (The Canadian Virtual War Memorial); Canada At War (Online War Memorial); and official Province of Ontario Certificates of Registrations of Death, and most importantly, on the men's actual signatures on their Attestation (enlistment) Papers and in their Personnel Records and Service Files.

Below are the spelling errors associated with World War I and World War II soldiers on the Sarnia Cenotaph:

World War I cenotaph section:

- N. Benward – should be **N. Benware** (Neil Benware)
- N. Brearly – should be **N. Brearley** (Norman Osborne Brearley)
- F.J. Chester – should be **F.A. Chester** (Frederick Aloysius Chester)
- F.W. Edwards – should be **F.C. Edwards** (Fred Christopher Edwards)
- G.D. Hazen – should be **T.D. Hazen** (Thomas Douglas Hazen)
- A. Ireson – should be **A. Iveson** (Amos Iveson)
- F. Johnston – should be **F. Johnson** (Frederick Johnson)
- L.C. McMullen – should be **L.C. McMullin** (Leonard Calvin McMullin)
- J.M. Pierrie – should be **J.M. Pirrie** (James Miller Pirrie)
- J. Salisbury – should be **J. Salsbury** (John Reginald Sergeant Salsbury)

Soldiers' Addresses: The residential addresses in the soldier biography section come from various sources and would have been the home addresses of either the fallen soldier, his wife, and/or his parent(s) as they were recorded in their enlistment documentation, Personnel Records, Service Files, Circumstances of Casualty Records or their obituaries.

Regimental (Service) Numbers: In the soldier biography section, a number follows the names of a majority of the fallen soldiers. This is the soldier's regimental or service number. It would have been assigned to the soldier at the time of his enlistment, a number unique to them as a means of identification. It would also appear on any of that soldier's records, such as military awards, death certificates and official communication home informing a family member of the loss of their child, husband or father. For a few of the fallen, no regimental number exists. This is because, for example, in WWI, officers did not have regimental numbers unless they had first enlisted as a Private, Corporal or Non-commissioned Officer.

Lambton County fallen: This project does not include information on the fallen soldiers from surrounding Lambton County; however, it is important to note that a number of the names on the Sarnia cenotaph are from surrounding communities in Lambton County. If one is interested in finding the names of "fallen" soldiers from other parts of Lambton County, an excellent resource is the book *Lambton Remembers*, by John M. Collins of the Lambton Branch of the Ontario Genealogical Society, Sarnia, Ontario (1998). It provides information on all the War Memorials throughout the County of Lambton, Ontario. It also includes a detailed list of all names recorded on every Lambton County Cenotaph and Memorial, covering the Boer War, World War I, World War II, and the Korean War.

Comprehensive Sarnia War Record: The names covered in the content of *The Sarnia War Remembrance Project* are a comprehensive record of the men from Sarnia-Lambton who made the supreme sacrifice in war, a

permanent record long overdue. Every name represents a young man, a son, a grandson, a brother, a father, an uncle, a neighbor, a best friend—each one sacrificed his life for us. Reading the stories and looking at the photographs of the faces of these soldiers, one cannot but be inspired and humbled by their youth and innocence, their self-sacrifice, their sparkling eyes and bright smiles looking back at the camera. So many were very young; they had their whole lives ahead of them. Future careers, wives, children and grandchildren were never to come to fruition.

LAC Databases: The Government of Canada's Library and Archives Canada (LAC) holds an extensive collection of records of the Canadian men and women who have served their country in the military. The records include unit war diaries, medal registers, photographic collections and military service files. The LAC website is; <http://www.bac-lac.gc.ca/eng/discover/military-heritage/Pages/military-heritage.aspx>

Personnel Records of the First World War: In 2016, Library and Archives Canada began work on digitizing World War I Canadian Expeditionary Force (CEF) Personnel Records. The project to digitize over 620,000 files was completed in 2018, allowing family members and researchers to find new information on the details of these soldiers military service. Also available from LAC are digitized World War I Circumstances of Death Registers, Commonwealth War Graves Registers and Veterans Death Cards.

Service Files of the Second World War (and beyond): The Service Files of World War II War Dead (fallen) are available through Ancestry.ca and some are available through Library and Archives Canada. No online database of military records for veteran soldiers of World War II or for veteran or fallen soldiers beyond WWII exists. The personal information contained in their restricted files is protected by the provisions of privacy legislation.

Requests for Military Service Files: Family members and researchers can submit a request for restricted records held by LAC. Considerations and Access restrictions apply that can be found on their website. These restrictions vary on the situation. For individuals still living, personal information cannot be released without the written consent of the individual; for individuals deceased fewer than 20 years, limited personal information will be released to an immediate family member; and for individuals deceased more than 20 years, proof of death is required.

Family members and researchers should be aware of possible peculiarities when going through Personnel Records/Service Files; for example, attestation papers completed at the time of enlistment contain much useful information, but cannot always be trusted when it comes to verifying date of birth, since some individuals, if they were underage, gave a false year of birth at their enlistment. The same inconsistencies apply to the official provincial Death Certificates, filled in by the Canadian military to provide the dates of birth and death but based on information taken from the soldier's Service Files.

For anyone accessing WWI Personnel Records or WWII Service Files, a useful LAC website is: Military Abbreviations used in Service Files <http://www.bac-lac.gc.ca/eng/discover/military-heritage/pages/military-abbreviations.aspx>.

War Memorial Websites: Many military/war memorial websites exist dedicated to honouring & preserving the memory of Canada's fallen soldiers. They usually provide only basic information such as rank, service number, force, regiment, cemetery and grave or memorial reference. Information on the details of their lives, their service, or the circumstances of their deaths are limited. In some cases, family members have submitted information to sites such as The Canadian Virtual War Memorial (CVWM) and the Commonwealth War Graves Commission (CWGC).

More Information: A story exists for every fallen or veteran soldier: Who these people were? Who their families were? Why they joined the military? What were their experiences at home before going overseas and once there? For the fallen, what were the circumstances of their deaths? These sailors, soldiers and airmen made sacrifices, and so did their families back home in Canada. Their loved ones coped each day with the possibility that those whom they loved might not return, and many ultimately had to face the terrible reality that their worst fears were realized. Government and war memorial websites do not provide this personal information.

The dwindling number of veterans themselves, the family members of fallen and veteran soldiers, and historians and amateur researchers would be ideal sources for this additional information. It is hoped that these individuals will submit information such as stories, photographs, documents or personal memorabilia to websites dedicated to honouring all those who served. In this way, the stories of these brave souls and their memories will live on forever. It is a way to honour and to pay tribute to the brave men and women of Sarnia-Lambton who served, and

those who made the ultimate sacrifice for their love of home and country, during a very different and difficult time in Canada's history.

Recommended authors: For anyone interested in learning more about Canada's military contributions and sacrifices in wartime and in peacekeeping missions, countless websites and books are dedicated to this topic. Canada has a wealth of talented writers telling the tales of Canada's military history. Some of the outstanding Canadian war historian/authors include J.L. Granatstein, Mark Zuehlke, Terry Copp, Ted Barris, Pierre Berton and John Nadler. One military historian/author's work highly recommended by this author is Tim Cook. His series of books on Canada in World War I and World War II, the battles fought and the experiences of the front line soldiers, are particularly engrossing and invaluable informative.

Other Local Projects: Over the course of his research, the author, along with other volunteers and contributors including Lou Giancarlo and Tom St. Amand, completed a number of local projects derived from the SWRP. These projects further honoured those who served in the Boer War, in both World Wars, in Korea, in Afghanistan and In Service to Canada. Extensions of the SWRP include: the return of the "Big Tom" cannon to Veterans Park; a number of storyboards installed in Veterans Park; a Catholic Soldiers Honour Roll installed in St. Patrick's High School; the addition of 26 new names to the Sarnia cenotaph; special "Sarnia Remembers" issues of the *Sarnia Journal*; and the secondary designation of a 4 kilometre section of Highway 40 as "Veterans Parkway".

Front Cover Illustration: The front cover illustration of this Project was created by Sarnia-born artist Bennett Slater. Bennett incorporated the Maple Leaf and the Red Poppy in his design for a variety of reasons.

Maple Leaf: In the mid-1800's, the (sugar) maple leaf was already an emblem of Canada. By 1860, it was incorporated into the badge of the 100th Regiment (Royal Canadian Regiment). Canadian soldiers serving in the South African Boer War in 1899 wore a maple leaf cap-badge, which became a rallying symbol for the Dominion troops. During World War I, the maple leaf was included in the badge of the Canadian Expeditionary Force. This badge with the word "CANADA" superimposed in the maple leaf was proudly worn by all Canadian soldiers. In World War II, the maple leaf was worn with pride by all members in every branch of the Canadian military. Canadian troops have continued to use the maple leaf as a distinctive sign on regimental badges and equipment.

In 1917, the Imperial War Graves Commission (now Commonwealth War Graves Commission - CWGC) decided to commemorate all Commonwealth war dead individually and equally in a uniform fashion. Canadian soldiers' headstones would be engraved with a common Maple Leaf emblem. *The shape of the maple leaf on the front cover of this project is based on the Maple Leaf emblem chosen by the CWGC that is engraved on the gravestones of tens of thousands of Canadian soldiers buried in locations all around the world.

Red Poppy: The bright red poppy is a wildflower that flourishes in fields and along roadsides through Belgium, France and Gallipoli. Each spring during the Great War, on the devastated battlefields in these countries, the tenacious qualities of this red flower allowed it to grow in clusters in the churned up soil. The sight of these delicate, vibrant scarlet flowers growing on the shattered ground surrounded by death and destruction caught the attention of many of the soldiers. In soldiers' folklore, the vivid red of the poppy came from the blood of their comrades soaking the ground. One of the soldiers moved by the sight of the poppies on the battlefield was Canadian Lieutenant Colonel John McCrae. Following the death of a close friend at the Second Battle of Ypres in the spring 1915, John McCrae wrote the poem *In Flanders Fields*. His famous poem was the inspiration that led to the red poppy becoming a widely recognized international symbol of Remembrance.

Canada adopted the poppy as its national flower of Remembrance in July of 1921. The red poppy is a simple tribute to those who laid down their lives in the service of their country during war and military operations. Throughout Commonwealth nations, the wearing of a red poppy is a way to demonstrate gratitude to those who served, and a pledge to always remember those who gave their lives for the freedoms we enjoy.

Act of Remembrance

*They shall grow not old,
 as we that are left grow old;
 Age shall not weary them,
 nor the years condemn.
 At the going down of the sun
 and in the morning
 We will remember them.*

*(excerpt from "For the Fallen")
 by Robert Laurence Binyon, 1914*

VETERANS PARK and THE SARNIA CENOTAPH

As mentioned previously, the primary source of names included in this project was derived from the Sarnia cenotaph. There are three War Memorial Monuments that reside in Sarnia's Veterans Park on the corner of Wellington Street and Christina Street: The Boer War Memorial Fountain, lists the names of sixteen Lambton men who served in the Boer War; the Sarnia-Lambton Afghanistan Monument, a memorial dedicated to those who served in Afghanistan; and the more familiar Sarnia Cenotaph War Memorial which has 288 inscribed names of fallen soldiers from World War I, World War II, the Korean War, In Service to Canada and Afghanistan Peacekeeping. Also mentioned previously, the Sarnia Cenotaph has a few omissions and a number of spelling errors on it—not an unusual occurrence based on when and how these lists were derived. *The Sarnia War Remembrance Project* records 312 names of Sarnia fallen soldiers in total.

The names as they are inscribed on the Boer War Memorial Fountain; on the plaques on the Sarnia-Lambton Afghanistan Monument; and on the Sarnia Cenotaph, are all included in this Project and are recorded beginning on page 1154. Following is information on the history of Veterans Park and Sarnia's war monuments and memorials in the park.

- **VETERANS PARK:** Prior to the time of Canada's Confederation in 1867, what is now Veterans Park, was known as the South Ward Market or **Market Square** (at that time, Sarnia was Port Sarnia). On a local map of the area from the early 1880's, the north-east corner of what is now Wellington and Christina streets notes it as being in the south ward, and is recorded on the map as "Market Square." The Square was used by everyone, for example: First Nations people would come to the square to trade their goods and to rest after their journey.

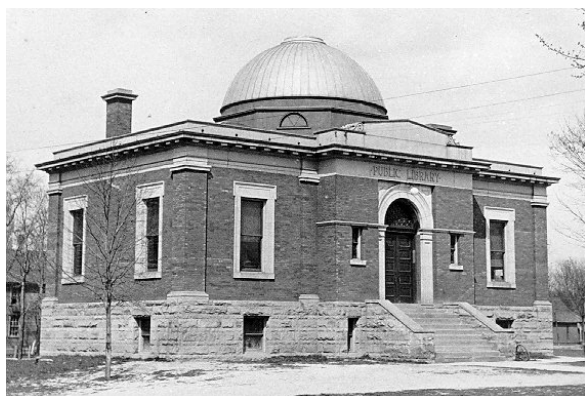

One of the first big events to take place in the park was the **Dominion Day** celebrations on July 1, 1867. On that date, with the enactment of the British North America Act, the three British North American colonies of Nova Scotia, New Brunswick, and the United Province of Canada (Quebec and Ontario) were united into a federation of four provinces under the name 'Dominion of Canada'. In Sarnia, the first Dominion Day celebrations included a parade that featured two Moore Infantry Companies; two Grand Trunk Rifle Companies from Point Edward; the Sarnia Infantry and Artillery Company; the Sarnia Cornet Band; Dominion Day committee volunteers; the Town Clerk in a carriage bearing Her Majesty Queen Victoria's Proclamation; four young women dressed in white in a carriage representing the four provinces; the Ministers of the Town; the Veterans of 1812; Sarnia and Port Huron fire brigades; Sarnia and Port Huron civic officials in carriages; the Sabbath School Children; and the citizens of the Town and visitors from the county. The parade proceeded from the parade ground, down Christina Street, George, Front, Francis (later Davis) and back to Christina Street to Market Square, where people assembled to hear a number of speeches in the hot summer sun. In the Square, the densely packed crowd listened to speeches from Mayor Frederick Davis of Sarnia, the Honourable Mr. Mitchell of Port Huron, and Alexander MacKenzie (who was soon to be elected as member of Canadian Parliament for Lambton). At its conclusion, crowd members adjourned Market Square for refreshments, while the various groups were conducted to either the Town Hall or a number of local hotels for dinner.

Victoria Park 1900 – "Welcome Home To Our Boys" Celebration
(soldiers returning from the Boer War)

Market Square, referred to by some as Wellington Square, was the only park in existence in Sarnia in 1888, when the Board of Park Management was organized. In 1891, the park was renamed **Victoria Park** in honour of Queen Victoria, who would reign as Queen of the United Kingdom from the age of eighteen in 1837 until her death in 1901.

The first public library in Sarnia was opened in Victoria Park on December 1, 1903, thanks to a generous donation of \$20,000 made in January 1902 from Scottish-American philanthropist **Andrew Carnegie**. Carnegie, an industrialist and business magnate, had led the expansion of the American steel industry in the late 19th century. As a leading philanthropist, he was driven by his strong belief and passion for free education for all. Carnegie donated \$56 million to fund 2,509 free public libraries around the world between 1883 and 1929. Between 1903 and 1922, 125 Carnegie libraries were built across Canada, of which 111 were built in Ontario. Carnegie's philanthropist initiative contributed significantly to the development of literacy in small communities across this province. The Sarnia "**Carnegie Library**" (architect M.R. Burrowes) was located in the centre of the park, and was designed to hold 4,000 books for a population of 8,000 people.

Sarnia's Carnegie Public Library

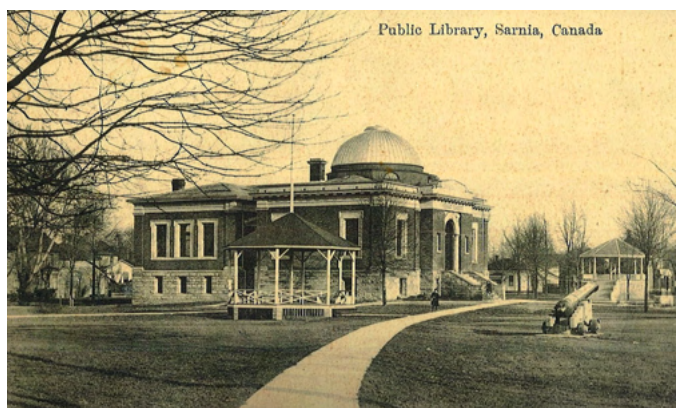

In late May 1907, the latest planned improvements for Victoria Park were announced in the (*Sarnia Canadian Observer*). Following is a portion of the report;

Park Improvements

GRANOLITHIC WALKS AND A NEW BAND STAND

The parks commissioners met last evening and awarded the contract for a number of improvements which are contemplated at Victoria square. The contract for the new granolithic walks, which will be laid through the park in the shape of a maltese cross from the four corners of the park, was awarded to Mr. Petkett, at 8 3-4 cents. The walks will be five feet in width and will total up to about 5000 feet of sidewalk. Mr. Petkett was also awarded the contract for the cement foundation for the proposed new fountain (Boer War Fountain) and the old Russian cannon (Big Tom), a relic of the Crimean war.

The park commission also decided to have a new band stand erected and awarded the contract to Thos. Grace at \$430. It is said to be the intention of the park commissioners to have the new band stand, which will be a permanent structure, erected on the east side of the public library building.

The Sarnia Carnegie Public Library

(Note: On the right side is the "Big Tom" cannon, the bandstand and the Boer War Memorial Fountain)

On **May 7th, 1914**, Prince Arthur William Patrick Albert, who was the Duke of Connaught and Governor General of Canada, planted a ceremonial hard maple tree near the west end of Victoria Park. Prince Arthur was the seventh child of the nine born by Queen Victoria, whom the park was named after. The planting of the maple tree was part of the ceremony on that date in which the Duke of Connaught officially declared the municipality of **Sarnia a city**. Unfortunately the maple tree was cut down years later during park renovations. More information on the May 7, 1914 “Sarnia becomes a city” ceremony is on page 59.

In the **early 1900’s**, along with being a location for patriotic events, the three-acre Victoria Park was a focal point in the city for concerts, ceremonies, picnics, special events and open-air church services, centered around the park bandshell, park benches, cannon and flagpole. Victoria Park, while still considered a site of beauty and a place to gather, had also become a location for items of historical significance, such as the Boer War Memorial, the “Long Tom” cannon and the Centennial Anniversary Cairn.

Sarnia’s Centennial 1936: On Saturday, August 1, 1936, Sarnia celebrated its one-hundredth birthday, commemorating the 100th anniversary of the naming of (Port) Sarnia in January 1836. The Centennial celebration began with a parade through the downtown section of the city, ending at Victoria Park. There, hundreds of citizens witnessed the centennial ceremony, with the band of the Lambton Regiment providing the music. The climax of the Victoria Park ceremony was the unveiling of the **Centennial Anniversary Cairn**, in the southeastern section of the park, a short distance from the north sidewalk on Wellington Street. Mayor Crompton, Rev. L.A. Wemple of St. Joseph’s Catholic Church, Rev. R. Charles Brown of Canon Davis Anglican Church, William Guthrie, M.L.A., and Ross Gray M.P. for West Lambton took part in the Victoria Park ceremony. The actual unveiling of the cairn, concealed beneath a Union Jack flag, was conducted by Mrs. Charlotte J. Nisbet, a descendant of one of the earliest leaders in the community.

Sarnia Centennial Cairn in Victoria Park

The Centennial Cairn was built of fieldstone, and mounted on top was a large art deco thermometer with two faces, showing to the north and south. On the face of it, fronting Wellington Street, was a stone plaque with the inscription, “COMMEMORATING OUR ANNIVERSARY, 1836-SARNIA-1936. ERECTED BY THE CITIZENS.” At night, floodlights illuminated the cairn and mounted thermometer. On that August 1, 1936 night, thousands of citizens attended a centennial service in Victoria Park. From the *Sarnia Observer*; *Three thousand people gathered under the stately elm and maple trees of Victoria Park Sunday evening for the impressive thanksgiving services on the occasion of the one hundredth anniversary of the municipality of Sarnia. With bowed heads the crowd murmured a prayer for the blessings already bestowed on the city and thousands of voices blended singing ‘O God our help in ages past...’*

Like the “Long Tom” cannon, the Cairn Thermometer was removed from the park during construction of the present-day Sarnia Library in the early 1960’s. A replica Cairn Thermometer, with the original granite plaque, was erected in 2002, and is located adjacent to Sarnia City Hall on the corner of George and Front Streets.

Sarnia's Victoria Park 1930's

In 1959, work on a new **Sarnia Public library** began, its location moved slightly west, to the corner of Christina and Wellington streets. The "old" Carnegie Library was demolished in 1960. Renovations were made to Victoria Park, including the moving of the various monuments to new locations: the cenotaph was re-positioned slightly; the Centennial Cairn thermometer was removed; the Boer War Memorial Fountain was moved and damaged slightly; the I.O.D.E. Memorial plaque was removed from the library foyer; the ceremonial maple tree planted in 1914 by Prince Arthur was cut down; and the old "Long Tom" cannon was moved to Canatara Park. By 1961, Victoria Park was approximately one acre in size and the cost of maintenance was shared equally by the Parks Board and the Sarnia Library Board.¹¹

Victoria Park has had a long historical connection with the **military**. The park was used as a training ground for the local militia; a parade ground for thousands of soldiers stationed here during the Fenian scare of 1866; a marshaling ground for troops; a gathering place for troops before being sent off to war; a place for citizens to hold services to pray for the safe return of their family members; a place to celebrate when the soldiers first returned home from war; and a place to honour all those who served and sacrificed. For example, in 1900, a crowd of Sarnians gathered in the park for a "Welcome Home to Our Boys" celebration, to welcome those men who had returned from active duty in South Africa during the Boer War (see page 1).^{5G}

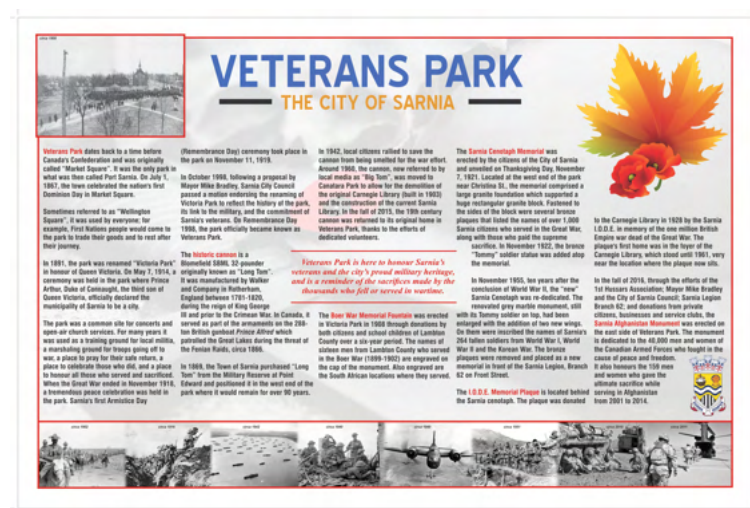

On May 29, 1916, the force of 800 volunteers of Sarnia's own Lambton 149th Battalion paraded to Victoria Park for a special church service, and a farewell to family and friends. The men then marched to the Cromwell Station, where they boarded trains on the first leg of their journey to fight in France and Belgium. Many of these men would never return to Sarnia. The First World War would end on November 11, 1918. On the day after the Armistice, on the evening of November 12, a tremendous peace celebration was held, starting in Victoria Park. Thousands of cheering citizens from Sarnia and surrounding communities gathered there, forming a huge torchlight parade that then moved along the darkened streets making its way through the downtown to the golf grounds.

On November 11, 1919, the first Armistice Day (now called Remembrance Day), was declared by King George V, taking place throughout the Commonwealth. It was designated to be a day to remember all those who had made the supreme sacrifice in service to their country. From that date on, the annual Sarnia Remembrance Day ceremonies have taken place in the park.

Veterans Park: In its long history, the park has been inherently linked to the military, and a location to honour those who fought and those who lost their lives in war during Sarnia's annual Remembrance Day ceremonies. In October 1998, following a proposal by Mayor Mike Bradley, Sarnia City Council passed a motion endorsing that Victoria Park would be renamed "Veterans Park", to reflect the history of the park and as a way to honour those who served. On Remembrance Day 1998, the park officially became known as Veterans Park. Veterans Park has continually been a place for the community to gather to pay their respects, to remember and to honour those who served and those who made the supreme sacrifice.

Veterans Park Storyboard and Sign: In late 2015, a committee of volunteers led by Lou Giancarlo and Tom Slater, brought forward the idea of creating and erecting a storyboard in Veterans Park. With the full support of Sarnia 1st Hussars Association, along with the City of Sarnia, the committee along with sign-maker Ken Hall, designed a Veterans Park storyboard that was installed in the park in late October 2016. The storyboard provides a brief history of the park itself, and information on all of the military artifacts in the park. Along the bottom portion of the storyboard are eight photographs representing the wars commemorated on the memorials to the fallen in Veterans Park—the Boer War, World War I, World War II (Army, Navy and Air Force), Korea and Afghanistan. In the top left corner of the storyboard is a photograph of the park in 1900, taken during a “Welcome Home to Our Boys” celebration, as local citizens welcomed those who returned from the Boer War. In the top right corner of the storyboard is the maple leaf/poppy logo designed for the cover of the 2nd Edition of this Project (logo by Sarnia-born artist Bennett Slater). The design of the maple leaf is based on the same maple leaf emblem that is engraved on the gravestones of thousands of Canadian soldiers buried in locations all around the world. The poppy is the widely recognized international symbol of Remembrance, and is used as a tribute to those who laid down their lives in the service of their country during war and military operations.

In August 2018, a new Veterans Park sign was added to the Park. Created by Dave Beatty and paid for by Communities in Bloom Committee, the City of Sarnia designed the landscaping that surrounds it.

• **THE “BIG TOM” CANNON:** Sarnia’s Market Square, now called Veterans Park, has been around since Canada’s Confederation in 1867. In 1869, an old cannon, a British-made “32-pounder” originally nicknamed “Long Tom”, was placed in the park.

Manufacture: Walker and Company of Rotherham, Yorkshire, England manufactured the “Long Tom” cannon sometime before 1820. Brothers Samuel, Jonathan and Aaron Walker, along with their brother-in-law, John Crawshaw, established their small iron making business near Sheffield, England in 1741 before moving it to Masborough, Rotherham in 1746. The new site enabled them to take full advantage of a nearby canal system, with access to the sea and nearby waterways. In those days, before the development of railway systems, the only feasible method of regular transportation for large volume, heavy iron products was by ship. By 1771, with access to both coal and iron ore in the vicinity, the company was making iron bridges and began the casting of more iron guns, and the new business of Messrs. Samuel Walker & Company quickly blossomed. With a labour force of nearly 1,000 men, Rotherham was, for a time, the main producer of cannons in the United Kingdom.^{5S, 5T, 5V}

Walker cannons were made of cast iron and, being a one-piece unit, they had to be cast in a single pour into an upright mould. Successful castings were left to cool a number of days, and then workers bored them to the correct calibre and drilled touchholes (vents). The weight by which the cannons could be identified was a reference to the size of standard shot that could be fired from the barrel; for example, 2,6,9,12,18,24 and 32 pounders. The cannons were supplied to both land and sea services where they were fitted to carriages, ranging from all cast iron parts for land garrisons and to all wood parts for sea service. Beginning in 1781, manufacturers received a steady order for

guns along with ever increasing demands for improved quality due to the development of ever more powerful gunpowders. By 1795, they were making something like 22,000 cannons a year. Production was carried on in Rotherham until 1820, when the Walker Company then moved its cannon manufacturing to Staffordshire, England.⁵⁵

Sarnia's "Big Tom" Cannon - November 2015

Firing: In the midst of battle, successful gunners required a disciplined firing routine. A crew of from 6-men up to 14-men, were responsible for the firing of each cannon. Using special instruments, special gunners first cleaned the bore of the cannon using a wet swab and then drying it, cooling the barrel and extinguishing any embers from a previous firing. Then other gunners placed in the barrel the pre-packed gunpowder charge (cartridge), the shot and the cloth wadding, each of which were rammed into the muzzle of the barrel. Simultaneously, the gun captain pushed a wire spike down the touchhole (vent) so as to pierce the flannel-lined cartridge; then priming powder was poured into the vent. The gun captain would then point the gun with the help of other gunners on each side, and by using ropes and tackles to move it to its forward position. With the loaded gun in the forward position, the captain, standing safely beyond its range of recoil, pulled the lanyard to fire the flintlock mechanism, creating a spark that, in turn, ignited the priming powder which in turn set off the main charge, and the shot was propelled forward. The explosion in the barrel hurled the shot out of the gun and on to the target. In the heat, smoke, noise, and smell the massive counter force caused the cannon to move backwards (recoil). If unrestrained, a 3-ton gun with a full charge could recoil over 50 feet. The Royal Navy trained their artillery crews hard and well, and could reload the guns in 90 seconds. According to the long standing authority "The Artillerist's Manual and British Soldier's Compendium" by Major Frederick A. Griffiths (1856), a 32-pound cannonball fired on level ground from a 56-cwt SBML at six degrees elevation, and propelled by a full 10 to 11 pound gunpowder charge, had an extreme range of 2,160 yards. There would be many variables effecting this maximum range: less elevation meant less distance; weight of shot varied up to ten percent affecting the range; the quantity and quality of the gunpowder used; and the wear and windage in the barrel also played a role in distance and accuracy. The Royal Navy preferred to close to about 200-300 yards before engaging with the enemy.^{55, 7L, 2f}

Identification: "Long Tom" is a Blomefield SBML 32-pounder 56-cwt cannon, cast by Samuel Walker & Company in Rotherham, England sometime between 1787 and 1820. Blomefield refers to Thomas Blomefield who was appointed England's Inspector of Artillery and Superintendent of the Royal Brass Foundry in 1780. He condemned many new artillery pieces as unsuitable before they were sent to the army or navy, and developed an improved standard for the manufacture of big British guns. Around 1783, he began experimenting with the design of artillery pieces. By 1787, cast iron guns of Blomefield's own design were being produced, with alterations to the previous (Armstrong) design. Blomefield design changes included; decorative features at the cascabel were done away with ensuring a uniform thickness of metal and making the breech more rounded, and the addition of a ring, a "cascabel loop", at the breech end of the barrel. This was used to improve the free movement of ropes used to restrict the cannon's recoil aboard ships. On earlier cannons, ropes were wrapped around a knob on the breech end, which were prone to slipping off. SBML stands for smooth-bored muzzle loading, which means that the cannons were loaded with shot from the muzzle. 32-pounder refers to the size of shot fired, in this case, a 32-pound cannonball (just over six inches in diameter). The 56-cwt refers to its weight; cwt stands for Hundredweight (old Imperial

measure), meaning the Big Tom barrel weighs slightly over 3 tons. The barrel is approximately ten feet long. Identification of “Long Tom” as a Walker Company cannon, manufactured in Rotherham, is based on the special marks placed on it during the casting process: on the end face of the left trunnion is the mark ‘WCo’ which stands for Walker and Company; on the end face of the right trunnion is the casting number 375; on the top of the barrel is an embossed crown above a stylized mark of a 3, G and R entwined (this stands for '3 George Rex' and is the royal symbol of King George III who reigned between 1760–1820); and also on the barrel is a broad arrow stamp signifying British government ownership. After 1820, Walker cannons were produced in Staffordshire and bear a George IV cypher (George IV was the eldest son of George III).

‘3 George Rex’ symbol

Walker and Company mark on left trunnion

The Sarnia cannon is mounted on a concrete field carriage (not the original carriage) with iron wheels. A small metal plaque is on the carriage located below the cascabel (the breech end of the barrel). It has the engraved markings No 1519 and 6.12. It is believed that this plaque is not connected to “Long Tom”, but is the mounting plate that held the base of the elevating screw on a field carriage—the other end was attached to the cascabel. The No. 1519 may have been the carriage number. Although not located on “Long Tom”, other markings often found on this era of cannon included: the weight of the gun in Hundredweights, Quarters and Stones (the old Imperial Measure), located usually on the lower part of the cascabel of the barrel; and occasionally, various notches in the barrel, these being used by the gunners for the purpose of ranging the gun onto its target.^{50, 5S, 5U, 2f}

Weapons of War: Walker Company cannons were manufactured for naval and garrison use and were scattered around the world. Most notably, they were used by the British Royal Artillery and the British Royal Navy in the American War of Independence (1775-1783); by the Royal Navy on Lord Nelson’s flagship *HMS Victory* in the Battle of Trafalgar (1805)—in fact, 80 of the 105 guns aboard the *Victory* were Walker and Company of Rotherham cannons; and by the British during the Crimean War (1853-1856). The Crimean War was the world’s first “media war,” with extensive reporting on the battles. Not only did Canadians follow the reports in newspapers, but several thousand Canadian volunteers served in British units. Lieutenant Alexander Dunn of York (Toronto) received the first Victoria Cross awarded to a Canadian for his part in the infamous “Charge of the Light Brigade” at Balaclava in 1854. In Halifax, a monument was erected in 1860 in memory of two Halifax men who perished during the war. It is the only Crimean War monument in North America.

During “Long Tom’s” history in Sarnia, rumours abounded that it was used against the Russians in the Crimean War, even being nicknamed locally the “Sevastopol cannon”. The Siege at Sevastopol (October 1854-September 1855) was the culminating struggle by the British and French against this strategic Russian base on the Black Sea and was the final episode in the Crimean War. After the war, Queen Victoria and the British Government decided to distribute many of the captured Russian cannons and British cannons (some copper, most iron) across the British Isles and her Empire; therefore, Australia, New Zealand and Canada received them as memorials of the allied victory in Crimea. Some of the guns were melted down to make other forms of memorials. Another use for the captured brass cannons was to provide metal for the new order of valour, the Victoria Cross, instituted in 1856 by Queen Victoria, and first awarded to meritorious Crimean veterans. During the Second World War, many of the Crimean War cannons would fall victim to the government’s drive to collect scrap metal.^{5S, 5T, 5V, 5W} Whether Sarnia’s

“Long Tom” was ever used against the Russians in the Crimean War is unknown, but it is relatively unlikely; however, it did manage to avoid the fate of being smelted as scrap in World War II.

Nickname: Over the countless years of military history, many artillery pieces have been nicknamed “Long Tom”. The origin of the nickname “Long Tom” was derived from the British forces. During the time of Queen Elizabeth I’s reign (1558-1603), the Royal Gun-founder from 1584 until 1595 was Thomas Johnson. The Royal Gun-founder was responsible for all armaments manufacture, ammunition proofing and explosives research for the British forces. During this time, warships—naval and privateer—usually had one or two long, heavy guns mounted on a swivel at the ship’s bow to act as a chase gun, with shorter, lighter guns along the broadside. In the days when guns were denoted by their range, the chase gun became the “Long Thomas”, after the Royal Gun-founder. During the Second Boer War (1899-1902), the Boers used several French-built 155-mm Creusot field guns against the British that outranged any field artillery the British possessed. The British forces nicknamed the Boer long barrel guns “Long Toms”. The British had other nicknames for the Boer War artillery, including “Fiddling Jimmy”, “Puffing Billy”, “Silent Susan”, “Bloody Mary”, “Lady Anne”, and “Long Cecile” (after Cecil John Rhodes, a governor of the Cape Colony). The term “Long Tom” became a generic identification for any long barreled cannon with long range, with no attachment to calibre. Today, one of the pieces most often associated with this nickname is a long-barrel towed 155-mm Long Tom field gun that was used by the United States military during World War II and the Korean War.

From the moment the historic cannon was brought to Victoria Park (now Veterans Park) in Sarnia, it was nicknamed “Long Tom”. When there was talk of smelting the cannon to support the Second World War effort, the *Sarnia Observer* in a May 1942 article referred to the Victoria Park cannon as “Big Tom”, a name “conferred on it a half a century ago by the boys who played around and on it”. After that, local media continued to refer to the cannon as “Big Tom”, a name that seemed to stick.^N

Cannon comes to Sarnia: The “Long Tom” cannon came over from England to Canada for defence purposes during the time of the Fenian uprising. The threat of a Fenian invasion from the United States was so serious to the colonials in the area that a garrison of militia volunteers was stationed in Point Edward. To supplement the garrison, the Upper Canadian government purchased several small vessels to defend the Great Lakes. “Long Tom” would end up on one of these boats, one that was constructed in Sarnia in 1859. The boat, originally christened the *Michigan*, was built as a rail ferry for use in Sarnia-Port Huron by the Grand Trunk Railroad, but was later converted to a steam powered passenger tug in 1862. At the height of the Fenian crisis in 1866, the *Michigan* was chartered by the Provincial Gunboat Service (British government) and refitted for use as a 288-ton gunboat as part of the system of defence of the Great Lakes. The British gunboat was renamed the *Prince Alfred* after Queen Victoria’s second son and, in 1866, along with the *Cherub*, and *The Rescue*, went into duty patrolling the Great Lakes waterways. The *Rescue*, a steam powered tug converted to a gunboat, was based out of Toronto. She briefly had a 32-pounder cannon mounted on her main deck, but after experiencing a heavy storm in June 1866 off Port Stanley where the cannon threatened to break loose, the ship was rearmed with smaller Armstrong ship guns (9 and 12-pounders).

Prince Alfred was the largest of the Dominion gunboats, with a crew of 5 officers and 47 crewmen. Along with patrol duty from the Niagara River and Windsor to Port Sarnia and into Lake Huron, the *Prince Alfred* was also used as a training ship for gun drills for artillery units including the Sarnia Battery. Between 1867 and 1871 the *Prince Alfred* was stationed in the Goderich (Ontario) harbour. At various times, the vessel was equipped with different artillery pieces including two “Armstrong” guns and four brass “howitzer” guns. When the Fenian threat subsided, one of *Prince Alfred*’s cannons was moved off the boat, retired and stored in the Military Reserve base in Point Edward.

In 1869, two years after the nation’s Confederation, the retired cannon, reportedly “reposed near Point Edward, partly covered by sand and underbrush” was purchased and brought to Sarnia, and placed in the west end of Sarnia’s Market Square Park (now Veterans Park) facing east.^N The cannon was the lone occupant of the park. Part of a (*Sarnia*) *Observer* report from late June 1869 stated; *The big gun, which was expected to be here for use on Dominion Day, but failed to put in an appearance on time, arrived in town on Tuesday last and has been placed on the south ward Market Square, there to remain permanently. It is a ponderous looking instrument, some nine feet in length, and by way of distinction, we propose that HE shall be known in the future as “Long Tom.” It is expected that when he speaks that he will cause the south ward to quake to its centre.*^N The final fate of the *Prince Alfred* is unclear. One source reports that she went aground in Lake Huron near Point Edward in 1874, yet she was for sale by the government in March 1875 (while lying in Sarnia); another source reports she was sold to a Detroit concern and

converted into a tug; another source reports that she was broken up in 1885; and another source reports that she “passed out of existence” in 1894.^{N, 5X, 5Y, 7N, q, t}

In the early 1940s, the federal government, as part of a nationwide scrap and metal drive during World War II, suggested that the “Big Tom” cannon in Victoria Park be smelted down for the war effort. In a concerted effort, local Sarnia residents fought back against the government, saying the cannon didn’t belong to Ottawa because it had been in Port Edward/Sarnia about the time of Canada’s Confederation.^N

The “Big Tom” cannon has a long history in Victoria (Veterans) Park and was witness to many solemn events and patriotic celebrations. During both the Boer War and World War I, it was the only military artifact in the park, a tangible, hands-on reminder for family members of their sons/brothers/fathers who were overseas fighting a war. The cannon was witness to farewell services that took place in the park prior to the troops marching to the train station on their first leg to fight overseas. During both of these wars, it was in the park during church services when families gathered to pray for the safe return of their loved ones. It was there for celebrations like the “Welcome Home to Our Boys” celebration in 1900 and the “Armistice” peace celebration in November 1918. It was in the park during the first official Armistice Day (Remembrance Day) on November 11, 1919, honouring those who served, and witnessed many more Remembrance Day services afterward. The cannon was in Victoria Park for many other special events and ceremonies, including: when Prince Arthur, Duke of Connaught officially declared Sarnia to be a city in May 1914; when the cenotaph was unveiled in November 1921; when Sarnia had its Old Home Week celebrations in July 1925; when Sarnians gathered for the VE Day and VJ Day celebrations in May and August 1945; when Sarnians had their first Remembrance Day ceremony following the end of the Korean War in November 1953; and when the “new” Sarnia cenotaph was unveiled in November 1955.

Between 1959 and 1961, the “new” (and current) Sarnia public library was built while the old Sarnia Carnegie library (slightly east of its current location) was being demolished. In 1959, to make way for the construction work, and after residing in the Victoria Park for over 90 years, the Sarnia Parks Department moved the “Big Tom” cannon to the north end of Canatara Park, in the area of two anchors (that are still there).

“Big Tom” would remain in Canatara Park until early November of 2015. Thanks to a dedicated committee of volunteers led by Lou Giancarlo and Mike Banovsky (MPB Industrial), that also included Tom St. Amand, Tom Slater and Randy Evans; and with the endorsement of Sarnia City Council, the “Big Tom” cannon was returned to its rightful home in Veterans Park. Mike Atkinson of Atkco Cranes donated the time and equipment in order to make the physical move possible. The “Big Tom” cannon was returned to Veterans Park in time to witness Sarnia’s 97th Remembrance Day ceremony in the park.

Returning home - November 2, 2015

Retired Canadian Army Lieutenant-General Andrew Leslie wrote the following in the Preface of Harold Skaarup’s book “Shell Drake: Canadian Artillery Museums and Gun Monuments”; *When guns become old they do not always fade away. In hundreds of cases they are carefully mounted and preserved as displays and memorial symbols, a tangible link to the thousands who fought our wars and paid the ultimate price... It is important to recognize and remember the importance of the people and equipment that defended our nation forward and were present at all of the key turning points in history...the guns that served, and are preserved in Canada, serve as a window into our past while reminding us that there is a price to pay to preserve our society and values, and gunners and their guns have always done their duty.*

- **THE BOER WAR MEMORIAL FOUNTAIN:** In 1902, a contingent of veterans of the Boer War came to Sarnia, from Windsor, Ontario, with the express purpose of creating a monument to commemorate those men from Lambton County who had served in the Boer War (1899-1902). In January 1902, at a meeting held in Sarnia, the South African Club, comprising Windsor men who saw service in the Boer War, opened subscription lists for funds for a memorial for their fallen comrades. Public collections would be supplemented by the proceeds from a number of concerts to be given, with the goal to raise \$1,500 for the purpose. It was suggested that the memorial would probably take the form of a public drinking fountain to be located near the post office.

The Boer War Memorial Fountain was erected in Victoria Park in 1908, having been made possible through donations by both citizens and school children of Lambton County over a six-year period. Around 1960, the memorial was moved and slightly damaged during the demolition of the original Sarnia Carnegie Library. It was later repaired and in 1998, received heritage designation. The names of the men from Lambton County who served in the Boer War are engraved on the cap of the monument. Also engraved are the South African locations where they served. The Memorial lists sixteen men from Sarnia and Lambton County who participated in the South Africa War of 1899-1902. Of the sixteen names on the Boer War memorial, only one man, Daniel Crone, died while serving.

Carnegie Public Library and the Boer War Memorial Fountain

- **THE I.O.D.E. MEMORIAL PLAQUE:** Located behind (north of) of the current Sarnia cenotaph is the I.O.D.E. Memorial Plaque. The I.O.D.E., the Imperial Order Daughters of the Empire, was a federation of women originally formed in January 1900 in Fredericton, New Brunswick to promote patriotism, loyalty and service to others. Chapters were formed in quick succession across Canada. In 1915, the Pro Patria Chapter and St. Clair Chapter were formed in Sarnia. Other local chapters were formed in 1929, the Sir John Colborne Chapter; and in 1935, the Honourable Alexander Vidal Chapter. In April 1938, the four local chapters received a charter for the formation of the Municipal Chapter of Sarnia. In October 2019, the IODE Sarnia-Lambton Municipal Chapter, to commemorate its 80th anniversary, donated a beautiful bench located near the cenotaph and IODE Memorial Plaque in Veterans Park.

Since its inception, in times of war this patriotic women's charitable organization has funded food, clothing and medical supplies for troops and prisoners of war; donated relief supplies for victims of war; built and run hospitals; raised money for ambulances, hospital ships, a Bolingbroke bomber and a fighter aircraft; established libraries, canteens and accommodations for servicemen; and "adopted" ships. In Sarnia, the IODE adopted *HMCS Mahone*, an RCN Banger-class minesweeper with a crew of eighty-three. In peacetime, IODE members volunteer with and for people, focusing on children, education and community services working to improve the quality of life for those in need.^{10W, 10X}

The IODE Memorial plaque in Victoria (Veterans) Park was donated to the original Carnegie Library in November 1928 by the local Pro Patria (For Country) chapter of the I.O.D.E.. The plaque's first home was in the foyer of the Carnegie Library, which stood until 1961, very near the location where the memorial plaque now sits.^N The plaque reads: "TO THE MILLION DEAD OF THE BRITISH EMPIRE WHO FELL IN THE GREAT WAR AND OF WHOM THE GREATER PART REST IN FRANCE."

In November 2019, the plaque was cleaned and restored as part of a Sarnia Historical Society and Sarnia Royal Canadian Legion project to refurbish and add names to the Sarnia cenotaph.

I.O.D.E. Memorial Plaque

• **THE CITY OF SARNIA CENOTAPH:** After the Great War, across the country, citizens who could not grieve at the graves of their loved ones, felt the need to commemorate their dead in their own way. Prominent citizens, patriotic groups, veterans and family members of the fallen came together to erect cenotaphs and memorials in their villages, towns, and cities to those men who had left and never returned. Citizens, groups and politicians suggested and discussed a wide variety of possible ways to honour and pay tribute to those in the community who had sacrificed. Memorials included arenas, schools, veterans buildings, hospitals, libraries, sports fields, stadiums, playgrounds, fountains, stained glass windows, parks, streets and highways, gardens, walkways, gates, towers, statues, plaques, dedicated military artifacts, memorial walls, commemorative books, and of course stone monuments.

Hundreds of monuments were built in the 1920's, and while their size and scale varied, they often shared similar characteristics: local fundraising paid for the monuments of stone; a Canadian uniformed soldier adorned it who was standing at attention, or with an arm raised in victory, or marching forward; and the names inscribed almost always signified only the fallen—not all the soldiers who had served or even those who had been wounded (the latter was not the case in Sarnia). The bereaved of the Second World War reacted similarly, with new memorials, or rededications of older memorials, new names and dates added. Again, funding for most of these memorials was by public subscription, a national grassroots movement to ensure the sacrifices would not be forgotten.^{4G}

Sarnia was no different than hundreds of other Canadian communities after World War I. Many ideas were discussed locally on how to pay tribute to those who sacrificed before deciding to build a cenotaph. Sarnia's original Great War cenotaph would differ from the norm in that more than those who had fallen were honoured.

Plans to create a memorial to Sarnia's fallen of the Great War had begun in November of 1918. Alderman Sanders and "The Great War Veteran's Association of Sarnia" were leaders in this campaign. From the *Sarnia Observer*, November 21, 1918:

The Imperial City Will Erect a Memorial to Its Sons Who Rest Yonder

Sarnia will in the near future open a subscription list to the general public for the purpose of securing adequate funds for the erection of a suitable memorial to the Imperial City's fallen heroes, who sleep where the poppies grow in Flanders. Whether this memorial will be in the form of a monument or in the form of a building is not yet known, but it would seem that the people as a whole will be consulted in the matter.

Much debate ensued as to what form the Sarnia memorial should take. There were public meetings at City Hall with discussions and proposals on the issue. The planned memorial was to be paid for by ratepayer donations, and it was vital that it be a fitting tribute and a lasting credit to the city. Many suggestions were made for "a suitable monument for the brave boys of the city, who paid the supreme sacrifice and lie under French soil."^N One proposal was to purchase a new park site and plant oak trees, with a metal plate with the name engraved for every fallen soldier from the city. Many desired some type of community building, with a suitable monument or statue erected in front of the building. Some argued that a "Veteran's home" would not only commemorate the city's fallen heroes,

but also benefit the entire community, including returned soldiers, and the wives, mothers, dependents and sweethearts of the soldiers. This community soldiers' home would include, possibly, a swimming pool, along with billiard tables, meeting rooms, a library, all of which would be useful for future generations of the community. Others in the community felt that erecting a more traditional monument would be a better way to honour the fallen heroes.

Mrs. Irene McMullin of Sarnia, a divorced mother who had lost her only son in the Great War, wrote a letter in late November of 1918 to the editor of the *Observer* as to why she felt it should be a monument. She was one of thousands of Canadian families who were forced to grieve without a body, or without an expensive overseas visit to a grave, thus unable to achieve the closure that was so important to those who had never had a chance to say a proper goodbye. Her son's information, nineteen-year old Private Leonard Calvin McMullin, is included in the World War I section of this Project on page 335. Following is Mrs. McMullin's heartfelt letter;

Editor Canadian Observer

Dear Sir,

May I speak for my boy? He is sleeping somewhere in France. I do want to tell you what I believe would please him, could he but speak. For some years prior to enlisting in Lambton's 149th O.S. Bn., he had taken great pleasure in the public library and the park surrounding it (Victoria Park) and since a memorial to the boys who will never return has been under discussion, my greatest comfort has seemed to centre there, and always I can picture to myself a monument of suitable design, bearing the names of all our city's fallen heroes, their graves beyond the reach of loving hands to tend and care for, with no mark save a temporary wooden cross.

Reader, have you a boy sleeping over there? If so, does not the little white wooden cross seem a frail thing? And many of our precious boys have not even that much. A granite monument would be a memorial which would withstand the elements for many generations to come and in that way would perpetuate their names as nothing else could. Also it would be something which the residents of our city and visitors as well, would have cause to admire and revere. Furthermore, if this proposed memorial to the boys who have lost their lives should take the form of a home, or a Y.M.C.A. or Y.W.C.A., it would be natural for the original motive to be lost sight of, within a few years.

There are already associations formed for the purpose of bringing comfort and pleasure to the returned heroes. We feel that they can never be fully repaid for their sacrifices and services for humanity. They are deserving of as good as can be produced, but our city and country are prosperous and wealthy, and can well afford to give our beloved dead a separate memorial.

In the years of the future, when one by one our returned heroes have gone to their reward in the Great Beyond, their earthly remains laid to rest beside their father and mother, perhaps, their names and record engraved upon the family monument, or possibly a gravestone of their very own (not only they but you and I together with all others who have known and loved and been loyal to our faithful armies) this proposed granite monument would still stand firm ever beaming the message of peace on earth.

The little white wooden crosses over there seem to send us the message "Do not forget us," though only wrapped in a blanket, perhaps and buried khaki clad, in a soldier's grave.

Thanking you, Mr. Editor for space and patience, I am

Yours truly,

The Mother of One, Mrs. Irene McMullin, 466 Davis Street.

In April of 1921, the site for the memorial monument had been chosen, on the west end of Victoria Park, near Christina Street. Actual work on the construction of its foundation began that same month. The monument comprised a large granite foundation that supported a huge rectangular granite block weighing several tons placed on top, with several bronze tablets bolted on its sides. On each tablet would be enscrolled the names of Sarnia soldiers who paid the supreme sacrifice, as well as the names of all Sarnians who served with the Allied Forces during the Great War.

The planned unveiling was originally to be on Dominion Day, July 1st, 1921; however, the unveiling was delayed when Sarnia Mayor George Crawford visited the Toronto plant of William A. Rogers Company (later F.G. Tickell and Sons) in June of that year and learned that the bronze tablets being prepared there would not be ready in time. Though the stone monument had been in position in the park for some months, the unveiling was postponed until Labor Day, September of 1921, but again, the tablets were not yet completed on that date. In late September of 1921, Mayor George Crawford proposed that the planned unveiling would take place on November 11th, 1921, the

third anniversary of Armistice signing ending the Great War. At some point after that proposal was made, the unveiling date was changed again, this time to Monday, November 7th, Thanksgiving Day, 1921.

Unveiling: The Sarnia Cenotaph Memorial, erected by the citizens of the City of Sarnia, was officially unveiled in Victoria Park by Mayor George Crawford on Thanksgiving Day, November 7th, 1921. (On the actual cenotaph, the date of unveiling is inscribed as November 11th, 1921). At the time of its unveiling, the rectangular stone monument had three bronze tablets fastened to the stone. On one tablet, on the west side of the memorial, were inscribed the names of sixty Sarnia men who paid the supreme sacrifice. On two larger bronze tablets (attached to the memorial's front and back) were the names of over 1,000 Sarnians who served with the Allied forces during the war.

The statue of the soldier that sits atop the current cenotaph was not part of the original cenotaph. The three original bronze tablets are now located on the outside west wall of the Royal Canadian Legion, Branch 62 on Front Street.

Committees from veterans' organizations and the city council had planned the details of the November 7th unveiling ceremony. The ceremony was preceded by a parade from city hall to Victoria Park. The parade included city officials, relatives of the fallen, members of the Chamber of Commerce, various military units, a firing party, the citizens band, wreath bearers, ex-service men (uniformed and ununiformed), a machine gun company, Collegiate cadets, and troops of boy scouts. Over three thousand citizens witnessed the dedication and unveiling.^N

On a cloudy, chilly Monday morning of November 7th, 1921, the **unveiling ceremony** began with the parade participants leaving city hall at 10:30 a.m. en route to Victoria Park. At the park, the units took up their positions around the monument and the relatives of the deceased and civic officials took their seats reserved for them. A huge crowd of spectators encircled the group. Alderman J.C. Barr, chairman of the memorial committee, opened the ceremony. Rev. Monsignor J.T. Aylward of Our Lady of Mercy Church and Rev. R.H. Barnby of Parker St. Methodist Church followed with hymns and prayers and Venerable Archdeacon Carlisle of All Saints Church in Windsor gave a dedication.

Monsignor Aylward stated that on such an occasion one is filled with sentiments of various kinds, but the first thought must go to the wives and mothers of the noble heroes whose bodies lay far away. Canada was made a nation, he declared, by the valour of her boys, and to them is owed a debt of gratitude that can never be sufficiently paid. He also referred to the work carried out by the women of Canada during the war and praised the spirit of self-sacrifice that they displayed. Rev. Barnby stated that the monument stands as a tribute to unselfishness and expressed the hope that it would recall to those who pass it from day to day the unselfishness of heroic deeds of men who lived and died for the Empire. After referring to the fine response of all Canada's sons in his dedication, Ven. Archdeacon Carlisle touched particularly on the magnificent war record of Sarnia, an accomplishment of which Sarnia's citizens should be proud. He declared that memorials stand for two things: inspiration in a glorious and noble past and a challenge for the days to come, a challenge for unity and service.

Before carrying out the unveiling, Mayor George Crawford gave a brief address. A glint of sunshine burst through the hovering clouds an instant before he released the flag that shrouded the monument, exposing the granite column with its bronze tablets. This was followed by the placing of wreaths around the base of the monument as the band rendered the "Dead March"; followed by the discharge of three volleys by the firing party and the sounding of the "Last Post". While the crowd stood in solemn silence, teary-eyed, with bared heads, the ex-service men and uniformed ranks stood at attention. The National Anthem closed the ceremony and the parade re-assembled and marched back to City Hall.

Following is the address given by Mayor George Crawford prior to unveiling the Sarnia Cenotaph Memorial during the November 7th, 1921 ceremony:

Ladies and Gentlemen,

We are gathered together this morning for the purpose of unveiling this beautiful monument—the gift of the people of Sarnia to the loving memory of those brave boys who gave their lives in the defense of their King and their country—the cause of justice and liberty.

We have not forgotten those who left all and enlisted, whether in home or in foreign forces, to fight our battles. We have seen to it that the name of every man from this city that served his country in the great conflict is inscribed on the bronze tablets attached to the sides of this granite monument. No matter how much we do, I feel that we can never pay off the debt we owe those lads and their friends for their brave sacrifices.

In erecting this monument is a humble way we as a grateful people have undertaken to cherish the memory of our departed boys, and to hand down to succeeding generations the recognition of the noble deeds of those Sarnia boys that so bravely fought and died on the battle fields of Europe—that the homes of their loved ones might be safe and that a free country might be saved for them.

It is timely and thoughtful that the unveiling should take place on Thanksgiving Day. I feel personally that it is a great honour to have my name connected with the event. The committee responsible for the choosing of this substantial but simple design as a memorial are to be congratulated in their wisdom of choice and location. It is the hope and aim of the committee that another armistice day will see a handsome bronze or marble statue of a Canadian soldier mounted on top of this granite memorial.

At this time, also, it is not out of place for me to say a word or two recalling the splendid record made by our citizens during the war. You gave, you worked, and you prayed for the success of our arms. Your reward was victory. I now with a deep sense of pride, honour and humility—on behalf of the people of this city—unveil this monument to the memory of those who served their king and country well—who fought and bled and died, that the world might be made safe for all.

A side note on Mayor George Crawford: His grandson would lose his life in World War II. His 18-year-old grandson, Leading Aircraftman (LAC) George Crawford (of Ottawa), was killed instantly in August of 1944 on the last flight of his R.C.A.F. training course in Lindsay, Ontario. The training plane he was in was experiencing difficulties and he bailed out of it at too low a level. His body was found, with parachute unopened, in a farmer's field. Young George Crawford had family in Sarnia—J.S. Crawford, 148 South Christina Street and W.H. Crawford, 167 Queen Street—and he had visited Sarnia on a number of occasions.

The following is a portion of a report from the Tuesday, November 8, 1921 *Sarnia Observer*;
THANKSGIVING DAY IN SARNIA COLD AND DREARY

Thanksgiving day in Sarnia, although the weather was fine was a chilly affair. There was a cold wind blowing and rain clouds hovered overhead all day. There was a constant threatening of miserable weather that marked Sunday. In the city most of the diversion was confined to the theatres. Crowds attended the Griffin for the performance of the Arlie Marks Stock Company in the afternoon and evening, and there was too the great attraction of Hullo Canada at the Imperial theatre, with the usual holiday crowd at the Crescent for the movies. A large number crossed the ferry to Port Huron where there was no holiday.

The feature of Thanksgiving Day in Sarnia of course, was the ceremony of the morning in which hundreds turned out to witness the unveiling of the monument in Victoria Park and the attendant ceremonies. In the afternoon there was an exodus of football enthusiasts to Petrolia, where Sarnia went down to an unexpected defeat before at least a thousand of their supporters...

In July of 1922, Mayor George Crawford endeavored to secure a suitable soldier's statue to be placed on the top of the memorial stone monument in Victoria Park. He received photographs of several designs modeled in bronze and took the matter to the War Chest Committee to discuss financing the purchase of the figure.

The selected **bronze statue** that stands atop the Sarnia Cenotaph depicts a Canadian "Tommy", a man in the full uniform worn by Canadian soldiers in the First World War. The soldier stands stiffly at attention, with rifle strapped over his left shoulder, eyes fixed indeterminately at some point on the horizon. The bronze soldier statue was sculpted in 1921 by F.G. Tickell and Sons (formerly William A. Rogers Limited) of Toronto. This was the same company that created the bronze plaques that were bolted to the original Sarnia cenotaph the year before.

In the years immediately after the Great War, a number of entrepreneurs rose to the challenge of meeting the flood of demand from communities across the country for monuments to their fallen soldiers. Three of these, all based in Toronto, were the giants in the market. They were the McIntosh Granite Company, the Thomson Monument Company, and William A. Rogers Limited, which later morphed into F.G. Tickell and Sons. Other Rogers-Tickell bronze statues similar to the Canadian "Tommy" that sits atop the Sarnia cenotaph can be found in St. Thomas and in St. Mary's, Ontario, and Wolfville, Nova Scotia.⁸²

Rededication: On November 11, 1922, after a solemn parade left city hall and travelled to Victoria Park, the Sarnia Cenotaph Memorial, with its new bronze symbolic statue, was rededicated/unveiled. The parade included civic and Point Edward officials, the Citizens Band, the Imperial pipe band, the Salvation Army band, a firing party, war veterans in uniform, military units, Collegiate cadets, members of the machine gun brigade, American veterans

from Port Huron, boy scouts, and the Ladies Auxiliary of the Great War Veterans' Association. Captain Rev. A.R.C. Garrett of Forest, who had lost two of his brothers in the war, dedicated the memorial with these words: *"To the glory of God and in loving memory of those from this city who gave their lives for God, for King and for country, I unveil this memorial."* With those words, in a bittersweet moment for Captain Rev. Garrett, he tugged at the rope that held the enveloping flag, unveiling the bronze statue on the soldier's memorial.

On the east side of the granite block was also attached a new bronze tablet bearing the names of forty-two Sarnia men who had died in the Great War, but had been inadvertently omitted from the original tablets. Adding to the solemn and impressive ceremony of remembrance, on the fourth anniversary of the Armistice, were hymns, prayers, the laying of wreaths, a salute by the firing party, a sounding of the "Last Post" and the singing of the National Anthem.

The four bronze tablets from the original 1921 and 1922 Sarnia cenotaph are now located on the outside west wall of the Royal Canadian Legion, Branch 62 on Front Street. The names on the bronze tablets have been transcribed and are included in this Project on page 1159.

Sarnia's World War I Cenotaph (post Nov. 1922)

with the "Big Tom" cannon in foreground

On the evening of November 11, 1922, Memorial Park was handed over to the Village of **Point Edward** and a memorial was unveiled. Nearly three hundred people assembled to witness the ceremony. Chairman James Hambleton of the Service Club handed over the park to Reeve Darbyshire, who accepted on behalf of the council and the village and thanked the soldiers for their gift. In acknowledging the sacrifice made by the boys who had gone overseas leaving their homes and families, Reeve Darbyshire stated, *"Through their effort, we still stand as free men. Mothers, teach your children of their deeds. Make them understand what the Memorial stands for. Let them know the price at which our freedom was bought."*

The memorial had been fashioned in the village and made possible by the united efforts of the veterans, the council, and the people of Point Edward. In the spring of that year, April 1922, then Governor-General of Canada Lord Julian Byng along with his wife Lady Byng, had made a brief visit to Sarnia and Point Edward. It was during that visit that he laid the cornerstone of the Point Edward memorial. More information on Lord Julian Byng's visit to Sarnia and Point Edward is on page 152.

World War II: Just twenty years after the end of the Great War, World War II would begin. Even before the end of World War II, citizens discussed and proposed the creation of some kind of War Memorial for the City of Sarnia to acknowledge the local returning soldiers and to commemorate the local fallen of the Second World War.

George Stirrett, a local World War I hero, made a proposal in the fall of 1944 that gained a lot of attention. Stirrett, who had been awarded the Distinguished Conduct Medal and the Military Medal during the Great War, proposed the building of a Civic Centre, combining an arena, a Y.M.C.A. and a cultural centre, which would include the public library and an art museum all in one memorial. The Athletic Park was considered the ideal site for such a

Centre with the idea that the citizens of Sarnia could raise the necessary funds to build such a Centre. Sarnia Mayor W.C. Hipple was not in favour of such a combination-in-one memorial on the basis that such a centre could not be operated by a civic commission. More information on Lieutenant George Stirrett is on page 131.

May 8, 1945 was declared V-E Day (Victory in Europe). During that same month in Sarnia, concerned individuals met often to discuss proposals on a municipal war memorial for the city and eventually suggested possible ways to perpetuate the sacrifices of the sailors, soldiers and airmen of World War II. Mayor W.C. Hipple, chairman of the Foundation Committee for the War Memorial, released three specific proposals that had been presented to the Committee:

- > a general purpose auditorium to be located adjacent to Athletic Park (with facilities for hockey, skating, and other sports, as well as music, meetings and exhibitions).

- > a memorial recreational centre composed of a park, playing field area (football fields and baseball diamonds) and a recreational building (the nucleus would be an ice arena with a capacity for up to 5,000 people). The auxiliary section would contain meeting places and clubrooms for youth and adult groups and could accommodate expansion to include a gymnasium. To obtain the necessary amount of land, the memorial would be located just outside the present city limits, preferably on the east side of East Street in the vicinity of George Street. This proposal was submitted by the local branch of the Chemical Institute of Canada.

- > a War Memorial Library Building which would be located on a landscaped site, such as Victoria Park, and be close to city hall, to businesses and to shops. It would include an enlarged free public library, a small auditorium, an art gallery and local history room, and hobby and study rooms. The building would also include a small and dignified chapel to the memory of the men and women who gave their lives in the war. This proposal was submitted by the Sarnia Public Library committee.

Two months later, the Sarnia Canadian Legion forwarded another proposal to the Foundation Committee: a memorial park which would include a formal garden and cenotaph, with buildings suitable for cultural education, exclusive of a rink, erected on an area between forty and fifty acres.

That was followed shortly after by the Canadian Legion and Canadian Corps Association branches in Sarnia recommending that no plan should be approved until a majority of their members returned from overseas and had a chance to express their opinion. With the views expressed by the veterans' organizations, the Foundation Committee for the War Memorial resigned.

At the conclusion of World War II in mid-August of 1945, plans to erect a suitable memorial in Sarnia to those fallen soldiers continued. The planning was re-kindled in 1946, with the Sarnia Memorial Committee. Committee members included representatives from the Canadian Legion (Sarnia branch 62), the Canadian Corps Association (Sarnia branch 10), and a Next of Kin Committee. This Committee of interested citizens began by compiling a list of local men who had made the supreme sacrifice in World War II. The list of fallen soldiers from World War II that appears on the Sarnia Cenotaph was originally compiled by the Sarnia Memorial Committee, and was first published in the *Sarnia Canadian Observer* under the heading "Names of Dead Servicemen", in the August 26, 1946 issue.

Not long afterwards, plans for the memorial were aborted, apparently for "several reasons".^N One committee member pointed out that veterans of the First World War had been given \$103 by the city on their return from battle (the Soldier's Civic Gratuity Fund), yet the city had given no recognition to World War II veterans.

Five years after the war ended, in April of 1950, Canadian **Prime Minister Louis St. Laurent** visited Sarnia and was surprised that the city had no cenotaph dedicated to Second World War fallen soldiers. In October 1950, Mayor W.C. Nelson, Aldermen Paul Blundy and Iven Walker, and representatives of local veterans' organizations in the city (Canadian Corps Association, Canadian Legion and Sarnia Wing 403 Air Force Association) formed a committee to plan for some type of Sarnia Second World War memorial.

Suggestions for a Sarnia WWII memorial included an annual bursary to further the education of some son or daughter of a Second World War veteran, and a park or playground of some form for children. In November of 1950, the committee approved a plan to erect a memorial in the form of a Lambton County Museum and a small chapel, which would be added to the Sarnia Public Library in Victoria Park. Nothing ever came of this project and the committee ceased to operate.

In October of 1952, led by the Sarnia Sappers' Club Association (the second largest veterans' organization in the city), pressure was put on city council and the veterans' organizations to restart their plans to erect a suitable memorial for Sarnia's Second World War dead. In January of 1953, the Sarnia Canadian Legion and Sarnia Sappers' Association combined their efforts to find ways and means of building a better war memorial.

The **Sarnia Memorial Committee** was credited with working to make the "new" cenotaph a reality. Its members included former Aldermen Alex Rapson, Alderman Harry Turnbull and representatives of the Canadian Legion Branch 62, the Sarnia Garrison, the Sappers' Association, the Royal Canadian Air Force, the Canadian Corps and the Naval Veterans. In November 1954, the Sarnia Memorial Committee, chaired by J.T. Owen, was continuing to seek missing data from the community on those who paid the supreme sacrifice in the Second World War for the new Memorial plaque.

The **"new" renovated Sarnia cenotaph** in Victoria Park, (which is the one that currently sits in what is now called Veteran's Park) was re-dedicated on November 11, 1955, more than ten years after the conclusion of World War II. The renovated grey granite monument had been enlarged by the addition of two new "wings", on which were inscribed the names of Sarnia's fallen soldiers from World War I, World War II along with a plaque with the Korea War fallen. The four prior existing bronze tablets had been removed and are now located on the outside west wall of the Royal Canadian Legion, Branch 62 on Front Street.

The **November 11th, 1955 re-dedication ceremony** was preceded by a parade consisting of civic, military and veteran units marching from city hall to Victoria Park. Places of business in town were closed from 10:30 a.m. to 11:30 a.m. so employees could attend the ceremony. During a Friday morning drizzling rain, the cenotaph was unveiled by Lieutenant-Colonel J.H. Coleman, M.B.E., Ed, Commanding Officer of the Sarnia Garrison, followed by a dedication ceremony by Rev. G.G. Stone. The first wreath laid upon the cenotaph was by Captain and Mrs. Augustus R. Mendizabal on behalf of all the next of kin. The Mendizabal's had lost their only son, Flying Officer-Pilot Rodolfo Mendizabal, in August of 1943. Information on twenty-five year-old F/O-P Rodolfo Mendizabal is included in the World War II section of this Project on page 873.

Practically every service club, business and professional organization, Legion branch, civic body as well as next-of-kin of fallen laid wreaths at the foot of the monument to the accompaniment of soft music played by the Sarnia Citizens and Sarnia Veterans' bands. The customary firing of the salute was followed by the trumpeter sounding the "Last Post". Then all bowed their heads to observe two minutes of silence in recognition of the men who did not return. Following this were the sounding of "Reveille", the reading of the Memorial Prayer, and the playing of the National Anthem. A benediction closed the solemn but colourful ceremony.

In **1959**, the old Carnegie Library (east portion of park) was demolished and work on a new Sarnia Public library began (on west portion of park). Renovations were made to Victoria Park, including the re-positioning the cenotaph slightly. Other changes included: the Centennial Cairn thermometer was removed; the Boer War Memorial Fountain was moved; the I.O.D.E. Memorial plaque was removed from the library foyer; the ceremonial maple tree planted in 1914 by Prince Arthur was cut down; and the old "Long Tom" cannon was moved to Canatara Park.

In November **2008**, through the efforts of Sarnia City Counselor Jim Foubister, a plaque was added to the cenotaph; "OTHER THEATRES OF CONFLICT – CPL BRENT POLAND – AFGHANISTAN 2007".

In June of **2013**, the Royal Canadian Legion Sarnia Branch 62, with financial assistance from the Federal Government, Veteran's Affairs, completed a restoration project on the Sarnia cenotaph. The federal government contributed \$5,285 toward the project, while the remainder of the total cost of \$9,700 was covered by the membership of the Royal Canadian Legion Branch 62. The restoration project included removing and replacing damaged monument joints, cleaning the monument and remounting plaques.

New names added: After both World Wars, no official government body or military agency was in charge of recording the names of the fallen or in matching them to specific home centers. Across the country, these kinds of lists were generally assembled by volunteer groups, typically by word of mouth rather than through official documents, and often years after the war. As a result, some names were misspelled while other names were missed.

In the spring of 2019, Tom Slater brought his *Sarnia War Remembrance Project* research findings to the Sarnia Historical Society with the goal of providing proper recognition and honour to those local heroes who had been missed. The Sarnia Historical Society, led by Ron RealeSmith, and the Royal Canadian Legion, Branch 62,

began the endeavor of making this project become a reality. Slater submitted a list of possible candidates with brief bios of missed fallen soldiers connected to Sarnia. A Legion committee that included Lynn Mathieson (Legion Br. 62 President), Bill Chafe (veteran), Les Jones (veteran), RonReale Smith and the Dominion Chairman for the Legion at the National level, met to discuss potential names and concluded that 26 names would be added to the Sarnia cenotaph (10 WWI, 10 WWII, 3 Korean Campaign, 2 Afghanistan and 1 In Service of Canada).

In the fall of 2019, the Sarnia Legion Branch 62 and Sarnia Historical Society also completed a refurbishing of the plaques on the cenotaph, along with refinishing the plaques and monument in front of the Sarnia Legion.

Carving the new names into the cenotaph stone was completed in November 2019 with the financial support of the Sarnia Legion Branch 62, the Sarnia Historical Society, the Imperial Sarnia Site and Bluewater Power. On **November 11, 2019**, as part of the Remembrance Day ceremony on a crisp, snowy but picturesque morning, the 26 names were officially unveiled, engraved in stone to be remembered always. The 288 names inscribed on the Sarnia cenotaph have been transcribed and are included in this Project on page 1155.

Note: *The Sarnia War Remembrance Project* records 312 fallen names.

• **THE SARNIA-LAMBTON AFGHANISTAN MONUMENT:** In August 2015, the Sarnia First Hussars Association began the process of procuring a monument to honour those lost in combat during the Afghanistan War.

The Department of National Defence were disposing of 250 Light Armoured Vehicles (LAV III's) that had been used in the Afghanistan conflict, and offered to make decommissioned hulls available to communities across Canada wishing to create memorials to the war in Afghanistan. The LAV's were used extensively in Afghanistan by the Canadian Armed Forces for assault, mobility and protection—they were the “workhorse” of the Canadian Forces’ effort in Kandahar Province. The makers of the LAV III, General Dynamics Land Systems (Canada) in London, Ontario, were happy to assist by releasing the demilitarized hulls to the program before the final scrapping process, and Militech Inc. agreed to finish and paint the hulls to be used as Monuments. The Sarnia First Hussar's were able to obtain LAV III, hull number 77, and the vehicle's 30 mm cannon was replaced with a fixed metal piece, and the engine, electronics and other equipment were removed.

The Sarnia First Hussars Association, an association connected with the Canadian Army Reserve, along with the Royal Canadian Legion, Sarnia Branch 62, and the City of Sarnia, set up the 1st Hussars Association Afghanistan Monument Committee to raise funds for the project, under the direction of Honorary Colonel Barry A. Hogan. Led by the First Hussars Association, funds were received from the Kiwanis of the Seaway, Sarnia Legion Branch 62, the Sarnia Saints Rugby Club, the Royal Canadian Regiment, the Labourer's International Union of North America, Local 1089, and from private citizens for the \$65,000 project. In the summer of 2016, work began to prepare a spot in Veterans Park for the installation of a cement pad and mountings for anchoring the memorial.

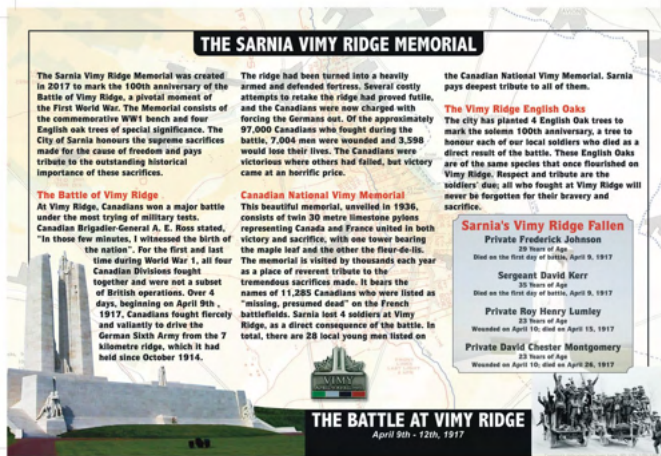

Sarnia-Lambton Afghanistan Monument

On October 30, 2016, a dedication ceremony took place unveiling the Sarnia-Lambton Afghanistan Monument in the southeast corner of Veterans Park in the presence of military personnel, dignitaries and six Silver Cross families – including those of two Sarnia/Lambton Afghanistan fallen. Military personnel included members of the 4th Battalion of the Royal Canadian Regiment, the 1st Hussars, the 31st Brigade and the Royal Highland Fusiliers, including Lt-Col. Mark Poland—the brother of Brent Poland.

Three bronze plaques are part of the memorial: one plaque is dedicated to Private William Cushley and Corporal Brent Poland, both of Sarnia/Lambton who died in action while serving in Afghanistan; a second plaque is dedicated to the 40,000 men and women of the Canadian Armed Forces deployed to Afghanistan, and the 159 who lost their lives, between 2001 and 2014; and the third plaque is dedicated to the 86 members of the First Hussars deployed in Afghanistan. The information on the plaques are included in this Project on page 1158.

In September 2019, the LAV III Committee along with the City of Sarnia Parks and Rec Department installed the Afghanistan Memorial bench that faces the LAV III Monument.

- **THE SARNIA VIMY RIDGE MEMORIAL:** The idea for this project was initiated by City of Sarnia supervisor of forestry/horticulture Chuck Toth, as a way to commemorate the 100th Anniversary of the Battle of Vimy Ridge. With the full support of Sarnia 1st Hussars Association, along with the City of Sarnia, in April 2017, the Vimy Ridge Memorial was unveiled. Located on the west side of the Sarnia cenotaph, it includes a Vimy memorial park bench, a Vimy Ridge storyboard and four English oak trees.

Vimy Ridge Memorial Storyboard

Vimy Ridge Memorial Plaque & Park Bench
(on left is one of the four Vimy English oak trees)

The park bench was created in Scotland—it's design features the silhouettes of four World War I soldiers and several poppies. The storyboard was created by Lou Giancarlo, Tom Slater and Tom St. Amand, and designed by

sign-maker Ken Hall. The storyboard provides information on the Battle of Vimy Ridge, the Canadian National Vimy Memorial in France, the Vimy Ridge English oak trees and the Sarnia sacrifices at this battle. Along the bottom portion of the storyboard are three photographs; the Vimy Memorial in France, the Vimy pin (“April’s poppy”—with the four coloured boxes representing the four Canadian divisions that fought together) and a photo of happy Canadian soldiers returning from action after their victory at Vimy Ridge.

Four English oak trees were planted to commemorate the four soldiers inscribed on the Sarnia cenotaph who lost their lives in the Battle of Vimy Ridge. The English oak trees are the same species that are native to Europe and were present on the Vimy Ridge battlefield in 1917. This species of oak is significant in that they are representative of the Vimy Oaks Project. More information on the Vimy Oaks Project is on page 151.

- **PLANTER STANDS:** Students from St. Patrick’s Catholic High School, under the direction of Technical Department teacher Matt Abbott, constructed and installed self-watering planter stands to Veterans Park in the summer of 2018.

- **THE SARNIA WORLD WAR I and WORLD WAR II STORYBOARDS:** This was another project initiated by City of Sarnia supervisor of forestry/horticulture Chuck Toth, with the goal to complete the project in time to coincide with the 100th Anniversary of the end of the First World War. With the full support of Sarnia 1st Hussars Association, Enbridge, along with the City of Sarnia, the two-part project involved the installation of another memorial park bench and two storyboards to commemorate and honour the sacrifices made by Sarnians in the two World Wars. The project was unveiled in late October 2018. The park bench was created in Scotland, and the storyboards were created by Lou Giancarlo, Tom Slater and Tom St. Amand, and designed by sign-maker Ken Hall.

The World War I storyboard focuses on Sarnia, providing a glimpse of the “trench war”, the major battles that Sarnians were a part of, the role of women overseas and at home, and the sacrifices made locally and across the country.

The World War II storyboard again focuses on Sarnia, providing a glimpse of the branches of service and major campaigns that Sarnians were a part of, the role of women at war, and a look at the Sarnia Home Front, in particular, the growth and contributions of local industry. Alongside this storyboard is a World War II bench that features the silhouettes of World War II marching soldiers and several aircraft.

Creed

*If they should ask you,
Why do you fight?
Tell them, For Freedom. For the right
To live in peace; to worship God;
To build a cottage, turn a sod
That is my own; to trust my friends;
To know that when the work day ends,
A wife and children wait to greet
Me with a smile. I fight to meet
The future unashamed; to read
What books I will; to choose the creed
I wish; face politicians unafraid,
And criticize, if need be, laws they’ve made.
These are the web of life; for these I lend
My strength; these are the rights that I defend.*

By Dick Diespecker (First World War poem)

THOSE WHO SACRIFICED IN WAR - OVERVIEW

Early Beginnings

- **ST. CLAIR BORDERERS:** In the years prior to Canada's Confederation (1867), the defense of the colony of Upper Canada was primarily the responsibility of local voluntary militia, formed to repel any potential threat, either actual (Fenian Raids) or potential (from the United States). One of the earliest records of any military organization in Lambton is from the mid-1800s. Colonel Robert Faethorne had left behind a roll in his Lake Shore residence. Today, the Faethorne House is home to the Bright's Grove Library and Gallery in the Grove. When rebellion broke out in Upper Canada in 1837, Robert Faethorne was commissioned as a Lieutenant-Colonel of the Essex, Kent and Lambton Militia. Found in Faethorne's residence was a service roll of the militia of Sarnia Township of 1855. In that year, Canada had passed a Militia Act in an effort to create military units made up of volunteer, part-time soldiers. It was in response to the threat of the Fenian Brotherhood. In 1855, a Sarnia Township unit, the 27th St. Clair Borderers, was loosely formed and, like most militia units outside the larger cities, they were unarmed and undrilled, seldom if ever assembling for training. The officers were recruited mainly from retired British Army soldiers. Civilians given commissions qualified for rank by undergoing examinations at the Imperial Army station in London, Ontario, where a large garrison was maintained up to the time of Confederation. The 27th St. Clair Borderer members mustered at some convenient centre once a year, signed the service roll and received a King's shilling each to celebrate the event and the end of the year's campaign.^{N, z}

- **THE FENIAN THREAT:** Founded in 1858, the Fenian Brotherhood was by 1861 the largest national organization in the United States with fifty thousand members. Taking its name from the *fianna*—landless warriors of Irish mythology—its stated aim was to overthrow British rule in Ireland and establish an independent Irish republic. Largely composed of Irish-American Civil War veterans (both the Union and Confederate sides), their publicly stated rationale for invading Canada was two-fold: to make the country a staging ground for attacks on British naval ships; and to capture Canada to use as a bargaining chip to push the English-led British forces out of Ireland. Failing this, they believed that a large number of British troops would be deployed to Canada to meet the threat, thus allowing the people of Ireland to rise up against a much smaller British force at home. At the start of the Fenian threat, potential invading points included from Chicago to Goderich, from Detroit, from Buffalo into the Niagara peninsula, from Vermont into Canada East (now Quebec) and from Fort Gratiot and Port Huron to Sarnia. Canadians living near the border were anxious about the rumours of an impending invasion. For months in 1866 in Sarnia, rumours were everywhere about a St. Patrick's Day plot to invade the town.

The colonial government took the threat seriously, and, beginning in January of 1866, began mobilizing troops in the threatened areas. In 1862, Robert Faethorne had been promoted to full Colonel of the local Sarnia Militia. In 1866 and 1867, troops from all over eastern Canada, numbering up to 4,000, were quartered in Sarnia at various times, reinforcements for the 27th Lambton Battalion of Infantry. The threat of a Fenian raid in the area was significant enough that the area inhabitants and leaders not only saw fit to outfit and train on a gunboat (the *Prince Alfred*), but voluntary militia were stationed here to thwart any possible aggression from the United States. With troops such as the York Rifles, Caledonia Rifles, Brantford Rifles and others from Ottawa, Owen Sound and other Ontario communities, Sarnia took on the appearance of a military camp. Troops were brought to Point Edward by train and marched to their quarters in the Alexander House or Hall's Hotel, and even in private homes. No Fenian attack ever occurred in this area though a close watch was kept along the St. Clair River.

Between 1866 and 1871, the Fenians launched a series of small, armed raids in parts of Canadian territory from New Brunswick to Manitoba. On June 2, 1866, the Civil War, battle-hardened Fenians launched their first significant raid, near Niagara (Fort Erie), called the **Battle of Ridgeway**. The Fenians defeated a small, inexperienced Canadian force at Ridgeway, then returned to the United States before Canadian and British reinforcements arrived. Though considered a minor skirmish in the history of warfare, it was significant in that it was the first battle fought exclusively by Canadian soldiers and led entirely by Canadian officers. Nine Canadians (members of The Queen's Own Rifles of Toronto) were killed and 32 wounded in the battle. The "**Ridgeway Nine**" were Canada's first soldiers killed in action and included a store clerk/Sunday schoolteacher, a shoemaker, a beer maltster and several University of Toronto students. Other Fenian attempts to invade Canada—two 1870 assaults in Quebec and one in 1871 at the Manitoba border, were repulsed. After 1871, there were no more Fenian attacks and the movement collapsed in North America. Some historians suggest the Fenian action cemented the necessity of

Confederation in the minds of provinces that had only been lukewarm to the idea. A little more than a year after the Fenian threat began, a united Canada was born in 1867.^{2E}

The “Ridgeway Nine” were: Ensign Malcolm McEachern, Privates William Smith, Mark Defries, Christopher Alderson, William Fairbanks Tempest, John Harriman Mewburn, Malcolm McKenzie, Corporal Francis Lackey and Sergeant Hugh Matheson. While many consider the Ridgeway Nine to be Canada’s first war dead, since the battle took place one year prior to Confederation, their names are not included in the Books of Remembrance in the Memorial Chamber in the Peace Tower in Ottawa. Today, the town of Fort Erie, Ontario honours the Ridgeway Nine with a memorial ceremony each June 2.

- **27th LAMBTON BATTALION:** It was in September of 1866 that the first Lambton Regiment in Sarnia was organized, the 27th Lambton Battalion of Infantry, commanded by Lt.-Col. Davis, a former county judge. It was composed of companies from Sarnia, Petrolia, Forest, Widder, Warwick, Watford and Wallaceburg. A company of Garrison Artillery was also formed at Sarnia (around 1885, it would be absorbed into the 27th Battalion). The Lambton Battalion was well equipped with everything but artillery. Occasionally the Sarnia Battery were taken for a trip on the gunboat *Prince Alfred* for training and gunnery practice. The *Prince Alfred* was armed with two “Armstrong” cannons (manufactured in Newcastle, England) and four brass “howitzer” cannons. The *Prince Alfred* was used for drill training by Sarnia militia volunteers for “landsmen to work the heavy guns.”

- The Lambton Battalion was first armed with muzzle-loading Enfields (aka. Brown Bess). They were later replaced by the breech-loading Snyder-Enfields. Following the Boer War, the Lee-Enfield, a magazine rifle, was adopted. In the early days, the regiment wore uniforms of heavy wool that featured buttons and badges of white metal. The greatcoat was of grey frieze and had a cape while the tunic was scarlet with blue woolen serge. The trousers had red stripes down the side, and in the early 1880s, blue cloth helmets with white metal spikes were issued.

- In March of 1872, the Lambton Regiment would be re-designated as the 27th Lambton Battalion of Infantry, St. Clair Borderers. In May of 1900, it became the 27th Lambton Regiment, St. Clair Borderers. During the Boer War (1899-1902), Sarnia and Lambton County had men volunteer to serve in this war, but was never really called upon to send men away in large numbers. With the outbreak of World War I, that all changed.

Those Who Served

- **A MILITARY OF VOLUNTEERS:** The Canadian military has historically comprised mostly volunteers, so-called “**citizen soldiers**”. In the two World Wars, these individuals came from larger centers like Toronto, Montreal and Vancouver; however, the majority came from small towns that still represented a larger part of Canada’s population. They came from mining towns, fishing villages, forestry towns, farming communities and semi-industrialized towns like Sarnia. It is estimated that more than 1,100 Sarnia men and women answered the call in First World War, and approximately 3,000 Sarnia men and women served in the Second World War. In 1954, military historian George Stanley coined a famous phrase describing Canadians and their relationship to war: “they were an unmilitary people whose history was filled with wars and conflict”.^{N, 8H}

- For young men in their late teens or early twenties, enlistment for overseas service was likely the first momentous decision of their lives. The men and women who went overseas were prepared to, at minimum, accept long, indefinite absences from their homes and families, and to interrupt the course of their own lives for a cause which they, in differing degrees and for varying reasons, saw as right. During the Boer War and two World Wars, sons and couples were often separated for years. Their only means of communication was mail—letters and parcels—that took weeks to cross the ocean by military mail service.

- Canada’s military and those who served from Sarnia comprised people of every class, with a wide variety of educational backgrounds, professions and ages. Sarnia’s youngest fallen soldier was 15; its oldest fallen soldier, 54. Sarnian’s young and old joined the military; they were farmers, teachers, railway employees, Imperial oil workers, students, lawyers, store clerks, doctors, firemen, bankers, cooks, journalists, sailors, mechanics, carpenters, plumbers, electricians, salesmen, butchers, pipefitters, truck drivers, machinists, bakers, grocers, miners, machine operators, barbers, painters, architects, bricklayers and labourers to name a few. The majority of the Canadian soldiers had one thing in common: they were ordinary citizens, not professionally trained soldiers, like the members of some other countries’ military. They were ordinary Canadians who chose to respond in times of extraordinary circumstances.

- Numerous religious affiliations and ethnic origins were also represented in Canada's military: among others, English, French, First Nations, Jewish, Italian, Portuguese, Dutch, Polish, Danish, Irish, Scottish, Ukrainian and Greek. Many soldiers had direct or close ties to Europe, being only first or second generation Canadians. War was a great equalizer, where class distinctions, racial prejudices and religious rivalries that existed in "normal" society, dissipated on the battlefields. All came together, brothers in arms, in their united fight to defeat tyranny.
- During World War I, racist beliefs prevalent in the military, and reflecting those of the larger society, resulted in visible minorities such as Blacks, Ukrainians and Japanese, being excluded from the First Contingent. Despite being willing to serve overseas, many potential recruits were told by unit commanding officers that they were not wanted by the Canadian military. It was not until the summer of 1916, when recruiting sources had largely dried up, that army officials allowed minorities to serve. Some 222 Japanese Canadians served with distinction, and about a quarter of them were killed in battle. Jews who also faced prejudice in Canada, but in the CEF, served shoulder to shoulder with their Gentile comrades.

Amazingly, about 1,500 blacks did manage to enroll in the Canadian Expeditionary Force (CEF). After two years of tireless lobbying by black leaders, assisted by supportive white Canadians, the government even authorized a **black battalion** on July 5, 1916—No. 2 Construction Battalion. Although the unit was made up of black enlisted men, the unit's officers were white, with one exception. The battalion chaplain, Reverend Dr. William A. White, was given the rank of honorary Captain, making him the only black officer in the Canadian military during the First World War. Even once accepted, many members of the black community weren't allowed to fight; instead they dug trenches and repaired roads as part of Construction Battalions.^{4F} These units were very much in demand during the First World War—they built and repaired trenches, roads, bridges and railways, and laid barbed wire among other tasks.^{4F, 9U} George Jones of Sarnia, "of the black race", would become a member of the Canadian Army, serving with an artillery unit. He would make the supreme sacrifice in October 1918. Information on nineteen year-old Gunner George Jones is included in the World War I section of this Project on page 309.

- **A SOLDIER'S BOND:** For the men and women who went to war, they fought beside their friends and sometimes their family members, people with whom they had joined, trained, and lived for a length of time within their regiments. They developed a bond and loyalty to one another, an understanding that nobody was going to let the other one down in battle. In the heat of battle, no matter how frightened, tired, cynical, benumbed or despairing their situation, soldiers gritted their teeth and stuck it out because their friends, their comrades, or even strangers in other units were counting on them. Loyalty, the fear of showing fear, the sense of shared risk and responsibility, comradeship, fidelity to friends and family, all contributed to the refusal to let the side down. An acknowledged principle is that men and women in battle fight for those beside them. The warrior's bond is strongest at the smallest level—the section and platoon—where soldiers have known, trained, and lived next to, and where they rely on one another for survival. A World War II Canadian infantryman noted, *"All ranks are held together by the fear of having their peers realize they too are afraid... What is a soldier? He's thinking not so much of himself but of the unit to which he belongs. At some stage, you're with this platoon or section and you're going to keep on because you're part of that section."*^{4I}

Canadian author Pierre Berton, in his book on the World War I battle of Vimy Ridge, described the principle as to why men continue to fight, in the face of all human logic, stumbling forward into the whirlwind of battle, *"They did not do it for patriotism or love of country. They did not do it for mothers, fathers, sweethearts, or wives. They did not do it for the colonel, the lieutenant, the sergeant, or even the corporal. They did it for their closest friends – the half-dozen private soldiers with whom they slept, ate, laughed, worked, and caroused, the men in their own section – grenade throwers or riflemen or Lewis gunners – whom they could not and would not let down because in moments of desperation and terror their virtual existence was woven together as tightly as whipcord."*^{7Z, 8O}

- **FAMILY MEMBERS:** During wartime, in Sarnia and across the country, it was common for multiple members of a family to join the military. For many, the notion of seeing a brother, sister or cousin march off to war without being by their side was unthinkable. Families contributed two members, three members, four members, and in one case, eight boys in one Canadian family joined the Canadian Forces. For example; Harry Manning and four of his sons from Point Edward served in the Great War. Sadly, the casualty rates of war meant that these blood ties ended in tragedy for many families back home when not just one but several relatives were injured or killed.

It was no different locally. The Sarnia Cenotaph includes eleven sets of brothers who lost their lives in war: in World War I – Arthur and James Allan, and Robert and Royal Crawford; and in World War II – George and

William Andrew, Curtis and Francis Goring, Lloyd and William Graham, Donald and James McClure, James and Patrick O'Connor (Korea), Douglas and Ross Pole, Melvin and Robert Ramsay, Clare and Jack Thain and Arthur and Howard Thompson. *The Sarnia War Remembrance Project* includes one additional pair of brothers; Melville and Sylvester Simmons (WWI). Also inscribed on the Sarnia Cenotaph are the names of two fathers and sons who lost their lives in war: Thomas and James Wright (WWI and WWII), and Raymond and Robert Dionne (both WWII).

- **LETTERS HOME:** Throughout his research, Slater uncovered and has included many excerpts from letters sent home by Canadian soldiers, including many Sarnians, who were on the battlefronts, from the Boer War through to Afghanistan. The voices of these men and women provide tremendous insight into the bitter realities of battle, the often appalling conditions of combat zones, the deep emotions the soldiers were experiencing, and a glimpse of their courage and bravery.

All original letters included in this project are in *italics* and have been transcribed verbatim. During the Boer War, and especially during the First World War, when families in Sarnia received a letter from a loved one at the front, it was common for a family member to bring it to the *Canadian (Sarnia) Observer* newspaper office. The *Observer* would publish these letters in the local newspaper. It was a way to keep the community informed about the war, and allay fears about what was happening to “our boys” overseas.

Many of the hand written letters by these ordinary soldiers were to mothers, fathers, wives and children. There was often the typical grumbling about the weather, the food, the lack of sleep; but one element that many had in common –they wrote to assure the loved ones back home that everything was fine, they were safe, and not to worry.

Military censorship prevailed in both world wars, though Canadian officers were free to send their own mail uncensored. Soldiers continued to write frankly about their experiences, and with the sheer volume of correspondence, especially as the war years dragged on, some material painting a less than glorious view of the war got through. Some of the letters received at home were the dreaded ones—the official letters of condolence written by officers and chaplains; or from complete strangers, a comrade of a lost son or father.

Letters sent by loved ones at home to the soldiers overseas were similar in that they raised the spirits of the fighting men and women without dwelling on difficulties or problems at home that would add to their burden. Letters received by soldiers were a vitally important connection to loved ones at home and were essential in keeping up soldier morale. When letters arrived at the battlefronts, they were read and re-read by the soldiers, cherished links to home and family. Correspondence was considered so vital to the morale of the troops that it was retrieved from disaster scenes and sent on, whatever its condition, to keep the communication going.^{2P, 7A}

War and Immigration

- War had a major impact on immigration and played a significant role in the shaping of our country and our city. Prior to World War I, especially between 1906-1913, a huge wave of immigrants, mostly from continental Europe, came to Canada. Many of these pre-World War I immigrants, such as Ukrainian and Polish immigrants, settled in western Canada and developed a thriving agricultural sector. During World War I, under the auspices of national security, the government imposed greater restrictions on immigration and limited the number of immigrants allowed into Canada; in fact, the War Measures Act of 1914 gave the Canadian government the power to arrest, to deport or even to intern “enemy aliens” already living in Canada. The tighter immigration policies continued after the war; the entry of nationalities who had fought against Canada and Britain in the War was prohibited. From 1919, the federal government could prohibit immigrants to Canada based on their race, nationality, occupation and class. It was not until 1923 that Canada began to open its doors again to immigrants. In 1928, in Halifax, Nova Scotia, **Pier 21** officially opened, becoming the site where over 1.5 million new immigrants, including 50,000 war brides, would enter the country to begin their Canadian dream. Pier 21 would close in 1971.

- During World War II, immigration into the country was again limited; however, after World War II, this all changed. In post-World War II, the Canadian economy experienced unprecedented growth, thus creating a huge demand for exporting raw materials, food and manufactured goods to war-ravaged Europe. The days of rationing, forced savings and limited consumption were over, so consumer spending on appliances, homes, automobiles, leisure and travel exploded. Canada was faced with a shortage of workers, especially in core sectors such as agriculture, mining, forestry, rail, construction and industry. So post-war Canada gradually opened its immigration doors, though

selectively in 1947, allowing entry from northern and western Europe initially—for example, Britain, France, Ireland, Norway and Finland—followed by countries such as Italy, Greece, Spain and Portugal from eastern and southern Europe.

One of the main groups to be accepted by the Canadian government were the Dutch who, having lost so much farmland during the later stages of the war, were faced with overcrowding, food shortages and a surplus of farmers. Between 1947 and the end of September 1949, nearly 16,000 members of Dutch farm families entered Canada, with many of these newcomers coming to Ontario. It was so successful that the Immigration Branch continued to encourage farmers from the Netherlands to emigrate to Canada throughout the 1950s.^{3Q}

- There have certainly been some dark chapters in Canada's immigration history, where policy decisions were made based on prejudice, racism, religious intolerance and anti-Semitism ideals that were common in Canadian society at the time. Two examples in times of war are: Canada denying entry of over 370 Sikh, Muslim and Hindu passengers aboard the *SS Komagata Maru* off the coast of Vancouver in May-July 1914; and Canada's rejection of over 900 Jewish refugees aboard the *MS St. Louis* off the coast of Nova Scotia in June 1939. More information on the *MS St. Louis* is included in the World War II section of this Project on page 532.

- **DISPLACED PERSONS:** After World War II, Canada opened its doors to another group known as "Displaced Persons". These were people who after the war found themselves in foreign countries with no way or desire to return to their homeland, or people with nowhere to return to. This group included, for example, Ukrainian, Jewish, German, Slavic and citizens of the Baltic States.^{3D} In fact, Canada decided to admit displaced persons even before the international community had reached an agreement on the permanent resettlement of hundreds of thousands of Europe's homeless. In June 1947, Canada authorized the entry of an initial 5,000 non-sponsored displaced persons, and between July 1947 and October 1948, for the entry of an additional 45,000 of these people. For several years Canada admitted more displaced persons than all the overseas countries combined. Nearly 250,000 displaced persons and other refugees were admitted to Canada between 1947 and 1962.

Of the 165,000 refugees who entered this country between 1947 and 1953, Poles comprised the largest group (23 percent of all those refugees admitted). In descending order of numerical strength were Ukrainians (16 percent), Germans and Austrians (11 percent), Jews (10 percent), Latvians (6 percent), Lithuanians (6 percent), Magyars (Hungarians; 5 percent), Czechs (3 percent), Dutch (3 percent), and Russians (3 percent). All told, these groups comprised 86 percent of the Europeans allowed to enter Canada in this period.^{3Q}

- In July 1946, one of the first "displaced persons" immigrant groups to be accepted to Canada were approximately 4,000 former **Polish soldiers**.^{4U} They had fought alongside the English and Canadian troops, including campaigns in Poland (Warsaw Uprising), Italy, France, Holland and with Poland's vaunted air squadrons in England. After the war, they did not want to return to their homeland that was occupied by the Soviet Red Army. Coming to Canada, each Polish veteran was bound by contract to serve on a farm for one year, after which, they were free to renew the contract or head for Canada's cities in search of better-paying jobs. From 1946 to 1952, approximately 39,000 Polish veterans, displaced people and refugees poured into Canada, with over half of them settling in Ontario.^{3Q}

- **WARSAW UPRISING:** Poland was the first country invaded by Germany in the Second World War, on September 1, 1939. As the war progressed, Allied armies from Britain, Canada and the United States closed in on Nazi-occupied Europe from the west. The Soviet army, advanced from the east. By July 1944, the Soviet army was making its way through Poland, with a plan for a postwar Soviet takeover of Poland. After five years of brutal Nazi occupation, in a desperate bid to liberate the city from the Nazi's while staving off a communist takeover, the Polish resistance launched the Warsaw Uprising on August 1, 1944. In Warsaw, the resistance force, the Polish Home Army, consisted of about 30,000 men and women, with little outside support.

The Uprising was planned to last only two or three days, but when the Russians refused to assist the resistance, the Polish Home Army was left to battle the Nazi's in vicious street-by-street combat, that would last until October 2, 1944. The Uprising was the largest single military effort taken by any European resistance movement during the war. The struggle ended in disaster with the resistance defeated: approximately 20,000 dead insurgents and 200,000 dead civilians (many killed in mass executions by the Germans); the remaining inhabitants sent to internment camps; and the city in ruins after being ravaged by the Germans, and left in the hands of the Soviets. Of note, is that Warsaw was not alone during the Uprising—mainly Polish, South African and British air forces, including

Canadian RCAF aviators, risked their lives, delivering munitions and other supplies to the Resistance fighters. With the Soviets barring Allied planes from landing on Soviet airstrips, support planes had to use distant airfields in Italy, making long-range highly dangerous sorties over enemy territory in broad daylight, in order to make low-level drops at night. A number of Canadian airmen flying Liberator and Halifax aircraft, would lose their lives flying support missions over Warsaw. In Ottawa's Confederation Park, there is a monument dedicated to twenty-six airmen of the RCAF who are buried in Commonwealth War Graves in Poland, seven were killed during the Warsaw Uprising.^{N, 5N}

• **SARNIA'S POLISH CONNECTION:** A number of the post-war Polish immigrants would come to Lambton County and Sarnia, raising their families and helping to build the city, often working on the area farms or in the local factories. In fact, in post-WW II, Sarnia had one of the largest Polish communities in Canada. Some of the first post-war Polish arrivals to Sarnia/Lambton included; Jan Pradyszczuk (fought at the Battle of Monte Cassino), Michal Waldemara, Michal Radzewicz, Aleksander Salaz, Antoni Fiedukowicz, Jozef Lopata and Jozef Polimaka (flew with Poland's 303 Squadron in Battle of Britain, Dieppe and D-Day).

Another Polish immigrant coming to Sarnia in the early 1950's was **Dr. Bernard A. Wiechula** along with his wife Maureen Margaret (nee Rogers). Dr. Wiechula worked for Imperial Oil, and would be a leader of the local Polish community. Years earlier, when the Germans invaded Poland in 1939, Bernard Wiechula and his twin brother Ludwik managed to escape the country passing themselves off as seminary students. Once in Britain, they joined the British Army, becoming agents of the Polish section of Special Operations Executive, SOE (known as "Cichociemni", or "The Unseen and Silent"). They were trained in espionage, silent killing, partisan leadership, and tricks in transmitting radio messages to London.

In September 1943, Lieutenant Bernard Wiechula was parachuted into enemy held Poland where he linked up with the Polish underground. He would remain in Poland for almost two years, leading a platoon of partisans, with few weapons, in skirmishes against heavily armed German troops. The penalty of capture was torture and certain death, and SOE agents were offered a suicide pill in the event of being taken prisoner. Lt. Wiechula, a devout Catholic, refused the pill on principle—he trusted in God, and said he would rely on his wits. At the end of the war, the new peril faced by Wiechula was the Russians, who had been ordered to execute all Polish partisans. In the spring of 1945, now Captain Wiechula had made his way back to Britain. His brother Ludwik made his way safely through the war, their older brother Henrik was executed at Auschwitz for underground activity after being denounced by a Polish neighbor, and their father, who was wanted by the Gestapo, died in hiding during the war.

For his war service, Captain Bernard Wiechula received medals for valour from Poland, Britain and France. In 1945, he enrolled at the University of Leeds, five years later earning a doctorate in chemical engineering. Not long after, he and his wife and children would come to Canada and Sarnia, where he was employed at Imperial Oil as a Consultant Engineer for thirty years. Bernard and Margaret Wiechula would have three children together; Damian, Marek and Gabriela. Dr. Bernard Wiechula passed away in June 2000 in Hamilton with his loving wife at his side.

Members of the local Polish community and Polish Combatants Association Br. No. 11 erected the **Polish Combatants Memorial** in 1999 in Our Lady of Mercy cemetery. Inscribed on it are the words; *In memory of the Polish men and women who died fighting for the freedom of Poland – I World War 1914-1918, Polish-Bolshevik War 1919-1921, II World War 1939-1945 – Oddajemy Hold Polakom Poleglym W Wojnach Za Wolnosc Ojczyzny - Lest We Forget – Bog Honor Ojczyzna.*

In 2014, Krystyna Stalmach, daughter of Jan Pradyszczuk, and a small group of local volunteers created the "Our History, Our Heroes: From Fighting Wars to Farming Fields in Lambton" project—an exhibit honouring the sacrifices and achievements made by Polish veterans who settled in Lambton County. The project documented three distinct aspects of Lambton County veterans' war experiences: the first dealt with Polish veterans of the Italian/Normandy campaigns; the second pertained to veterans who participated in the Warsaw Uprising; and the third was a children's display documenting the story of Wojtek the Bear, a brown bear who had been adopted as a mascot by the 22nd Artillery Supply Company of the Polish II Corps. The displays included medals, letters, uniforms, keepsakes, artifacts, photographs and stories collected from veterans across Sarnia/Lambton.

The Contributions of Indigenous Peoples in Canada

Note: A collective noun for the original inhabitants of Canada has changed over time. Early explorers, believing they had landed in India referred to them as "Indians". The word "Native" was also formerly a common term, and over time, "Aboriginal Peoples" was widely adopted by government and many national groups. More recently,

“Indigenous Peoples in Canada” has become the accepted term, one used by the United Nations. Indigenous Peoples in Canada is an umbrella term used for First Nations, Metis and Inuit people in Canada.

- Indigenous Peoples in Canada have demonstrated great service and sacrifice to the military during times of conflict even before Canada was a nation. They fought beside the British in the Seven Years War (1756-1763) and the American Revolution (1765-1783) and in the War of 1812 (1812-1815). In 1885, they navigated Africa’s Nile River on a British military rescue mission and volunteered for Canada’s first international expeditionary force at the dawn of the 20th century, fighting with the British in the Boer War in South Africa (1899-1902).

In World War I, more than 4,000 members of the Canadian Expeditionary Force (CEF) were First Nations volunteers, representing nearly one-third of all Aboriginal-Canadian men eligible to serve (a proportion that was twice the national average). This included Inuit from Labrador; descendants of Metis who had fought with Louis Riel in the 19th-century North-West Rebellion; and three hundred Iroquois from the Six Nations Reserve in Brantford, Ontario. Indigenous Peoples served in units with other Canadians throughout the Canadian Expeditionary Force, and participated in all of the major battles in which Canadian troops fought—at Ypres, the Somme, Vimy Ridge, Passchendaele and the Hundred Days Campaign.

Initially, some were turned away, but as casualties in Europe mounted and the number of volunteers dwindled, Indian agents actively encouraged First Nations men to enlist. There were no all-Indigenous regiments, but several battalions did have many Indigenous members. Two (predominantly) aboriginal battalions formed were the 114th, known as “Brock’s Rangers”, and the 107th “Timber Wolf” Battalion.

Some of the First Nation recruits came from remote areas and travelled hundreds of kilometres, much of it by canoe to enlist, and spoke neither English nor French, and had no connection to white culture. However they did possess traditional skills that served them well in war—hunting, tracking, patience, and navigating without instruments. The over 4,000 First Nations volunteers was an astonishing number given the limited civil rights First Nations were accorded. Corporal Mike Mountain Horse, who had attended an Anglican boarding school in Alberta, enlisted to avenge the death of his brother Albert who had been gassed at Ypres and died at age 22. Mountain Horse, who survived Vimy Ridge and was wounded twice at Cambrai in northern France, later wrote, *“The war proved that the fighting spirit of my tribe was not squelched through reservation life,”* and *“When duty called, we were there... Our people showed all the bravery of our warriors of old.”*^{7A}

During this time, status First Nations did not have full rights of Canadian citizenship. Rather, they were wards of the state. As wards, they did not have the right to vote; they couldn’t own land; and residential schools were taking away their culture.

Their reasons for joining were not unlike others: the call to adventure; the attraction of a steady wage and regular meals; the desire to follow friends and family; an opportunity to show patriotism and to elevate their status within their communities; and the hope that their loyal service would win greater rights for their people. Others were drawn by the warrior ethic, which had been squelched by residential schools, reservation life and restrictive policies. Some saw it as their duty, offering “help toward the Mother Country in its present struggle in Europe,” as Chief F.M. Jacobs of Chippewas of Sarnia Reserve (Aamjiwnaang) wrote in a letter. “The Indian Race as a rule are loyal to England,” said Jacobs. “This loyalty was created by the noblest Queen that ever lived, Queen Victoria,” under whose name treaties were signed.^{2E}

During World War I, First Nation soldiers had become the equals of their white comrades in the trenches and had enjoyed the right to vote in the 1917 federal election overseas. However, when the survivors returned to Canada, they would have to wait until 1960 to vote in another federal election.

More than 300 Indigenous soldiers were killed and thousands wounded in the Great War. Many returned with lungs scarred from poison gas, and with tuberculosis and Spanish influenza, which claimed many victims in First Nations communities across Canada. The First Nations World War I veterans returned to a land where they were still treated as wards of the state. They did not receive the same assistance as other returned soldiers under the War Veterans Allowance Act. The Soldier Settlement Act, meant to help soldiers begin farming, was doubly painful: it was almost impossible for Status Indians to qualify; and the government confiscated tens of thousands of acres from reserves to provide for non-Indigenous soldiers under the plan. These proud First Nation veterans who had served their country fought back against the system. These veterans’ voices were among the most powerful and poignant in the long battle against this injustice, and ensuring Natives received equal rights in Canadian society.^{D, 2E,}

2I, 2N, 3G, 3R, 4G, 9U

- Sarnia-born author and historian **Timothy Winegard** in his book *For King and Kanata: Canadian Indians in the First World War* wrote, “The most significant benefit of Aboriginal peoples’ war service was interaction between Aboriginal and non-Aboriginal people, which was not common in general Canadian society prior to the war.”^{2E}

- First Nations troops left a remarkable record of wartime achievement: several were commissioned as officers; many served as battle-hardened platoon leaders and combat instructors; at least fifty were decorated for bravery on the battlefield; and many acquired near-legendary status as reconnaissance scouts and snipers (two of the most hazardous roles in the military). Two of the more famous First Nations soldiers to serve in WWI were Tom Longboat, an Onondaga from Six Nations Grand River, and Francis Pegahmagabow, an Ojibwa from the Parry Island Band.

Tom Longboat, an Onondaga from the Six Nations of the Grand River, was a legendary long-distance runner who won the 1907 Boston Marathon and competed for Canada at the 1908 Olympics. He became a dispatch carrier with the 107th Pioneer Battalion during the war, delivering messages between units on the front lines. He was wounded twice during the war—once so badly he was officially declared dead—but he survived and returned to Canada.

Francis Pegahmagabow, an Ojibwa from Wasauksing (Parry Island) First Nation in Ontario, was one of the original members of the 1st Canadian Infantry Battalion. He was an outstanding sniper and a superior scout, becoming the most highly decorated Canadian Native soldier to serve in the Great War. He was awarded the Military Medal plus two bars for bravery in Belgium and France. He fought at the battles of Ypres, the Somme and Passchendaele and was lauded for his “disregard for danger and faithfulness to duty.” Records for kills weren’t kept, but some estimates said he had as many as 378, plus another 300 captures. He would serve for the entire war and return to Canada.^{D, 2I, 3G, 3R, 4G}

- During World War II, even though they were still treated as federal wards of the state, it is estimated that more than 4,300 First Nations and Metis from every region in Canada and 72 women enlisted in the armed forces. The actual number of participants is difficult to know for sure for a variety of reasons including, an unknown number of Indigenous people from reserves near the Canada-United States border, like Sarnia, served with American Forces. Several thousand more were rejected because of medical reasons or racial restrictions in the navy and air force (both the RCAF and RCN required volunteers to be “of pure European descent and of the white race,” until 1942 and 1943 respectively).^{D, 2N, 3G, 4H, 4I}

For those who served, not only did these soldiers face racial prejudice and cultural challenges, but also a military hierarchy that worked almost exclusively in English, a language that many of the recruits did not speak. Despite these obstacles, First Nations soldiers left a remarkable record of wartime accomplishment, serving in all branches of the service and in every rank, and fighting in every major battle and campaign. Several were commissioned as officers, and many served as battle-hardened platoon leaders and combat instructors. At least 70 were decorated for their bravery performing daring and heroic acts on the battlefield in the two World Wars. Many acquired near-legendary status as “code-talkers”, reconnaissance scouts and snipers, drawing on pre-war hunting skills and wilderness experience. Those who served with their white comrades usually testified that they were treated with respect, something they had never experienced in Canada. One First Nation veteran remembered after the war, “*In the fighting zone... we were all equals. The only time in my life I was equal to the white society or anybody else.*”

Nonetheless, these Canadians who served their country came home to an indifferent nation. After the war, First Nation soldiers received few of the benefits, services, training or jobs their white counterparts were offered by the government. Many First Nation veterans found that they were no longer considered Indians because the Indian Act specified that Indians absent from the reserve for four years were no longer Indians. Ping-ponged between the Veterans Affairs and Indian Affairs departments, their affairs were handled by Indian agents whose goal was assimilation. Status Indians were told they would have to renounce their status to apply for veterans’ benefits. Some found that Indian agents had removed their names from band lists while they were overseas. During the war, their allowances for dependents were funneled through agents, and there was no way to determine whether the money actually reached the families.

First Nations warriors, who had liberated nations and oppressed people, continued to live in a country where they did not even receive the right to vote in federal elections until 1960 without having to give up any treaty rights in exchange. It was not until 1995, fifty years after the Second World War, that Indigenous Peoples were allowed to lay Remembrance Day wreaths at the National War Memorial to remember and honour their fallen comrades.^{D, 2N, 3G, 4I, 6N}

- One of the most famous First Nations soldiers to serve in WWII was **Tommy Prince**, a descendant of Peguis, from the Brokenhead Band of Ojibwa in Scanterbury, Manitoba. Growing up, he learned to be a superb marksman, hunter and an excellent tracker. He applied to join the Canadian military several times, but was rejected. Aboriginal people faced widespread discrimination and that likely played a role in his rejection. He was finally accepted in the early years of the Second World War. He began with the Royal Canadian Engineers, became a sergeant with the Canadian Parachute Battalion and later became a member of the 1st Canadian Special Service Force. It trained with an American unit, forming a specialized assault team, the First Special Service Force (FSSF), later becoming known to the German soldiers as the *Black Devils*. Tommy Prince's exploits during the war earned him the Military Medal for courage and inspiration and the Silver Star with ribbon for gallantry in action. He was decorated with both awards by King George VI, one of only three Canadians to win both medals in World War II. Prince would also serve two tours of duty with the Princess Patricia's Canadian Light Infantry in the Korean War. He would become Canada's most decorated Aboriginal war veteran, having been awarded eleven medals in the Second World War and the Korean War.^{D, 2N, 3G, 3Q}

- One Aboriginal Veterans group estimates that 12,000 Natives, including Inuit and Metis, participated in the First and Second World Wars and the Korean War. It is estimated that approximately 300 lost their lives in World War I and more than 200 lost their lives in World War II.^{D, 2N, 3G, 3Q} Men from Sarnia Aamjiwnaang First Nations, nearby Kettle Point and Stony Point, and Walpole Island served in both World Wars, Korea and as Canadian Peacekeepers. Some would make the supreme sacrifice.²ⁿ

- In mid-June of 1945, one month after VE Day, an Honour Roll was unveiled with appropriate ceremonies on **Walpole Island**. The names of sixty-eight men and women of Walpole Island who served in World War II appeared on the honour roll. The roll was formally unveiled following a special service in St. John's Anglican Church, conducted by Rev. A. Marshall, formerly of Wyoming, with assistance from former Chief Harrison B. Williams. Rev. Marshall, who previously served as a missionary among Cree First Nations in the northwest and James Bay area, said the large number of First Nations, whose names appeared on the honour roll, indicated the loyalty and love they had for their country. Following the church ceremony, a parade, headed by a colour party from the Canadian Legion and First Nations ex-soldiers led the congregation to the Walpole cenotaph. After brief addresses by ex-Mayor Alan P. Brander of Wallaceburg and Chief Charles R. Jacobs of the First Nations council, two First Nations soldiers who had fought in World War II unveiled the honour roll. Included in the list of sixty-eight names on the Honour Roll were four who made the supreme sacrifice: Pte. Edwin Wright, Pte. Willard Shipman, Pte. Roslyn Sands and Pte. Charles Altman.

- **SARNIA'S AAMJIWNAANG FIRST NATIONS:** St. Clair United Church is located on the Sarnia Aamjiwnaang First Nations Reserve. Three honour rolls located within St. Clair United Church pay tribute to local First Nations who served during the two World Wars. One honours those who served in World War I and the other two (one which was completed before the end of the war) honour those who served in World War II.

In early February of 1944, an honour roll in the St. Clair United Church was unveiled. It paid tribute to the Sarnia First Nations men and women who were serving in World War II. Since the roll was completed before the end of the war, the dates for the beginning and end of the war read "1939 to 194_". It was unveiled under two flags for First Nations people were serving in the Canadian and United States militaries. Edwin Maness, the oldest veteran of World War I on the Reserve, unveiled and read the roll. Twenty-five names are inscribed on that honour roll. The names on the three Honour Rolls have been transcribed and are included in this Project on page 1186. Two of the honour rolls are also located inside the Sarnia Aamjiwnaang Band Office on Tashmoo Avenue.

- The **Sarnia Aamjiwnaang First Nations Cenotaph** comprises three vertical stone columns resting on a stone base. The central column is inscribed; TO OUR GLORIOUS VETERANS WHO HAVE SERVED OUR NATION AND ITS ALLIES FOR PEACE AND FREEDOM – LEST WE FORGET. Along the base of the cenotaph is inscribed; PONTIAC'S WAR; WAR OF 1812; KOREA; VIETNAM; PEACEKEEPING. The two side columns honour those who served in both World Wars, along with the fallen Fred Doxtator (WWI) and Harley Williams (WWII). Their stories are included in this Project. The names and information on the Sarnia Aamjiwnaang First Nations cenotaph have been transcribed and are also included in this Project on page 1165.

The Sarnia Home Front

- **NEWS FROM OVERSEAS:** In times of war, many of the loved ones back home in Sarnia – parents and wives, went to bed each night wondering if their sons or husbands were safe in those far-off places where they were fighting for their lives every day. In both World War I and World War II, many of the loved ones in Sarnia received only a short and vague telegram at their homes from Ottawa (Ministry of National Defence – Director of Records) informing them in capital letters that their son or husband was “LISTED AS MISSING IN ACTION”, and that more information would follow later. Often it wasn’t until many weeks or even months later that they received another simple telegram that contained very little information other than, “WE REGRET TO INFORM YOU THAT YOUR SON HAS BEEN OFFICIALLY DECLARED KILLED IN ACTION”. Usually, very few or no other details were included.

Young widows, their lives shattered at the news of the loss of their husbands, and parents were left to wonder where and how their sons had died, and about their last agonizing moments. Parents were left with memories of those special junctures in their sons’ life—the day they were born; special family occasions; going to school; appearing in uniform for the first time; and waving good-bye for the last time as the train left the station, with the knowledge that it was highly unlikely that they would ever be able to see their son’s final resting place.

- A local example is the **Adair family**. Originally from London, Ontario, Mr. and Mrs. Frank and Dorothy Adair would move to Windsor before residing in the early part of 1945 at 302 Confederation Street, Sarnia. Frank Adair was a C.N.R. employee here in the city. In early January of 1945, Frank and Dorothy would receive official notification from National Defence headquarters at Ottawa informing them that their son had been killed in action. The telegram informed them that Private Kenneth Adair, aged 21, had been killed in action in Italy during December of 1944. This was Mr. and Mrs. Frank Adair’s third son killed in World War II. They had previously lost Corporal Robert James Adair—killed in action in Italy in May of 1944; and Sergeant Charles Franklin Adair of the R.C.A.F.—killed by enemy gunfire in September of 1944 as he parachuted from a bombing plane over enemy territory in France. Their fourth son, Private Fred W. Adair who was serving in Italy, was returned to Canada (Windsor) on compassionate leave. Father Frank Adair expressed to the local *Sarnia Observer* reporter, that he hoped that his son Fred would not have to return to the fighting front. Sarnia city council sent a letter to Mr. and Mrs. Adair on Confederation Street at the time, expressing their sympathy in the death overseas of three of their four sons, and also expressing good wishes for their only remaining son.^N

- For many of the men who fell, their time overseas was short. In many cases, they were killed within a year of arriving overseas. Back in Sarnia, many parents, wives and families eventually realized their loved one was likely killed in a violent, untimely manner in a faraway land. Their sons’ bodies were often buried in graves on the other side of the world, or their names were inscribed on some makeshift memorial. Many families never had the chance to visit the final resting places of their sons. They were not given the opportunity to say good-bye to their loved ones or to give them a proper funeral.

- **WHERE SARNIA’S FALLEN REST:** Sarnia’s fallen sons and fathers are buried thousands of miles from their homes in at least 17 different countries throughout the world, including in; South Africa, France, Belgium, England, Netherlands, Germany, Sicily, Italy, Algeria, Sir Lanka, India, Egypt, Iceland, Azores, Malta, Barbados and South Korea. Others have no known graves, their bodies having never been recovered. Their names, however, are inscribed on war memorials throughout the world including; Vimy and Arras in France, Menin Gate in Belgium, Sai Wan in Hong Kong, Runnymede in the United Kingdom, Malta in Floriana, Alamein in Egypt, Singapore in Malaya, Busan Commonwealth in South Korea, and the Halifax and Ottawa Memorials in Canada. Of the 307 identified fallen soldiers covered in this Project, 92 of Sarnia’s fallen soldiers have no known grave (30%). For these soldiers and their families, the fortunes of war denied them a known and honoured grave.

- For many veterans who returned to Sarnia, their lives were never the same. They suffered either physical wounds and/or mental trauma, in some cases that would last the rest of their lives. A number of the veterans died not long after returning home. Though not listed as official “fallen” soldiers, their deaths were without a doubt the result of the effects of war, and their families felt the same loss.

- After both World Wars, upon returning home, many veterans simply wished to forget their experiences. Others saw no point in reliving the horrors that they had witnessed, or telling of their experiences to those who could not relate.

Others learned that the civilian population had no understanding of, or little interest in, the hardships that they had endured. In Sarnia and across the country, almost everyone knew a family member, friend or neighbour who had fought in the war. The prevalent feeling in society was one of not wanting to dwell on the past and the pains suffered due to war. The feeling was one of we've won the war, so now it's time to move on to new jobs and opportunities. For returning veterans, suppressing memories of the traumatic realities that they had experienced, and suffering in silence, was their way of coping. Thus, the fallen soldiers, as well as many of the veterans, literally took their stories to the grave.

Women's Contributions

- **ON THE HOME FRONT:** During both World Wars, Sarnia families like all Canadian families had to make sacrifices in doing what was necessary to help win the war. With their sons and husbands overseas, women did their fair share and much more on the home front: they raised the children; worked in schools, banks and factories; and kept the fabric of society together. Many Sarnia women worked tirelessly in the home, combining that with war-related volunteer work with women's organizations. The Canadian government carefully managed the flow of information to the press and families, and they imposed strict wage and price controls. During World War I, families were urged to cut back on beef, bacon and wheat flour and to focus instead on fish, potatoes, oatmeal and cornmeal. Families were encouraged to adopt "Meatless Fridays" and newspapers published daily War Menus which set out meal plans and recipes that were heavy on vegetables and whole grains.

In both wars, Sarnia residents experienced shortages of many kinds of foods and commodities including meat, sugar, coffee, tea, potatoes, fruit, gasoline, rubber, textiles and even beer. These items were either rationed or available in limited quantity. Families dealt with rationing and food shortages in numerous ways, such as growing "**Victory Gardens**" in their yards, inventing new recipes with fewer ingredients and eating fish instead of beef or pork at least once a week. Like Canadians across the country, Sarnians donated blood and participated in salvage campaigns; made "ditty bags" for the soldiers overseas; knitted socks, sweaters and scarves for the soldiers; and collected everything from scrap metal, used shaving cream cans, toothpaste tubes, rags, newsprint and tinfoil to excess fat from cooking.

With so many men at war, older children and adolescents were encouraged to spend their summers on farms as "**Soldiers of the Soil**". The young boys would receive food, board, and spending money, and—in the case of high school students—an exemption from classes and final exams. The "Ontario Farm Service Corps" was an initiative aimed at girls and women. Known as "**Farmerettes**", the young women were recruited to help with the agricultural labour shortage. In addition to planting and harvesting crops, or in caring for livestock, women worked in the local industries. During the Second World War, more than 300,000 Canadian women held jobs related to war production.

Millions of Canadians, including thousands of Sarnia citizens, also contributed to the war effort by volunteering for various organizations. Volunteers invested countless hours and dollars in the Sarnia Red Cross, YMCA, Salvation Army, Canadian Legion, Knights of Columbus, YWCA, Sarnia Kinsmen Club, the I.O.D.E. (Imperial Order Daughters of the Empire), Rotary Club, Kiwanis Club, and a number of church groups. Local children raised money at their schools by, for instance, making and selling crafts and running lemonade stands to aid the effort. Sarnians contributed and invested in War Savings Certificates and Victory Bonds. Campaigns were carried on in schools, factories, businesses, churches and community associations encouraging citizens to voluntarily purchase the bonds and certificates in order to help finance and support the war effort. And all throughout the two World Wars, Sarnians on the home front read almost daily the official casualty reports listed in the *Sarnia Canadian Observer* and worried about the fate of their friends and loved ones overseas.^{N, SE}

- Two examples reflect the unceasing effort by local citizens. In September of 1941, Mrs. Alex Forbes, seventy-six, of 127 Crawford Street, had in two years knitted 189 pairs of men's socks for the soldiers, and numerous other pairs of socks, sweaters and mittens for refugees. Mrs. Forbes donated all of her knitted articles to the Salvation Army. In December of 1941, Mrs. L.W. Sandercock, seventy-seven, of Lakeshore Road, knitting an average of eight hours a day for six days a week, completed her 103rd pair of wool army socks in a little more than a year. Mrs. Sandercock donated all her knitted socks to the Red Cross.

- **NURSING SISTERS:** Canadian women, including many from Sarnia, have played many important roles in the country's military efforts over the years—one of the most vital is serving as nurses. Nurses had served in the Canadian Army Military Corps since the 1885 Northwest Rebellion. In the Boer War, twelve Canadian nurses volunteered and

served in South Africa, helping the sick and wounded, and saving lives by assisting in medical operations. They were called “Nursing Sisters” because they were originally drawn from the ranks of religious orders, and their uniforms, pale blue dresses and white veils, made them look like nuns. It marked the first time Canadian women served with the military overseas.^{D, 2I, 2N, 4P}

- **Cecily Jane “Georgina” Fane Pope** was born in Charlottetown, Prince Edward Island in 1862, the daughter of William Pope, a “Father of Confederation”. In an era when most women stayed at home, made a good marriage and had babies, she chose to be a nurse, when nursing was not a respectable profession. Georgina graduated from the Bellevue Hospital Training School in New York, a school established by Florence Nightingale, a nursing legend who had revolutionized army medical care. In 1899, nursing sister Georgina Pope returned to Canada and volunteered for service with British Medical Corps in the Boer War. She was chosen to head the first small group of four nurses accompanying the troops, arriving in South Africa in November 1899. Four more nurses followed.

The Canadian military valued these women so greatly that they were the first military in the world to grant officer status to a nursing branch. During their time in South Africa, Canadian women acting as nurses had the military rank, salary and benefits of lieutenant. The nurses originally worked at a 600-bed hospital north of Cape Town caring for the sick and wounded soldiers for five months. Later, Georgina Pope and the nursing sisters proceeded closer to the front at Kroonstadt, where they took charge of a military “hospital”, which was not more than a tent that moved along with the army. There, despite the long hours, threat of attack, crowded wards, shortages of food and medical supplies, extreme temperatures, bug infestations and being on constant lookout for snakes and scorpions, they cared for the wounded along with more than 200 soldiers suffering from enteric fever.

Georgina Pope returned to Canada in January 1901, the same year that the **Canadian Army Nursing Service** was made official. Georgina was one of its seven members. In March 1902, Georgina Pope returned to South Africa for a second tour of duty, the senior sister in charge of a group of eight Canadian nurses in Natal. When the war ended, she returned home again, and in 1903, Georgina Pope was awarded the Royal Red Cross Medal by Queen Victoria, for meritorious and distinguished service in the field, the first Canadian to receive this esteemed honour.

In 1906, Georgina Pope became a member of the new permanent **Canadian Army Medical Corps (CAMC)** and worked at the Garrison military hospital in Halifax, Nova Scotia. In 1908, she became the first Nursing Matron-in-Chief of the Canadian Army Nursing Corps, where she designed and administered training programs for military nurses. A visible mark of Georgina’s presence was her decision to change the nursing sisters’ uniforms from khaki colour to navy blue, and she also added an insignia in the shape of a maple leaf with a crown placed over the word Canada.^{F, 2I, 2N, 3T, 5E}

At the time of the Great War, Georgina Pope’s devotion to nursing had taken a toll on her health, yet at age fifty-five, she decided she was well enough to go overseas, arriving in September 1917. There she would serve briefly in England, before moving to No. 2 Canadian Stationary Hospital near Outreau, about twenty miles from the British lines in the Ypres salient. In her own words, *“Nothing...nothing in my experience of the Boer War prepared me for the sights of Flanders, for being bombarded and for the new and ‘improved’ weapons.... The Germans used a terrible green gas, a mixture of chlorine and bromine... The bullets were now larger and ripped their way through all tissues, shattering bone on the way. At times I felt helpless. Legs, feet, hands missing; bleeding stumps controlled by rough field tourniquets; large portions of the abdominal walls shot away; faces horribly mutilated; bones shattered to pieces; holes that you could put your clenched fist into, filled with dirt, mud, bits of equipment and clothing, until it all became a hideous nightmare – as if we were living in the seventh level of the inferno.”*^{5E}

Working day and night with little food or sleep, amongst the chaos caring for critically injured young men, often with German shells flying at the hospital and planes flying overhead, the stress continued to take a toll on her health. She was sent back to Canada in August 1918, suffering from health problems, including shell shock, and would retire to her home in Prince Edward Island. Known as “the Island’s Florence Nightingale”, in June 1938, Georgina Fane Pope passed away and was given a full military funeral in Charlottetown. Remembered for her strong leadership skills and selfless devotion to her patients, she played an essential role in the development of military nursing in Canada. She is one of fourteen figures from Canada’s military history commemorated at the Valiants Memorial, unveiled in Ottawa in November 2006.^{F, 2I, 2N, 3T, 5E}

- **ELIZABETH “ELSIE” MACGILL:** Some women were trailblazers in their fields, contributing to the war effort. One such woman was Elizabeth MacGill, who became the first woman aeronautical engineer and professional

aircraft designer in the world. Born in March 1905 in Vancouver, British Columbia, she would be the first female graduate of electrical engineering at the University of Toronto. After graduating in 1927, she worked as a mechanical engineer with Austin Automobile Company in Pontiac, Michigan. When the company started producing airplanes, she decided to learn more and, in 1929, from the University of Michigan, she would become the first woman to earn her Master's degree in aeronautical engineering.

After graduation, she was diagnosed with a form of polio and told that she would never walk again. This did not deter her. During her recovery, she would write articles on aviation, draft aircraft designs and study at the Massachusetts Institute of Technology (MIT), and would eventually walk again with the aid of two metal canes. In 1934, she would return to Canada to work for an aircraft company in Quebec as an assistant aeronautical engineer. Prior to the war, as the world's first practicing woman aeronautical engineer, she would work on designing several aircraft and would take part in dangerous test flights.

In 1938, she became chief aeronautical engineer at Canadian Car and Foundry Company (Can Car) in Fort William, (now Thunder Bay, Ontario), where she headed the Canadian production of **Hawker Hurricane** fighter planes during the Second World War. Each Hurricane required 60,000 perfectly manufactured parts, and Elsie MacGill pioneered a unique modular construction system inspired by Meccano sets. MacGill oversaw the training and production work of a skilled workforce she created of which half of the 4,500 workers were women. By 1943, Can Car had produced 1,451 Hawker Hurricanes.

The first 40 Hawker Hurricanes off the production line were deployed during the Battle of Britain where they made an instrumental impact. By battle's end, 1,715 Hurricanes had seen combat—accounting for 1,593 of RAF and RCAF's total 2,739 kills. Although the Hurricane was unable to match the German (Messerschmitt) Bf-109's maneuverability and speed, the Hurricane had a tighter turning arc. This gave the Hurricane an edge in dogfights.

Elsie MacGill also designed a winterized version with skis and de-icing equipment (the first successful winterization of a high-speed aircraft). Numerous articles were written about MacGill and, in 1942, the *American True Comics* series ran a story about her in which they dubbed her the "Queen of the Hurricanes." Her contribution to the war effort made her a Canadian war hero.^{F, 2N, 2E, 6H}

- **IN THE MILITARY:** During World War I, Canadian women were not permitted to serve in military roles, however it did not stop thousands of Canadian women from volunteering their services, eager to serve in any capacity, and financing their own passage to England. Many of the women had brothers or fathers serving in the Canadian Expeditionary Force. Countless Canadian women frustrated by the limited openings in our Canadian services went overseas to serve in British volunteer organizations such as the Royal Army Medical Corps, First Aid Nursing Yeomanry (FANY), Voluntary Aid Detachment (VAD), and Women's Ambulance and Transport Service (WATS).

Of note: **Women drivers** were frowned upon until the Great War, but as members of FANY, they became the very first women to drive motor vehicles for the British Army, proving their mettle as drivers, replacing men who were needed at the front. These civilian volunteers drove supply trucks, set up field soup kitchens, operated mobile hot baths and canteens, all close to the front lines. This soon developed into an ambulance-driving role. Trained in first aid, the driver's duties included chauffeuring wounded from battlefield casualty clearing stations to field hospitals and trains, and meeting hospital trains and barges to take the wounded to hospitals. Frequently the driving was done at night, on muddy roads full of shell holes, under the threat of enemy shellfire, with the wounded moaning, crying or screaming in the open-cabin ambulances. The ambulances could break down with unreliable engines, little suspension, and tires prone to puncture, spare parts and gasoline were often sparse, and they often reeked of vomit, blood and gangrene. The women drivers of the Great War earned the approval and respect of the soldiers, becoming known as "angels behind the wheel".³⁰

Driver **Evelyn Gordon-Brown** of Ottawa was the first Canadian woman to win the Military Medal. In May 1918, she and four other FANY members courageously rushed their ambulances into a burning ammunition dump, successfully rescuing all the wounded men there.

- In recognition of the critical work of the doctors, nurses, and orderlies, "Royal" was added to the title of the CAMC in 1919. During World War I, approximately 3,100 Canadian women volunteered their services in the **Royal Canadian Army Medical Corps** (RCAMC). Of those, some 2,500 served overseas as Nursing Sisters in military hospitals and casualty clearing stations, attending to the many wounded soldiers on all fronts. Most of the WWI

Canadian Army Medical Corps nurses came from middle-class families, their average age was 24 and their marital status was mostly single, with many being trained nurses before the war. Canadian nurses were the first in the world to be given officer status, equivalent to the rank of lieutenant, which was higher than the status of their British counterparts.

These nursing sisters were often situated close to the front lines of Europe and within range of enemy attack. Nicknamed “**bluebirds**” by soldiers because of their blue dresses and white veils, they were exposed to the same horrors as soldiers—hospital ship attacks, air raids, shell fire, primitive working conditions, dreadfully long hours, gas attacks, exposure to disease, rats and fleas and climatic extremes.

As patients arrived by truck or rail, the nurses were among the first to meet wounded soldiers, cleaning wounds and offering comfort. They assisted in surgery and often had primary responsibility for cleaning post-surgical wounds, watching for secondary infections, and caring for wounds daily, bandaging and re-bandaging injuries. They worked tirelessly with selfless dedication caring for the wounded; a comforting face from home, and in many cases, they were the last faces young men saw before they died.

They were greatly respected because of their compassion, bravery and courage. They earned 328 decorations, among them the Military Medal for gallantry and devotion to duty under fire, and the Royal Red Cross. They earned the affection of thousands of Canadian soldiers who often referred to them as “Sisters of Mercy” or “**Angels of Mercy.**” Approximately 50 of these brave women died during the Great War from enemy action, or from disease. A sculpture in their memory was erected in the Centre Block of the Parliament buildings in Ottawa in 1926.^{D, 2I, 2N, 4P, 4X}

- The following are portions of three letters printed in the *Sarnia Observer*, each one written by a wounded Sarnia boy during World War I:

- I got mine at the Somme. Am now back in a field hospital just back of the line. This place is wonderfully complete. One could not have better care in the most perfectly equipped hospital in Canada. The nurses are simply magnificent, always bright, and cheery and tender and watchful. I simply lie here and watch them move from cot to cot and ask myself how can they do it, day by day, week in week out, deprived as they must be of money, conveniences and comforts they were accustomed to back home. Don't worry, I'll be all right.

- Yes, I got a pretty dirty hit, it sure was a close one, but you see I am all O.K. now....It was worth while just to get back to Blighty and to be in this beautiful ward in this splendid Canadian hospital....Our day nurse is just coming in. She is a Toronto girl, a real girl, you bet. What would we fellows do if these Red Cross Sisters had not crossed the pond to take care of us. They have saved tens of thousands of lives and have made Blighty a place to be longed for by tens of thousands of men... I am going to be all right, thanks to the doctors and nurses of this Red Cross hospital.

- I am in a hospital in London lying between clean white sheets and feeling for the first time in months clean all over. Up and down the ward with swift precision, the nurses move softly. Two faces loom out in memory. One is the surgeon's. I think of him as a Christ in khaki. The other face is of a girl. She has an ivory white complexion and spends all her days tending to any soldier with loving service. Her eyes are weary, only her lips hold a touch of colour. They have a childish trick of trembling when anyone's wound is hurting too much. I wonder what she did before she went to war, for she's went to war as much as any one of us.

- During World War II, Canadian women continued to serve the crucial role of “Angels of Mercy” as they did in World War I, saving lives by assisting with medical operations and caring for convalescing soldiers. Approximately 4,500 women served as nursing sisters in all three branches of Canada's military, with more than two-thirds of them serving overseas. These nursing sisters wore a military uniform with a traditional white veil. They were commissioned officers and were respectfully addressed as “Sister” or “Ma'am.” The nursing sisters got closest to the front lines in casualty clearing stations, field dressing stations and field surgical units. They served in Hong Kong, Western Europe, Africa, Sicily and Italy. As in the First World War, Nursing Sisters faced many dangers and obstacles in trying to provide medical care in the battle zone. For example, during an air raid on Catania, Sicily, on September 2, 1943, an anti-aircraft shell fell on No. 5 Canadian General Hospital and twelve Nursing Sisters were wounded.

As soon as the Normandy beachhead was cleared in the summer of 1944, the nursing sisters were sent over. Red Cross officer Jean Ellis wrote, “...Approaching shore, we could see a mass of people on the beach. They waved and shouted and surrounded us the minute we landed... Soon we were loaded into open trucks and set off, driving through village after village amid lines of cheering lads. As we passed troops in fields along the way, we sang ‘The

Maple Leaf Forever' and 'O Canada' to let them know that 60 Canadian girls had come to share their job. Many times our convoy was forced to stop and soldiers would dash over to shake hands.... We saw many tears. Before long a lot of us were feeling them trickle down our faces. We knew that we reminded the boys of their womenfolk at home...and they reminded us of boys we would never see again." As the front moved across northern France and into Belgium, in pursuit of the fleeing German armies, the medical units and nursing sisters moved with them. Seventeen Canadian nurses who lost their lives during the Second World War are honoured in the Book of Remembrance in Ottawa.^{D, 4I, 6F, 7A}

- Before the nurses had arrived, the doctors and surgeons were so hard pressed that recovering patients were not always monitored with vigilance, and some men succumbed to their wounds because of shortages in medical personnel. Those losses were slowed with the arrival of the dedicated nurses. Changing bandages and watching for complications, they also administered morphine when it was available. For the injured who were stabilized, the nurses offered a smile, a kind word, or a cigarette. Such generosity profoundly affected the wounded, afraid and far from home. Many of the nurses took on the task of writing to families, informing them of a man's injuries and, sometimes, his last words. It was heart-rendering work, and it couldn't have been more important. A Canadian veteran of the Italian Campaign who was in the hospital for malaria and later wounded in battle, felt the nurses were, *"a secret morale builder... Not enough can be said about these angels of mercy. Many a soldier survived the war due to their care and devotion, above and beyond the call of duty."*^{D, 4I, 6F}

- During World War II, Canadian women would also serve in other military roles, with some 50,000 eventually enlisted in the air force, army and navy. About half of the women who signed up were married, supplementing family incomes as their husbands went into the military services, or earning a steady wage for the first time themselves. Young women from Sarnia served in all three of the following:

- **Royal Canadian Air Force – Women's Division (RCAF-WD):** A Privy Council order authorized the creation of the Canadian Women's Auxiliary Air Force on July 2, 1941. It was renamed the Royal Canadian Air Force Women's Division on February 3, 1942 and grew to approximately 17,000 members by war's end. Initially trained for clerical, administrative and support roles, but as the war continued, women would also work in other positions like parachute riggers, laboratory assistants, intelligence officers, wireless operators and in the electrical and mechanical trades. Many members were sent to Great Britain to serve with Canadian squadrons and headquarters there. During the Second World War, even with a pilot's licence, women in the Royal Canadian Air Force-Women's Division were not permitted to fly. A few Canadian women did join the Air Transport Auxiliary (ATA) in England, where they flew brand-new bombers and transport aircraft fresh off factory lines, ferrying them to military sites in England and Europe.

- **Canadian Women's Army Corps (CWAC):** It was officially established on July 30, 1941, and recruiting started in September. The Service was officially integrated with the Army on March 1, 1942 and grew to approximately 21,000 members by war's end. The CWACs had a collar badge showing Athena, the helmeted goddess of war, and a cap badge with three maple leaves. Initially, members' duties were traditional and they worked as cooks, cleaners, tailors and medical assistants. These duties would expand to include driving trucks and ambulances, ciphering and decoding, and working as mechanics and radar operators. While most CWACs served in Canada, three companies of female soldiers, approximately three thousand members were posted overseas in 1943.

- **Women's Royal Canadian Naval Services (WRCNS):** They were also known as "Wrens" after the nickname of their British Royal Navy counterparts. It was established on July 31, 1942 and grew to approximately 7,000 by war's end. Initially they performed clerical and administrative tasks, and would expand on these roles to do things like being motor transport drivers, on-shore radar operators and coding technicians.^{D, 2I, 2N, 7P}

- During the Korean War, more than 5,000 Canadian women were recruited for military service, including sixty Nursing Sisters who served in Korea and Japan. The Canadian nurses were again faced with providing medical services in a combat zone. They also faced the daunting challenge of fighting battle-inflicted injuries, and infectious disease. When the ceasefire came into effect in 1953, the Sisters worked with the newly-released prisoners of war, helping to restore their physical health.^D

- Since the onset of the Cold War followed by the Korean War, Canadian Peacekeeping missions and in the Afghanistan War, Canadian women, including women from Sarnia, have volunteered to serve in all capacities of the military and been deployed on missions around the world and sacrificed in the cause of peace and freedom.

The Contributions of the Canadian Red Cross and Other Organizations

- The Canadian Red Cross Society was one of the leading wartime humanitarian organizations. Founded in 1896, when Canadian soldiers went overseas to fight in the Boer War in 1899, it began its work to help the sick and wounded in that war. They collected donations of money and goods, providing a wide range of medical supplies and invalid foods. From the outset of World War I, the number of Canadian Red Cross branches and auxiliaries (church groups, clubs, etc.) exploded. Women were especially active in their support; knitting socks, scarves, sweaters, and other items; producing medical supplies by the millions; packing food parcels for prisoners of war; producing jam and other canned foods for invalid soldiers overseas; donating countless hours of voluntary labour and large sums of money for relief work. They also set up bases in Britain and France to work with sick, wounded and captured soldiers; they worked in tracking missing soldiers; they carried out correspondence with family members of the soldiers back at home; and they served as cooks, transport drivers, ambulance drivers, and nurses' aides.

The vital humanitarian role of the Canadian Red Cross Society in World War II continued, and even expanded to include aid to civilian victims of the war (particularly bombed out British civilians during the Battle of Britain). The Red Cross also developed a trained, uniformed Corps of women volunteers that served overseas and escorted war brides across the Atlantic; and for the first time, they developed a blood program, where civilian blood was collected for use in the new life-saving procedure of blood transfusion. For prisoners of war, the Red Cross packages that included treats and sweets, cigarettes and canned foods, were vital for their survival. If prisoners had been forced to subsist on the German food alone, many more would have starved to death.^{2Y, 41}

- **Lois MacDonald** was one of the young women in the Canadian Red Cross serving in Europe during World War II. She left her comfortable middle-class life in Ottawa to go overseas with the Corps; *"I felt as I did not have any brothers, I had an obligation to take part."* She worked as a hospital aide in England, France, and Belgium. Following is a portion of a letter she wrote home from Bruges, Belgium in March 1945;
Dearest family;

Here it is my 25th birthday, and also my day off... and will try to give you an inside glimpse of our work at the hospital. To do our job properly and perfectly – one would need to be a Master of Psychology, a glamour girl, a Comedian, a Dorothy Dix [an advice columnist], a Florence Nightingale, a Santa Claus, a fount of Wisdom and Information, with the patience of Job, all rolled into one. This must sound like a pretty tall order... but we do try, and one certainly learns by experience.

To learn how to handle people, to get the most of them – to do as much as possible for the boys – without letting them impose. To let them treat you as a sister or girlfriend... to know when and where to offer sympathy – strangely enough – very few really want it. Understanding goes a lot farther. They like to be babied and spoiled and get extra favours – and are very easily pleased. If you remember that they like Winchesters rather than Sweet Caps, or remember their names, or ask about their favourite son or daughter, or even if you only make a special trip back to the Ward, with a chocolate bar or gum, when they are coming out of an operation.

... Most of the lads are young and strong, and while it breaks your heart to see them maimed, disfigured or handicapped – it's fatal to let them know – because they accept our reaction to their loss of limb or disfigurement – as the reaction of their loved ones when they get home. If we can look at them, straight, and regard their loss as unimportant, and even joke about it – instead of looking at them, with eyes averted from an empty sleeve – they lose their self consciousness and soon laugh about it too. Perhaps it's laughter from a sense of relief – as the thought of going home and being stared at and pitied, really scares them...

They tell us the strangest and most hair-raising tales of their lives and loves. Some true enough, but very often embellished with extra details... We offer advice to the lovelorn, sympathize and laugh, too, when their gal at home turns off and marries a Zombie [a conscript]. Tell them to keep writing, even if they are not receiving mail, we are absolutely sure the folks at home are writing faithfully. Sometimes we write them letters ourselves and toss it in the Ward mail so that they will at least get something when the mail is being distributed...

Just knowing these lads – watching them day by day – seeing how much they think of each other – how kind they are and ready to help – yet their complete independence, their courage, their pride in their own Regiment, their ability to get the very most out of life, and their constant thought and goal – Canada and home. It really restores your faith in human nature. We really do little for them, in return for what they have given us...

Much love, my dears. Lois^{7A}

- During World War II for the **Sarnia Red Cross Society** on Queen Street, the tracing of wounded or missing men,

and the tracing of refugees was one of the biggest tasks taken on by the organization. For parents that received the terse cable, "REGRET TO INFORM YOU THAT YOUR SON IS REPORTED MISSING IN ACTION," the Red Cross would be the first place to turn to. If the missing soldier was found to be a prisoner-of-war, the Red Cross became his "angel of mercy". For local European-born families whose relatives had been unreported since the Nazi armies swept through much of Europe, the Red Cross would again be the organization to turn to. With its world-wide information network, based out of the International Red Cross committee in Geneva, Switzerland, the Sarnia Red Cross could probe for details and gradually construct the fragments into a full story, joyful or sad, for the parents and families.

- The following are several examples of the willingness of Sarnians to support the victory efforts through the Red Cross:

- In October 1915, the British Red Cross Society asked Ontario cities to contribute funds to their organization. In a one-day whirlwind blitz conducted by over two hundred collectors throughout the city, over \$10,000 was contributed by Sarnia citizens. The Red Cross collectors reported, "The willingness and readiness of the people of Sarnia to contribute was the outstanding feature of the day. Everybody was ready, everybody enthusiastic and everybody wished it was twice or ten times as much."

- In mid-November 1939, the Sarnia Red Cross Society began an initial campaign to raise funds for war work, setting an objective of \$18,000. Canvassers volunteered their time spreading throughout the city going house to house in search of subscriptions. By the end of November 1939, Sarnia citizens had contributed over \$22,000 to the Red Cross War Fund. The more than one thousand employees at Imperial Oil Limited alone contributed just over \$8,000.

- In June 1940, the National Red Cross made an urgent appeal for assistance in France for the wounded and for the five million refugees. Within three days, the Sarnia branch of the Red Cross was able to collect donations and dispatch a huge supply of dressings, gauze, bandages, compresses, pajamas, surgical gowns, bed pads, surgical towels, knitted clothes, hospital gowns, socks, scarves, sweaters, helmets and blankets. At the same time, the Sarnia Red Cross was collecting waste materials across the city that would be sold for money for the war effort. Households were contributing papers, magazines, scrap iron, aluminum pans, automobile tires and tubes.

- The Sarnia Red Cross Society established a blood donors' clinic in 1942, beginning with twenty clinics in Sarnia that year. In 1943, that increased to seventy-one clinics; fifty in Sarnia, seven in Petrolia, five in Wyoming, four in Oil Springs, three in Brigden and two in Sombra. During the two years that the clinic operated, a total of over 7,300 contributions of blood were given. The donated blood was sent overseas for the servicemen.

- In September 1940, a letter was received at Canadian National Red Cross headquarters and then sent on to the Sarnia branch. The letter from Mr. B.E. Astbury, who was chairman of London's organized relief forces, was directed to the patriotic women workers who had given so much time in making garments and supplies for those in bomb-stricken areas of London, England. The following is a portion of that letter;

I cannot think of even interrupted rest without asking the Canadian Red Cross to send to the people of Canada an expression of our heartfelt gratitude for the goods which they sent through their Red Cross to hundreds rendered homeless by barbarous and wicked attacks on civilians. Before the raids began you had already supplied several thousand blankets, which we had distributed to our offices in district centres, a blessing so great that the people of Canada can never realize its importance when we were able to supply those families rendered homeless in the first raids. With conditions steadily growing worse, government shelters, stocked only with bully beef and bread, could not supply blankets, clothing or food to the hundreds besieging relief centres. I turned to the Canadian Red Cross in this country.

I want the people of Canada to know that within two hours of our appeal, you had started delivering lorry loads of food, clothing and blankets, and these were unloaded during the most terrific air raids. For two days we worked like dock laborers and the Canadian soldiers who delivered your goods worked alongside us, refusing to take cover or cease work as German planes zoomed overhead. I wish the women of Canada could have seen the incidents which alone would convey to all Canadians the greatness of your gifts and the necessity for them. A father whose home had been destroyed, and who left his wife and children, to seek warm covering for them, stooped and kissed the bundle of four blankets given him. One of the children, at another centre, clad only in night attire, clutched her bundle of warm garments and wiped her tears as she cried; "Look mummy, they're new."

- In December 1941, Mrs. Charles C. Clarke of 121 Forsythe Street, Sarnia, received a letter from Major Gordon McIntyre, acknowledging a Christmas gift of chocolates sent to him by the Ladies Field Auxiliary, Sarnia. Major McIntyre was the first commanding officer of a field company of Royal Canadian Engineers formed in Sarnia and mobilized at the start of the war. The following is a portion of that letter:

It thrilled me to think that you ladies still keep me in mind. Although I have commanded two units since and am now at headquarters, I may say without exaggeration that the boys I had from Sarnia were the best bunch of lads that ever came across the Atlantic. I was talking to Col. (A.G.) MacLean who commanded them after I left. He thinks they are the best field company in the Canadian Army overseas. I have heard a lot of good things said about them which always makes me stick out my chest and say that I was one of them once. They are a unit to be proud of and already making a name for themselves. The world will hear more of them. They may be considered 'crack' troops and the cream of the Canadian Army. I am very proud to have been associated with them.

- In August of 1944, according to J.O. Laird, organizer of the national salvage campaign with the Department of National War Services, Sarnia had a record of the highest collection of salvage per capita of any place in Canada. This was a significant compliment to the people of Sarnia who saved their salvage and to the Red Cross-I.O.D.E. Conservation Committee that collected it.
- During World War II, two other relief organizations that Sarnians supported were the Canadian Russia Fund and the Queen's Canadian Fund for Air Raid Victims. During a ten-day Russia Fund drive in February of 1945, more than 1,000 pounds of clothing was received by the local headquarters of the Canadian Aid to Russia Fund located in the basement of the Western Fur Company at 135 North Front Street. Cash donations and thousands of articles, including a variety of children's, men's and women's garments, were collected from local citizens, students and businesses and shipped to Russia.

Sarnians also donated to the Queen's Canadian Fund that gave aid to British bomb victims. One of the numerous reports of a victim aided by the Queen's Fund was that of a 73-year old man who lived with his wife in England. After their home had been struck by a V-bomb, they went away while first aid repairs were made to their house. When they returned to it, they were overwhelmed to receive aid from Canada. In April of 1945, the Sarnia and Lambton County portion of the Queen's Canadian Fund donated by local citizens was approximately \$13,000.

Animals in War

- Animals have demonstrated an enduring partnership with humans during times of war, serving with unwavering loyalty and dedication. They often shared the same horrific conditions endured by their human counterparts. Dogs, cats, and other pets softened the hearts of soldiers living in the maelstrom of violence. Horses, mules, dogs and pigeons have served as a means of transportation and protection, as beasts of burden, for medical support, for detecting explosives, as messengers, scouts, and sentries, while others provided companionship, comfort and morale as pets and mascots, and as therapy animals for soldiers suffering PTSD.
- In the Great War, horses and pigeons especially were worked very hard in dangerous conditions, which often caused their death from exhaustion or enemy action. Horses were utilized for the cavalry and were essential for the transportation of equipment, soldiers and the wounded. Many horsemen developed a special bond with their animals, believing that they had special sensitivities that humans lacked. One Private stated, *"I believe my saddle horse knew more than I did and it is one of the reasons why I lasted as long as I did. He took care of me."* More than eight million horses died during World War I. More information on Canadian cavalry and Canadian horses in on page 96.

Pigeons were a reliable method of communication from the front lines to the rear, especially during the Great War when telephone lines were frequently cut by artillery fire. As an attack was underway, soldiers at the head of the advance released pigeons to inform headquarters of their progress. Artillery support and reinforcements could then be provided as necessary. Pigeons were valued for their impeccable homing instinct as well as their speed, which made it very difficult for enemy marksmen to shoot.^{6E}

- On June 6, 1944, the first news of the D-Day invasion was brought back to Britain by an RAF homing pigeon named "**Gustav**". Just over half an hour after the invasion began, a Reuters war correspondent released Gustav. Flying through thirty-mile-per-hour headwinds, dense cloud, and sporadic enemy fire, the pigeon completed the journey across the English Channel to his home loft in just five hours, sixteen minutes. A British sergeant removed the message strapped to Gustav's leg and relayed it to London: *"We are just 20 miles or so off the beaches. First*

assault troops landed 0750. Steaming steadily in formation. Lightnings, Typhoons, Fortresses crossing since 0545. No enemy aircraft seen.” Gustav was awarded the **Dickin Medal**, the animal equivalent of the Victoria Cross.^{4S}

- During World War I, dogs and cats walked freely among the men in the trenches. Many were abandoned animals that the soldiers soon adopted. The pets provided companionship, comfort and a link with ordinary pre-war life. Cats and dogs were also valued for their rat-snatching abilities. Yet the front was dangerous for animals and humans alike. Many pets were lost in the poison gas wastelands. One Canadian soldier wrote to his wife in February 1917, “*My poor kitten who has not been well for some days died this morning after a fit. I am really quite upset. We had become such great friends. I and he always used to sleep in my sleeping bag. He was much more like a dog than a cat.*” Soldiers who had seen hundreds of men killed and wounded, were hurt in a different way at the loss of a beloved pet.^{6E}

- The most famous Canadian mascot was a black bear cub named *Winnipeg*. “**Winnie**”, was an orphaned bear cub that had been purchased for \$20 during a stop on a train platform in White River, Ontario by Canadian soldier Lieutenant Harry Colebourn, a veterinary officer with a cavalry regiment. Colebourn named the gentle cub after his hometown Winnipeg, soon shortened to Winnie. The bear cub soon proved to be a favourite among the soldiers, a hit at training camps in Valcartier, Quebec, and then overseas in England. Winnie became the 2nd Canadian Infantry Brigade’s mascot and their beloved pet in Salisbury Plains, England. The cub was gentle and friendly to all and, to the delight of soldiers, did a number of tricks, including climbing the centre pole of the soldiers’ tents.

When Colebourn was deployed to France in 1914, he decided to place Winnie in the London Zoo, rather than subject him to the rigours of the front (between 1914 and 1917, at least a dozen black bears were presented or deposited at the London Zoo by Canadian regiments). Winnie became a popular attraction there and delighted thousands of visitors, including that of author Alan Alexander Milne and his son, Christopher Robin. Winnie was so tame and trustworthy that children, including Christopher Robin, would play with her, ride on her back and allow them to feed her by hand. A.A. Milne was inspired and went on to publish *Winnie-the Pooh* in 1926. On Winnie’s death in 1934, several London newspapers wrote obituaries.^{3X, 6E}

- “**Gander**”: An example of a mascot that became a hero was the Royal Rifles of Canada Regiment mascot Gander, during World War II. Gander was a massive Newfoundland dog acquired by the Royal Rifles battalion while they were stationed at the Gander airport. In the fall of 1941, the Winnipeg Grenadiers, along with the Royal Rifles Regiment, including “Sergeant” Gander, were sent to Hong Kong to defend it from enemy invasion. Not only was Gander a beloved mascot, but he had a job to perform—he would bark and snap at the legs of the enemy and scare them away. He was also a smart dog; he knew what a grenade was and how it could hurt people.

On one December night in 1941, Gander saw a grenade tossed by an attacking Japanese soldier near a group of wounded Canadian soldiers. He ran to it, took it, and rushed away with it. The grenade exploded and Gander was killed. But he had saved the lives of the seven soldiers. In 2000, Gander was posthumously awarded the Dickin Medal, often referred to as the “Animals’ Victoria Cross”, for his conspicuous gallantry and devotion to duty. On the Hong Kong Veterans Memorial Wall, unveiled in Ottawa in 2009, Gander’s comrades made sure his name was etched in stone alongside the 1,978 Canadians who fought defending against the Japanese forces that invaded Hong Kong. In November of 2012, the “**Animals in War Memorial**” was unveiled in Confederation Park, Ottawa.^{D, E, 2E, 2I, 3Y}

- **Goats** have often been a popular mascot. During World War I, the 5th Battalion’s mascot, “Sergeant Billy”, was featured in a popular Canadian soldiers newspaper, “*Sergeant Billy enlisted at Broadview, Saskatchewan, on August 5, 1914. He has never left his unit, although he has been wounded, suffered trench feet, and has been shell-shocked.*” Like his comrades, Billy was known to like beer. The 21st Battalion had “Nan”, a white goat that was well known for nuzzling with the men and swiping food. On the march to the Somme in the summer of 1916, a new officer found the goat a burden and sold her to a French farmer. The battalion was outraged and staged a rescue. In a nighttime stealth operation, Nan was saved and went on to serve with her battalion all the way to Germany.

In December of 1939, the 26th Lambton Battery, Royal Canadian Artillery was moved to Guelph for the winter. Their mascot, a goat named “Cordite”, disappeared mysteriously the night before the Sarnia battery moved to Guelph. Feeling a deep loss in the lack of a mascot, some of the Sarnia boys who had been home on leave for a weekend, turned up with a new mascot for the unit, a Shetland pony. The pony was an immediate success with the men. He was about five months old; a little larger than a dog; his long coat giving him a striking appearance; and he

had an unusual characteristic—the pony liked to ride in automobiles. One member of the battery said that he curled up on the back seat of a car like a dog, and resented it keenly when he was required to move out.^{N, 6E}

Dulce Et Decorum Est

*Bent double, like old beggars under sacks,
Knock-kneed, coughing like hags, we cursed through sludge,
Till on the haunting flares we turned our backs
And towards our distant rest began to trudge.
Men marched asleep. Many had lost their boots
But limped on, blood-shod. All went lame; all blind;
Drunk with fatigue; deaf even to the hoots
Of tired, outstripped Five-Nines that dropped behind.*

*Gas! Gas! Quick, boys! – An ecstasy of fumbling,
Fitting the clumsy helmets just in time;
But someone still was yelling out and stumbling,
And flound'ring like a man in fire or lime . . .
Dim, through the misty panes and thick green light,
As under a green sea, I saw him drowning.*

*In all my dreams, before my helpless sight,
He plunges at me, guttering, choking, drowning.*

*If in some smothering dreams you too could pace
Behind the wagon that we flung him in,
And watch the white eyes writhing in his face,
His hanging face, like a devil's sick of sin;
If you could hear, at every jolt, the blood
Come gargling from the froth-corrupted lungs,
Obscene as cancer, bitter as the cud
Of vile, incurable sores on innocent tongues,
My friend, you would not tell with such high zest
To children ardent for some desperate glory,
The old Lie; Dulce et Decorum est
Pro patria mori.*

*By Wilfred Owen
1918*

*NOTE: The title “Dulce et decorum est” comes from the poet Horace, and is roughly translated to,
“It is sweet and proper to die for one’s country.”*

THE BOER WAR (1899-1902)

Following is a description of important historical events, people and key battles of the Second Boer War (South African War, 1899-1902). Sarnia-Lambton's sons participated in every major battle fought by Canadians.

- The First Boer War had been fought from December 16, 1880 to March 23, 1881. The Second Boer War (South African War) was fought between October 11, 1899 and May 31, 1902.
- The word “**Boer**”, comes from the Dutch word for farmer. The first European settlers in South Africa were Dutch immigrants from the Netherlands in 1652. They first settled near the Cape of Good Hope to establish a station where ships traveling to the Dutch Indies could rest and resupply. French Protestants, German settlers, and other Europeans joined the Dutch in South Africa. Despite their diverse nationalities, the “Afrikaners” (means “Africans” in Dutch), also known as Boers, slowly developed their own language and culture. For 150 years, the Dutch were the predominant foreign influence in South Africa. However, in 1795, Britain gained control of the country, and many British government officials and citizens settled there, and conflict ensued.

By 1806, the British Empire had seized control of the Dutch Cape of Good Hope territory on the southern tip of Africa. By 1836, many of the Boers, descendants of the region's first Dutch immigrants—unwilling to submit to British rule—had left the Cape Colony, trekked north into the interior African tribal territory, and established two independent republics: the **Orange Free State** and the **Transvaal Republic**.

- **THE CAUSE OF THE BOER WAR:** The discovery of diamonds (in 1867) and gold (in 1886 in Transvaal) brought about rising tensions which led to war between the British Empire and the two independent Boer republics in 1880 and again in 1899. The First Boer War was fought from December 16, 1880 until March 23, 1881 between the British and the Boers of Transvaal. The war resulted in Britain's accession to the establishment of the Second Republic, or Transvaal Republic.

In 1899, the British Empire, at the height of its power, had two South African colonies (the Cape and Natal), but also wanted control of the neighbouring Boer States, especially Transvaal and its rich gold fields. The Boers, deeply religious and adhering to a strict Calvinism that was intolerant of other faiths, were fearful of losing their last territory to the “Uitlanders” (outsiders). Britain's pretext for war was the denial of political rights by the Boers to the growing population of foreigners—mostly immigrants from Britain and its colonies—who worked the Transvaal gold mines. During this time, Canada's Parliament passed a resolution in support of the Uitlanders, but Prime Minister Wilfred Laurier made sure it did not suggest that Canada was offering military support.

During political negotiations in 1899, the British increased pressure on the Boers when they moved troops into the border region. Unlike the world wars of 1914 and 1939, Mother Britain was not in danger—this was a war about gold and land.

On October 11, 1899, the Boers launched a pre-emptive military strike against the British troops mustering on the border of Natal and the Second Boer War began. The Boers laid siege to the towns of Ladysmith, Kimberley and Mafeking. The British, with stronger forces, spent the first part of the war liberating the areas occupied by the Boers but could not engage them in the type of set-piece battle that they were used to fighting. Instead, the Boers remained elusive, harassing the British with ambushes and exhausting them with long retreats into Boer-familiar territory.^{D, 2I, 2N, 4A, 6P, 11C}

- **YOUNG CANADA:** The Canada of 1899 was a young nation, only thirty-two years old, made up of seven provinces with a mere population of seven million people widely scattered across the country. When the Boer's declared war on Britain on October 11, 1899, the British Empire called on its overseas colonies including Australia, New Zealand, India and the Dominion of Canada to join the battle for Mother Britain.
- **CANADIANS DIVIDED:** Participation in a war in South Africa by Canadian soldiers was a very divisive issue in this country. Pro-Empire Canadians urged the government to help. English Canada had an intense loyalty to the British crown at the time, only having celebrated Queen Victoria's Diamond Jubilee in lavish fashion across the country in 1897. [In 1891, Sarnia's Market Square had been renamed Victoria Park in honour of Queen Victoria]. Most French Canadians and many recent immigrants were opposed to sending troops overseas to support growing British imperialism. Canadian Prime Minister Wilfred Laurier wanted nothing to do with the imperial war, fearing it could fracture the delicate union between English and French Canada. With intense pressure coming from the British

Colonial Office, many powerful militia officers and press and public calls for action, Laurier was forced to act. He authorized \$600,000 to raise, equip and transport a contingent of soldiers who volunteered (1,000 infantrymen) to South Africa. In turn, the British would pay the Canadian soldiers' wages, maintenance costs and arrange for their return home upon completion of their service.^{D, 2I, 2N, 4A, 6P}

- **NEWS IN SARNIA:** Sarnia citizens learned the details of recruitment in the mid-October, 1899 *Sarnia Observer* (a weekly paper then), with the headline reading, "The Orders Issued – Mobilization of the Canadian Force Proceeding – 1,000 Volunteers to be Taken." Some of the local details provided in the *Observer* that day included;
 - the Canadian contingent would mobilize at Quebec and sail from there.
 - the volunteers would be organized into eight companies of Infantry for active service in South Africa.
 - one thousand volunteers would be accepted.
 - rations, clothing and equipment would be provided free.
 - enrollment centers were in Victoria, Vancouver, Winnipeg, London, Toronto, Ottawa, Kingston, Montreal, Quebec, St. John, N.B., Charlottetown and Halifax.
 - volunteers had to have minimum height of 5 feet 4 inches, age between 18 and 45 years, and be able to pass certain physical requirements.
- **RECRUITING:** Across Canada, response for volunteers was overwhelming. Many white collar professionals, as well as working class men, attempted to join the special battalion. Some militia officers even resigned their commissions, volunteering to enlist and serve as privates in the conflict. There were so many volunteers that a selection process based on health, marksmanship and prior military service was instituted, and still large numbers of applicants were turned away. The men of the first, and later the second contingent, signed on for a year's service (or until the termination of the war, whichever came first).^{6P}

The recruiting of soldiers from southwestern Ontario was conducted by the Royal Canadian Regiment of Infantry out of Wolseley Barracks in London, Ontario. The companies of this Regiment were designated the 2nd (Special Service) Battalion, Royal Canadian Regiment of Infantry. Most of the Sarnia-Lambton County volunteers enlisted within a few weeks of the outbreak of the Boer War.

- The following is a story from the *Sarnia Observer* from late October 1899;

SARNIA CITIZEN'S APPRECIATION

Shown for the Boys of No. 7 Company

Who Have Enlisted to Accompany the Canadian Contingent to South Africa

When the news that several Sarnia boys had enlisted to go to South Africa became known about town this morning, a general feeling of pride at their pluck and heroism and regret at their departure from town took possession of the average citizen. Many were the complimentary remarks passed and hopeful wishes expressed that "the boys" would have a pleasant voyage to the far off country to which they have volunteered to go, and a safe return to their home and relatives in Sarnia. Shortly after the information became known that several local boys had enlisted, a number of Sarnia citizens formed themselves into a committee and drafted the following letter which speaks for itself:

Sarnia, Oct. 23rd, 1899

Capt. Gorman, Wolseley Barracks, London

Dear Capt. Gorman,

Your fellow townsmen who admire the spirit and pluck which have impelled you, Kenneth Johnston and Dan McMillan of No. 7 Company, to volunteer for active service in the Transvaal, wish to show by a slight token, their regard for you and their appreciation of your courage. Will you accept the enclosed cheque and apply the money for the purchase of something for each of your trio, which will remind you of home and the friends here who will watch your course with pride. Wishing you health, safety and a happy return.

It was first intended to purchase some memento for the brave Sarnia boys, but owing to the time being so short it was decided to send the subscription direct to them at Wolseley Barracks at London, with the request to use it as best they see fit. To make the offering a public one subscription lists have been opened at the office of the Traders' Bank and the office of the Huron and Lambton Loan Company, where subscriptions can be handed in by all citizens who desire to do so, and thereby show their appreciation of the courage displayed by the boys from the Tunnel Town. All subscriptions received up to 10 o'clock tomorrow morning will be wired direct to Wolseley Barracks, London, and all subscriptions received after that hour will be sent direct to South Africa. Is it necessary for us to state that the gifts from Sarnians should be liberal? We think not.

• **SARNIA'S FIRST VOLUNTEERS:** The first Sarnia volunteers to enlist, Kenneth Johnston, Dan McMillan and Fred Gorman, would first travel to London, Ontario in late October 1899 to be sworn in. A headline from the *Sarnia Observer* in late October 1899 read, "*TO FIGHT FOR THE QUEEN*". The three Sarnian applicants were sworn in as members of the Canadian Contingent at Wolseley Barracks in London. A total of sixty-five men had been accepted and sworn in at the Wolseley Barracks, with the hopes the number would reach the necessary one hundred and twenty men.

In Sarnia, a special committee of City Council met with a number of militia officers to plan the nature of the send-off to be given the volunteers on their departure for South Africa and also what should be presented to each one to mark the city's appreciation. The committee decided that Sarnia Mayor Wilson would proclaim a public half holiday, and all organizations would be invited to join in a parade beginning at the barracks. The idea of the committee was to have the parade to Victoria Park where a few farewell words would be delivered by prominent citizens. From the park, the men would march to the G.T.R. depot and board a special train of tourist cars. The train would be decorated with flags, bunting and banners.

On the day the three Sarnia volunteers were sworn in, four of Sarnia's prominent citizens had come to London to bid them farewell: Lieut. Col. Ellis, of the 27th Battalion; Dr. Thomas Johnston, M.P. of Sarnia (father of Kenneth); Mr. Henry Gorman, of the *Observer* (father of Fred); and Mr. Mackenzie. The volunteers; Ken Johnston, Dan McMillan and Fred Gorman were reported in the *Observer* as, "*fine looking young fellows and full of military ardor.*" Each of the soldiers was presented with a twenty dollar gold piece on behalf of friends in Sarnia. Sir Wilfred Laurier, on his way to Sarnia, was staying in London the same evening, dining at the Tecumseh House. After dinner at the Tecumseh, the Sarnia delegation and three soldier volunteers were presented to and had the opportunity to speak with Sir Wilfred Laurier and Honourable Mr. Fielding, "*who chatted pleasantly with them for a while.*"

It was also reported that many years prior, Fred Gorman's Irish grandfather, had fought in the British army. When the grandfather enlisted, the family name was O'Gorman, but the "O" was somehow lost when he enlisted, "*perhaps he did not speak distinctly, or the officer who took the name was careless; anyway the O fell out, and it was never restored.*" The grandfather would settle in London, Ontario, and his son Harry Gorman would follow in his footsteps, serving with the Hundredth Regiment in the Crimean War. Returning to Canada, Harry Gorman would become the proprietor of the *Sarnia Observer*. Harry's son Fred Gorman, grandson of the first O'Gorman, going away to South Africa, was now a third generation soldier.

• **OFF TO WAR:** As with the soldiers of later wars, the Boer War volunteers left Sarnia amid speeches, a parade and general fanfare. However, uniquely, these soldiers left Lambton County with money in their pockets—"testimonials" collected from the grateful citizens. Further financial security was provided from two sources: the Patriotic Fund, for soldiers and their dependants as established nationwide with Sarnia as a contributing chapter; and employers' guarantee of employment upon the soldiers return home.

The *Sarnia Observer* headline read, "*OFF TO THE FRONT – The South African Canadian Contingent Leave London*". On October 26, 1899, the citizens of Western Ontario, including Sarnia, bid farewell to the members of B Company, Canadian Contingent as they left the city of London, Ontario. The streets were decorated with flags, bunting and streamers of red, white and blue; were dense with people; and traffic was at a standstill. Before leaving Wolseley Barracks, the officers in command, including Sergeant Fred Gorman of Sarnia, were presented with wristwatches by Alderman Graham, acting for the citizens committee. To the rank and file, including Sarnians Kenneth Johnston and Dan McMillan, Alderman Graham presented hunting knives and pipes. The men then marched from Wolseley Barracks to Victoria Park and then to the train station. During the entire march, Dr. T.G. Johnston, M.P. of Sarnia, accompanied by his youngest son Jeff, marched in the procession with his son Kenneth Johnston, and the other Sarnia boys, Sergeant Fred Gorman and Dan McMillan, and never left them until the last moment.

The enthusiasm of the crowd was described as having no bounds, and did much to enliven the boys and cheer them up; nevertheless, there were tears as well as cheers when the time for saying good bye to fathers and brothers and friends arrived. Dr. Johnston, M.P., his son Jeff, Dr. Hays and Alex K. Wanless, of Sarnia, and Fred L. Evans of London, were with the three Sarnia boys until the train pulled out of the depot. While these men were on the train having a last talk with the boys, Archdeacon Davis of London, came into the train car and desired to be presented to the three boys from Sarnia. The reverend shook hands with all three heartily and bid them goodbye and Godspeed and wished them a safe return. At twenty minutes to three o'clock, the train pulled out amid deafening cheers, the band played "Auld Lang Syne," and the boys were off.

- **FIRST CANADIAN CONTINGENT:** A thousand men were quickly recruited from across Canada to form the First Canadian Contingent—designated the 2nd Special Service Battalion, Royal Canadian Regiment (RCR) of Infantry. The First Contingent sailed from Québec City on October 30, 1899, and included those local Sarnia men who had volunteered. Although they would fight within the British army, it was the first time Canada would send soldiers overseas wearing Canadian uniforms into battle. It was Canada's first foreign war.

Canadian units were kept together in South Africa rather than being broken up to reinforce British units, marking the beginning of a national tradition for Canadian forces, who considered this unity of effort an essential foundation for their morale, loyalty and fighting skill. All of the Canadian soldiers wore a maple leaf cap-badge, which became a rallying symbol for the Dominion troops.^{2N, 6P}

- **CANADIANS ARRIVE IN SOUTH AFRICA:** The first Canadian volunteers, known as the “**Valiant 1000**,” sailed for South Africa aboard the *SS Sardinian*, a converted cattle ship, in late October 1899. Departing Quebec City, a cheering crowd of 50,000 supporters lined the dock, along with a military band, assembled to see the troops off, while the cannons of the Citadel provided a thirty-gun salute for the men. From across the country, Canadians had provided the soldiers with gifts of tobacco, whiskey, books, games, and bibles in both English and French, for the long sea voyage. Built to accommodate seven hundred, the crowded vessel was even more congested with all the troops equipment, horses, and a month's worth of provisions, making for a long and uncomfortable voyage. The Canadians' Commanding Officer Lt-Col. William Otter, had hoped to use some of the 30-day sea voyage for some rudimentary training, but the cramped quarters, bad weather and an outbreak of dysentery scotched the idea.

When they docked at Cape Town on November 29, most believed they would be home, and victorious, by Christmas. Boarding trains the next day, they began a forty-hour rail journey into the highland veldts, arriving in Belmont, where they joined the rearguard of the British Army. The contingent remained camped at Belmont for the next two months, battling boredom, restlessness and disease.

At the time of their arrival, the main British forces had either surrendered in fighting, or were besieged by the Boers in garrison towns. In mid-December, the British would suffer three stunning battlefield defeats in what became known as “Black Week.” The Canadians soon realized they were about to embroiled in a bitter war. The Boer armies, made up of citizen militia soldiers, were highly mobile, adept at guerilla warfare, familiar with the land, equipped with modern weapons, were skilled horsemen and marksmen, and were determined to defend their homeland.^{2N, 4A, 6P}

- **“BLACK WEEK”:** The British suffered serious setbacks in the opening battles of the war. Between December 10-15, 1899, the British suffered three humiliating defeats in what became known as “Black Week”. The Boers were well equipped with German Mauser rifles (which had a range of 1,800 metres and fired smokeless powder that hid the shooter's position), and enjoyed an initial superiority in artillery over the British forces. On December 10, the Boers routed a British force of 3,000 at **Stormberg**. Two days later, at the Battle of **Magersfontein**, the Boer army repulsed 15,000 British troops. Finally, at **Colenso**, a small Boer army of 8,000 inflicted a severe defeat on the main British contingent, a force comprised of 20,000 troops. As a result of these losses, the British government made urgent requests for additional troops, including cavalry and artillery units, from the dominions, including Canada. In response, more Canadian troops would follow including horse-mounted troops, artillery batteries and even a field hospital.⁵¹

- **HARSH CONDITIONS:** Canadian soldiers in South Africa would soon learn of the harsh conditions they would have to endure in the battlefields. Weather included scorching heat in the day, bone-chilling cold at night, harsh rainstorms, and blinding sand storms. A Canadian wrote the following in a letter home, “*Last week we had our first experience of an African sand storm. The sand came down like hail stones, cutting one's face and hands till it brought the blood. Our tent blew down and our horses got frightened and stampeded.*” They would also have to endure long marches, harsh terrain, lack of drinkable water, poor food, flies and insects, disease, and the constant risk of snipers and ambush.

- **THE BATTLE OF PAARDEBERG**, February 18-27, 1900: The 1,039-strong Canadian contingent would join the British army at the front line for the first time in early February 1900 at Graspan, South Africa. The Battle of Paardeberg was the first major Canadian action of the South African War. After two months at Belmont camp, the Canadians were assigned to join the British forces in their march to Bloemfontein. Over five days, the Canadians trekked 120 kilometres in the burning heat across the African plains. Carrying a rifle, bayonet, and forty pounds of kit, each man wore stiff, chafing uniforms, ill-fitting shoes, and survived on meals of salted pork and biscuits. After a

brutal week of marching, the troops reached Paardeberg (Horse Mountain) Drift, on the bank of the Modder River. Entrenched on the other side waited a Boer force that was determined to stop the British advance.

On the early morning of Sunday, February 18, the Canadians crossed the swift Modder River with the help of ropes stretched shore to shore, in preparation for a frontal assault. The battlefield was an open plain where the Boers were concealed in deep dongas—steeply eroded watercourses—shaded by trees and cut branches. The Canadians inched forward in short rushes, sheltering behind every rock and anthill until they became pinned down by enemy fire.

They were forced to lie prone under the sweltering sun, while the Boers maintained a withering fire, for five hours. The weather changed while the Canadians were pinned down, drenching the troops in a cold rainstorm, before the sweltering sun returned. By 5:00 pm, the Canadians along with British forces, were ordered to make a desperate fixed-bayonet charge toward the enemy positions. They gained about 200 yards before the assault ended in failure. After darkness fell, the Canadian troops were able to retreat for food and rest, while stretcher parties were sent out to retrieve the wounded, and the dead were buried in a mass grave. For the Canadians, the cost was high, 18 soldiers were killed and 60 wounded on the first day of the battle—the country’s bloodiest single day of fighting in the war. It became known as **Bloody Sunday**.

For the following nine days, the British besieged the smaller Boer force, pounding them with artillery in an attempt to destroy the Boer encampment, with little success. On February 26, the Royal Canadians led a night attack on the Boer positions. Supported by British forces, they advanced forward in silence with bayonets fixed to within one hundred yards before being noticed. The two forces exchanged gunfire resulting in some Canadian companies having to retreat, while others continued to exchange fire with the enemy until the sun began to rise.

On the morning of February 27, the demoralized Boers had had enough, and surrendered. The Battle of Paardeberg opened up the road to Bloemfontein, and was the first significant British victory of the war. The Canadians had played a key role and were praised for their gallantry. A British officer remarked, “Canadians now stand for bravery, dash, and courage.” Thirty-one Canadians in total died at Paardeberg. The victory provided a boost to the morale and confidence of the troops and to Canadian nationalism.^{D, 2I, 2N, 6P, 7A}

• **CANADA’S SECOND CONTINGENT:** Following defeats in December 1899, the British had asked Canada to raise a second contingent, which was quickly assembled. The Second Canadian contingent was made up of: two mounted regiments—the 1st Canadian Mounted Rifles, later re-designated the Royal Canadian Dragoons (RCD), and the 2nd Canadian Mounted Rifles (CMR)—many recruited from the cowboys and ranchers of western Canada; and three artillery batteries from the Royal Canadian Field Artillery (RCFA)—primarily recruited from eastern Canada. The Second Contingent of 1,289 Canadian troops, and almost as many horses, sailed from Halifax for the Boer War on January 21, 27 and February 21, 1900.

A third mounted regiment was raised and funded entirely by Donald Smith, a wealthy fur trader, Canadian Pacific railroad financier and Canadian diplomat better known as **Lord Strathcona**. His regiment recruited men who were cowboys, ranchers, prospectors and frontiersmen, and were known as The Lord Strathcona’s Horse. Commanded by the legendary North West Mounted Police superintendent **Sam Steele**, they were outfitted with western saddles, lassoes, revolvers, Lee-Enfield rifles, and Stetson hats. The Strathcona’s, a force of 550 men and nearly 600 horses, left Halifax on March 17, 1900. Like the first contingent, the second contingent and the Lord Strathcona’s Horse had to endure a long sea voyages in cramped vessels while caring for their horses. Many of the animals died during the trip, and the men were forced to dump the bodies overboard.

Another 1,004 men, the 3rd Battalion, Royal Canadian Regiment, was raised and served as garrison troops in Halifax, Nova Scotia, freeing a British battalion to fight. In 1901, Canada sent a fourth contingent of about 1,200 men who were assigned to the South African Constabulary.^{D, 2N, 2I, 4A, 6P}

• **CHANGING TACTICS:** By June 1900, Bloemfontein and Pretoria had fallen to the British, but the remaining Boer forces had no intention of surrendering. The war then moved into a chase-and-evade phase—the British pursuing an enemy they could rarely find. The Boers avoided open battle, instead, organizing themselves into mounted guerrilla units ranging from a few men to several thousand that melted away into the countryside, and then mounted ambushes and retreats. For the next two years, the Boers waged an insurgency against the British—raiding army columns and storage depots, blowing up rail lines and carrying out hit-and-run attacks. The British responded with a scorched-earth strategy—burning farms and herding Boer families into concentration camps.^{D, 2N, 6P, 7A}

The Canadians had learned from the first contingent of infantrymen that fighting the war with cavalry and artillery would be a more effective way of fighting the Boer's guerilla, mounted on horseback style of warfare. Canada's Second Contingent, made up of the three mounted regiments and three artillery batteries, arrived in the first two months of 1900.

- **JOHN McCRAE:** Canadian John McCrae would become famous during World War I after writing "In Flanders Fields." During the Boer War, he volunteered as part of the Second Contingent, becoming a lieutenant with the Royal Canadian Artillery. During the war, one of the things he witnessed was that more men were dying of disease than in combat, due partly to the poorly run British field hospitals. He wrote, "*For absolute neglect and rotten administration, it is a model... I am ashamed of some members of my profession ... Every day there are from 15 to 30 Tommies [British soldiers] dying from fever and dysentery. Every one that dies is sewn up in a blanket, and four shillings are taken out of the pay for the blanket. The soldier's game is not what it's cracked up to be.*"^{13M} More information on John McCrae is included in this Project in the WWI Battle of Ypres section on page 71.

- **LELIEFONTEIN**, November 7, 1900: Leliefontein was a farm, where the Canadians faced their most desperate situation during the war. On the morning of November 7, a British force of 1,500, that included the Canadian Mounted Rifles, the Royal Canadian Dragoons, and the Royal Canadian Field Artillery with two 12-pounder guns had planned a withdrawal from the area. To cover the withdrawal, the British commander detailed the under strength Royal Canadian Dragoons and the two 12-pounder field guns as his rearguard. As soon as the Boers realized that the British were retiring, large parties of Boers mounted a series of strong attacks at various points along the Canadian line. These attacks culminated in a charge by two hundred mounted Boers firing from the saddle that threatened to break the Canadian line and capture the two field guns. The charge was only beaten back by the gallantry of a small party of Dragoons, and after two Boer commanders were killed. For two hours, the Canadians fought in a wild, mounted battle, and were able to successfully save their guns. It came at a cost of three Canadians killed, and three other Canadians won the Victoria Cross for their bravery in saving the guns. Leliefontein was the Second Contingent's last major action. Most of its soldiers returned to Halifax on January 8, 1901.^{21, 2N, 4A}

- **BATTLE OF HART'S RIVER**, March 31, 1902: Also known as the Battle of Boschbult farm, this battle involved a column of 1,800 British forces that set up their defences around the farm buildings at Boschbult. During the afternoon of March 31, the Boers shelled the camp with artillery, while their riflemen on the surrounding ridges poured down a steady fire. On the outer edge of the British defense line, an outnumbered group of Canadian Mounted Riflemen fought valiantly against a series of mounted charges by the Boers. The Canadians were eventually cut off by a vastly superior force, but refused to surrender until they had fired the last rounds of their ammunition. In the early evening, the Boers broke off the engagement and withdrew. A total of 13 Canadians were killed and 40 wounded at the Battle of Hart's River.^{21, 2N}

- **THE BOER WAR ENDS:** During the war, Canadians were in action and would fight in key battles including at; Paardeberg, Israel's Poort, Zand River, Mafeking, Doornkop, Johannesburg, Diamond Hill, Belfast, Leliefontein and Harts River. The war finally ended when the Boers signed the **Treaty of Vereeniging** on May 31, 1902 in Pretoria. The Boers surrendered their independence in exchange for aid to those affected by the fighting and eventual self-government, among other terms.

On June 2, 1902, Sarnia citizens read the details of the declared peace in the *Sarnia Observer*. On June 1, Lieutenant-General Lord Kitchener cabled the Canadian War Office that the terms of surrender had been signed by all the Boer delegates, announcing it to the world. An official message of congratulations was forwarded to England on behalf of the Dominion Government. News of the signing of the terms of peace was received with general rejoicing throughout the Dominion, with ministers referring to the subject from the pulpits and public demonstrations in numerous places.

- **LIVES LOST:** Approximately 20,000 British Empire soldiers lost their lives during the Boer War. Of that, more than 7,000 were killed in action or died of wounds, while over 13,000 of the deaths were the result of disease. Another 40,000 were wounded.

Over 9,000 Boer troops lost their lives during the war. Approximately 28,000 Boer men were captured as prisoners of war, the majority of which were sent to camps overseas including in Saint Helena, Ceylon, Bermuda, India and Portugal. Of the 116,000 Boers confined in the concentration camps, more than 26,000 civilians including women and children, and 14,000 black Africans are estimated to have died in the camps from malnutrition and disease.^{D, 21, 2N, 4A}

- **CANADIAN SACRIFICES:** The 1899-1902 Boer War was the first time Canada dispatched troops overseas to fight in war. A total of three contingents of Canadian soldiers were sent overseas. Over the 2 ½ years, approximately 7,400 Canadian volunteers, including twelve nurses, would serve in South Africa, and another 1,004 served as garrison troops in Halifax. When the Canadian soldiers returned home, some chose to remain in Africa, serving as members of the paramilitary South African Constabulary. During the final months of the war, 40 Canadian teachers went to South Africa to help reconstruct the country. During the Boer War, five Canadian soldiers earned the Victoria Cross, the highest award for military valour. The Boer War also marked the first time Canadian women served in the military, with twelve Nursing Sisters helping the sick and wounded in South Africa. Canada's senior nursing sister, Georgina Pope, was awarded the prestigious Royal Red Cross Medal by Queen Victoria, for meritorious and distinguished service in the field, the first Canadian to receive this esteemed honour.^{D, 2I, 2N, 4A} More information on Nursing Sister Georgina Pope is on page 32.

Approximately 270 Canadians lost their lives during the Boer War. Of those, approximately 90 were killed in action and the rest died of injuries or disease, principally enteric fever. Another 252 Canadians were wounded. **Sarnia** and Lambton had sixteen men participate in the Second Boer War, one of whom would make the ultimate sacrifice—Daniel Crone. His grave is in Braamfontein Garden of Remembrance, Johannesburg, South Africa.

Author Pierre Berton wrote of Canada's experience in South Africa, "*it convinced a generation of young Canadians that war was not terribly dangerous.*"^{7A} The Great War would change that illusion.

- **NEW FORMS OF WARFARE:** The Boer War introduced new forms of warfare that would loom large in the future: the British exercised a scorched earth policy and introduced "concentration camps"; the Boers waged guerilla warfare tactics of ambush and retreat; the British introduced armoured trains with naval guns mounted on railway wagons and manned observation balloons to direct artillery fire; both sides used rifles loaded with multiple-bullet magazine clips, along with Maxim machine guns, invented fifteen years earlier (which the Boers converted to a water-cooled, belt-fed piece of light artillery called the "pom-pom"); both sides used the heliograph, which used reflected sunlight to flash coded messages; and the Boer War showed for the first time the defensive advantage of well-entrenched soldiers armed with long-range rifles.

- **FAMOUS PARTICIPANTS:** Some participants in this first major war of the century would later have starring roles in other scenarios. One was Canadian author **John McCrae**, author of "In Flanders Fields", who started his military service as an artillery officer. Others included: **Sam Steele**, a famous member of the North-West Mounted Police during the Yukon Gold Rush, who served as a commanding officer of the Strathcona's Horse mounted infantry unit in the Boer War; **Winston Churchill**, working as a war correspondent, was captured, held prisoner and later escaped to join the British army; and **Robert Baden-Powell**, a lieutenant-general in the British Army, who wrote "Aids to Scouting" for soldiers, which led to the structure and founding of the Boy Scouts movement worldwide based on his military experiences; **Mahatma Gandhi**, best known as the leader of Indian independence, served in the war as a volunteer medic, receiving a War Medal; **Arthur Conan Doyle**, a field hospital supervisor, would become best known as the author of over sixty stories about Sherlock Holmes; and **Rudyard Kipling**, an army newspaperman, who would become an author most famous for his works "The Jungle Book" and "Gunga Din."

- **SARNIANS RETURN HOME:** When the first Sarnia and Lambton men returned home from war at Christmas of 1900, they were treated as heroes. They were met at the Cromwell Street train station by members of the City Reception Committee and local citizens. A procession made up of committee members, military officials, social organizations, local dignitaries, the fire department, city and county citizens, and the Sarnia Band paraded them up Front Street which was decked in flags and streamers, to George St., Vidal St., and Davis St., to Victoria Square (Park). Then there were speeches and presentations of gold watches. The next evening, a celebration in a packed Boys Brigade Hall was held with more speeches, short reminiscences and music from solo artists through to choirs. Appropriately, the Boys Brigade sang, "Praise God, From Whom all Blessings Flow".

- **HEROES REMEMBERED:** Across the country, communities feted the returning war heroes. Volunteers formed a "Patriotic Fund" for the families of the fallen, and Canadian branches of the "Soldiers' Wives League" were created to provide support to the wives and families of soldiers. In 1902, a group led by Lady Minto, the wife of the governor general, the Earl of Minto, raised private funds to record and mark the graves of the fallen Canadian soldiers overseas. The South African Memorial Association sent 180 polished-granite headstones to South Africa, each marked with maple leaves and engraved with "CANADA". A number of communities erected monuments to the men

who fought, including in Ottawa, Halifax, Montreal, Calgary, Brantford, London (Victoria Park) and one in Toronto (University Avenue) that was designed by Walter Allward, who would later design the Canadian memorial at Vimy Ridge, France. For most towns and cities in Canada, these were the first public war memorials.^{2N}

- The **BOER WAR MEMORIAL FOUNTAIN** in Sarnia was erected in Victoria Park in 1908. It was located outside and on the south side of Sarnia Library. Engraved on it are the names of sixteen men from Sarnia and Lambton County who participated in the Boer War, along with the South African locations where they served. Of the sixteen names on the Boer War memorial, only one man, Daniel Crone, lost his life while serving. More information on Sarnia's Boer War Memorial Fountain is on page 10.

Attack

*At dawn the ridge emerges massed and dun
In the wild purple of the glow'ring sun,
Smouldering through spouts of drifting smoke that shroud
The menacing scarred slope; and, one by one,
Tanks creep and topple forward to the wire.
The barrage roars and lifts. Then, clumsily bowed
With bombs and guns and shovels and battle-gear,
Men jostle and climb to, meet the bristling fire.
Lines of grey, muttering faces, masked with fear,
They leave their trenches, going over the top,
While time ticks blank and busy on their wrists,
And hope, with furtive eyes and grappling fists,
Flounders in mud. O Jesus, make it stop!*

Siegfried Sassoon, 1918

Anthem for Doomed Youth

*What passing-bells for these who die as cattle?
— Only the monstrous anger of the guns.
Only the stuttering rifles' rapid rattle
Can patter out their hasty orisons.*

*No mockeries now for them; no prayers nor bells;
Nor any voice of mourning save the choirs,—
The shrill, demented choirs of wailing shells;
And bugles calling for them from sad shires.*

*What candles may be held to speed them all?
Not in the hands of boys, but in their eyes
Shall shine the holy glimmers of goodbyes.
The pallor of girls' brows shall be their pall;
Their flowers the tenderness of patient minds,
And each slow dusk a drawing-down of blinds.*

By Wilfred Owen. 1917

INDEX: BOER WAR – 1899-1902 – SERVED & FALLEN

The following is a record of the sixteen names engraved on Sarnia's Boer War Memorial Fountain.

NAME & Service #	DATE OF BIRTH & DEATH + AGE FORCE, REGIMENT + RANK ADDITIONAL INFORMATION
COLTER, Charles Flerke 322	<p>B: approx. 1869 in Strathroy, Ontario D: November 11, 1930 in York (Toronto) Age: app. 61</p> <p>Royal Canadian Field Artillery "D" Battery Gunner - Sergeant Former Corps – 27th Regiment, Lambton</p> <p>Son of Charles Colter and Elizabeth Colter (nee Howe), both of Ireland, family resided in Petrolia, Ontario. Enlisted December 28, 1899 in London, Ontario. Honourably discharged January 10, 1901.</p> <p>Married Lillian May Colter (nee Foster), October 18, 1902, in County of Hastings. Two children; Charles (b: 1903) and Elinore (b: 1910). Charles Coulter would be a dentist in Petrolia, family resided in Toronto in 1911.</p>
CRONE, Daniel Joseph 216	<p>B: January 24, 1876 in Sarnia, Ontario D: August 5, 1900 in Johannesburg, South Africa Age: 24</p> <p>Army: Royal Canadian Dragoons (1st Armoured Regiment) Private Former Corps- 27th Regiment, Lambton</p> <p>Son of William Crone and Catherine Crone, of Bosanquet, Lambton County. Enlisted January 2, 1900 in London, Ontario. *Daniel Crone was the only Sarnian to lose his life serving in the Boer War. Daniel died of Enteric fever (typhoid), in Johannesburg. Awarded Johannesburg, Diamond Hill, Cape Colony and Orange Free State Clasps.</p> <p>Buried in Braamfontein Garden of Remembrance, Johannesburg, South Africa. There is also a memorial dedicated to him at Irwin Cemetery, Sarnia, Lambton County, and a memorial plaque in the Federal Building on the corner of Christina and Davis Streets, Sarnia.</p> <p>*MORE DETAILED INFORMATION ON DANIEL CRONE IS ON PAGE 53</p>
GORMAN, Frederick 7154	<p>B: October 13, 1867 in London, Ontario D: September 7, 1941 in Sarnia Age: 74</p> <p>Royal Canadian Regiment of Infantry Sergeant Former Corps – 27th Regiment, Lambton</p> <p>Son of Mr. and Mrs. Henry Gorman, of 556 North Christina Street, Sarnia. Sisters Harriett and Winnifred Gorman. Both of Frederick's grandfathers were veterans of the old British army, and both served together in the 23rd Royal Welsh Fusiliers. Frederick's paternal grandfather's last name was O'Gorman (of Ireland). When grandfather O'Gorman enlisted, somehow the 'O' was dropped from the name, never to be restored. Frederick's father, Henry Gorman, enlisted in the Hundredth Regiment in 1856. This regiment was assigned to garrison duty at Gibraltar vs. going to India to suppress the mutiny there (1857-8). In 1866, he transferred to the 7th Battalion in London and remained with them until he retired in 1880. Henry Gorman was employed as editor and proprietor of the <i>Sarnia Daily Observer</i> for many years and later a local magistrate.</p> <p>Frederick Gorman served as an <i>Observer</i> reporter and advertising solicitor for a time. As a youth, he was a member of the St. Clair Borderers' Band. He joined the 27th Regiment (St. Clair Borderers) in 1883 and then the Seventh Company attaining the rank of Lieutenant. He enlisted in the RCR on October 21, 1899 in London, Ontario for service in the Boer War.</p> <p>In South Africa, as a Sergeant, he was in engagements at Paardeburg, Bloemfontein, Hout Nek and Vet River in the Orange Free State and in Pretoria. He was discharged December 25, 1900.</p> <p>On return to Sarnia, he rejoined the 27th Regiment, where he remained until 1913, retiring as a Major. He was also made a member of the Canadian Order of Foresters, Sarnia. By 1911, he was the Manager of the Observer Printing Company (his father's firm).</p> <p>Frederick would enlist on December 1, 1915 to serve in World War I. He initially joined the 70th Battalion, C.E.F. as a Major. Sometime after enlisting, he married Mrs. Fannie Clark Gorman (who served as a nurse at Camp Borden in WWI). The couple resided at 329 North Vidal Street. continued over...</p>

NAME & Service #	DATE OF BIRTH & DEATH + AGE FORCE, REGIMENT + RANK ADDITIONAL INFORMATION
GORMAN, Frederick 7154 continued	<p>The 70th Battalion embarked for Britain on April 25, 1916, and its' personnel would be absorbed by the 39th Battalion. On November 20, 1916, Frederick joined the Canadian Army Service Corps at Bramshott as a Private. He embarked to France on May 25, 1917 and was first attached to 39 Company, Canadian Forestry Corps, and then on October 19, 1917 was attached to the 7th Canadian Cavalry Field Ambulance. He took part in operations at Cambrai in November 1917 and Amiens in April 1918. On May 25, 1918 he was attached to the Royal Canadian Regiment, participating in engagements at Amiens, Arras and Cambrai. He rejoined the Cavalry Brigade in November 1918, and after the Armistice, followed the German army back to the Rhine. He served in England with the C.A.S.C. in 1919 until it was demobilized in Canada in July 1919.</p> <p>After WWI, Frederick Gorman was a member of Sarnia Customs and Excise staff beginning in 1920 and was stationed at Imperial Oil Refinery. He was also an honorary member of Lambton Garrison Officers' Mess and Sarnia Branch 62 Canadian Legion. He was a resident of Sarnia for 70 years. His funeral in September 1941 was held at St. George's Anglican Church with a full military burial at Lakeview Cemetery. His casket was draped with a Union Jack and bearing the cap and sword of the deceased soldier.^{3e}</p>
HARLEY, John Arthur 103	<p>B: January 2, 1873 in Petrolia, Ontario D: March 2, 1954 in Edmonton Age: 81</p> <p>Lord Strathcona's Horse</p> <p>Son of James Rennie Harley and Janet Harley (nee Ovans), of Petrolia, Ontario. Siblings: Catharine, Jane, Jennett, Rachel, Mary, Thomas and William.</p> <p>Enlisted January 2, 1900 in Petrolia. Discharged March 8, 1901.</p> <p>Married Mary Louise Harley, couple resided in Edmonton, Alberta. Employed as a civil servant, post office.</p> <p>Enlisted in April 1916 in Edmonton, to serve in World War I.</p>
HUME, Alexander Harvey 333	<p>B: December 7, 1874 in Fort Erie, Welland, Ontario D: 1934 in Detroit, Michigan Age: approx. 60</p> <p>Royal Canadian Field Artillery 6th Field Battery – Driver Former Corps – 27th Regiment, Lambton</p> <p>Son of William Walker Hume and Emma Elizabeth Walker, of Fort Erie, Ontario. NAME & Service #	DATE OF BIRTH & DEATH + AGE FORCE, REGIMENT + RANK ADDITIONAL INFORMATION
VAN TUYL, Thomas Walter	<p>B: February 2, 1871 in Petrolia, Ontario D: August 16, 1903 in Petrolia, Ontario Age: 32</p> <p>An honour graduate and winner of the Governor General's Bronze Medal at the Royal Military College, Kingston in 1891. During Boer War, he served in the Second Contingent RCA "D" Battery as First Lieutenant. Returned to Petrolia in January 1901.</p> <p>Son of Major Benjamin Stoddard Van Tuyl (of New York, served in American Civil War, Union Army) and Kate Van Tuyl (nee Cheney, of New York). Major Benjamin Van Tuyl relocated to Petrolia after the Civil War to become an oil man. He was originally employed as a drilling contractor/oil operator. In 1874, Major Benjamin Van Tuyl joined forces with J.H. Fairbank forming Van Tuyl and Fairbank Inc. Hardware in Petrolia, originally established in 1865, and still in business today. Thomas' siblings were; Benjamin Blossom (engaged in explosives business in Petrolia) and Louis Gleeson (graduate of the Royal Military College, later employed in the Intelligence branch of the Ottawa Defence Department). Thomas' mother Kate died in August 1886, his father Benjamin died in December 1900 (both parents passed away in Petrolia).</p> <p>Thomas Van Tuyl died of Typhoid fever in 1903. He is buried in Hillside Cemetery, Petrolia, Ont.</p>

The **Boer War Memorial Fountain** was erected in Sarnia in 1908. The Memorial lists sixteen men from Sarnia-Lambton County who participated in the South Africa War of 1899-1902. Of the sixteen names engraved on the Boer War Memorial, only one man lost his life while serving in the war. Following is his story.

CRONE, DANIEL JOSEPH (#216)

Daniel Crone was born in Sarnia on January 24, 1876, the son of William Crone (born in Whitby, Ontario) and Catherine (nee McKellar) Crone, of Sarnia Township, later Mandaumin, Ontario. William Crone, a farmer, and Catherine McKellar were married on September 30, 1869, in Bosanquet, and were blessed with eight children together: Francis Jeffrey (born 1871); Margaret Elizabeth (born 1875); Daniel; Sarah A. (born 1879); James Scott (born 1880); Christine Catherine (born 1882); John Thomas (born 1883, died at age 3 when Daniel was nine years old); and William J. (born 1895).

Twenty-three-year-old Daniel Joseph Crone underwent his recruit medical on December 30, 1899, as a member of the 2nd Special Service Contingent. He completed his "Agreement for Military Service in South Africa" (Attestation) form on January 2, 1900 in London, Ontario. He stood five feet six and one-quarter inches tall, had black hair and blue eyes, was single, and recorded his trade as driver and his next of kin as his father William Crone in Sarnia. At the time, Daniel was employed at the C.P.R. Express and Telegraph Office in Sarnia, and was a member of the 27th Battalion, St. Clair Borderers, headquartered in Sarnia. The following is the report from the *Sarnia Observer* following his enlistment:

Daniel Crone, lately employed in connection with the express department of the C.P.R. here, went to London Saturday and after being examined enlisted in the second Canadian contingent for South Africa. He was allowed home for Sunday and Monday and left this morning again for London to take up his active duties as a member of the London Company. Before leaving, a number of young men met at the oyster parlor of Alex Kelly and entertained Mr. Crone to an oyster supper. Dan, as he was familiarly called, has many friends in Sarnia and vicinity who wish him a safe return to his home and friends.

Prior to going overseas, some citizens of Sarnia collected and presented a draft for fifty dollars to Daniel. He was also a member of the Cawdor Camp, Sons of Scotland Club in Sarnia. At the Cawdor Camp meeting after Daniel had enlisted, the club wrote and delivered a complimentary address to him accompanied by \$25 in gold. The following is an excerpt from that address:

Upon your leaving for South Africa, the officers and members of Cawdor Camp, Sons of Scotland, desire to express their high appreciation of your patriotism and valor and observe with delight that the patriotism and chivalry so characteristic of our Scottish ancestors has descended to their sons and is now so practically displayed by the valorous step which you have taken in offering your services at such a moment and time in defence of the

Empire. We all unite in expressing our admiration of the spirit displayed by you, and hope that you will have an opportunity of rendering efficient service to our country and that you will be spared to return to us.

Peter Symington, Secretary

John Cowan, Chief

In his first few weeks, Daniel was training for the Mounted Rifles at Stanley Barracks, in Toronto. Following is a portion of a letter he wrote to the *Sarnia Observer*:

This place is named the workhouse, by the boys, which it certainly is. We have to get out at bugle call in the morning, at half past six o'clock, and parade to stables and tend horses. We get back to barracks about eight and get dry bread and coffee, sometimes a little meat, for breakfast. We are called out at nine again and do not get back till about one. The first day we were here, we were sent out on mounted parade without saddles for about two hours. A good many of the horses were young and had never been ridden before. Lots of the boys were thrown off time and again. Some were sent home because they could not ride their horses. My riding was counted good, and I tell you I was greatly relieved when I was told so. Hardly anything could induce me to turn back now. Although there are a good many things I do not like, I never was so happy in my life.

Initially a Trooper with the Canadian Mounted Rifles, Daniel Crone became a member of the Army, Royal Canadian Dragoons (1st Armoured Regiment), with the rank of Private. In late January-early February 1900, Daniel embarked overseas as part of Canada's Second Contingent. On June 25, 1900, Private Daniel Crone wrote his parents a letter from the war front. They would receive the letter one week prior to his death. Following is an excerpt from that letter:

Dear Father and Mother,

This is nearly the first opportunity I have had to write since I left Kroonstad. No doubt you have read a few of our doings since we left there, so I need not relate too many of them. We did not have any opposition at the Vaal River, where we most expected it and where the enemy could or should have made a great stand. We, however, had a hot time with them at Krugereder, near Johannesburg. It was a miracle that we were not cut to pieces there. About 600 of us were ordered to take a kopje which was about 1500 yards from the Boer lines. We had no sooner got started towards it, when they started to shell us at a furious rate. We galloped on to shelter of the kopje without a scratch, although their shells fell right among us. We had to fall behind rocks all day and night. I thought I would freeze. I do not think I ever suffered as much with the cold at home. We got thawed out next day, as the sun is always intensely hot... I might say I have never missed a ride since I came out, nor an engagement that our column was in. When we marched through Pretoria I thought, well, it is all over; but soon found out it was not. The warmest engagement we have been in was north of Pretoria, where you no doubt read of one of our fellows being killed by a 40lb shell. He belonged to D squadron, so did not know him. After two days' hard fighting the Boers escaped at sun down... I will have to close for the present and go and cook my dinner before leaving. For a good while we got nothing to eat but flour, which we had to make pancakes out of. You can imagine flour, salt and water. I will have to write out a few recipes for cooking fine dishes when I get home. Remember me to all.

With love to all, your loving son, Dan

On August 5, 1900, Private Daniel Crone lost his life while serving in the Boer War. He died of Enteric fever (typhoid), in Johannesburg, Africa. He was awarded posthumously the Johannesburg and Diamond Hill Clasps.

One week after Daniel Crone's death, the *Sarnia Observer* reported on his death. Following is a portion of that report:

Private Dan Crone Succumbs to Fever. His Death took place on Sunday at Johannesburg

Sarnia citizens were in sorrow last evening when the news of the death of Private D.J. Crone, of the Canadian Mounted Rifles in South Africa, came to hand. THE OBSERVER received an unofficial dispatch during the afternoon that Private Crone had died of enteric fever, but some doubt was entertained as to its authenticity. The worst fears of our citizens were realized later on however, when an official dispatch from Sir Alfred Milner at Capetown to Lord Minto was received by THE OBSERVER, stating that Private Crone, No. 216, of the 27th Battalion, Sarnia, died of enteric fever on August 5th at Johannesburg. The sad news travelled fast, and on the streets on every side could be heard expressions of sorrow and regret. Dr. Johnston, M.P. was notified and he at once telegraphed to Ottawa for information. A reply was received from the Deputy Minister of Militia, confirming the sad intelligence and all hopes that Pte. Crone might yet be alive were abandoned. During the evening Dr. Johnston, M.P. and Sutherland Johnston drove out to the home of Private Crone's parents in Sarnia township, and broke the sad news to them, The scene was a heartrending and sorrowful one.

Dan Crone, as he was familiarly called by his many Sarnia friends, was a young man of sterling qualities. He was aged about 23 years, and prior to his leaving for South Africa with the Canadian Mounted Rifles, was in the employ of the C.P.R. Telegraph and Express Company. When the Mounted Rifles were being organized for service in South Africa, Dan Crone was eagerly the first to offer his services. He passed his examination for qualification and was accepted.

Private Crone was an honored and valued member of the Albert Street Presbyterian Church and also of the Christian Endeavor society in connection therewith. He was also a member of Cawdor Camp, Sons of Scotland, of this town. To say that the sympathy of the entire community is extended to the bereaved parents in their hour of affliction is only repeating what is a universal sentiment throughout the town.

Approximately one month after Daniel Crone's death, William and Catherine Crone received a letter from one of his chum's from Sarnia, who was also in South Africa, dated August 7th, 1900. His chum was Richard Henry Reynolds, whose name is also engraved on the Boer War Memorial Fountain. Following is a portion of that letter:

Mrs. Crone, Sarnia, Ont., Canada

To Mrs. Crone and Family,

I suppose you have already received word about your son's death. My last letter said he was getting better and his death was such a surprise to all around. I generally try and go down to see him every day, so I went down on Saturday, 4th of Aug. in the afternoon, and the nurse told me he was a lot better, and I thought he looked it myself. It was the first time after he had the bad spell that he really knew me and I had on a new suit of khaki and he noticed it right away. I was going down to see him on Sunday, the 5th, but I was on duty so late that I did not get the chance, so as soon as I got my breakfast I went down to see him, as I expected he would be able to have quite a talk, but on entering the hospital I saw the bed empty and the nurse came up and said I suppose you know what has happened, and she told me all. She said a little after I left on Saturday he took a spell of coughing and it lasted for about three hours, then he stopped for awhile and about half past ten on Saturday, the 4th of Aug, he gave three sighs and passed away. The orderly ran for a doctor but when he got there all was quiet. I asked the nurse if I could see the body and she told me it had been sent down to the Victoria hospital, so I went down there and they told me he had been taken from there to the undertaker's. I was making for there when I saw a funeral and I asked the officer who he was burying. He told me it was Dan, so I followed the hearse to the cemetery and saw him laid away. I was the only Canadian that was at the funeral, because none of the rest knew about it. After he was buried the preacher came up to me and said I see your friend has gone at last, and I was speechless. He asked me your address and said he would write to you. Dan had a very respectable funeral, the band was out and played the dead march and three volleys were fired over his grave. I am glad for one thing to tell you and that is that Dan has lived a Christian life all through the war and I am sure he will spend the rest of his days with his God above. After I left the cemetery I went back to the hospital and asked for his clothes and things and the Major said he could not give them to me, so I went to the C.M.R. captain. His name is Captain Greenwood, and he drove me back to the Wesleyan Hospital and I got two rings, one he brought from home and one he found in Capetown, a little silver watch which a friend by the name of Dowling, of Toronto, had given him before he left. There was also a photo of a young lady in a leather case, of which I will send you the proof in this letter. His last request was to one of the orderlies of the hospital to take the Maple Leaf off his hat and send it to me to give to his mother. I have got everything in Capt. Greenwood's charge and will bring them home to you if God spares me... I will close now with the sympathy of all the boys of 4 troop, A Squadron, C.M.R.

From Dan's friend,

Richard H. Reynolds No. 215, 2nd contingent, 4 troop, A Squadron, C.M.R., South Africa

The nurse that took care of Dan was Nurse Pourie, P.O. box 2804, Johannesburg, South Africa.

The preacher that buried him Rev. Mr. Morrise, Johannesburg, South Africa.

He was buried by the East Lancaster Regiment.

There is a Kruger three-penny piece that was in one of Dan's pockets. If there are any letters come for him I will send them back to you.

Rich H. Reynolds

In mid-August of 1900, one week after receiving the above letter, the Crone family received another letter from Private Richard Reynolds. Following is that letter:

Miss L. Crone, Sarnia, Ont., Canada

I write you these few lines to let you know that I got three letters for Dan. I asked the Capt. what I would do with them and he told me to look at the address and send them back to the parties, but I could not see any address, so I sent them all to you and maybe you know who they are from. I opened them but I never read a word of them only the heading and the name at the last. I went up to the police barracks at Pretoria to see some of the boys about putting up a headstone for Dan and I formed a committee to see about putting it up. I got over £20, and I am going to order a stone tomorrow and when it is up I will have some pictures taken of the grave and stone and bring them home with me for you. I will send you a list of the subscribers. I could not get up to the squadron, which is at Middleburg, but I saw most of the boys that were on the police. Anything else that comes for Dan I will send right back to you. All the boys send their sympathy to all your family and we will do anything for you while we are out here. If you let me know I will send his things or bring them home when I come. We do not expect to leave Africa for two months yet. I will close now, from your brother's friend.

Rich Reynolds, No. 215, 2nd contingent, 4 troop, A Squadron, C.M.R. South Africa.

This is the committee: R.H. Reynolds, of London, Ont.; J. Heron, of Toronto, Ont.; A.F. Stover, of Woodstock.

As promised in his letters, Private Richard Reynolds of Sarnia would visit the Crone family in March of 1901, to return Daniel Crone's last belongings from South Africa.

Another Sarnian, Frederick Gorman (whose name is also engraved on the Boer War Memorial Fountain), would write to the Crone family;

We were all very much grieved to learn at Pretoria of young Crone's death at Johannesburg. It is impossible for you to understand how closely we from Sarnia keep track of one another out here and the interest we care in one another is 1st rate.... Crone was a fine young man.

Daniel Crone was Sarnia's first ever soldier to die overseas while in service to his country. After the war, William Crone received from Ottawa his late son's Queen's Medal with four Clasps: Johannesburg, Diamond Hill, Cape Colony and Orange Free State. On August 12, 1900, there was a Memorial Service held in Sarnia for Daniel Crone at the Albert Street Presbyterian Church. At the memorial service, Reverend J.R. Hall said, "We have graves in the Country of the boys who fell in defence of our country, but I do not know of a grave of any soldier who died in the defence of the Empire."

On March 24, 1901, William Crone in Maudaumin wrote a letter to the Canadian South Africa Memorial Association. Following is that letter:

Dear Sir,

We are much in sympathy with your movement to erect suitable memorials to the Canadian boys who lost their lives in S. Africa but there was a stone erected to our son by his comrades but we will be willing to subscribe to help erect a monument to others.

Yours faithfully

Wm. Crone

Twenty-four-year-old Daniel Crone is buried alongside his comrades in Braamfontein Garden of Remembrance, Johannesburg, South Africa. On his headstone are inscribed the words, IN MEMORY OF PTE. D. CRONE. BORN IN LAMBTON, CANADA. DIED 4-8-00. AGED 24. ERECTED BY HIS COMRADES.

Aside from his actual grave in Braamfontein Garden of Remembrance, Johannesburg, South Africa, there are two memorials dedicated to Daniel Crone in Lambton County. A memorial at Irwin Cemetery, Sarnia, Lambton County reads: *In Memoriam Daniel J. Crone Son of Wm. & Catherine Crone of Sarnia Township. Born Jan. 24, 1876, Died Johannesburg, South Africa Aug. 4, 1900. A member of the First Battalion Canadian Mounted Rifles Serving the British Empire in the South Africa War, 1900.*

There is also a memorial plaque in the Federal Building on the corner of Christina and Davis Streets in Sarnia that reads: *1899-1902. South Africa. In Memorium. This tablet is erected by the citizens of Sarnia, Canada. In Memory of Daniel J. Crone, a resident of Sarnia, Ont. Died Aug. 4th 1900 at Johannesburg, South Africa while serving as a soldier of the British Empire, 1st Batt. Canadian Mounted Rifles.*

* The following is courtesy of Dan McCaffrey, a Sarnia-Lambton reporter and author, who wrote this column in November 2005, on the only Sarnian to lose his life in the Boer War.

When local residents pause to remember the nation's war dead today, they might want to spend at least a moment reflecting on the story of Dan Crone.

Crone, the first Sarnian ever to die on a foreign battlefield, fought in the Boer War, a campaign that has all but disappeared from the nation's collective memory. Indeed, when commentators eulogize Canada's war dead they invariably refer to "the two world wars and the Korean conflict."

Dan Crone's war is rarely mentioned. He is, in other words, a forgotten hero. It's as if the term "Lest We Forget" doesn't apply to the men of his generation. And if we can forget them, what's to stop us from eventually forgetting about the soldiers of other conflicts? Crone's story should be remembered because it tells us a great deal about the sacrifices young Canadians have made over the decades.

When war broke out in 1899, the twenty-three year old employee of the CPR Telegraph and Express Company quickly joined the cavalry. Before long, he found out there was nothing glorious about war. In his letters home, he described sweltering days, cold nights, hunger, homesickness, and fear. On one occasion, he recalled sleeping on an African hillside. "We had to lie on the rocks all night. I thought I would freeze," he said. After weeks of eating "hardtack," he rejoiced in telling the story of how he caught a few ducks and chickens and immediately "began plucking and roasting."

In his dreams, he sometimes returned to Sarnia. "I was home one night," he wrote. "Oh! Was I not having a good square meal. I had just cleaned the table when I was awakened to find myself as hungry as ever.

I had not eaten for two days at that time." His first taste of combat was scary. "I admit it gives a person a funny feeling when you hear the shells whizzing by you," he told his parents.

Once, while crossing a river, he was caught in an ambush. "Their shells fell right amongst us," he wrote. "One passed within a foot of me and shot another fellow's horse's ear off. We were ordered to advance and cross the river, which we did on the dead run through water, mud and everything. Some had to dismount and wade through, as it was too deep for horses."

Crone made national headlines in May 1900 when he rode behind enemy lines to rescue a wounded soldier trapped under an exhausted horse. The pair made it to safety, only to learn they'd been reported missing in action. "When neither turned up for a couple of days it was concluded that they had been wiped out or gobbled up by the enemy," the *Toronto Globe* reported.

In August 1900 Crone's luck ran out. Like many soldiers, his death was anything but glorious. In fact, he succumbed to a bout of fever.

At his memorial service, Rev. J.R. Hall blasted Sarnians who were enthusiastic about the war. "It seems to me that our town, led by some of our citizens, has gone wild—simply wild. Where to is the glory of war now?" he asked. He added, "Within the past week there has come very near to us something of the realities of war. The only way we could understand something of it would be to go over to South Africa, stand on one of the hilltops there, and see what has taken place. I am afraid that if some of our shouters were there, they would no longer shout."

*Dan McCaffery is a Sarnia reporter, historian and the author of eight books, including six books on military history.

Aftermath

*With Desolation and the Stars
I lonely vigil keep,
Over the garner'd fields of Mars,
Watching the dead men sleep –
Huddled together, so silent there.
With bloodless faces and clotted hair,
Wrapped in their long, long sleep*

*By uptorn trees and craters rims
Along the Ridge they lie,
Sprawled in the mud, with out-spread limbs,
Wide staring at the sky.
Why to the sky do they always stare,
Questioning heaven in dumb despair?
Why don't they moan, or sigh?*

*Why do I rave, 'neath the callous stars,
At their upturned faces white?
I, surely I, with my crimson scars
Slumber with them this night!
Death, with shadowy finger bare,
Beckons me on to – I know not where;
But, huddled together, and freed from care
We'll watch till the dawn of Light*

WORLD WAR I (THE GREAT WAR, 1914-1918)

Following is a description of important historical events, people and key battles of the First World War. Sarnia-Lambton's sons participated in every major battle fought by Canadian troops. Many made the supreme sacrifice.

- **SARNIA BECOMES A CITY:** Only three months before the start of World War I, there was a significant day in the history of Sarnia. It was on May 7th, 1914 that the town of Sarnia, having reached a population of 10,000 residents, was officially declared a city. On that May 7th date, the Royal Highness **Prince Arthur, Duke of Connaught and Strathearn** visited the municipality from Ottawa accompanied by his youngest daughter, the Royal Highness Princess Patricia of Connaught. The Duke of Connaught, Prince Arthur William Patrick Albert, was the first member of the Royal Family to become the Governor-General of Canada. He was the third son of Queen Victoria, and his daughter Princess Patricia was a granddaughter of Queen Victoria.

The Royal father and daughter arrived in Sarnia by train at the Grand Trunk station at the foot of Ferry Dock Hill in the afternoon, greeted by enthusiastic, cheering crowds and the honour guard of the 27th Regiment with a regimental band. A procession with the Duke and his daughter in a horse-drawn carriage was then led up Front Street, to Christina and Davis Streets on its way to Victoria Park. In 1891, the park had been renamed Victoria Park in honour of Queen Victoria, Prince Arthur's mother, who would reign as Queen of the United Kingdom from 1837 until 1901. There, for several hours during the afternoon, hundreds of people participated in the ceremonies while bands played and children waved flags. The guard of honour from the 27th Regiment, in scarlet tunics, white helmets and gleaming accoutrements, the school cadets in bright new uniforms, members of the local First Nations, a corps of khaki clad Boy Scouts, and thousands of school children in white, made an effective background for the royal guests. Among the dignitaries were Colonels R. MacKenzie, Colonel R.I. Towers, Sarnia Mayor Joseph B. Dagan and Maude Hanna who was hostess at a reception in Princess Patricia's honour. Maude Hanna would lose her stepson, Neil William Hanna, in WWI. Information on twenty-three-year-old Lieutenant Neil Hanna is included in this Project on page 293.

- **The Imperial City:** At one point during the impressive ceremony Prince Arthur, Governor General of Canada, thanked the citizens of Sarnia for the warm welcome extended to his party and then officially proclaimed Sarnia as a city. While at the park, the Duke planted a ceremonial hard maple tree near the west end of the park, using a small nickel-plated spade (the ceremonial nickel-plated spade used for planting the tree was placed in the Carnegie Library, and is still housed inside the Sarnia Library today). City of Sarnia mayor Joseph Dagan then said, *"In testimony of our loyalty to the King and your Highness as his representative in Canada, and in the public expression of our affection and regard for all the members of your illustrious family, we have taken the liberty of selecting as a synonym for Sarnia the title of the Imperial City, thus linking the title of the reigning house of the Empire with our young city's name."* Mayor Dagan then watched his granddaughter, Margaret Diver, present a bouquet of flowers to Princess Patricia. After the ceremony, the Duke and Princess visited the Sarnia Collegiate Institute on London Road, and Sarnia General Hospital where tea was served. They were then taken on a tour of other interesting places in the city, including the Sarnia Reserve. They then returned to the Grand Trunk railway station where hundreds of people again cheered as the train pulled away. The *Sarnia Observer* headline that day was "The Imperial City-Sarnia Lights the Way". Less than three months after the Duke's visit and Sarnia being proclaimed a city, families in the new city of Sarnia learned that their country was going to war.

Prince Arthur and Princess Patricia in Sarnia – May 7, 1914

- **The Princess Patricia's:** An interesting sidenote is that at the outbreak of World War I, Montrealer Captain Andrew Hamilton Gault, a veteran of the Boer War, offered the Canadian government \$100,000 to help recruit, finance and equip an infantry battalion for immediate overseas duty. It was the last privately raised regiment in the British Empire. One of Captain Gault's enthusiastic supporters was Lt.-Col. Francis Farquhar, who was the military secretary of Canada's Governor-General, the Duke of Connaught, Prince Arthur. Colonel Farquhar was able to gain the Duke's permission to name this new regiment raised by Captain Andrew Gault, after the Duke's youngest daughter, Princess Patricia of Connaught, who had endeared herself to Canadians, and who had visited Sarnia only months earlier in May of 1914.

So on August 10th, 1914, the Princess Patricia's Canadian Light Infantry was established in Ottawa, initially allowing only experienced British soldiers and university men into the ranks. Only eight days later, the newly formed regiment had a full complement of high calibre volunteers, approximately 1,100 men, the majority of whom were veterans of the Boer War. In September 1914, the Battalion left for France, becoming the first Canadian infantry unit to serve in the Great War, entering the trenches near Ypres early in January 1915.

Commonly referred to as the "Princess Pat's" or "PPCLI", they have become one of the most well-known and fabled fighting regiments in Canada and around the world, having participated in every major operation undertaken by Canada in World War I, World War II, the Korean War, in Peacekeeping missions and in the Afghanistan War.^{2E, 2Z} Throughout the Princess Patricia's history, members of the Sarnia community have served in the unit.

- **Mueller Limited:** Mueller Company was founded in 1837 in Decatur, Illinois, originally as a gun shop, by Hieronymus Mueller, a German immigrant. By 1880, the focus of the business had shifted to the manufacture of plumbing goods. By the early 1900's, the company was prospering, and that included an increase in business in Canada. In Sarnia, Joe Dagan, an alderman in 1906, urged town council to push for the growth needed to make Sarnia a city. In order to achieve Cityhood, a community had to have a population of at least 10,000 people and, in the early 1900's, Sarnia was a few hundred citizens short of the magic number. At the urging of Alderman Dagan, Sarnia Council offered the Mueller Company a \$30,000 grant if it agreed to start up a factory locally, and hire at least 150 workers. Mueller's accepted the offer, and with Oscar Mueller heading the operation (the youngest of Hieronymus' six sons), a new brass products factory opened its doors on Clifford Street in Sarnia in June 1913, known as Mueller Limited. The influx of new workers brought the Sarnia population to above 10,000, which enabled the town to apply for city status (which the province granted in May 1914, with Joe Dagan then elected as mayor).

By the time World War I started, Mueller Ltd. had switched from manufacturing bronze and brass fittings for plumbing, gas and water companies, to munitions for the war, including shell casings and detonator fuses for high explosive shells. It would soon employ 1,800 workers toiling around the clock in three shifts, 24 hours a day. In 1917, with the United States entering the war, Mueller's opened a new factory in Port Huron (Mueller Metals Company), which built munitions to aid the American war effort. The Canadian Government would again look to Mueller Limited during World War II. Muellers in Sarnia produced forgings and machine parts for anti-aircraft and naval ammunition, as well as special bronze valves used in the construction of various types of engines and winches for navy corvettes, frigates, destroyers and minesweepers.^{N, 5P, 5Q, g, z}

- **THE WAR BEGINS:** Before 1914 the Great world powers were in two big alliance blocs: the **Triple Alliance** (Germany, Austria-Hungary and Italy) and the **Triple Entente** (France, Russia and Britain).

By the summer of 1914 in the lead up to war, Europe was a tense powder keg of conflict. Countries had calculated goals, deep grievances and complicated alliances. World War I was triggered on June 28, 1914 when on their anniversary, the Austrian Archduke Franz Ferdinand, heir to the Austro-Hungarian Empire, and his wife Duchess Sophie of Hohenberg, were assassinated in Sarajevo by a nineteen year-old Bosnian Serb terrorist (he was one of seven young conspirators bent on assassinating the Duke that day). The assassination of Archduke Ferdinand, sometimes referred to as the "**shot heard round the world**", was the spark that set off a chain of events that led to the start of war.

On the front page of the July 3, 1914 *Sarnia Weekly Observer* was the headline, "PROUD OF MURDER", with subheadings: "Slayer of Archduke Had Planned Crime For Some Time" and "Martial Law Proclaimed". Sarnians would learn the details of the planned conspiracy against the lives of Archduke Ferdinand and his wife, involving "clockwork bombs", the "explosive" type bullet which killed the archduke, about the young assassin and

his confession. Sarnians would also read about the large-scale anti-Serb riots in a number of cities in parts of the Austro-Hungarian Empire as a result of the assassination, and that martial law had been declared throughout Bosnia and Herzegovina.

On July 6, 1914, Germany (allied with Austria-Hungary) agreed to support Austro-Hungarian action against the Serbs. On July 23, Austria-Hungary delivered an ultimatum to the Serbian government, starting the world on the road to war. The Serbians accepted most of the demands of the ultimatum, but, assured of support from Russia, rejected others.

War officially began on **July 28, 1914**, when Austria-Hungary formally declared war on Serbia (allied with the Triple Entente).

On August 1, 1914, Germany declared war on Russia (the same day that Germany and the Ottoman Empire signed a secret alliance treaty). On August 2, Germany invaded Luxembourg. On August 3, Germany declared war on France, and the next day, invaded Belgium in order to outflank the French army.

In early August, Germany launched its **Schlieffen Plan** against France. The Plan aimed for the quick defeat of France by having the bulk of the German Army invading through neutral Belgium, Holland and Luxembourg (avoiding the heavily fortified direct border with France) and then moving rapidly south to capture Paris. If they were able to defeat France in six weeks, Germany would then be able to concentrate her efforts on defeating Russia in the east rather than having to fight on two fronts at once.

At midnight (London, U.K. time) on Tuesday, **August 4, 1914**, the United Kingdom declared war on Germany. **Canada and Newfoundland**, as colonies of Britain, were both bound by the Mother Country's decision and thus automatically at war.

That first weekend in August of 1914 was a long weekend for many Canadians, a bank holiday, a time for "menfolk" to spend a little extra time with their families. The front page headlines of the holiday Monday, August 3, 1914 *London Evening Free Press* newspaper read, "Germany, France and Russia at War—Britain Thus Far Out of Struggle—Germany Has Invaded Luxemburg and Crossed Border into France; Fighting Goes On Along Frontier".

So as Canadians had just returned to work after the long weekend, it was Tuesday, August 4 at 7:00 p.m. in Sarnia when the news of the war arrived. The front page headlines of the August 4, 1914 *London Evening Free Press* newspaper read, "BRITISH ULTIMATUM TO GERMANY—London, August 4—Great Britain to-day sent practically an ultimatum to Germany demanding a satisfactory reply by midnight on subject of Belgian neutrality". Other headlines on the front page of the newspaper included, "France Formally Declares War—Commander-in-chief of French left for Frontier to-day"; "Nurses for British Army are being Sought in this city"; and "Belgium Refuses Germany's Ultimatum—War is declared on Belgium by Germany, who is going the Limit."

- **NO ARMY:** Canada had virtually no army to speak of when Britain declared war on Germany. In 1914, out of a population of eight million, Canada had barely three thousand permanent force soldiers, and 50,000 militia recruits on paper. Most of these militiamen or "Saturday night soldiers" were poorly trained and unfit for service. The only 'regular' unit of the Canadian army was the Royal Canadian Regiment (RCR). In August of 1914, it was mobilized and sent to Bermuda to relieve a battalion of the Lincolnshire Regiment (British Army) who had been dispatched to France. The RCR's would later join the CEF in France in November of 1915.^{4F, 7Z}

- **CANADIANS VOLUNTEER:** Though Canada was automatically at war on August 4, 1914, it would be Canadians who chose the extent of their support, and young men could decide if they wished to serve. In World War I, from 1914 until 1917, the **Canadian Expeditionary Force (CEF)** was composed of men who had volunteered to fight. Initially, volunteers had to be "of good character and physically fit for service"; between the ages of 18 and 45; and have a minimum height of five feet two inches. Privates would receive \$1.00 a day, plus ten cents per day for overseas service, and their board, lodging and uniform would be supplied. Earning \$1.10 a day overseas, many of the men sent half of their pay back to families or next of kin back home. Pay was a source of conflict between Canadian and British troops, as the Canucks were paid almost five times as much as the British Tommies.

At enlistment, **volunteers** for the Canadian Expeditionary Force completed a two-sided **Attestation Paper** that included a series of questions seeking information that included: the recruit's name and present address; date and country of birth; name and address of next-of-kin; marital status; occupation; any previous military service; religious denomination; their willingness to be vaccinated and inoculated; their willingness to serve overseas; a question

asking if they understood the nature and terms of their engagement; and a place to sign an oath of allegiance to the King and country. Recruits would undergo a brief medical examination to determine their physical well-being, and information was recorded that included their; age, height, weight, complexion, eye and hair colour and a record of any distinctive physical marks or characteristics, or tattoos.

By contrast, men who were **drafted** into the CEF under the provisions of the **Military Service Act (1917)** completed a far simpler one-sided form that included their name, date of recruitment, and compliance with requirements for registration. Military Service Act recruits were selected based in the order of: unmarried men or widowers with no children first; married men with no children second; and finally married men or widowers with children. More information on the Military Service Act is on pages 156-158.

Officers completed a one-sided form called the **Officers' Declaration Paper**. Applicants were selected from, in order: single men, then married men without families, then married men with families.

Almost 80 percent of the enlistees were single. Initially, married men were not allowed to enlist to fight in the war without their wife's signed permission. Because of this, women were targeted by propaganda (including in the *Sarnia Observer*) with ads such as; "When the war is over and someone asks your husband or your son what he did in the Great War, is he to hang his head because you wouldn't let him go?"

When the war began, Canada had more volunteers than it could take. As the war progressed, it became tougher, as stories from the Front came home. The army began loosening restrictions, lowering the minimum height and chest measurements, dropping dental and eyesight standards, and no longer requiring men to get their wives' permission to enlist. The average Canadian WWI soldier was a little over twenty-six years old, with an average height of five feet seven inches, and a weight of around 150 pounds.^{N, 4G, 5E, 9U}

At the start of the Great War, men from all classes, occupations and ages rushed to enlist at armouries and militia bases across the country. In Toronto, when the University Avenue Armoury doors opened, it was necessary to post guards with fixed bayonets to keep the frenzied, patriotic would-be soldiers at bay. With so many enthusiastic to serve, thousands across the country were turned away because they did not meet the military's high medical and physical standards, and height and age restrictions. Failing stringent medical exams that demanded good teeth, high arches, and healthy lungs was a bitter disappointment for many. Recruiting sergeants selected volunteers with military experience first, either as part of a militia unit or South African War veterans. It was not uncommon for those over the age of 45 to lie about their age, rub shoe polish into their hair or make multiple attempts to enlist.^{4F}

• **Reasons to join:** The reasons and desire to serve varied. Many were British born, so enlisting offered the opportunity for a free trip "ome" (the First Contingent were 60% British born, but as the war progressed, Canadian born would reach 51%). Other reasons to enlist included: there were strong feelings of patriotism, the idea of service to King and Empire; the desire to fight against tyranny and German militarism; there was the attraction of travel and adventure; a desire to follow friends and family; the feeling that because everybody else was going, it was "the thing to do"; social pressure in not wanting to feel embarrassed at being able-bodied and not part of the war effort; for some it was an escape, a way out of a bad family or marriage; and for others, it was for the benefit of regular pay—Privates received one dollar a day, plus ten cents more for overseas service, plus food and board was supplied.

It was felt by many that it was going to be a short war, likely over by Christmas. As the war progressed, when recruiting for second and third contingents, military authorities increasingly relaxed medical regulations and physical requirements.^{4F, 7Z, 8H}

• **Old Enough to Fight:** It is estimated that between 15,000 and 20,000 underage Canadian youths, most enlisting between the ages of fourteen and seventeen, some as young as ten, volunteered to serve in the First World War. They either evaded or went with the blessing of their parents, or they fooled recruiters. Some were coached and given a nudge and wink by a recruiting sergeant to walk around the block and come back in a few minutes after they'd aged a few years. The reasons for joining varied, such as wanting to be part of this "great adventure", wanting an opportunity to travel and earn money, wanting to escape a difficult home life, or wanting to be with their fathers or older brothers who were also serving.

There were a variety of reasons why underage youths (under the age of 18, later changed to 19) could "get away with" joining the Canadian military. These included: no requirement necessary to prove one's age with a birth certificate at enlistment; a sheer lack of eligible men; a large number of unemployed youth seeking a financial means; and regimental recruiters filling quotas. Single men were the first applicants selected; as enlistments waned, the

Militia lowered its recruiting standards and policies; if rejected by one recruiter, the youth would approach a different recruiter; and, even though they had lied about their age on their attestation papers, it was considered a “legally-binding” document. The army was loath to release the underage from service, even when parents wrote pleading letters.

While some of the very young were siphoned off for special training units in England—including the largest, called the **Young Soldiers Battalion**—thousands more underage boys served in the trenches alongside their elders, and would fight in all the major battles. For some, once it was discovered that they were underage, they were assigned non-combat roles such as “runners”, delivering food, water, rum and ammunition to the soldiers on the front lines, or delivering messages to the rear to battalion headquarters. Other underage soldiers served as buglers, in the trenches ready to sound the alarm in case of a gas attack. By the Great War’s end, an estimated 2,300 underage soldiers were killed in action.^{2J, 9U}

A number of Sarnia’s young men that enlisted for service in the First World War were underage. Eighteen of Sarnia’s WWI fallen enlisted as teenagers (age 19 or under). Two examples of local underage enlistees who made the ultimate sacrifice are: In July 1915, sixteen year-old Norman Brearley enlisted to serve, recording his age as eighteen. In the spring of 1917, seventeen year-old Norman Brearley lost his life while fighting in France. In September 1915, fourteen year-old Robert Batey, recording his age as seventeen, signed up to serve in the Great War. One year later, at the age of fifteen, Robert Batey lost his life during fighting in Somme, France. Both Norman Brearley and Robert Batey’s information are included in this Project.

- **Religion** was important to most Canadian soldiers of the Great War: 30.9 percent listed themselves as Anglicans, 22.9 percent were Catholic, 21.1 percent were Presbyterian, and 13.6 percent were Methodist; the remaining 11.5 percent were divided among various other denominations and atheism.^{4F}

- **A WORLD WAR:** World War I started in Europe, but soon spread throughout most of the world. It was fought between two major alliances of countries: the **Central Powers**, that included Germany, Austria-Hungary, Bulgaria and the Ottoman Empire (Turkey and the Middle East); against the **Allied Powers**, that included Serbia, Russia, France, Belgium, Great Britain and the British Empire (Canada, Newfoundland, Australia, New Zealand, India and South Africa), Japan, Italy and the United States. Other countries also fought with the Allies or declared war on the Central Powers including Portugal, Romania, Greece, Montenegro, Brazil, Costa Rica, Cuba, Panama, Peru, Haiti, Nicaragua and China.

The Great War was concentrated along the “Western Front” (through Belgium and France) and the “Eastern Front” (through Germany, Russia and Austria-Hungary). However fighting also took place in Turkey, Albania, Serbia, Bulgaria, Greece, Africa, East Asia and the Pacific, Mesopotamia and Palestine, the Italian front and at sea as well as in the air.

The focus of this section of the Project is on Canada’s, particularly Sarnia’s involvement and contributions in the Great War. Canadian Forces fought primarily on the Western Front.

- **ENEMY ALIENS:** When the First World War began in 1914, there was widespread suspicion in Canada that immigrants from enemy countries—Germany, Austria-Hungary (Ukrainians, Czechs, Slovaks), and later Turkey and Bulgaria—might be disloyal. Labelling them “enemy aliens,” the federal government (War Measures Act) passed regulations that allowed it to monitor and even intern some of these immigrants. The fear was that these “enemy aliens” could go home to fight for their armies against Canada or sabotage the country from within.

On October 28, 1914, all enemy aliens were ordered to register at a local office. During the course of the war, approximately 80,000 enemy aliens registered in Canada. Of those, by the end of the war, approximately 8,600 men would be interned at 24 camps and stations across Canada. They endured hunger and forced labour, including helping to build landmarks such as Banff National Park. A few hundred women and children were also interned. In Ontario, camps were located in Kapuskasing, Sault Ste. Marie, Niagara Falls, Toronto, Kingston and Petawawa.^{2I, 2N, 3R, 3T}

- **COLONEL SAM HUGHES:** Sam Hughes, the Minister of Militia and Defence (from October 1911 to November 1916), was Canada’s war leader for the first two and a half years of the war. Hughes, a powerful and controversial figure, had successes and failures during his time as a Minister. He deeply believed that amateur, citizen-soldiers were better and brighter than professional soldiers; he was prone to patronage and cronyism in awarding military

promotions and munitions contracts; he championed the purchase of the Canadian-made Ross Rifle and other inferior equipment including boots that rotted in mud, poorly designed leather harnesses and trench equipment like the MacAdam shovel that was unusable; and he fought British military authorities in order to keep the Canadian forces together, profoundly influencing the organization of the united Canadian Corps.^{F, 2I, 2N, 3S, 5M}

- **VALCARTIER CAMP:** Sam Hughes was also the man behind the creation of the primary training base for the First Contingent in 1914 at Valcartier, 25 kilometres northwest of Quebec City. After war was declared, he decided to put the call out across the country for volunteers that would be organized into newly consecutively-numbered infantry battalions. Valcartier, originally a small piece of farmland in the Quebec City area was bought and expropriated to increase the size of the base. The sandy fields of Valcartier were soon converted to a military camp in record time, with latrines, water works, huts, parade grounds, electric lights and railway tracks.

After leaving behind loved ones and cheering crowds in their hometowns, all volunteers travelled to Valcartier for equipment, training and preparation for war. When war was declared, the Canadian government called for 20,000 volunteers. One month after war broke out, over 32,000 volunteers arrived at the hastily prepared primary training base camp at Valcartier, Quebec, making it one of Canada's largest cities almost overnight. The volunteers shared the camp with 8,000 horses.^{D, 2I, 3R, 4F}

- **CANADIAN EXPEDITIONARY FORCE:** Approximately 620,000 Canadian men and women were attested during the war and officially served in the Canadian army. Of those, roughly 425,000 served as part of the **Canadian Expeditionary Force** (CEF). This was the name of Canada's entire force that went overseas. Canada would send a total of four contingents (**divisions**) overseas. Each division was comprised of three infantry **brigades** supported by formations of artillery, engineers, machine guns, trench mortars and medical. Each brigade was made up of four **battalions** of about 1,000 men each at full strength.

Shortly after the First Contingent left for England in October 1914, recruiting for a Second Contingent began. Units were again raised across the country, including from southern Ontario—the 18th Battalion (London) and 19th and 20th Battalions (Toronto). The Second Contingent sailed for England in the spring of 1915, in separate transports, evading the dreaded U-boats, and was comprised of the 18th through the 32nd Infantry Battalions. The Second Contingent spent the summer of 1915 training in Shorncliffe on the coast of Kent. Shorncliffe was the primary training camp by mid-1915—a massive camp of stone barracks, wooden huts, and tents, surrounded by fields of lush green where hundreds of sheep were grazing.

This Second Canadian Division joined the First Division by mid-September 1915 to create the **Canadian Corps**, under the command of the British Expeditionary Force. By the autumn of 1916, Canadians were established in other camps such as Bramshott, Crowborough, Hastings, New Shoreham, Seaford, and Witley—all within close proximity of Aldershot, where the British instructed most of their troops. It was not until June of 1917 that a Canadian took command of the Canadian Corps, Lieutenant-General Sir Arthur Currie. In the final months of the war, all four Canadian divisions were commanded by Canadians.^{4G}

The vast majority of Canadians who served in the Canadian Corps during the Great War served in the infantry. The men of the infantry faced the enemy and bore the brunt of the fighting, paying the highest price, suffering a little more than four out of five of all battlefield casualties on the Western Front.^{4F} Battalions were destroyed over and over again, with most hard-luck units losing 500 to 600 percent of their strength: starting with 1,000 men, by war's end more than 5,000 had passed through the ranks.^{4G}

- **CEF BATTALIONS:** Battalions were composite groups of existing militia regiments (having a geographic base), with stray individuals attached to them to meet the necessary quotas. Sam Hughes stripped existing militia regiments of their historical names and organized Canada's volunteer force into new consecutively numbered battalions. Each battalion was commanded by a lieutenant colonel, and had a strength of about 1,000 men, which grew to about 1,200 by early 1918. Each **battalion** consisted of four infantry **companies** of about 200-250 men each. Within each of the four companies were four **platoons**, each of about 50-60 men, largely composed of riflemen. Within each platoon were four **sections** of about 10-15 men, divided into riflemen, rifle grenadiers, bombers, and Lewis machine-gunner sections.

Although men formed close allegiances within their sections and platoons, the larger battalion was the soldiers' family and home.^{4F} Ignoring their bland names, battalions quickly acquired informal names like the "Dirty Third", "Van Doos", "Black Devils" and "Canadian Scottish".

Men from across the country were represented in the infantry battalions, mounted rifle regiments, artillery batteries, railway troop battalions, and other auxiliary units such as medical, field ambulance, forestry, and tunneling units. By the beginning of the war, seventeen battalions had been created. The first four battalions drew their strength from Ontario: the 1st Battalion drew from London, Stratford, and Windsor. The 2nd Battalion was composed of militia regiments from Ottawa, Toronto, and Peterborough. The 3rd Battalion, drew largely from Toronto militia regiments, and the 4th Battalion recruits came primarily from Barrie, Hamilton, and Brantford.^{4F}

By the end of the war, there would be two hundred and sixty numbered CEF battalions in existence, forty-eight of these infantry battalions were at the front. As the war progressed and casualties mounted, most of the Canadian battalions, those numbered from 101 to 258 (including Lambton's 149th battalion), were disbanded upon arrival in England, where the men were absorbed into **reserve battalions** and sent as reinforcements to where they were needed.^{4G}

- **LEAVING CANADA:** By the end of September 1914, Canadian Prime Minister Robert Borden decided that all fit men of the First Contingent of the CEF could go overseas. At Valcartier, cheering could be heard throughout the day and night as word passed through the anxious ranks. A little more than 31,000 men marched to the harbour at Quebec City, singing both new and old marching songs, as well as "O Canada," often to the skirl of bagpipes and drumbeats. The First Contingent, along with one hundred nurses, and over seven thousand horses, left the Port of Quebec on October 3rd, 1914 in some thirty ocean liners, hastily painted in wartime grey. Bands played the boys off with patriotic songs, well-wishers waved as soldiers struggled to find a spot to glance back and thousands of tearing eyes had last looks at loved ones as the ships slipped away. It was the largest single movement of Canadians in the history of the country.^{4F} Many of the soldiers would never see Canada again. The following day, the flotilla passed near St. John's, Newfoundland, where it was joined by the *SS Florizel* with the first five hundred volunteers of the Newfoundland Regiment aboard.^{7A}

- **CANADIANS ARRIVE OVERSEAS:** The enormous Canadian armada carrying the First Contingent across the Atlantic—some 32 liners and transports along with Royal Navy escort ships, arrived after its ten-day voyage in Plymouth Harbour, England on October 14, 1914, having been diverted from Southampton due to German submarine threats in the region. In the long time it took to unload—four days—tired and anxious soldiers were eager to disembark, with wild rumours circulating that the war might end before the Canadians set foot on English soil. The Canadian First Contingent was comprised of the 1st to the 17th Infantry Battalions, plus the Princess Patricia's Canadian Light Infantry. Of the 30,617 men who sailed in the First Contingent, almost 18,500 were British born (although many had spent years living in Canada before the war), over 9,100 were Canadian born and about 750 were American born, though the United States didn't enter the war until April 1917.^{4F, 9U}

After disembarking, as the soldiers marched to the railway station, young women marched alongside, men shook their hands, and the mob cheered. A young Canadian soldier wrote a letter home describing the event; "... *we disembarked and marched through the town listening to the rolling cheers and paeans of praise, grasping the hands of innumerable young ladies, exchanging addresses and handing over quarters, dimes and nickels, button badges and maple leafs till our pockets and uniforms were empty and stripped. Arrived at the station, we awaited the train, some young ladies in the meantime very kindly distributing cigarettes and chocolates...*"^{7A}

The First Contingent men were loaded onto trains and transported to Salisbury Camp, an old British army summer training ground 145 kilometres southwest of London. Never intended for use as a camp over the winter, and certainly not to accommodate troops under canvass, **Salisbury Plain** would be their home until February 1915. In the long, harsh winter of 1914, the First Contingent of Canadian troops underwent rigorous training there. The miserable winter they experienced in the mud, cold and rain was one of the wettest on record. The rain started falling on October 23—"solid sheets of driving rain"—and barely stopped for four months.^{4F} Conditions were so miserable, with torrential downpours creating a sea of mud and small lakes, and violent windstorms that blew down tents, that the Australians and New Zealanders decided to divert their troops to Egypt. The Canadians remained, undergoing intense training with route marches, musketry lessons, drills and trench digging.

- **John Wesley Smuck** was born in July 1891 in Point Edward, Ontario, the son of Peter and Emily Smuck. Twenty-three-year-old John Smuck, single, standing five feet six inches tall, with blue eyes and light brown hair, enlisted in September 1914 at Valcartier, Quebec, recording his occupation as machinist with Grand Trunk Railway, and his next of kin as his mother, Emily Smuck of 202 Mitton Street, Sarnia. In November 1914, Joseph Hay, G.T.R.

locomotive foreman at Sarnia tunnel, received a letter from John Smuck, with the Canadian Army Medical Corps, of the First Overseas Contingent. Following is a portion of that letter:

On Board H.M.T. City of Benares, November 7, 1914

My Dear Mr. Hay,

Just a few lines to give you a rough idea of our trip to date. We spent three weeks at Long Branch, seven miles outside of Toronto, and then to the notorious Valcartier camp. This place was more like a young city, board walks, electric lights, water works, and sewage system and banks. After three weeks more of life under tents we embarked at Quebec city on H.M.T. Scotian.

Here life was a change. Good beds or rather berths, and plenty to eat. We had 22 transports, besides our escorts. At night not one light was seen. Sometimes we felt a little creepy, but would retire to our large dining room to play cards or enjoy good music. After 21 days on water we arrived at Devenport. We were on board one week before disembarking. All noncoms. were granted shore leave to see the old historic city and also Plymouth. The reception given us was something to be well remembered.

On disembarking we marched to the railway station to entrain for Salisbury Plains, where we arrived the following day. It rained 23 out of 24 days we were camped there and we had wet feet continually, but not one man sick, which is considered a good record. Our unit is the first of the Canadians to leave for the front and are on our way now for the continent. Where? We do not know and if we did it would be impossible to let you know, but it is probably France. In sight of land now, but are anchored in the English channel. Why? Ask Kitchener! Our company is ready for anything from good to bad and hope to be home some day to relate my experiences in full.

Sincerely yours, John Smuck

No. 11 Stationary Hospital, C.A.M.C. First Canadian Expeditionary Force

Lance Sergeant John Smuck would serve over four years in the Great War, with the Canadian Army Medical Corps, No. 2 Canadian Stationary Hospital and later the 15th Battalion. He is referenced in a letter on page 232. During his time of service in England and France, he would be hospitalized due to a hernia, epilepsy, mumps and influenza. He was discharged from service in June 1919. He passed away in Sarnia on December 23, 1922 due to rheumatic endocarditis at the age of thirty-two, and is buried in Lakeview Cemetery. One of John's siblings was brother David Smuck, who also served with the Army Medical Corps. John's brother David Smuck would not survive the war. Information on twenty-five-year-old Private David Smuck is included in this Project on page 373.

- **TRAINING:** The training was made worse by the poor quality of Canadian-made equipment. Minister of Militia Sam Hughes adopted the Ross Rifle, Mark III as the primary weapon for the Canadian infantry. It had a number of design flaws, the most serious being that it had a tendency to jam during rapid fire. Army-issued boots had soles with a thin leather cover over a cardboard-like substance, which were reduced to a sodden mess within a few days. They were soon replaced by heavy hobnailed boots from the British. The Oliver equipment, a tangle of leather straps and pouches for carrying ammunition and equipment, was poorly designed—with ill-placed pouches that did not hold enough ammunition and leather straps that cut under the arms and constricted after they got wet. Created by Sam Hughes' secretary, the MacAdams shovel, a combination of metal shovel and sniper's tool, was useless as a shovel and lethal to use as a shield. Most were sold as scrap metal before they got anyone killed.

The uniform consisted of a foppish-looking peaked cap (Brodie steel helmets would not be issued for another year and a half); a tight-fitting khaki serge tunic, with a stiff collar and seven brass buttons; and khaki-coloured trousers which were held in place by suspenders. In cold weather, leather jerkins, vests without arms, were worn on the outside of the clothes, underneath the greatcoats. Wool socks and puttees, worn around the ankles and lower leg, were also part of the uniform. Natty-looking greatcoats offered some warmth and often doubled as a blanket or pillow. Most of the infantry battalions looked the same in their khaki-coloured uniforms, except for the kilted units, which included the 13th, 15th, and 16th Battalions of the First Contingent. The kilted battalions fought hard to keep their distinctive uniforms and unique tartan colours. It was also common that when Highlander battalions attacked, they entered with bagpipers playing them into battle.

Razors and shaving brushes were issued to keep the soldiers clean-looking, but were not to be applied to the upper lip, where it was illegal to shave for the first half of the war. Some officers, like Lieutenant Colonel E.S. Wigle of the 18th Battalion (Western Ontario), ordered the enforcement of this bizarre rule, citing the quasi-scientific principle that a moustache allowed the infantry to better aim their rifles.^{4F} One local soldier disciplined because of this rule was Sarnia-born **Sinclair Battley** (his family resided at 154 Front Street, Sarnia). A Corporal with the Canadian Army Medical Corps (CAMC), on December 10, 1915, Corporal Battley was reprimanded for "Direct

disobedience of an order in that he shaved his upper lip after being warned not to" (additional information on Corporal Sinclair Battley is on page 86 and 232). Other parts of the soldiers' kit included: tooth, hair and boot brushes; a mess tin and water bottle; rifle oil bottle and pull-through (a cord to pull through rifle barrel); bayonet and scabbard (sheath). The Department of Militia issued a distinctive maple leaf badge for all of its' Dominion troops, as it did in the South African War, on which "CANADA" was superimposed, and along with the shoulder titles and collar numerals (with the numbered battalion), all were worn with pride.

The Canadians saw themselves as different from the British. Like the Australians and New Zealanders, the Canadians, as fellow dominion soldiers, were portrayed in propaganda as belonging to a stronger, bigger, and tougher British race than England's soldiers. Supporters of this belief argued that the northern climate of the Dominion forged natural-born warriors who were better fighters and tougher brawlers than the stunted, inner-city British working-class lads who had grown up in the drudgery of factory cities. The view of the Canadians as soldier-frontiersmen conformed to the fanciful and popular literature that emerged about Canada before the war. Every Canadian was supposedly a lumberjack, voyageur, or Wild West cowboy, born in an igloo or teepee, and raised with a rifle in his hand. These untruths were propagated by most Canadian soldiers, generals, politicians, and publicists who all played up the romance.^{9U}

• **CHRISTMAS TRUCE OF 1914:** The First World War had been raging on for just over four months. In early December of 1914, Pope Benedict XV had called for a Christmas truce, an idea that was officially rejected. In the cold and wet December, many of the trenches were continually flooded, and soldiers were covered in mud and exposed to frostbite and trench foot. Though the war had begun only five months earlier, already 265,000 French, 90,000 British and 80,000 German soldiers had been killed. In the grim landscape of shell holes and rotting corpses, young soldiers were dreading having to spend Christmas away from their families for the first time. As Christmas approached, soldiers on both sides received parcels packed with goodies from home, along with gifts from their government leaders. Even King George V made a point of sending a Christmas card to everyone serving in the British Expeditionary Force. Then something incredible happened on December 24, 1914.

On that beautiful, clear moonlit night, curious Allied soldiers (British, French and Belgian) peered over the parapets and noticed flickering candles of small Christmas trees along the edges of the German trenches. And then they heard the Germans sing *Stille Nacht – Silent Night*. When the Tommies responded with *O Come All Ye Faithful*, the Germans joined in with the Latin words. During that evening, the troops sang Christmas carols to each other across the lines. Finally, several German messengers carrying lanterns strode boldly into No Man's Land and called out, inviting one of the British soldiers to meet half-way. A volunteer, equipped with a flashlamp, walked out to meet them. Though not approved by higher command, junior officers on both sides negotiated a temporary truce.

The next morning, Allied and German soldiers put down their weapons, climbed out of their trenches, and ventured into No Man's Land. They mingled and shared in a variety of festive activities together, including singing Christmas carols, exchanging gifts, sharing food, treats, wine and cigarettes, showing one another photos of their loved ones, and even playing football. The London *Times* published a letter from a Medical Corps major reporting that in his sector, near the tiny Walloon village of Ploegsteert (nicknamed "Plugstreet" by the British), in southern Belgium, the Germans won a football game 3 to 2 over the British. For a short time, there was peace. Before long, the men returned to their trenches and back to fighting a war.

The story of this inspiring moment of spontaneous peace has been commemorated in books, songs, poems and films (eg. *Joyeux Noel*). The Christmas Truce of 1914 did not involve any Canadian battalions or regiments, but it is a hope-filled moment worth knowing, one of "peace on earth good will toward men" on the battlefield. One year later, Sir Arthur Conan Doyle described the Christmas truce as "an amazing spectacle", saluting it as "one human episode amid the atrocities which have stained the memory of the war."

A young Canadian soldier, Arthur Stratford of Brantford, Ontario, who was serving with the British Expeditionary Force, wrote a letter on December 26, 1914, to his sister describing his experience;
My darling Mayd,

... *Well Mayd I spent Christmas eve and Christmas day in the trenches... It was very funny in the trenches yesterday, there was hardly a shot fired. About noon one of the Germans, they can nearly all speak English, shouted over "Merry Christmas" of course we shouted back "Merry Christmas". "Come over here" one of them called. "You come over here" we answered. "We'll come half way if you come the other half" replied the German. So a couple of our men stood up in the trench and the Germans did the same. Pretty soon we were scrambling over our*

trenches towards one another, without rifles of course, and we met half way. Both sides were a little shy at first but we soon warmed up and shook hands and laughed and joked. Soon one of them said "you sing us a song and we'll sing you one". So we gave them "Tipperary" which they enjoyed very much. They sang us a couple of songs, I don't know what they were but they sounded all right.... The men had a huge time with the Germans and all were mighty sorry when dusk began to fall and we thought it time to go back to our lines... We had great fires in the trenches and we spent the remainder of the evening singing until we were relieved. The Germans told us they were very fed up with the war and would be mighty glad when it was over...^{7A}

There were many spontaneous truces along the Western Front that Christmas of 1914, with at least 100,000 British, French, Belgian and German troops participating. The truces ranged from brief ceasefire agreements in order to collect and bury the dead, to longer truces that lasted until the New Year's Day, with extensive fraternization. Yet in other areas of the front lines, shelling and firing continued, and there were deaths in bloody battles on that Christmas Day. British and German high command were not in favour of such truces, chiefly because they feared that too much fraternization among enemy troops would hinder their resolve to fight. Truces were less common in subsequent years, but they did occur. From a letter from a Canadian soldier in the vicinity of Vimy Ridge in 1916, he wrote, "*We had a truce on Christmas, and the Germans were quite friendly. They came over to see us and we traded bully beef for cigars. Christmas was tray bon.*" Another soldier wrote, "*There was a truce to bury our dead. We had a short service over the graves, conducted by our minister and the German one. They read the 23rd Psalm and had a short prayer. I don't think I will ever forget the Christmas Day I spent in the trenches. After the service we were speaking to the Germans and getting souvenirs from them. Fancy shaking hands with the enemy! I suppose you will hardly believe this, but it is the truth.*"^{D, 3S, 5M, 7W, 7X}

• **CANADIANS MOVE TO THE FRONT:** In February 1915, the 1st Canadian Division—the name that had by this time officially replaced the term First Contingent, embarked for the trenches in France. On February 4, 1915, following his inspection of the 1st Canadian Division in the pouring rain at Salisbury Plain, His Majesty **King George V** issued a farewell to the troops, to be read to all units on board ship, after their embarkation for France. After four months of training, the Canadians—18,517 of them along with 4,764 horses, were desperate to get to the front.^{D, 3R} Following is the text of the King's farewell:

Officers, Non-Commissioned Officers and Men:

At the beginning of November I had the pleasure of welcoming to the mother country this fine contingent from the Dominion of Canada, and now, after three months of training, I bid you godspeed on your way to assist my army in the field. I am well aware of the discomforts that you have experienced from the inclement weather, and abnormal rain, and I admire the cheerful spirit displayed by all ranks in facing and overcoming all difficulties.

From all I have heard and from what I have been able to see at today's inspection and march-past, I am satisfied that you have made good use of the time spent on Salisbury Plain. By your willing and prompt rally to our common flag you have already earned the gratitude of the motherland. By your deeds and achievements on the field of battle I am confident that you will emulate the example of your countrymen in the South African war, and thus help to secure the triumph of our arms. I shall follow with pride and interest all your movements, and I pray that God may bless you and watch over you.

The men of the 1st Canadian Division were utter neophytes compared with the conscripts and reservists they were about to face. A handful of Boer War veterans, a dash of experienced officers, but aside from summer soldiering in the militia, and stints of training at Valcartier and the Salisbury Plain, the Canadian volunteers were regular citizens. All German males spent the first two years of their adulthood in compulsory military training and a further five years refreshing their skills in annual manoeuvres with their regiments. They were an army long groomed for war from a technically advanced, thoroughly militarized society.⁸⁰

• **THE WESTERN FRONT:** During World War I in France and Belgium, on the "Western Front", the forces of France, Britain, Canada and their allies fought the Germans. Trenches stretched some 700 kilometres throughout northern Europe, from the border of Switzerland to the Belgian coast on the North Sea.

Arriving at the front, Canadian soldiers found themselves in a cratered, eviscerated wasteland of mud, wasted vegetation, and unburied bodies. Along most parts of the front, less than 30 kilometres away in either direction the green fields of France or Belgium teemed with life. Since the Germans had captured most of Belgium and much of France early in the war, they had the enormous advantage of usually holding the best ground. Their strongpoints were usually positioned on the forward slope of a ridge or hill, providing a view into enemy lines and forcing attackers to advance uphill.^{4F}

By mid-autumn 1914, the German initial advances into Belgium and France had staggered to an exhausted halt, and each side had settled into their series of trenches. This line of static trenches extending 700 km, and in some places only 1.5 km wide, was described by one Canadian journalist as “**a ribbon of deadly stealth.**” For two weeks at the end of February 1915, the 1st Canadian Division had its first taste of action when each of its brigades did a seven-day familiarization tour with British units. On March 3, the Canadians took over 6,400 yards of the front near Armentieres; supported a British attack; and suffered their first casualties. By the end of the month, the Division had marched north to Ypres, Belgium, the centre of the salient jutting into the German line. The Canadians took up their positions between April 14 and 17, 1915. The troops relieved a French division that had left only the most rudimentary trenches full of dead soldiers and human waste. The Canadian soldiers set out to bring their positions up to “British standards”, cleaning and deepening the trenches and stringing barbed wire. They would not get the time they needed to ready themselves fully.^{5J, 7Z}

• **THE SECOND BATTLE OF YPRES**, Belgium, April 22-May 25, 1915: This was Canada’s first series of major battles in the First World War (the First Battle of Ypres took place October 19-November 22, 1914, prior to the Canadians' arrival on the battlefield). The Ypres salient—a bulge in the front lines on the **Flanders** plain, was located east of the ancient Belgian city of Ypres. Ypres was the last portion of Belgium that was not in enemy hands after the initial German advance of 1914 and, as a result, held great symbolic meaning to the Allies.

When the Canadians arrived, the Ypres salient was an enormous open graveyard, a quagmire where more than 180,000 casualties had been suffered by British, Indian, and German troops. It was surrounded on three sides by enemy soldiers and artillery, on the higher ground and dug in. The trench works the Canadians moved into in April were also woefully inadequate—shallow, poorly constructed, and littered with human excrement, pools of water, and the unburied corpses of soldiers killed in previous fighting. The Canadian soldiers set to work digging deeper trenches and organizing latrines.

It was here that the Germans would unleash their plans for *Disinfection*, the code name for the first lethal **chlorine gas attack** in the history of warfare, even though it had been outlawed in the Hague Conventions. Though British and French commanders had warnings of an impending gas attack (obtained from interrogating prisoners), the feeling at the top was that the Germans would never be so ungentlemanly as to use gas against their enemies. In fact, the Germans had brought up more than 5,730 steel canisters filled with 160 tonnes of lethal chlorine gas, and dug them into the forward edge of their trenches along a four-mile stretch of the front.^{4F, 7Z}

In the late warm sunny afternoon of April 22, 1915, the Germans launched an offensive, which as usual began with an intensive artillery bombardment, lasting for an hour. At about 5:00 pm, the Germans opened the valves on the thousands of canisters, releasing the chlorine gas from the cylinders into a light northeast wind. The Canadian troops watched the several kilometres long, thick clouds of yellow-green chlorine drift toward the French-Algerian trenches that were located to the left of the Canadians. Widespread chaos ensued—the French-Algerian defences crumbled as the troops, completely bemused by this terrible weapon, dropped their guns and equipment and ran for cover choking in panic. The fumes irritated eyes, throats and lungs and many died. One Canadian described what he saw at that moment, “*Over the rise, across the canal, dim figures appeared. There were scores of them. They reeled and staggered as they came. They coughed and wept, turning agonized faces to the Canadians. Now and then one dropped writhing. It was the French Turcos, German gas had done its work.*”

The fleeing troops left a gaping 6.5 kilometre hole in the Allied line, leaving the Canadians exposed and vulnerable. German troops pressed forward, threatening to sweep behind the Canadian trenches and put 50,000 Canadian and British troops in deadly jeopardy. Even the Germans were highly suspicious of the success of this new weapon and without any adequate protection against the gas themselves, planned only a limited offensive. Canadian eyewitness George Nasmith described his experience as, “*Looking towards the French line we saw this yellowish green cloud rising on a front of at least three miles and drifting at a height of perhaps a hundred feet toward us. The gas rose in great clouds as if it had been poured from nozzles, expanding as it ascended.*” Later in the day, on seeing victims of the attack at a Canadian field ambulance, he described, “*Lying on the floors were scores of soldiers with faces blue or ghastly green in colour, choking, vomiting and gasping for air, in their struggles with death, while a faint odour of chlorine hung above this place.*”

The raw and vastly outnumbered 1st Canadian Division, themselves suffering from the gas, desperately fought throughout the night to hold the stretched out line, managing to stop the enemy from encircling them inside the salient, and from marching on the city of Ypres. The Germans stopped their advance, satisfied with having

occupied the villages of Langemark and Pilkem, capturing 2,000 prisoners and 51 guns.

One of the gaps created during the gas attack was at a position known as **Kitchener's Wood**, an oak plantation near St. Julien. It was here on April 22 at approximately 11:00 pm in the dim light of the moon in a cloudy sky that the Canadian 10th Battalion of the 2nd Canadian Brigade and 16th Battalion Canadian Scottish of the 3rd Brigade were ordered to counter-attack and close the gap. It was the first major Canadian attack of the war. With no reconnaissance prior, and despite running into obstacles through the swirling clouds of gas and heavy enemy fire, the Canadian attack cleared the area of Germans, but it came at a heavy price, suffering more than 75 percent casualties.

Following is a portion of the description of that April 22 counter-attack, as it appeared in the *Sarnia Observer* on the seventh anniversary of the battle:

The two battalions were formed up in battle array, each four lines deep, the men at one yard intervals... Word was given to advance and the lines moved forward quietly in the dark. Another halt was called. A quarter of a mile ahead lay a dark patch on the horizon. It was a wood (Kitchener's Wood). Then word came back that the Germans were entrenched there. Orders were then laid that they must be removed by dawn.

Again the lines advanced. From somewhere behind, a lonely gun was throwing an occasional shell into the wood ahead... Ahead at intervals, German flares rose from the wood. Still another halt was called. This time orders were issued to discard packs and greatcoats and to fix bayonets. "Advance," came the order and the wood began to loom close. The ranks moved steadily. The front rank was not more than 150 yards from the trenches.

Then it happened. With a roar... the whole front of the wood and hundreds of yards on either side burst into lines of jagged flame. Hundreds of flares shot into the sky, laying bare the earth like a noonday sun. The front lines melted. Down went the men. There were no more orders. None could be heard in that awful blast. The men, hugging the earth, watched ahead. When one line rose all rose and rushed forward. They seemed to fall like leaves, but none paused to inquire a comrade's fate.

How did any win through? The air seemed filled with rifle and machine gun bullets. The roar was constant. Shrapnel burst overhead, again and on through ditches, wire over hedges that offered no shelter, men falling everywhere on they rushed. With a wild yell the trench was reached. The firing broke suddenly off. Grey figures darted away through the trees. Those who remained were simply killed in passing. On into and through the wood went the Canadians.

The place was won. The Germans had been removed. The wood was wide and the undergrowth thick in places. From the left broke out a heavy rifle fire. The bullets ripened through the trees. The Canadians heeded them not. They were hunting Germans and they toyed with death. Many fell. The remnants of the two battalions then consolidated in the captured German trench. When dawn broke, they were partly dug in. Two thousand men had rushed to the attack. The roll-call at dawn revealed a scant 600.

Then commenced a day of horror. To the left of the wood and for a mile beyond stretched a German trench... German machine guns played upon the Canadian trench constantly. Many of the defenders went down. Then the German artillery somewhere over on the right got the range. All day long the great shells swept the Canadian line from end to end. Horribly accurate was their fire. By noon the trench was filled in places. To move one was forced to crawl over dead and dying. One's comrades breathed their last in roaring crowded solitude. Scant help could be rendered. A shell lighting in a pile of dead and wounded; red flesh and gory heads streaked the air. In the open lay hundreds of Canadians. If a man rolled groaning in agony, the Germans saw him and a fusillade of shots ended his misery.

But the Canadians hung on. The thought of retreat simply occurred to no one. They waited for the German onslaught. It was sure to come. But it never came. Men's nerves were worn thin and ragged. But they hung on.

As a result of the April 22 gas attack, dressing stations were inundated with hundreds of men at a time. For the victims, the heavier than air chlorine irritated and destroyed the alveoli, causing fluid discharge within the lungs and impairing the exchange of oxygen. Even worse, the chlorine mixed with water to form hydrochloric acid that burned tissue. Victims writhed on the ground, their faces turning purple, making gagging, choking sounds, pulling at their clothes, vomiting "greenish slime," propping themselves up to gasp for help, and then falling back exhausted from their struggles. In the end, the worst-case men drowned in their own searing fluids. One general wrote, "*I saw some hundred poor fellows laid out in the open, in the forecourt of a church, to give them all the air they could get, slowly drowning with water in their lungs – a most horrible sight, and the doctors quite powerless.*" D, N, 21, 2N, 30, 3R, 4F, 4Z, 11C

• **Baptism by Fire:** In the early morning hours of April 24, after enduring another violent artillery bombardment, it

was the Canadians who fell victim to the second chlorine gas attack in the history of warfare. An eyewitness from the 48th Highlanders described what he saw as, *“Men wearing mine-rescue helmets appeared over the German parapet; they seemed to have hoses in their hands and immediately there was a hissing sound, and a heavy greenish-yellow cloud rose slowly like a thick fog moving across no man’s land.”*

Despite overwhelming odds and dealing with a host of problems from: no gas masks; poor command; lack of food and water; from chlorine gas that left men violently sick and gasping for air through urine soaked and muddy handkerchiefs; to jammed Ross rifles; the inexperienced yet resilient Canadians fought tenaciously to hold key strongpoints and prevent a German advance. Another day of blood and sacrifice resulted in thousands of Canadians wounded, captured and killed. In the first 48 hours at Ypres, there were more than 6,000 Canadian casualties—one Canadian in every three became casualties of whom more than 2,100 died, and 1,410 were captured, the largest number taken at one time during the war (nearly half the Canadians taken prisoner in the Great War went into captivity at the Second Battle of Ypres). The casualty rate suffered by the Canadians in their first battle was to be matched not even by the Somme or Passchendaele. In the days following the battle, the War Office announced, *“The Canadians had many casualties but their gallantry and determination undoubtedly saved the situation.”*^{D, 4F, 7A, 8H, 8O}

In just over one month at Ypres, one third of the Canadian force, over 8,600 soldiers were killed, wounded or captured, but the Canadians, along with the British and French, kept the Germans from breaking through. One German prisoner blurted to his Canadian captors, *“You fellows fight like hell.”* Ypres was the Canadians baptism by fire, where they made a name for themselves as tough and dependable troops, but at a terrible price.^{D, 2I, 2N, 4F, 7R}

One German soldier in the Ypres Salient, at Messines, Belgium, wrote of the frustration of the trench stalemate. *“We are still in our old positions, and keep annoying the English and French. The weather is miserable and we often spend days on end knee-deep in water and, what is more, under heavy fire. We are greatly looking forward to a brief respite. Let’s hope that soon afterwards the whole front will start moving forward. Things can’t go on like this for ever.”* The author was a German infantryman of Austrian descent named Adolf Hitler.^{4Z}

• **John Adda MacDonald** was born in May 1890 in Denver, Colorado. At the age of twenty-four and single, he enlisted in Valcartier, Quebec on September 9, 1914, recording his occupation as druggist, and his next of kin as his father, Mr. A.E. MacDonald of 174 South Brock Street, Sarnia. John Adda MacDonald enlisted as a member of the Canadian Army Medical Corps (CAMC). One month after enlisting he arrived in England, and a month later, on November 6, 1914, he arrived in France as a Sergeant with No. 2 Stationary Hospital. In August 1915, Sergeant John Adda MacDonald of the CAMC in Le Touquet, France, mailed a letter to his parents, Mr. and Mrs. A.E. MacDonald on South Brock Street in Sarnia. Following is a portion of that letter:

Dear Friends,

No doubt you will be somewhat surprised when you receive this letter from me but I wish to thank you for the papers which you have been good enough to send from time to time. As soon as Capt. Bentley receives them, he distributes them among the Sarnia boys who with faces wreathed in smiles, retire to a secluded place where they devour its contents free from disturbance of any kind, and in this way we are able to keep pace with current events in the far away home town, Sarnia....

Last April we worked day and night for days, especially during the last week of April, when our brave Canadians did such remarkable work at Ypres. At that time our capacity was five hundred and sixty beds, but I have seen seven hundred patients here at one time. More than a thousand patients passed through here in a week at that time. In fact, they were being admitted and discharged at the same time during the rush. If I remember correctly it was during that week that I saw the first wounded Sarnia man, who was Private McLellan, shot in both arms and the head. Some of the patients are brought in, having ghastly wounds and mangled and shattered almost beyond recognition. In spite of this it is very seldom even a murmur is heard.

Note: Another letter written by Captain John Adda MacDonald is on page 232.

John Adda MacDonald rose to the rank of Captain, serving with the Canadian Army Medical Corps in England and France including at No. 2 Stationary Hospital, No. 13 General Hospital, Eastbourne, No. 14 General Hospital, Hastings and Canadian Central Depot Medical Stores. John Adda MacDonald would survive the war, and was struck off strength from the CEF on general mobilization on December 30, 1919. After his discharge, John Adda MacDonald would return to the home of his parents at 174 Brock Street, Sarnia (and later 118 Talfourd Street).

• **JOHN McCRAE – DOCTOR, SOLDIER, POET:** John McCrae was born on November 30, 1872 in a small stone cottage in Guelph, Ontario. He was the second son in a family of three, of parents David McCrae and Janet

Simpson Eckford McCrae, who had immigrated to Canada from Scotland. John had a sister, Geills, and a brother, Tom. The McCrae family were devout Presbyterians, attending church several times on Sunday. His father David McCrae, a successful owner of lumber and wool mills and a breeder of prize cattle and horses, founded Guelph's first militia artillery unit. For young John, his father took him and his siblings for long walks in the countryside, introducing him to nature and telling the history of the valiant Scots who fought against England in distant times and for England as it rose to be the dominant empire of the 19th century. The boys and their sister were taught to read and write by their mother, who also entertained them with her own stories taken from literature and the Bible.

John was raised with the militia, and joined the Guelph Highland cadet corps at age 14 while at Guelph Collegiate Institute. A year later, he was awarded a gold medal by the Ontario Ministry of Education as the best-drilled cadet. At age 16, he joined the militia unit commanded by his father and was appointed bugler. It was in high school where he began writing poetry seriously, and he continued to perfect his skills as a poet while in university. He graduated from Guelph Collegiate in 1888 at age sixteen and was the first Guelph student to win a scholarship to the University of Toronto. While studying a broad range of subjects, he also found time to play rugby and join the Varsity Glee Club, and join the Queen's Own Rifles, an infantry unit in Toronto that drilled on the campus.

While at Toronto, he met a young woman named Alice McCrae (no relation, last names spelled differently). They would spend more and more time together, and it was evident to all those around them that something special was blooming. At the age of twenty-one, John McCrae would be utterly devastated by the shocking death of his nineteen-year-old girlfriend Alice, who died suddenly of typhoid. Her death profoundly affected him, and the theme of death would often appear in his writings.^{D, 30, 4C, 5E, 11C} Shortly after her death he wrote;

The Hope of My Heart

*I left, to earth, a little maiden fair,
With locks of gold, and eyes that shamed the light;
I prayed that God might have her in His care
And sight....*

*"Cast her not out!" I cry. God's kind words come –
"Her future is with Me, as was her past;
It shall be My good will to bring her home
At last."*

In August 1893, John graduated from the Royal Military College in Kingston, from the artillery school officer's training course as a Second Lieutenant. Young John–Jack to family and friends–was a handsome young man and gifted student whose interests included botany, animals, music and a love of writing, literature and poetry that was encouraged by his mother. Despite suffering from asthma, he participated in sports and enjoyed outdoor pursuits throughout his life.

After attending university for three years, however, he was forced to take a year off due to severe asthma. He would graduate from the University of Toronto earning a Bachelor of Arts degree in 1894, and four years later earned a Bachelor of Medicine degree there, along with a gold medal for academic achievement as the top student. He spent the summer of his third year as resident physician at the Garrett Hospital in Mount Airy outside Baltimore—a summer convalescent home for sick children. He wrote an essay about his young patients and frequently described the children in his correspondence; *"A kitten has taken up with a poor (child) dying of muscular atrophy who cannot move. It stays with him all the time, and sleeps most of the day in his straw hat. Tonight I saw the kitten curled up under the bedclothes. It seems as it were a gift of Providence that the little creature should attach itself to the child who needs is most."*

After achieving his medical degree, John McCrae continued his studies at John Hopkins Hospital in Baltimore, Maryland, and was awarded a fellowship in the pathology department at McGill University in Montreal in 1899.

John McCrae would set it all aside within a year when the **Boer War**, or Second South African War, started on October 11, 1899. He regretted not volunteering soon enough to be part of the initial thousand soldiers that embarked overseas in late October 1899. *"I see tonight's bulletin that there is to be no second contingent,"* a disappointed McCrae, now 27, wrote to his mother. *"I feel I feel sick with disappointment, and do not believe that I have ever been so disappointed in my life. Ever since this business began, I am certain there have not been 15 minutes of my waking hours that it has not been in my mind."*^{11C}

When the government announced on December 21, 1899 that it would send a second contingent, John took a leave from his fellowship at McGill and enlisted not as a doctor, but as a lieutenant in the Royal Canadian Artillery. He arrived in Cape Town in mid-February 1900. He would serve in the war as an artillery officer until mid-December 1900. In that time, his artillery battery mostly guarded railway lines and stations, seeing little action. McCrae first experienced combat on July 21, 1900, while marching to De Wagon Drift, where the British were able to chase off the attackers after a short skirmish. During his time in South Africa, McCrae engaged in battles, experienced the dangers and hardships of armed conflict, saw many deaths, earned the respect of his men, and won the Queen's Medal.

One of the things he witnessed was that more men were dying of disease than in combat, due partly to the poorly run British field hospitals. He wrote, *"For absolute neglect and rotten administration, it is a model... I am ashamed of some members of my profession ... Every day there are from 15 to 30 Tommies [British soldiers] dying from fever and dysentery. Every one that dies is sewn up in a blanket, and four shillings are taken out of the pay for the blanket. The soldier's game is not what it's cracked up to be."*^{3M, 11C}

He would return to Guelph, then Montreal in 1901 to take up his fellowship at McGill where in 1902 he was appointed resident pathologist at Montreal General Hospital. In 1904, he resigned his commission as Major-1st Brigade of Artillery, his life becoming increasingly busy with new medical postings and responsibilities. Over a period of the next eight years his accomplishments included: was appointed associate in medicine at Royal Victoria Hospital; traveled to England and joined the Royal College of Physicians; started his own practice; was a popular lecturer at McGill and the University of Vermont; was appointed pathologist to Montreal's Foundling and Baby Hospital; was appointed physician to Royal Alexandra Hospital for Infectious Diseases; was expedition physician for Governor General Lord Grey; and co-authored a textbook on pathology in 1912.

John was a highly regarded doctor and gifted teacher of medicine, and was known for treating the poor and waiving his fees. When not teaching or treating the sick, he dabbled in writing poetry and stories. He enjoyed travel, hunting and fishing. He was described as warm and sensitive with a remarkable compassion for both people and animals. His bubbling personality, charms and talents gained him ample friends and recognition, and he was much in demand at social gatherings. The six foot tall, handsome doctor McCrae was popular with the women, and though he had relationships with a number of them, he never married.^{D, 3O, 4C, 5E, 11C}

In the summer of 1914, McCrae decided to take a holiday in Europe where he could visit a few of his friends in the medical field. He left Montreal on July 29, 1914 and eight days out at sea, he learned Britain had declared war. When the war broke out, the forty-one-year-old respected doctor felt compelled to serve, writing to a friend, *"It is a terrible state of affairs, and I am going because I think every bachelor, especially if he has experience of war, ought to go. I am really rather afraid, but more afraid to stay at home with my conscience."* He returned to Canada and volunteered his services *"either combatant or medical, if they need me,"* enlisting on September 22 1914. At that time, the army wanted doctors more than gunners. As part of the Canadian Expeditionary Force, 2nd Division, Canadian Field Artillery, McCrae was given the rank of Major, second-in-command and brigade surgeon.

Since he was an officer, McCrae was entitled to a horse and one, named **Bonfire**, was given to him by a friend. Arriving in England in October 1914, he brought his beloved Bonfire. McCrae was very fond of animals and often wrote home to his niece and nephew as if the letters were from Bonfire and signed with Bonfire's hoof print. As part of the First Contingent, McCrae would spend four months training on Salisbury Plain in atrocious conditions for much of the time.

By February 1915, McCrae was in France on the front lines, the field-surgeon and second in command of the First Brigade, Royal Canadian Field Artillery. In a letter he wrote to his mother in February, he described some of what he saw in the muddy, filthy trenches, *"Most of the trench injuries are of the head, and therefore there is a high proportion... killed in the daily warfare as opposed to an attack... Our Canadian plots fill up rapidly."* In early April, the Canadians moved to the front in Belgium.

The Second Battle of Ypres began on April 22 when the Germans unleashed a heavy bombardment against the Allied lines. In the late afternoon of that sunny, warm day, the Germans released 160 tonnes of lung-searing chlorine gas from thousands of large metal cylinders—the first large-scale release of lethal gas in the history of warfare. Two days later, the Germans unleashed a second gas attack, directly on the Canadian lines. The first four days of Ypres would be among the most costly of the war for the Canadians, with more than six thousand men killed, wounded or captured.

During the Battle of Ypres, McCrae established a makeshift dressing station at a location called **Essex Farm**. It was really just a six-square-metre cavern carved out of the bank of the Yser Canal. There he tended to hundreds of dreadfully wounded soldiers every day and night—operating on a crude table, straw soaking up the blood, the steady thump of shellfire shook his dugout, poisonous chlorine gases in the air, and dust and debris filtered down on the doctor and his patients. It was not uncommon for casualties to roll down the bank of the canal and land in front of the dressing station.

Kevin Patterson in the 2015 anthology *In Flanders Fields: 100 Years* wrote, “[McCrae] rejoined his beloved artillery by becoming a war surgeon in a field hospital attached to the guns. McCrae had become an infectious disease consultant at McGill, co-authoring a textbook on pathology. He was no more a trauma surgeon by this point than he was a psychiatrist. But he felt duty called him.”^{11C}

McCrae was surrounded by the dead and dying, corpses piled up on the battlefield, and he watched regiments bury their dead as lines of crosses spread. After days of shelling and lack of sleep, John lost his appetite, but he forced himself to eat in order to keep working. He was haunted by the death of so many friends, comrades and countrymen. He recounted Ypres as “*seventeen days of Hades*,” during which “*every horror that war had, we had at our door*.” In a letter to his mother, McCrae wrote of the Battle of Ypres:

The general impression in my mind is of a nightmare. We have been in the most bitter of fights. For seventeen days and seventeen nights none of us have had our clothes off, nor our boots even, except occasionally. In all that time while I was awake, gunfire and rifle fire never ceased for sixty seconds... and behind it all was the constant background of the sights of the dead, the wounded, the maimed, and a terrible anxiety lest the line should give way.... How tired we are, weary in body and wearier in mind. And all the time, the birds sing over our heads.^{4F, 6Q}

Major John McCrae and the First Brigade Canadian Field Artillery would be in the trenches near Ypres, Belgium, from April 22 to May 9, 1915. In mid-May, the Second Battle of Ypres was winding down and the Canadians departed.

During his time with the Canadian Field Artillery, McCrae had become close friends with **Alexis Helmer**, who was a graduate of McGill University and the Royal Military College in Kingston. On May 2, 1915 at Ypres, twenty-two-year-old Lieutenant Alexis Helmer was seeing to the guns when an eight-inch German shell exploded right in front of him and another officer. Helmer was killed instantly and the other officer died later of his wounds.

Helmer’s comrades gathered what body parts they could, sewed them into sandbags, and arranged them in the form of a body in an army blanket for burial. They also recovered a photograph that Helmer had kept with him in his pocket, of his fiancé. Helmer was buried that day, with his fiancée’s photograph, in a makeshift grave with a plain wooded cross. In the absence of a chaplain, Major John McCrae conducted a simple service at the graveside a few hours later. He knew his friend was a Methodist, but there were no padres available with the battle still at a fevered pitch. McCrae recited parts of the Anglican Burial of the Dead ceremony “*as well as I could from memory. A soldier’s death!*” Wild poppies were already beginning to bloom in the churned up earth between the rough wooden crosses marking the many graves, a fact not lost on McCrae despite his grief.

Sometime on May 2, after burying his friend, John McCrae was inspired to write a few lines of verse. Eyewitness accounts vary about how and when McCrae came to write “**In Flanders Fields**”. Sergeant-Major Cyril Allinson remembered seeing him writing on May 2 after the funeral. McCrae was sitting on the step of the ambulance (dressing station) with a pad in his hand. “*His face was very tired but calm as he wrote. He looked around from time to time, his eyes straying to Helmer’s grave. The poem was almost an exact description of the scene in front of us both*,” said Allinson. McCrae showed the poem to Allinson who tried to memorize it.

McCrae would continue to work on his poem the next day, May 3, in a quiet spot near his dugout while waiting for more wounded to arrive, within sight of his friend’s grave among the many others. John McCrae’s fifteen lines of verse written on a piece of wrapping paper would become the poignant and iconic poem ‘In Flanders Fields’.

D, 3O, 4C, 6Q

At the encouragement of a few friends who had read it over, he submitted the poem to the English magazine the *Spectator*—it was rejected. He submitted it again, to the British satirical magazine *Punch*, which published it, unsigned, in the December 8, 1915 issue. Almost immediately after ‘In Flanders Fields’ was published, the poem was being memorized by soldiers, and soon it began to resonate with the civilian public. Numerous composers even set

the poem to music, and it was used as the centerpiece of the Canadian Victory Loan campaign, credited with raising millions of dollars. McCrae would never know the tremendous impact the poem would have after the war, but he did have the satisfaction of knowing it was popular among the troops at the time. He was known to write it out by hand and send it to those who asked to read it.^{11C}

In Flanders Fields

*In Flanders fields the poppies blow
Between the crosses, row on row,
That mark our place; and in the sky
The larks, still bravely singing, fly
Scarce heard amid the guns below.

We are the Dead. Short days ago
We lived, felt dawn, saw sunset glow,
Loved, and were loved, and now we lie
In Flanders fields.

Take up our quarrel with the foe:
To you from failing hands we throw
The torch; be yours to hold it high.
If ye break faith with us who die
We shall not sleep, though poppies grow
In Flanders fields.*

Not long after Ypres, and against his wishes, John McCrae was transferred to a new post. Given the choice, he would have stayed at the front, where at Ypres, half of his brigade had been slaughtered. On June 1, 1915, John McCrae was promoted to Lieutenant-Colonel, the Chief of Medical Services and was transferred to No. 3 Canadian General Hospital (McGill), in Dannes-Camiers on the northeastern coast of France. It was an area of sand dunes running to the sea, where the patients were housed in large, colourful tents while the medical personnel of all ranks were in bell tents. Despite his rank, McCrae insisted on sleeping in a tent like the other staff. He always wore his pistol with his uniform, preferring to be viewed as a soldier more than a doctor. By Christmas, the hospital was relocated to a deserted abbey near Boulogne, France, where the patients were housed in huts and a nearby barn was converted into a surgery.

It was grueling work for the doctors, surgeons and nurses on staff as they operated on and cared for the wounded soldiers. If patients arriving there could be helped within three weeks, they stayed there. If they required longer convalescence and were able to be transported, they were sent on to England to clear space for the never-ending flow of soldiers from the trenches. The hospital received wounded from the Battle of the Somme, the Battle of Vimy Ridge, the Third Battle of Ypres and from Arras and Passchendaele.

The success of *In Flanders Fields* made McCrae famous, and he could have returned to Canada or transferred to London, but he chose to stay at the hospital. While other medical staff returned to their universities or practices after serving for a year, McCrae felt duty-bound to stay on. He felt uncomfortable about not being with his former artillery colleagues at the front, but he remained intensely committed to the war and refused to return to Canada before it was won.

John McCrae was deeply affected by the fighting and frightful losses in France, becoming bitter and disillusioned, so much so that in John Prescott's book *In Flanders Fields: The Story of John McCrae*, the author wrote of John: "He felt he should have made greater sacrifices, and insisted on living in a tent through the year, like his comrades at the front, rather than in the officers' huts. When this affected his health in mid-winter he had to be ordered into warmer surroundings. To many he gave the impression that he felt he should still be with his old artillery brigade. After the battle of Ypres he was never again the optimistic man with the infectious smile". One nurse who knew him in Montreal thought he had aged fifteen years, "his face lined and ashen grey in colour, his expression dull, his action slow and heavy." Conflicted, tired and emotionally worn, John struggled with his temper, had trouble concentrating and was often plagued by a lack of energy—symptoms that today, would indicate that McCrae was suffering from post-traumatic stress disorder. Yet he continued to push himself hard in caring for his patients, carrying out his administration work, and he demanded high standards and military-like discipline from his medical staff. In the summer of 1917, he was troubled by severe asthma attacks and occasional bouts of bronchitis.

McCrae found solace going for quiet walks in the French countryside, on his horse Bonfire that he was able to retain, and a local French spaniel named **Bonneau** that had befriended McCrae and Bonfire. Bonneau followed McCrae everywhere and often accompanied him on his rounds through the medical wards, bringing its own brand of cheer to the wounded soldiers. On walks with Bonfire and Bonneau McCrae would often stop to chat with local children. One girl later gave her impression of him saying, *"He was a very straightforward, very gentle man who you could not help liking. Everything about his face indicated someone very special."*

Lieutenant-Colonel John McCrae

Lt-Col. John McCrae and Bonneau

McCrae's final poem was published in October 1917 in *The Spectator*, the paper that had first turned down "In Flanders Fields." That poem, "The Anxious Dead," picks up on the theme of death and duty (see page 1211). McCrae was pleased that it was published just as the Canadians achieved victory at Passchendaele.

In December 1917, he was offered command of No. 1 Canadian Field Hospital. After Christmas, the reply was sent that McCrae would accept the position. He was then asked to assume the vacant position of consultant physician to the British Army in the field, the first Canadian so honoured, and with it would go a promotion to the rank of colonel. McCrae accepted but did not live to take up the post.

He became very ill in January 1918 and was moved on January 23 to No. 14 British General Hospital for Officers near Wimereux, France, where he continued to grow weak. Two nurses from No. 3 Canadian General Hospital volunteered to provide him with 24-hour care. His audible wheeze deepened into a deep, rasping cough and a fever came over him. Five days later, in the early morning hours of January 28, 1918, forty-five-year-old John McCrae fell into a coma and died of pneumonia aggravated by bacterial meningitis.

His death was a shock to his friends, students, fellow healers, as well as to millions around the world. John McCrae's January 29 funeral, with full military honours, was attended by nearly all the commanders in the area, including General Sir Arthur Currie, commander of the Canadian Corps, as well as a large delegation from all the local hospitals and units. Forlornly following the Union Jack draped coffin on its gun carriage was Bonfire, bedecked in white ribbons and McCrae's boots placed traditionally reversed in the stirrups. Being winter with no poppies around, artificial ones were spread on McCrae's grave. Lieutenant Colonel John McCrae was buried in Wimereux Cemetery, France, not far from the fields of Flanders. His death was met with great grief among his friends, contemporaries and comrades in arms. A friend wrote of the funeral; *"The day of the funeral was a beautiful spring day; none of us wore overcoats. You know the haze that comes over the hills at Wimereux. I felt so thankful that the poet of 'In Flanders Fields' was lying out there in the bright sunshine in the open space he loved so well...."*

In 1933, Sir Arthur Currie, then the principal of McGill University, unveiled a stained-glass window dedicated to the three members of the university's medical faculty who had died in the Great War. John McCrae's window features his biography with rows of crosses amid a field of poppies. The inscription reads, "Pathologist, poet, soldier, physician, a man among men."

All of his colleagues agreed to the final description and thought he would appreciate being remembered first as a pathologist. He was certainly proud to be a physician and soldier, but he was modest about his poetry. McCrae left an indelible impression on his friends, colleagues, patients and students, but history will remember him for the short poem written in the midst of a bloody war of attrition.

When the 100th anniversary of the writing of “In Flanders Fields” approached, the Royal Regiment of Canadian Artillery and the Royal Medical Service commissioned sculptor Ruth Abernethy to create a bronze statue of McCrae in his battledress, sitting on a log with a pen and pad in hand. Two statues were cast. One was unveiled at the National Artillery Memorial in Ottawa on May 3, 2015, on the centenary of the day the poem was written. The second was unveiled outside the Civic Museum in Guelph, Ontario, the hometown to which McCrae never returned. The small limestone cottage in Guelph that John McCrae was born in is a National Historic Site of Canada, and is operated as a museum, McCrae House. ^{D, 30, 4C, 6Q, 11C}

• **YPRES MEMORIAL SERVICE IN SARNIA, 1922:** On Saturday, April 22, 1922, on the seventh anniversary of the Second Battle of Ypres, a special memorial service to honour the fallen of Ypres was held in Sarnia. The parade and service was organized by the Grand Army of United Veterans. The parade formed up at the city hall square in the mid-afternoon, commanded by Lt-Col. W.W. MacVicar and included: Mounted Marshall Constable Lynch of the Dominion Mounted Police; City of Sarnia Mayor George Crawford and Alderman Reeve of Point Edward and Councilors; Sarnia City Band; Machine Gun Company; twelve Sarnia Ypres Veterans under the command of Col. W.J. Bentley; over eighty war veterans; Imperial Sarnia Pipe Band; Boys Scouts; Wolf Cubs; and Sarnia Collegiate Cadets.

The parade proceeded along Lochiel Street, Front Street, Davis Street, Christina Street to Victoria Park (now Veterans Park). There, Col. W.J. Bentley placed a wreath on the memorial in memory of the Ypres fallen. The parade then moved north on Christina Street to the Imperial Theatre where a service was held. The special speaker was Captain, the Reverend J.F. Tupper, who was then the chaplain of the Canadian Air Force at Camp Borden, and was well known as “The Fighting Parson” having served in France and England. The twelve Sarnia men in the parade who had survived the great battle were: Lt-Col. W.J. Bentley, No. 2 Stationary hospital, C.A.M.C.; Sgt-Major A.E. Owens and Sgt. F.J. Russell of the 1st Canadian Battalion; Sgt. F.J. Carion, M.M., of the 16th Battalion; J.T. Crooks, Hugh Fleming, M.H. McAllister, J. Travis, J.F. Foster, and J. Lethbridge of the 1st Battalion; J.S. Wilson of the 1st Reserve Park; and H. Laidler of the 2nd Field Ambulance.

On Monday, April 24, 1922, the *Sarnia Observer* featured a report on the parade and service. Following is a portion of that report:

*SPLENDID OBSERVANCE SECOND BATTLE YPRES BY SARNIA VETERANS
Parade of Units to Victoria Park Where Comrades Place Wreath on Memorial in Honor of
Those Who Sleep in Flanders Field - Inspiring Service at Imperial Theatre...*

*Across the seas in Flanders fields.
At dawn a larks song rises gay,
The heroic dead know endless light
Lift up your heads and pray.*

- Lines on wreath

It was a beautiful spring afternoon in the city yesterday with a benevolent sun shining in a cloudless sky and gentle spring zephyrs floating in the air, as Sarnia prepared to give her mead of honor to the memory of the Canadian soldiers who died in the second battle of Ypres. Just such another day it was seven years ago when out of a cloudless sky came the hurtling shells bringing death in their train and wafted on the light breezes, the terrible clouds of poison gas that drove back the Algerian defenders in the Ypres salient, and drew Canadian troops into a battle against odds, in which undying fame was won for the Dominion but at costly sacrifice. The thoughts of the crowds who lined market square... went back to the later days of April 1915, when following the news of a glorious stand by Canada's hitherto untried soldiers, came the long lists of casualties and the nation mourned her dead...

...The parade marched by way of Front street to Victoria park with several thousand citizens regarding the march past. Arriving at the park, the Ypres veterans moved over to the memorial and placed a wreath there-on, and as quietly moved away and rejoined the parade. There were other wreaths too, for James H. and Arthur J. sons of Mr. and Mrs. James A. Allan, one to the memory of James W. Bennett and one to Harry G. Bury, already placed by their relatives.

At the Imperial Theatre every seat was occupied. On the platform were Senator F.F. Pardee, chairman Lt-Col MacVicar, Lt-Col W.J. Bentley, the Rev. Canon Davis and the Rev. R. Weaver with Captain the Rev. J.F. Tupper known among the men overseas as “The Fighting padre”... Senator Pardee said, it was seven years almost to a day since the greatest and most glorious achievement of all battles took place. The achievement of the troops at Ypres stood out as a finger post along the whole line of victories and with it the name of Canada was indelibly associated.

Canada proved herself as never before, and it was shown that Canada's men and women could do as the men and women of any nation.... The impressive service included speakers, a fine selection of hymns, prayers, singers, a quartet and closed with the pronouncement of the benediction and the sounding of the last post.^N

• **THE BROODING SOLDIER:** One of the most striking battlefield memorials is the “Brooding Soldier” sculpture located at St. Julien, Belgium. It stands at a crossroads known as Vancouver Corner in honour of that city’s 7th Battalion, which fought with extraordinary tenacity at this crucial hinge of the Canadian line. Regina sculptor Frederick Clemesha’s design took second place in a Canadian postwar competition to create a memorial to the fallen, finishing behind the Vimy Ridge Memorial design. Clemesha himself had served in the Canadian Corps during the war and had been wounded. The “Brooding Soldier” was unveiled on July 8, 1923 by HRH **Prince Arthur**, the Duke of Connaught—the same Duke that had been in Sarnia in May 1914 to officially declare Sarnia a city. The almost eleven metre granite column features a Canadian infantryman’s upper torso with bowed head and folded hands resting on a reversed rifle. The enduring memorial stands like a sentinel keeping watch over those Canadians who died during the gas attacks at Ypres, of which over 2,000 fell and were buried in various cemeteries in the vicinity.

A plaque on the “Brooding Soldier” memorial in Belgium has the words;
THIS COLUMN MARKS THE BATTLEFIELD WHERE 18,000 CANADIANS ON THE BRITISH LEFT
WITHSTOOD THE FIRST GERMAN GAS ATTACKS THE 22ND-24TH OF APRIL 1915. 2,000 FELL AND
HERE LIE BURIED.

Note: The Point Edward cenotaph is located in Point Edward Veterans Memorial Park on St. Clair Avenue. At the top of that cenotaph is a soldier figure that has a vague resemblance to the “Brooding Soldier” in Belgium.

The Brooding Soldier, Belgium

Menin Gate Memorial, Belgium

• **MENIN GATE (YPRES) MEMORIAL:** Unveiled on July 24, 1927, the Menin Gate War Memorial is situated on the east side of the town of Ypres (now Ieper), in the Province of West Flanders, on the road to Menin and Courtrai in Belgium. It is located on a site chosen because of the hundreds of thousands of Commonwealth soldiers who passed through this spot on their way to the battlefields on the Ypres Salient. It bears the inscribed names of 54,395 Commonwealth Force soldiers who fell in the Ypres Salient before August 16, 1917 and whose bodies have never been identified or found. Of those are the names of 6,994 Canadian soldiers who fell on Belgian soil and were listed as “missing, presumed dead”. Decorated World War I veteran and poet Siegfried Sassoon called the haunting structure “the gravestone of those who have no graves.”^{5E}

At least three young men from Sarnia gave their lives in the Second Battle of Ypres, including Harry Bury, Roy Illiffe and Thomas Powell, and at least nine young men from Sarnia have their names inscribed on the (Ypres) Menin Gate Memorial in Belgium—Bury, Illiffe and Powell, along with George Ansbro, Angus Garrod, Charles Knight, Thomas Littlefield, James Pirrie, and William Skinner (all of their stories are included in this Project).

Along with panels of Portland stone that bear the names of the dead, inscribed by regiment and corps, the Menin Gate Memorial bears two inscriptions. Carved in stone above the central arch are the words: TO THE ARMIES OF THE BRITISH EMPIRE WHO STOOD HERE FROM 1914 TO 1918 AND TO THOSE OF THEIR DEAD WHO HAVE NO KNOWN GRAVE. Over the two staircases leading from the main hall is the inscription: HERE ARE RECORDED NAMES OF OFFICERS AND MEN WHO FELL IN YPRES SALIENT BUT TO WHOM THE FORTUNE OF WAR DENIED THE KNOWN AND HONOURED BURIAL GIVEN TO THEIR COMRADES IN DEATH.

Since 1928 at the Menin Gate War memorial, every night at 8:00 p.m., rain or shine, traffic is halted, and crowds gather to pay their respects, as four buglers from the local fire brigade station themselves at the centre of the Hall to sound the *Last Post*. The “Last Post” ceremony has continued up to the present day—except in the years of German occupation during the Second World War. On the September 1944 evening that Polish forces liberated Ypres, the ceremony resumed at Menin Gate despite the fact that heavy fighting was still taking place in other parts of the town.

- **MAY-JUNE 1915:** Following the Battle of Ypres, the decimated units of the 1st Canadian Division marched south to join in the Allied offensives that were already under way. The Canadians were thrust into the fighting near the villages of Festubert in mid-May 1915 and Givenchy in mid-June, both in northern France.

The **Battle of Festubert** was the second major engagement fought by Canadian troops in the war. It was part of a wider British offensive against German lines near the village of Festubert, France. The main attack began on May 18, with two brigades of the 1st Division launching frontal assaults against heavy German defences near the village. The fighting here followed the grim pattern of frontal assaults against entrenched German forces that had all the advantages of terrain, firepower and well-positioned machine guns. With little planning and inaccurate maps, they repeatedly charged over open ground with little artillery support. By May 25, after a week of fighting, the battle was over. The result was slaughter on both sides, and the Canadians had made only small gains.

About three weeks later, in mid-June 1915, the 1st Canadian Division was thrust into the fighting at **Givenchy**. Supposedly, lessons had been learned at Festubert, and plans were made to address the issues of German barbed wire and machine gun nests. Three artillery pieces were secretly moved closer to the front line and a tunnel was dug under the German trenches and packed with explosives in the hope that it would eliminate a large section of the enemy front line trenches. Although the Canadians achieved some of their objectives, the gains were negligible and the cost was extremely high—2,468 casualties at Festubert and a further 400 at Givenchy.^{D, 2I, 2N} At least three Sarnians were killed in action at Festubert and Givenchy: Lance Corporal Roy Fair, Sergeant Peter Ford and Private George Gray.

- **GERMAN U-BOATS:** In the years before World War I, the superiority of Britain’s Royal Navy was unchallenged by any other nation’s fleet, but the Imperial German Navy had made substantial strides in closing the gap between the two naval powers in the lead-up to war. Germany had a powerful navy, but was cautious about losing it in a major naval engagement (even though the German navy sank more British warships than it lost at the **Battle of Jutland**, May 31-June 1, 1916—the only major naval battle of the Great War). Germany’s strength on the high seas in the Great War was its lethal fleet of U-boat submarines.

In February 1915, in response to the British naval blockade of Germany, German U-boats began to attack all merchant vessels in British waters. German U-boats typically allowed crews of the ships to disembark before the vessel was sunk. But the war at sea soon lost its chivalrous nature. In May 1916, the civilian ocean liner *Lusitania* was attacked and sunk without warning (see next page).

Afterward, the German high command ordered that U-boats desist in attacking merchant ships with no warning. U-boat attacks intensified, but the confusing, self-imposed rules by the German Admiralty on U-boats that required them to surface when confronting large liners in order to determine nationality, proved cumbersome and dangerous to the U-boats. With no end to the war in early 1917, Germany returned to unrestricted submarine warfare on February 1, 1917. Its primary aim was to sink all vessels supplying the Allies, regardless of whether the country in question was at war with Germany. German U-boats threatened Canadian merchant ships carrying troops and supplies to Britain. With hundreds of ships sunk over the first half of the year, the British Admiralty predicted the possible loss of the war unless the U-boat campaign was stopped.

In response to the U-boat attacks, Allied merchant ships sailed in groups, called **convoy**s, escorted by warships. Canadian and Newfoundland ports like Quebec City, Saint John, Halifax and St. John’s became important convoy gathering points. The convoys, travelling in zig-zag courses, were harder for U-boats to find and attack, but the U-boats still posed a terrifying threat. Combined with limited air support near the coasts, and an increase in Allied war vessels, the all-important logistical lifeline across the Atlantic continued.

In the summer of 1918, German U-boats raided Canada’s east coast, laying mines off the entrance of Halifax harbour and attacking vulnerable ships. Canada’s small navy had little success in bringing the U-boats to battle, but the war ended before the Germans did much damage. In all, 5,000 Allied merchant ships were sunk by German U-

boats during the war. After the war, Germany was banned from possessing submarines under the terms of the Treaty of Versailles. Over time, the Germans circumvented this restriction. In the Second World War, German U-boats would again terrorize merchant shipping.^{D, 21, 10Q}

• **THE LUSITANIA DISASTER:** On May 1, 1915, the luxury ocean liner *RMS Lusitania* sailed out of New York bound for Liverpool, England. Dubbed one of the great “greyhounds of the sea”, the 32,000-ton four-stacker *Lusitania* was the fastest, and most luxurious ocean liner in service at the time, a symbol of British maritime prowess. Aboard the liner when she left New York were 1,959 civilian passengers and crew, including a record number of children (95) and infants (39), and a number of rich and prominent members of society, and three German stowaways. Many of the passengers were British citizens, returning there to do their part in supporting the nation in time of war; and Canadian families moving to England to be near husbands and fathers fighting in the war; and also included 189 Americans; along with many other nationalities including Russian, Persian, French, Greek, Swiss, Belgian, Dutch, and Italian. Included in the ships’ cargo were 4200 cases of Remington rifle ammunition amounting to 170 tons of war munitions bound for Britain. On the day of the liners departure, prior to leaving port, the Imperial German Embassy in Washington had issued a notice in many American newspapers, including New York’s, reminding readers of the existence of the “zone of war” around the British Isles, and cautioned that “vessels flying the flag of Great Britain, or any of her allies, are liable to destruction” and travelers sailing on such ships “do so at their own risk”. Despite the warning, the idea that Germany would dare attempt to sink a fully loaded civilian passenger ship seemed beyond rational consideration. And even if a U-boat did try, common wisdom was that the *Lusitania* was simply too big and too fast, and once in British waters would doubtless be too well protected by the British navy.^{4Z}

In the mid-afternoon of May 7, the *Lusitania* was about 18 km off the south coast of Ireland, approximately 16 hours from its Liverpool destination. The sun was gleaming, the air warm and still, the sea smooth, and the green headlands of Ireland were visible in the distance. It was here that a German U-boat, U-20, fired a single torpedo at the *Lusitania* striking her in the starboard side under the bridge. The initial blast was followed moments later by a second muffled internal explosion (later determined to likely be the result of a rupture of a main steam line, carrying steam under extreme pressure). The ship immediately listed to the starboard side, so severely that the port side lifeboats had swung inward over the deck making them unusable, while the starboard side lifeboats hung well away from the hull. In the chaos and panic, at least one lifeboat dropped into passengers crowded on the deck, another dropped onto a loaded lifeboat below it, and several lifeboats dumped their loads into the water. Only six of the twenty-two conventional lifeboats got away before the ship plunged into the sea. The captain of U-20 viewing the horror through the submarines periscope described what he saw as, “*The ship was sinking with unbelievable rapidity. There was a terrific panic on her deck. Overcrowded lifeboats, fairly torn from their positions, dropped into the water. Desperate people ran helplessly up and down the decks. Men and women jumped into the water and tried to swim to empty, overturned lifeboats. It was the most terrible sight I have ever seen.*” Those in the water found themselves in a turmoil of screaming bodies and corpses, women and children, deck chairs, lifebelts, and endless bits of wreckage. The luxury liner *Lusitania* disappeared below the waters surface in only approximately 18 minutes.^{4Z}

In the nearest port of Queenstown, Ireland, once the *Lusitania* SOS was received, vessels of every size left to render assistance, including the British cruiser *HMS Juno*. The *Juno*, the fastest ship available, could be at the disaster scene in just over one hour. Shortly after leaving port, the *Juno* was ordered to return, for fear that the submarine would still be in the vicinity, and the risk of attack was too great. It would be at least three hours before the fleet of rescue vessels—torpedo boats, trawlers and small fishing vessels arrived at the scene, where they would find a sea strewn with floating bodies and debris. Many of the passengers who had survived the actual sinking perished before rescue, victims of drowning or hypothermia. A total of 1,198 died in the attack leaving 764 survivors. Over 600 passengers were never found.^{4Z}

Sarnia citizens learned of the *Lusitania* sinking in the May 14 *Sarnia Observer*. Following is a portion of that report:

The greatest disaster to British merchant shipping since the war commenced has occurred by the sinking of the great steamship Lusitania in the Atlantic Ocean, off the Old Head of Kinsula, by a German submarine. The ship was struck twice – one torpedo hitting the forward part of the vessel and another in the engine room. The ship sank within fifteen minutes, listing so rapidly that only a few of the lifeboats could be launched. No warning was given... it is feared that 900 or 1,000 persons have lost their lives... The passengers include several hundred United States

citizens, as well as citizens of other neutral nations and Great Britain. An intense feeling of indignation has been aroused throughout the United States at this ruthless disregard of the usages of civilized nations and of the rules of war, on the part of Germany in its treatment of defenceless men, women and children... The war news has sunk to secondary importance in contrast with the absorbing interest of the public in the details of the sinking of the *Lusitania*... Berlin, and practically all Germany rejoices over the drowning of such a large number of innocent men, women and children. Flags are flying, the newspapers are glorifying in the "triumph" and the school children were given a holiday.

Lusitania vs. Titanic: The sinking of the *RMS Lusitania* and the *RMS Titanic* were two of the greatest maritime disasters in history, and they occurred only three years apart. The *Titanic* (operated by White Star Lines) was approximately 882' in length and sunk on April 14, 1912 vs. the *Lusitania* (operated by Cunard Lines) was approximately 790' in length and sunk on May 7, 1915. The *Titanic* struck an iceberg, listed only slightly and sank in 2 hours and 40 minutes vs. the *Lusitania* was torpedoed, listed heavily and sank in only 18 minutes. The *Titanic* did not have enough lifeboats for all of its passengers vs. the *Lusitania* had enough lifeboats for all its passengers, but only a handful of boats were successfully launched. The *Titanic* carried 2223 passengers and crew of which 1517 were lost (68.2% death rate). The *Lusitania* carried 1959 passengers and crew of which 1198 were lost (61.1% death rate).

The Empress of Ireland: Between these two maritime disasters, another famous ocean liner would sink in Canadian waters, just two years after the sinking of the *Titanic*. On May 29, 1914, the Canadian Pacific passenger steamship *Empress of Ireland*, was rammed by a Norwegian freighter in dense fog in the St. Lawrence River near Rimouski, Quebec. The accident occurred in the early morning hours when most aboard were sleeping. The *Empress of Ireland* sank in just 14 minutes. Of the 1477 on board the *Empress*, 1012 passengers and crew were lost (68.5% death rate), while 465 managed to abandon ship and survive. The sinking of the *Empress of Ireland* is the greatest maritime disaster in Canadian history, and is often referred to as "Canada's Titanic". The tragedy never achieved the fame of the earlier *Titanic* disaster, in part because attention was soon diverted to the outbreak of the First World War in August 1914.^{2N}

Lusitania repercussions: Though the *Titanic* disaster has always overshadowed that of the *Lusitania*, the repercussions of the *Lusitania* disaster arguably had a more significant impact on world events. The sinking of the *Lusitania* passenger ship and deaths of innocent civilians and neutral nationals played a significant role in turning public opinion in many countries against Germany; and it would become an iconic symbol in military recruiting campaigns (including in the *Sarnia Observer* newspaper) where the phrase "Remember the Lusitania!" was used on recruitment posters and as a battle cry on the front lines.^{4Z}

The *Lusitania* tragedy damaged relations between the United States and Germany (123 American lives were lost), and would be influential in eventually leading the U.S. in declaring war. After the attack, there would be almost two years of official U.S. protests (President Woodrow Wilson was eager to keep the U.S. neutral) and German replies, made against a backdrop of new attacks on neutral ships and revelations that German spies were at work in America. In June 1916, Germany suspended its attacks against all large passenger ships. However by February 1917, Germany had resumed its unrestricted submarine warfare on all ships in the war zone, and had sunk a number of American ships.

• **AMERICA ENTERS THE WAR:** The United States remained neutral at the start of World War I, but pressure to enter the war built up over more than two years. In November 1916, President Woodrow Wilson was re-elected as "the man who kept [America] out of the war." Despite this, there was mounting pressure in the United States to respond to German transgressions. This included: activities of German agents operating in the U.S., including suspected sabotage attacks against factories involved in the supply of war material to Allied countries; and the German U-boat campaign that resumed its unrestricted submarine attacks against merchant shipping, including U.S. ships.

In February 1917, British intelligence offered the U.S. information that their cryptographers had deciphered a month earlier from a telegram sent from Germany to Mexico—the "**Zimmermann Telegram**". The German foreign secretary Arthur Zimmermann proposed an alliance to the Mexican Government, that if they were to join forces in fighting the Americans, Germany would offer financial support and would help Mexico regain her former territories (Texas, New Mexico and Arizona) in return. The publication of the Zimmermann telegram in the U.S. press caused widespread outrage.

On April 6, 1917, the United States formally declared war on Germany and its allies. On May 8, 1917, six U.S. Navy destroyers began their first patrols in United Kingdom waters, just a day beyond the two-year anniversary of the sinking of the *Lusitania*.^{4Z, 10Q}

U.S. volunteers were slow to come forward—just 97,000 had enlisted by the end of April 1917. A small number of U.S. troops, known as the **American Expeditionary Force (AEF)**, began arriving in Europe in summer 1917, but a mass **conscript** army had to be recruited and trained from scratch. It was not until the next spring that **General John “Jack” Pershing**, commander of the AEF, felt he had sufficient troops to enter battle. American soldiers, nicknamed “doughboys” by their Allies, entered fighting in France in spring 1918. By war’s end, some 4.7 million were mobilized, of which 2.8 million American soldiers were sent to France. About 116,000 died in military service, with more than half of them killed by the influenza epidemic of 1918-19.^{10Q}

• **THE BATTLE OF GALLIPOLI**, Gallipoli Peninsula (modern-day Turkey), April 25, 1915-January 9, 1916: Though this author could not find a record of anyone specific from Sarnia who served in the Gallipoli campaign, Sarnians and Canadians did play a role there (eg. see Corporal Sinclair Battley’s letter on page 86).

Gallipoli is remembered infamously as one of the great disasters of the Great War. By the spring of 1915, British war cabinet felt that a new front was needed to drain enemy forces away from the Western Front. The Ottoman Empire was allied with Germany and the Austro-Hungarian Empire. The Allied Powers plan—the brainchild of Britain’s First Lord of the Admiralty, **Winston Churchill**—was to clear a path through the narrow Dardanelles Straits to Constantinople to force the surrender of the Ottoman Empire, which would also allow the Allies to get supplies and weapons into Russia for the fight on the Eastern Front.

The **Dardanelles offensive campaign** began with several failed naval attacks by British and French ships on the Dardanelles Straits in February and March 1915, which resulted in the sinking of three British battleships, and the crippling of three others. When the naval engagements failed, the Allied forces conducted the first major amphibious operation of modern war. On April 25, 1915, the major land invasion of the Gallipoli Peninsula was launched at two places by Australian and New Zealand Army Corps (the ANZACs), along with British, Newfoundland, Irish, French and India forces. Although the Allies managed to secure footholds on the peninsula, the fighting quickly degenerated into siege warfare with both sides peering at each other from fortified trenches, forced to spill blood in futile frontal attacks on heavily defended positions. The Allies had to deal with a lack of sufficient intelligence and knowledge of the inhospitable terrain; harsh and unpredictable weather ranging from extreme heat, to heavy rains and bitter cold; disease and illnesses such as dysentery, enteric fever, gangrene and cholera spreading among men; swarming insects; food and (contaminated) water shortages were common; along with a fierce Turkish resistance who had entrenched themselves on the higher ground.^{2E, 3S, 4L, 4M, 4N}

Canadian nurses at Gallipoli: A number of Canadians enlisted and served with the British Army at Gallipoli, and a number of Canadians also served in the Canadian Army Medical Corps treating casualties in hospital units there. In fact, two of Canada’s volunteer ‘nursing sisters’, Jessie Brown Jaggard of Wolfville, Nova Scotia and Mary Frances Elizabeth Munro of Wardsville, Ontario, would lose their lives on the Greek island of Lemnos (Limnos), the closest staging-ground to the Gallipoli battlefield.

These two Canadian ‘angels of mercy’, among seventy Canadian nurses stationed on Lemnos, were the first women to die in wartime while serving in the Canadian army. After making their transatlantic voyages, the nursing sisters must have been shocked when they arrived at the 3rd Canadian Stationary Hospital on Lemnos in mid-August 1915. Records indicate that the conditions were horrendous; *“It needed two nurses to change a patients’ wound dressing, one to change the dressing and one to fan out the flies off the wound. Excessive heat and poor sanitary conditions were the contributing factors at spreading disease.... The site had no sanitary provision; the water supply was precarious and depended on one borrowed cart; not even latrine pails were at hand.... food was scarce and unsuitable for the personnel, impossible for patients; dust and flies completed the distress.”*

The exhausted and malnourished nurses worked with selfless dedication caring for the sick and wounded, and were exposed to the same illnesses that were rampant among the soldiers. Both Matron Jessie Jaggard, age 44, and Nursing Sister Mary Francis Munro, age 29, fell ill but carried on with their duties until they dropped, both succumbing to dysentery in September 1915. They were both buried with full military honours in crude wooden coffins on the island of Lemnos. In 2015, a new memorial to the two nurses was erected by the Commonwealth War Graves Commission in the Portianos Military Cemetery on Mudros Bay, on the Greek island of Lemnos.^{C, D, 2G, 2I, 4P}

The Royal Newfoundland Regiment: The young members of the Royal Newfoundland Regiment were the only unit from North America to fight at Gallipoli. Due to a shortage of khaki broadcloth on the island, the Newfoundlanders' uniforms had a unique blue signature—instead of the standard issue khaki-coloured puttee, theirs was blue. **Puttees** were the fabric wrapped around each leg from ankle to knee. Puttees stopped muck, debris and critters from working their way down into the boots or up the trousers; were cheaper than tall boots or gaiters; and they provided warmth, protection and support. The Newfoundlanders quickly became known as "**the Blue Puttees.**" Although the Newfoundlanders were issued standard British khaki later, the nickname Blue Puttees, stuck with the regiment throughout the war.

Approximately 1,100 Newfoundlanders landed on the shores of the Gallipoli peninsula, Suvla Bay, on the night of September 19-20, 1915 in order to reinforce the British. When morning came, they were spotted and the shooting and shelling began. From the beginning, the Regiment had a hard time; day and night the Turkish army, in control of the high ground surrounding the beach, poured a constant stream of artillery and sniper fire down upon the line. At times they were only 50 metres away from the Turkish lines. Conditions were terrible—with insects so thick they covered everything a soldier could eat. The nights were bitterly cold and November brought a storm that flooded the trenches and left many with frostbite. Despite the dangers and squalor of trench warfare, the Newfoundlanders persevered and earned their first battle honour in November 1915 when they captured a ridge (a high point used by Turkish snipers), renaming it Caribou Hill for the caribou patch on their uniforms, with three men earning medals for their bravery in the fighting.^D

By mid-October, Allied forces had suffered heavy casualties and had made little headway from their initial landing sites. British cabinet agreed to a complete evacuation of the peninsula. The commander appointed to plan and execute an evacuation was **General Julian Byng**, who would later lead Canadian troops at Vimy Ridge. The evacuation began in December 1915, and was completed early the following January. It was decided that the Newfoundland Regiment would help in the difficult task of covering the evacuation of Allied troops onto waiting ships. One method used by the Newfoundlanders in order to make the Turks believe the regiment was still present in full force was: unmanned rifles were set up with a can of sand on the trigger. A leaky can of water was placed above the can of sand. When the combined weight of the sand and water reached seven pounds, it pulled the trigger, making the Turks think a sniper was at work. This rearguard operation went well and the Newfoundlanders were among the last Allied soldiers to leave Turkey on the night of January 9, 1916. As the last soldiers pulled away, they detonated abandoned magazines on shore, having successfully deceived the enemy about the final departure. During the almost four months the Newfoundland Regiment fought at Gallipoli, 93 were wounded and approximately 49 of the 'Blue Puttees' lost their lives in action. Three months later, in April 1916, the Newfoundland Regiment would arrive near the firing line on the Somme front, a place they hoped would be a welcome respite from the deprivations of their time in the Suvla Bay trenches.^{D, 2E}

The Cost: Over 123,000 Allied soldiers were wounded during the Gallipoli campaign. Approximately 56,000 Allied troops were killed in action, died of wounds or succumbed to disease in the eight months of fierce fighting at Gallipoli, for no material gain. This included: more than 34,000 British, 10,000 French, 8700 Australians, and 2800 New Zealanders.

Anzac Day: On April 25, 1916, Australians and New Zealanders held their first Anzac Day, marking the anniversary of the first major military action fought by the Anzac forces, their 'baptism by fire', during the First World War at Gallipoli. Since then, Anzac Day has become a principle day of national remembrance in Australia and New Zealand, honouring the memory of the Anzacs who fought at Gallipoli, and all those who served and died in all wars and peacekeeping operations in which those two countries have been involved. Anzac Day is also observed in a number of other countries around the world, including Canada, to commemorate the sacrifice of the Newfoundlanders who fought alongside the Anzacs during the Gallipoli Campaign.^{D, 2E, 3S, 4L, 4M, 4N, 4O}

- **REPLENISHING THE TROOPS:** At the outset of the war, as a tactic to encourage enlistment, the military had the idea to create battalions tied to specific regions. The idea was that men would be encouraged to enlist together, knowing that they would fight alongside their friends and even family members, brother with brother, father with son. One local example was the 18th Battalion, part of the Second Division that recruited in areas that included London, Windsor, Woodstock, Chatham, Strathroy and Guelph.

As the war progressed and casualties began to mount, it became necessary to replace losses in the field. The patriotic fervor that was present in the early days of the war had cooled. Yet the tactic of creating battalions tied to

regions continued and the new battalions were now being trained and sent to England as fast as possible. Despite Canada suffering thousands of casualties overseas, young men, including those from Sarnia and Lambton, continued to sign up in the belief that they would train and fight together.

The **3rd Division** was created in December 1915, and comprised a far higher number of Canadian-born soldiers than the first two divisions. It began to reflect the changing nature of the Canadian Corps, with British and Scottish accents slowly being replaced by the flatter, Canadian dialect. There was an increasing desire among the officers and men to redefine themselves as Canadians first, proud Imperialists second. This forging of a Canadian identity would increase in importance, and intensity, during the last two years of the war. By the end of the war, fifty-one percent of the CEF would be Canadian-born.^{4F}

The **4th Division** was created in April 1916, leaving for France four months later in August. When the 4th Division joined the Canadian Corps in France during the Battle of the Somme, the formation rose to a strength of close to 100,000 men. The four infantry divisions were about 20,000 strong each, and another 20,000 men in uniform were in specialized arms, everything from heavy artillery to logistical formations. The 3rd and 4th Divisions (Contingents) were comprised of the 33rd through the 260th Infantry Battalions, which included the 34th Battalion (Guelph), 70th Battalion (Essex, Kent, Lambton, Middlesex), 99th Battalion (Essex), 135th Battalion (Middlesex) and the 149th Battalion (Lambton).

- **Battle Patches:** In the summer of 1916, the Canadians were issued identification flashes, known as “battle patches.” Each of the divisions had a distinguishing colour: red for the 1st, blue (initially black) for the 2nd, grey for the 3rd and green for the 4th. Worn on the upper sleeve, the badges displayed additional symbols—squares, circles, and triangles—distinguishing every unit in the corps. The patches became an enormous source of pride for the soldiers.^{4F, 8H}
- **Reserve Battalions:** Upon arrival overseas, most of the new battalions were absorbed into reserve battalions. From there, troops were sent to where they were needed, either as reinforcements for the 1st and 2nd Divisions or to the 3rd and 4th Divisions as they were being formed in England. A 5th Division began assembling in February 1917, but was disbanded a year later, with troops going to bolster formations in France. Sarnia fathers and sons were a part of all five Contingents.
- **Left Out of Battle:** As a result of the heavy casualties at the Front, infantry battalions had instigated the “Left Out of Battle” (LOB) rule, where 10 to 20 percent of the officers, NCOs, and men were kept in reserve to form a nucleus in the event of a unit being “knocked to pieces,” so the savaged battalions could be rebuilt. The steady injection of new men from Canada into battalions maintained the fighting battalion as a coherent battle group. This type of rebuilding occurred throughout the war and it ensured the possibility of the resurrection of a battalion after a major battle.^{2T, 4F, 8H}
- **Sarnia-Lambton:** Many Sarnia and Lambton County men enlisted at the outset of war becoming part of the First Contingent (comprised of the 1st to the 17th Infantry Battalions, plus the PPCLI). Others joined later, becoming members of battalions that were part of the Second, Third or Fourth Divisions. Local area infantry battalions included the 18th Battalion (Western Ontario), the 34th Battalion, the 70th Battalion and the Lambton 149th Battalion. Once shipped overseas, these “feeder” units would be disbanded and the soldiers integrated into regular British/Canadian army units. Sarnia-Lambton men also joined other units including the Canadian Mounted Rifles, Canadian Field Artillery, Canadian Army Medical Corps, Canadian Machine Gun Corps, the pioneers, foresters, railway ordnance and service formations of the 1st Contingent (enlisted by Major Bentley) and the 2nd Contingent.
- **The 18th Battalion** (Western Ontario), CEF was organized in October 1914; authorized in March 1915; recruited in London, Windsor, Woodstock, Chatham, St. Thomas, Strathroy, Stratford, Galt, Guelph, Walkerville and Goderich; and mobilized at London, Ontario. It embarked from Halifax on April 18, 1915 aboard the *Grampian*. The 18th Battalion arrived in France on September 15, 1915, part of the 2nd Canadian Division, 4th Infantry Brigade. The 18th Battalion fought until the end of the war, including in battles at Mount Sorrel, St. Eloi, Somme, Arras, Vimy, Hill 70, Ypres, Passchendaele, Amiens, Cambrai and Mons.^F
- **The 34th Battalion** was organized in January 1915; authorized in July 1915; recruited in Guelph, Woodstock, Galt and Stratford; and mobilized at Guelph, Ontario. The 34th Battalion embarked from Quebec on October 23, 1915 aboard the *California*. It provided reinforcements to the Canadian Corps, including to the 23rd and 17th Canadian Reserve Battalions and the 36th Battalion. The 34th battalion was disbanded on July 17, 1917.^F

- In September 1915, the following recruitment advertisement was carried in the *Observer* newspaper for a time:

YOUNG MEN ARE WANTED!

Recruiting is now open for the 70th Battalion Canadian Expeditionary Force.

Recruiting Stations for Lambton County are located in Sarnia, Petrolia, Alvinston, Watford, Forest and Thedford.

- 1. Recruits to be of good character and physically fit for service.*
- 2. Age from 18 to 45 years: minimum height, 5 feet 2 inches.*
- 3. Transportation will be furnished to Recruit from Recruiting Station to Camp in London.*
- 4. Pay \$1.10 per day for Privates, and board, lodging and uniform supplied. Separation allowance for dependents of Privates \$20.00 a month.*

Dependents include only:

- a) Wives.*
- b) Children of a widow if in care of a guardian.*
- c) Widowed mother, if the son is unmarried and her only support.*

The Patriotic Fund supplements these amounts for soldiers having dependents.

Consent of wives, parents or guardians is no longer necessary.

The foregoing is a copy of a circular issued by the officers in command of the 70th.

Seven of the thirty-three officers to complete the 70th Battalion are Lambton men.

Five of the seven fill the higher commands, including the colonel, two majors and two captains.

They look to Lambton to rally to the colors and furnish a quota for which the county will have reason to be proud.

WILL YOU BE ONE?

The 70th recruiting in Petrolia

- **The 70th Battalion** was organized in September 1915; authorized in August 1915; recruited in Essex, Kent, Lambton and Middlesex counties; and mobilized at London, Ontario. In October 1915, the *Observer* reported that, “nearly all members of the 70th Battalion were Sarnia lads.” The 70th Battalion embarked from Halifax on April 25, 1916 aboard the *Laplant*. The 70th disembarked in England on May 5, and two months later, was absorbed by the 39th Canadian Reserve Battalion, providing reinforcements to the Canadian Corps in the field. The 70th Battalion’s commanding officer was Lt. Col. R.I. Towers from April 15, 1915 until July 6, 1916. Lieut.-Col. R.I. Towers, who was a Sarnia barrister, vigorously objected to the dismemberment of his unit, but the plan was carried out anyway. The 70th battalion was disbanded on August 4, 1917.^F

In April 1916, when the 70th Battalion departed for overseas from London, hundreds of Sarnia citizens travelled there to bid farewell, as its commander (R.I. Towers) and many of its members were from Sarnia, as well as Point Edward and Lambton County. The *London Free Press* reported that for its citizens, “half of the city must have turned out to honor them on their departure from her borders.” Troops marched to entrain through the downtown streets lined with crowds scores deep, to the station platform, surrounded by throngs of immense crowds. Following is a portion of the newspaper report on the battalion’s departure:

The Gallant 70th Departs

.... On either side of the street, the crowd awaited, and for blocks away one could tell by the nearing cheers of the crowds, as well as by the classic strains from the band, the approach of the gallant battalion leaving London... Guests thronged to hotel windows and waved a hearty god-speed to the heroic hearts in khaki marching past....

Friends and relatives of the 70th men were admitted through the lines and directed to the coaches allotted to the platoons and companies of which those dear to them were members. There were touching scenes of farewell and tears that broke from quivering eyelids, brave though they tried to be. There were little children weeping and would not be comforted by assurances that "daddy was going to Toronto to buy baby a teddy bear." There were mothers and sisters, wives and sweethearts, whose hearts anguished near to breaking, and fathers and brothers, who found it difficult to remember that though women may weep, far sterner tasks wait for the men to shoulder....

Little interesting touches deep fraught with human interest were to be observed on all sides. Away back from the lines deep in the crowd, an aged man in khaki was playing an euphonium, "Auld Lang Syne," "O Canada," and "Keep the Home Fires Burning." While the battalion was marching to the station, one of the popular lieutenants observed on the sidewalk a Chinese laundryman who had once done the lieutenant's washing. For a moment, the lieutenant stepped out of the line. "Hello, Wong Ling," he said, "surely you were not going to let me go away without saying good-bye." The almond eyes of the laundryman brightened to a pathetic brilliance as he warmly clasped the young officer's hand....

• **Sarnians at the Front:** Sarnia-born **Sinclair Battley** enlisted at ValCartier on September 23, 1914. He was twenty-one years old, single and a medical student at the time. He recorded his next-of-kin as his father, Edwin P. Battley of 154 Front Street, Sarnia. Sinclair Battley became a member of Canadian #2 Stationary Hospital. On October 1, 1914 he was promoted to Corporal, and eleven days later, he arrived in France as a member of Canadian Army Medical Corps (CAMC). In early December 1914, he would spend a week in hospital in LeTouquet with influenza. As an example of the strict military expectations of the time, on December 10, 1915, Corporal Battley was reprimanded for "Direct disobedience of an order in that he shaved his upper lip after being warned not to".

In June 1916, Corporal Sinclair Battley of the CAMC wrote to the editor of the *Sarnia Observer* providing information on the disposition of Sarnia boys at the Front. Following is a portion of that letter:

Dear Sir,

I am writing you a short account of the disposition of the Sarnia boys at the front, as far as my knowledge goes, thinking that their friends might be interested in getting information concerning them. Those who left to join the first contingent have been scattered to many units and along with the men who came later, give Sarnia a representation over practically every part of the war area. As to the first battalion men I have little knowledge, except that with the exception of those who returned – they are still at the front.... I met in France a number of the Sarnia boys from No. 3 Stationary Hospital after their return from Lemnos (Gallipoli). A tougher and more healthy crowd of fellows it would be hard to find. The work on the island evidently having agreed with them, although of a far more strenuous and exhausting nature than we ever had to endure in France....

While passing through Shorncliffe I met most of the Sarnia officers and men of the 70th Battalion. They are working hard and preparing to take their places in the firing line. Everyone is bronzed like an Indian and in the best of health. I did not see the Sarnia artillery men in Shorncliffe as they have a special camp. There are many well known Sarnia boys in the artillery and other branches at the front and in England....

Sarnia may well feel proud of her sons, for they are ably representing her in this time of national peril in every branch of the service and on every portion of the British military areas. Little did we think when we left Sarnia on that memorable August morning in 1914 that we were to be amongst the pioneers of Canada in the greatest struggle the world has known and we are all proud that we were privileged to be amongst those first representatives, not only of Canada but also of Sarnia.

Sinclair Battley

After serving for 20 months, Sergeant Sinclair Battley of the CAMC would be struck off strength at Dibgate Camp on May 25, 1916, returning to Canada to complete his medical studies at Toronto University. Discharged on June 12, 1916, he recorded his intended place of residence as 154 Front Street, Sarnia (he later resided at 467 N. Christina Street, Sarnia). More information on Sinclair Battley is on page 66 and 232.

• **THE LAMBTON 149th BATTALION:** This battalion was the only unit raised exclusively in Lambton County. It was organized in November 1915; authorized in December 1915; recruited in Lambton County; and mobilized at Watford, Ontario. The 149th Battalion embarked from Halifax on March 28, 1917 aboard the *Lapland*. The 149th disembarked in England on April 10, and four days later, was absorbed by the 25th Canadian Reserve Battalion, providing reinforcements to the Canadian Corps in the field. The 149th battalion was disbanded by Privy Council Order on April 11, 1918.^{F, 7V}

When it began recruiting on November 26, 1915, organizers set a goal to recruit 1,000 Lambton able-bodied

young men of military age who were physically fit for war service. In mid-January 1916, as part of their recruitment effort and training, the Sarnia Company of the 149th Battalion, over 120 young men, went on a three-day march south of Sarnia. Leaving the Sarnia armories, marching along the river, they travelled through Corunna, Courtright to Sombra. In each village, the young men were welcomed by cheering citizens; there were patriotic speeches, dinners served; and an evening of entertainment. On the third day, the Company marched from Sombra back to Sarnia. By early March 1916, the 149th already had close to 800 volunteers signed up to fight. The recruits would train at Camp Borden and London. The 149th had three commanding officers in its short history:

Lieutenant-Colonel Dr. Robert George Campbell Kelly, born December 25, 1869 in Brooke Township, was a physician and associate coroner in Lambton County. Robert married Susan Florence Wishart, and they had four children together. He had belonged to the militia since 1885. As commanding officer of the 27th (St. Clair Borderers) Regiment, he offered to raise an overseas battalion from his home county in November 1915. Lt-Col. Kelly was commanding officer of the 149th from November 26, 1915 until his death in December 1915. On the night of December 12, 1915, Kelly collapsed from a cerebral hemorrhage in the garage at his home in Watford. A portion of his Circumstances of Death report includes, “...*He had previously been in good health with heart in normal condition, and medical opinion was that his death was probably caused by fatigue and strain in connection with organization of the 149th Battalion.*” The Watford newspaper, the *Guide Advocate*, mourned, “*He was one of Watford’s big men, and flags all over the town are at half mast out of respect to the doctor’s memory.*” Lt.-Col. Dr. Robert Kelly is buried in St. James Church Cemetery, Watford.

Dr. Lieutenant Colonel Thomas Pinkerton Bradley was born January 7, 1872 in Georgetown, Ontario. On August 12, 1915 at age forty-three, he completed his Canadian Over-Seas Expeditionary Force Attestation Paper in London, Ontario. In June 1916, Thomas married Helen Gertrude MacPherson (from London, Ontario) in London. On September 6, 1916 when Thomas completed his Officers’ Declaration Paper at Camp Borden, he was residing with his wife Helen at 114 Elmwood Avenue, London. A physician/surgeon, he took command of the 149th Battalion on December 22, 1915, upon the death of Lt.-Col. Robert Kelly.

During Bradley’s tenure with the 149th, he and his officers organized a rugby tournament with the 118th Battalion, Western University, London and Sarnia. After the 149th players roughed up the Western students in one match, the university athletic director banned participation in future contests. The Western supervisory board complained, “*We entered a team under the impression that the games would be for sportsmen and gentlemen, but have found that such is not the case.*” The 149th eventually won the championship against Sarnia on December 3, 1916.

Lt-Col. Bradley served with the 149th Battalion until October 3, 1916, when he transferred to the CEF, Canadian Army Medical Corps (CAMC). Arriving in England in late 1916, Bradley became second in command of the Canadian Convalescent Hospital at Buxton. From December 1917 to May 1918, he was assigned to a field hospital in France, after which he was posted to the Convalescent Hospital at Epsom. In June 1918, he was suffering from “slight dyspnea (shortness of breath) and irregularity in heart action—occasioned by mental strain.” Following the Armistice in 1918, he was retained for duty, and later struck off service in June 1919. He passed away in Sarnia on June 30, 1934, and is buried in Lakeview Cemetery in Sarnia.

Lieutenant Colonel William Wallace MacVicar was born November 27, 1866 in Sarnia. In May 1894, William, residing in Goderich at the time, married Carrie Baird Cooper in Clinton, Ontario. They had one daughter together. Unfortunately, only a few years after their marriage, his wife Carrie passed away. William remarried on November 30, 1898, to Ersula Barrick in Windsor. William and Ersula had two daughters together, and the family resided at 178 Forsyth Street in Sarnia. William Wallace was employed as a Grand Trunk Railway mail clerk and would become second-in-command of the 27th Regiment. He completed his Officers’ Declaration Paper on September 9, 1916 at Camp Borden. Lt.-Col. William MacVicar served as commanding officer of the 149th from October 1916 until the unit was absorbed a reserve battalion in England in April 1917. William Wallace MacVicar is buried in Lakeview Cemetery in Sarnia.^{F, 2D, 2G, 7V}

• **149th Grand Mobilization:** In late May 1916, the Lambton 149th prepared for their journey overseas. Two days before leaving, on May 26, 1916, the 800-man battalion paraded through the streets of Petrolia where they were cheered by a crowd of thousands and a reception was held in their honour. Serving as the battalion’s mascot was three year-old **Edward “Ned” McRobie**, the son of Petrolia mayor John McRobie. He would be known as the youngest drummer boy in the British Commonwealth, and later traveled with his parents around Ontario to aid

recruiting drives. Postcards of “Ned” in uniform with his drum were sold for 10 cents each with the proceeds going to the Patriotic Fund that assisted families of soldiers in need. The next day, Saturday May 27, the battalion marched through the downtown streets of Sarnia, part of a “Grand Mobilization” weekend of events. Front and Cromwell streets were so densely packed with people that it was difficult for police to clear a passageway for the troops to move along. Following is a portion of the report on the parade:

Sarnia Entertains the Boys of the 149

... As the battalion proceeded along the streets it was followed by a surging mass of humanity – men, women and children, automobiles, carriages and in fact every kind of vehicle that could be pressed into service. Front Street had been gaily decorated with flags and bunting for the occasion and presented a pleasing sight to the eye. The decorations and the multitude of people all going to show that Sarnia citizens were indeed proud of Lambton's 149... In the march past, the battalion, nearly 800 strong, presented a soldierly appearance that was most creditable. The steady swing and even tread of the troops to the inspiring strains of the band was a pleasure to behold and each company as they passed along the streets was greeted by cheers and hand clapping from the friends who had gathered to do the boys honor....

The Lambton 149th leaving Sarnia at Ferry Dock Hill

• **The 149th leave Sarnia:** On the Sunday morning of May 28, the battalion paraded to Victoria Park for a special church service. In the early morning hours of Monday, May 29th, 1916, the force of 800 volunteers of the Lambton 149th Battalion left Sarnia for training camp at Carling's Heights near London, Ontario to train for the front. They paraded from City Hall to Front Street, to the Cromwell train station. Following is a portion of the report on their departure:

*Bands Play, Women Weep, 149th Gone
Farewell*

*Here's luck to the boys from Lambton
That heard their country's call
Shouldered a gun to fight the Hun
Offered their life, their all*

*We're proud of our border county
That mustered the one-four-nine
May the deeds they do live history through,
And their valor ever shine.*

... The band played “We'll Never Let the Old Flag Fall,” and many of the soldier boys joined in the refrain, while mothers, wives, sisters and sweethearts did their best to keep back the tears. The Battalion swung smartly along the street, the steady tramp, tramp, being drowned by the cheers of assembled hundreds. But there was no glitter of gold or brass, no tinkle of accouterment, for these men were on their way to war, and Sarnia was saying goodbye to Lambton's 149.

Lean, brown young men were in the majority of those in the khaki clad columns of fours, though here and there was a head marked with gray – veterans going forth for their country again. And all along the streets were young and old, all assembled with the one object in view – to honor the soldier boys and bid them farewell and God speed....

While the men were boarding the special train, the band played “Auld Lang Syne,” “The Girl I Left Behind Me,” and “The Red, White and Blue.” There were many tear-stained faces among the crowd but it was not all sadness. The 149 is not a conscript legion being driven into strife but is composed of free men who have heard and answered the call of their country. Other soldiers have left Sarnia but the 149 is distinctively a Lambton product made up almost entirely of men from Lambton and Sarnia. So with the tears and cheers, was mingled patriotism and though the sacrifice was great – the greatest that could be made – many a woman covered her heart break with a smile....

... And when the last section drew away from the Cromwell Street depot as the clock in the Post Office building tolled seven, there was much cheering, and then a great silence.

On their way to London, the 149th Battalion stopped over in Watford, where they paraded down the main street, and lunch was provided for all of the men by the people of Watford.

The Lambton 149th leaving Sarnia at Ferry Dock Hill

The Lambton 149th Badge

• **Training and embarking overseas:** On July 8, 1916, the Lambton 149th Battalion along with seven other units; the 118th, 135th, 142nd, 153rd, 161st, 168th and 186th, left for Camp Borden for further military training. During the winter months, from mid-October 1916 to mid-March 1917, the 149th were at Queen’s Park, London. During this time frame, a number of the men were posted to other units to fill them out. These other units had gone overseas before the 149th. Upon completion of training in late March 1917, the 149th billeted at Queen’s Park and had time to visit their parents, wives and children.

In late March 1917, the 149th boarded a troop train to Halifax, arriving there to march directly onto the waiting troop ship, the *SS Lapland*, a passenger ship with the Red Star Line. The ship set sail for England on March 27th. An uneventful trip overseas followed until, as the *Lapland* began its entry into Liverpool, twelve miles from its dock, the ship struck a mine off the Mersey Bar Lightship. The front portion of the vessel began filling with water, yet it made it to its dock, and all the troops disembarked with no casualties. ^{N, 2U, 7U, 7V}

In the April 13, 1917 *Sarnia Weekly Observer*, citizens read the news that the; “*149th Battalion Arrives Safely in England*”. On the front page of the newspaper that same day, Sarnians first learned of some of the details of the Battle of Vimy Ridge that had taken place that Easter weekend.

• **Harold Roy Marriott** was born on August 3, 1898 in Sarnia. On February 7, 1916, at the age of eighteen, Harold enlisted in Sarnia with the 149th Battalion. He recorded his occupation as student and his next-of-kin as his father, George W. Marriott of 218 Cobden Street, Sarnia. Officials noted on his Attestation Paper that he could not be sent overseas until he was nineteen years of age. Harold was hospitalized three times during his training: for fourteen days due to measles at Camp Borden in late-September-early October 1916; for eighteen days due to laryngitis at the military hospital in London at the end of December 1916; and for nineteen days due to the mumps in London in late February-early March 1917.

On March 27, 1917, approximately four months before his 19th birthday, Harold Marriott of the 149th embarked overseas from Halifax aboard the *SS Lapland*. Upon arrival in England in early April, he was taken on strength into the 25th Reserve Battalion at Bramshott. Following are portions of a letter that Private Harold Roy Marriott wrote to his father George on Cobden Street in Sarnia, received in May 1917:

Dear Dad,

At last we are settled for a while at any rate, and I am glad that we are through moving. To tell you all about

the trip I'll have to start from the time we left London, Ont... We had to carry all our stuff to the C.P.R. station and it made us sweat. I had quite a bit extra stuff and every pound seemed like ten by the time we got there. We left at 5:30 p.m... I took some pictures at Montreal and one or two other places where we had a long wait. We travelled along the south bank of the St. Lawrence River... saw a good many things of interest along the way. We were on the train from 5:30 of the 22nd till 11 p.m. of the 25th (March) and when we got off I could feel that swaying for a day after.... We were taken right alongside our transport, the Lapland of the Red Star Line. It was one o'clock when we went on board and 2:30 a.m. before we got to bed. We had a fine boat and good quarters to be thankful for... We stayed in Halifax Harbor for two days, sailing on the 27th at 4:30 p.m... When we first got into the swell of the ocean I thought it wasn't bad, but the continual rise and dip soon made me sick. I went and lay down in my bunk but then that was tipping up and down and by morning I was so dizzy I couldn't stand. We had to have our life belts with us wherever we went and talk about nuisance, that certainly was one... We had lifeboat drill about every other day and once they enveloped the ship in smoke for trial. Another time they threw a barrel overboard and when it was almost out of sight the gunners had to shoot at it.

It was as calm as could be expected most of the way and although one day we were in a storm it didn't last long and was only a moderate one. We entered the war zone on Wednesday the 4th (April) and everything was got ready in case of an emergency. On Thursday we were met by six torpedo boats which are certainly small but very swift. On Friday about three o'clock we came in sight of the Irish coast. We kept out pretty well and were soon in the channel... We were sailing off the Welsh coast at dark or rather moonlight and it was very beautiful. The moonlight was something grand as seen at sea... Later we entered the Mersey and about 2:30 and struck a mine. It fairly stopped the boat and the cargo was all that saved it from going down. It struck on the right bow tearing a big hole in the ship and twisting things up pretty badly. One man was crushed to death, one drowned and many had serious or minor wounds. There was not much confusion but we were all ordered to the life-boats. The bow sank down very much but the bulkheads were closed and the water could not get in, so by slow speed they got her to port though it took a long time as the river winds so. When we got off we were given a small loaf of bread cut in two with a piece of headcheese between, an orange, a piece of cheese and a sea biscuit and that had to do till supper. We entrained at 6:30 and started for the camp.

I couldn't begin to describe the trains here. The coaches are about as big as the Sarnia street railway car No. 1 and I guess it's the smallest there. From the time we left Liverpool we had a regular joy ride. The ends of the rails must have been raised from the bumps we got. We were on the train till 5 o'clock. The scenery is certainly different from the Canadian and the buildings look peculiar, especially the houses... We are at Bramshott Camp, about forty-six miles from London. I heard a lark for the first time this morning, and there is lots of heather around here although of course it's not in bloom yet. Well, I guess I must close for this time, hoping you are well and everything is alright at home.

Love to all, Harold

In June 1917, Private Harold Roy Marriott of the 25th Reserve Battalion, spent seventeen days in the Canadian Military Hospital in Bramshott due to pleurisy. In December 1917, he was transferred to the Young Man's Battalion at Bramshott. In mid-August 1918, Private Marriott arrived in France, becoming a member of the 46th Battalion, and days later the 78th Battalion. During his time overseas, he served in both England (April 4, 1917-August 20, 1918) and France (August 20, 1918-April 28, 1919). Private Harold Roy Marriott survived the war, was discharged on demobilization in London, Ontario in June 1919, and returned home to 218 Cobden Street, Sarnia.

- **Fate of the 149th:** The Lambton 149th was one of those battalions raised and organized at a time when Canada had already suffered thousands of casualties. Upon arrival overseas, the Lambton 149th like most of the new battalions would cease to exist. The 149th disembarked in England on April 10, and four days later, the men were absorbed into other battalions including the 4th and 25th Canadian Reserve Battalions. From these units, the men were dispersed as reinforcements replenishing those depleted Canadian Corps units in the field.

- **BRITISH HOME CHILDREN:** Some of the young men from Sarnia who volunteered to serve were British Home Children. From 1869 to 1948, over 100,000 children of all ages were sent to Canada from the British Isles during the "British Child Emigration Movement". These children were sent to Canada by over 50 organizations including Annie MacPherson Homes, Barnardo Homes, Quarrier's Orphan Homes, the Salvation Army and various church groups. These children came from families who, through sickness or even death of one of their parents, had fallen on hard times. Because there was no social system in place to help them get through these difficult circumstances, the families had no other way than to surrender their offspring to the organizations.

In Britain, many of these children lived in horrible, slum-like conditions. Many toiled in workhouses or served as indentured labourers, while others lived on the streets. Many believed that these impoverished, abandoned and orphaned children would have a better chance for a healthy, moral life in rural Canada. Both the Canadian and British governments supported the program: Britain, because it reduced the costs of having to support struggling children; Canada, because it provided workers-in-training and young children that could be adopted. In Canada, while most of the children were called orphans, the majority of them had a parent in Britain. Most parents were just too poor to keep them. Many of the home children would never see their families again.

Placed on large ships with little or no provisions, upon arriving in Canada, the children, most between six and fifteen years old, were sent to distributing and receiving homes right across the country. Farmers and households were required to apply for children—there were seven applicants for every child. Living conditions varied for the home children. Some were treated very well, and found loving and caring families. Far too many however faced a variety of circumstances not unlike those they left behind in Britain. Siblings were separated, many were used as a source of cheap farm labour and domestic servants, and others suffered isolation, neglect or physical and mental abuse.^{F, 2N, 3O, 10M, 10N, 10O}

Many of the British Home Children served with the Canadian and British Forces during both World Wars. For some, it was a way to get back to see any family that they might still have in the ‘old’ country. Five of Sarnia’s World War I fallen were British Home Children: Daniel Manning, Thomas Powell, William Reynolds, Albert Rodber and Thomas Wright. Their stories are included in this Project.

- **CANADIAN PATRIOTIC FUND:** In August 1914, Sir Herbert Ames, a wealthy Montreal business-man and MP, re-established the Canadian Patriotic Fund (CPF) to assist families of serving men and those returning from war with disabilities. It had first been organized during the South African War to care for soldiers’ families. During the Great War, poster campaigns, often originating in local areas, encouraged people to contribute to the Fund. Nearly \$50 million was raised to provide financial and social assistance to soldiers’ families who had volunteered to serve. A vast network of volunteers was established to visit homes and assess the level of need. A wife could receive \$5 to \$10 a month with an extra \$1.50 to \$6 for each child, depending on age. This amount was modified as the war progressed.

But the money came with some strings attached. The volunteer social workers dispensed advice, whether it was asked for or not, on budgeting, childcare, nutrition and personal hygiene. Any household deemed unworthy could be cut off without appeal.^{21, 2N}

- **SARNIA’S LIFE INSURANCE PLAN:** Sarnia’s mayor in 1915 was William R. Paul. With more than 1,000 of the City’s 10,000 residents heading to war, he did something quite unique and progressive. Mayor Paul decided something had to be done to protect the economical security of the loved ones left behind. He decided the municipality should buy life insurance for every Sarnia soldier. Council went along with the proposal, and a deal was struck with the State Life Insurance Company of Indianapolis.

By war’s end, with more than 100 of the city’s young men losing their lives while serving, many local families needed help with the day-to-day costs of running a household. Council granted an allowance of \$10 per month to the wives or mothers of enlisted men. Families received \$2 per month for each child of a soldier. In 1915, this was a significant amount of cash. The City was under no obligation to provide such assistance. Mayor William Paul did not seek re-election in 1916.^g

- **THE SARNIA AMBULANCE:** In early May 1915, there was a public meeting held in Sarnia, presided over by Mayor William R. Paul. At that meeting, in a unanimous vote, it was decided that Sarnia would purchase a motor ambulance for use by the Canadian Corps, something that a number of other cities had also done. It was decided a committee would canvas the city for subscriptions to provide the necessary funds. By the end of the month, over \$3,100 had been collected for the purchase of a motor ambulance—a Sarnia Ambulance, which would be sent to France.

The \$3,100+ raised by the citizens of Sarnia was donated to the Canadian Red Cross Society for the purchase of a motor ambulance and supplies that would be sent overseas. A motor ambulance was purchased from the McLaughlin Buick Firm in Oshawa. The fully equipped ambulance was sent to the Red Cross in England in September 1915. Along with the ambulance, also delivered were cans of tobacco, pails of jam, socks and beds for hospitals. The ambulance was used for a time in England, and then sent on to the Front in France.

• **SARNIA'S DR. WILLIAM HENDERSON:** Dr. William A. Henderson was a Sarnia doctor who served for over a year with the British Army-Royal Army Medical Corps, in England, Egypt, Gallipoli and France. William Henderson was originally from Scotland, born February 16, 1869 in Huntly, Aberdeenshire, the son of Peter and Margaret (nee Anderson) Henderson. The Henderson family immigrated to Canada, arriving in the port of Quebec aboard the *St. Andrew* on May 11, 1870. In 1871, Peter (a farm labourer) and Margaret Henderson, along with their children Peter, James, Anna, George, Alexander and William (age 2) were residing in Berlin (Waterloo). Ten years later, Peter (a farmer) and Margaret Henderson, along with their children Anna, Alexander, William (age 12), Robert Maggie and Charles were still residing in Berlin (Waterloo). In 1891, the Henderson family was living in Point Edward—Peter (then a railway cleaner) and Margaret, along with their children William (age 22), Robert, Maggie and Charles.

William Henderson completed his medical training at Trinity University in Toronto in 1898. On November 9, 1898, Doctor William Henderson married May Brown (born November 1870 in Sarnia Township) in Sarnia Township. William and May Henderson resided at 142 Davis Street, Sarnia, and were blessed with two children together, William Stuart (born July 29, 1901) and Marion (born March 1908). In 1900, William Henderson entered the Freemason Fraternity, and progressed to become the Worship Master in 1905. In 1911, the Henderson household on Davis Street included William and May; their children Stuart and Marion; and their 23 year-old domestic Irene Arfenta.

William served in the Sarnia city council for several years, and was elected mayor of Sarnia in 1911. As mayor, he was the driving force behind the creation of Sarnia Harbour by the Federal Government, and he led the way in getting the city to move from wooded sidewalks to concrete ones. He was a member of Sarnia City Council when he volunteered for overseas service. He served overseas for about one year with the Royal Army Medical Corps with the rank of Lieutenant. While serving in various hospitals and clearing stations throughout Europe, he wrote letters home and to *The Observer* describing his experiences. In May 1916, he sent the following letter, from “Somewhere in France” after he saw a little piece of Sarnia there:

The Sarnia Ambulance “Somewhere in France”

The reference in The Observer to the Sarnia Ambulance from time to time caused me to have a glance at all such craft in my travels. At all the unloading places in England, Scotland and Wales, I looked in vain. When I came to France a month ago I resumed my search and after 20,000 miles travel was rewarded by seeing “Sarnia, Canada” much to my surprise, on the ambulance into which was being placed two of my patients. It was at Etaples, pronounced “A-Top,” some miles south of Boulogne, where is situated many hospitals. The driver, Russell Parsons by name told me while I went for a ride to the hospital with him, that it has done splendid work and is on the road daily. From inspection I could see it is still undamaged, has been in no smashes and in fact is in perfect condition. The engine is running very smoothly and strong and the driver likes it very much. On the side in large block letters is “SARNIA, CANADA,” and on a nickel plate in front are the words, “Sarnia, Ontario, Canada.” The army number is 815. At other places in France I had seen one marked from the “Women and Girls, Peel County, Ontario,” and one donated by Bracebridge, so I was pleased to see also the one donated by the citizens of Sarnia.

Yours sincerely, W.A. Henderson

In another May 1916 letter home, sent from Rouen, France, Dr. W.A. Henderson described his months of work on an ambulance train, trains that transported wounded soldiers that had returned by ship from France or the Mediterranean to the English coast, where they were brought to various British hospitals. He described it as,

... just imagine, if you will, a hospital complete in every detail, with twice the accommodation of the Sarnia general, and it all on wheels...Like a city hospital, too, it must be amply supplied with food (a wounded Tommy has a twenty-four hour appetite), water, lit, kept scrupulously clean, with sanitation carefully carried out, and the patients all nursed and medically treated as required... On the train, he ...rendered such surgical and medical aid as is required, such as dressings, dealing with secondary hemorrhages, comforting diseased patients, dispersing medications, tending to fracture cases and the badly wounded so that they suffer as little as possible. Dr. W.A. Anderson also described some of the conversations he had with the wounded:

As you go about you get much information first hand, of what is going on at the front, and what life is like in the trenches. You get also many interesting stories of close calls and deeds of valour done. One Scotch lad told he was in a trench with other men when the Huns exploded a mine under them. He was blown clear out of his trench into the German trench 12 yards away. The Germans thinking their own trench might be injured in the explosion had evacuated it for the moment. All the lad felt was a sore arm, and realizing where he was, he got up, climbed out and

put his back to his own lines. Many bullets whistled about but only one hit him, and that through the fleshy part of the hip. When I asked him what he did when the bullet hit him, he said: "I clapped my hand over the sore spot and ran all that harder." He got safely back to the dressing station, where it was found his arm was broken, but the bullet wound, was a nice clean thing, the bullet having gone clear through. He said as soon as his arm was better he wanted to go back.

We got many such stories... then, too, you often get much food for thought. This for instance; in passing through the train one day I saw a man looking very down hearted and thinking to cheer him up a bit, I sat down beside him. He had reason to be down-hearted for he had lost both legs. We tried to talk to him of his having done his bit, and of his service to his country and such like, but he said, "Yes that's fine now, but a few years after the South African war I knew a man, in the same plight as I am now, who had to beg from door to door and was often refused a slice of bread, and was frequently spoken to harshly, and in a year or two it will be the same way with me, for men soon forget." It was a hard argument to combat, but surely as long as we live, we will never refuse to help the brave fellows who have been maimed in our defence or fail to help the widows and children of those who bled and died.

Doctor William Henderson

Dr. W.A. Henderson returned to Sarnia in mid-August 1916, the first commissioned officer to return to the city from the war. Thousands of local citizens, along with local dignitaries, City council members, and Mayor Doherty turned out to welcome him home from the war. A procession that included the Sons of Scotland Kilties band, the Sarnia Citizens band, the Young Men's Patriotic Club, and many automobiles loaded with citizens—began at Dr. Henderson's residence at 142 Davis Street, and weaved its way through the downtown streets lined with crowds to Victoria Park. Following is a portion of the *Sarnia Observer* report on the public reception:

Not only were the grounds surrounding the bandstand crowded with people but streets adjacent to the park were literally packed with automobiles and other vehicles. As Dr. Henderson made his appearance on the bandstand the cheers of the people broke forth and were supplemented by the screeching of scores of automobile horns. After order had been restored the citizens' band played The Maple Leaf Forever and then Mayor Doherty delivered an address of welcome to the guest of the evening....

After a few welcoming speeches by local dignitaries, Dr. Henderson addressed the crowd. Following is a portion of his address: *Never before in my life have I felt so keenly appreciative of my citizenship of my native city. I appreciate this kindly reception at the hands of my fellow citizens more than words can express. I value it more highly than silver or gold. Indeed in this one hour you have done much to repay me for any sacrifice or any trial I have passed through in the year in which I gave my service for the great cause... In speaking about the work in which he was engaged: ...let me just say that the care of the sick and wounded of the British army is magnificent. To mothers and fathers let me say that no parents hand could more tenderly care for these than the nurses and orderlies and surgeons do. Nothing is denied them, every facility is available for their speedy relief and recovery... lest I forget, let me say that the work done by the women of Canada for the comforts of the soldiers has been magnificent, almost divine... I am glad to be home among you. My experience during the year was wonderful. I was favoured with good health and never lost one days work. I am glad I went. I had to go for I felt that I must do my bit. I am glad to be back. I have the self-consciousness that I helped many a brave fellow in his fight for life and that I had the great*

privilege of relieving pain and also cheering many a sorely wounded lad. The work was at times most trying and exacting, at others pleasant and not severe. It too, fell to my lot to travel far and see much... I have seen many countries and many cities but I am glad to bring you the message that having seen all these there is no country, not even Scotland that looks as fair to me to live in as Canada. That although I have seen many cities large and small if I had my choice to live in any of them my choice after all would be good old Sarnia...

In the weeks following his return to Sarnia, Dr. Henderson gave a number of lectures in Sarnia and Lambton County, telling of his first hand war experiences. The lectures were given to aid the Red Cross and for other war patriotic purposes. A little over two months after returning home, tragedy struck the forty-seven-year-old Dr. W.A. Henderson, casting a gloom over the entire city. To all appearances, he was in the best of health at the time of the incident. In the mid-afternoon of October 25, 1916, he left his home to make a professional call, driving along Christina Street. An eyewitness described seeing an automobile travelling towards him in a zigzag pattern, the driver had fallen over sideways on the seat, when it collided with a coal wagon. Rescuers discovered an unconscious Dr. Henderson in the automobile, attempted to revive him, but he passed away. The 47 year-old doctor's death was officially recorded as "angina pectoris".

It was estimated that five thousand people attended Dr. William Henderson's funeral, the largest ever seen in Sarnia according to the *Sarnia Observer*. The funeral service was held at the home of the deceased at 142 Davis Street, under Masonic auspices, and was packed with people. The procession then moved along Christina Street, lined with citizens, on its way to Lakeview cemetery. The funeral procession included the 27th Regiment Band, and members of the various fraternal societies including: Masonic Victoria Lodge, No. 56, A.F. & A.M.; St. Simon of Cyrene Preceptory Knights of Templar, Independent Foresters Band of Chatham; Court Huron No. 163 Independent Order of Foresters; and the Loyal Order of Moose.

In late October 1916, a Sunday evening memorial service in honour of Dr. Henderson was held at St. Andrew's Presbyterian Church. Rev. J.J. Paterson referred to the passing of Dr. Henderson as follows; *"We have a concrete illustration of the uncertain tenure of human life in the passing of Dr. Henderson – in the flower of his manhood, and in the midst of his increasing usefulness as a physician and citizen. It might well appear that Dr. Henderson is another victim of the great world war. His strenuous year at the Front, with his enthusiastic advocacy of the Red Cross movement since his return have proved too much for human strength.... In Dr. Henderson's death the Red Cross organizations have lost a wholesouled and enthusiastic helper. The moral forces of this city are the poorer by his death. The city of Sarnia has lost an energetic, public spirited citizen, and St. Andrew's church a regular and sympathetic member. He saved others, himself he could not save."* Dr. William A. Henderson left behind a wife and two children, Stuart and Marion. His name is included on the St. Andrew's Presbyterian Church plaque honouring members of the church who gave their lives during the Great War.^{N, 2D, 2G}

Note: William Henderson's death was not officially attributed to his military experience. His name is not included in any of the official war remembrance records including the Commonwealth War Graves Commission, Veterans Affairs Canada, Library and Archives Canada (eg. Veterans Death Cards), Canadian Virtual War Memorial, Maple Leaf Legacy Project, or the Books of Remembrance in Ottawa.

• **PRISONERS OF WAR:** Approximately 3,800 Canadians were taken prisoner during the Great War. The largest number of these, over 1,400, were taken in a single day during the 2nd Battle of Ypres. Though there were rules set out by the Hague Convention on how to treat prisoners, surrendering was dangerous business. Blinded by bloodlust or bent on avenging a comrade, a soldier might not accept an enemy's surrender. Many of the prisoners arrived in the camps after being gassed or wounded on the battlefield. In the POW camps, though they were away from the dangers of the front-line trenches, their confinement came with its own hardships. Isolated from news of the war, except that gleaned from new arrivals, prisoners existed on thin soups, suffered from disease, were forced into grueling work in dangerous places including repairing German front line trenches or toiling in iron works and salt mines, and could be ferociously punished—sometimes for no reason at all.

What sustained the prisoners were letters and parcels from home. In 1917, the homemade packages were replaced by standard Red Cross issue. The Red Cross supplies included food—crucial for survival, letters and handicraft materials. When the war was over, for the returned POW's, the perception was that it was not a heroic or glorious thing to have been taken prisoner, to surrender and preserve your life while other people were losing theirs. As a result, many did not talk about their experiences, even to their family members. Many were riddled with health problems that either affected them for many years, or shortened their lives.^{4A, 4G, 5J}

• **MRS. MARGARET McCRAE, SARNIA:** On April 7th 1916, Mrs. Margaret McCrae who was in Newcastle-on-Tyne, England wrote a letter to the *Sarnia Observer*. Mrs. McCrae was a Sarnian who was then working in England. One of the things she was doing while there was sending supplies to Canadian soldiers who were prisoners of war. Following is a portion of her April 1917 letter to the editor of the *Sarnia Observer*:

As I have received considerable money from Sarnia people for my work in connection with Canadian prisoners of war, I am sure they will be interested to have a report from me, showing how the work is progressing. I still send parcels of food to the same twelve Canadians, not having added to the list, as this is all I can undertake to look after properly with the subscriptions I have received, and in any case, this, with my other war works, keeps me fairly busy. Since I started this work I have received donations amounting to \$150 and have sent 118 parcels weighing 11 pounds each (which, by the way, is well over a half ton of food)... I received the names of these prisoners from the Canadian Red Cross in London, and I am under obligation to send parcels to these men, and no one else is given these names...

So many people at home seem to think the prisoners do not receive parcels sent. This is quite a mistaken idea, as everything I have sent has arrived and I hear constantly from these men, as each parcel is acknowledged by date and these letters are genuine, without a doubt. Since the U.S. intervened, there is much improvement in camps and delivery of parcels. Most of my men have sent me snap shots of themselves, and some views of camps, which appear very dreary, bare places. Thanks to the Canadian Red Cross, all Canadian prisoners are now well supplied with clothing of all kinds. One thing I never fail to send is the best beef dripping, as there is absolutely no fat of any kind at the camps, and they all like this...

I am now the official Canadian Red Cross visitor to the military hospital here, and on my first visit last week, saw twenty-six Canadians in various stages of recovery, had a thoroughly interesting time with them. They were so glad to have a real Canadian as visitor, as up to this, it had been an English lady, and we discussed everything pertaining to Canada and Canadians. One man who had arrived the previous day was very "down." He nearly wept when I told him I came from Sarnia. He helped build the tunnel and felt a decided proprietorship in it. Another man from St. Marys, had worked on the telephone in Sarnia, and asked me if I knew several people, of course I did...

I am still making munitions on Saturdays, along with about one hundred other ladies, from 6 a.m. to 5 p.m., and hope every shell we turn out will accomplish its purpose. It is very dirty but interesting work and there is considerable satisfaction in it. This has been a bad week for zeppelin raids, as these unwelcome visitors have come to this locality four nights in succession. Fortunately the bombs were dropped some distance from us but the noise is terrific and thousands of windows were smashed, blocks away from where the bombs fell. We had a flying visit of 24 hours from Dr. Henderson this week which we all enjoyed very much. He had the zeppelin experience to a certain extent, and saw the damage next day. In one raid 20 were killed and over 100 injured. It is decidedly nerve racking when all lights are turned out, trains and trams stopped and we sit in darkness, wondering if the zeppelin has designs on our house and the next bomb dropped will be dropped here. There is little chance for anyone near them when dropped.

We all feel sure things are coming out right for the allies, though there is certainly no immediate prospect of the finish... I hope I have not wearied your readers with this lengthy letter, and assure all those who are assisting me in feeding these brave Canadians, that they are receiving my grateful thanks, and also thanks of the men in German camps. Thanking you for your kindness in publishing the above, I remain, yours sincerely.

Margaret McCrae

• **THE CANADIAN ARMY MEDICAL CORPS (CAMC):** Founded in 1904, the Canadian Medical Corps included doctors, nurses, stretcher-bearers, and physiotherapists who helped rehabilitate wounded or injured soldiers. More than 21,000 Canadian men and women, including Sarnians, served in the Corps between 1914 and 1918. At least three of Sarnia's WWI fallen soldiers served in the Canadian Army Medical Corps, including; David Bentley, Walter McKenzie and David Smuck (their stories are included in this Project).

• **THE CANADIAN RAILWAY TROOPS:** Canadian railway units played a major role in the construction and maintenance of railways of all gauges, including light railways, to within easy reach of the Front Line for the five British Army areas in France and Belgium. Especially after the Battle of the Somme, it was clearly proven that the truck, wagon and animal transport could not alone bring forward in the fighting zone over rutted, battle-scarred roads and shell-torn terrain, the weight of war material required to stage modern battle.

In the years leading up to war, Canadians built more railway lines than any other part of the British Empire.

Railway construction had become a science in Canada as the demands of great distances, terrain and weather stimulated innovation and advances in engineering and equipment. As a result, Canada possessed the expertise required to 'do the job'. In August 1915, the Canadian Overseas Railway Construction Corps (CORCC), made up of 500 picked men from the construction forces of the Canadian Pacific Railway (CPR), proceeded to France. In May 1916, Canada was asked to supply another 1,000 men for railway construction work. Before long, five more battalions of Canadian men arrived overseas and were combined with the earlier corps into battalions that eventually became known as the Canadian Railway Troops (CRT). At war's end, CRT ranks consisted of 13 battalions with 19,000 personnel—16,000 of them working in France and Belgium, with the remainder in England.

The cobweb of narrow-gauge steel rail fed the guns, the troops, the trenches and evacuated the wounded. Crews often worked in the heat of battle and their work parties and camps were magnets for enemy artillery. When territory was captured, they had to be weary of booby traps left for them and mines with delay-action fuses. Though their chief occupation was railroading, Canadian Railway Troops were soldiers first. They were armed and ready, and were called on many times to attack or to defend against the enemy.

Many young men from Sarnia and Lambton served with the Canadian Railway Troops. Two made the supreme sacrifice: William Chapman and Thomas Wright (their stories are included in this Project).

- **CAVALRY:** For thousands of years, men on horseback were an essential part of warfare. Mounted soldiers—cavalry—were scouts, reserves or attack forces, used when speed, shock action, mobility or long distances were involved. The cavalry was a proven and necessary component of most armies. The face of warfare changed dramatically early in the First World War, as machine guns, barbed wire, trenches, minefields and artillery barrages severely restricted the use of cavalry. Many of the traditional generals were not yet ready to concede that the day of the horse was over. As a result, long after the war started in 1914, all of the nations involved maintained cavalry.

Canadian Cavalry Brigades (CCB) included the Royal Canadian Dragoons, Lord Strathcona's Horse, Fort Garry Horse and the Royal Canadian Horse Artillery. Faced with trench complexes, machine guns, mechanized artillery and barbed wire, there were few cavalry charges on the Western Front, as horse-mounted troop regiments became an outdated mode of warfare. Often the cavalrymen were required to dismount and fight as infantry during the larger battles.

Many young men from Sarnia and Lambton served with the cavalry during the Great War, either in Canadian Cavalry regiments or Mounted Rifle Battalions. Eight Sarnians serving with cavalry units made the supreme sacrifice: George Ansbro, Robert Batey, James Bennett, Albert Fitzgerald, Thomas Knowles, Thomas Littlefield, James Pirrie, and William Skinner. One of them, Thomas Knowles, gave his life during what some historians refer to as "the last great cavalry charge," in the Battle of Moreuil Wood. All of their stories are included in this Project.

Canadian horses: Horses, along with mules, were essential components to the army in their ability to wage war successfully. On all fronts and theatres, a staggering one million plus horses and mules were listed in service with British and Commonwealth forces.

Canada sent about 130,000 horses overseas during the First World War, representing well over 10 per cent of the horses used on the Western Front. Eight thousand horses went overseas with the First Contingent of Canadians in the fall of 1914. Horses and mules served at the Front, in No-Man's land, in the rear and in the support lines. In the mud, rain, snow, cold, gas attacks and terror, they supplied the soldiers with food, water, and ammunition, and pulled soldiers, guns, large artillery weapons and ambulances. Hundreds of thousands of horses on all sides on the Western front would die from exhaustion, starvation, disease, poison gas, exposure, drowning in mud and water, falling in shell holes, or by being shot and blown up. Estimates vary, but at least 25 per cent of the Canadian horses were thought to have died in the war. Captain Sidney Galtrey, author of *'The Horse and the War'* stated in the autumn of 1918, *I believe that every soldier who has anything to do with horse or mule has come to love them for what they are and the grand work they have done and are doing in and out of the death zones.*

After the war, for the horses and mules that survived, the question was what to do with them. It was felt an ocean voyage back to Canada was both impractical and cruel. The Canadian government decided to sell the surviving horses to the Belgium government. The troops, some of whom had been driving the same animals for two and three years, were heartbroken when orders came down to surrender the horses for sale. Only officers' mounts would get to come back to Canada.

E, 2E, 3L, 3M, 3N, 3R, 6E

• **LIFE IN THE TRENCHES:** World War I was known as a “**trench war**” with most battles waged by the infantry with the support of artillery. Throughout the war, soldiers would cycle through the three types of trenches—the **front line**, the trench closest to No Man’s Land; the **support line**, the trench behind the front line; and the **reserve trench** where reserve troops waited to be called in as reinforcements. From their opposing complex series of trenches, they faced one another across a deadly “No Man’s Land” of barbed wire entanglements, exploding artillery and shrapnel shells, grenades, sniper fire, poison gas attacks, buried land mines and machine-gun fire. Frontal attacks against enemy trenches led to terrible losses in ruthless engagements of attrition. Battles tended to be prolonged, futile affairs, bogged down by attacks and counter-attacks, a static war, often ending in stalemates, with losses and gains sometimes measured by only a few hundred meters. Complicating things initially for Canadians soldiers, many were issued the Canadian-made Ross Rifle Mk. III, which turned out to be unsuitable for the conditions of trench warfare. On the Western Front, one Canadian in seven who served was killed.^{F, 2I, 3S, 6E}

• **Ross Rifle:** At the end of the Boer War, Canada needed to equip its army, police and militia with a new weapon. Scottish industrialist Sir Charles Ross built a factory in Quebec City to meet the need. The rifle created would undergo five different design versions, and it became known for its accuracy and precision, capable of firing 20 rounds per minute. The Ross Rifle, Mark III, won the unflagging support of the Minister of Militia and Defence Sam Hughes, and was adopted as the primary weapon of the Canadian infantry for the First World War. Though trials revealed a number of design flaws, including bolts jamming on sustained firing, the first Canadian troops carried Ross rifles into the war. In the mucky trenches of the battlefield, the rifles’ issues became apparent: the soft brass in the shells expanded and stuck in the chamber; mud gummed up the works; and the most serious being that it had a tendency to jam during rapid fire. Some soldiers used their boots and shovels to loosen jammed bolts. One officer wrote, “It is nothing short of murder to send out men against the enemy with such a weapon.”

In the nation’s first two major battles; Ypres (April 1915) and Festubert (May 1915), a number of Canadians were killed as they stood defenceless, and it was not uncommon for frustrated soldiers to throw away their Ross Rifles, dubbed “**the Canadian club**,” and pick up British Lee-Enfield rifles from fallen allies, despite orders not to do so. Of note, while the jamming Ross rifle shook the infantry’s confidence, snipers loved it. The gun proved deadly accurate in the hands of sharpshooters like First Nations soldiers Henry Louis Norwest and Francis Pegahmagabow, the latter credited with 378 enemy kills. Throughout 1916, the Ross was pulled from the field and the soldiers were rearmed with the Lee-Enfield. Sam Hughes was replaced as Minister of Militia and Defence in November 1916.

Other infantry primary weapons included: the main heavy Canadian Colt machine gun was replaced by the more reliable British heavy, water-cooled Vickers machine gun in the summer of 1916, capable of firing 500 rounds per minute, and requiring five men to work it as a team; the more portable American-designed Lewis machine gun, with its cylindrical feed drum, which could be carried and fired by one man became an essential assault weapon for the infantry platoons (it fired 47 rounds in a five-second burst); grenades (eg. Mills bomb) and rifle grenades (the latter could project up to 200 metres); and seventeen-inch bayonets attached to the end of the Lee-Enfields turned the rifles into a spear.^{2E, 4F, 7Z, 8H}

• **Trench design:** Trenches were dug in a zigzag and stepped pattern to prevent artillery shell blasts or shrapnel from being funneled down a straight path, and so that if an enemy jumped in, he couldn’t fire all the way down the line. Most of the digging and maintenance labour happened at night to avoid the enemy’s searching eyes. At first, the trenches were little more than glorified ditches, but as the fighting continued they became more elaborate, dug down ideally to a depth of as much as two metres. The sandbag wall topping the front-line, or firing trench, was called the “**parapet**”, which usually extended another half to full metre. With the trenches dug down to two metres into the seeping earth, and then built up with sandbags, a soldier spent much of his day staring into muddy walls. The front-line trench was also topped with barbed wire to slow down attacking enemies. Barbed wire was usually laid out in long zigzagging belts, often in rows and several metres deep. Sandbags and timbers were used to shore up the trench walls, at times corrugated tin was used to protect against weather, and underfoot, wood or bundles of sticks were laid to provide some sort of dry footing (“**duckboards**”).

Front line trenches were backed up by support and reserve trenches running parallel behind them, with communication trenches running to the rear linking them. Corpses and body parts not only lay in No Man’s Land, but also jutted out from the trench walls and underfoot. It was not lost on the soldiers that they appeared to be digging extended graves—the trenches—to protect themselves from artillery shells and bullets. And in a sick irony, the artillery bombardments often buried the living and disgorged the dead.^{9U}

Side passages with cul-de-sacs, storage areas and latrines were dug out along the communication trenches. Soldiers also took to carving out holes in the trench walls. They burrowed into their “**funk holes**” to escape the rain and enemy fire. **Dugouts** at least 6 metres deep—similar to underground cellars—were built to offer better protection from shellfire and mortars for soldiers. These caves were accessed by steps and usually through an entrance that was covered by a heavy blanket. These dank, crudely ventilated cocoons offered temporary solace, a place to sleep, read and write letters. During artillery barrages, they could also cave in, trapping soldiers alive inside.

Nostalgia for home was evident as it was common for soldiers to call trenches after known streets in Canada. Captain H.E. Taylor noted that on the Somme in September 1916, as the Canadians advanced, “the German trenches in front of us are given Canadian names before being captured, and as they are taken, the names are absorbed into our front.” The labyrinth of connected trenches cluttered with ammunition boxes, cables, and all manner of supplies often resulted in confusion for soldiers maneuvering through them. All had to grow accustomed to being lost in the maze at some point, as there was no getting out of a trench to study the surrounding landscape. Handmade signs often guided the men to their destinations—with Canadian city names, strange names (eg. The Devil’s Inn, the Savoy, Hell’s Corner) and alpha-numeric names (due to the sheer number of trenches).^{4F, 6E, 9U}

- **Digging in:** Following is a portion of a story from the *Sarnia Observer*, printed in late December 1915, explaining to Sarnia citizens back home the process of “digging in.”

It is practically impossible for soldiers to remain in the open and live under modern artillery fire. When a column of soldiers advance until they can go no further they hold the ground they have gained by burrowing into the earth. Each soldier lies flat on the ground and, by means of trenching tools, or failing them his bayonet, makes a shallow trench at his side, carefully placing the loose earth in a pile at his head. This hole is sufficiently deep to safeguard him from stray bullets, and under cover he begins to dig another and deeper trench at his side. This is known as a “lying down” trench, and, being about 2 feet deep, hides the soldier’s body from the enemy when he crawls into it.

In these roughly constructed shelters the troops lie until darkness sets in, when the engineers, with a formidable array of pick-axes, saws, and spades, set to work to enlarge the “lying down” holes until they are deep enough to shelter a standing soldier. The dirt taken from the trenches is carefully piled in front of the shelter to form a parapet which swallows up the force of bullets. A short distance behind the trenches, actually in the firing line, shelters are constructed for the troops to fall back in case of retreat. Barbed wire interlaced with branches cut from trees is placed in front of these shelters, and wooden beams piled with earth cover them to protect the troops below from shells bursting overhead.

- **Garrisoning:** Garrisoning the front lines consisted of long periods of boredom and work interspersed with never-ending stress and short periods of absolute terror. Sentries were posted day and night to watch for the enemy. At about a half hour before each dawn, the usual time for an enemy attack, soldiers woke to climb up and “**stand-to,**” fully equipped and ready for battle in the front line trenches. After waiting, and if no attack came, the order to “**stand down**” came. The day involved a number of chores such as cleaning equipment, shoring up trenches through backbreaking labour, rebuilding the parapet, repairing duckboards, officer and medical inspections, and seemingly forever filling sandbags. With the onset of dusk, the morning ritual of “stand-to” was repeated.

- **Sleep** was a precious commodity, as soldiers subsisted on only a few hours of shut-eye a day for four or five days straight, leaving them sleep-deprived and walking around in a perpetual daze, with aching bodies and pounding heads.^{4G}

- **Work Parties:** At night, the battlefield swarmed with activity. Under the cover of darkness, the most common activity was parties of 40 to 50 men, sometimes as many as 200, going on “work parties” or “battle patrols” where they climbed out of the trenches, beyond the parapet and moved into No Man’s Land. There they repaired or unrolled new barbed wire, dug new trenches or gathered intelligence, all the while on the lookout for hidden enemy snipers, periodic machine-gun fire, enemy ambush and star shell flares that illuminated the battlefield. During the battle patrols or “stunts”, soldiers crawled as close as they could to the enemy lines, to listen and gather intelligence.

Another grim task of the work parties was to look for and return the corpses of their fellow comrades. Severed arms and legs and other bodily organs were gathered up in sacks, along with the corpses. It made for grim work, often carried out by exhausted men, but few complained as these men had been their friends and companions, and it was important that their comrades were buried with dignity.^{4G}

Identifying those listed as missing was considered essential for the sake of families at home. Prior to burial in a shallow grave of half a metre to a metre deep, the identity disk and personal effects were removed from each body. As one Canadian infantryman remarked, *“Too often we pull out a picture. There he stands and she sits beside him. How smart he looks in his new uniform and how proud and happy she looks. Here’s a family group. There he is, the others must be his father and mother and kid sisters... Damn this dirty, lousy, stinking bloody war.”*

Each soldier was issued two **identity disks** that contained rank, name, regimental number, unit, and religious affiliation. When a corpse was buried, one of the disks was taken, the other left with the body. The collected disks were passed to the battalion’s second-in-command to record the losses, and then sent to chaplains, who often wrote letters to families at home. Friends also often penned letters, conveying their feelings to a man’s family about a chum who had become a member of their family in the trenches.^{4F}

- **Trench Raiding:** Trench raids were a Canadian invention. Until the Canadians came along nobody—the British, French or the Germans—had considered the possibilities of raiding one another’s lines between major offensives. By 1916, “trench raiding” became an essential component of the Canadian approach to fighting on the Western Front. While “work parties” (battle patrols) were sent to gather intelligence, trench raiding was more dangerous, and focused on attacking the Germans in their trenches in small scale surprise attacks. Under the cover of darkness, stalking parties of camouflaged, black-faced volunteers would climb out of the trenches, crouch through their barbed wire, and inch their way across No Man’s Land navigating around craters, corpses, rats, enemy barbed wire and under the periodic glare of illuminating flares. Slipping into the enemy trenches, watching for booby traps or hidden enemy waiting to ambush them, they would use Lewis light machine guns, pistols, hand grenades, handmade clubs, entrenching tools, bayonets and even brass knuckles to kill, wound or capture as many of the startled enemy as possible within several minutes in a **“butcher and bolt”** foray, before retreating back to their own trenches.

The Canadians gained a fierce reputation as elite trench raiders, which originated in mid-November 1915 when over 170 men carried out an extremely successful raid against enemy positions at La Petite Douve farm in Belgium. The purposes of trench raids included to gather intelligence about the enemy, capture prisoners, take weapons, damage defences, and to keep fighting skills fresh and honed. The raids achieved another purpose—keeping the Germans off balance, nervous, and jumpy, never knowing what was coming. A shaken German infantryman wrote, *“I hope that the Canadians are not in trenches opposite you. On the darkest night they jump suddenly into our trenches, causing great consternation and before cries of help can be answered disappear again into the darkness.”*

Competition began among battalions to pull off bigger and more damaging raids to earn bragging rights. Trench raids required careful planning and preparation, and the desired results were not always achieved. In late February 1917, Canadians carried out a massive 1,700-man trench raid against the Germans commanding the heights of Vimy Ridge. The German defenders were fully alert for the attack, and the Canadians had to advance through enemy fire; their own poison gas cloud that had blown backward; uncut barbed wire; and even their own artillery shells that fell short. The Canadians would suffer a 43 percent casualty rate.^{4F, 5A, 7Z}

- **Wastage:** Outside of the formal, designated battles (often with distinguishing battlefield memorials), many Canadian soldiers lost their lives not in named battles, but during the daily exchange of hostilities. In scores of lesser actions and everyday incidents, incessant artillery, snipers, mines, gas shells and random harassing fire regularly killed soldiers in the trenches, while some were lost to accidents and disease. High command’s term for these losses was “wastage.” Canadian high command planned for 10 percent wastage per month per infantry unit—that meant of the about 1,000 men in an infantry battalion (at full strength), 100 soldiers were expected to die, be wounded, succumb to sickness, or be lost through other means each month.

For example, from December 1, 1915 to March 31, 1916, when two divisions of the Canadian Corps were involved in no battles and were only holding the line and carrying out the occasional trench raid, 2,606 Canadians were recorded as killed, wounded or missing.^{F, 2I, 3S, 4F, 9U}

At least twenty-five of Sarnia’s World War I fallen lost their lives between named battles including; Neil Benware, Mason Bolton, Norman Brearley, William Chapman, Frederick Edwards, George Gore, Percival Guertin, George Harris, Thomas Hazen, Herbert Manning, David McGibbon, Leonard McMullin, Harold Nash, Leslie Playne, Albert Rodber, Archibald Rogers, Melville Simmons, David Smuck, Russell Soper, George Turner, Joseph Walters, George Wheatley, John Wilson, Thomas Wright and Andrew Wyseman (19 of these were killed in France).

- **Weather and disease:** Adding to the hardships of living in the trenches were: poor weather such as incessant

heavy rains, wind, bone-chilling winters and hellishly hot summers; and the smells of rotting corpses, stagnant mud, poison gases and human waste. Standing in mud and icy slush for hours, even days, often without taking off their wet socks and boots, resulted in more than 4,900 cases of trench foot in the Canadian forces, with many cases ending with rotting toes and feet amputated. **Rat** infestations were a constant and disgusting feature of the trenches. They lived among the sandbags, beneath the duckboards and especially in No Man's Land, where they gorged on food or, more terribly, the corpses. Soldiers learned to sleep with their mouths closed. The rats also carried **fleas**, as did the many dogs that wandered into rear areas or the trench lines and became pets for soldiers craving affection. The fleas soon lived on the soldiers, as did the **lice**, which indiscriminately infested everyone. These parasite "cooties," as they were known to the soldiers, burrowed into the folds and pleats of clothing, emerging only to feed by clinging to flesh and sucking blood from their victims. Men woke up bleeding from scratches gouged to relieve the itching. Their bites also transmitted a flu-like illness, known as PUO, "pyrexia of unknown origins."

Most men came down with trench sickness at least once in the war. This flu-like disease causing fever, chills, fatigue and pain in the shins was transmitted by lice.^{4F} Other diseases were also a problem, such as trench mouth, typhoid, tetanus, scabies, dysentery, gangrene, diphtheria, meningitis, influenza, tuberculosis and pneumonia. For the wounded—lying in muddy water, sometimes together with blood, feces, and body parts, the vast majority of all wounds became infected. This was an era before antibiotics were invented, so **infection** was very difficult for doctors to treat. The most widely suffered infection was gas gangrene (which had no relationship to chemical warfare). Gas gangrene was a lethal and agonizing fate, as wounded men were killed from within, and doctors frequently treated it by amputation.^{4F, 5J}

- **Sustaining morale:** Many factors helped persuade soldiers to fight—the bonds of friendship, loyalty, and community, based on shared experience and common dangers were principal among them. The military understood many of the challenges to morale and the discomfort caused by life in the trenches. It tried to provide soldiers with the comforts necessary to sustain morale. Almost everyone smoked in the trenches – these "**gaspers**" or "coffin nails" provided a relief from the stress of war, calming nerves, helping to pass the time, and they also helped mask the scent of the trenches, which was permeated with the odours of rotting flesh, poison gas and cordite. There was an official ration of cigarettes, although these tended to be of poor quality and men yearned for the "gaspers" sent in care packages from home.

It was very difficult to get hot food from the company cooks in the rear to the soldiers in the front lines, but brave groups of men transported stew or water in large containers or emptied gasoline jars to the front lines. Soldiers remembered drinking water that reeked of gasoline and chlorine. Drinking water from local sources that was frequently contaminated was discouraged—better to have the men drink boiled tea. **Bully beef** (tinned corned beef) that was eaten for breakfast, lunch and dinner, and "**hardtack**" biscuits were a staple of the soldier's diet. There were many types of canned bully beef, although most were unidentifiable meats marbled with fat and gristle. Men took to soaking and frying the hardtack biscuits, not wishing to risk breaking their teeth on the dog-biscuit-like food.

Army-issued **rum** became a beloved part of trench life. The rum was dark and thick, almost viscous, and had a very high alcohol content. It came in gallon jars, marked "S.R.D.", which stood for "Supply Reserve Depot", though soldiers spoofed it to mean "Soon Runs Dry," "Seldom Reaches Destination," and "Sergeants Rarely Deliver."^{4F} When the over-proof Jamaican rum was available, soldiers received their daily ration consisting of a "tot," about two ounces, morning and night, which was drunk in the presence of an NCO or officer. The strong, gut-burning rum was a reward (for surviving another day at the front, or volunteering for a patrol or a trench raid), a medicine, a coping mechanism, a sedative, and a combat motivator. It helped soldiers to stay warm in their dank trenches, to sleep after the day's horrors, and to quell their nerves ahead of battle. Tea was almost as important, particularly for the teatotalers.^{2I, 3R, 4G, 6E, 7Z, 9U}

- **Influencing chance in their favour:** Almost all soldiers carried lucky charms, protective amulets, and magical talismans that they felt would shield them from the unpredictable shells and bullets. Bibles, prayer books and religious items were also carried by many of the soldiers. One soldier remarked, "Nearly every man out here is wearing some sort of medallion or a rosary that has been given to him, and he would rather part with his daily rations or his last cigarette than part with this sacred talisman."

One such powerful charm was a "touchwood" or "fumsup," a small magical being held in the hand, with a wooden head. The name is a twist on "thumbs up" and had its origins in the thumbs-up-for-good-luck signal. It was also based on the old superstition of not jinxing oneself by talking about a good deed or lucky event by saying "touch

wood” and touching something wooden. It was so common for soldiers to sew magic charms, protective crosses, medals, and badges into their clothing and uniforms that doctors would instruct staff as they prepared to open up men on the operating table to be alert for hidden material on their bodies and, if possible, to save it for an injured man if he survived the procedure.⁹⁰

• **The unexplained:** On numerous occasions soldiers on the battlefield experienced incidents that defied explanation. Events that seemed ethereal, even to those who were not particularly spiritual, transcended interpretation. Canadian military historian/author Tim Cook stated that Canadian soldiers embraced the ‘supernatural, uncanny and ghostly’ on the front lines. Stories involving bizarre apparitions, life-saving premonitions and other unexplained happenings demonstrate “the unending mental and physical strain of fighting on the edge of No Man’s Land.”

One such example is that of Nova Scotia native **William Bird** of the 42nd Canadian Infantry Battalion. With the outbreak of war in 1914, his younger brother Stephen (Steve) enlisted as a Corporal. William also rushed to join but due to a combination of his bad teeth and Stephen’s influence, William was turned down. Disheartened, William went to the Prairies to farm. Will stated, “*The last time I saw him we had a long talk and he held my hand in his warm grasp as we said goodbye. ‘If I don’t come back,’ he said, ‘I’ll try to find some way to keep an eye on you.’*”

Stephen arrived in France in mid-September 1915 and approximately three weeks later was killed in action in Belgium when the Germans blew a large, underground explosive beneath the frontline trenches. That same October found William bringing in the harvest on a small farm in Saskatchewan, pitching sheaves into a wagon, when Stephen walked out from behind a farmcart! They did not speak and soon Stephen vanished. Three days later William received notification that Stephen Bird, was missing, presumed dead in the mine explosion. His body was never found.

After his brother’s death, William returned to Nova Scotia and in April 1916 successfully enlisted. He sailed for England in October and arrived in France in December 1916 as a member of the 42nd Battalion, The Black Watch of Canada, in the frontline. William Bird took part in the famous Battle of Vimy Ridge in April 1917, and in the days following his battalion was sent to Vimy village. During his first night there, he was sent out with two others as part of a work party tasked with the barbed wire duty near the front line. Completing their duty over many hours in the cold and miserable night, they had no chance to prepare any sort of shelter. As they went back they came across two men from another battalion who had dug a neat bivvy into a railway embankment. Following is a portion Will Bird’s description of the events that followed:

They were very decent chaps and insisted they made the place wide enough to accommodate the three of us. We snuggled in, and with a ground sheet pegged to hold over our heads we really felt comfortable. In seconds I was dead to the world.

The ground sheet pegged over our heads was pulled free and fell on my face, rousing me. Then a firm hand seized one of mine and pulled me up to a sitting position. It was very early, as first sunshine was glittering on the dew-wet grass. I was annoyed that I should have to do some chore after being out so late. I tried to pull free. But the grip held, and as I came to a sitting-up position my other hand was seized and I had a look at my visitor.

In an instant I was out of the bivvy, so surprised I could not speak. I was face to face with my brother, Steve, who had been killed in 1915! The War Office had said: “Missing, believed dead.” After a time one of his mates wrote to say a boot had been found with his name on it. The Germans had mined the Canadian trench and blown it up.

Steve grinned as he released my hands, then put his warm hand over my mouth as I started to shout with happiness. He pointed to the sleepers in the bivvy and to my rifle and equipment. “Get your gear,” he said softly.

As I grabbed it he turned and started walking away rapidly. It was hard to keep up with him. We passed make-shift shelters filled with sleeping men of my platoon. No one was awake. Now and then a gun fired off toward the Somme or a machine-gun chattered, but on the whole it was a quiet morning. As soon as we were past the shelters I hurried to get close to Steve. “Why didn’t you write Mother?” I asked. He turned and the grin was still on his face. “Wait,” he said. “Don’t talk yet.”

Then I noticed he had a soft cap on and no gas mask or equipment. Somehow he had learned where the 42nd was, and our “D” Company, but how in the world did he know where I was sleeping?

We left the company area and headed directly into a collection of ruins that had been Petit Vimy. “There’s no one around here,” I said. “How did you know where to find me?” At that moment my equipment, slung hurriedly over one shoulder, slipped off and fell to the ground before I could catch it. As I stooped and retrieved it Steve went into a passageway in the ruins and I ran to catch him. Arrived there, I saw one way went right and the other left. Which way had he gone?

"Steve!" I called. There was no answer, so I dropped my rifle and gear and ran to the right. It only took minutes-two or three-to get to the far side, but there was no sign of my brother. I ran back and called again, took the way to the left, searched and searched again, called repeatedly, but could not find him. Finally I sat down on my equipment and leaned back against a bit of wall. I was tired and sweating and excited....

Minutes went by. I got up and made another search of the ruins. The sun began to glisten on the tops of the broken walls. I settled back more comfortably on my equipment and heard the usual morning stir of guns firing registering shots. The sun got warmer. I dozed.

Suddenly I was shaken awake. Tommy had me by the arm and was yelling. "He's here! Bill's here!" I stumbled up, dazed, looked at my watch. It was nine o'clock. "What made you come here?" Tommy was asking. "What happened?"

"What's all the row about?" I countered.

"You should know. They're digging around that bivvy you were in. All they've found is Jim's helmet and one of Bob's legs."

"Legs!" I echoed stupidly. "What do you mean?"

"Don't you know a big shell landed in that bivvy? They've been trying to find something of you."

It seemed utterly incredible. I put on my gear and followed Tommy. There was a great cavity in the embankment and debris was scattered over the whole area.

Will Bird later reflected, Steve's warm hands had pulled me from the bivvy. His voice had been perfectly natural. He had the old half-grin I knew so well. He had saved my life.^{11A}

William Bird served with the 42nd Battalion throughout the war until demobilized in Canada in March 1919. He was awarded a Military Medal for bravery in the capture of Mons, on the night of November 10-11, 1918, the last night of the war. After the war he became a prolific writer. One of the hardest tragedies he experienced in the years following was when his 24-year-old son, Captain Stephen Stanley Bird of the Nova Scotia Highlanders, was killed in action in Normandy, France on July 8, 1944. William Bird often blamed his writing about his war experiences as a factor in his son's rush to enlist.^{11A}

- **Terror from below:** One more terror for the soldiers in the trenches to confront—special mining units of sappers on both sides dug elaborate underground shafts and tunnels towards the enemy lines, sometimes 15 to 25 metres beneath the surface. They would burrow beneath enemy strong points, set an explosive charge, and destroy the enemy trenches from below. Three Canadian tunnelling companies were raised during the war, many of the men were miners before the war. Cave-ins were not uncommon while doing this claustrophobic and dangerous work, with the constant pounding of high explosives above them. Those in the trenches desperately listened for the telltale sounds of pickaxes or shovels below them.

- **Poison gas:** Poison gas was indiscriminate and could be used on the trenches even when no attack was going on. Victims could be in agony for days and weeks before finally succumbing to the effects of gas. The first large-scale use of lethal poison gas on the battlefield was by the Germans on April 22, 1915, during the Second Battle of Ypres. Two days later, it was the Canadians who fell victim to the second gas attack in history. Thick clouds of yellow-green **chlorine gas** released from cylinders drifted to the trenches, causing victims to writhe on the ground, their faces turning purple, making gagging, choking sounds, pulling at their clothes, and vomiting "greenish slime". Gasping for help, then falling back exhausted, their lungs burned and filled with fluid, impairing the exchange of oxygen. The worst-case men drowned in their own searing fluids.

Later in the war, deadlier gasses and more reliable delivery systems were introduced, such as gas-filled chemical shells, projectors, and mortars. **Phosgene gas**, introduced in late 1915, was nearly invisible, eighteen times more powerful than chlorine, and its impact was frequently felt only 48 hours after it had been inhaled. Its effects build slowly: breathing becomes shallow, the victim begins to retch, the pulse rises to 120, the features turn ashen grey; and over the 48 hours, the victim drowns slowly as the lungs discharge pints of yellow fluid as the phosgene eats into their lungs. The Germans unleashed **mustard gas** (or Yperite) for the first time against the Canadians on August 17, 1917 during the Attack on Hill 70. Mustard gas polluted the battlefield for days and was slow-acting. It caused serious blisters both internally and externally, blinded its victims, induced uncontrollable vomiting, and victims began to die days after the attack. Other types of gas were used, however three forms of gas remained the most widely used: chlorine, phosgene and mustard.^{E, 2I, 3S, 4G, 5J, 7Z}

Initial protections against gas included holding a urine-drenched cloth over their face, and cotton pads dipped in a bicarbonate solution. Later, soldiers were outfitted with various types of respirators (containing charcoal or

antidote chemicals). Claustrophobic and uncomfortable, they often fogged up, impaired vision; made breathing difficult; and frequently filled with vomit that had to be swallowed (“Chew the lumps,” sergeants told their men). Even soldiers horses had specially designed respirators.^{4G, 5J}

By 1918, fully one-quarter of all shells fired on the battlefield contained poison gas. In the last year of the war, gas was used before, during, and after every battle, in the only continuous chemical battlefield in the history of warfare. The Canadian War Museum estimates that by war’s end, gas had killed some 100,000 men, and there were approximately one million gas casualties to all armies. The Canadian War Museum also estimates that during the war, 12,000 Canadians were killed by gas, although the number was surely higher, as gassed men who were hit by shrapnel or bullets were often recorded slain by those weapons. Also, many of the estimates do not take into account the number of men who died from poison gas related injuries years after the end of the war. Many soldiers never reported their multiple minor gassings, which, at the time, were not immediately debilitating. Suffering in later years from chemically-induced illnesses and disabilities, they would sometimes fight unsuccessfully to have medical claims approved, having failed to document their injuries at the time.^{E, 2I, 4F, 4G, 9U}

- **Shellfire:** Artillery shellfire was the true killer in World War I. Doctors estimated that more than half of all wounds received during the Great War were caused by the artillery’s guns.^{4F} Depending on whether a field gun or howitzer was used, shells were fired to a distance of 5 or 6 kilometres, arriving at their targets at just under the speed of sound.

High explosive shells were used to destroy trenches and dugouts and of course kill. Nicknamed “Jack Johnsons” (after the American heavyweight boxer who delivered a powerful punch), they exploded like dynamite, killing by the force of the blast, ripping men’s bodies apart or reducing victims to pieces on direct hits. Drumfire bombardments—when the shelling became one long sonic and physical assault lasting many hours, would rock the trenches and send great geysers of mud, sandbags and bodies skyward. There was no respite during these bombardments, the never-ending blast force and sound of explosions dazed and deafened the men, tossing them around, with many suffering concussions.

Shrapnel shells, nicknamed “whiz-bangs” (as they tended to be smaller, faster shells), were largely an anti-personnel agent. They would explode at an optimum height of 5 to 6 metres above the ground, ejecting some 375 metal shrapnel balls downwards in a shotgun-like blast. Other shrapnel shells were nicknamed “Woolly bears” and “Black Marias”. Both high explosive shells and shrapnel shells on shattering, would create jagged, whirling shell splinters that wrecked havoc on living flesh, tearing and tumbling through bodies leaving jagged exit wounds.^{4F}

German **mortar shells**, nicknamed “flying pigs,” “moaning minnies,” “coal boxes,” “pineapples,” “toffee apples,” or “rum jars,” which could weigh several hundred pounds, and were lobbed in a high arc into trenches, were also a terrifying weapon. Mortars could also fire gas shells, which could deliver chlorine or phosgene more accurately into the enemy lines.

Thousands of shells failed to explode after being fired, many remaining in the soils of France and Belgium. Even today, the war is part of everyday life in rural areas of France and Belgium. Each year, when farmers work their fields in ordinary ways, they unearth tons of World War I debris. War debris collected includes shrapnel, digging tools, badges, rusted bayonets, canteens, iron wheels, barbed wire, bullets, trench supports and unexploded ordnance such as shells, gas shells, mines, mortars and grenades. The collection and hauling away of this debris is referred to as the **iron harvest**.

- **Creeping barrage:** The “creeping barrage” was a tactic developed around the time of the Battle of the Somme, as a means for the artillery to better support the infantry during frontal assaults. It was based on suppressing, not destroying the enemy. High explosive and shrapnel shells would rain down a wall of fire, advancing forward 90 to 100 metres per lift, first through the enemy outposts for a few minutes (driving defenders into their dugouts), then through the front line trenches (the objective), and finally into the rear areas (to prevent reinforcements from rushing up). The advancing infantry troops would follow closely, between 35 to 65 metres, behind the barrage for protection (“**hugging the wall**”), all the way to the objective. Moving forward, they were under strict orders not to stop for the wounded, as that would slow the advance. Two of the hazards of this tactic: the artillery fire alerted the enemy to the direction and location from which the attack was coming; and hugging the wall of fire would result in casualties from their own artillery, men lost to “friendly fire,” or “drop shorts.” Faulty shells, worn-out gun barrels, weather and untrained gunners could all result in shells falling short or wide.^{4F, 8H}

- **No Man’s Land:** The name “No Man’s Land” originated in the Middle Ages, and was a designated slaughter

ground to the rear of a castle where bodies of slain criminals were left to rot as a warning to others. The name transferred well to the Great War.^{4F}

No Man's Land could be as narrow as 100 metres (and even narrower) or stretch to over 1 kilometre wide in parts, but most often it was 300 to 400 metres wide. Going **"over the top"** and into No Man's Land was a terrifying event. The phrase "over the top" had initially been part of the longer phrase "over the top, and best of luck," but the costs of facing enemy fire and uncut barbed wire were so ghastly that the cheerful quip "best of luck" seemed out of place, so it was eventually dropped. A battle was known as a **"show,"** which took some of the sting out of the potential slaughter that was soon to follow. Waiting before an attack, every soldier realized that these could be their last moments. Time was spent praying, thinking of loved ones, or nervously waiting for the NCO with the rum jug. Many prepared a "last letter" of some kind, keeping it on their bodies or handing it to a friend who was not slated to go "over the top," in case they should not survive the upcoming battle.

Once "over the top," or "hitting the bags," or "jumping the bags" many described the surreal quality of bullets whizzing past them, shells exploding, and men falling all around them.^{4F} Adding to the task, the men were weighted down with a helmet, full kit, rifle, 200 rounds of ammunition, grenades, shovels, respirator, water bottles and more, that could add up to at least 60 pounds, up to over 90 pounds—no small feat for men who weighed between 120 and 140 pounds on average.^{4F} The men advanced in waves to what amounted to the length of a football field, through a hurricane of machine-gun and small arms fire, running, crawling and stumbling forward over a muddy, shell-cratered, ravaged landscape that was strewn with rotting corpses and body parts. In the chaos, they had to follow closely behind a creeping barrage wall of metal and explosives from their own advancing artillery barrage, while also suffering under additional drop shorts (friendly fire) and into the German counter-barrage. Infantry caught in the deadly maze of barbed wire entanglements had little hope of escape or survival. The **barbed wire**, tempered steel with five-inch barbs, sometimes as high as a house, was difficult to cut and slowed the attackers, and channeled them into "killing zones" where enemy machine-guns swept back and forth, fired by defenders who were dug in and safely behind sandbag walls.^{4F}

Even in the most meticulously planned and coordinated attacks, errors, surprises, emergencies, and enemy reactions, for which no one could plan, intervened, at which point the initiative and courage of a single soldier, or a handful of men, decided the issue. If the attackers were fortunate enough to reach the enemy trench, they faced more gunfire, grenades, bayonet thrusts and hand-to-hand combat. The soldiers risked all, racing towards death in hopes of escaping death.^{4F, 5J, 7Z, 8O, 9U}

- **Holding a trench:** When an enemy trench was captured, the next task at hand was the attempt to hold on to it, as the attackers (now turned defenders) were isolated in their forward trenches. One of the immediate tasks was to reverse the trench in preparation for the counterattack—building new parapets on the former back wall for protection, and ripping out firing steps and rebuilding them on the former back part of the trench. In crossing No Man's Land, the attacking infantry always lost significant parts of their force to enemy fire, and then used up much of their ammunition, grenades and manpower in clearing the trenches. In such a weakened state, the inevitable rapid German counterattacks would come, and a desperate battle of survival would rage back and forth. The success of holding a trench was in part reliant on the logistics of shuttling essential supplies across No Man's Land. Crushing loads of food, grenades, barbed wire, bombs, sandbags, small-arms ammunition, wooden ladders, flares, and petrol tins filled with water and medical supplies were truded forward on the backs of infantry soldiers, often while under enemy fire.^{4F}

- **Caring for the wounded:** The difference between life and death on the battlefield often depended on how quickly a wounded soldier could get medical attention at a dressing station. With constant shelling and sniping on No Man's Land, often a wounded soldier would have to lie on the ground and wait for darkness before anyone could come to his rescue. All soldiers carried emergency first aid supplies and tried to dress their own wounds when they could. When the firing did subside, the wounded began to surface from their hiding places, wriggling and dragging themselves back to the safety of their own trenches, biting back the pain of a shredded arm or shattered leg, usually driven by survival instinct alone. Flares illuminating the battlefield made them potential targets for enemy snipers.

Stretcher-bearers hunted through the ruins of wounded, often turning over dead men in search of the living. Most of the stretcher-bearers carried a canteen of rum to ease the pain, and it was administered to the cold wounded men as long as they did not have stomach wounds. Stretcher-bearer parties ferried the worst of the wounded to the battalion medical officer, some 300 to 700 metres behind the forward lines. Amidst the destruction, a team of four

bearers often took several hours to make it to the rear, often slipping, tripping and dropping their patients. Generally there were only four stretcher-bearers in a company. On solid ground, two men could carry a wounded man on a stretcher. However, in heavy rain and mud, it took four men. Sometimes, German prisoners were enlisted in the cause of carrying wounded Canadians to the rear.

The wounded were dropped in a **triage area** (advanced dressing station) where the medical officer, or his orderlies, attempted to bind the wounds, immobilize broken bones, apply a quick shot of rum, or perform emergency surgery on those who were in danger of slipping into shock. From the forward trenches, the wounded were then rushed to **Casualty Clearing Stations**, usually a few kilometres behind the line. As the war went on, blood transfusions would be more frequently used, but in an age before blood types and Rh blood groups had been discovered, there was substantial risk. The Casualty Clearing Stations were the closest the 2,500 Canadian Nursing Sisters who served in the war got to the front. Again, the wounds would be examined, and triage performed. Those who were not in danger were sent back to rear hospitals, those who could be saved with emergency care were operated on, and those too badly wounded were left to die.

The sad reality was when field ambulances and casualty stations were overwhelmed, difficult choices had to be made—those who were too badly wounded to survive, or whose treatment would take up hours and therefore consign to death other men who were left without care—were untreated. It is not surprising that many of the cemeteries that dot the Western Front today had their origins in clearing stations and hospitals. The medical services were quite competent however: the vast majority—more than 90 percent—of the men who arrived at the dressing stations were saved by the expert medical care of surgeons, doctors and nurses. The real problem was in getting the soldiers from the front to the rear quickly enough, and many died before they ever saw a doctor. The system was often strained, which meant men often lay waiting for many hours before they were tended to.^{4F, 5J, 8H}

- **Behind the Firing Line:** Units rotated in and out of the trenches on a regular basis, and even when they were at the front, some parts of a unit's complement were in reserve. Those on the front were rotated between front line, secondary lines and rest. A unit of men rotating into the front-line trench system was known to be going "**up the line.**" Time in the front line trenches was a period of extreme danger—the men had to be hyper vigilant for enemy raids, carry out patrols, stand sentry, and always be prepared to scurry for cover from shells, mortar bombs, and bullets. There was little time for rest, and the hard labour of expanding trenches, digging latrines, and filling sandbags was physically demanding. Typically, a battalion spent around six days in the front lines, six in reserve trenches a few hundred metres behind the firing line, and another six days in the rear, where men were usually involved in carrying parties, bringing material to the isolated front lines.

While waiting in reserve or after being pulled off the front lines for a temporary respite from fighting, soldiers occupied themselves with a variety of leisure pursuits; important for an army of civilian-soldiers. Blowout parties in local villages and sightseeing were common activities. Though it was illegal in the army, Crown and Anchor, a gambling dice board game, was a popular subversive tradition. One of the most popular and happy places for soldiers were the local *estaminets*—taverns operated by the locals often in their homes, where the men could enjoy plates of eggs and fried potatoes, coffee, bread, weak beer or wine. These eateries were sanctuaries of good cheer, camaraderie and raucous song. One Canadian soldier described the prevalent attitude of the men when away from the stress of battle: "Eat, sleep, drink and be merry, for tomorrow, you may die."^{9U}

It is no surprise that many of the Canadians sought female companionship behind the lines. In turn, the French and Belgian women became practiced at resisting the amorous advances of the men who walked through their villages. It was not uncommon for Canadians to turn to prostitutes. Lectures by medical officers, chaplains and civilian experts on the morals and dangers of sex with prostitutes failed to curtail the growing VD epidemic. Though few of the Allied soldiers were innocents, the Canadians in particular had a reputation for promiscuousness and the pursuit of prostitutes, likely because of their higher pay and because men could not return home while on leave as married British soldiers did. High command eventually ordered that official, regulated brothels be set up and prophylactics issued.^{9U}

Snapping **photographs** was another illegal activity for fear that captured film could provide the enemy with information. Photography at the front was outlawed in March 1915 by order of the British High Command. Beginning in the summer of 1916, Canadian official photographers were commissioned to document the war. Yet many men snuck small cameras behind the lines and in the trenches, and snapped pictures, providing a valuable historical record. High Command also decreed that no soldier was to keep a **diary** for fear of providing the enemy

with usable intelligence. The directive was widely ignored, and countless soldiers, from commanders to the lowest rankers, recorded their experiences at the front.

The **YMCA** and **Salvation Army** (nicknamed “Sally Ann”) were two organizations that established huts/canteens behind the lines to care for the men’s health and spiritual well-being. Located in many of the villages and closer to the front, they would hand out free tea, cookies and a few cigarettes to the soldiers. They sold Canadian food, tobacco, coffee, candy and chewing gum, and provided a place to read a newspaper or magazine, or write a letter home. The canteens were dry (no alcohol sold), the prices were generally low, the staff caring, and the area open to all. Following is a portion of a letter written home by a young Canadian soldier:

I can’t say anything but good about the “Y’s” over here. They usually have so many things distinctly Canadian, like Old Chum & Hudson Bay tobaccos, MacDonald’s chewing, Tuckett’s cigars, maple sugar, and Canadian brands of chocolate bars. They are to be found almost everywhere from the base to the front line, in all manner of places from tents to dug-outs. In those in the battle zone, you can procure free coffee and tea. I never hear any knockers among the troops especially when they are lining up [at] some old “sap” or cellar, filling an empty milk tin with streaming tea. Then they stand around and blow on the hot liquid and swap stories or just talk & jolly each other...^{7A} Another young Canadian wrote to his father, “I am writing in the YMCA building. The boys are playing the organ, dancing and singing. Mostly every song is about mother at home, and wife and baby. It would make your heart melt if you only heard them.”^{9A}

Arthur Wesley Crawford was born on May 4, 1892 in Point Edward, Ontario, the son of George Crawford of 153 Christina Street, Sarnia. Twenty-two years old and single, Arthur Crawford enlisted on November 2, 1914 in Toronto with the Canadian Engineers, recording his occupation as an electrical engineer, and his next-of-kin as his father George in Sarnia. At the end of December 1914, Arthur Crawford became a member of 2nd Divisional Signals Company, Royal Canadian Engineers (RCE). He arrived in France in mid-September 1915. In late April 1916, Lieutenant Arthur Wesley Crawford, RCE, wrote a letter from France to his mother, Mrs. George Crawford on Christina Street. In it, he described a large “Soldier’s Rest Camp.” Following is a portion of that letter:

... the Soldier’s Rest Camp includes a cinema, canteen, library, recreation room, etc.. They have two shows daily which are worth seeing. The vocal and instrumental talent is supplied by the units of the third division and are permanently attached to the show. They even go on tour to other divisions and “put up” good performances. The tired “fed up” chaps from the trenches soon forget their sorrows and enjoy the entertainment to the full.

Each division has similar places of amusement provided by the Y.M.C.A. and what with band concerts, travelling troupes, impromptu concerts, etc., we are well provided with entertainment while in rest. You cannot imagine how these things are appreciated by the men and the benefits are beyond measure. The fellows come out, tired, nerve wrecked and oppressed by horrible memories, but in a few days they are as cheerful as ever and as light hearted as children....

More of Lieutenant Arthur Wesley Crawford’s letters home are on pages 119 and 197.

Sports were an almost universally shared pastime overseas. In fact, on the home front, many of the amateur and professional sporting leagues temporarily closed down as hockey, baseball, and lacrosse players joined the war effort. Toughness, grit, teamwork, leadership, camaraderie and withstanding hardship—qualities exalted in sport—were all valued on the battlefield. Military command encouraged sports as they built better soldiers, and behind the lines they provided relief and distraction from the horrors of the front. Soccer and baseball were the most popular sports, but there were also multiple boxing leagues, track and field competitions, lacrosse games and even horseback events for the mounted units. Rivalries developed between platoons, companies, battalions, divisions, even nations. The inter-unit games were very popular, attracting huge crowds, with much money changing hands in wagering.^{9U}

Concert parties and **theatrical revues**, with vaudeville and music hall-inspired shows grew in popularity. Initially, it was the soldiers who provided the entertainment, but as the war dragged on, there were also semi-professional troupes. In the dugouts of the front lines, and when rotated out of danger, soldiers banded together to put on shows for one another, featuring musicians, comics, singers, magicians and female impersonators. The ribald songs, jokes and skits were focused on the soldiers’ experiences and frequently poked fun—sometimes bitter fun—at their officers and high command. Providing pleasure and relaxation, the concerts also provided an outlet for cultural expression and restored morale of battle-fatigued soldiers. One Canadian soldier-entertainer wrote of the opportunity to unwind and take in a show, “It was here that the one big family spirit prevailed... the audience and actors became one and thus banished all their worries for at least a little while... men who died the following dawn with the song still on their lips.”^{9U}

At night, as men sat in holes carved out of the trench walls, or in their dark dugouts, men often joined together in song. **Songs** such as “*Keep the Home Fires Burning*” and “*It’s a Long Way to Tipperary*” were popular, along with Canada’s unofficial anthem “*The Maple Leaf Forever*”. Men returning from leave in London shared the newest songs from popular shows like *The Bing Boys Are Here*, with songs like, “*Another Little Drink*” and “*If You Were the Only Girl in the World*.” *The Bing Boys* was so popular that soldiers adopted the name informally for the Canadian troops, changing it slightly in tribute to their beloved corps commander, Sir Julian Byng. Popular songs were often taken and remade with new lyrics that better fit the harsh realities of the trenches. Yet they could easily turn to sentimental and sappy ballads that brought a lump to the throat as men dreamed of one day returning home.

One of the much loved performers (especially by Scottish Canadians) was Sir Harry Lauder whose most famous song, “*Keep Right on to the End of the Road*,” was written after his son’s death. Other popular entertainers included: Canadian Gitz Rice (his song “*Dear Old Pal of Mine*,” in which a nostalgic soldier laments to his girl, was a monster hit); the Princess Patricia’s Canadian Light Infantry (PPCLI) Comedy Company (their initial shows were rather tame, but as the brutal fighting continued, it became more biting satire and sharp-edged, anti-authoritarian); and Canadian Merton Plunkett of the YMCA who entertained and established the *Dumbells*, a popular soldiers’ theatre troupe (the *Dumbells* were so popular that they played across Canada for over a decade after the war).

Films were very popular among the troops, with theatres often set up in old barns. By the second half of the war, a steady rotation of films arrived at the front that were projected in purpose-built cinemas in wrecked villages. The films were silent, but they were often accompanied by a piano or even a marching band. There were many wartime celebrities, but the most popular was the shabby “Little Tramp” played by Charlie Chaplin. His character was the little guy who soldiered through life with a quiet dignity, challenged authority, tweaked and beat the wealthy and sophisticated. Even Chaplin’s penguin waddle was hilarious from the perspective of the soldiers, who had been drilled to walk with precision and in unison. Chaplin’s humour crossed national boundaries, with soldiers of many nations identifying with the unlikely dishevelled hero who lived by his wits and outsmarted his betters, always coming out on top.^{9U}

Reading was commonplace behind the lines, in the dugouts and in the trenches. Usually solitary in nature, soldiers often read aloud to groups, because of the shortage of material, the challenges faced by illiterate comrades, and the bonding nature of the act. Books by Rudyard Kipling, Arthur Conan Doyle, Jack London, H.G. Wells, Jules Verne, and Nat Gould were popular. Newspapers that were a day or two old could be bought behind the lines, usually from Belgian or French boys who braved the shellfire and poison gas, but the British and Canadian papers were heavily censored and laced with patriotism that skewed the truth of what was happening. Front-line soldiers were often frustrated by newspaper accounts of the war.

With editors, journalists and cartoonists in the ranks, the civilian-soldiers founded a number of **trench newspapers** for their comrades-in-arms. Many of the trench newspapers were crafted in or near the trenches, but also encompassed periodicals produced behind the lines at bases in France and England. The content was not meant for those outside of the soldiers’ culture. They poked fun at subjects that were a constant source of complaint, such as food, weather and work fatigue, or taboo subjects, such as uncaring officers and shell shock. Though the papers were rife with dark humour, criticisms, biting satire and a healthy dose of anti-authoritarianism, there were also patriotic verses and heroic accounts of victories over the enemy. Soldiers submitted stories, observations, jokes, cartoons and poems. The most popular and widely circulated Canadian soldiers’ trench newspaper was *The Listening Post*, its inaugural issue was published by the 7th Battalion in August 1915.

Poetry, an important form of expression at this time, was a widespread and popular means of communicating soldiers’ emotions and experiences. The best-known English-language Great War poets, British officers Siegfried Sassoon and Wilfred Owen, and Canadians John McCrae and Canon Frederick Scott, had Empire-wide fame. The rank and file emulated the famous poets by penning their own poetry, their work inspired and born in the trenches.

The rest, sports and entertainment at the rear helped to rejuvenate the physical and psychological strength of men who had lived in squalor and experienced unimaginable horrors. However the trenches always loomed in the back of the soldier’s mind. Within a few days or a week at best, he would be marching up the line, back to the killing ditches of the Western Front.^{4F, 5J, 6E, 9U}

- “**Souveneering**”: Canadians, like other Allied soldiers and the Germans, gathered all they could from the battlefield. This desire to scavenge and collect war material was so strong in the soldiers’ culture, that the British and Canadians embraced a new name to encapsulate the act—“souveneering”. These keepsakes were gathered from the

battlefield and from prisoners of war. The souvenirs held multiple meanings: proof of service on the Western Front; signs of victory over the enemy; and remembrance of a location or battle that held deep meaning. Battlefield trinkets, German Iron Crosses, Luger pistols and even shrapnel extracted from flesh were prized trophies. Other items included; helmets, bullets, shrapnel, shell casings, badges, pins, buttons and the brass nose caps of exploded shells. Some made for unique gifts for loved ones at home, and some soldiers crafted them into unique art. Created in the trenches and behind the lines, known as “**trench art**”, soldiers crafted items that included candlestick holders, cigarette cases, pipes, walking sticks, letter openers, photo frames, little toys and jewellery. Though military authorities declared the art as illegal, and the men lacked workshops and the necessary tools, it did not dissuade the artists from creating art out of bullets, shrapnel, shell casings, brass shell caps and almost everything else.^{9U}

- **Temporary respite:** Temporary respite from the trenches was given to soldiers in the form of a “**leave**” – Officers received roughly four leave passes a year, in comparison to only one for an enlisted man, and usually not before he had served at least a year at the front, which allowed for a mere ten to fourteen days. So important was leave from the front that men risked their lives for it. It was not uncommon for a commanding officer to offer leave as a reward for pulling off a dangerous trench raid. Where British soldiers going on leave were less than a day’s journey from home, and pilots on patrol over the battlefields could at times catch sight of England, Canadian soldiers could return to their homes only in their thoughts and dreams. Since many Canadians had strong links to England, Scotland, or Ireland, most soldiers spent their leave there (the United Kingdom was known as “Blighty,” soldiers’ slang derived from the Hindustani word for “home.”)

The term “**Blighty**” was also used to describe a “Blighty wound,” a wound that was not fatal, but serious enough to send a man out of the trenches and to a clean hospital in England. For example, a “Blighty” could be a piece of shrapnel through the fleshy part of the leg or a bullet through the hand.

London was the big attraction for young Canadian men who for most, had grown up on farms and small towns in Canada. In the metropolis of London soldiers did many things including: taking in the tourist attractions; searching for photographers to send snaps back home; going to music halls or plays; eating in good restaurants; enjoying the company of a woman; or drinking with mates in the pubs. For others, it was a chance to be with family members. Early in the war, thousands of upper-class Canadian families had sailed across the Atlantic to set up temporary homes in England in order to be near their soldier-husbands. For poor families, in contrast, the expense of such a move was prohibitive, so soldiers had to wait for years before they might see a loved one again.^{4G, 5J, 8O, 9U}

- **Khaki University of Canada:** As the war dragged on with no end in sight, soldiers increasingly asked for opportunities to better themselves. The chaplains stepped in, first with Bible study groups and then in 1916 with a more formal program of educational study in partnership with the YMCA. As thousands of Canadians arrived in Britain to train and then serve at the front, the numbers of Canadians seeking access to education overwhelmed the chaplains and YMCA. In January 1917, the YMCA requested that a representative from the Canadian universities be sent to England to help develop an educational program. That July, Henry Marshall Tory, the president of the University of Alberta, went overseas on an educational mission.

Surveys were conducted to determine what the men hoped to learn. Even though the average education level for the Canadian soldier was Grade 6, there was a fierce desire by thousands to improve themselves while overseas. Under the YMCA and chaplains, instruction was deeply tied to religion. Tory established a program known as the Khaki University of Canada (initially Khaki College of Canada) that emphasized more formal education instead of the salvation of souls.

Promotional phrases like “Rations for the Mind” and “Don’t Starve Mentally” were used by Khaki University to advertise to the Canadian soldiers. Administrators found students in the hospitals and recovery centres, especially those wounded men who were facing long periods of monotony. Special courses were developed to help those affected by shell shock, with instructors offering speech remediation for those who stuttered or had lost the ability to speak. From late 1917, the program had one main centralized university camp for students in London and a number of colleges in the various Canadian bases across England, and later, Battalion Schools for those men who had received only minimal or no schooling at all. Libraries were created too, both for men in the colleges and for units in the field. The courses were a mixture of hands-on training, lectures and reading groups, ranging from men who were illiterate through to university-level instruction.

The most popular course was scientific farming, which included information on crops and management, types of soil and livestock, elementary veterinary science, dairying, and vegetable and fruit growing. Other courses

included business management, commerce, mechanics, electricity, teacher training, legal studies, foreign languages, and medicine. While some YMCA officers continued to instruct, the majority of the teachers were drawn from the units and were a mix of officers and enlisted men. The army of citizen-soldiers had all manner of educators and teachers in the ranks, and they stepped forward to instruct their comrades. Other instructors roamed the front and rear areas providing lectures. In December 1917, the University of Vimy Ridge (UVR) was established as one of the soldier colleges in France. Amidst a desperate wartime landscape close to the front line, books and stationary supplies were shipped from England to service the classes, teachers were called from the units, and sessions were held in abandoned mine offices, improvised dugouts and any building available.

The Khaki University taught 3,000 illiterate men to read and write which, for many, gave them their first opportunity to send a letter home to their family. The vast majority of pupils benefited from instruction directed at high school-or primary school-level education. Others earned university level credits. There were also courses offered to the fiancés and wives of soldiers, as thousands of Canadian soldiers married British women during the war. The goal of a course at the University of London was to turn war brides into “ideal Canadian settlers,” with instruction in home economics, farming and general knowledge about Canadian geography, history and culture.

The Khaki University continued to educate tens of thousands of soldiers during the long and frustrating demobilization process. The Khaki University held its’ last class on June 30, 1919 as the last of the men were shipped home to Canada. The Khaki University and its Colleges lasted less than two years, during which time 50,189 soldiers had enrolled in courses and more than 500,000 had attended lectures. Tens of thousands more had benefited from education during the war. All of the soldiers acquired skills and knowledge that better prepared them for life in postwar Canada.^{2E, 2N}

• **Connections Home:** Letters and periodic care packages with cake, candies, tinned fruit, cigarettes, magazines and clothing were a vitally important connection to loved ones at home and were essential in keeping up morale. Almost every man had left behind loved ones—a wife, children, friends, and parents, whom they were desperate to return to one day. Tens of millions of letters criss-crossed the ocean, and it could take two to three weeks for a letter to travel from a soldier’s hand to his home, and just as long for the return message to make its way back. Mail came up to the trenches almost every day, and the letters from home were read and reread. When a call went out that a carrier arrived, men crowded around him. One soldier remembered, “*It is... pathetic to see those who are not lucky turning away sometimes with tears in their eyes.*”^{4G}

Those that received mail loved reading about events at home, everything from sports to politics, the details about which young men from their street or town had enlisted, of who was getting married or had a baby, though some learned of the deaths of grandparents and parents and other tragedies. One Canadian Lieutenant wrote to his wife and two children, “*I am dreadfully homesick and I am longing to be home with you and the children again... Every time I go to sleep I dream that the war is over and that I am back home again. For comfort I read your letters and look at your pictures and I can tell you they are a great comfort to me.*”^{9U}

It was not easy at the front to summon the will to settle oneself down and write: there were constant trench duties; everyone was sleep-deprived and worn down; so much of their energy was focused on survival; and finding a dry spot and securing paper was a challenge. Few soldiers could write home more often than once a week, and some were illiterate and needed a friend to write letters for them. In letters sent home, few were able to accurately describe the bewildering events and trauma they were experiencing, and self-censorship, not wanting to worry those at home, hid other aspects of the terror. Soldiers tried to provide emotional support to their wives, impart loving words to their children, or a gentle word to a mother or father. Most also recounted some of the aspects of their war experiences, though all letters were censored first by their officers and then sometimes at headquarters. Canadian soldiers who wrote letters had to leave them unsealed, to be read by the censors.

Censoring of letters was done to prevent disturbing news from reaching home and discouraging recruitment. Mail could also be intercepted by the enemy, so letters were censored to prevent them from obtaining useful information. Men knew not to mention their unit or location, and the phrase “somewhere in France” became a well-used address of the writer. As a result of the censors, the men rarely wrote home of the true hardships they faced. In reality, censorship was sporadic at best. Officers disliked the time-consuming and intrusive task, and reading dozens of letters a day with soldiers’ chicken-scratch writing, led to much skimming or even wholesale abdication of the annoying chore by many officers. Many of the letters that reached home were published in local newspapers, which was the case here in Sarnia.

Soldiers also had the option of sending a “whiz-bang”, a Field Service Postcard (F.S.P.) home. These bizarre and impersonal postcards contained multiple choice prewritten messages, and soldiers simply struck off those that did not apply to them, with most opting to keep the message: “I am quite well” and “I hope to be home soon”. Although they contained little personal information, the “whiz-bangs” provided an indication to a worried family at home that a soldier was still alive.^{4G, 5J, 6E, 7A, 7Z, 9U}

• **SOLDIERS’ LETTERS HOME TO SARNIA:** Following are a number of the letters written home by Sarnia-Lambton boys (and their stories) who fought in the trenches, providing a glimpse of the horrors that they witnessed and experienced (more Sarnia soldiers’ letters home are on page 160):

> **Ralph Louis Ackerman** was born in Sarnia on November 16, 1891, the son of Wilbert Albert Ackerman, of 390 Russell Street, Sarnia. Twenty-three-year-old Ralph Ackerman enlisted in the Canadian Over-Seas Expeditionary Force on August 16, 1915 in Sarnia with the 34th Battalion. He embarked overseas and arrived in England on November 1, 1915. Six months later, in May 1916, he embarked for France. On May 25, 1916, Private Ralph Ackerman was drafted into the Canadian Army Infantry, British Columbia Regiment, 7th Battalion, and joined that unit in the field on June 7, 1916. During his time in France, Ralph wrote a number of letters home.

Following is a portion of a letter that Ralph wrote from “Somewhere in France” to his sister, Charlotte “Lottie” (Mrs. Albert E. Chambers), who was residing on North Mitton Street (that she received in August 1916):
Dear Sister,

Just a line or two to let you know that I am well and hoping that this letter finds you the same. I received your letter today and am answering it right back... The trenches are nice and dry and I have been on “listening post” every time I have been in the trenches. It is a pretty good job, and exciting at times. You have to go out in “No Man’s Land” and lay and listen and watch for “Fritz.” You have lots of bullets and rifle grenades flying around, but you soon get used to them. I was out one night and I had a fellow with me who was not on it before with me. It was certainly a lively experience for the beginner. We spotted three “Fritzs” working on their wire entanglements. They were about fifty yards from me. You could see them quite plain, but were a little too far away to toss a bomb at, and our scouts were out patrolling. I didn’t dare take a chance at bagging them. I was out another night when the trenches were only 40 yards apart. I was out pretty close to them on this occasion. You could hear them talking in their trenches quite plain... Fritz has a shell they call a sausage. They are about three feet long, and are awful high explosives. You can see them coming through the air and can generally get out of the way of them. They make an awful noise when they explode. But we have just as good, and a lot better explosives than he has though, and can always give him twice the amount he serves us...

Ralph Ackerman would be killed in action in August 1917 in France. His biographical information, including more of his letters, are included in this Project on page 213.

> **William Potter** was born in Point Edward on December 7, 1894, the son of Albert and Flora Potter. On January 27, 1915, William Potter, age twenty and single, enlisted in Sarnia. He recorded his occupation as painter, and his next-of-kin as his father Albert Potter in Sarnia. William enlisted with the 7th Regiment, Canadian Mounted Rifles, and embarked overseas on June 9, 1915. Eleven months later, in mid-May 1916, he arrived in France. In August 1916, Private William Potter, then a member of the Fort Garry Horse, Canadian Cavalry, wrote a letter from No. 3 Canadian General Hospital in Boulogne, France, to his mother Flora Potter of 173 Brock Street. Following is a portion of that letter:

August 2, 1916,
Dear Mother,

Just a few lines to let you know I am still alive and kicking. As you will see I am in hospital, but haven’t been wounded. I just got a shaking up. We were marching into the trenches along a road through a village and I was leaning back watching an air battle and what happened, I don’t know, only I woke up in a dressing station on a stretcher. I feel a lot better now. Will be all right in a week or so...

It is surely fine here. A nice clean bed to sleep in, good meals at the regular hours and no noise. That was what bothered me most. Pieces of shell flying around did not worry me as much as the noise. When our guns opened up you couldn’t hear the next fellow to you speak unless he got his mouth right up to your ear and shouted...

Less than two weeks later, William would write another letter to his mother Flora Potter from Boulogne, France. Following is a portion of that letter:

Dear Mother,

Just a few lines this week to let you know everything is going on O.K.... Well, I am a lot better now, but being a little shaky. It isn't very pleasant having a few tons of dirt flying around you from a big shell, especially when you wake up and find yourself buried to the neck. It is enough to make one a little shaky...

While overseas, William Potter served in a number of units including: the Fort Garry Horse, Canadian Cavalry; the 64th Battalion; #2 Canadian Labour Battalion and the 16th Reserve Battalion. Also while overseas, William Potter would be treated at different times for pneumonia, influenza and bronchitis. William Potter returned to Canada in September 1917, becoming a member of the Military Police Force, CEF, No. 1 Detachment. After serving in a number of battalions in England, France and Belgium, Lance Corporal William Potter was discharged upon demobilization on February 6, 1919 in London, Ontario. William Potter passed away on July 1, 1941 at the age of forty-six, and is buried at Lakeview Cemetery in Sarnia.

> **John Carolan** was born in Bailieborough, Ireland on June 10, 1886. A member of the 27th Regiment, St. Clair Borderers, he initially enlisted on August 5, 1914 in Sarnia, recording his occupation as locomotive fireman. On September 22, 1914, twenty-eight years old and single, John Carolan enlisted again in Valcartier, Quebec, recording his occupation as locomotive fireman, and his next-of-kin his mother Mrs. Mary Smith in Greytown, Natal, South Africa. John Carolan became a member of the 1st Battalion, CEF and embarked overseas on October 3, 1914. Seven months after enlisting, in the opening days of the Second Battle of Ypres, Private John Carolan was wounded. Following is a portion of his medical report: *On April 23rd 1915 at Ypres, while advancing, was struck by bullet which pierced skull fully a handsbreadth above the R. ear, passed through brain & emerged a little to the R & above the external occipital protuberance. He woke in 3 hrs or so, & found his L. arm & leg paralysed, but managed to crawl 100 yds to shelter. Then was only vaguely conscious. He was also 'gassed' badly. 8 or 10 days later was operated on and had a number of pieces of skull removed....*

(NOTE: a couple of reports in his Service File have the date of his wounding recorded as April 20).

John was admitted to No. 6 General Hospital in Rouen on April 29, recorded as, "GSW head and arms, dangerously ill". He was moved to York County Military Hospital, Pickering for five weeks, where he was recorded as "GSW Cranium, severe", and then transferred to Canadian Convalescent Hospitals in Bromley and Monks Horton. On September 7, 1915 at Shorncliffe, England, he secured his discharge to Canada, requesting transportation to Point Edward, Ontario. In October 1915, he was discharged, declared "permanently unfit for military duty of any nature", and "he has been rendered at present materially incapable of earning a livelihood by reason of wounds received in action". On his Medical Report, examiners recorded his disability as, "Fractures Compound of Skull by Bullet, Weakness of Left Side – gas". He was granted a pension for the period of one year (\$192 dollars per annum). After his discharge, he resided at 284 Confederation Street, Sarnia.

On that fateful April 23rd, 1915 at Ypres, fierce pounding by the German artillery had smashed a gap in the British defence lines. John Carolan was with his unit of the 1st Battalion that had rushed to fill the gap. John had just passed the position from where his late commander was cheering on his force, when John was wounded. Following is a portion of John's description of his former commander who fell in the battle, and of his own experience:

Colonel Becher was the bravest man in the unit. His troops would have followed him anywhere, or even into hell itself, and surely those engagements that we came through were as bad as the infernal regions. There was nothing the men wouldn't do for him, and there was nothing he would ask a soldier to do that was not a matter of plain duty. He wouldn't send a man where he would not go himself. No wonder the men worshipped him.

An accurate and realistic description of the fierce engagements at Langemarck, Ypres and Hill 60 is almost impossible. The terrible crash of artillery, the ceaseless rattle of fire arms and machine guns and the deep reverberating boom of the "Jack Johnson," the men falling all around in a veritable hail of lead, the sudden "Up and at them!" that carried all before it, the dogged retreat when every foot of ground gained was held tenaciously and given only at a tremendous cost to both sides – all these were terrible phases of the conflict that were indescribable.

Two years after being discharged in England, at the age of thirty-one and still single, John Carolan enlisted again on September 17, 1917, in London, Ontario. He recorded his occupation as motor mechanic, his address as 284 Confederation Street, and his next-of-kin as his mother Mrs. Mary Smith in Greytown, Natal, South Africa. He also recorded that he had served previously in the 1st Battalion, CEF, and that he had been discharged as medically unfit due to "gun shot wound in head". The following month, he underwent a medical examination at Guelph Military

Hospital. Aside from the two large scars on his head (entrance and exit wounds from the bullet), John was suffering a host of health issues a result of his war wounds, including; increased sensitivity to mental and physical strains, body numbness on left side, dizzy spells at times, debilitating headaches, poor memory, and he would tire easily upon exertion. Three months after enlisting again, on December 26, 1917, Private John Carolan of the 1st Battalion was discharged in Guelph, declared “medically unfit for further service”. John Carolan passed away on May 20, 1935, three weeks before his forty-ninth birthday. John Carolan is also mentioned in the bio of Dr. David Bentley on page 232.

> **Edward John Beecher Carr** was born in Sarnia on June 4, 1895. On November 1, 1915, Edward Carr, age twenty and single, enlisted in Sarnia with the 70th Battalion, recording his occupation as farmer and his next-of-kin as his father Douglas Carr, in Corunna. Private Edward Carr arrived in England on May 1, 1916, and in France on June 7, 1916 as a member of the 5th Canadian Mounted Rifles. Just over three months later, on September 26, 1916, Edward Carr was wounded, receiving a shell or shrapnel wound in his right leg. Days later, Edward wrote three letters home; one to his sister, and two to his parents Mr. and Mrs. Douglas Carr in Corunna. Following are two of his letters (Edward’s third letter to his parents is included in the biography of Robert Batey on page 223):

France, Sept. 28th, 1916

Dear Sister,

I am in the hospital recovering from a slight gun shot wound in the leg. Lucky I did not get it in the bean, but I would rather not have had it at all. Had almost begun to think I could not be hit, but the night I got this I was the only one hit just then, although when the rest arrived at their destination and started to work more of them were hit. Four came during the course of the night into the same tent that I was in. They had been digging and unearthed a German hand grenade which exploded and wounded four. Well, the winter weather will soon be here, but I hope it will not stop our advance. Our cavalry will now soon be swarming over Fritz’s country at the rate we are going. We are continually extending our roads, etc., as we take another trench from him. We were the first Canadians to go over on the morning of the 15th... The wonderful new machine of the British ??? tanks, commonly known as the Irish navy, or His Majesty’s Overland Cruisers, were in operation with us. They can go right over shell holes, trenches, barbed wire, even through an ordinary brick wall. I don’t know what Fritz thought when he saw them. I’m sure nothing will stop us now and if he is wise will quit right away. We had a concert here last night given by the P.P. It was a fine taste of real theatricals. Two of the “ladies” were so real that really one could not tell for sure what they were. There was Charlie Chaplin, etc. Altogether it was quite the finest thing I have ever seen out here.

Beecher Carr

Following is a few lines of poetry found on the body of one of our troops. It will give you some idea of the atmosphere of conditions sometimes:

SEAM SQUIRRELS

*I don’t mind the rain at all,
I don’t mind the mud,
Or scare at German bullets,
Or faint at sight of blood.*

*I’m used to being thirsty,
And sleeping in the dirt,
But I hate those Seam Squirrels,
Cruising o’er my undershirt.*

*I never kick at bully beef,
I love my daily cheese,
I don’t mind if my billet,
Is full of foreign fleas,*

*I never flinch or duck my head,
When German shrapnel hums,
But I can’t be contented,
If my shirt is full of “crumbs.”*

*I don’t dread the nightly hikes-
continued over...*

Here is another verse (often done in song):

SING ME TO SLEEP

*Sing me to sleep where bullets fall,
Let me forget the war and all;
Damp is my dugout, cold my feet,
Nothing but bully and biscuits to eat.*

*Sing me to sleep where bombs explode,
And shrapnel shells a la mode;
Our sand bags and helmets you will find,
Corpses in front of you, corpses behind.*

*Far, far from Ypres I long to be,
Where German snipers can’t pot me;
Think of me crouching where the worms creep,
Waiting for the sergeant to sing me to sleep.*

*Sing me to sleep in some old shed,
continued over...*

'Seam Squirrels' continued...

*My pack upon my back,
Crawling through the darkness,
Upon my unknown track.*

*But when I lay me down at night,
In some strange hut to sleep,
Those hungry little grey backs,
Fairly make me creep.*

*So when you write to me again,
Kind friends across the foam,
Don't send me any cigarettes,
Or chocolates from home.*

*For I get all I want to eat,
And my daily "shot" of rum-
Send me some kind of poison,
That will put them on the bum.*

'Sing Me To Sleep' continued...

*Where rats are running about my head;
Dreaming of home and nights in the west,
Somebody's oversea boots on my chest.*

*Sing me to sleep where camp fires glow,
Full of French bread and café de l'eau;
Stretched out upon my waterproof,
Dodging the raindrops through the roof.*

*Far from the star shell I'd love to be,
Lights of old Sarnia I'd rather see;
Think of me crouching where the worms creep,
Waiting for a "whiz-bang" to sing me to sleep.*

Following is a portion of Edward Carr's September 30, 1916 letter from France to his mother in Corunna:
Dear Mother,

Well, I suppose you will be surprised to hear that at last I got a scratch, and am in the hospital. You will be surprised too to hear how I lost the gifts you sent me. Well, on the eve of Sept. 15th, we were on our way up a communication trench, to our dugouts. We were put in two dugouts, made by the Germans before they were driven back. These dugouts are all well constructed and have bunks in them, are electrically lighted, etc., lined and even have close fitting doors and fireplaces. These, compared with our "funk holes," or burrows in the bank of a trench, seemed quite luxurious. We arrived in a driving drizzle of rain, and I laid down near the open doorway (one of our shells had landed on it and caved part of it in) and went to sleep, although not before leaving my equipment just outside the door, ready for slipping on at 12 o'clock, when we had to go on up to the front line, to wait there till dawn, when we were to attack the German line.

Scarcely had I dozed off, when a German 9-2 shell landed just in the doorway, right on top of my equipment and rifle, and digging ourselves out a few minutes afterwards, I could not find a trace of my stuff; nothing but a hole in the ground... then we had to go up at 12. We had to hustle around and get sand bags to carry our stuff in and hunt up rifles and bayonets from the salvage dump, which luckily, was close by... once we got over there, I was able to get equipment off one of our own poor fellows who was killed, but my own private stuff was all lost. I am recovering and will leave for a rest camp tomorrow morning, where we will be about a week by the seaside...

Yours, Pte. E.J. Carr

Private Edward Carr remained in hospital for six weeks before rejoining his unit. He served overseas in England and France for seventeen months with the 5th Canadian Mounted Rifles. On October 30, 1918, he was admitted to #5 Canadian General Hospital in Liverpool because of arthritis in his knee. After almost one month in hospital, he was invalided to Canada in late November 1918. Admitted to Hamilton Military Hospital in late-January 1919, he spent two months there receiving treatment for chronic arthritis in his right knee (a result of his service). This was followed by another month and a half treatment in the Military Hospital, Wolseley Barracks in London. Edward John Beecher Carr was discharged on May 8, 1919.

> **William "Harry" Jennings** was born in Forest, Ontario on August 13, 1888. At the age of twenty-six and single, Harry Jennings enlisted in Calgary, Alberta on August 12, 1914, becoming a member of the Princess Patricia's Canadian Light Infantry (PPCLI). Two weeks later, he underwent his medical exam in Ottawa and completed his Attestation Paper recording his occupation as printer/proof-reader, and his next-of-kin as his father Richard Jennings in Forest. Harry embarked overseas from Quebec on October 3, 1914, and by mid-December 1914, embarked from Southampton, England to France. One month later, on the night of January 24, 1915 in Ypres, France, Private Harry Jennings and four others were carrying ammunition into the trenches when they were hit by German machine gun fire from 350 yards away. One man was killed, Harry and another man were wounded. Harry had been hit on the left side of his head, fracturing his skull, and knocking him unconscious. After fifteen minutes, he regained consciousness, but his right arm was totally paralyzed, his right leg was weak, and he was unable to speak.

A field dressing was applied immediately and he was able to walk a little. The other wounded man helped drag Harry through 50 yards of knee-high mud to safety. From a Field Hospital at St. Eloi, he was brought by ambulance wagon to a Clearing Hospital where his wound was dressed again. On January 28, he was sent by motor ambulance to a hospital at Bailleul where he was operated on for “fractured skull with depression”. He remained there until February 15.

Following is a letter that Harry Jennings wrote to the Alberta newspaper *Morning Albertan*, published March 6, 1915, about that deadly night for the PPCLI (Harry had formerly been on the staff of the newspaper):

Five of us were carrying ammunition into the trenches when the Germans caught us. It was dark and we were sneaking along to get the ammunition and bring it back. The German trench was only a short distance away. Suddenly the darkness was split by a flare which lighted up everything all about us. We did not have time to drop before the fusillade started from the German trenches. The bullets spattered all about us. The officer in charge of our detail, a man named Price, from Edmonton, was instantly killed. Another man from Saskatoon, got a bullet in the chest, and I got my skull chipped. It was all over in a minute, and three out of the five of our party which had started out were out of commission. Not such bad work on the part of the Germans, was it? We had all the ammunition we wanted.

There were two other Calgary men killed the same night. One was Captain Fitzgerald [also known as Robert Mansfield], the finest man and the most popular officer of the whole regiment. He was the British reservist, of good family, who went out to Calgary a couple of years ago, went broke, and finally had to work at manual labour for the government of Banff. When war broke out he was among the first to offer his services, and as he was an excellent soldier, was commissioned as a captain in the Patricias. Old Jack Murphy was another man who was killed this same night. He worked for the city for a time and was a friend of Barney Collison, Crispin Smith and that crowd. He was in my section and I had gotten to know him well. I am in the hospital at Boulogne, and have improved so that I can get around, and expect to be taken to England in a few days.^{2G}

Harry Jennings was treated at several other hospitals, including the Rawal Pindi British General Hospital in Boulogne, then sailed to England aboard Hospital Ship *Valdivia*, followed by more treatment at the Royal Victoria (Welsh) Hospital in Netley, England for his, “GSW Head” that at one hospital was recorded as “severe”. Following is a portion of a letter that he wrote to his mother in Forest, while he was recovering in a hospital in England:

My Dear Mother,

... Now just a word to the war. It is absolutely worse than the people ever imagine. The weather is not as cold as Canada of course but it rains or sleets every day nearly. Raw and miserable and the trenches are a terror. Actually water over the knees have I stood in for 2 days and nights and kept my back humped up and my head down below the trenches all the time. And then when we come out had to cut my boots off my feet. They were so swollen. This is what the papers don't tell and are not allowed to tell, so don't show this letter around. And Belgium, village after village, and they are only a matter of a few miles apart here absolutely blown to pieces. And the people where they are, goodness only knows. And France isn't much better a country of old, young and cripples If people only realized what a war such as this meant to the country, where it was waged it would mean that the world would turn to socialism in no time. Thank goodness you live in North America...

On March 4, 1915, medical officials at Welsh Hospital, Netley, completed a medical report on Harry's condition. The gunshot to the head had caused the fracture of the left parietal bone with injury of the underlying motor area. His right arm was weak with loss of fine movements of his right hand, and his speech was slow and hesitating. The disability was diagnosed as permanent and that it would affect his capacity for earning a full livelihood in the general labour market. The commanding Medical Officers recommended that arrangements were to be made to send the patient to his home in Ontario. They also concluded that his capacity for earning a full livelihood was decreased by ¼, and that he should be discharged permanently, declared medically unfit.

Harry Jennings was discharged to Canada on March 19, 1915 and on March 30 he was be declared “medically unfit” in Halifax. On June 30, 1915 in Forest, the Medical Board had examined Harry and released their report on his condition—they determined as a result of the bullet wound to the left motor area of his brain, he was suffering from partial paralysis of the right arm and leg, with some impediment of speech. He was also suffering from sub-acute pleurisy. On December 30, 1915 in Calgary, Private Harry Jennings of the PPCLI was discharged, declared “being medically unfit”. Some time after his discharge, Harry married his wife Ethel, and they later resided in Port Dover, Ontario. William Harry Jennings passed away at the age of thirty-six, of war related injuries/illness on May 15, 1925. His cause of death was recorded as “influenzal broncho pneumonia, related to his service.” He is buried in Union Cemetery, Calgary, Alberta, and is commemorated on the Forest Cenotaph.

> **Leonard Francis Allingham** was born on September 24, 1895 in Courtright, Lambton County, Ontario and was raised in Sarnia. Prior to enlisting, he was employed in the grease department with Imperial Oil Company in Sarnia. On September 8, 1914, two weeks before his nineteenth birthday, Leonard Allingham enlisted in Valcartier, Quebec, becoming a member of the Canadian Infantry, 7th Battalion. Single, he recorded his occupation as oil maker, and his next-of-kin as his mother Mrs. John Allingham at 402 Wellington Street, Sarnia. Leonard embarked overseas on October 3, 1914 and one month later, on November 5, he was transferred, becoming a member of the Canadian Army Medical Corps (CAMC), No. 2 Canadian Field Ambulance. On December 23, 1914, nineteen year-old Leonard Allingham, CAMC, completed a second Attestation Paper, this one in Salisbury, England. Following is a letter that he wrote to the *Sarnia Observer*, published in February 1915:

Dear Sir,

*I am writing a few lines which I hope you will print as I feel sure that Sarnia people will be pleased to have news of the Sarnia boys at the front. We are all scattered about in different regiments but that cannot be helped. So far we have had a good time. About twelve of us are with No. 2 Field Ambulance, billeted at Wilton. The boys of the 2th [sic] regiment are still in camp, but I learned from one of them that they expect to go to France shortly. Some of the fellows in No. 2 stationary hospital were lucky enough to go to France some weeks ago in spite of the fact that they were almost the last chosen to go. I am hoping to go to France soon. We all want to have a go at the Germans. None of the Sarnia fellows have been sick so far. We seem a pretty tough lot so I hope we shall get through all right. I think a few more Sarnia boys might join the army and do their share for their king and country. Hoping to hear shortly that some more Sarnia boys have joined the army. I am, Yours truly,
(Private) L.F. Allingham, No. 2 Field Ambulance, C. Sec. 1st Can. Expeditionary Force, Wilton, Salisbury, England
P.S. I wish the Sarnia hockey boys all good luck in the coming season.*

Following is a portion of a letter that Leonard wrote in late April of 1915 from France:

Dear Mother,

I received your letter yesterday and was glad to hear from you. Things are getting a little hotter around where we are now. Bullets and shells whizzing through the air everywhere. You can tell Clarence things are just as hot as they put in the papers, about the battles. I guess you will have the news of the battle (April 27) we are in. We were four days dressing the wounded without a wink of sleep and we are back for a rest. The boys that were left out of the battle turned around and volunteered to go back at the Germans, again, after being in battle for five days. I guess there isn't many left of the Sarnia boys (poor fellows). They wouldn't give in until there was hardly enough of them to make a company out of each battalion. There is a few killed and wounded out of our bunch. Some of them are from Sarnia also. I guess they are only wounded.

*We were all separated into stretcher squads and sent out to collect the wounded that couldn't walk. If anybody wants to go through purgatory once they only want to be in a battle like this one which our boys went through. I think this battle is the biggest that has been yet. The Germans sent word across to our trenches that they were going to have their dinner in Ypres on the 24th. They must have meant lead, for I think they got filled up with it from our boys. Our bunch worked like heroes and there is some news that one or two of us are going to receive a Distinguished Conduct medal. They certainly deserve it when they double across field under shell fire after wounded. Well mother dear, this is all the news I have to say for now. If I told you all the news it would take a newspaper to write it on.
With best of love to all from your loving son, L.F. Allingham*

On June 22, 1915, Leonard Allingham was wounded in action—a gun shot wound in the right leg—and was admitted to No. 1 Canadian Field Ambulance. Soon after, his mother in Sarnia received a telegram from the Adjutant General, Ottawa, informing her that her son “Leonard Allingham, of No. 2 Canadian Field Ambulance, was officially reported wounded in action on June 22, 1915, and that further particulars would be forwarded when received”. Four days after being wounded, Leonard returned to action. Fourteen months later, on September 5, 1916, he was reported wounded again; was admitted to No. 2 Canadian Field Ambulance; and then returned to duty that day.

On October 4, 1916, he was admitted to No. 2 Canadian General Hospital in Le Treport with a “not yet diagnosed” medical problem of his lungs. Two weeks later, he was admitted to No. 7 Canadian Stationary Hospital in Havre, suffering from influenza and acute bronchitis. He remained in hospital for four days before rejoining his unit. Nine months later, on July 25, 1917, he was granted a Good Conduct Badge in the Field. Also see page 237.

Leonard Allingham survived the war, and on January 11, 1919, he was granted permission to marry—his wife was recorded as Mrs. E. Allingham, Bank House, Wilton Wilts. Salisbury—and they later resided at 402 Wellington Street, Sarnia. In early June 1919, Private Leonard Allingham of the CAMC was awarded a Distinguished Conduct

Medal (DCM), a medal for bravery, and returned to Canada. He was officially discharged upon demobilization on June 13, 1919 at Quebec Depot, Clearing Services Command. Leonard Allingham returned home, residing in Sarnia with his wife. He passed away in 1971, at the age of seventy-five, and is buried at Lakeview Cemetery in Sarnia.

> **Ulysses Theodore Mays** was born on April 6, 1871 in Bellefontaine, Ohio, USA. At the age of forty-three, Ulysses Mays enlisted in Valcartier, Quebec, on September 16, 1914, becoming a member of the 1st Battalion, CEF. Ulysses and his wife Mary Mays were residing at 409 George Street, Sarnia at the time. Ulysses recorded his occupation as a cook, and his next-of-kin as his wife Mary. Private Ulysses Mays embarked overseas on October 4, 1914, arriving in England before moving to France. Following is a portion of a letter that Ulysses wrote in early May 1915 to Mary in Sarnia:

Dear Wife,

You have probably read the account of the great dash the Canadians made, but the half has never been told. I am thankful to say I am well and among the living. I have been in three countries now, England, France and Belgium, and hope to be in Germany. We are now in a rest camp and expect to be here two or three weeks. I am glad to get away from the roar of the guns. I have not seen Tod Fleming since. He was killed or wounded, I don't know which. We lost so many of our boys, but they died heroes. We charged the Germans in a regular hail of shot and shell. It did not seem as though anyone could possibly live under the fire, but a few of us are left to tell the tale, but for how long we don't know...

On November 9, 1915, Private Ulysses Mays of the 1st Battalion was admitted to the 3rd Casualty Clearing Station, and then No. 1 Canadian General Hospital, Etaples diagnosed with scabies. Approximately two weeks later, he was admitted to No. 6 Convalescent Depot, Etaples, diagnosed with herpes zoster. Commonly called shingles, it is a virus infection (the same virus that causes chickenpox) of the central nervous system that is characterized by a painful, burning skin rash with blisters, usually on part of one side of the body. Other symptoms include fever, feeling run down, and general fatigue. Ulysses was experiencing pain in his chest, back and legs. On April 10, 1916, he was admitted to Canadian Base Depot suffering the same condition. One month later, on May 9, he rejoined his unit in the field. Three months later, on August 16, he returned to England, West Sandling, becoming part of the 36th Reserve Battalion. One month after that, on September 16, 1916, and after two years of service, Private Ulysses Mays of the 36th Battalion was discharged at the Quebec Depot. Tragically, at some point while Ulysses Mays was overseas, his wife Mary passed away.

Fourteen months after returning to Canada, on November 1, 1917, forty-six-year-old Ulysses Mays enlisted again, in London. A widower, he was residing at 409 George Street, and recorded his occupation as a cook, his next-of-kin as his daughter, Verna Mays at 409 George Street, and that he had served with the 1st Contingent, CEF. Private Ulysses Mays became a member of the Canadian Military Police Corps (CMPC), No. 1 Detachment. On July 31, 1919, Acting Corporal Ulysses Mays was discharged on demobilization at No. 1 District Depot in London. He returned to Sarnia, residing at 146 Essex Street.

> **Charles Marr Paul** was born on June 3, 1894 in Sarnia, the son of George MacPherson and Barbara (nee Cranston) Paul. On September 22, 1914, twenty year-old Charles Paul enlisted in Valcartier, Quebec. He recorded his occupation as laborer, and his next-of-kin as his father George M. Paul, at 149 North Brock Street, Sarnia. Charles Paul became a member of the Canadian Infantry, 8th Battalion, 90th Winnipeg Rifles Regiment, nicknamed the "Little Black Devils". He embarked overseas to England on October 3, 1914, and four months later, on February 9, 1915, he arrived in France. In April 1915, his battalion helped in holding the line during a German poison gas attack at Ypres, Belgium.

Following are portions of two letters that Charles wrote to his mother in Sarnia, the first in mid-April 1915, and the second in late May 1915:

Dear Mother,

Well, mother, we have been over here two months now. We are getting well acquainted with the country... Our company was in the reserve line and the rest in the front line, which was only 40 yards from the enemy at some points... we were open to fire on every side... We got to the position all right without mishap but it sure was dark and foggy as well. I was in a dug out with four other chaps and there was barely room for four, so we were just crowded enough to be uncomfortable. The shelling was by far the heaviest we have seen. They shelled the trenches steadily and dropped shells by dozens all over the show... We lost several men in the trenches... The shrapnel was whizzing above our dugout at time in quite an unhealthy manner. We had to stay right in the dugout and we could not light

fires so the cocoa we took with us and such could not be used. There was a grave just outside our dugout having two German helmets on it, and there were plenty of German rifles and bayonets, etc., lying about. There had been a good many buried altogether too near the surface, and well, everything seemed to stink of bodies. The hot weather was responsible. There was one of the biggest battles of the war fought there about Christmas time, and that accounts for bodies being improperly buried...

My Dear Mother,

I have not had a chance to write you for some time. We have been on the move a good deal and at the firing line and reserves quite a while and they would not take any mail, so of course, I could not write... We are now back for a couple of days rest. We have had another bad cutting up, though some of the other battalions got it worse than us. It has been a very hard place we have. We were up against heavy guns and plenty of them. Big ones that when they burst make holes in the ground ten or twelve feet wide. They threw these shells right into our trenches. One day they kept up a steady bombardment all day and it was a wild old time we had believe me. While in the reserves we were on fatigue burying dead and fixing up trenches which were captured from the Germans. We got little rest. If we were not busy at work we were digging ourselves in the fields to keep out of shell fire...

On July 22, 1915, Private Charles Paul of the 8th Battalion was admitted to No. 3 Canadian Field Ambulance, his medical condition "NYD" (not yet determined), and returned to his unit eight days later. Less than two weeks later, on August 10, he was admitted to 2nd Canadian Field Ambulance, diagnosed with muscular rheumatism. He rejoined his unit only nine days later. In late December 1915, he was attached to Canadian Army Corps Headquarters, and was appointed Acting Sergeant in the field (France).

On October 18, 1916, then Acting Sergeant Charles Paul, was awarded the Meritorious Service Medal (MSM) for helping to save lives during the Battle of the Somme. That same month, he was promoted in the field to the rank of Company Quartermaster-Sergeant (CQMS), 8th Battalion. Sometime in 1916 while in London, England, Charles Paul married his British girlfriend, Miss Frances Williams, of Ryton-on-Tyne, Durham, England.

Returning to the field, he took part with his unit in the April 1917 Battle of Vimy Ridge, and the October 1917 Battle of Passchendaele. In November 1917, Charles was in Shorncliffe, England where he attended an Officers Training Course. The following year, on March 24, 1918, Charles was promoted to Lieutenant, Manitoba Regiment, and taken on strength into the 18th Reserve Battalion. In late September 1918, he returned to the 8th Battalion, and in late-March 1919, he returned to England. On April 26, he sailed from England and returned to Canada. Lieutenant Charles Paul was discharged on demobilization on May 9, 1919 in Winnipeg.

Charles Paul returned to Sarnia with his British bride Frances, and they resided at 149 North Brock Street. Together, they raised eight children: Francis, Robert, Elva, Lillian, Edna, Jean, Edith, Elizabeth and Effie Barbara. Charles Paul worked as a Senior Customs and Excise Examiner at the Ferry Dock in Sarnia. On May 5, 1938, forty-three-year-old Charles Paul was killed in a car accident near Flat Rock, Michigan. He was given a military funeral and was buried at Lakeview Cemetery, Sarnia. On May 15th of 2010, Lieutenant Charles Marr Paul was inducted into the Canadian Veterans Hall of Valour in Carleton Place near Ottawa. Charles Paul is connected to another Sarnia fallen soldier—Petty Officer-Stoker Michael Paithowski, who was a member of the Royal Canadian Naval Volunteer Reserve and is included in the World War II section of this Project on page 915.

> **Garnet David Dawson** was born on June 28, 1894 in Sombra Township, the son of Mr. and Mrs. David Dawson of Sarnia. On September 22, 1914, twenty years old and single, Garnet Dawson enlisted in Valcartier, Quebec. He recorded his occupation as sailor, and his next-of-kin as his father David Dawson, of Mandauman, Ontario. Garnet became a member of the Canadian Infantry, 1st Battalion. He embarked overseas to England on October 3, 1914, and four months later, arrived in France in February 1915. He served in France for twenty months.

In a letter home to his parents, he described the marksmanship of the German soldiers, telling how he held a milk can up on the point of his bayonet and in five minutes the receptacle was pierced by 25 bullet holes. Following is more of his letter:

Life in the trenches is not a pleasant one. We bury our dead and get food supplies into the trenches at night. I must say the Germans are good soldiers. At night the enemy opens fire at our trenches to test our strength, and the violence of fire we return aids them in deciding if they are able to make a successful night attack on us. We have not had our shoes off for 14 days, and we were three days without food. Our losses have been heavy, and out of our company of 250 there are 20 left. I hardly know how it is that I came through. You ought to see this country. It is hard to imagine its true condition. The cities of France are blown to pieces. We succeeded in taking this week three

lines of German trenches, but lost them again in a bitter engagement. The fields that surround us are literally covered with the bodies of dead soldiers. We hope for the end, but we can not tell how long the war will last.

On October 23, 1916 Private Garnet Dawson was admitted to No. 12 Stationary Hospital, Rouen, the result of a "contusion of face (accident)". Still recovering from the injury, on November 2, 1916, he was admitted to the Military Hospital Bagthorpe, Nottingham, and one month later, on December 9, 1916, he was transferred to Canadian Convalescent Hospital, Hillingdon House, Uxbridge. Two months after being injured, on December 22, he was discharged from hospital and returned to his unit. In early June 1917, he became a member of the 4th Reserve Battalion at Hastings, and a month and a half later, was a member of the Western Ontario Regimental Depot at Bramshott. Two weeks later, on August 10, he became a member of the Canadian Forestry Corps at the Base Depot in Sunningdale, Berkshire. Fifteen months later, on November 14, 1918 (three days after the Armistice), Private Garnet Dawson accidentally wounded his right hand and was admitted to the War Hospital, Exeter. He was discharged from the hospital sixteen days later.

Private Garnet David Dawson arrived back in Canada on January 17, 1919 and was discharged in London, Ontario on February 13, 1919 on demobilization. He then resided at 875 St. Claire Avenue, Detroit, Michigan, with his sister Gladys Johnson. He passed away at the age of fifty-eight on December 15, 1952, and is buried at St. John's Anglican Church Cemetery in Windsor, Ontario.

> **Thomas Weston** was born on June 18, 1892 in Birmingham, England. At some point, Thomas and his wife Beatrice moved to Sarnia. On August 19, 1915, the twenty-three-year-old married Thomas Weston enlisted in Sarnia. He recorded his occupation as brakeman, and his next-of-kin as his wife Beatrice of 257 Tecumseh Street, Sarnia. Thomas became a member of the Canadian Infantry, 34th Battalion, and arrived in England on November 1, 1915. On February 3, 1916, he was transferred to the 23rd Battalion at Bramshott, and on May 25, was transferred to the 2nd Battalion, Canadian Infantry. The next day, he arrived with that unit in France.

Approximately three weeks later, on June 13, 1916, Private Thomas Weston was wounded in action during a charge into enemy trenches during the Battle of Hill 60 in Flanders, south of Ypres. One medical report recorded that "he was buried by a fall of earth and on being dug out was hit in the head by a shrapnel bullet which passed through the scalp from side to side... After the injury he was unable to walk on account of pain in the left ankle..." Another report recorded that he "was also hit on right hand by shrapnel." A later medical report recorded that the wounds suffered occurred at Zillebeke, and added that he had suffered a wound from a "bayonet entered at the wrist and came out at the ball of the thumb, left hand".

Private Thomas Weston received initial medical treatment at Pepperinge, 14 General Bologne, France. On June 17, 1916, he was admitted to Bethnal Green Military Hospital in England as a result of his wounds. Seven weeks later, on August 8, 1916, he was admitted to Canadian Convalescent Hospital, Bromley to continue his recovery. He was finally discharged from hospital on August 17, 1916.

In July 1916, Beatrice Weston on Tecumseh Street received a letter from her husband. When he wrote the letter, Thomas was recovering in hospital after having five pieces of German shell taken out of his head. In his letter, he described how they knew the day before they were to charge; of the heavy artillery shelling the night before into German trenches only 50 yards away from them; and "the noise something awful". Following is more of his letter:

I remember getting hit, shrapnel and machine gun fire was flying all around us and Alf bandaged my head up and that was the last I remember. When I was just going unconscious I heard him crying and telling me to cheer up, for he thought I was dying, but when I woke up again I was lying in a dugout in the captured German trenches with German prisoners that were captured. I only knew that I had an awful headache and the Germans were shelling us to beat the band as they were going to try and get the trenches back. It was then I heard the order and again to stand to, for they thought the Germans were going to make a charge, and I knew that if they did my chance was gone, for the trench would be blown up and I knew I would go up with it and the German prisoners. It was then I thought of you, I saw you as plain as if you had been near by with me and for once I said a prayer. I thought I was going to die and then I fell unconscious again for I was bleeding and was very weak through the loss of blood, and the shelling was so hot and heavy that no Red Cross could get up to me. Then I found myself being wakened up by having some rum forced into my mouth.

When I was being pulled out of the trench I saw some dreadful sights. The dead half filled the trench. I was pulled over them as we had to crawl so as the Germans would not see us and my face knocked against the dead. After I got out of the trenches I was put on a stretcher and put into a motor ambulance and with three others taken to the

hospital. I saw them putting dead comrades in shell holes, burying them, 30 in a shell hole. My God, nobody that has not seen or been there does not know and cannot imagine the terrible scenes. There were 30 come through without a scratch out of 150 in our company and as I was being taken to the dressing hospital there were hundreds lying along the road dead.

On September 30, 1916, Private Thomas Weston returned to Canada, having been granted furlough until November 11, 1916. In late-October 1916, he was examined by a Medical Board in London, Ontario. They concluded that he was suffering from an injured left foot, the “result of injury received in a bayonet charge at Zillebeke on June 13, 1916”, along with suffering from the wounds he received in the head and hand. The Board recommended an extension of his furlough for two months (extended to December 11, 1916), and that he be discharged on account of being unfit for service. Thomas was discharged in London on January 11, 1917. His Discharge Paper recorded that: his conduct and character while in service were “very good”; and that “on account of his wounds, was not able to follow former calling as brakeman”. Sometime after his discharge, Thomas and Beatrice Weston resided at 422 Devine Street, Sarnia.

> **Arthur Wesley Crawford** was born on May 4, 1892 in Point Edward, Ontario, the son of George Crawford of 153 Christina Street, Sarnia. On November 2, 1914, twenty-two years old and single, Arthur Crawford enlisted in Toronto with the Canadian Engineers. He recorded his occupation as an electrical engineer, and his next-of-kin as his father George Crawford in Sarnia. At the end of December 1914, Arthur was a member of 2nd Divisional Signals Company, Canadian Engineers. He embarked overseas bound for England and in mid-September 1915 he arrived in France. Six months later, in March 1916, Arthur wrote a letter from France to his father George in Sarnia. In it, he described a typical trip to the front line to repair a phone line. Following is a portion of that letter:

Dear Father,

... We put on our steel helmets, hang our gas masks at the alert position (on our chest) fasten on our linemen's belts and climb the stairs off our dugout into the trench... Keeping your eyes on the cable which is neatly stapled into the wall of the trench we turn up the first communication trench and walk briskly along the raised trench mats... a double row of two by fours, about 14 inches apart... The trench walls are about a foot higher than our heads and the width of the trench varies from about three feet at the bottom to approximately five feet at the top.... Only occasionally can we catch fleeting glimpses of the surrounding country through a shell torn gap in the trench wall. What a bleak desolate country it is. A few battered stumps of trees, a broken pile of white stone and timbers, the remains of a former home, and fields churned and scattered by the constant pounding of first ours, and now Fritz's artillery... As we continue our walk, the trench has lost its neat appearance and we are kept busy stepping over holes in the broken trench mats or picking our way through muddy holes of water... At the entrance of the dugout occupied by the company of signalers... we descend the tortuous, slippery stairs arriving at the bottom, perhaps twenty of thirty feet below ground level and soon come to a bay where we find the signal office... After remedying the phone trouble, we climb up one of the other entrances... and start up a battered muddy trench for the front line. Just then, however, Fritz opens up with his heavy trench mortars and showers our line with “sausages” and “minnies”... As each bomb lands, sandbags and timbers, to say nothing of the dense cloud of smoke and mud, go hurtling skyward. The artillery are called into play... and soon the line is one continuous stretch of smoke and flying debris... The ground trembles with the awful concussion of large bombs and shells and one wonders how anyone can live in either front line.

Later in March 1916, Arthur wrote a letter from Belgium to his mother. Following is a portion of that letter:

Dear Mother and All,

As you know we are once again occupying our old positions on the front, after four weeks rest in France. I am again in the fine steel dugout and it seems just like home to be back here again. When we first came back the ground was white with snow and we had to hustle to keep warm. Now spring has arrived to stay and we are enjoying the beautiful weather... This is a great country for flowers and already, before the leaves have opened out the ground is literally covered with cowslips, mayflowers, dandelions and many other varieties of flowers which I do not know. The hedges and bushes are blooming and the grass is covering the indescribable mud with a beautiful green carpet. Spring is in the air and even the birds are livelier and their calls and songs are a welcome change from the whistling of bullets and the screeching of shells. It seems a pity that these beautiful days should be spent in killing one another.

Fritz spoiled a beautiful afternoon yesterday by presenting us with over a hundred high explosives in an hour or so... I enjoyed the spectacle of the bursting shells from behind a large tree a few hundred yards to one side. It is a sight worth seeing to watch the effect of large shells on the landscape. We have become so accustomed to the sound

of approaching shells that we can tell the size and approximate target of the shell before it explodes. We always know whether it is necessary to dive for the nearest hole or cover of any kind. If no cover is available we simply fall flat just where we are and let the fragments and uprooted landscape whistle by. The "...boxes" burst on percussion and send a column of black smoke, earth, bricks, wire boards, etc, about fifty feet in the air. Fragments of shell, debri, etc., fly for several hundred yards and it is always wise to flatten out when these chaps explode close by. They tear a hole in the ground about ten or fifteen feet in diameter and about six feet deep...

Arthur went on to describe how on the previous night when, "I was out just behind our lines" he experienced a period of enemy gun, mortar and shell fire. Creeping along, he and his partner were able to finish their assigned job before finding "the shelter of our trenches". He concluded his letter with:

...Didn't get back till after two this morning and I was cook today. It is now bed time and I am tired, so will turn in and dream of home and peace.
Lovingly, ART

In April 1916, Arthur wrote a letter to his mother from France. In it, he again described his role in repairing communication lines on the front lines. Following is a portion of that letter:

Dear Mother and All,

It is some time since I have written more than a note so will try to give you some idea of what I have been doing lately. After four weeks rest in France we returned to our position on the firing line. I was again assigned to the dugout for advance linemen. We felt quite at home in the familiar old place and counted ourselves lucky to get back. However Fritz decided that he had been too gentle on our previous visit and tried to liven up things a bit. Every day we had a shower of whiz-bangs and small shrapnel. One fine morning I was peeling spuds in the door of the dugout when suddenly two small shells burst just overhead and I had to fish out several small pieces from the potato pot. I wasn't long in reaching the far end of the dugout where things were quieter.

He went on to describe being moved with an advance party to take over new lines up front:

No sooner had we started out to locate the buried lines than Fritz welcomed us with a heavy shower of shrapnel. I thought my time had come, but managed to reach a shelter of a good dugout and stuck there till the things had quieted down a bit. But Fritz seemed to have an unending supply of ammunition and I couldn't wait all day so during a lull I "beat it" for our new linemen's dugout. Arrived just in time to join a man going out to repair a line. I donned a shrapnel helmet and we set out. We found two breaks in a buried armored cable and while repairing these were told that another line was out. Before returning to our dugout we repaired no less than eight breaks, had several narrow escapes from flying shrapnel, got covered with mud and I decided that I was in for a lively time.

From then on it was almost one continual round and except for a few hours rest snatched as opportunity afforded, I was on the job night and day. We lived on cold rations and tea and ate whenever we got the chance. However, we were extremely lucky in that not one of us was wounded, and most of the breaks occurred during daylight. However, I spent the busiest week of my soldiering career up there and am not anxious to do it again. I can now say that I have actually worked under shell fire and have seen men go down close by.

But my experience is as nothing compared to what some of our infantry went through. I helped out men who had been under almost continuous heavy fire for forty-eight hours standing in water with practically nothing to eat and absolutely no sleep. Some were almost insane, others all crippled with rheumatism, others dazed and few were normal. It must have been "hell." I saw mangled bodies and ghastly wounds, ruined trenches and caved in dugouts but these men lived through the actual making of this awful devastation. Truly they have seen "Hell."

In July 1916, Arthur wrote to his mother again, this time from Belgium. In it, he described his experiences at a special signaling course with a flying squadron. That letter is on page 197 in the section on "Birth of Canada's Air Force". At the end of that letter, he wrote the following:

... Have another bit of good news for you. I heard definitely a short while ago that I had been recommended for a medal, for repairing lines under shell fire. Have little hope of receiving a decoration but it is something to be recommended anyway. My best decoration will be a whole suit of civy clothes after the war is won.

Best to all, Art

In late September 1916, Arthur wrote a letter from France to his brother Willard Crawford of 153 Christina Street, Sarnia. Following is a portion of that letter:

Dear Willard,

Some time ago I promised to write and tell you something about the ground we have gained from Fritz. For the most part, it is still a barren desolate shell swept stretch of ruined landscape, thickly populated by our troops and guns. I have only seen a small part of it on one particular front, but am told that it is all pretty much alike. On my

way up to the front last time, we were camped by a large town, lying just behind our lines and had a good opportunity of visiting the scenes of July's heavy successful fighting. It was a sight never to be forgotten and well worth studying.

First, we visited our old trenches and saw the havoc wrought by German shells, bombs, etc., caved in dugouts and flattened emplacements, told of casualties now forgotten, while everywhere were fragments of exploded shells, to say nothing of hundreds of 'duds' (unexploded) lying in huge shell holes or laid in neat rows by our tommies and labeled "No Bon," "Rip" etc. Everywhere were clips of British cartridges and not a little abandoned equipment. Of course the salvage corps was busy and much of the apparent waste is being used again.

As we advanced across what had been "No Man's Land" we found a profusion of British and German hand grenades, trench mortar bombs, shells and equipment. The barbed wire entanglements of both sides were cut to pieces...

Our trenches were badly battered but were in good shape compared to Fritz's. The awful havoc wrought by our big bombs and shells was indescribable. Everywhere were shell holes over 15 feet in diameter and about ten feet deep. Countless smaller holes to say nothing of whiz-bang and sand grenade 'scratches' had in many places completely obliterated Fritz's line.

However, the sight of the day was one of the huge craters, where we had literally blown Fritz off a hill by exploding a heavy mine. Many of our gallant lads shared the fate of the Germans by rushing this crater before the earth had time to settle. Opinions vary as to the size of this crater but I can tell you that our house would look small if placed in the centre and the roof would be many feet below the ground level. The walls are almost perpendicular and the crater is shaped like a huge bowl set in the earth. A huge circular mound around the lip of the crater and some filled in trenches show the amount of earth which was thrown hundreds of feet in the air and buried hundreds of men as it fell.

Everywhere are the graves of Germans and British, while large wooden monuments mark the resting places of unknown friends and foes buried together. One feature in which Fritz excels us, is in the construction of his dugouts. In some places, he had regular underground homes and had apparently no intention of moving for some time to come. The men's dugouts were well constructed subterranean chambers from fifteen to thirty feet below the parapet. Lined with four inch timbers with tight joints and having several staircase entrances, they were shell proof and very comfortable... Some of the officers' dugouts were engineering masterpieces, and had several stories. The bottom level was safe from anything but gas and every precaution was taken to guard against a gas surprise. Carpets and furniture were not uncommon and all were lit by electricity. The ventilation was excellent and Fritz must miss his excellent homes.

Of course, we have shell proof tunnels and many deep dugouts on our side but they are the exception while with Fritz, they appear to have been the rule. One captured officer declared that they were nine months under construction and he had expected them to last at least nine years...

You have read of the capture of this and that village and no doubt picture to yourself a desperate fight amidst ruined buildings. In many cases that is quite true, but not so during our first advance. I passed through two villages and didn't know that they had ever existed. During our last turn in, I was repairing a line on the outskirts of a captured village, when a chap dodging from shell hole to shell hole yelled at me; "Where is ---- (naming the village). I have been going over an hour and must be lost." He had been wandering about in the village and didn't know it. This is absolutely true and will give you an idea of the effect of long continued shell fire.

Well, I hope I have given you some little idea of what a battlefield is like, but it can only be fully realized by being there when the show is on. The sooner it is over the better for all concerned...

Your loving brother, ART

In early October 1916, Arthur wrote a letter from France to his mother. Following is a portion of that letter:
Dear Mother,

We are out in rest after another long spell up front. Went in for an attack and then after a few days in close reserve were sent in again to consolidate further gains. It has come to be a recognized fact that we advance at each attempt and reverses are not only unexpected but are not tolerated. We must advance so always do. Fritz is powerless to stop us and we are absolutely sure of an overwhelming victory in the not far distant future.

Of course, the losses are great and the hardships endured by the men are such as I thought impossible to bear. Being under severe shell and rifle fire is very trying to the nerves and soon wears a man down, but add to that, the suffering from exposure to rain in flooded trenches (or rather I should say, connected shell holes) with very little to eat and often nothing to drink for a couple of days and you have the hell of warfare. Men have lain wounded for

days in open shell holes soaked by rain and cold from exposure yet have come out smiling. Some are demented and others die. Yet conditions cannot be improved. Even the prisoners lend willing aid to our wounded... Captured doctors work as hard as our own and at such times we are all men and common suffering makes us one.

The spirit of our men was well shown by a new recruit during our last charge. His brother and many of his comrades had been sniped by parties of detached Germans after we had broken their line and he swore that he would take no prisoners. Rushing at one group in a shell hole he determined to bayonet the lot. But the look of fear and suffering on their faces as they stood with uplifted hands was more than he could bear. He gave them his water bottle and lined them up with the next escort passing back with prisoners. It is the same all along the line. Fritz resists strongly until our men reach him and then quits cold. Few men can bayonet an unresisting enemy so, many prisoners are taken.

I have seen over a dozen Germans walking between two Canadians and others with no escort joining in the procession. They are glad to be taken and I don't blame them. For a drink of hot tea they will give anything they have and a cigarette cheers them immensely. They are searched and questioned, especially the first few to be taken, and then sent back to headquarters under escort. Barbed wire enclosures are built a few miles behind the lines and they are herded here and sheltered in tents. Many voluntarily remain in the enclosures and are paid for doing road repair work. They have a very easy time of it and are well fed. I have never seen any of them being overworked and all are well fed and appear to be in the best of health... None are left under shell fire and we sometimes envy them their easy time. They don't even work in the rain...

Well, this isn't news, but then, there is little to tell. Our present billet is the best yet. About twenty of us sleep in the attic of the general's billet. We have to be quiet but it is dry and clean and we are glad to have clean boards to lie on. Expect to move again in a few days but don't know where we will go. Are on the move all the time when out of the line. It is hardly what I call a rest, but it is at least an agreeable change...

Lovingly, Art

During the war, Arthur Crawford of the Canadian Engineers, 2nd Divisional Signal Company, was promoted through the ranks from Corporal to Lieutenant. In September 1916 near Courcellette, Corporal Arthur Crawford and four of his comrades were recommended for Military Medals and Bars (that were awarded in October 1916). The war diary records that the award was in recognition of "Battalion lines being kept up by hard work on part of linemen".

In late June 1917, Lieutenant Arthur Crawford was admitted to #4 Canadian Field Ambulance, followed by transfers to #22 Casualty Clearing Station, then #7 Stationary Hospital in Boulogne, and then Mrs. Mitchesons Hospital. He had suffered a sprained right ankle with deep-seated haemorrhage while playing baseball (or football) in France. While in hospital, he was also diagnosed with trench fever with pain and irregular temperature. He was discharged from hospital one month later, and in late July 1917, Arthur was granted a two-month furlough to Canada.

After spending a year-and-a-half fighting at the front, Arthur Crawford arrived home in Sarnia in September 1917. The long voyage home greatly benefited his health. During his time overseas, he had been slightly wounded once by shrapnel (left eye and right hand); his services were recognized with a Distinguished Service Medal; he had been promoted in the field; and he had been awarded a Military Medal and Bar for conspicuous bravery. Arthur Crawford survived the war, was permitted to resign and was struck off strength in Ottawa in March 1918. Nine months later, in December 1918 in London, he was diagnosed with a "nervous debility," that had originated in May 1917 while on Active Service in France. Symptoms included sleep difficulties, lack of concentration and mood problems. After his discharge, Arthur Crawford resided in Hamilton, Ontario.^{F, N, 2G}

> **Stanley John Smith** was born in Harrow, Middlesex, England on May 4, 1895, and at some point he immigrated to Sarnia. On September 24, 1914, nineteen years old and single, Stanley Smith enlisted at Valcartier, Quebec. He recorded his occupation as switchman, and his next of kin as Mrs. F.G. Smith of 302 Christina Street, Sarnia. On October 3, 1914, Stanley embarked overseas from Quebec bound for England as a member of the 7th Battalion, Canadian Infantry. Four months later, on February 9, 1915, he arrived in France.

In early March 1915, Private Stanley Smith was at Sir Henry Norman's Red Cross Hospital, in Wimereux, France, recorded as sick with a skin lesion with abscess on his right forearm. He would be hospitalized at a number of locations including: No. 14 General Hospital in Boulogne (recorded as "Supportive Lympha-Demitis"); was then transported to England and hospitalized in Hornbrook Hospital in Chislehurst; then Royal Herbert Hospital in Woolwich; and then Canadian Convalescent Hospital in Monks Horton. On February 28, 1916, he was admitted to Canadian Convalescent Hospital, Bear Wood Park, diagnosed with "Lupus right arm". He was discharged two months later on April 26, 1916, and assigned to the Canadian Casualty Assembly Centre (CCAC). On May 17, 1916,

he was admitted to Canadian Convalescent Hospital, Woodcote Park, Epsom, diagnosed with “lymphargitis, right arm”, and was operated on there (Note: diagnosis was possibly lymphadenitis). He was discharged from hospital on June 2, 1916, and transferred into the 30th Reserve Battalion. In late August 1916, he returned to the front lines in France, rejoining his 7th Battalion.

In September 1916, the twenty-one-year-old Private Stanley Smith, “a well-known local young man”, wrote a letter from France to his friend in Sarnia. Following is a portion of that letter:

Dear Friend,

As I have a few minutes to push the “graphite,” I will now endeavor to tell you what I have been doing lately, since coming back to this country again. I have not seen much difference. It seems that the war is on for the end of the world. The same old mud, shell holes, and lice... I could not write it down what our guns sound like, but it’s nothing but a continual shriek and bang all the time. A few nights ago I went up the trenches with a load of water and everything was quiet. All you could hear was the horses’ hoofs in the mud and the suction when pulling them out again. There was a concealed gun beside me, then it went off, and I thought it was an earthquake. This must have been a signal, for the heavens were lit up with flashes and you would think hell was let loose...

... Gun carriages, ambulances, rifles, shells and other munitions of war are piled up mountains high. Yesterday the roads were terrible to make headway. Nothing but shell holes and mud. In some places the mud was nearly to your waist, and the funny part of it, I could not ride a horse, so I had to walk. I was ready to return to my billet when Fritz started putting shells over my head, and there are other things I am more enthusiastic about than those whiz-bangs, as we call those shells. At last they got to dropping uncomfortably near me, and I’ve said before, I could not ride a horse. I know more about a fish hatchery than I do a horse, but the driver suggested for me to get on the horse’s back.

So I took a “stab” at it. I led the horse up against an old gun and tried to mount, but either the old gun moved or the horse, for I was in the mud and in it good and deep. I tried it again, and succeeded, but I don’t think I know what happened then, for Fritz used a shell for a whip and that horse started down that dirty old shell ridden muddy road. I was clinging first on one ear and then the other. After we went a quarter of a mile the mud got the horse’s “goat” and he slackened down, and I found out that by just sitting there I could keep on, so I got back safely. But today I feel stiff: something is strangely wrong, for I can’t remember where I sat on a red hot stove yesterday. I can hardly sit down. Maybe it’s the food and then maybe it’s the – horse...

... Well, I will have to draw this to a close as I’ve got lots of letters to write. I met lots of Sarnia boys and they are all well. Give my kind regards to the boys. I am, yours sincerely,

Stanley Smith, Seventh Bat.

Private Stanley Smith was wounded and hospitalized at least twice while in France: on August 16, 1917, he received a “gun shot wound left knee” and was admitted to No. 18 General Hospital, Camiers; and on September 5, 1917, he received a “gun shot wound nose” and “gun shot wound left leg, enemy aircraft” and was re-admitted to No. 18 General Hospital, Camiers. In early November 1917, he was transferred to the Canadian Labour Pool, and two months later, on January 12, 1918, was transferred to the Headquarters of the Canadian Forestry Corps in France.

On October 14, 1918, Stanley was promoted to the rank of Corporal, and later that same month, he would be granted permission to marry his fiancée Mary, of Pinner, Middlesex, England. The Great War ended less than a month later. On January 31, 1919, Corporal Stanley Smith was admitted to Canadian Convalescent Hospital, Bear Wood Park, diagnosed with “neurasthenia, debility”. On February 14, 1919, he was discharged to the Base Depot in Sunningdale, Berkshire, and five months later, in early July 1919, he returned to Canada. Corporal Stanley Smith was discharged at No. 1 District Depot, struck off strength on demobilization, on July 12, 1919. After his discharge, he resided at 302 South Christina Street, and later moved to 351 Russell Street, Sarnia.

> **Leslie Ernest Boulton** was born in Oil Springs, Ontario on September 22, 1886. At the age of twenty-eight and single, Leslie Boulton enlisted in Sarnia on October 27, 1914. He recorded his occupation as carpenter, and his next of kin as his mother, Mrs. Richard Boulton, of 304 Front Street, Sarnia (her address later changed to 365 Maria Street, then 168 Napier Street, Sarnia). Private Leslie Ernest Boulton embarked from Halifax on April 18, 1915, bound England as a member of the 18th Battalion, Canadian Infantry. Following is a portion of a letter that Leslie wrote to his mother and sister in Sarnia in mid-June 1915, while he was training in England:

We have a big English instructor for an hour every day and believe me when he gets through with us we are all sweating. Then we have bayonet drill every day. We have spring bayonets, pads, masks and gloves and go for each other like a German and a Britisher, lots of fun and you can’t get hurt. I had two goes today with Stan

Musselman, my chum. We have lots of hard work but the officers are a good sort and give us lots of fun.

Private Leslie Boulton of the 18th Battalion, "C" Company, was promoted to Lance Corporal on September 11, 1915, and four days later, he arrived in Boulogne, France. Leslie Ernest Boulton was promoted in rank a number of times during his service: on March 4, 1916, he was promoted to Corporal; and later on the same day, was appointed Lance Sergeant, in the field. Three months later, on June 6, 1916, he was promoted to Sergeant, again in the field (when their Sergeant was killed). Sergeant Leslie Ernest Boulton received the Military Medal for bravery in the field, awarded July 9, 1917.

On September 15, 1916, Sergeant Leslie Boulton was wounded in action—a bomb wound to the right eye. He was initially treated at No. 4 Canadian Field Ambulance, and the next day at 1st Australian General Hospital in Rouen (recorded as "gunshot wound eye"). Four days later, on September 20, he arrived at Canadian Convalescent Base Camp in France. While recovering from his wound at the Base Camp, he wrote a letter to his mother, Mrs. Richard Boulton in Sarnia. Following is a portion of that letter:

Dear Mother,

I have just been discharged from Hospital. I was wounded by a piece of a bomb on the 15th, and was in hospital three days, so you know the wound wasn't very bad. I expect to be back with the battalion in the course of a few days. The piece of bomb hit me just over the right eye. Old Hienie thought he'd play a prank on us and waltzed over and took our front line. Well, we just kicked him out and went right back and took two of his. We sure had some fun. Four of his bombs hit within ten feet of me and a little piece of the last one got me, but it's not very bad. ... I wish they would sell all the big guns on both sides and let us go at it with rifle and bayonet. It would soon be over... Funny thing that I was wounded on the anniversary of my landing in France. Well, such was the case. Was a year in France all but two hours, when I was wounded. I am fit as a fiddle string, only my eye is a little sore...

Write soon and let me know all the news. With love, "LESS"

After recovering, Leslie was discharged to the Base Depot in Harfleur, and rejoined his unit in the field on October 1, 1916. Seven months later, on May 7, 1917, Leslie Boulton was despatched back to England to undergo training for commission in the Canadian Infantry. He completed his Officers Training Course at Bramshott in early-September 1917, and was taken on strength into the 4th Reserve Battalion, assigned to be Temporary Lieutenant. He then proceeded to Bramshott, and returned to France on November 23, 1917, and four days later, re-joined the 18th Battalion.

Seven months later, on June 29, 1918, he was admitted into hospital due to influenza. Three weeks later, on July 18, 1918, he was transferred to No. 20 General Hospital, Camiers, where he remained in hospital into early August. He was discharged to the Medical Board Depot, and rejoined his unit in the field on August 7, 1918.

Leslie Boulton survived the war, returning to England on April 4, 1919. One month later, on May 13, 1919, he sailed from Liverpool and returned to Canada. On May 25, 1919, Lieutenant Leslie Boulton of the 18th Battalion, was discharged in London, Ontario, struck off strength on demobilization. Leslie Boulton returned to his home in Sarnia. He passed away in 1968 at the age of eighty-one, and is buried in Lakeview Cemetery, Sarnia.

• **THE BATTLE OF ST. ELOI**, Belgium, March 27-April 16, 1916: This was the 2nd Canadian Divisions first major engagement of the war and it would end in disaster and defeat. On March 27, British forces opened up an artillery barrage and exploded a series of powerful underground mines beneath the German defences. One the largest mines detonated during the war was at St. Eloi on March 27, and it was dug by the 1st Canadian Tunnelling Company, containing 43,400 kg of explosives. The enormous mine explosions were heard in Folkestone, England, and caved in trenches and created seven massive mud-filled craters, dozens of smaller ones and impassable lakes in No Man's Land.

For one week at St. Eloi, British and German troops were engaged in savage fighting in a struggle to occupy the tactically important craters. On April 3, the inexperienced and ill-prepared Canadians relieved the exhausted British, to find a shortage of steel helmets, machine guns and few trenches in which to take cover (and most of those were waist-deep in water). After experiencing two days of enemy shelling, a Canadian Private described the scene: *"When day broke, the sights that met our gaze were so horrible and ghastly that they beggar description. Heads, arms and legs were protruding from the mud at every yard and dear knows how many bodies the earth has swallowed. Thirty corpses were at least showing in the crater and beneath its clayey waters other victims must be lying killed and drowned."*

On April 4, ordered to take over the series of mine craters, the relatively untried 2nd Canadian Division were

sent floundering into a sleet-swept, shell-pocked moonscape where no one knew which crater was which, or how many there in fact were. Told that they were to occupy seven craters, they instead found more than thirty, and ended up fighting for objectives that no one could identify.

Through two weeks of hard fighting while dealing with thigh deep mud; incessant rain; poor communication; a lack of coordination and reconnaissance; and superior positioned German artillery; the Canadians attacked and counterattacked in attempts to capture the various craters in the muddy wasteland. Complete bewilderment prevailed on the front as Canadian leadership often had little idea which craters they held and which were held by Germans. Another Canadian soldier wrote to his wife describing the horrific conditions, *"We were walking on dead soldiers and the worse was they was (in) about three feet of mud and water. I saw poor fellows trying to bandage their wounds, bombs, heavy shells falling all over them... it is the worst sight that a man ever wants to see."*

When the **"Battle of the Craters"** was over, the Germans maintained control of the battlefield, and more than 1,370 Canadian soldiers were killed or wounded. At least one young man from Sarnia gave his life at the Battle of St. Eloi: Private Angus Garrod, age 28, of the 18th Battalion. His story is included on page 284. ^{2I, 2N, 3Q, 4G, 8O}

• **THE BATTLE OF MONT SORREL**, Belgium, June 2-13, 1916: In the summer of 1916, the 30-metre hill Mont Sorrel was the last remaining high ground in the Ypres salient still in British hands. On June 2, the Germans attacked the Canadian lines (held by the newly arrived 3rd Division of the Canadian Corps) with a crushing bombardment, one of the most staggering of the war to date; detonated mines they had dug beneath the Canadian positions; and followed with an overwhelming infantry attack. The German attack resulted in the killing of hundreds of Canadian troops and they captured Mont Sorrel and two surrounding hills (Hill 61 and Hill 62). A hastily organized Canadian counter-attack at dawn on a rainy, windy June 3rd failed. From June 3 to 6, the two sides had dug in, and with the steady fall of rain, high explosives, shrapnel, and gas adding to the misery, little was achieved other than more casualties. On June 6th, the Germans exploded four mines under the Canadian positions, and almost two entire companies, some 300 men, were wounded, buried alive, or taken prisoner. The Germans also unleashed a heavy shellfire and mortar bombardment, then rushed forward, capturing the village of Hooge.

The Canadian counter-attack, under Lieutenant General Sir Julian Byng, began on June 9. From June 9 to 12, the Canadians laid down four days of heavy bombardments in preparation. In the very early morning hours of June 13, under the cover of darkness, pushing through wind, rain and mud, and supported by artillery, Major-General Arthur Currie's 1st Canadian Division charged the German front lines. Desperate fighting ensued and the Canadians drove the Germans back to their original lines, and recaptured much of the lost ground. The Germans responded with massive counterattack barrages several times over the next two days, and despite more carnage, the Canadians held their ground, recapturing Mont Sorrel.

George Adkins, a Canadian infantryman from Alberta, was the youngest of three brothers who fought in the war. One of the brothers, Bill, had been killed in action in May 1916. George and his brother Martin would both fight together in the Battle of Mont Sorrel. In early June 1916, George wrote a letter home to his mother in Alberta describing his experiences at Mont Sorrel:

Dear Mother,

Just a line to let you know that we are both alright for which we must thank God for we have been through a terrible ordeal. I don't know if I am allowed to say much about it but you will see by the papers what a fierce fight the Canadians have been into. How Mort & I came through without a scratch I can not tell as we have had terrible losses. It has been simply awful I cannot describe it in words but I know there has been nothing worse in this war. He described being bombarded "pretty heavy," then coming out of the line for a rest before having to return the next night when the enemy broke through. We had to make a charge in broad daylight but they were ready for us and opened up an awful fire on us we took what cover we could get in old trenches and were there all day. They opened up again two or three times in the night but we kept them back. That night we were supposed to be relieved but the relief could not get in so we had another awful 24 hrs, during which they sent over the terrible high explosives & shrapnel but we held firm. Two or three times they nearly landed one in our trench. The force of the explosion threw us down and I couldn't hear nothing but ringing in my ears. I was hit on the head about four times but my steel helmet saved me. Then I had a bullet go right through a mess tin strapped on my back... But I wasn't very frightened although the strongest nerves couldn't stand it for long while the shells are bursting around & above. We had to stay in that trench for 8 hours without water & no food but about two dry biscuits each. It was up to our shoe tops in water and we got all stiffened & cramped up. We were thankful when the relief came at last... We were so tired when we got home that we just fell down and slept for a long time...

Good by with love, George

In late June of that year, Martin Adkins was killed in action. Officials then moved George Adkins out of the front lines. He survived the war.^{7A}

Over the two weeks of fighting at Mont Sorrel that resulted in almost no change in the ground held by both sides, the “**June Show**,” as the battle was known informally, came at a cost of 8,700+ killed, wounded or missing Canadians (more than 1,100 were killed).^{4F} The important lessons learned in this Canadian victory—including the need for detailed planning, and the need for cooperation between the infantry and the artillery—became hallmarks of Canadian operations over the next two and a half years. At least two young men from Sarnia gave their lives at the Battle of Mont Sorrel: Private James Allan, age 28 and Private Thomas Littlefield, age 19.

• **SOME OF SARNIA’S WOUNDED COME HOME:** In late August and again in early September 1916, the *Sarnia Observer* included a number of stories on some of Sarnia’s wounded boys who had returned home. Following are portions of some of those stories:

Friends Welcome Returned Soldier

*Russell Street in the vicinity of the home of **Private George Dickenson**, was thronged with citizens Saturday evening, when Private Dickenson arrived home from active service. Private Dickenson went overseas with the Third Contingent, in the 34th Battalion and was invalided home after being fifteen months in the trenches.*

Pte. Dickenson was welcomed by Mayor Thomas Doherty, Albert J. Johnston and a host of friends. He was driven to his home with his wife, who had gone to London to meet him, by Mayor Doherty, in his automobile and was royally greeted when brought to the house.

“I am glad to be home again,” he said. “Fifteen months in the trenches without a day’s leave of absence was a hard stretch.” Pte. Dickenson said that he had been through many “brushes” with the enemy, but was fortunate to escape without a wound. The continual grind in the trenches has affected his heart and lungs, which necessitated his being invalided home.

Pte. James Bohannan Given a Welcome Home

*About five o’clock yesterday afternoon a telegram was received here from military headquarters at London stating that **Private James Bohannan** and Private C. O’Connor, two Sarnia returning soldiers would arrive here at the tunnel station at 7:30 p.m....*

When the train pulled into the depot the only soldier on board was Private Bohannan, accompanied by his brother Oscar and a number of friends who had gone to London to accompany him home to Sarnia. Private Bohannan and his relatives who had gathered at the depot were placed in S.L. McKay’s automobile and driven to the city followed by the other motor cars containing citizens who had turned out to welcome the young soldier home. As the auto parade traversed the city streets to Front street the young hero was greeted by the applause of many citizens whose attention was attracted by the screeching of the different auto signals. The parade continued up Front street to George, east to Christina and south to the young soldier’s home at the corner of Christina and Lochiel streets. Quite a large crowd of citizens had gathered here and Private Bohannan was greeted with many a hearty handshake. Later in the evening the Sons of Scotland Kilties band paraded the streets and serenaded Private Bohannan at his home.

Private Bohannan is a son of the late Quarter-Master Sergeant John Bohannan. He enlisted in the 18th Battalion and left London for overseas with that unit. Private Bohannan was married while in England shortly before going to France to Miss Ethel Cobb, daughter of the late Rev. and Mrs. Cobb of Hythe, Kent, England. Mrs. Bohannan returned to Canada with her husband on the Metagama, arriving in Sarnia with her baby Sunday last.

In conversation with an Observer representative later in the evening Private Bohannan told the story of “his bit” in a quiet unassuming matter. “I had been in the trenches around Ypres for six weeks, off and on, when Fritz ‘got me.’ It was just before the big battle at Ypres. Our guns had been bombarding the German lines since daybreak. The enemy opened up a retaliatory bombardment of our positions and about 11 o’clock a shrapnel shell hit about 20 feet behind our first line trench. Myself and two chums got the benefit of it. One was killed outright, and the other two of us was wounded. I found that I couldn’t use my left arm and I also had a stinging pain in my left leg. Finally I had to lay down in the trench and wait for the ambulance. The bombardment was getting more intense all along and we had to wait till dark before any of the stretcher-bearers could get near us. Just at dark they appeared, and then started the roughest ride of my life. Every little while the Germans would send up a flare of light and their gunners would try to pick off anyone they saw in the open. So throwing themselves flat to the ground when the flares appeared, and scrambling in and out of shell holes and ditches and over obstacles, they finally managed to get us to the dressing station. From there we were sent to the base hospital, and from there later to England. My chum was not as badly wounded as myself and was shipped across to England the next day, and was lost when the hospital ship

Anglican struck a mine or was torpedoed by the Germans. I received good care in the English hospitals, had three operations on my arm, and am now in pretty good shape. I have seen a good slice of the world, had lots of experience, but am glad to get back to Sarnia."

James Joseph Bohannon had been born in Sarnia on March 31, 1887. At the age of twenty-seven, James enlisted with the 18th Battalion, Canadian Infantry on October 29, 1914. He stood five feet four inches tall; had grey eyes and fair hair; was working as an iron moulder (Harriston Stove Works) at the time; and recorded his father John Bohannon at the Northern Hotel in Sarnia, as his next-of-kin. Private James Bohannon arrived in England aboard the *SS Grampian* in late April 1915, and arrived in France on September 15, 1915.

Less than two months later, on November 4, 1915, James was wounded and then admitted to hospital recorded as "GSW to his left arm and leg." It was later recorded as shrapnel wounds left arm and leg, and a fractured left humerus. He remained in hospital in Boulogne, France for six weeks, then in hospital in England until early August 1916, when he returned to Canada. In late October 1916, James Bohannon was officially discharged from the CEF, "being no longer physically fit for service (the result of his wounds)". James and his wife Ethel Bohannon resided at 188 ½ Christina Street in Sarnia, and later on Ellis Avenue in Windsor, Ontario. James Bohannon, at age 69, passed away in Windsor on November 22, 1956.

The front page of the September 1, 1916 *Sarnia Observer* featured the headline: *Sarnia Honors Her Returned Soldiers – Fourteen War Heroes Given a Public Reception*, with the subheadings: *Thousands of Citizens Turn Out to Welcome the Boys in Khaki* and *Monster Street Parade Followed by Speeches at Victoria Square*. Following is a portion of that report:

That Sarnia citizens honor the soldier boys who have returned from active service after doing their bit for King and Country was amply demonstrated last evening when the people of this city turned out en masse to welcome home some fourteen returned heroes – Sarnia boys who have either been wounded while on active service or invalided home on account of being incapacitated and unfit for further service at the front. The turn out was without exception one of the largest and most enthusiastic ever witnessed in Sarnia. From the Market square, where the street parade formed up to Victoria Square where the speeches were given the principal streets were thronged with citizens all anxious to show by their presence that they honor the soldier boys.

As the procession wended its way along the streets, the returned heroes were greeted by cheers and applause to which they modestly responded by a salute. As the parade passed along the south end of Front street, the steamers at the wharves and those passing up and down the river added their quota to the celebration and the salutes from every whistle seemed to indicate that each boat captain was endeavoring to demonstrate that his particular boat whistle could send forth the loudest blasts as a welcome to the boys that were being honored. The refrain was taken up by the hundred or more automobile drivers and the screeching of the auto horns added to the welcome to such an extent that the bands could not be heard and the cheering of the people was completely overcome....

The parade group included the Sarnia Citizen's Band, Italian citizens with British and Italian flags, Boy Scouts, Sons of Scotland, Kiltie Band, Home Guards, Orange fife and drum band, Young Men's Patriotic Club, M.P. F.F. Pardee, Mayor Thomas Doherty and other civic dignitaries. One of the speakers who addressed the gathering was John Farrell—following is a portion of his speech:

It gives me unusual pleasure to join with the citizens of Sarnia tonight in honouring these men who have done their bit for King and Country. We are proud of the record these men have made. We say all hail to these noble soldiers who have offered their lives to protect your home and your liberty. We hope that time will soon restore them to health and the fine physique they formerly enjoyed. These boys possessed the real courage and convictions of the Canadian soldier. They did not fight in vain and they did their bit as only Canadians can be relied upon to do. The doors of Sarnia citizens are open to them and their future is assured. The goodness of the hearts of the people of this community will see that these men are well looked after for the balance of their natural lives. This country is big enough to see that all our wounded soldiers are protected throughout their lives. I have been requested to announce that a number of gentlemen will pass among you and take up a collection to send some comforts to the Sarnia boys who are in the trenches beyond the sea...

The *Observer* report also included a list of the returned heroes:

Corp. Cecil Manning, wounded at Givenchy

Lance Corp. C. Blake, invalided home

Private Patrick Carolin, wounded at Ypres

Private Hugh Fleming, wounded at Ypres

continued over...

Private J. Martin, wounded at Givenchy
Private George Dickenson, invalided home
Private Wm. Lethbridge, wounded at Givenchy
Private John Lethbridge, wounded at Ypres
Private Harry Cattell, wounded at Ypres
Private T. Ewings, wounded at Langemarck
Private J. Cain, wounded and gassed at Ypres
Private Charles Doughty, gassed at Ypres
Private J.W. Jenness, wounded at Ypres
Private Wm. Ross, injured in mechanical transport wreck

• **THE BATTLE OF THE SOMME**, France, July 1-November 18, 1916: Over the four and a half months, thousands of British, Canadian and French troops would hammer German defence lines north of the Somme River in one of the most futile and bloody battles in history. Known as the “**Big Push**,” this operation was twofold: to relieve pressure on the French who were defending Verdun to the south; and to finally break through the German lines – it was not to be.

The Germans had long anticipated an attack here—their defences were among the strongest on the whole Western Front. The front line consisted of a complex of trenches, lines of barbed wire and fortified strongpoints with deep dugouts to shelter troops from artillery fire. A good distance behind this, there was a second defensive line, and in places a third behind that. For months prior, the Germans had been heavily fortifying the trenches, towns and villages in the Somme region. Leading up to the attack, the British carried out a week-long artillery attack, launching over 1.7 million shells on the German lines, the largest bombardment to that point in the history of warfare.^{4F, 10Q}

A week before the first day attack, a Canadian Lieutenant wrote in his diary, “*Everyone seems so cool about it all, quietly preparing for what is going to be the greatest attack in the history of the world... We only hope that it may be a very strong factor in bringing an early end to the war.*” The Lieutenant would be killed two weeks later by a German shell.

British Second Lieutenant John Sherwin Engall wrote a letter home to his parents on the day before the attack. Following is a portion: “*I’m writing this letter the day before the most important moment in my life... The day has almost dawned when I shall really do my little bit [for] the cause of civilization. Tomorrow morning I shall take my men—men whom I have got to love, and who, I think, have got to love me—over the top to do our bit... I took my Communion yesterday with dozens of others who are going over tomorrow... I have a strong feeling that I shall come through safely; but nevertheless, should it be God’s holy will to call me away, I am quite prepared to go... and you, dear Mother and Dad, will know that I died doing my duty to my God, my Country, and my King. I ask that you look upon it as an honour... I wish I had time to write more, but time presses... I fear I must close now. Au revoir... fondest love to all those I love so dearly...*” Second Lieutenant Engall was killed in action the following day.^{10Q}

On July 1, 1916, the Battle of the Somme began at 6 a.m., with an hour-long artillery bombardment of German positions, followed at 7:20 a.m. by the detonation of 18,000 kilograms of explosives in a tunnel dug under an important German stronghold. At 7:30 a.m., after the long drumfire barrage of shells reached its crescendo, silence fell. Whistles blew and thousands of Allied troops left their trenches and slowly walked shoulder-to-shoulder across No Man’s Land in broad daylight toward the well-trained and well-entrenched German positions to open the Battle of the Somme. The result would be slaughter—more than 57,000 British and Commonwealth soldiers were killed, wounded or missing—the heaviest combat losses ever suffered by the British Army in a single day. Over 19,000 of these casualties were killed on July 1. After the initial battle, General Sir Henry Rawlinson, commander of the British Fourth Army said, “*I do not think that the percentage of losses is excessive.*” Urged on by the French, the British continued attacks through another five months.^{D, 2E, 2N, 4F, 10Q}

The 1st Newfoundland Regiment at the Battle of Beaumont-Hamel: Part of the opening phase on that first day of the Battle of the Somme, July 1st, 1916, involved the 1st Newfoundland Regiment at the Battle of Beaumont-Hamel. The same Newfoundland Regiment had been the only unit from North America to fight at Gallipoli from September 1915-January 1916.

On July 1, 1916, officers of the Newfoundland Regiment were in headquarters when the attack was launched at 7:30 a.m. They witnessed the early carnage as soldiers who only seconds before had gone over the top began falling back into the front-line trench in unfathomable numbers. At 8:45 a.m., the Newfoundlanders were set to

advance on the enemy, from their reserve trenches (nicknamed **St. John's Road**), not the front line trenches (the linking trenches were clogged with dead and wounded bodies). It would have been evident to the Newfoundlanders waiting in the reserve trenches that things had not gone as forecast in the initial assault—the alarming, unceasing clatter of the German machine guns, and the sight of their own forward trenches full of wounded men streaming back, served ample notice of this.

Leaving their trenches armed only with rifles and bayonets at 8:45 a.m., silhouetted against the skyline, they were the only battalion advancing in the sector. The approximately 800 men of the Newfoundland Regiment were expected to traverse more than 200 metres of open ground in full view of the waiting enemy, and then a further 500 metres downslope of No Man's Land through barbed wire. As the Newfoundlanders advanced through the hail of machine gun and artillery fire, they were cut down like cordwood, many fell before reaching their own front line.

There was an apple tree partway down the slope that marked the spot where German fire seemed to become particularly intense. This gnarled tree was nicknamed the "**Danger Tree**" by the Newfoundland troops. It marked the spot where barely a handful of men reached and many of them would fall that morning. The petrified "Danger Tree" remains there today, a monument to the fallen at Beaumont-Hamel. The 1st Newfoundland Regiment was virtually wiped out in less than half an hour, with 710 killed, wounded or missing, a casualty rate of approximately 90% (approximately 320 were killed, died of wounds or missing and presumed dead).

Enemy shelling continued through the day, and any of the wounded in No Man's Land who moved were gunned down by snipers. One survivor described the aftermath, *"Some chaps who were wounded struggled to get back to our lines. Some of them made a good job of bandaging their wounds and stopping the bleeding and others just lay there and let themselves bleed to death. A few badly wounded, or with painful wounds, just cut an artery and died. Guess when they were not rescued the first night, they could not take it, the poor fellows."* The Newfoundland Unit diary recorded, *"During the night and evening, unwounded survivors managed to crawl back to our lines and by next morning some 68 had answered their names..."* After the battle, a senior staff officer told the Newfoundland prime minister, *"It was a magnificent display of trained and disciplined valour... and its assault only failed of success because dead men can advance no further."* For its efforts at Beaumont-Hamel, the Newfoundland Regiment was renamed "**The Royal Newfoundland Regiment**" by King George V on November 28, 1917. It was the only regiment to have the prefix "Royal" attached to its name during the war.

Every year since 1917, in Newfoundland and Labrador, July 1 has been observed as Memorial Day in commemoration of the wartime sacrifices of members of the armed forces of the province, particularly for their sacrifices at Beaumont-Hamel. The **Beaumont-Hamel Newfoundland Memorial**, located in Northern France and opened in 1925, commemorates Newfoundlanders who fought in the First World War, particularly those who have no known grave. The site is dominated by the Newfoundland Regiment Memorial itself: a bronze caribou stag (the emblem of the Royal Newfoundland Regiment) atop an outcrop of granite and shrubs native to Newfoundland. The majestic stag, with head thrown high in defiance, faces the ground across which the battalion advanced on July 1, 1916. ^{D, 2E, 2N, 6Q, 8O}

The Battle of Flers-Courcelette: This was the second major offensive of the Battle of the Somme. It began on September 15, 1916, and would last one week. Along with the new creeping barrage tactic, another new weapon – code-named "**tanks**" made their first appearance in the war here.

Urged on by the then First Lord of the Admiralty, Winston Churchill, these new armoured land cruisers were meant to overrun enemy defences, crushing barbed wire, trenches, and shell holes. The 28-tonne British Mark I tank was a lumbering monster, almost 4 metres wide, 2 metres tall, and 8 metres long, but pitifully slow (as slow as a walking person), and was mechanically unstable. Soldier operators inside the metal coffins were almost rendered unconscious by the petrol exhaust that flowed into the stifling, confined space that heated up to 40 degrees Celsius or higher. The machines shook and the noise inside was deafening. Visibility was restricted and so was communication with the outside world. Forty-nine tanks would be committed to this battle, and the Canadians would have six to support their main thrust.

The tanks were a surprise to the infantry, who had received no warning about this secret weapon. Of the six tanks allotted to the Canadians, three got stuck in the mud and one broke down. Despite their unreliability, the tanks inspired shock and terror in the hearts of the enemy. The British later developed Mark IV "male" versions that carried two 6-pounder guns and four machine guns, while "female" versions carried six machine guns. All tanks were individually named, like naval vessels. Later in the war, even "dummy tanks" were used to deceive the enemy.

Usually constructed of wood, the dummy tanks were nicknamed “John Collins”, and were meant to fool German observers and draw enemy artillery fire.^{E, 4F}

The Somme battlefield on September 15 was a wasteland of ruined farmers’ fields—a quagmire of water-filled shell holes and acres of unburied corpses. The British had been fighting there for three months, trading more than 250,000 men for less than 8 kilometres of German trench systems. In the early morning hours of the 15th, following an artillery “creeping barrage”, the five first-wave Canadian battalions, which included the 18th Battalion (Western Ontario), swarmed over the top and into No Man’s Land. They became stranded in the open, forced to inch forward on their bellies, moving from crater to crater, past the wounded writhing in agony, and frequently using corpses for cover. The battle went on for several hours, and was supported by six of the armoured tanks. Casualties mounted in staggering numbers, and counter-attacks were successfully repulsed, yet the Canadians prevailed, able to capture hundreds of prisoners and the ruined village of Courcelette.

The Battle of Flers-Courcelette officially ended on September 22nd. It was a stunning success for the Canadian Corps, advancing 3,000 yards, a huge gain by the standards of 1916, but at a cost of over 7200 Canadian casualties in one week.^{4F, 5J} At least seven young men from Sarnia gave their lives on the Somme battlefield during the Battle of Flers-Courcelette including; Robert Batey, Charles Howe, Andrew McIntosh, James Norwood, Norman Towers, Robert Wade and Bertrand Weatherill.

Walter George Ewener was born in Bexley Heath, Kent, England on September 30, 1879. Walter and his family immigrated to Sarnia in the early 1900’s. On January 18, 1915, thirty-five-year-old Walter Ewener enlisted in Sarnia, becoming a member of the 34th Battalion. He recorded his occupation as (construction) engineer; his next-of-kin as his wife, Phyllis Elizabeth Ewener; and their address as 300 Campbell Street, Sarnia. Private Walter Ewener embarked overseas on October 23, 1915, arriving in England on November 1, 1915. He would advance to the rank of Corporal, and was a musketry instructor in England from March to September 1916. In September 1916, he reverted to the rank of Private, at his request, in order to proceed to France. In late-September 1916, Private Walter Ewener arrived in France as a member of the 43rd Battalion, Canadian 3rd Division.

In late November 1916, the *Sarnia Observer* printed a letter written from Corporal Walter George Ewener, 43rd Battalion, B.E.F., France, Stationary Hospital, addressed to the editor of the *Observer*. Following is a portion of that letter:

I am taking this opportunity of writing a few lines to you after meeting a few of the old 34th boys who left Sarnia nearly two years ago and have since gone through some of the thickest of the fighting, being distributed among several different Battalions. A lot of Sarnia boys were in the fight when we took Courcelette, and they did their bit like men. There were some extraordinary scenes around that place as we drove the Huns out and away beyond. For hours we were hunting for them in the dugouts and driving them out in the open and making them prisoners. You will hear them say, “We will soon have this back,” and then a Canadian would answer, “nothing doing, Fritzzy, what we have we’ll hold: you can’t get Courcelette back, not if the whole German army comes against us.”

The way the boys fought was grand to see. Many Huns were buried by our shell fire and any that showed signs of life were dug out. Then came a call for men to haste to the front and the boys rushed to repel a Hun counter attack and drove them back quicker than they came. The attack was repulsed by a mere handful of men, as many had gone under, but they died like the gentlemen they were, fighting for a just cause. Beyond the village they (The Huns) made seven attacks on our position, but we drove them off... the Canadians have held on to their ground through the heavy rainstorms which swamped them through and through, and under the gigantic rain of shells from the Germans, resolved to die rather than yield a yard of what they had gained. At one place a corporal and eleven men held a crater hole for three days without a bite to eat so that the Huns would not creep upon us unawares and attack us. Those men died at their post – a hero every one.

Sarnia can well feel proud of the part her men are playing in the fight, but more are wanted. Those men that left the old guard stations at Point Edward and the Tunnel are doing their bit. What about the rest of them? Boys, your country needs you to fill up the places of those gone over to the great beyond. Step out and take your place if you are fit and give your place to someone of the boys who have returned from the fight... we out here hope and trust that the sacrifice made by those who have given their lives will have not been made in vain, and that their memory will be handed down to future generations. I need hardly say that we shall all be glad to get back to Sarnia, and our homes and friends, and hope that the peace which is made will be a lasting one and not a patched-up sort of affair...

Cpl. W.G. Ewener, 43rd Batt. France

Soon after arriving in France, Private Walter Ewener had been gassed slightly at the Somme, and was later blown up by a shell explosion, fracturing his left ankle. He spent five weeks recovering in No. 7 Canadian Stationary Hospital in Havre. After serving two months in France, Walter Ewener was returned to England in November 1916 to be treated for his injuries. He continued his service in England, and was hospitalized for treatments on several occasions while there: for his ankle problem that occurred at the Somme; for vitreous opacities, with high myopia in both eyes (ie. defective vision—caused by “service conditions in France”); and for an infection/inflammation of the left thigh.

Walter Ewener survived the war, being discharged on demobilization in March 1919 in London, Ontario. He was discharged as “medically unfit due to vision”, and the Medical Board deemed that his defective vision in both eyes along with his left ankle limited movement issue (both the result of his active service) would impact his choice of occupation after the war. Walter Ewener returned to his Campbell Street address, and he and Phyllis later resided at 494 Wellington Street, Sarnia. Walter Ewener passed away on August 12, 1954, at the age of seventy-four. Note: Walter Ewener has a connection to one of Sarnia’s World War II fallen, John Charles Clarke, who is included in this Project on page 628.

The Somme battle drags on: For more than four brutal months the Battle of the Somme continued, its battlefields spanned both sides of France’s Somme River south of the city of Arras. Canadians played a major role, including at key battles at Thiepval Ridge and Ancre Heights (Regina and Desire Trenches). Canadian World War I veteran and author Edgar Stanford Russenholt wrote, *“Men toil through the darkness under heavy loads, floundering, at times, waist deep in water; climbing wearily over slimy sandbags, stumbling across dismembered corpses – tired, dazed and shaken by incessant bombardments, clothes soaked and equipment clogged with mud; faces grey from want of sleep.”*^{2E}

Four times in seven weeks, in the October rains and the November mud, the Canadian divisions were sent in turn to seize the long and shrewdly sited trenchline encircling the enemy defences north of Courcellette, in an attempt to drive the Germans from their strong positions dominating the centre of the battlefield. Fighting continued into November, while soldiers dealt with persistent cold weather, freezing rain, sleet and hip deep mud that made movement difficult and saturated their clothes and equipment. By November 19, heavy rain had reduced the battlefield to a quagmire, and with winter setting in, the Battle of the Somme was over.^{2E, 80, 10Q}

The Cost: The Somme yielded no winners. The Somme cost the Allies (British and French) more than 623,000 soldiers killed, wounded, missing or taken prisoner. The situation was scarcely better for the German defenders with an estimated 500,000 casualties. One letter captured from a German infantry soldier confessed, *“You can no longer call it war, it is mere murder.”*^{4F, 10Q}

Of the 85,000-strong Canadian Corps, there were more than 24,000 Canadian casualties (over 8,000 killed), with the infantry making up over 90 percent of those terrible losses.^{D, 2E, 4F, 5J} For this incredible cost, or as one Army official referred to it as **“mass butchery”**, the Allies moved the front line forward about 9.5 kilometres over four months.

Along with the seven Sarnians that gave their lives in the Battle of Flers-Coucellette (Robert Batey, Charles Howe, Andrew McIntosh, James Norwood, Norman Towers, Robert Wade and Bertrand Weatherill), at least thirteen more young men from Sarnia gave their lives in the four and a half month long Battle of the Somme including: Arthur Allan, James Bennett, Frederick Chester, Stewart Cowan, Robert Crawford, Jesse Croucher, Joseph Elliott, Albert Fitzgerald, George Giles, Norman Leckie, Daniel Manning, John McMutrie, and Alfred Weston.

• **GEORGE HUNTER STIRRETT (#112135):** One of Sarnia-Lambton’s heroes of the Great War was George Hunter Stirrett. George Stirrett, the son of Robert and Meda (nee: Pake) Stirrett, was born in Forest, Ontario on March 1, 1891. Robert Stirrett, born June 9, 1857, and Meda Pake, born March 12, 1862, were married on February 19, 1884 and they were blessed with eight children together: Gordon Park (born June 15, 1886); Robert Roy (born June 10, 1889); George Hunter; Jean (born March 7, 1895, passed away January 27, 1896 at the age of ten months); John Ross (born February 23, 1898); Andrew Grant (born November 15, 1901); and Margaret Marion (born July 18, 1903). Note: The couple’s first child, Mary Helen Stirrett, passed away at 18 days of age on January 18, 1885. When George was born, his father Robert was employed as a general merchant. George Stirrett was raised in Petrolia, and later resided in Sarnia.

In the late 1970s, Bob McCarthy of Lambton Shield, interviewed George Stirrett about some of his memories of the First World War. Following is a portion of some of his recollections:

George Stirrett remembered that in 1914, he and his friends were more interested in hockey, rugby, baseball and lacrosse. Famous battles were something they had to learn in class, for memory work.

Military things were never referred to or thought about... On August 4, 1914, the Methodist Sunday School picnic group was going by train from Petrolia to Courtright. Then the Tashmoo steamer from Sarnia picked us up to take us to Tashmoo Park at the entrance to Lake St. Clair... As we got to Port Algonac, I remember it was about 10 AM. We heard a newsboy calling out from the dock that England had declared war on Germany. But this news was at the time no more important to us than the news we heard later that day that Detroit beat the Chicago White Sox in baseball.

On reaching home after dark that day, I saw Harry Bolt turning into our house. He had been the trainer for our rugby team and he was very popular with anyone who played games of any kind. Harry wanted to see my father who was mayor of Petrolia. My father was busy at a council meeting, but was expected home any minute. So I sat with Harry on the front porch and he told me that he wanted my father to sign a paper that would allow the Grand Trunk Railway to provide Harry with a ticket to Montreal and then on the England. It was then that Harry told me he had been a Reserve soldier with the Lincolns in England. Now that war had been declared, he had received a telegram telling him to rejoin the regiment he had served and trained with for five years back in England. He told me that he would have to leave his wife and two children but they would receive a pension of a dollar a month while he was in the service. Harry got away early the next morning... The local paper said nothing about him quitting his job at the wagon works. His job was soon filled. The idea of his going was a shock to me and the other boys I told...

Sometime later in 1914, George Stirrett refereed a rugby playoff game between Sarnia and London in London. After the game, George and a few of the boys visited the Armouries in London. There they ran into one of the London players, who had scored the winning touchdown for London that afternoon against Sarnia. He told the boys that a military school was starting the next week in the London Armouries. George and a friend decided to sign up to take the course starting the following week. *Returning home to Sarnia on the train, we saw in the evening paper that Harry Bolt of Petrolia had been killed while fighting with the Lincolns in the retreat from Mons. This was the first time we realized that war could kill people that we knew. We had all known and liked Harry...*^{3U, 9B}

Twenty-three-year-old George Stirrett enlisted for service on January 13, 1915 in London, Ontario, with the 7th Canadian Mounted Rifles (First Hussars), "C" Squadron. He stood five feet eight inches tall, had grey eyes and dark brown hair, was single, and recorded his occupation as merchant; that he had one year military experience with the 27th Infantry; and his next-of-kin as his father Robert Stirrett in Petrolia. Part of Private George Stirrett's infantry training in London was with future fighter pilot William "Billy" Bishop, who became a close friend.

On February 4, 1915, George Stirrett was promoted to Corporal, and two weeks later, on February 19, he was promoted to Sergeant in the 7th Regiment, Canadian Mounted Rifles. In mid-April 1915, he was transferred to the Second Canadian Divisional Cavalry. Two months later, on June 9, 1915, George Stirrett was promoted to temporary Lieutenant and proceeded overseas from Montreal aboard the *SS Caledonian*, as part of the Second Canadian Division Cavalry. George Stirrett recalled, ... *On the Caledonia, with three decks of horses underneath, our main duty was to feed and water them. There were no kitchens on board and the cooks had to prepare our meals on the open deck. It was awful food. It was the worst conditions I had ever seen. The ship wasn't designed for this kind of duty and there wasn't even a doctor on board. Fortunately, on the trip over the Atlantic Ocean, we had good weather. Hammocks had been provided for us below deck but we found the air too foul to sleep there. So we were able to set out hay and sleep on the deck. Then the next day, the hay we had used for our beds would be fed to our horses.*^{9B}

The *Caledonia* landed at South Hampton and then moved to Devonport in England on June 22, 1915. The men entrained for Canterbury where the Cavalry Headquarters was located, and a few days later, rejoined the Second Canadian Division at Dibgate Plains, *where we went under canvas*. George recalled, ... *At Dibgate Plains, the squadron was issued 168 light riding and draught horses and new Lee-Enfield rifles and swords. Training continued at an accelerated pace in spite of the fact that the area was very heavy clay and it rained a lot. The whole area became almost impassable...*^{3U, 9B}

It was while training at Dibgate Plains in England that then Sergeant George Stirrett witnessed the birth of one of Canada's greatest flying aces. As George Stirrett recalled;

... One day when the mud was very bad, two Royal Air Force planes went over. While Billy Bishop, who hated to be dirty, and I stood in the mud watching them, only a few hundred feet high, Bishop turned to me and said, "It's clean up there George. And if you were killed, at least you would be clean. Imagine being killed in this mix of mud and horse manure." Lieutenant Billy Bishop joined the Air Force that afternoon... Lt. Bishop hadn't told anyone

in the Hussars where he was going or what he was going to do so we didn't know where he was for about two weeks.^{13U}

William “Billy” Bishop went on to be a fighter pilot, in fact, the top Canadian and Imperial flying ace in WWI, credited with 72 victories and a recipient of 16 medals including the Military Cross, Distinguished Flying Cross and Victoria Cross.

In mid-September 1915, George Stirrett’s squadron departed from Southampton, England and arrived in Le Havre, France. His squadron was immediately moved up to the front by train, and it wasn’t long before they were moved into the lines. During the fall and winter, his squadron was mostly engaged in frontier patrol duty, trench mapping, classification of water supplies, assisting engineers, artillery spotting, stretcher bearing, and miscellaneous duties. George recalled; *We were to do very little in a cavalry role for much of the war.* In late-April of the following spring, then attached to the 1st Canadian Hussars, George enjoyed a leave of approximately two weeks. On May 10, 1916, he rejoined his unit that later in month; became part of the Canadian Corps Cavalry Regiment (CCCR), subsequently known as the **Canadian Light Horse** (CLH). George recalled; *During this time, even though we were not being used in a cavalry role, our cavalry training continued whenever it was possible. General Haig, who was the senior cavalry officer, believed that there was still a need for cavalry...*

On July 30, 1916, George Stirrett was admitted to No. 1 Canadian Field Ambulance due to a sprain where he remained for just over one week, before rejoining his unit in action on August 8. George recalled; *Since there was little opportunity to use cavalry, most of our time was spent in training, looking after the horses, or on duty in various capacities as sub-units attached to the advanced units in the trenches. When on the line we would stand to for two or three hours at a time as there were always rumours about the Germans attacking. Our job was to go forward if the attack came but we knew that with the trenches and barbed wire, our cavalry would do no good. The RCDs had heard that horses could see in the dark and would be able to jump over trenches and barbed wire in a night assault even if their riders couldn’t see. The RCDs made up a series of trenches and barbed wire behind the lines and one night sent a troop of cavalry over them at the gallop believing the horses would jump when necessary. It was an awful mess and all of the horses had to be shot. That’s the way you learned.*

George described September 26, 1916, during the Battle of the Somme, as the day that made the greatest change in his life. On that day, then Sergeant-Major George Stirrett was in command of a sixty-man stretcher party assigned to the 8th Battalion, the “**Little Black Devils**”, from Winnipeg. Following is part of George Stirrett’s account of what he witnessed that day as German soldiers came out of the trenches to meet Canadian attackers:

The attack started at 6:00 AM when the German soldiers came out of the trenches to meet our Canadian attackers. It looked like two teams coming from both ends of a rugby field and meeting in the middle. As they met, all machine gun fire stopped. It was impossible to tell friends from enemies with 1000 Germans fighting 1000 Canadians you just couldn't shoot so they used knives at each other. Until this time I never had any idea of what the infantry had to go through. I didn't know if I'd go crazy or not... The Canadians forced the Germans back and took the German trenches. Our job now was to clear the field of wounded. As we started, about 9:00 A.M., I wondered as to my sanity. In one shell hole I saw a young man with his lips moving so I knew he was still alive. I reached down and put my hand behind his head and realized my hand was in his brain as the back of his head was missing. I started to go on about 100 yards to locate some more of our parties. I was going from shell hole to shell hole which, at the Somme, almost interlocked. In a shell hole ahead I spotted a boy from Saskatchewan lying wounded. He looked like my younger brother Jack who was with the artillery. I touched the boy and he opened his eyes and asked me not to touch him again. I asked him what I could do for him. "Sergeant Major." he said "Do you believe in God?" I wasn't particularly a religious person but my answer was Yes. "Sergeant Major" he said, "Will you pray to God for me? I'm going to be with him in a few minutes." You could not fool with this request. I knelt beside him, held his hands and closed my eyes in prayer. Then in a bare whisper, I heard, "Thank you sergeant-major. Please go now and help the others." I knew he wanted to be alone with his God. I left to help others but came back later, emptied his pockets and answered the letters I found there. What happened to me then I don't know, but all fear was gone, in a trance you might call it. I walked and went any place I wished to that day and night without fear. We worked that day, that night, and the next day as stretcher bearers under continuous fire.^{3U, 9B}

George Stirrett led his stretcher crew to successfully bring in hundreds of injured men to safety on that day, but the cost was high. Years later he reflected, *By the next day, I had only 18 of our 60 men who were able to come home to our own lines. Twelve had been killed and the rest wounded... It took one man to help a walking wounded*

back to the line and they could use some cover, but it took two men to carry a stretcher and they made good targets... In my diary for this date I have written, "Whoever it was that said war is hell is correct."

In mid-October 1916, George Stirrett was awarded the **Distinguished Conduct Medal** (DCM) as a member of CCCR "A" Squadron for his heroic actions. The official citation to his DCM award stated, *"For conspicuous gallantry and devotion to duty. He tended the wounded under heavy fire, displaying great courage and determination. He set a fine example to his men"*. George Stirrett later recalled the incident that he was decorated for; *I was with three Officers who were looking for their CO. I could hear a person calling and I said to the three Officers, "There's somebody out there calling for help." They said, "We know but the Germans aren't likely no more than 100 yards out there, you can't go." I said, "You just watch me. Just boost me up." So I went out and a Sergeant that was there wanted to go with me. I said, "No, you stay here cause if there's two they'll shoot at us but if I go alone, they won't." So I went out towards where this fellow was yelling for help and, holy Moses, before I got to the shell hole he was in, I got eight of them that were out there wounded and lying waiting for dark. I got them out and pulled them over to our trenches and then waved over at the Germans because I knew they were close enough to see what I was doing. So I just waved at them and dropped down into our trench. These three Officers were there and immediately a bullet came over as if to say, "We saw you and could have killed you but we didn't – we saw what you were doing."*^{3U}

Lieut. George Hunter Stirrett, D.C.M., M.C.

On October 8, 1916, a sick George Stirrett was admitted to a Field Ambulance unit, and five days later he was transferred to No. 14 Stationary Hospital, Boulogne, France with suspected dysentery. One month later, on November 17, he was transferred to Canadian Casualty Assembly Centre (CCAC) for assessment, and then sent to Addington Park War Hospital Croydon, in Surrey England, diagnosed with enteric fever. On January 5, 1917, he was admitted to Enteric Depot Hospital in Woldingham, Surrey, and one month later, on February 9, he was admitted to Canadian Convalescent Hospital in Epsom, diagnosed with typhoid fever. He was discharged on February 27, and transferred to Canadian Light Horse (CLH) Reserve Depot, and returned to full duty. He was immediately taken on strength into the Lord Strathcona's Horse (LSH) (Royal Canadians) at Shorncliffe, and a week later was transferred to the Canadian Reserve Cavalry Regiment (CRCR) at Shorncliffe. By June 1917, he was promoted to Temporary Lieutenant, posted to "D" Squadron, CRCR. By August 1917, Lieutenant George Stirrett returned to action in France with the Canadian Light Horse. There, they took part once again as a dismounted unit, in cooperation with the Motor Machine Gun Brigade, in the attack on Hill 70.

In the fall of 1917, the Regiment moved back to an area near Ypres. George Stirrett recalled; *"Once again, mud and bad weather made mounted operations impossible. All of our men and officers, who were available, went forward with the infantry units, carried ammunition for the artillery and manned observation posts. Casualties were very heavy both in the front lines and in the rear because we were constantly being subjected to heavy artillery shelling from the enemy lines."* The winter of 1917-1918 was spent near the Corps Headquarters on the Lens front, preparing for an expected attack from the Germans the next spring. During this time, many of the officers went away on courses lasting two weeks to a month. In December 1917, George was sent to a school on the French coast at Comte-sur-la-mer, for riding and horsemanship.

During the final two months of the war in the Hundred Days Campaign, the Germans were retreating and were leaving machine gun crews behind to cover their retreat. It was the cavalry's mission to find their positions and

to deliver messages, each day conducting hazardous reconnaissance, suffering heavy casualties. George Stirrett led near-suicidal forays in search of these German machine gun nests. It was for his troops reconnaissance actions on September 26, north of Sailly, and again on October 1, 1918, east of Tilloy, that then Captain George Stirrett of the Canadian Light Horse, was awarded a second medal, the **Military Cross (MC)**. Awarded in March 1919, the official citation notes that he carried out mounted patrols to gather accurate information on enemy positions “*with great dash and coolness, locating the exact position of the enemy...both of these patrols were carried out under heavy fire*”.

In October 1918, as the Canadians advanced toward Valenciennes, the Canadian Light Horse kept contact in front of the infantry and gained considerable cavalry experience in open warfare. During the advance wherever possible, CLH patrols entered small villages ahead of the infantry, allowing them to continue moving forward without having to deploy. George Stirrett recalled; “*Major McEwen would move to the north with two troops taking a sector about a mile wide and I would move to the south with two troops taking a similar sector. Our orders were to draw fire from the enemy to show their positions.*” As soon as they were fired on, the cavalry retired and the infantry took charge. On October 21, Stirrett’s friend Major Cuthbert F. McEwen, OC of ‘B’ Squadron, was killed by an artillery round while on a forward reconnaissance at Hesnon. Command of ‘B’ Squadron passed to George Stirrett who, at first, refused the command. He had been greatly shaken by the death of his dear friend and did not want to benefit from his death. He took command because as he put it, “*I had to, I was the only experienced Officer left.*”

The day after McEwen’s death, as the CLH continued their advance, Stirrett wrote in his diary; *The next day, we ran into civilians whom the Germans had not had time to clear out. As we rode into a village, we trotted down the cobblestone streets. All windows for 300 yards to the village square were drawn and covered. As we reached the village square at the Catholic church, we looked to see the road full of women, older men, and children, filling the road with anything they could wave. We dismounted and the old priest took me by the ears and kissed me. Then they all seemed to go crazy at once. They even kissed our horses. Next, the priest called for prayer and the entire village went to their knees at once, including my men and myself. We had a very similar experience in every village from then on. We were first into at least twenty villages with the infantry about a mile behind following us in column of route.* ”^{3U, 9B}

In late October 1918, Lieutenant George Stirrett of the Canadian Light Horse, CRCL, was granted 14 days leave. The Great War came to an end on November 11, 1918. Two months later, in mid-January 1919, George was invalided back to England from France. Soon after, he was admitted to the Prince of Wales Hospital, in Marylebone, England and five days later, was admitted to Canadian Convalescent Officers’ Hospital, in Matlock, Bath, where he received dental treatment (a condition attributed to his service). He remained there until the end of January 1919. On March 5, 1919, he was admitted to No. 9 Canadian General Hospital, Kinnel Park due to influenza, and fortunately, was discharged from the hospital three days later. On March 24, 1919, George Stirrett departed from Liverpool and returned to Canada. Lieutenant George Stirrett was struck off strength from the Canadian Expeditionary Force on general demobilization on April 4, 1919.

After the war, on October 15, 1919, twenty-eight-year-old George Stirrett married twenty-seven-year-old Vera Mary (nee Spurr) in Petrolia. They moved to Front Street in Sarnia in 1922. George became a Sarnia City Councilor in the 1930’s; was a member of Central United Church; and was a president of the Royal Canadian Legion, Branch 62. George’s parents, Robert, passed away on March 16, 1933; and Meda, passed away in 1959; and both are buried in Hillside Cemetery, Petrolia. George Stirrett passed away in mid-February 1982 just short of his 91st birthday at the Vision Nursing Home. He was survived by his wife Vera, son Franklin, and daughters Mary Louise and Georgina, and 13 grandchildren and two great-grandchildren. Captain George Stirrett was buried in Hillside Cemetery, Petrolia with full military honours by members of the 1st Hussars of Sarnia and London, the same unit that he had distinguished himself with so many years earlier. Sarnia’s armoury on Confederation Street is named in his honour.^{F, J, N, 2G, 3K, 3U, 9B, g}

• **THE BATTLE OF VIMY RIDGE**, France, April 9-12, 1917: The Battle of Vimy Ridge was part of a larger British offensive, the **Battle of Arras** - from April 9 to May 16, 1917, when troops from the four corners of the British Empire attacked German trenches to the east of the French city of Arras. In fact, the Battle of Arras was a supporting attack for the French Artois offensive to the south.

Vimy Ridge, known informally as “**the shield of Arras**,” is located in northern France, a long 7-kilometre hill that rises to a height of 110 metres that dominates the landscape, protecting the coalfields of Lens and the ancient city of Arras. Because of its towering height and commanding view of the flat and low countryside in all directions, whoever held the Ridge had the upper hand in battle and controlled a large portion of northern France.

At the north end of the ridge was its highest point—**Hill 145** (145 m above sea level). Across a valley from Hill 145 stood another high point, “**the Pimple**” (135 m). Germany captured Vimy Ridge early in the war in October 1914, and had transformed it into a strong defensive position, virtually impregnable, with deep dugouts of concrete, rows of barbed wire, a complex system of underground tunnels, multiple lines of trenches manned by highly-trained soldiers with mortars and machine guns that could sweep over the front in overlapping arcs of fire, and protected by artillery pieces overlooking the battlefield. Previous Allied assaults on the Ridge in 1914 and 1915 had cost the French and British hundreds of thousands of casualties and had been largely unsuccessful. By the time Canadian troops were rotated into the battlefield, 300,000 Allied soldiers had already been killed in attempts to capture the ridge.

- **Arrival:** The Canadians arrived at the Vimy front in staggered marches starting in late October 1916. They soon occupied a line about 15 kilometres in length that the Germans on Vimy Ridge could look down into their trenches. The muddy, cratered western slope was described as an “*immense graveyard*,” littered with the remains of thousands of unburied corpses and fragments of bodies. Canadian gunner William Ball wrote in his diary about the hulking ridge, “*Never saw anything like it before. I think it is called Vimy Ridge, or the Valley of Sorrows as sixty thousand French were supposed to have been lost here.*” Lieutenant-Colonel Joseph Hayes of the 85th Battalion wrote, “*There is perhaps no place in France where as many men have been killed to the square yard as on this sloping ground.*” The conditions were so poor that thousands of soldiers had to dig and repair the trenches continuously for weeks on end, much of the work during the bitterly cold and wet winter of 1916. Veterans recalled later, it was hard to put a shovel in the ground without turning up the ragged scraps of a British khaki tunic or a pair of French red trousers.

William Bird, a soldier in the 42nd Canadian Infantry Battalion, wrote about his experience of arriving on a cold night in January 1917 at the Vimy Front. After leaving the village of Neuville St. Vaast, Corporal Stevenson of the 42nd brought William and a group of others to the line. *He led us down a long trench, and at last we were really at the front. We had become used to the slamming roar of gunfire and now we also heard the barking of machine-guns. Bullets came singing overhead, to go swishing into the darkness. Some struck on wire and we heard the sibilant whine of ricochets. We had sandbags to fill. One man held them and the other shoveled in gruel-like mud. When twenty were filled a man jumped on top and emptied the bags as they were handed up to him. It was ticklish work, as the one emptying had to jump down when machine-guns opened on that section. We got soaked to the skin. The cold slime ran down our wrists as we lifted the bags, and our boots sunk in the mire until our feet were numbed, sodden things.*

The next day at dusk, William and two of his comrades were sent to an emplacement used by a mortar team that used a big mortar called a “flying pig”. *When we got there we noticed a peculiar odour. All the shapeless ruin of Neuville St. Vaast stank of decay and slime, but this new smell halted us. “Here’s bags,” said Stevenson. “Go in there and gather up all you can find, then we’ll bury it back of the trench. Get a move on.”*

A “flying pig” had exploded as it left the gun and three men had been shredded to fragments. We were to pick up legs and bits of flesh from underfoot, place all in the bags and then bury them. It was a harsh breaking-in. We did not speak a word as we worked. When we were done Stevenson told us we could go, but Tommy (William’s buddy) and I lingered in a trench bay and stared over the dark, flickering, silhouetted landscape.

Over the tangle of wire in front lay the no man’s land about which we had heard. Not two hundred yards away were the Germans in their trenches. A thin stalk of silver shot up as we looked, curved over in a graceful parabola and flowered into a luminous glow, pulsating and wavering, flooding the earth below with a weird, whiteness. It was a Verrey light. We craned our necks and stared. Jumbled earth and debris, jagged wreckage: it looked as if a gigantic upheaval had destroyed all the surface and left only a festering wound. Everything was shapeless, ugly and distorted.^{11A}

- **The task:** In the spring of 1917, the Canadians were tasked with capturing Vimy Ridge as part of a larger British and French offensive. The Canadian force drew the most formidable part of the entire German defensive system, and perhaps along the whole of the Western Front at Vimy. It would be the very first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would attack together as one formation.

- **The plan** was simple – all four Canadian divisions would surge forward simultaneously to seize the crest by lunch hour under the curtain of the greatest artillery bombardment of the war. There would be four simultaneous mini-battles, all interconnected, each divisions’ style and method of attack differing, depending on the frontage, the

distance to be covered, and the state of the German defences. The four divisions would do it in a series of carefully timed stages, the objective of each stage marked on the map by a coloured reporting line. At each stage the forward troops would consolidate, reporting their arrival to low-flying aircraft, while fresh troops leap-frogged through to the next objective.

The 1st and 2nd Divisions on the right would have the farther distance to travel, but over the more gentle slope, with four reporting lines – Black, Red, Blue and Brown. Included in part of the 2nd Division's initial assault wave was Western Ontario's 18th Battalion, which had been mobilized in London, Ontario. The 3rd and 4th Divisions on the left of the line had the shortest distances to travel, but a much steeper climb to reach two reporting lines – Black and Red. The Canadians were given less than eight hours to capture all of Vimy Ridge except the "Pimple" – the small wooded knoll and German stronghold at the far end of the ridge on the northern slope.

The Pimple was not part of the ridge, but it would have to fall. Up until late March, the Pimple was to have been assaulted by I British Corps on the left flank of the Canadians. But British First Army commander General Henry Horne changed the operation on April 1, one week before the attack, and ordered Byng and his Canadians to take the hill. With the 4th Division already fully committed to capturing Hill 145; not enough troops to divert towards the Pimple; and artillery already positioned for the main operation; Byng struggled with what to do. His decision was to order the 10th Infantry Brigade to capture the Pimple after attacking Hill 145. Leaving the assault on the Pimple until after the ridge was captured was, however, an enormous risk to the entire operation.

Confidence in the Vimy plan was gained by the fact that the battalions of each of the four divisions were at full strength – so the total strength of the Canadian Corps at Vimy was over 97,000.^{4G, 5A, 7R, 7Z, 8H, 8U}

- **Sir Julian Byng:** The British would ably support the Canadians at Vimy, providing logistical and artillery support, and an infantry brigade. The commander of the Canadian Corps in charge of directing the attack on Vimy Ridge was British army officer Lieutenant-General Sir Julian Byng. The professional soldier had fought with distinction in the South African War, and had organized the difficult and remarkably successful retreat from the Gallipoli campaign in January 1916. He had been given command of XVII British Corps on the Western Front, and seemed to be in line for promotion to an army command when in May 1916, he was tasked with commanding the Canadian Corps who had just lost the Battle of St. Eloi. Upon being congratulated on being promoted to command of the Canadian Corps a bewildered Byng responded to British commander-in-chief Sir Douglas Haig, *"Why am I sent the Canadians? I don't even know a Canadian... I am ordered to these people and will do my best, but I don't know that there is any congratulations in it."*

Byng soon won the respect of the Canadian Corps by standing up to bureaucratic bullying; ordering the Ross rifle be replaced by the more reliable Lee-Enfield; and the Colt machine guns to be replaced by Vickers guns; and outfitting Canadian battalions with more machine guns, steel helmets, and better grenades and mortars. His intensive preparatory regime of practice and planning transformed the Canadians into a confident, disciplined, well-prepared and effective striking force. Known to his friends and King George V as "Bungo," it was a nickname he got at school because his older brothers were known as "Byngo" and "Bango". Julian Byng would become so well-respected and beloved by the Canadian troops, that they began to call themselves **"The Byng Boys,"** after a popular musical theatre comedy *The Bing Boys are Here*.

Two months after Vimy, in June 1917, Byng was promoted, taking command of the British 3rd Army as a full General. In October 1919, when the general was elevated to the peerage (knighted), he took as his title **Baron Byng of Vimy**. After the war, Sir Julian Byng was appointed as **Governor General of Canada**, serving from August 1921 to 1926. Byng always had the common touch and he made many cross-country tours to adoring crowds. The Byng's were often seen at Ottawa Senators hockey games, and in 1925, Byng's wife Evelyn, who admired Canada, donated the Lady Byng Trophy, the National Hockey League's award for sportsmanship and excellence. Author and military historian Tim Cook credits Byng as being, *"The single most important figure in transforming the Canadian Corps into a battle-hardened formation."*^{4F, 5A, 8H, 8U}

On the cenotaph in Veterans Memorial Park in Point Edward, a plaque at the base of the monument reads, *"This stone was laid by Lord Julian Byng of Vimy Governor General of Canada April 18th, 1922."* More information on Byng's visit to Sarnia and Point Edward is on page 152.

- **Sir Arthur Currie:** Arthur Currie, was born in 1875 in the hamlet of Napperton outside the town of Strathroy, Ontario. He graduated from high school, briefly attended university in Toronto, and worked as a teacher. After he moved to Victoria, British Columbia in 1894, he joined the local Militia artillery unit where he rose through the non-

commissioned and commissioned ranks. By 1909 he was a lieutenant-colonel commanding the 5th Regiment, Canadian Garrison Artillery, a successful businessman (land speculator) and he was married. It was boom or bust times in the West, and in 1913, Victoria's land speculators went bust. Faced with personal bankruptcy and disgrace, an overextended Currie siphoned off money for his own use, money that he had been provided with by the government for the new 50th Regiment Highland Infantry uniforms (Currie was to command the regiment). He had a promise from the regiment's honorary colonel to cover the "loan," but the money was never forthcoming. His embezzlement would hang over his head for the next four years until some of his senior overseas commanders paid off his debt.

At the outbreak of war in August 1914, Currie headed off to Valcartier Camp in Quebec. There, he accepted command of the 2nd Brigade, and led them overseas to England and, in April 1915, into the morass of the Ypres Salient. When a second Canadian division came to France, now Major-General Currie took command of the 1st Division in September 1915. He would lead the 1st Canadian Division effectively through the Mont Sorrel and Somme battles, and into 1917.

Currie stood almost six feet three inches tall, was overweight with a pear-shaped body carried on thin legs, had a babyish face with large jowls, and looked unsoldierly in his uniform. Yet he sympathized with the soldiers under his command and abhorred casualties. During the Second Battle of Ypres, Arthur Currie's brigade had played a pivotal role in holding the Allied position. At the Battle of Mont Sorrel, Currie had convinced Byng of the importance of detailed planning, and the need for cooperation between the infantry and the artillery—lessons valuable at Vimy Ridge. One of his quotes was, *"Pay the price of victory in shells-not lives."* Arthur Currie would command the 1st Canadian Division at the Battle of Vimy Ridge.

After Vimy and Julian Byng's departure in June 1917, the replacement to command the Canadian Corps was a man that Byng had been grooming as his successor since the Somme battles. Byng recommended forty-one-year-old Arthur Currie, a key fellow Vimy strategist, making Currie **the first Canadian to command the Canadian Corps**. To honour the man who had been primarily responsible for achieving the first major Allied victory in WWI, King George V knighted Sir Arthur Currie on June 3, 1917. A few days later, Sir Arthur Currie took command of the entire Canadian Corps, given the rank of Lieutenant-General.

Arthur Currie was a nationalist who believed that the Canadians had to stay together because they fought better when all four divisions were in the field under a single Corps command. A tactical innovator, he was notable for his emphasis on pre-battle preparations and his sincere concern for his troops' well-being. Currie led the Canadian Corps to hard-fought victories at Hill 70, Passchendaele and during the Hundred Days Campaign, until its disbandment in late 1919.

As the war progressed and casualties mounted, Currie was unloved by some of his men who only saw him as an absent superior who called on them to fight and sacrifice, while he did neither. Disdainfully referring to him as "Guts-and-Gaiters", these men did not see the hours Currie worked late into the night at headquarters, bent over maps, eyes darkened with fatigue, demanding more guns or supplies, sending out officers to collect information from the front, and standing up to both British and Canadian superiors to ensure his soldiers had a fighting chance in battle. He tried to minimize casualties, and made the four divisions of the Canadian Corps into an elite combat formation, and was widely recognized as one of the very best on the Western Front. Lieutenant-General Sir Arthur Currie is believed by many military experts and historians to be one of the best military commanders Canada has ever produced.^{2I, 2N, 4G, 5A, 5J, 8H, 8U}

Note: More information on Currie, including his return to Canada after the war is on page 167 and 194.

- **Andrew George Latta McNaughton:** Along with Currie, the other Canadian who was critical in developing the plan to crack the German fortress at Vimy was Andrew McNaughton. The physics and engineering graduate of McGill University joined the Canadian Militia in 1909 and led an artillery battery overseas in 1914 as a 27-year-old major. Wounded twice in early fighting, McNaughton recovered and rose rapidly, and in late January 1917, the twenty-nine-year-old was named Counter-Battery Staff Officer. He used his keen mind to develop and perfect new scientific gunnery principles, including "flash spotting" and "sound ranging" to improve the Canadians ability to not only calculate the position of the enemy guns, but also its type, its calibre, and the target on which it was registered. As a result, the counter-battery fire became increasingly effective in suppressing enemy guns, permitting troops to close on their objectives with fewer casualties.

During the war, McNaughton was decorated several times for his achievements, and by late 1918, he

commanded the entire heavy artillery and counter-battery forces of the Canadian Corps. Before the war was over, he was acknowledged by both the Allies and the Germans as the best artillery officer in the British Empire. During the Second World War, he would successfully command the First Canadian Infantry Division, the First Canadian Corps, and the First Canadian Army.^{21, 2N, 3F, 6E, 7Z}

- **Vimy Preparations:** The Canadian planning and preparations for the attack of Vimy Ridge verged on the unbelievable, and it included vast armies of engineers, labour units, clerks, cooks, surgeons, tunneling companies, loggers, locomotive engineers, carpenters, tailors, telegraphers, road builders and infantrymen toiling furiously day and night. Much of the work had to be carried out at night in the cold by men constantly slopping about in water or muddy gruel and under constant fire.

Tasks included supplying food and water for close to 100,000 men and 50,000 horses and mules; horse and mule teams strained to carry heavy loads steadily forward through the mire and mud roads while braving the steady barrage of enemy fire, to the point where hundreds had to be mercy-killed as they were worked to death; water-mains and pipelines were constructed, reservoirs dug and pumping stations were installed; building new roads and adding planking to others; building rails for light trams; miles of electrical cable were buried in trenches seven feet deep and hundreds of miles of telephone wire were strung; fortifying the lines; digging trenches and gun pits; digging tunnels at least six metres underground that wound for hundreds of metres beneath the German lines and filling the narrow shafts with explosives; moving and stockpiling thousands of tonnes of ammunition and shells to the front; hauling heavy artillery pieces each weighing tons to the gun pits which then had to be assembled; digging underground subway systems to move materials and to shelter troops close to the jumping-off points; and training on models and a full-scale replica course (with marked trenches, gun emplacements and barbed wire that the soldiers could practice walking through).

Over 40,000 **maps** were issued to the troops empowering them to understand where their objectives were established. This devolution in command meant if officers were knocked out in battle, the lower ranks knew and could continue on to the objectives—for the first time, junior officers, NCOs, and ordinary soldiers would all be given specific responsibilities. Each division would have a specific objective, and within the brigades, each battalion, each company, each platoon—indeed, each man—would know exactly where to head, when they should reach each objective point, exactly how many minutes to stop before moving forward again, and at what point to dig in and allow reserve troops to leap-frog through.^{7Z}

Each platoon was reorganized into a self-contained fighting unit made up of a lieutenant, three sergeants, fifteen riflemen, eleven bombers, eleven rifle grenadiers, six Lewis machine gunners, two scouts, and a stretcher-bearer, all of whom could be interchangeable in the event of casualties. By the end of March, every platoon and every section had developed into a tightly knit group who knew each other well and knew exactly what their job was to be in the battle that followed.

The **British First Army** would supply about half the artillery, two battalions of combat troops and thousands of soldiers that engaged in logistical work. A number of tanks were also brought in to assist the infantry, however the 28-tonne steel beasts would have no impact at Vimy. The clumsy, slow tanks became bogged down in the mud, slipped into large mine craters or were shredded by shellfire.

The labyrinth of **tunnels and subways** were particularly important at Vimy, as German troops were able to see every above ground movement of the Canadians from their perch high on the ridge. Located at least 6 metres beneath the earth, the maze of tunnels, caverns and subways, some more than a kilometer in length, contained electric lights, command posts, ammunition stores, medical stations, telephone lines, sleeping areas and latrines. Although the tunnels had some comforts and provided protection from artillery fire, they were prone to leakage, poor air quality, and were unpleasant to be in for any length of time. Hundreds of men carved their names or hometowns or regimental crests into the sweating chalk walls. In the days before the assault on Vimy, these underground cities housed thousands of men, while the dull thud of shellfire resounded through the walls day and night.^{D, 4G, 5A, 7R, 7Z, 8H}

Among those who etched their names on the walls of the Vimy tunnels were two Sarnia-Lambton soldiers, members of the 1st Hussars. Their names were found among hundreds of others in the Targette Tunnels section of the caves, in a portion not usually open to the public. The two Sarnia-Lambton soldiers were:

John Edward Chenney #112025:

Cave wall etching: *J. CHENNEY #112025 1st HUSSARS ... CCCR*

John Chenney was born on November 13, 1896 in Petrolia, the son of Joseph and Annie (nee Hurst) Chenney

of Petrolia. Joseph Cheney was born in England and immigrated to Canada in 1887, and worked as a coachman. Joseph and Annie Cheney had four sons together: Thomas, James, John and Roy. On January 23, 1915, eighteen year-old John Cheney enlisted in Sarnia, becoming a member of “C” Squadron of the 7th Regiment, Canadian Mounted Rifles. Working as a clerk when he enlisted, John recorded his birthdate as November 13, 1893, making himself three years older than he actually was (recruiters thought he was age 21). Private John Cheney arrived in England aboard the *SS Caledonian* on June 22, 1915, and in France on September 15, 1915, as a member of the Canadian Cavalry Brigade. In January 1916, he was a member of the 1st Canadian Hussars Special Service Squadron. In April 1916, he was hospitalized for 11 days with German measles, and the following month, his unit became known as the Canadian Corps Cavalry Regiment (CCCR). In January 1917, he was hospitalized for close to two weeks the result of scabies (infection from clothing). In February 1917, his unit became known as Canadian Light Horse (CLH), and a year and a half later, in October 1918, he was appointed the rank of Corporal in the CLH. Corporal John Cheney survived the war, returning to Canada in April 1919. After the war, John Cheney resided in South Bend, Indiana, USA.

Hugh Roswell Hall #112063:

Cave wall etching: *Pte. H.R. HALL #112063 1st Hussars B SQUAD C.C.C.R. Dec. 4/16*

Hugh Hall was born on October 24, 1891 in Warwick, Lambton County, the son of George Watson and Mary Eliza (nee Mitchell) Hall of Petrolia. George, a farmer, and Mary Hall had three children together: Alice Maud, George Lloyd and Hugh Roswell. On January 19, 1915, twenty-three-year-old Hugh Hall, a tinsmith at the time, enlisted in Sarnia, becoming a member of “C” Squadron of the 7th Regiment, Canadian Mounted Rifles. In April 1915, he was a member of the 2nd Canadian Divisional Cavalry and he arrived with that unit in England aboard the *SS Caledonian* on June 22, 1915. Private Hugh Hall arrived in Havre, France on September 15, 1915, a member of the Canadian Corps Cavalry Regiment (CCCR). On January 31, 1916, he was transferred to the 1st Canadian Hussars Special Service Squadron, part of the CCCR. Over a year later, in February 1917, his unit became known as Canadian Light Horse (CLH). In August 1917, he was appointed Lance Corporal, and six months later, in February 1918, he was promoted to the rank of Corporal in the CLH. Corporal Hugh Hall served in France until late April 1918; survived the war; and returned to Canada in December 1918. In March 1923, Hugh Hall married Effie Irene Mott, and he went on to work as a government employee. On April 30, 1926, Hugh Hall passed away in Queen Alexandra Sanatorium in Byron, Ontario at the age of thirty-five. His death was due to pulmonary tuberculosis and recorded as, “Death related to Service” (he had suffered lung problems for nine years prior to his death). Hugh Hall is buried in Hillsdale Cemetery in Petrolia.

- **Trench raids:** In the three months before the April assault, the Canadian Corps launched at least fifty-five trench raids on the German positions. The goals of the raids were to inflict terror and casualties, hamper the enemy’s ability to lay barbed wire, gather intelligence and capture prisoners. The earlier ones were carried out by a handful of men; the later ones involved many more.

In the early morning hours of March 1, 1917, four battalions of the 4th Division Canadians carried out the **largest raid**, a massive 1,700-man trench raid against the Germans commanding the heights of Vimy Ridge. Canada’s 4th Division was the youngest and least experienced fighting division and they wanted to prove to everyone that they could out-raid any group. The German defenders were fully alert for the attack, and the Canadians had to advance through enemy fire, their own deadly phosgene poison gas cloud that had blown backward, uncut barbed wire and even their own artillery shells that fell short. The Canadians suffered 687 killed and wounded in the disastrous raid (a 43 percent casualty rate). After recognizing that the Canadians had lost so many who acted with such valour, the very next morning the Germans offered a two hour truce so that the dead could be removed honourably from the battlefield. The failed raid also so greatly weakened the 4th Division that it had its effect on the battle that followed five weeks later.^{4F, 5A, 7Z, 8H, 8U}

- Information on the location of enemy trenches, barbed wire, strongpoints and hidden batteries were central to the attack, and the best intelligence was supplied by the “eyes in the sky” – balloons and aircraft. **Kite balloons**, gas filled and tethered to the ground, would float to a great height behind the front line. Suspended below each one was a basket that carried one or two observers who could locate distant enemy targets and pass down their readings via the use of flags or radio. Pilots of the **Royal Flying Corps** (RFC), including Canadians, flew observatory aircraft and using cumbersome cameras lashed to the cockpit, took photographs and gathered aerial reconnaissance. The Canadian Corps worked closely with No. 16 Squadron, RFC, whose slow-moving two-seater reconnaissance planes, the F.E. 2b and 2d, had observers and gunners. These slow spotter planes were outclassed in speed by the German

Fokkers and Albatrosses, who engaged the spotters in intense air battles above the ridge. Each reconnaissance plane required a cover of several fighters. The young Canadian fighter pilot, Lieutenant William “Billy” Bishop, became an Ace during this period, flying with No. 60 Squadron, RFC. On April 7, 1917, Billy Bishop wrote, *“Three more pilots lost today. All good men. Oh how I hate the Huns. They had done in so many of my best friends. I’ll make them pay, I swear.”* Baron Manfred von Richthofen, later known as the “Red Baron,” was one of the corps skilled adversaries.^{3G, 7Z}

A steady flow of information from other sources poured into the commanders headquarters – from the men who raided the enemy trenches in the dark, from the young men of the Royal Flying Corps, from sweaty documents and maps ripped from German corpses or liberated from captured prisoners, and from coded reports of secret agents.^{7Z}

- **Artillery** would be a key to the success of the attack. Hitting the hidden enemy targets, and providing a curtain of fire that exploded only a few yards ahead of the advancing troops during the final assault required stunning accuracy. Though they did not look it, the huge artillery pieces were sensitive weapons. Corrections had to be made for wind, weather, temperature, pressure changes, contour of the ground, barrel wear, and subtle variations in shell size. The creeping barrage, first introduced in the later parts of the Somme, would be coordinated by McNaughton to move forward at 90 metres every three minutes. The infantry would “lean into the barrage” staying within 35-65 metres of the wall of fire. The troops practiced over and over again what became known as the **“Vimy glide”** – a precisely paced advance, one hundred yards every three minutes, behind their own artillery’s creeping barrage. Lieutenant-General Byng warned his men beforehand, *“Chaps, you shall go over exactly like a railroad train, on time, or you shall be annihilated.”*

On March 20, half of the Canadian artillery batteries began preliminary bombardment on the German fortifications, barbed wire, and lines of communication and it lasted for thirteen punishing days. Many of the high-explosive shells were equipped with the new **No. 106 fuse**, which caused the shell to burst on contact with the barb wire, tearing and ripping it to shreds and ripping great gaps in the wire (something the shrapnel shells were ineffective at).

On April 2, one week before the scheduled infantry advance, the full battery of Canadian and British guns opened up on the German positions, pulverizing the front with nearly 2,500 tonnes of ammunition every day. The artillery also carried out feints – creeping barrages, which seemed to signal an attack, or sudden intensifications in certain areas to throw the enemy off guard. A Canadian Observer at Vimy stated, *“Shells poured over our heads like water from a hose.”* As a result, large parts of the enemy trench system, the barbed wire in No Man’s Land and the nearby towns of Thelus, Farbus and Givenchy were destroyed. The seven days before the battle became known by the Germans as the **“Week of Suffering”**. Though the Canadians deluged the German trenches and fortifications with some 1.6 million shells, the Canadians’ task would still be daunting.^{4G, 5A, 7A, 7R, 7Z, 8H, 8U}

Firing from a fixed platform, the **Vickers heavy machine gun** unleashed up to 500 bullets a minute. By tilting the Vickers into the sky, gunners could spray the enemy lines indiscriminately with tens of thousands of bullets. This indirect fire made it difficult for the Germans to repair their trenches and barb wire, hampered the delivery of supplies to the front lines and it filled in the gaps left by artillery fire. From the first week of March onwards, a number of dedicated Vickers machine-gun teams commenced their bullet barrage. Brigade machine guns were grouped together and sixty-four guns fired by day and another sixty-four by night to keep the German front under a hail of bullet fire.^{7Z, 8H}

- **Easter Sunday, April 8, 1917**, dawned as a clear, bright and beautiful spring morning. Behind the lines, the French countryside was at prayer. As streams of fighting troops moved forward toward the din of shellfire, streams of peasants walked to church as bells rang. By the time the sun went down, a chill and cold wind sprang up—an omen of things to come.^{7Z}

On the night of April 8-9, thousands of Canadian infantrymen moved through the gloom, mud and water, wading through the long communication trenches, to the subways, the jumping off trenches and shell holes well out in No Man’s Land—their assault positions for the next morning. The men crouched in the liquid gruel of the crowded trenches and the underground tunnels (eg. the longest tunnels Goodman, ran 1,721 metres and Grange, ran 1,200 metres in length), huddling in the dark, sheltering from the shellfire and harsh cold weather, with the continuous rumble of artillery overhead. On the walls of the tunnels and underground caves, many Canadians used bayonets, other sharp devices, and even pencils to add their names, hometowns, crests, and sayings into the soft chalk walls, possibly a lasting reminder of their existence.

For many that evening, no doubt their thoughts turned to home—to family members going to Easter service and relatives gathering for the traditional Easter dinner. Most men wrote potentially last letters to loved ones, or private notes in their diaries in case their bodies were found.

One of those men was Private John Wesley (Jack) McClung of Alberta, a nineteen year-old member of the Princess Patricia's Canadian Light Infantry (PPCLI). Jack McClung had enlisted against his mother's wishes. Facing the grave uncertainty of combat for the first time, he wrote the following in his diary on the eve of the Vimy attack, while waiting in one of the chalk tunnels under the ridge; *Easter Sunday night and we go over the top tomorrow morn at 5:30. I guess a fellow has more sensations and feelings in this short night than in his whole life. I fixed up all my bombs, 15 in all, cleaned rifle, bayonet and ammunition and then sat down. Some fellows are singing songs sacred and otherwise... One fellow has tried to start "Just before the battle Mother." It was a failure. Any other kind of song gets an ovation, but each of us is trying to hide the real state of his mind. I know how much I am thinking about Mother, Dad and all the kids; The sooner I can get back the better and the more I do to help end it, the better!*^{4G, 7Z, 8H, 8U, 9U}

Note: John Wesley (Jack) McClung was the son of Nellie McClung, a famous Canadian social and political activist. John McClung would rise to the rank of Lieutenant in the PPCLI. He survived the war, although with a serious wound.

• **Zero Hour: Easter Monday, April 9, 1917**, was a miserable weather day at Vimy with sleet, rain, and snow driving down in the early morning hours. Dozing soldiers were awakened in the tunnels and trenches for a meal, either warm porridge or cold meat and bread. To calm nerves of the men, battle rum was broken out by the officers in most of the units. The strong, over-proof and thick concoction burned all the way down, offering some warmth to the shaking men. Tense Canadian infantrymen huddled in their start lines in jumping-off trenches and underground tunnels waiting for the "big show" to open up. At 5:28 a.m., as the whispered order to fix bayonets came, 230 Canadian Vickers heavy machine guns tilted their barrels upwards and rained tens of thousands of .303 bullets on enemy crossroads and trenches. The goal was less to kill Germans than to keep them in their dugouts.

At 5:30 a.m., zero hour, a brief silencing of the big guns was followed by the sound of 983 field guns and howitzers and 120 mortars crashing down on the German positions. At the same time, a series of mines were detonated below the defenders, creating miniature volcanoes, adding to the chaos. Also as part of the spectacle, huge drums of burning oil were hurled at the enemy, exploding into flame illuminating the ghastly battlefield.

Twenty-one first-wave Canadian battalions of around 15,000 Canadian soldiers then advanced through the wind-driven snow and sleet into the face of enemy fire. They emerged from the trenches, some standing in mud up to their knees, climbing ladders to go "over the top". Underground tunnel entrances were blown out for other Canadian infantry to surge forward into No Man's Land. With shells soaring overhead, the soldiers advanced through the slimy mud, over countless craters and barbed wire, into the enemy fire. The infantrymen advanced in a straightforward frontal assault, "hugging their barrage," moving 90 metres every three minutes to keep pace with advancing curtain of steel and fire. Officers tried to scream commands but nothing could be heard above the din of shells overhead that sounded like trains passing in continuous runs.

Lieutenant Gregory Clark, a platoon commander in the 4th Canadian Mounted Rifles described the experience of advancing behind the creeping barrage; *"In one sense, it was a beautiful sight. It was still quite dark. Sleet was falling. There before us, frightfully close, was the edge of hell. It blazed, flashed and flickered, the bursting shells; and white and coloured flares were fired frantically by a distracted enemy. And the flashing, flickering lights showed an infernal wall of twisting, boiling smoke and flame, against which stood out the distorted silhouettes of men advancing into it."*

Private Lewis Duncan, in a letter to his aunt, described his experience; *"5:30 came and a great light lit the place, a light made up of innumerable flickering tongues, which appeared from the void and extended as far to the south as the eye could see, a light which rippled and lit the clouds in that moment of silence before the crash and thunder of the battle smote the senses. Then the Ridge in front was wreathed in flame as the shells burst, confining the Germans to their dugouts while our men advanced to the assault."*

Most of the battalions went into the line with between 650 to 700 men, while about 10 percent of the fighting force was "Left Out of Battle", as the official policy was called, to rebuild the battalions should they be savaged. Staff Sergeant Percy Willmot of the 25th Battalion was one of those Left Out of Battle. On the day of the assault he wrote, *"During 18 months of warfare I have become more or less deadened to feeling and emotion, but I could not*

prevent the tears from rolling down my cheeks, and the choking in my throat for the cheery lads who were marching away, many of them never to return.” ^{4G, 5A, 7Z, 8H}

With tens of thousands of shells, and hundreds of thousands of bullets whirling over their heads, the infantry advanced toward their objectives through the sleet, rain and through mud that in some places was thigh deep. Wearing heavy greatcoats, the ordinary private carried his rifle, 120 rounds of ammunition, two Mills bombs, five sandbags, forty-eight hours’ rations, a water-proof sheet, gas mask, smoke helmet, a ground flare, a filled waterbottle, and a pick or a shovel. They stumbled and pushed forward through the shroud of smoke and explosions, around deep craters and sinkholes, over shell-holes and barbed wire, past corpses and falling comrades, some screaming for help, into the jaws of the enemy counter-barrage, chemical shells, machine gunners, mortars, stick grenades, small-arms and sniper fire.

Directly behind the first wave, ankle deep in water, caked in mud, bayonets fixed, a supporting wave of 12,000 more infantrymen fidgeted and blew on chilled fingers as they waited their turn to advance. And behind them were 70,000 more troops—gunners, stretcher-bearers, surgeons, cooks, transport drivers, mule-skinners, foresters, engineers, signalmen and runners—all hived in a maze of tunnels, dugouts, sunken roads and trenches behind the front lines.

Private William Pecover wrote the following in his memoirs; *“Moving forward in the full light of that clouded April morning, we learned full well the nature of the great modern battlefield. This was war... The wounded, friend and foe alike, lay everywhere about in the cold, wet mud, silent and helpless in their agony or crying out for help to the stretcher-bearers who fanned out behind the attacking waves. And just ahead of us roared the barrage and all the fury of the fight - the death rattle of the machine guns, bursting overhead, shrapnel and counter fire from the enemy guns - all of the fiendish implements of death that man had devised. In contrast, the conquered area through which we passed seemed strangely quiet. Here death reigned, and the agony of pain.”* ^{7Z, 8H}

Following behind and sometimes through the first units were other clusters of men. This included the “mopper-uppers”, who cleared strongpoints of the enemy that had been bypassed by the lead units. Many of the enemy were holed up in their deep dugouts. Mopping up involved bombing sheltering dugouts, attacking pockets of resistance, disarming prisoners and sending them to the rear under escort, and fighting the bitter-enders. Other clusters of men were “carrying parties”, marching steadfastly forward lugging mortars, picks, shovels, ammunition, water and bombs. Other men were “runners”, carrying messages, and others were “flag wavers” who would signal to low-flying aircraft when an objective was reached. Adding to this, traipsing through the Canadian lines were another group of soldiers, dejected and in mud-stained grey uniforms, were surrendering Germans. They were sent back without escorts, some were used as stretcher-bearers.

- Along the far right edge of the battlefield, Currie’s **1st Division** swept along 4 kilometres (the longest advance) of the most gentle terrain; advancing through three sets of front line trenches, a second defence system half-way up the slope (Zwischen Stellung trench), and a German strong-point known as the Chain Trench. The 1st Division successfully reached their final objective at the outskirts of Farbus and Farbus Wood at 1:30 pm.

The **2nd Division** advanced through a shorter distance (3.2 km) but steeper slope; also through three sets of front line trenches, the second defence system (Turko Graben trench), over the hamlet of Les Tilleuls and the ruins of Thelus, and a series of support trenches. They successfully reached their final objective of a belt of woods along the base of the ridge on the German side at the village of Farbus at a little before 2:00 pm.

The **3rd Division** advanced an even shorter distance (1.2 km) and steeper slope; advancing through three sets of front line trenches, and successfully reached its final objective in La Folie Wood by 8:00 am. With its main attack over in just two and a half hours, the division faced an unexpected hazard—on its left flank, the 4th Division hadn’t yet seized the heavily fortified German defences on Hill 145. The battalions found themselves exposed to merciless fire, raining down on them from the highest point on the ridge. Though the 2nd and 3rd Divisions had shorter distances to advance than the 1st, they sustained higher casualties. Only one of the four Canadian divisions failed to conquer all its objectives by noon.

At the far left, the **4th Division** faced the shortest distance, 700 metres, but the hardest climb and the best-defended section—up against “Hill 145” (its height in metres), the highest point on the ridge. Planners had badly underestimated the strength of this section; did not realize the Germans had a carefully camouflaged network of concrete machine-gun nests; erred in asking its artillery to leave one German trench undamaged; and were under fire

on the left flank from “The Pimple”. By mid-morning it had become terribly clear that the 4th Division’s Vimy assault was in chaos, with few of the attackers able to reach their objectives, and many who did had been hurled back. As 4th Division casualties grew (the highest number of the four divisions), in order for the set-piece attack to be successful, Hill 145 on the right flank had to be taken that day.

The decision was made to send in fresh troops—the only source, the 85th Battalion, better known as the **Nova Scotia Highlanders**, a work battalion, not a fighting unit. Exchanging picks and shovels for rifles, machine guns and grenades, at 6:45 p.m., with no covering barrage, two companies of Nova Scotians made a heroic frontal bayonet charge against fortified machine-gun positions on Hill 145. As men were cut down by a hail of enemy fire, the Nova Scotians firing rifles and Lewis guns from the hip, did not falter, crashing through the German lines bayonets first, shooting, stabbing, and clubbing the enemy. Within one hour, the Highlanders had captured the upper ridge of Hill 145, and the last strongpoint on the ridge was in Canadian hands as the sun went down. By the end of the first day, most of the crest, save for the Pimple, was in Canadian hands.^{4G, 5A, 7Z, 8H, 8U}

- The first day Vimy operation had been terribly costly, with thousands of casualties suffered. Four Victoria Crosses were awarded to Canadians for uncommon valour that day, three of them posthumously. A member of the 2nd Division, as he made his way into the fight at about 9 a.m. on the opening day recounted, *“Wounded men (were) sprawled everywhere in the slime, in the shell holes, in the mine craters, some screaming to the skies, some lying silently, some begging for help, some struggling to keep from drowning in (water-filled) craters, the field swarming with stretcher-bearers trying to keep up with the casualties.”*^{2N}

April 9, 1917 was the **single bloodiest day** of the entire war for the Canadian Corps, and the bloodiest in all of Canadian military history (10,000+ killed and wounded): worse than Beaumont Hamel on July 1, 1916; worse than Dieppe on August 19, 1942; worse than D-Day on June 6, 1944; in fact, worse than all three combined.^{4G, 7R, 7Z, 8H} Two Samians lost their lives on that first day; Frederick Johnson and David Kerr.

Over the course of a miserable April 9 night of cold and snow, stretcher-bearers worked without sleep trying to clear the battlefield and provide hasty first aid while trying to avoid enemy sniper fire and shelling. On the next day, **April 10**, there was no rest for the 4th Division, as the eastern slope of Hill 145 and the woods at its base were still held by the enemy. In the mid-afternoon April 10, two battalions of the 10th Brigade (4th Division—50th and 44th Battalions), advanced following a creeping barrage, and successfully drove the remaining defenders off the lower eastern slope of Hill 145 and from the La Folie Woods at its base. Canadians had captured the highest and most heavily defended feature on the ridge—Hill 145.

On the third day, **April 11**, the Canadians had time to lick their wounds, a full twenty-four hours of rest, reorganization, consolidation and digging in. Waking up to everything covered in a thick blanket of snow and the temperature dropping, reserve battalions moved up to relieve the exhausted men in the front lines. Across a valley at the northern edge of the ridge stood another German stronghold—the “Pimple”, a high point of about 135 metres. Strengthened with concrete pillboxes and bristling with hidden snipers and machine guns, it was a maze of tunnels, dugouts, holes, trenches, and entanglements, all carefully camouflaged and protected by mines, barbed wire and booby traps.

On the fourth day, **April 12**, the Canadian 44th, 46th and 50th battalions were assigned the task of completing the job. In the early morning still dark hours of April 12, in a raging snowstorm, the three Canadian battalions advanced behind a creeping barrage and were able to successfully capture the “Pimple” in less than two hours. A member of the 50th Battalion that had attacked “The Pimple” wrote the following; *“From the very first minute of the attack we came under murderous and hellish fire from the machine guns... we lost about 30 per cent of the fighting forces before we got into his green line of trenches and then went into hand-to-hand fighting... As we looked back up that ridge in the early dawn we witnessed a scene never to be forgotten. The entire face of the hill was covered with German green and Canadian khaki. Men lay out there in that blood-soaked field, some dead, some dying.”*^{4G}

- In the days following the capture of the ridge, part of the sobering work carried out by the infantry involved scouring the battlefield for their fallen comrades, collecting information on the dead (especially the two-part identification disk, known as a dog tag in the next war), sewing them in their blankets, and burying them in mass graves. The dead were often buried where they lay, in communal graves in mine craters and shell holes—as many as one hundred to a single grave.

• **The Cost:** Of the 97,000 Canadians who fought at Vimy Ridge, approximately 7,004 were wounded and 3,598 lost their lives in four days of battle. Added to that number were another 9,553 casualties suffered at Vimy in the months before the battle due to sniper fire, artillery fire, and trench raids.^{4G, 5J, 7R, 7Z, 8H, 8U}

At least four young men from Sarnia gave their lives in the four-day Battle of Vimy Ridge, including; Frederick Johnson, David Kerr, Roy Lumley and David Montgomery.

As mentioned earlier, the Battle of Vimy Ridge was part of a larger British Empire offensive, the Battle of Arras, from April 9 to May 16, 1917. The capture of Vimy Ridge would be the sole successful operation in the slaughter and stalemate of the Battle of Arras. Though the British suffered over 150,000 wounded, missing or killed while the Germans incurred between 130,000-160,000 casualties, the Battle of Arras is generally considered a British victory due largely to the capture of Vimy Ridge. Following the battle, the Germans built new defensive positions and the stalemate resumed. Though the Battle of Vimy Ridge was a seminal battle and significant victory for Canada, it was not a turning point or breakthrough in the war. After 2 ½ years of losses and stalemates, Vimy was a much-needed Allied victory—one that the Canadians delivered.

• **Vimy News in Sarnia:** On the front page of April 13, 1917 edition of the *Sarnia Weekly Observer*, local citizens read the special cable to the *Observer* with the headline, “*All Canada’s Troops Are in The Big Fight Now*” - *The Canadians have smashed the German lines again. Trenches were taken one mile south of Vimy in an impetuous dash. All four Canadian Divisions are engaged in the present battle of Arras. General British advance continues.*

A second headline read, “*How the Canadians Stormed Vimy Ridge*”, with subheadings, “*Cheering, Singing and Confident They Swept Up the Slopes of the German Stronghold Through Snow Storm*” and “*They Clear the Way for Victory Along the Whole Line – Seven Lieut-Colonels and 3,000 Men Surrender*”.

Following is a portion from that news report (dated April 10):

...The manner which the British have advanced over scores of German trenches which the Germans must have believed would protect them indefinitely has been little short of miraculous. The Germans themselves have been amazed at the audacity of the invaders and have surrendered with an air of complete mystification.

The success of the attack launched yesterday against some of the strongest sections of the German lines of the entire Western Front seems to prove the fact that the artillery has finally solved the problem of entrenched warfare. It has taken months and years of preparation, but when the guns were finally massed against the Germans’ front they hammered it into submission... Today the intrepid airmen were covering the advance everywhere, keeping the troops advised of enemy movements and enabling the British artillery to shell every area where concentrations appeared to be taking place. The day was anything but ideal for flying. It was blustery from sunrise to sunset and furious snow squalls were in the air at half-hour intervals... Tonight the Canadians triumphantly announced that the famous Vimy Ridge had been cleared of all Germans. Vimy Ridge has been an historic battleground in this war. The country on either side is dotted with graveyards, in which lie tens of thousands of French and German soldiers, who gave up their lives in the fight, either to take or to hold this imposing position. The British, too, have tasted the bitterness of the battles there, and the Canadians had been holding on to a slender position on the western slope all winter only by the display of the most tenacious courage.

In connection with the new offensive it was determined that Vimy must fall. The ridge positions had been flayed by an incessant bombardment for ten days and nights, when yesterday at dawn the Canadians climbed out of their lowly trenches and began moving toward the top of it. They fought their way from the foot to the crest before mid-afternoon yesterday; today they swept down the farther slope, and now dominate the enemy remaining in the Douai plains... More than three thousand Germans in the Vimy garrison, including one hundred officers, fell into Canadian hands before sunset last night.

The Canadians did not for a moment underestimate the seriousness of the task before them in taking Vimy. They knew that the artillery had paved the way to success, but were frankly surprised when they saw what the guns had actually done. They found hundreds of Germans holding up their hands over the bodies of their fallen comrades and begging for something to eat. These men said they had been cut off for days from all supplies by the steadiness of the artillery fire. They could not retire, and no relief supply columns from the rear ever reached the region where the shells had been falling in continuous showers...

Also on the front page of the April 13, 1917 *Sarnia Weekly Observer* was a report from Stewart Lyons, a special correspondent of the Canadian Press at Canadian headquarters in France. Following is a portion of that report:

...Now that the list of casualties from the last week are beginning to appear in the Canadian Press, it may

bring solace to the sad hearts to know how carefully the wounded were handled and reverently the dead were buried. Hospital arrangements were made to handle far more than the number actually wounded. Extra ambulances were provided at the front, and many supplementary dressing stations were opened. There was little congestion anywhere. Over two thousand who were wounded on the first day were able to walk back to the stations without aid. Sorrowing relatives in Canada of the unreturning brave men may take comfort in the fact that their dead have been cared for as reverently as if they had been laid to rest in the family plot at home...

In the same April 13, 1917 edition of the *Sarnia Weekly Observer*, Sarnians learned the news that the: “149th Battalion Arrives Safely in England”. The 149th Battalion, based out of Watford, was the only unit raised exclusively in Lambton County. They were part of a total of over 8,100 Canadian troops from across the country to arrive in England at that time. More information on the Lambton 149th Battalion is on page 86.

- **A Cross at Vimy:** In the aftermath of the Vimy battle, many of the Canadian units erected memorials or built monuments to mark the sacrifices. Following is a portion of a letter written by Captain Thomas McGill, who was an accountant with the Canadian Bank of Commerce in Kingston prior to enlisting in the war in 1915. Thomas wrote the letter in early July 1917 from France to Charles Foster, who edited the pamphlet “Letters from the Front,” which followed the fortunes of Canadian soldier-bankers throughout the war. Captain Thomas McGill was present in early July 1917 with about 100 men for the unveiling of the 3rd Divisions memorial:

Dear Mr. Foster,

... Have you seen in the papers that a cross has been erected on the highest point of Vimy Ridge by the Third Division to commemorate the loss of our men in the battle? I was at the ceremony and greatly impressed. There were only about one hundred there altogether. It took place at twelve noon. Sharp on the tick of twelve all the big guns in our area fired three volleys at the German lines as a salute, while the men all present presented arms. Then the ceremony began; a hymn, a prayer, a lesson, the Lord's Prayer, a dirge by the pipes, the funeral march by the band and then 'God Save the King.' I have never seen men stand straighter or with their heads more proudly lifted, for each felt that a little bit of his own heart was buried there too. During all the ceremony we stood with our backs to the German lines, clearly visible below us though a mile or so distant, and between the cross and them; but when we sang 'God Save the King' we turned our faces again to the front. The bands had been warned to play softly lest it draw fire upon us, but, when that came, discretion was thrown to the winds and I hope our challenge reached them. Then we saluted the cross and left it there, looking down towards the trenches we took that day on one side and on the other across a mile or so of valley towards the present front lines. Altogether it was a very satisfactory little ceremony, and one felt less poignantly as he passed a little wooden cross which read, 'Here lies an unknown Canadian who fell in action, 9th April, 1917.' ^{7A, 8H}

- **THE CANADIAN NATIONAL VIMY MEMORIAL:** In early 1919, the Battle Exploits Memorials Commission in England, began work on selecting a number of battle sites for war memorials, including to Canadian forces. Canadian officials identified eight sites that were important to the Canadian Corps (5 in France, 3 in Belgium). In September 1920, the Canadian Battlefields Memorials Commission (CBMC) was created to oversee the erection of the memorials and to set competition rules to find an architectural design for the overseas sites. Originally, the decision was that each battlefield would be treated equally, so all eight sites would be graced with identical monuments. Some 160 design drawings were submitted, which was shortlisted to seventeen finalists. Each of those artists was given \$500 to prepare a plaster 3-D model of their proposal. One design was so stunningly different that the jury quickly suggested it not as a model for all eight battlefield memorials, but as Canada's one and only national war memorial in Europe. In October 1921, Canadian sculptor Walter Allwards' design was chosen to be the national war memorial.

Walter Seymour Allward, born 1876 in Toronto, resided in Toronto during the war, and experienced first-hand the fear and grief felt by Canadians who had sent their sons and neighbours into battle, some never to return. Following is Allward's description of the dream he had that inspired the Vimy monument:

When things were at their blackest in France, I went to sleep one night after dwelling on all the muck and misery over there, my spirit was like a thing tormented... I dreamed I was in a great battlefield. I saw our men going in by the thousands and being mowed down by the sickles of death... Suffering beyond endurance at the sight, I turned my eyes and found myself looking down an avenue of poplars. Suddenly through the avenue I saw thousands marching to aid our armies. They were the dead. They rose in masses, filed silently by and entered the fight to aid the living. So vivid was this impression, that when I awoke it stayed with me for months. Without the dead we were helpless. So I have tried to show this in this monument to Canada's fallen, what we owed them and we will forever owe them. ^{D, 21, 2J, 3R}

The CBMC then had to decide which of the eight battle sites to place Allward's memorial. Originally, it recommended that the memorial should be erected at Hill 62 in the Ypres salient, near the site of the June 1916 Battle of Mont Sorrel in Belgium. The Vimy site had its detractors, including Sir Arthur Currie. It was Canadian Prime Minister William Lyon Mackenzie King that made the difference in the memorial site choice. He believed Vimy Ridge was "hallowed ground" and the right site for "Canada's altar on European soil." In June 1922, the French government ceded to Canada, "freely and for all time to the Government of Canada the free use of a parcel of 100 hectares located on Vimy Ridge" according to the treaty, in perpetuity to honour the country's sacrifice on behalf of France during the war. By December 1922, the decision was made to locate the Allward memorial at Vimy Ridge.^{8H}

It took 2.5 years to clear the fields surrounding the monument site of unexploded bombs, artillery shells, grenades and human remains. It took Allward over three years to select a stone that was the right type for his monument. After visiting numerous quarries and inspecting other memorials and cathedrals throughout France, Italy, Spain, and England, he eventually chose a limestone known as Seget, obtained from an ancient quarry near Split in Yugoslavia. It was not until 1926 that the decision was made to inscribe the names of Canada's missing along the front walls and up the staircase. Allward even designed his own lettering, and it took four years to sandblast all the names in continuous bands into the stone. Along the main road to the memorial, 650 maple trees that had been sent from Canada were planted. In total, it took 14 years to create the monument, from design to completion. In one lull in construction, parts of the Canadian and German front line trenches were preserved—sand bags were filled with concrete and concrete replica duckboards were laid down, and a portion of the Grange Subway was opened and made safe for tourists.^{5A, 8H, 8U}

The Canadian National Vimy Memorial (it's official title) sits atop Hill 145, the main height on the Ridge. It stands as a tribute to all who served Canada in battle and risked or gave their lives in the Great War. The twin 30-metre pillars of white stone, rising from the ground where soldiers were mired during the fighting, represent France and Canada joined together in friendship. On and around the memorial are twenty allegorical figures representing *Truth, Faith, Hope, The Defenders, Honour, Charity, Grieving, Knowledge* and the two figures at the pinnacle; *Justice and Peace*. There is also a central figure in the front of the sheltering pillars, ***Canada Bereft***, also known as "Mother Canada". Standing alone, with head bowed, holding wilting lilies, and peering at a sarcophagus below, she weeps for her fallen sons. Above the tomb is a single plaque that reads in English and French, "TO THE VALOUR OF THEIR COUNTRYMEN IN THE GREAT WAR AND IN MEMORY OF THEIR SIXTY THOUSAND DEAD THIS MONUMENT IS RAISED BY THE PEOPLE OF CANADA."

On the ramparts of the memorial are inscribed the names of 11,285 Canadian soldiers killed in France whose final resting place is unknown, who were listed as "missing, presumed dead" – an army of the dead that will stand together for all time. Unlike many war memorials, the Vimy memorial has no rifles, no soldiers, no helmets, no symbols of fighting and victory. Canadian historian and author Tim Cook described the Vimy Memorial as, "*a monument to peace, not victory, an homage to loss and death, and a call to remembrance.*"^{8H, 8U} At least twenty-eight young men from Sarnia have their names inscribed on the Canadian National Vimy Memorial in France: Ralph Ackerman, Robert Batey, Cameron Bissett, Norman Brearley, Frederick Chester, Stewart Cowan, Jesse Croucher, William Eddy, Fred Edwards, Roy Fair, Albert Fitzgerald, Peter Ford, George Giles, George Gray, Percival Guertin, George Hall, George Harris, Amos Iveson, Frederick Johnson, Albert Ketch, Thomas Knowles, Charles Major, Andrew McIntosh, John McMutrie, Albert Rodber, Daniel Thomson, Bertrand Weatherill and Andrew Wyseman.

The Canadian National Vimy Memorial

- **Vimy Memorial Unveiled:** Vimy fever reached its peak in 1936 in the most remarkable peacetime outpouring of national fervor the country had yet seen. The Vimy Memorial was unveiled by King Edward VIII on a warm, sunny July 26, 1936 afternoon before a crowd of more than 100,000 spectators, including more than 6,200 Canadian veterans and their families who, at the height of the Depression, paid their way across the Atlantic to stand on Vimy Ridge. The journey—the largest ever peacetime movement of people from Canada to Europe—required five ocean liners for them all, and was properly called a **pilgrimage**. Among the pilgrims were 50 Silver Cross mothers and widows, women who had lost sons or husbands in the war. Many of the elderly women travelled alone, though they found solace in each other's company on the ships. The Canadian Radio Broadcasting Commission (forerunner of the CBC) broadcast the unveiling ceremony live to Canada over the national radio network, while the British shortwave broadcast was heard worldwide.^{7Z, 8H}

On July 26, 1936 in Sarnia, Sarnians observed Vimy Day in Sarnia and Port Huron. In a morning ceremony, a delegation of members of the Canadian Legion, Sarnia branch, and a number of veterans, visited the memorial stone at Lakeview cemetery, placing a wreath in memory of those who fell at Vimy Ridge. In the afternoon, approximately 200 locals, including members of the Canadian Legion, Sarnia branch, the Lambton Regiment, the Imperial Pipe Band, the Ladies Auxiliary and veterans from Sarnia, Petrolia, Forest and Wallaceburg attended a Vimy memorial service and parade in Port Huron. The ceremony was primarily in honour of deceased members of the 42nd Rainbow Division of Michigan, but was made into a dual celebration to celebrate Vimy Day. Among the speakers at the event were George Stirrett, representative of the Canadian Legion, and Major William Doohan, representative of the Lambton Regiment. American, Canadian, British, Belgian and even several German veterans also attended the event.

The next day, the *Sarnia Canadian Observer* dedicated an entire page to the Vimy Memorial unveiling and pilgrimage under the headline, "Canada Pays Homage To Heroic Dead At Vimy Ridge". The page featured a number of stories with headings that included: King Unveils War Memorial For Dominion; Into Battle (with details of the battle and infantrymen); Memorial Facts; Battle Scars are Healed on Quiet Somme - Pilgrims Recall Scenes of Great Triumph and of Sorrow; Mons Greets Men Who Won City Freedom; Veterans Visit Former Billets; and Lt-Gen. Sir Arthur Currie. The following days' front page *Observer* headline read, "A Nation Mourns and Remembers - Canadian Pilgrims Scatter After Rendezvous With Memory At the Unveiling Of the Vimy Memorial". The story began with, "Canadian pilgrims – veterans and their kin – turned toward home today, or scattered on special journeys to fields of their own choosing, scenes of old battles and acres of fading crosses..."

- **1936 World events:** At the same time as the Vimy Memorial was being unveiled, new conflicts were arising in Europe. A vicious civil war was beginning in Spain, fought between the Republicans (supported by the Soviet Union and Mexico) and the Nationalists (supported by Nazi Germany and Italy). The civil war would last almost three years and result in hundreds of thousands being killed.

A revitalized Germany was under Nazi control, its' leader dictator Adolf Hitler had been appointed Chancellor in 1933. With the Gestapo, SS secret police and concentration camps already established, and the Nuremberg Laws enacted, in November 1936 Hitler mandated that all males ages 10-18 must join the Hitler Youth. In March 1936, a remilitarized Germany would reoccupy the Rhineland (on the border with France). Neither Britain or France acted on this direct contravention of the Treaty of Versailles.

Also in 1936, Italy who under its' dictator Benito Mussolini, had invaded Abyssinia (now Ethiopia) in October 1935, won a major victory there in April 1936, and took its capital in May 1936. Once again, Britain, France and the League of Nations were ineffective in responding to this aggression. In November 1936, Nazi Germany and Fascist Italy announced a Rome-Berlin Axis, and later in the month, Nazi Germany and Imperial Japan signed an Anti-Comintern Pact directed against the Soviet Union. As well in November 1936, Japanese backed forces attacked a province in China in the Suiyuan Campaign. All these events set the stage for a looming worldwide conflict.

- **Vimy Memorial destroyed?:** Three years later, after invading Czechoslovakia, Germany invaded Poland on September 1, 1939, marking the beginning of World War II. In 1940, Germany invaded Denmark, Norway, Belgium, Luxembourg, the Netherlands and France. Soon after the Allied troops evacuated from Dunkirk, the French surrendered in late June 1940. Before the French surrender, Canadian newspapers reported on June 1 that the Vimy Memorial had been blown up by the Germans. A front page headline in the June 1, 1940 *Sarnia Canadian Observer* read, "Report Canada's Memorial Atop Vimy Ridge Smashed to Pieces By Nazi Bombs". Following is a portion of that story:

Canada's memorial to her First Great War Dead atop Vimy Ridge has been smashed to pieces in deliberate bombing attacks by the Germans, according to British Tommies returned from the hell of the fighting in Flanders.

One soldier, weary and battle stained after the bitter rearguard action of the Allies, told his story a few hours after landing in England. "I stood near the memorial and saw German dive bombers sweep down and release a load of bombs over the memorial. It was completely shattered. The attack was obviously deliberate."

... An eye-witness to the destruction of the memorial said the planes returned later and bombed British, French and Canadian military cemeteries in the vicinity of Vimy Ridge, blasting the tiny crosses into fragments and wrecking the graves...

Also on the front page of the *Sarnia Observer* was a story on Allward's response to the news, with the headline, "Report Shocks Vimy Sculptor". Following is a portion of that story:

Sculptor Walter S. Allward today received with great sadness eyewitness reports from London that German bombers deliberately shattered Canada's Vimy war memorial, which he designed and on which he labored for 14 years... "I only hope the reports are not true," the 65-year-old sculptor told the Canadian Press at his home in suburban York Mills. "It seemed inevitable, however, that this terrible thing would happen in these terrible days. The Huns have gone quite mad... The memorial, you know is in an open field. It isn't in the heart of a village and there aren't any military objectives nearby – only the cemeteries in the neighbourhood and clear ground all around."...

Expressing hope that the memorial might not be beyond repair, Allward added, "But that is in the hands of the gods. This is a sad commentary on civilization," he continued, his voice husky with emotion. "I really can't say any more about it at the present time."

Outraged Canadians learned within a few days that the memorial had not been destroyed. Several days later, they learned that Hitler had visited Vimy, and several newspapers featured a photograph of the Fuhrer, in his greatcoat and peaked hat, inspecting the memorial with his entourage of conquering generals. During the course of the war, the Nazi's destroyed many of the memorials belonging to the Allies, but the Vimy memorial survived thanks to an order by Hitler. Hitler actually served in the First World War and in a strange twist, his unit was scheduled to be sent to Vimy Ridge just weeks before the Canadian attack. However, at the last minute there was a change and his unit was dispatched to a location a few kilometres away. He had a special respect for Vimy and admired the monument, and he was also concerned about the 45,000 German soldiers buried nearby.

Over the course of the Second World War, the Vimy Memorial remained standing in occupied France, unseen and unvisited by Canadians. French civilians in the Arras area continued to honour the dead at Vimy by laying wreaths at the memorial on Vimy Day and Remembrance Day. After defeating the Germans in the Battle of Normandy, Canadians rejoiced at the welcome news that Vimy Ridge had been recaptured by a British armoured regiment on September 1, 1944. Canadian General Harry Crerar, a Vimy veteran and Commander of the Canadian First Army, visited the site that day. In November 1944, a special Remembrance Day ceremony was held at the memorial by Canadian representatives and the people of Arras, at which the memorial was decorated with flowers and some 500 school children were present.^{5A, 8H}

• **Vimy Memorial 2007 Rededication:** Over the decades after World War II, neglect, wear from tourists, and the elements—wind, rain, sleet and temperature fluctuations all took their toll on the Vimy Memorial. Sculptures and walls became faded and discoloured or darkened from mould; there were cracks in the masonry; joints had weakened; there were lime deposits; the base was crumbling; stones had disfigured; and many of the inscribed names had eroded.

In 2002, the Government of Canada launched a major project to restore Canada's memorial sites in Belgium and France, including the Vimy Memorial. Work began in 2003 with a team that included architects, engineers, stonemasons, and forestry and landscape experts. The memorial was shrouded for two years as much of it was taken apart piece by piece. Restoration included dismantling and rebuilding stone structures, cleaning, sealing the concrete, replacing and re-engraving damaged stone, and adding new stone in place of older stone that couldn't be restored.

Following the extensive multi-year restoration, on April 9, 2007, Queen Elizabeth II rededicated the Vimy Memorial (just as her uncle Edward VIII had unveiled it in the summer of 1936), at a ceremony commemorating the 90th anniversary of the battle. The crowd attending the rededication ceremony was the largest crowd on the site since the 1936 dedication. With only a handful of Canadian Great War veterans still alive, and all of them over 100 years of age, there would be no eyewitnesses from the battle. The last Vimy veteran, an underage soldier who served with the 43rd Battalion, had died in May 2004, at age 105. Among the 20,000+ attendees were several thousand Canadian

high school students, each carrying with them the story of a soldier who fought or fell in the war. The ceremony was broadcast live across the country on radio and television. The 90th anniversary would elevate Vimy into the social consciousness: it inspired a number of films, books and a play; the Royal Canadian Mint struck a commemorative thirty-dollar silver coin; the Canadian Forces, fighting in Afghanistan since late 2001, created a new Sacrifice Medal for killed and wounded service members (with an image of mourning *Canada Bereft* from the Vimy Memorial); and Parliament reaffirmed April 9 as Vimy Ridge Day. Following are portions of Queen Elizabeth's rededication speech:

"In any national story there are moments and places, sometimes far from home, which in retrospect can be seen as fixed points about which the course of history turns, moments which distinguish that nation forever. Those who seek the foundations of Canada's distinction would do well to begin here at Vimy... Within just a few hours, on that cold and gloomy Easter morning, the Canadians became masters of this ridge, managing what most thought impossible... the Canadian Corps transformed Vimy Ridge from a symbol of despair into a source of inspiration. After two and a half years of deadly stalemate, it now seemed possible that the Allies would prevail and peace might one day be restored... The victory at Vimy allowed Canada, who deserved it so much, to take its rightful place on the international scene as a proud, sovereign nation, strong and free."^{D, 8H, 8T}

Interest in the Vimy rededication/90th anniversary ceremony was further intensified by events coinciding with Canada's military operations at the time. The Vimy ceremony was set against Canada's military operations going on in Afghanistan at the time. Canadian Forces were working to destroy the terrorist al Qaeda and Taliban organizations, and to try to bring some semblance of order and stability to that nation.

On April 8, 2007, one day before the Vimy ceremony, six Canadian soldiers were killed in combat in Afghanistan. The interplay of Vimy and Afghanistan created new meaning for the old battle.^{8H} One of the Canadian soldiers killed on April 8 was from Sarnia/Cambridge – **Corporal Brent Poland** of the Royal Canadian Regiment. Corporal Poland's story is included in the Afghanistan Peacekeeping section of this Project on page 1148.

• **The Birth of a Nation:** Immediately after the 1917 Vimy battle, those who were there understood it was a significant victory. In letters home, framing it as a Canadian victory, soldiers took great pride in telling how they took one of the enemies' greatest strongholds, one that the British and French had failed to take in two years. The Old Country immigrants, new to Canada, who had thought of themselves as British, now thought of themselves as Canadian. As one Brit said, *"I never felt like a Canadian until Vimy, after that I was a Canadian all the way."* Canadian newspapers, along with British, French and even American papers enthusiastically extolled the Canadian victory. The *New York Times* wrote that the battle would be "in Canada's history, one of the great days, a day of glory to furnish inspiration to her sons for generations."

For Canadians, the significance and interest in Vimy Ridge has ebbed and flowed over the generations. In the 1920's, Vimy was very significant for the veterans and family members who sacrificed, who were trying to make sense of the war. Vimy fever reached a peak in 1936 with the unveiling of the Vimy Memorial. After the "necessary war" against Hitler's tyranny, it was largely forgotten. In the mid-1960's, it gained attention with Canada's Centennial and Vimy's 50th anniversary. Interest in celebrating military history and honouring veterans really faded in the late 60's and early 70's due to a variety of cultural and social reasons. In 1992, on the 75th anniversary of Vimy and when it was designated a national historic site, there was a resurgence of interest. The legend of Vimy was rejuvenated at the 2007 rededication/90th anniversary, and again in April 2017 at the 100th anniversary of the battle and the 150th anniversary of the country.

The victory at Vimy Ridge was the pinnacle of Canadian military achievement, igniting a sense of national pride from coast to coast, and a confidence that Canada could stand on its own as a nation. Vimy was the turning point in the war for the Canadian Corps. It was the first major Allied victory of the war on the Western Front, in which the Canadians captured more ground, more prisoners, and more guns than any previous operation, all of which had been done against the heaviest of odds. According to historian and author J.L. Granatstein, *"For the soldiers, no matter from where they came, no matter their origin, no matter how short a time they had lived in Canada, after Vimy they were all Canadians and bloody proud of the shoulder flashes and cap badges that proclaimed their allegiance."*^{5J} From Vimy onward, the Canadians never lost another set-piece or major engagement, delivering victory after victory, and often against the most formidable of defensive positions. By war's end, the Canadian Corps had fully earned their reputation as elite "shock troops".^{4G, 7Z, 8H, 8U}

Brigadier-General Alexander Ross, a battalion commander at Vimy, recounted in 1967 (on the 50th Anniversary of the battle) his feelings when he watched the Canadian troops advance and capture Vimy Ridge: *"It*

was Canada from the Atlantic to the Pacific on parade. I thought then that in those few minutes I witnessed the birth of a nation."^{D, 8H} In April 2003, the Government of Canada declared that the date April 9 would annually be known as "**Vimy Ridge Day**".

- **The Sarnia Vimy Ridge Memorial:** The idea for this memorial was initiated by City of Sarnia supervisor of forestry/horticulture Chuck Toth, as a way to commemorate the 100th Anniversary of the Battle of Vimy Ridge. With the full support of Sarnia 1st Hussars Association, along with Ken Hall, Tom Slater, Lou Giancarlo and Tom St. Amand, the Vimy Ridge Memorial was unveiled in April 2017. Located on the west side of the Sarnia cenotaph, it includes a Vimy memorial park bench (created in Scotland); and a Vimy Ridge storyboard providing information on the Battle, the Canadian National Vimy Memorial, the Vimy Ridge English Oaks and the Sarnia sacrifices at this battle. Also on the west side of the cenotaph, four English oak trees were planted to commemorate the four soldiers inscribed on the Sarnia cenotaph who lost their lives in the Battle of Vimy Ridge. The oak trees are significant in that they are representative of the Vimy Oaks Project. More information on the Vimy Ridge Memorial is on page 19.

- **VIMY OAKS:** One of the men at Vimy Ridge in April 1917 was Canadian Expeditionary Force soldier **Lieutenant Leslie H. Miller**. Born on October 5, 1889 on the family farm in Scarborough, Ontario, his goal had been to be a teacher. Following his studies at the University of Toronto, he moved to Saskatchewan to teach. It was there in October 1914 that he enlisted, and after training in England, he arrived in France in October 1915. He would serve as a communications specialist in the Signal Corps, assigned to the 5th Battalion.

Over the course of the Battle of Vimy Ridge, nearly every tree in the once-forested area was destroyed. After the Battle was won, many soldiers realized that they had been part of something truly great. Lt. Leslie Miller looked around for a souvenir on the Ridge, which was completely devoid of structures or vegetation due to shellfire, but he did find a half buried dying English oak tree. This species of oak was native to Europe and were present on the Vimy Ridge area before they were destroyed in the war. Leslie Miller gathered up a handful of acorns and shipped them home to Canada. His father planted the handful of salvaged acorns on the Scarborough family farm. Leslie Miller, not knowing if he would survive to see them, was wounded twice but did survive the war.

Upon returning to Canada, for health reasons, Leslie Miller was unable to resume his teaching career. He enrolled at the University of Toronto with a major in modern languages, but his formal education was cut short when he contracted scarlet fever. The cure at the time was plenty of bed rest and fresh air for five years. His father gave him a 24-acre section of the family fruit farm. With the help of his dad and brother, Leslie built his own house and barn. He sectioned off parts of his property into an orchard, beehives, market gardens, and hay and alfalfa fields. The lot included a section of mature hardwood where ten saplings of his Vimy English Oaks were growing. He named his land "The Vimy Oaks". During the early 1950's, with many immigrants from Europe moving into the area, Miller offered them the opportunity to grow food on his farm, in return for help with his fruit and vegetable crops—probably the first community garden in Toronto. Miller tended to his farm and Vimy trees the rest of his life, until he died in 1979. Miller's farm is now the site of the Chinese Baptist Church in Scarborough, but his old woodlot where the trees were planted has been left undisturbed.^{2j, 7R, 7S}

The **Vimy Oaks Legacy Project** was founded by Monty McDonald, a friend of Leslie Miller who had worked on Miller's farm when he was a boy. The idea of sending some Vimy oaks back to France began in the mid-2000s by Monty McDonald. Monty had travelled to the famous battlefield and realized that none of the original oak trees at Vimy had survived the intense shelling. The not-for-profit corporation involved a small team of volunteers, in partnership with the Vimy Foundation, with a two-fold mission: to repatriate Vimy Oak saplings to Vimy Ridge; and to distribute commemorative Vimy Oak saplings across Canada.

In January 2015, the process began with professional arborists taking cuttings (scions) from the crowns of the "Vimy Oaks" on Miller's farm. These were then grafted onto French/English oak root stock. The saplings were grown at Dundas, Ontario's NVK Connon Nurseries using an accelerated method. The group hoped to have the project ready for the 2017 centennial of the Vimy battle, but that fell through when an outbreak of a disease affecting oak trees led the French government to ban tree imports.

Instead, McDonald gathered acorns from the original trees and flew them to France in 2016, where they were grown in a nursery. The young saplings were transplanted into the new **Vimy Foundation Centennial Park**, inaugurated in November 2018, located beside the Canadian National Vimy Memorial. The 1.8 hectare park features a Vimy Oaks grove of four concentric circles of trees forming allees, one circle for each Canadian Division who

fought at Vimy. Lt. Miller's repatriated oak trees serve as a living memorial to a defining moment in Canadian history.

Since 2017, the Vimy Oaks Legacy, partnering with NVK Nurseries, has offered for sale the oak saplings grown in Dundas, Ontario. These direct descendants of the English oaks destroyed during the Battle of Vimy Ridge, have begun growing at parks, schools, war monuments, Legions, cenotaphs and private residences across Canada.^{7R, 7S}

In late October 2019, three English oak trees from the Vimy Oaks Project were planted in Heritage Park in Sarnia. Planted by city arborists with the help of three members of the local Beavers Club, the oak trees are located alongside the Trees of Remembrance memorial in Heritage Park—102 autumn blaze maples planted in the shape of a cross in 2014 to honour the 102 Sarnia soldiers who lost their lives in World War I (names on cenotaph pre-2019). The park is located along a stretch of Highway 40 that in October 2019 was designated as "Veterans Parkway".

• **LORD JULIAN BYNG of VIMY in SARNIA, April 18, 1922:** The April 18 *Sarnia Canadian Observer* front page headline read, SARNIA WELCOMES THE GOVERNOR-GENERAL, with the sub-heading, Imperial City Gives Hearty Welcome to Lord and Lady Byng. Following is a portion of that story:

When his Excellency, Lord Byng of Vimy, Canada's warrior governor-general, Lady Byng and party arrived at the foot of Cromwell street in their special car shortly after four o'clock this afternoon, a reception was accorded them worthy of Sarnia and in keeping with the importance of the occasion. Hundreds of citizens welcomed the vice-regal party when they detrained and lined the streets over which the parade passed en route to the public reception at the city hall. When the train came to a halt, Mayor George Crawford and other civic dignitaries advanced to greet Lord Byng, who was the first to alight the train...

After formal greetings the vice-regal party, accompanied by the civic officials, moved up to the foot of Cromwell street where they were saluted by the Boy Scouts guard of honor. The governor-general and party were then escorted to waiting automobiles and the parade, with Lieutenant-Colonel Robert I. Towers commanding, moved north on Front street, which was gayly bedecked with flags, pennants, streamers and motto banners...

Participants in the parade included the Sarnia Band, Machine Gun Company, war veterans, Collegiate cadet corps, Sarnia Boy Scouts, Imperial Pipe Band, Civic and chamber of commerce officials, ex-mayors of the city, county officials and other prominent citizens of Sarnia and district. The parade made its way along George Street, College Avenue, Lochiel Street, Victoria Street, Davis Street, and up Christina Street to city hall where school children were lined up, each one bearing a small flag.

From the moment the governor-general stepped off the train the famous Byng smile was very much in evidence and all along the route of the parade, Sarnians capitulated... The Baroness, although she did not take as prominent a part in the ceremonies as her husband, nevertheless made a pronounced impression with her charming mannerisms and smile.

At the public reception at city hall, Mayor George Crawford read the official civic address of welcome which expressed Sarnia's pleasure in welcoming his majesty's representatives as well as the general who had endeared himself to the hearts of the Canadian people while in command of the Canadian troops in France... Mayor Crawford said, "On behalf of the citizens of Sarnia, I have much pleasure in extending to you on the occasion of this your first visit to our city; a heartfelt welcome to yourself and to Lady Byng. We welcome you to a city which has from earliest times been a point of settlement of the native races which preceded us here, and which has grown with the growth of Canada through the stages of villages and town to its present prosperity, and which, we hope and trust, may continue to keep pace in every way with the advancement of this Dominion and Empire..."

Sarnia has contributed her quota to the public life and to the public policies of Canada and, when it became necessary to make sacrifices toward a common end, this city and district, we hope, cannot be deemed to have been deficient. While this is the first visit you have made to our city, it is not as a stranger, Sir, that you come among us. Your name and achievements are well known to us all and most intimately perhaps to the seven hundred men who went from Sarnia to the great war, many of whom, five years ago this month, advanced on the Vimy frontage under your command in the action in which the name of Canada is linked with your name..."

Though it was cool, the sun shone brilliantly making it a banner weather day as thousands of cheering citizens lined the streets to pay respects to Lord and Lady Byng. *Sarnia was ablaze with color for the visit of the vice-regal party today, Front street being draped with flags and bunting, blowing merrily in the breeze, and the city hall was given special attention for the occasion. There was a warmth of color, which did much to make the citizens feel in a proper mood to celebrate, and they did so to the full measure of their physical powers. Sarnians were out in their*

best mood and the fame of the governor general had preceded him to such an extent that all classes were ready to accord him a hearty reception, and take him and his gracious wife to their hearts. Sarnia has seldom seen such a spontaneous cheering as greeted the vice-regal visitors today...

At the public reception held at city hall, many citizens were presented to Lord and Lady Byng. There were members of the ladies reception committee including representatives of the Sarnia Women's Council, the Young Women's Christian Association, the Great War Veterans' Association, the Sarnia Red Cross and the I.O.D.E. The civic reception committee included Mayor Crawford, Senator F.F. Pardee, Lieut. W.S. Haney, Col. W.W. McVicar, Col. R.I. Tower and Captain J.M. MacAdams. Invited guests included the M.P and M.P.P. of East Lambton, the M.P.P of West Lambton, Governor Groesbeck of Michigan, the Mayors of Port Huron, Forest and Petrolia, and members of the Sarnia Indian Reserve Band.

During the city hall reception, Lord Byng had a keen interest in chatting with many of the veterans he noticed wearing military service ribbons and gold stripes. The *Observer* added, *There were others on parade with service ribbons and little gold stripes, and the Governor-General did not fail to ask the name of the unit with which they served. He could recall in almost every case the name of the commanding officer of the men to whom he was talking... During the inspection of the parade Lady Byng stood on the steps of the city hall chatting with the mayoress, and taking a very keen interest in the crowds lined up in the square.* A presentation of a beautiful bouquet corsage of orchids and lillies was made to Lady Byng, who was described as *looking very charming wearing a full length raccoon coat, set off by a brown hat trimmed with two feathers.*

Following the public reception at city hall, the vice-regal party was driven to **Point Edward** where, *the parade moved north to a point just south of the Oddfellows hall where the governor general laid the corner stone of a memorial to the men of the village who paid the supreme sacrifice in the great war... The memorial has been a visionary project for the last three years... Point Edward is now erecting a memorial, which in tangible form, will help to commemorate the undying memory and glory of those valiant lads, who gave all and remained on the greatest battle fields of history, that Canadians might live in continued peace and safety. Their memories live today quite vividly, but in years to come the monument shall remind the future generations of their glorious achievements...* Point Edward Reeve William Darbyshire greeted the governor general with an address of welcome from the citizens of the village, and a copy of the address was placed in the cornerstone of the monument.

Returning to Sarnia at the completion of this ceremony the governor general next visited the Sarnia Service Club on Front street where he had a warm hand clasp for the veterans of Sarnia who were congregated there to receive him. He complimented the officers of the club on the excellent quarters they possessed and expressed pleasure at the hospitable reception accorded him... After being shown around the soldier's club, Lord Byng called the veterans present and they gathered around him. Old soldiers hung on each word of their former commander, who speaking in a quiet voice but with obvious feeling said, "You know that I am in Canada as the representative of His Majesty the King, I want you to feel also that I am here as your comrade. We were comrades in France, let us continue so. Comradeship is a wonderful thing boys, it held us together in those days, let it help hold us together now. You all know what we accomplished in the war when we pulled together. Let us pull together again here in Canada, and make it the most glorious of all Dominions. Boys I wish you the best of luck in all things, your business, your sports, in your club and in your homes." Cheer after cheer resounded in the confines of the club as Lord Byng passed through the former soldiers. The vice-regal party again entered the waiting cars that took them to their train, departing Sarnia at seven o'clock on their way to Stratford.

The editor of the *Sarnia Observer* added his thoughts on the Byng's visit to the city. Following is a portion of that column:

Sarnia today rejoices in the privilege of honoring His Excellency Lord Byng of Vimy and Lady Byng and extends to the representative of the King in Canada, that warmth of welcome that is accorded always by local citizens of the Dominion... The people are opening their hearts to a fearless soldier in whose care the destiny of Canada's soldiers rested, under whose leadership they achieved great fame as soldiers, and also to a man whose manly and democratic manners cannot fail to arouse personal respect and admiration.

The title of Lord Byng is associated with the outstanding achievement of the Canadian soldiers overseas. Nothing in the history of the war was so cleanly and so thoroughly accomplished as the magnificent attack on the heights of Vimy that brought fame alike to the brave soldiers of the Dominion and the brilliant leader, General Lord Byng.

Perhaps the finest tribute to sterling qualities of Lord Byng as a soldier and as a man, lies in the universal

regard in which he is held by those who served under him in France. Canadian soldiers obeyed, respected, honored and loved their commander, and the Canadian people as a whole welcomed and appreciated the action of the king in the appointment of the accomplished soldier as his representative to the Dominion... Thus Sarnia today strives to outdo itself in warmth of welcome to an English gentleman and lady.

At the reception at city hall, two large autographed sepia photographs, one of Lord Byng of Vimy and one of Lady Byng were presented to Mayor Crawford. These were to be framed and hung up in the city hall. Mayor Crawford was impressed by Byng and thought the reception was a credit to the city. He said, *"Both Lord Byng and Lady Byng were delighted and asked me to convey their thanks to the people of this city for the hearty reception accorded and the program of entertainment provided. To give you an idea of how they were impressed, the governor-general asked me the population of the city and when I told him, he remarked that judging from the crowd, nearly everyone must have turned out."* The Observer reported, *The public reception at the city hall gave the citizens an insight into the reason for Baron Byng's popularity. He greeted every citizen with not only a warm handclasp but a cheery smile and a look that evidenced his genuine pleasure at the opportunity afforded to meet such a large number of citizens. It was a distinctly memorable day in Sarnia's history.*

One of the headlines in the April 19, 1922, *Sarnia Observer* read, CORNER STONE OF MEMORIAL WELL AND TRULY LAID. Following is a portion of that story:

With solemnity and ceremony fitting the occasion Lord Byng of Vimy, governor general of Canada laid the cornerstone of the Point Edward Memorial yesterday afternoon while hundreds of villagers and Sarnians looked on. In answering the addresses of welcome read to him and Lady Byng and the introductory remarks of Rev. Welver... His Excellency said that the 22 lads from here who had given up their lives did it for three things, namely "For us, for their country and for liberty. If those boys were living," he said "They would tell us to work for Canada with all that is in us."

The Governor's speech was that of a soldier... his famous smile and general deportment completely won his audience. Lord Byng was not the only one to come in for the honors as Lady Byng made a very favorable impression with her charming personality... Immediately upon his arrival at the stone addresses of welcome were read by Reeve Darbyshire and Mrs. Darbyshire. Lord Byng was presented with a silver trowel which he laid the stone with and Lady Byng was presented with a beautiful bouquet of roses by little Ethel Lea. The ceremony covered 25 minutes as the Vice Regal party had to get down to Sarnia to entrain for Stratford. The crowd sang the Maple Leaf Forever... and God Save the King was followed by three loud cheers...

Two days later, an *Observer* article pointed out that the memorial at Point Edward was *being erected primarily in honour of the twenty-two men of the village who were killed in action in the great war, and also as a tangible tribute to all those men of the village who served. The total number of men who enlisted from Point Edward, including those of the home guard, was one hundred and four... The total population of the village ranges from twelve to thirteen hundred.* The memorial was erected by public subscription and all extra work was done voluntarily by members of the Point Edward Service Club. Built of limestone resting on a concrete base twelve feet square, the memorial tapers to a height of eighteen feet six inches. A copper tube was enclosed in the corner stone (laid by Lord Byng) that included a complete list of subscribers, a coin of the realm and a copy of the April 18, 1922 *Canadian Sarnia Observer*.^N The Point Edward cenotaph inscriptions are transcribed on page 1196.

• **THE ATTACK ON HILL 70 and LENS**, France, August 15-25, 1917: In July of 1917, British Command ordered the Canadian Corps to launch a frontal assault on the heavily fortified city of Lens with the objective to inflict casualties and draw German troops away from Ypres and Passchendaele in Belgium. Lens was a French coal-mining town barely 10 kilometres up the road from Vimy. This would be the first major battle orchestrated by the Canadian-appointed commander of the Canadian Corps, Lieutenant-General Arthur Currie, and fought entirely by Canadians (ie. the first time a Canadian had full command of the Canadian Corps).

The town of Lens was a shattered urban landscape of wrecked brick houses and barely recognizable streets surrounded by a labyrinth of slag heaps and destroyed mining installations, rail sidings and buildings. After studying the ground, Currie at first refused the order to attack the town. He argued attacking Lens against the tenacious, well-concealed and dug-in defenders would result in huge losses. Instead, he was able to convince his British superiors that a better plan would be to capture the German-held Hill 70 overlooking the ruined city of Lens. The Hill, 70 metres above sea level, had been in German hands since 1914 and it was well fortified. The treeless, blasted, gently rising chalky slope was a maze of deep trenches and dugouts, deep mines for protection, coiled barbed wire and bristled with German machine-gun strongpoints.

Canadian planning, rehearsals and preparation for the assault was extensive, however German troops had anticipated the upcoming attack, so for two weeks prior, saturated the Canadian area with barrages of high explosive, shrapnel and poison gas shells night and day. Hundreds of Canadians were killed and wounded before the battle had ever started. In the days before the attack, 500 Canadian and British gun batteries responded with both regular and gas filled shells in attempting to destroy enemy targets, trenches and barbed wire before the infantry went over the top.^{2E, 2I, 2N, 3O, 4G, 8F}

The attack on Hill 70 commenced on August 15, 1917 at 4:25 a.m., when the initial force of more than 5,000 Canadians in ten battalions surged forward into No Man's Land behind a creeping barrage rained down by more than 200 artillery pieces. After six minutes, the barrage lifted 90 metres forward and the attacking waves of infantry advanced. Thereafter, the barrage lifted at 90-metre bounds every four minutes, and the troops pushed up the hill, through the shell-torn landscape into the face of enemy fire. Canadian Arthur Lapointe of the 22nd Battalion described the assault in his diary; *"4:25 a.m. Zero hour! A roll as of heavy thunder sounds and the sky is split by great sheets of flame... I scramble over the parapet and... am one of the first in no man's land... The noise of the barrage fills our ears; the air pulsates, and the earth rocks beneath our feet... I feel I am in an awful dream. Now we are crossing ground so torn by our barrage that no soil remains in place... We reach the enemy's front line, which has been blown to pieces. Dead bodies lie half buried under the fallen parapet and wounded are writhing in convulsions of pain."*^{2E}

The rapid advance was assisted by the Royal Engineers, who propelled drums of blazing oil and poison gas into the enemy lines. Fierce fighting ensued, and as soon as the first objectives were secured, fatigue parties brought up ammunition, entrenching tools and supplies; signal linesmen laid wire to the new positions; and stretcher-bearers working in dangerously exposed positions evacuated the wounded. In less than two hours, the Canadians successful **"bite and hold"** tactic (established at Vimy) of advancing and constructing defenses enabled them to capture many of their objectives including the high ground. They added **"destroy"** to their combination of bite and hold: first capture ground-the *bite*; and then *hold* it; then using firepower to *destroy* expected German attacks.

The first of many German counterattacks began at 8:15 a.m. on August 15, and over the course of the next four days and nights, launched no less than 21 determined counterattacks attempting to recapture Hill 70. Each German attack was repulsed with the support of artillery and mortar fire; spotter aircraft from the Royal Flying Corps; the creation of deliberate 'killing grounds' that the Germans had to cross; and skillful use of machine guns and rifle fire. The bitter fighting was perhaps the most vicious hand-to-hand combat experienced by Canadians during the war, involving small arms, grenades, bayonets, clubs, fists and anything else that was handy. Canadian artillery fire was directed by observation officers atop Hill 70, using field telephones and, a first for the Canadian artillery, **wireless radio**. On August 17 and 18, German forces added to their assault arsenal a terrifying new weapon, the **flame thrower**, and for the first time against the Canadians, they used mustard gas.^{2E, 2I, 2N, 3O, 4G, 8F, 8H}

Mustard gas: This gas did not disappear as quickly as chlorine and phosgene gases, but instead polluted the battlefield for days or even weeks. It was difficult to detect right away and was slow-acting, killing nerve cells so that the victim would only start to feel the effects hours after being poisoned. Eyes became inflamed and swollen, skin blistered, and men vomited uncontrollably. At the clearing stations, the gas cases became hoarse, coughed harshly, and went blind. The body, as well as the throat and lungs, were burned and blistered by the poison, and nothing could be done to relieve the suffering. The victims began to die on the second and third days after the attack. Between 15,000 and 20,000 mustard gas shells were fired on the Canadian artillery positions on August 18, yet incredibly, the Canadian gunners were able to beat back the German counterattacks.^{4G}

Attack on Lens: With the overwhelming Canadian victory of Hill 70 by August 18, 1917 corps commanders decided to push into the city of Lens. The overextended Canadians would attack with a reduced force and were inexperienced in urban combat, while the Germans held all the observational and positional advantages. Canadian attacks into Lens were launched on August 21 and August 23. The superior German forces overwhelmed the Canadians, throwing them back with heavy casualties. The battle for Lens ground to a halt by August 25 with the Germans still in possession of Lens.

The Cost: The campaign for Hill 70 and Lens, often overlooked, is known as **"Canada's Forgotten Battle"** of the First World War. Yet it was the second-largest Canadian military undertaking up to that point in the war, second only to Vimy. The success came at a cost, with approximately 9,100 Canadians listed as killed, wounded or missing from August 15 to 25, including 1,877 killed, and more than 1,100 of the Canadian soldiers suffered from

mustard-gas poisoning. There were nearly as many Canadian casualties during the 10-day battle for Hill 70 and Lens as at Vimy, although fewer men were involved. Six Victoria Crosses, the highest award for military valour, were awarded to Canadian soldiers for their actions at Hill 70 and Lens (vs. four at Vimy Ridge). For the Germans, an estimated 25,000 were killed or wounded. Canada's first phase of the battle, the capture of Hill 70 and holding it through a remarkable 21 German counterattacks, had been a highly successful operation. The second phase, the two probing attacks on Lens were clumsy, hurried and unsuccessful affairs, with the Canadians suffering close to 4,000 casualties—almost half the total for the battle.

At least three young men from Sarnia gave their lives in the Attack on Hill 70 and Lens, including Ralph Ackerman, Harold Ketch and Charles Major.

Hill 70 Memorial: On April 8, 2017, the Battle of Hill 70 Memorial Park was dedicated near the start line where the Canadian Corps began its advance to capture Hill 70. Located in the town of Loos-en-Gohelle, France, the park was opened to the public in August 2017 and it is dedicated to the Canadian Corps that achieved victory there. On October 2, 2019, the centerpiece of the park, the Hill 70 Memorial obelisk, was unveiled. The Memorial Park includes: the stone obelisk with the sword of sacrifice and the words, CANADA 1917; six walkways dedicated to the six members of the Canadian Corps who earned Victoria Crosses in the battle; an amphitheatre named after Arthur Currie; 1877 maple leaves set into the pathways, each representing a Canadian soldier who died in the victory; and poppies grow throughout the park surrounding the large white obelisk^{2I, 4G, 5J, 8F}

• **VICTORY BONDS and INCOME TAX:** The First World War was much longer and more expensive than anyone had expected. The effort needed by the Canadian government to sustain its massive armies in the field required huge amounts of capital. So Ottawa, opposing the raising of taxes, borrowed money from ordinary Canadians. Through the sale of **war bonds** (called Victory Loans), the federal government obtained loans from Canadians that could be redeemed after five, ten or twenty years, with interest rates up to 5.5 per cent. Publicity campaigns (eg. use of posters) were directed to people's sense of patriotism, linking buying bonds to the direct support and welfare of soldiers overseas. Canadians' willingness to loan money to their government by buying bonds was an overwhelming success.

In November of 1918, the *Observer* reported that Lambton residents contributed over \$4.2 million in the Victory Loan campaign, which was nearly a million dollars over what was asked for. Sarnia led the way in the county with \$2 million alone, along with that raised by residents in Plympton, Enniskillen, Brooke, Bosanquet, Warwick, Moore, Sombra, Dawn and Euphemia. The sale of victory loans and bonds across the country, beginning in November 1915, was a tremendous success, raising in excess of \$2 billion over the course of the war.^{F, 2I, 3R, 5J} The success of the "victory bond" campaign would be repeated during the Second World War. Today's Canada Savings Bonds are the direct descendants of these wartime efforts.^{N, 2I}

Another means the federal government used to help finance the expenditures of war was the introduction of the "**Income War Tax Act**" in September 1917. It was introduced as a 'temporary' wartime measure, a personal tax on Canadian citizens - 4% on all income of single men over \$2,000; for others, the personal exemption was \$3,000; and for those Canadians with annual incomes of more than \$6,000, the tax rate ranged from 2 to 25 percent. It remains today as **income tax**.^{F, 2I, 3R}

• **MESSAGE TO WOMEN ON THE HOME FRONT:** As the war continued, and recruitment slowed, the government encouraged women in Canada to pressure men still at home to enlist. Following is an example of one advertisement that showed up across the country on posters and in newspapers like the *Sarnia Observer*;

TO THE WOMEN OF CANADA

1. *You may have read what the Germans have done in Belgium. Have you thought what they would do if they invaded this country?*
2. *Do you realize that the safety of your home and children depends on our getting more men NOW?*
3. *Do you realize that the one word "GO" from you may send another man to fight for our King and Country?*
4. *When the War is over and someone asks your husband or your son what he did in the Great War, is he to hang his head because you would not let him go?*

WON'T YOU HELP AND SEND A MAN TO ENLIST TO-DAY?

• **THE CONSCRIPTION CRISIS:** After the great number of casualties at Battle of the Somme, Canada was in desperate need to replenish its supply of soldiers; however, there were very few volunteers signing up to replace

them. After the victory at Vimy in April 1917, Canadian Prime Minister **Sir Robert Borden**, in England at the time, had visited Canadian soldiers including those wounded in hospitals. Talking to the amputees and men who had been wounded two or three times and were set to return to the front, left him shaken. He wrote that he had “the privilege of looking into the eyes of tens of thousands of men at the front who look to us for the effort which will make their sacrifice serve the great purpose for which it was intended.” On May 18, 1917 in the House of Commons in Ottawa, Borden, reversing a position on which he had held firm since the start of the war, announced that, “the time has come when the authority of the state should be invoked to provide reinforcements necessary to sustain the gallant men at the front...”

On July 24, 1917, the **Military Service Act** (MSA) was passed by the House of Commons, and then passed through Parliament, signed by the Governor General becoming law on August 29, 1917. It allowed the government to conscript men across the country if Prime Minister Borden felt it was necessary. The Military Service Act declared all men who were British subjects between the ages of 20 and 45 liable for service, and grouped them into six classes according to call-up priority. Classes were defined by age, marital status and number of children. Class 1 were those who had attained the age of 20 and were born not earlier than 1883, unmarried or widowers without child. Class 6 were those born between 1872 and 1875, married or widowers with one or more children. Only men in Class 1 were ever called up.

There was much opposition against the Act, including by conscientious objectors, by unwilling soldiers, by farmers, forestry workers, fishermen and by many French-Canadians. To solidify support for conscription in the 1917 election, PM Borden brought in the **Military Voters Act** in August 1917, allowing overseas soldiers and women serving as nurses the right to vote. In September 1917, he brought in the **Wartime Elections Act**, allowing wives, widows, mothers, daughters, and sisters of soldiers overseas the right to vote—the first time women in Canada were allowed to vote. Thousands of underage soldiers were also allowed to vote, their record of service trumping their illegal voting age. The government also removed the right to vote from masses of Canadians who had emigrated from “enemy countries,” even as early as 1902.

On October 13, 1917, a royal proclamation was published in major newspapers and public places across the country, ordering all men in the First Class of conscripts—single or widowed men between twenty and thirty-four years old, who did not have children—to register for service or obtain an exemption by November 11; otherwise, they would face military discipline and the possibility of up to five years in prison. Across the country, October 1917 municipal notices read; “MEN IN CLASS 1 – GO TO ANY POST OFFICE... and ask the Postmaster for a form of REPORT FOR SERVICE which you will fill in and for which you will be given a receipt. Every man in Class 1 must either report for service or CLAIM EXEMPTION.”

Class 1 conscripts had until November 10 to report to a post office, fill in one of the two forms, and hand it to the postmaster. Both documents asked the same basic information: name, residence address, age, marital status, number of children, occupation and employer. Those reporting for service could expect to be notified by registered mail as to where to report, the first stop usually being a medical examination board. After the medical, they would either return home and await instructions or report for service to a Depot Battalion to start basic military training. Travel expenses, for example from Sarnia to London, were reimbursed.

Conscription was a very divisive issue that brought about a political crisis in the country, polarizing provinces and ethnic groups. Once conscription became law, local tribunals were established, usually with two respected members of the community hearing applications for exemptions from military service. **Exemption** from conscription was allowed for a number of reasons. If a man could prove he was needed in his job, had “exceptional” financial or family obligations, was in poor health, was in school, was a member of the clergy, or belonged to a religious denomination that forbade combat service (eg. Mennonites and Doukhobors), they would be exempt. Also exempt were farmers and munition workers, whose work was considered to be in the national interest. And though many First Nations had volunteered, Indian agents could exempt those who were attached to reserves from call-up. Knowing the high casualties and brutal conditions at the front, vast numbers of the conscripted soldiers sought exemptions from service. A surprising 94% of those in Class 1 that were called up applied for exemptions.

It wasn't until early January 1918 that conscription was brought into force, and ultimately, only about 125,000 men were ever conscripted into the Canadian Expeditionary Force, and only 48,000 were sent overseas. It was intended that they would have fourteen weeks of basic infantry training in England, but that was shortened to nine weeks. The first conscripts went to France as reinforcements in April 1918. In the summer of 1918, thousands

more conscripts, 97% of whom were infantry, flowed across the English Channel to the Canadian Corps reinforcement camp at Aubin-Saint-Vaast, France. Many were held there until the start of the next great offensive, but thousands of others were quickly sent forward to their units to help bring these battalions up to fighting strength.

By comparison, in Great Britain the Military Service Act was passed in late January 1917, while New Zealand had approved conscription in August 1916. The Americans, who entered the war in April 1917, had passed the Selective Service Act in May 1917, which would ultimately conscript seventy-two per cent of their army. Australia, South Africa and India were the only participating countries not to introduce conscription during the First World War.

Only about 24,000 Canadian Military Service Act conscripts served in the front lines in France. They helped keep the ranks of the ragged infantry battalions at or near full strength during the Hundred Days Campaign (August 8 – November 11, 1918). In fact, over half the 42,065 reinforcements received by the Canadian Corps during this Campaign were conscripts. They saw intense action at Amiens, Arras, Canal-du-Nord, Cambrai, Valenciennes and Mons, and suffered more than 30 percent casualties. They earned 56 Military Medals for acts of bravery. In fact, the last Commonwealth soldier to fall in the Great War was a conscript, Canadian Private George Lawrence Price, 28th Battalion, killed by a sniper moments before the armistice went into effect at 11:00 a.m. on November 11, 1918.^{2E, 4G, 8H, 11C} More information on Private George Price is on page 182.

A number of Sarnia men were drafted under the Military Service Act of 1917. Nine Sarnia conscripts are inscribed on the Sarnia cenotaph—all Class One conscripts—who were called to service in January 1918, eight of whom were killed in action overseas. They are; Cameron Bissett, Joseph Carson, Alfred Corrick, Alexander Cunningham, Albert Eberly, Albert McDonald, Harry Smith, James Steele and Edward Watson.

• **THE BATTLE OF PASSCHENDAELE**, Belgium, October 26-November 10, 1917: This Ypres area of Belgium was largely made up of flat, open, low land that was kept dry only with a series of dykes and drainage ditches. Three years of heavy fighting had destroyed the drainage systems. In mid July 1917, the British launched an offensive in Flanders, the **Third Battle of Ypres** that began with a fifteen-day pre-battle bombardment in which they fired 4.3 million shells against the German positions. The offensive—using a series of short, rapid attacks—lasted for three months, in rain that rarely stopped during the entire time. It would cost the British, Australians and New Zealanders 200,000 killed or wounded for small gains, and in the end, the Germans still held much of the higher ground at Passchendaele. British Command then ordered the Canadians to deliver victory. Canadian Corps commander Sir Arthur Currie objected to the battle, fearing it could not be won without a terrible loss of life (he forecast that success would entail 16,000 casualties), for an area with no strategic benefit, but British Command insisted on the effort, believing it would help to salvage the campaign.^{D, E, 2I, 2N}

Conditions: In mid-October, the Canadians arrived in Flanders to relieve battered Australian and New Zealand forces, and were shocked by the terrible battlefield conditions. The unceasing rain and the millions of artillery shells had churned the ground up, turning it into a sticky quagmire of mud, swampy sludge, water-filled craters, filthy ponds and churned-up soldiers graves and unburied corpses. On the road to the front, one Canadian soldier recorded in his diary that, *“thousands of dead horses and mules are to be seen in the four-mile stretch to the firing line; large numbers of human bodies which have been hurled from their graves by the bursting of large shells add a very poignant note to the horror of the general surroundings.”* Another Canadian recalled that the *“single track line of road across the sea of mud was a shambles, a slaughterhouse and a good example of Hell or Hades in full blast.”* Once in the lines, with heavy kits, it was not uncommon for soldiers to slip off the wooden boards, especially at night, and drown. One Canadian soldier recounted, *“The clinging mud was waist-high everywhere, and when one fell, or stepped, off the bath-mat [ie. duckboards] it was literally a life-and-death struggle to get back.”*^{4G}

Preparations: Currie had limited planning time, only fourteen days, and ordered the construction of new roads and tramlines, the building or improvement of artillery gun pits, the movement of ammunition and supplies to the front, and the building of trench mats (duckboards) that would allow the infantry to move. Horses and mules dragged supplies, ammunition and hundreds of thousands of shells up from the rear, with legs and hoofs scarred and burned from mustard gas, wounded by shrapnel, and past the bloated corpses of other animals. The animals’ average life expectancy could be measured in weeks. Night after night, units worked in muck preparing for battle before a single bullet was fired, while the Germans atop Passchendaele Ridge fired shells of high explosives, shrapnel, and poison gas continuously, that killed and wounded more than 1,500. The service corps lived up to its informal motto; *“The impossible we do immediately; the miraculous takes a little longer.”*

J.H. Becker and his pal with the 75th Battalion, squatting in a shell hole, knee-deep in water, waiting for what they weren't sure recalled, *"The rain came down in torrents and as we sat there with our backs against the earth towards the Germans, listening to the whine and crash of shells all around us, we were about as miserable a pair as one could imagine... We had no idea where we were, who was in the front line ahead of us or where that line was. All we could do was sit there and wonder-wonder many things."*^{2E, 4G}

The First Phase: Currie's plan to capture the heavily fortified and flooded Passchendaele Ridge was to take it one chomp at a time. The Canadians launched the first phase of their four set-piece battles on October 26, 1917. At 5:40 a.m., the infantry advanced hugging the wall of their creeping barrage moving 50 metres every four minutes into the enemy lines. They advanced slowly in a costly process through deep mud, artillery fire, sniper fire, enemy dugouts, riflemen, machine-gunners in concrete pillboxes, poison gas, barbed wire, friendly fire, and enemy counter-attacks. The barrages were adjusted to lead the slowest charge in history, according to one participant, while the first wave had to carry a good deal more ammunition, rations, and tools than normal to fend for itself, since resupply would be a long time coming. The Canadians would have successes in this first phase, yet fell short of their final objective, but they had moved to higher and drier ground. The fighting on October 26 and the three-day defence to hold their positions cost the Canadian Corps over 2,700 casualties.

The Second Phase: On October 30 at 5:50 a.m., they began the second phase of the battle, advancing forward through the quagmire of mud, smoke, exploding shells and enemy fire. One young Canadian who had to manhandle supplies up to the front described the scene in a letter home, *"The mud was the worst I had ever experienced. Horses would mire in shell holes and could not be taken out, and had to be shot. Have seen dozens of horses and men lying along the road, just where they had fallen, killed by high explosives or overhead shrapnel. They were pulled to one side clear of the roads and left. No time to bury them, because the ammunition had to go forward to the guns."* The Canadian were successful in dragging themselves out of the mud through the use of deliberate bite and hold tactics. The Canadian Corps were able to reach the outskirts of Passchendaele by the end of a second attack, but suffered a further 884 killed and 1,429 wounded.^{2E, 4G, 8O}

The Passchendaele battlefield was a nightmarish mess of rotting, mangled corpses, gagging gas, and glutinous mud. A soldier from the 22nd Battalion described it as, *"Here and there, arms and legs of dead men stick out from the mud, and awful faces appear, blackened by days and weeks under the beating sun. I try to turn from these dreadful sights, but wherever I look dead bodies emerge, shapelessly, from the shroud of mud."* For the hundreds of wounded trapped on the muddy battlefield, they tried to pull themselves into shell holes, where they passed the hours, and then days, trying not to drown in the mud. They endured agonizing pain, exposure to mustard gas as it seeped out of the ground, faced the dangers of shock, bleeding to death, or going unconscious and drowning, as hundreds did. Along parts of the front, informal truces were established to allow both sides to collect the wounded and bodies of their dead.^{4G}

The Third Phase: On November 6 at 6 a.m., they launched their third phase of the assault behind a heavy bombardment and creeping barrage. One Canadian described the plunge ahead in a *"half-swimming, half-crawling and wholly miserable advance across that morass in cold drizzle of winter rain."* Heavy fighting lasted the day, and by the end of the day, the Canadian Corps had captured the ruined village of Passchendaele itself. Over the next five days, the Canadian gunners fired tens of thousands of shells in an attempt to hold and expand the Canadian front. In fact, records show that by battle's end, over a period of less than a month, the Canadian gunners fired over an astonishing 1.45 million shells in support of the operations.

The Final phase: On November 10, the Canadians launched their final phase of the assault behind a thunderous barrage, and by the end of the day had succeeded in clearing the Germans from the eastern edge of Passchendaele Ridge. However, German fighter squadrons firing on the advancing Canadians from above and a heavy enemy artillery bombardment still cost the Canadians more than 1,000 casualties in this limited attack.^{2E, 4G}

Toddling Along: Following is a portion of a letter written by William MacDonald of Prince Edward Island in January 1918, from a hospital in England to his sister Mary:

My Dear Marie,

At last the cloud of mystery which has surrounded the whereabouts and welfare of your brother is lifted. It was on the morning of November 6 that my company "went over the top" in the attack on Pasachendalle [sic] Ridge, the capture of which once more brought such laurels to the Canadian arms.

I was always in the machine gun section since I came to France. Our section went in 10 men and the corporal. Just after we jumped out of our trench one of the boys "got it" through the stomach. He was carrying a

machine gun and I instantly took it. I just went about a 100 yards more when “thung” a ringing sound in my ear and I fell in my tracks as a result of a shot fired by Bosche sniper [sic]. I dropped in a shell hole still retaining my senses but doubting very much whether or no my wound was fatal as it bled profusely. It discouraged me very much to see one of my chums, Dan Ross... laying there quite dead, shot through the head.

Dear Marie, you can't imagine the misery. There was a pool of water in the shell hole red with Ross' blood and my own. I really thought and hoped my end would come any minute, but then I suddenly realized how sweet life really was and I just determined I would try and live. I lay in this miserable shell hole for hours afraid to try and look up for fear “Fritz” would have another try at me. At last one of our boys came along and I called him and told him to get the stretcher bearer. He bandaged me and started me for dressing station and then more misery. The mud was actually up to my waist and several times I sank right down in it but of course there was a lad helping me, a kid about 17 and a good kid he was. The dressing station was 2 miles away.

But alas new dangers awaited me. In order to get to the dressing station I must go through the enemy's barrage. This I did and oh! what gruesome sights; pieces of arms, legs, intestines, hearts, etc., scattered out just like so many leaves. Ah! what a pity – all good Canadian blood... One of Fritz's shells landed a few yards away, a piece of shrapnel hitting me in the right shoulder and knocked me. I thought “all was up” and the lad lifted me and found that I could still toddle along. (It's wonderful what one is able to do when it's a matter of life and death). The pain was awful. At last I arrived at the dressing station where I collapsed. They carried me 3 miles to a casualty clearing station where my wounds were attended to better.

William McDonald recovered from the shot through his head and a broken shoulder blade, along with an infectious skin disease. He would survive the war and return home.^{7A}

The Cost of Victory at Passchendaele: In the immediate aftermath of the battle, Field Marshal Sir Douglas Haig's chief of staff made his first visit to the front. Reaching as far as his car could advance, appalled by the conditions, he began to weep. “Good God,” he said, “*did we really send men to fight in that?*” The man beside him, who had been in action, replied flatly, “*It's much worse farther up.*”

Overcoming almost unimaginable hardships and horrific fighting conditions, the remarkable victory few thought possible at Passchendaele was accomplished by great bravery, acts of self-sacrifice and great individual heroism—nine Canadians earned the Victoria Cross, four on one day, the highest award for valour, in the battle. Almost 12,000 Canadians were wounded and more than 4,000 Canadians lost their lives at Passchendaele, all for ground that served no tactical purpose, that would be vacated for the enemy the following March. Passchendaele broke many men—those who fought there were never be the same.^{3N, 4G, 6Q} At least six young men from Sarnia gave their lives in the Battle of Passchendaele, including George Ansbro, William Bendall, William Coulter, Charles Knight, James Pirrie and William Skinner.

• **MORE SOLDIERS' LETTERS HOME TO SARNIA:** Following are a few more letters written home by Sarnia/Lambton boys (and their stories) who fought in the trenches, providing a glimpse of their experiences (more Sarnia soldiers' letters home are on page 110):

> **Albert Charles Ellis** was born in Sarnia on May 8, 1896, the son of Charles (a customs collector in Sarnia) and Margaret Ellis. On May 1, 1916, one week before his twentieth birthday, Albert Ellis enlisted in Toronto. He was single at the time, and recorded his occupation as bank clerk; that he was a member of the 27th Regiment Militia; and his next-of-kin as his father, Charles S. Ellis, Lieutenant-Colonel, of 145 South Christina Street, Sarnia. Albert Ellis became a member of the 92nd Battalion, CEF. Less than three weeks after enlisting, on May 20, 1916, Private Albert Ellis embarked overseas, arriving in England nine days later. Three months later, on August 28, 1916, Albert arrived in France, as a member of the 15th Battalion.

In March 1917, Private Albert Charles Ellis of the 15th Battalion, wrote a letter from France to Miss Milne of the St. Clair Chapter of the Daughters of the Empire (I.O.D.E.) thanking her for the box of socks received. Following is a portion of that letter:

Just now, during the wet and cold weather, these things are one of the most essential to all of us. When you are able to change wet socks for dry ones, it certainly makes you feel a whole lot more comfortable and that's just what you allowed us to do... The socks that we do receive aren't the heavy sort that the ladies of the Chapter sent, and while marching do not protect your feet as well as the heavy ones do. I've received other things from the different societies of Sarnia and have distributed the things around to the boys that need them. They certainly think Sarnia is a peach of a place for looking after her boys so well. It makes one from the home town feel proud that he belongs to Sarnia, and I must say I certainly do.

Albert Ellis was promoted twice in the field: to Lance Corporal on April 9, 1917, and to Corporal on November 6, 1917. On March 22, 1918, Corporal Albert Ellis was admitted to No. 1 Canadian Field Ambulance, the result of shell gas. Two weeks later, he was discharged back to duty from No. 6 Casualty Clearing Station. Albert Ellis survived the war, disembarking in Halifax on April 23, 1919. He was discharged on demobilization in London, Ontario on April 25, 1919, and returned to Sarnia. Albert Ellis passed away in 1954 at the age of fifty-seven, and is buried in Lakeview Cemetery, Sarnia.

> **A few of the boys from the 149th Battalion** - In December of 1917, a group of citizens from the towns of Lambton County raised money and sent it along with a shipment of socks with notes from home in the toes, to one company of the former 149th Battalion, now attached to the 161st Battalion. Following are excerpts of letters sent home by three soldiers after receiving their gifts of socks:

I am now employed in the quartermaster's stores. The boys have all arrived from Lambton County and I am to have the pleasure of opening, unpacking and actually issuing the contents to the men. I can assure you that every Lambton boy will receive his share. I hardly suppose all the notes in the toes will be answered, but every pair found a Lambton man. Indeed we did have a good Christmas, thanks to the people of Lambton.

Yesterday was the day on which the Lambton supplies were given out to the men, and thought you might be interested to hear of the distribution. All the 149th men were to parade to Quartermaster's Stores after dinner, and each fellow was presented with a pair of socks, and a package of smokes. You may be sure that the fellows appreciated what was done for them, and as you know, a pair of good home knit socks are just about the handiest things in sight... Nearly every pair of socks had a note or card enclosed, which is a grand idea. I think it makes it seem more like a gift – the personal touch... We had quite a time comparing the different cards, etc., as they came from all over the county.

I only hope that our work in France will be good enough to deserve the hard work you have all done for us. I know I feel myself the same as all the other fellows that no hardship is too big to put up with for the people of Lambton. You have done wonders for us and for the time being all we can send is a heartfelt thanks.

The money was a donation for a Christmas dinner for the boys of the 161st Battalion, 212 of them former 149th men. In a letter of appreciation from Quartermaster Captain W.B. Allen of the Battalion, he wrote:

... the men enjoyed the best Christmas dinner, and the men enjoyed themselves better than any other unit in the 5th division. In fact, more money was raised than expected, allowing the men to get a few extras in the New Years dinner. At the Christmas dinner, the mess hall was decorated with holly, mistletoe and flags, the 161st Battalion orchestra played, the officers and sergeants did the serving and dishwashing, and everyone ate until they could eat no more, from a menu that included soup, roast turkey, potatoes, vegetables, mince pies, plum pudding, Christmas cakes, apples, oranges, grapes, nuts and tea. The boys will have the satisfaction of knowing that they enjoyed a sumptuous feast, even while their thoughts were all of the folks back home and their Christmas.

Now about the socks: The system was that each man is issued two suits of underwear and two pairs of socks when they get to France. When they go into the trenches, one suit of underwear and one pair of socks were turned over to the field laundry. The men are then in the trenches for a week or longer. The trenches may have anywhere from six inches to two feet of water, and when a man does his four hours watch, his boots and socks are wet. If he has an extra pair when relieved he can go in his dugout and change, which is a great comfort... it means a lot to be dry.

> In August 1917, **Sergeant F. Rawland** of "D" Company, the 18th Battalion in France, wrote a letter to the *Sarnia Observer*. Following is a portion of that letter:
Dear Sir,

I take great pleasure in utilizing these spare moments in writing a few lines concerning my ramblings in this vast European battlefield of which I have been over a considerable portion and sighted many thrilling and heroic acts and myself have taken part in many of the big shows.

Since coming to this country I have been attached to a good old Western Ontario Battalion known as the 'fighting eighteenth' and well the boys have kept the name. There are a number of Sarnia boys in this battalion and not a few of the old boys have gained distinction and are now officers in the battalion. They hold up the grand old tradition of never asking a man to go where they would not go themselves and are always found at the head of their men in the grand old rushes over the bags.

Lieutenant Colonel Jones hails from the Imperial City and shows his worthiness of the position he holds by being present when there is anything doing and impart cheery words when our turn comes to hold the muddy old

front lines. Our company commander, J.M. Fisher, also hails from Sarnia vicinity and sure possesses lots of iron nerve, which goes a long way to make D company a top notcher... Sergt.-Major G. Williams is a Sarnia man and the proud possessor of a Military Medal, winning it for valor at the Somme on the celebrated tank day, September 15, 1916. The G.T.R. [Grand Trunk Railroad] as far as Sarnia is concerned is well represented in the battalion. Engineers, firemen, conductors, brakemen, shopmen and one old call boy are all doing their bit for King, country and Sarnia.

Some great changes have taken place since three years ago this date. A once very thriving and prosperous country is now reduced to a desolate mass of ruins and barren plains giving the results of modern warfare and all the effects of the machinery now being used. Taking in all the country where battles have been fought and the enemy routed there is hardly a foot of ground that has not been upturned by our guns, showing the accuracy and determination of our gallant gunners...

Now a word for the men. How well they follow their gallant officers example. No matter what the task may be, from over the bags, holding the trenches or carrying out the various fatigue, which at all times are exceedingly dangerous, to trying to Parly Vous with the different mademoiselles when back at rest, which is comical to witness. And don't let us forget the gallant work carried out by our brave and fearless stretcher bearers, known as "body snatchers" or "poultice wallopers" although there is not much poulticing done out here. On the bloody battlefield is the place to see them carry out their heroic work...

> **James Aaron Etherington** was born in Toronto, Ontario on August 5, 1896, the son of Aaron and Harriet Emma Etherington. On August 18, 1915, James Etherington, nineteen years old and single, enlisted in Toronto. James recorded his occupation as civil clerk, and his next-of-kin as his father, Aaron Etherington of 452 Devine Street, Sarnia. James Etherington became a member of the 83rd Overseas Battalion, CEF. In late April 1916, he embarked overseas from Halifax, arriving in Liverpool, England on May 7, 1916. Seven weeks later, on June 29, 1916, Private James Etherington arrived in France, a member of the 3rd Battalion.

On September 16, 1916, James Etherington was wounded in action on the Somme, receiving a gunshot wound in the right leg (ankle). He was initially admitted to No. 2 Australian General Hospital, Boulogne, and would spend 46 days recovering in various hospitals including Alexandra Military Hospital, Cosham, and the Cental Military Hospital in Shorncliffe, England.

Private James Etherington returned to France in mid-May 1917, rejoining the 3rd Battalion. In August 1917, Harriet Etherington on Devine Street, Sarnia, received a couple of letters from her son James, who was on active service in France. Following is a portion of one of the letters:
Dear Mother and All,

I have no less than three of your letters to answer this time. I don't forget any of you and if I don't write it's only because there's really nothing to say. Then at times I'm dead tired, sometimes I'm drenched or covered with mud and at times I need sleep. Wouldn't you feel like making one letter do for the family if you had to sit on the floor and write on your knee?

... Now mother it has seemed kind of useless sometimes to tell you about all the mud and rain and marching and getting completely fagged out till one leg will hardly go by the other, because I didn't know you understood or had any idea what it was like out here, but on reading this letter I see you realize why we are here...

... Red Cross socks – at least I guess that's where they come from, are issued sometimes - for instance, last night with our rations there were four pairs for seven men – and we drew for them – three of us had to go without. No, it has not been so hot out here. It's pretty cold at nights though...

Private James Etherington would be wounded in action again on August 8, 1918, near Amiens, and admitted to No. 1 Canadian Field Ambulance. He had been hit by a machine-gun bullet, wounding him in the right arm, fracturing his humerus. He would spend over 100 days recovering from his wound in various hospitals including No. 3 General Hospital in LeTreport; Hoole Bank Hospital in Chester; and the Granville Hospital in Buxton. Private James Etherington survived the war, and was discharged on demobilization on February 21, 1919 in Toronto. James' parents had moved to Toronto during the war. James Etherington would then reside in Toronto, and on April 23, 1923, he married Sabina Beatrice Maud Colclough.

> **Robert J. Clark** resided at 428 Cromwell Street in Sarnia prior to the war. On October 1918, the *Sarnia Observer* printed a letter from Robert received by his wife, Mrs. Pearl Clark on Cromwell Street. Following is a portion of that letter:

Dear Pearl,

I received your letter dated August 26, and was pleased to hear from you again and to know that you were all well... I am back of the line a little way just now, as the doctor considered that I was still suffering from gas and hardly fit for fighting. I am bothered with a bad cough, otherwise I am alright... We were marched here in the evening and told to make ourselves comfortable; we were in the centre of a large field without a sign of shelter and a big black cloud coming up that looked like rain, and off to one side was, (or had been) a village but not a wall was standing, everything leveled to the ground.

So I says to my comrade go and see what you can find, and I started to dig a hole 4 feet deep and 6 feet long. By the time I had this dug he come back with 2 small poles a few strips of board about 4 feet long and 4 inches wide and 2 old bags, so I laid the poles along the edge of the hole I had dug, laid the bits of board across, split the bags and laid them across the boards, and cut sods and laid them on the bags, and piled dirt on top of all, then cut a couple of steps in the ground at one end to crawl in. There we were as snug as a bug in a rug just as the darkness and rain come on. I have been living in this hole for a week now and though it is a little damp, it is warm and dry. Ask Dad if he could beat that in building a house out of nothing. This house gives both shelter and protection, and it gives a certain amount of protection from flying shrapnel from both shells and bombs which Fritz will persist in sending over to us. I might say I have heard the dirt or shrapnel on my little old roof as Fritz dropped a shell within a few yards of me... He also dropped a bomb, the concussion of exploding jarred the loose dirt off the walls onto my bed clothes which consist of an army overcoat.

We see some spectacular sights at times which many a one would pay well to see. There is generally a line of balloons up near the front line for observation purposes. The other day while gaping around we suddenly saw a plane shoot out of the clouds straight for the balloon; saw four men jump out of the balloon and come down to the ground with parachutes and a moment after, the balloons burst into flames. Fritz had shot into them with bullets with fuses on them and set them on fire... A couple of nights ago I heard a Fritz airplane coming. We can nearly always tell enemy planes by the sound of the engines; and, as I lay in my little hole in the ground listening to the anti-aircraft guns and machine guns firing at him and expecting every second to hear a bomb drop and explode. I thought I heard a cheer so I crawled out of my hole and looked up into the sky. I saw a bunch of flame and sparks and a moment after I heard a crash and the plane came down in flames, his load of bombs exploding as it hit the ground...

I am batching it now as my comrade has gone on duty somewhere else and it's awful lonesome living alone in my underground mansion. We are living well these days. I have just eaten my dinner in my dining hole. I had boiled ham, potatoes, bread and butter and tea. I am lying here in my library (as there is hardly room to sit), writing to you and, as the light is poor, I shall have to enlarge my window. Living here makes me feel like a cave man. The guns are still hammering away and the fight is still on. It's fight a while, then rest a while, in shifts like workmen. Up to now we certainly have had the best of it and the 18th Battalion has done its share as have all the Canadian corps. We hope it will soon be over and we can come home... I must close by sending love to you and the kiddies.

> **Edward William Drinkwater** was born on June 26, 1892 in Eversham, Worcester, England. At some point he immigrated to Canada and came to reside in Sarnia. On February 11, 1916, twenty-three years old and single, Edward Drinkwater enlisted in Sarnia. He recorded his current address as 128 Stewart Street, Sarnia; his occupation as laborer; and his next-of-kin as his father, Edwin James Drinkwater of Bewdley Street, Eversham, England. Edward became a member of the 149th Overseas Battalion, CEF. He embarked overseas from Halifax on March 25, 1917, and arrived in Liverpool, England on April 7, 1917.

While in England, Private Edward Drinkwater was first posted to the 161st Battalion, and in early February 1918, he was transferred to the 4th Canadian Reserve Battalion. On March 3, 1918, Edward arrived in France, as a member of the 47th Battalion. Six months later, on September 2, 1918 near Cambrai, France, he was wounded in action by shrapnel, that was recorded as "gun shot wound, right thigh, with foot drop". After dressing and treating the wound at a Casualty Clearing Station, he was returned to England one week later.

In October 1918, the *Sarnia Observer* printed a letter from Private Edward William Drinkwater, received by Mr. and Mrs. John H. Fletcher, of Monk Street, Point Edward. Following is a portion of that letter:

Dear Mr. and Mrs. Fletcher,

A few lines to you hoping that you are enjoying the very best of health. I am sorry to say that I am not feeling very good at present. I guess you have heard by now that I am in Blighty, I arrived here on the 8th. I have got a nasty wound and it will keep me in bed for a long time yet. I have had four weeks already. I had a shrapnel bullet go through my thigh and it cut the nerves connecting with my foot and it has given me Scratic Paralysis, my foot has

been in continual pain since I got hit, it doesn't ease at all, the pain won't go away until the nerve heals which will be a long time yet. I have to be on my back with my leg and foot in splints as my foot is useless. I don't think I will see France again.

I'll tell you now how I got hit. On the morning of the second we went over the top at about 5 o'clock and we were told that we had got to take the first four trenches and stop. There were more troops coming up behind us to carry on farther. Well we took the first and second trenches pretty easy but we had to fight hard for the third and fourth, we got so excited taking the trenches that we did not count them so finally we got into the fourth trench (we didn't know it at the time) we were sat down waiting for the barrage to creep on farther so that we could advance again when bingo! a shell dropped in the trench just a yard away, it got three of us (by the way that only left two in the section to carry on). It is a wonder that we didn't get killed, well as soon as I got hit I rolled over and my foot went numb so I could not walk at all, I lay there until 4.30 in the afternoon (nearly 10 hours) before I got carried out, all the time that I was laying there I was expecting to get hit again as shells were dropping all around but I was lucky I got carried out safe...

During his recovery, Edward Drinkwater received treatment at several hospitals in England including at 3rd Western General in Cardiff; Granville Canadian Special in Buxton; and 5th Canadian General in Liverpool. Complicating his recovery was the fact that the wound became infected. In early May 1919, Private Edward Drinkwater was invalided back to Canada, arriving in Portland, Maine on May 17, 1919. Just over two weeks later, on July 2, 1919 in London, Ontario, Edward Drinkwater was discharged on demobilization, declared medically unfit for general service. He returned to Sarnia, and resided at 128 Stewart Street, later 247 Bright Street, Sarnia.

• **HALIFAX EXPLOSION:** On December 6, 1917, the city of Halifax, Nova Scotia was devastated when two ships collided in the city's harbour, one of them a munitions ship loaded with explosives bound for the battlefields of the First World War. Halifax was a busy, wartime port, its harbour crowded with merchant vessels and warships from Canada and Britain. The city's permanent population swelled to 50,000 by 1917, in addition to thousands of temporary army and navy personnel at the garrison, navy yards and aboard ships. Halifax was an important staging area for trans-Atlantic convoys that gathered in Bedford Basin before ferrying supplies of food, munitions and soldiers to the war effort.

Two of those merchant ships were the Norwegian vessel *SS Imo*, outbound en route to New York to pick up relief supplies for the beleaguered population of war-torn Belgium; and the French munitions ship *SS Mont-Blanc*—filled with more than 2,500 tonnes of benzol, picric acid, TNT and guncotton—arriving to join a convoy across the Atlantic. Yet it flew no flag to indicate it was a munitions ship, due to fear of attracting the attention of patrolling German submarines.

On the clear and crisp morning of December 6, 1917, the *Imo* was departing Halifax Harbour travelling through the Narrows—the strait connecting Halifax Harbour to Bedford Basin (moving faster than it should and on the wrong side), while the *Mont-Blanc* was entering the harbour. After a series of whistles and miscommunications on the two ships, the *Imo* struck the starboard bow of the *Mont-Blanc*, generating sparks that ignited benzol stored on the *Mont-Blanc*'s deck. When the benzol reached its boiling point, the drums began launching like a series of rockets into the air, trailing smoke and bursting into fire aloft.

For nearly twenty minutes, the *Mont-Blanc* burned, attracting the attention of crowds of spectators on shore. Crowds gathered in the streets, people stood at the windows of homes, schools and workplaces and climbed to rooftops for a better view as *Mount-Blanc*, flames shooting up 30 metres, drifted toward shore as a thick plume of black, oily smoke rose. The *Mont-Blanc* captain and crew fled the ship as it drifted towards Pier 6 on the Halifax shore. The fire superheated *Mont-Blanc*'s hull, increasing pressure in the sealed holds—and on their deadly cargo—2.6 million kilograms of explosives.

The *Mont-Blanc* exploded just before 9:05 a.m., the blast lifting the ship 300 metres into the air, a 5,000°C fireball vapourized water around the ship creating a six-metre wave that flung nearby tugs and ships onto the land. Much of the *Mont-Blanc* became shrapnel and the shank of the anchor, weighing more than 500 kilograms, flew 3.5 kilometres. The explosion levelled the north end of Halifax, either by the blast and shock wave; the subsequent tsunami; or the raging fires that quickly spread. The massive explosion alone all but wiped out the Richmond neighbourhood, wrecked houses in neighbouring Africville and across the harbour, heavily damaged Dartmouth and obliterated Turtle Grove, a small Mi'kmaq community. Nearly 2,000 people died in the tragedy (approximately 1,600 instantly), and 9,000 more were injured, many by flying shards of glass, wood and metal.

Graham Metson, author of *The Halifax Explosion: December 6, 1917*, wrote of survivors wandering amidst the ruins, their faces “chalk-white with terror... black with the ‘black rain’ and smeared with blood... the dead, the dying and the severely injured lay about the streets, amid ghastly, bleeding fragments of what had been human beings’ heads and limbs.” Buildings and houses had been blown apart, and whole families were killed as their houses collapsed one storey onto another. Embers scattered from toppled stoves and furnaces setting houses and buildings afire. Six thousand were made homeless, and 25,000 others were without adequate shelter, a problem made worse by the winter blizzard that struck Halifax overnight. So many people lost their vision that the city had to establish a school for the blind. The blast was the largest human-caused explosion prior to the detonation of the first atomic bombs in 1945.^{2E, 2N, 7K}

• **WINTER OVERSEAS, 1917-1918:** Over the winter of 1917-1918, the Canadians carried out their orders to hold the front around their prize of Vimy Ridge and the surrounding area. With fewer soldiers needed on the firing line, some officers received leave to England; long-awaited furlough was approved for some of the First Contingent men, and several hundred married originals and soldiers who had loved ones back home suffering severely, were sent back to Canada to see their families; some men went to specialist training schools; and some were rushed into British lines to fill gaps. Though there were no set-piece battles for the Canadians around Vimy, the trenches were alive with almost daily crash bombardments, trench raids and harassing chemical attacks of phosgene, chlorine and mustard gas while the soldiers shivered in the mud, cold and wind. During this time, the Canadians dug 400 km of trenches and laid more than 450 km of barbed wire, plus buried telephone cables, dug water mains, strengthened dugouts, built sniper posts, etc., all fortifying the Vimy front.^{4G, 5J}

Over the course of the 1917 year, the Canadian Corps reputation within the Allies had soared. In a letter to the premier of Ontario, Currie wrote, “*The year 1917 has been a glorious year for the Canadian Corps. We have taken every objective from the enemy we started for and have not had a single reverse. Vimy, Arleux, Fresnoy, Avion, Hill 70 and Passchendaele all signify hard fought battles and notable victories. I know that no other Corps has had the same unbroken series of successes. All this testifies to the discipline, training, leadership and fine fighting qualities of the Canadians.*”^{5J}

For the Allies as a whole, 1917 was a disastrous year. Although the Canadians had won significant victories at Vimy Ridge, Hill 70 and Passchendaele; the French armies had mutinied (even after they recovered, morale was fragile); the Italians were losing men at an astonishing rate; the British Army had endured a series of costly defeats; and U.S forces had not yet arrived at the front in great numbers (the U.S. declared war in April 1917). On the Eastern Front, the Russian army and nation were in full revolt (Bolshevik Revolution), with the result that Germany would soon knock Russia out of the war. Their loss was devastating to the Allied cause, as German Command were able to transfer fifty divisions, many of them elite troops, from the Eastern Front to the Western Front. The German army on the Western Front swelled to 4 million men in almost 200 divisions. German high command saw their opportunity to win the war before the United States’ forces were fully committed to battle.

• **GERMAN SPRING OFFENSIVE:** In mid-March 1918, the Germans launched their Spring Offensive on the Western Front, known as *Kaiserschlacht* (Kaiser’s Battle) to the Germans. It was a multi-army offensive using heavy artillery bombardment followed by new aggressive small group attack formations. These “**stormtroopers**” were designed for open warfare, in which small group assault forces flowed around areas of resistance and kept driving into the rear areas to cause confusion. From the first day the offensive was launched on March 21, and in the days following, the Germans broke through the British lines, making enormous gains and forcing an Allied retreat. On March 25, General Douglas Haig, Commander of the BEF, implored his superiors to “make peace on any terms we could.” The British regrouped, and soon after, French general Ferdinand Foch was appointed as General-in-Chief of the Allied Armies. During the German Spring Offensive, they advanced to within 70 km of Paris. Positions that had been won by the Canadians at high costs—Ypres, the Somme, Passchendaele—were all lost within weeks.

It was not until the end of April 1918 that the German offensive slowly ground to a halt as British defenders adapted their fighting tactics and the Germans overextended their support systems (shortages of fresh troops and a lack of food). The Canadian Corps were not engaged in the hard fighting as the Germans avoided the deeply entrenched Canadian troops on and around Vimy. However, all along the front, as the British were pushed back, Canadian infantry, motor machine-gun teams (using armoured cars) and cavalry brigades fought in support, attacking, counterattacking and holding the front. Soon after the German breakthrough, General Haig, Commander of the BEF, pulled three of the four divisions from the Canadian Corps to support the beleaguered British to the north. Currie strongly opposed the breaking up of his Canadian Corps, and soon got back all but one division (2nd Division).^{4G, 5J}

By the end of the German offensives in the spring and summer of 1918, the Germans suffered almost 800,000 casualties, and the combined Allied losses were almost as high. Although the series of battles had been tactically successful for the Germans, and they had gained ground, nothing had changed strategically. By late summer, though the Allies had been pushed back, the Allied Supreme Commander General Ferdinand Foch was anxious to counterattack the German forces who having failed to achieve a decisive breakthrough, appeared to be demoralized and weakened. Allied counterattack operations on July 4 (by Australian troops) at Hamel, and another one in mid-July (by French, British & American divisions) at Marne were both successful in driving through the German lines.^{4G, 5J}

- **THE BATTLE OF MOREUIL WOOD**, France, March 30, 1918: During part of their Spring Offensive, the Germans were able to advance until they occupied Moreuil Wood, a commanding ridge on the riverbank of the Avre River overlooking the village of Moreuil, about 20 kilometers south of Amiens, France. It was here that the **Canadian Cavalry Brigade** (that included Lord Strathcona's Horse, Royal Canadian Dragoons and Fort Garry Horse) was tasked with holding the Germans back. To this point in the war, mounted cavalry charges were of limited use against barbed wire, deep trenches, mechanized artillery and machine-guns.

With the British fighting retreating and fluid enemy lines, the battlefield opened up, so on March 30 the Canadian Cavalry Brigade (CCB) saw their opportunity. Confronting the enemy head-on, the Germans found facing several hundred men and horses riding en masse, with swords drawn, a terrifying experience. The Royal Canadian Dragoons ran into enemy fire at about 9:30 a.m. and were forced to dismount. Taking casualties, the Dragoons charged on foot with speed and fury, routing an estimated 300 enemy troops in the wood. The Lord Strathcona's Horse rode into the surrounding woods with swords drawn, leaning low over the necks of their horses into the face of German artillery and machine-gun fire. One Canadian Private later recalled, *"Everything seemed unreal. The shouting of the men, the moans of the wounded, the pitiful crying of the wounded and dying horses."* Repeated cavalry passes, small-scale skirmishes and hand-to-hand combat continued until, by the end of the day, the Germans had been cleared from the woods.

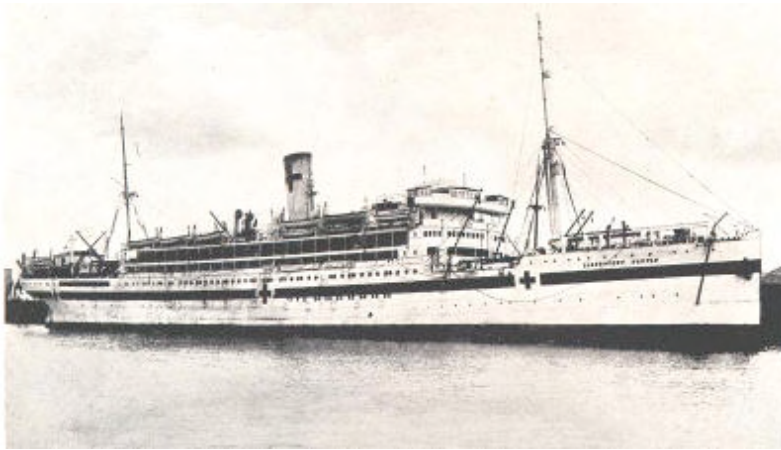

Despite heavy losses, over 300 casualties, the Battle at Moreuil Wood was a key Allied victory in the war, which contributed to the halt of the German Spring Offensive.^{4G} The charge of the Canadian Cavalry Brigade at Moreuil Wood on March 30, 1918, was not the first Canadian cavalry charge in the First World War, but it was the biggest. Some historians refer to the events of this battle as **"the last great cavalry charge,"** as there were few other military charges on horseback after this one.^{2E, 4G, 5J} One of the members of the Royal Canadian Dragoons in the Battle of Moreuil Wood was 27 year-old Lance Corporal Thomas Knowles of Sarnia, who gave his life on that day. His story is included in this Project on page 319.

- **ATTACK ON THE LLANDOVERY CASTLE**: On the night of June 27th, 1918, the Canadian Hospital ship *HMHS Llandovery Castle*, travelling alone and with running lights on, was torpedoed without warning and sunk by a German submarine. It would be one of the most controversial events during the war; the most significant Canadian naval disaster of WWI; and it would become the rallying cry for the Canadian troops during the Last 100 Days offensive.

There were two hundred and fifty-eight people on board the ship, including ninety-four Canadians, of which fourteen were Nursing Sisters. After the ship was struck, as many as five lifeboats were launched by those struggling to survive. The Nursing Sisters were able to escape the sinking ship, but not a tragic fate. Their lifeboat, without oars, failed to get clear of the suction produced by the hull's rapid descent below the surface. A sergeant, who was in the boat and survived, reported that the nightmare unfolded over a period of eight minutes: *"In that whole time I did not hear a complaint or a murmur from one of the sisters... There was not a cry for help or any outward evidence of fear. In the entire time I overheard only one remark, when the matron, Nursing Sister M.M. Fraser, turned to me as we drifted helplessly towards the stern of the ship and asked – 'Sergeant, do you think there is any hope for us?' – I replied 'No,' seeing myself our helplessness without oars and the sinking conditions of the stern of the ship. A few seconds later we were drawn into the whirlpool of the submerged afterdeck and the last I saw of the nursing sisters was as they were thrown over the side of the boat."*^{6E}

Several lifeboats with many more people got clear of the wreck. The German submarine surfaced and the commander started interrogating surviving crew members. Then, in an attempt to erase evidence of the attack, the U-boat machine-gunned and rammed a number of the lifeboats. Only one lifeboat escaped carrying the Captain and twenty-three crew members who were rescued two days later. In total, two hundred and thirty-four persons lost their

lives in the sinking of the unarmed *Llandoverly Castle* Hospital Ship, including eighty-eight of the ninety-four Canadians on board, including the fourteen Nursing Sisters. One of the Canadians who lost his life in the brazen attack was twenty-five-year-old Private David Smuck of Sarnia. More information on the attack on the *Llandoverly Castle* is included in the David Smuck biography in this Project on page 373.

HMHS Llandoverly Castle

Post-attack propaganda poster

- **THE FINAL HUNDRED DAYS:** The Hundred Days was not initially intended to be a war-winning campaign. In July 1918, Marshall Ferdinand Foch of France, the Supreme Allied Commander, proposed taking advantage of German disarray following their Spring Offensive by securing a number of key logistical hubs (eg. Amiens). The **key Allied players** were: Allied Supreme Commander Marshal Ferdinand Foch (also under his command were the Americans, Italians and Belgians); General Henri Petain would command the French armies; Field Marshall Sir Douglas Haig, Commander in Chief of the Imperial Forces (BEF); and Canadian Corps Commander Sir Arthur Currie.

Commander Foch and the military leadership based this campaign on using their “shock troops” to crack the German defences. The “shock troops” given the biggest role was the Canadian Corps. The Canadian Corps of four divisions, had developed a reputation as a first-rate force, and were considered fresh and ready for battle. Currie, willingly accepted this heavy burden. He saw the chance to end the war before Christmas.^{4G, 5J}

- **SHOCK TROOPS:** Since their victory on the Somme, the Canadian forces had forged the reputation as an elite assault force, the “shock troops of the British Empire”. The British prime minister at the time, David Lloyd George, wrote of the Canadian Corps, “*The Canadians played a part of such distinction that thenceforward they were marked out as **shock troops**; for the remainder of the war they were brought along to head the assault in one great battle after another. Whenever the Germans found the Canadian Corps coming into the line they prepared for the worst.*” The Canadian Corps planning and training, innovative fighting tactics and coordinated combined-arms approach (such as the use of tanks, surprise artillery bombardment, and cooperation with supporting aircraft) to battle helped break the conundrum of the trenches to a more open warfare, as they headed the assaults, smashing enemy divisions and taking vital ground time after time.^{D, 2N, 4F, 4G, 5J}

Breaking up the Canadians?: Before the Canadians engaged in the brutal battles of the final Hundred Days campaign, in early 1918, the British War Office had begun to pressure the Canadians to establish an army of two corps of three divisions, by reducing the number of battalions in each division (from 12 to 9 infantry battalions, thereby cutting the strength of each division). By breaking up battalions, the idea was that it would free up troops for new divisions—but it would involve transferring men from their “home” units to new ones. Due to their own losses, the British were reorganizing and reducing their fighting units, and it was devastating to soldier morale. Many Canadian politicians, and officers looking for promotion, liked the idea.

But **Arthur Currie**, though pressured, fought against the reduction in battalions, making the case that diluting the Canadian Corps’ strength and its cadre of experienced officers would only weaken its formidable striking power. Currie got his way, and was able to strengthen his four divisions throughout 1918. Canadian historian Tim Cook wrote, “*Currie’s refusal to weaken his Canadian Corps, and to ensure the combat efficiency of his fighting force, may have been the single most difficult and important decision of his career.*”^{4G}

Canadians prepare for the Hundred Days: From March to July 1918, the Canadians, holding the line at Vimy, were largely out of action, providing them time to recover, and the chance for an extensive rest and “refit”. The Canadian Corps battalions and units built up to at or near full strength, as reinforcements came forward from camps in England in a steady stream to keep it so (by breaking up Canada’s 5th Division in England, along with Military Service Act conscripts coming from Canada later). His refusal to dilute the Canadian divisions left Currie with almost 12,000 infantrymen per division (British division’s were 8,000).

At Currie’s direction, Canadian Corps underwent extensive training and reorganization, and refined their storm battle tactics. It began with training the individual, then section, platoon, company, battalion, and brigade. Initiative was stressed vs. blindly following orders (the old method of advancing in long lines of men). The major goal was to transition from trench fighting to semi-open and **open warfare**. This consisted of accurate, intense, surprise artillery fire (with new methods of locating and countering enemy artillery); better communications; quick infantry attacks through enemy “soft spots” by means of infiltration; and fire and movement at the platoon level (with emphasis on surprise, firepower, speed, mobility and initiative).^{4G, 5J}

Currie’s plan, complicated but innovative, depended on **cooperation**—infantry, engineers, artillery, tanks, armoured cars and trucks, and aircraft had to work together, while supply and transport had to keep up in order to sustain the attack. The strengthened infantry platoons were to “stick the enemy” with concentrated fire by pinning them down with Lewis guns or rifles, and then infiltrate along the paths of least resistance. For example, if resistance could not be evaded, troops were then to employ fire and movement; half the men would rush forward with their Lewis gun firing from the hip, while the light machine gun of the other half of the platoon would provide covering fire along with their rifle grenades. They were to penetrate the enemy’s weak points, even if it meant bypassing strongpoints, thus creating confusion in the German command-and-control structure, and leading to mass surrenders as positions were cut off and surrounded. All the while, onrushing platoons and companies were to leapfrog through one another, attack in successive bounds, dig in and prepare for possible counterattacks. The decentralized command called for brigadiers and battalion commanders, those close to the front, to react to the ever-fluid nature of the battle.

Despite the refined tactics of open warfare, there remained the problem of how to support troops that achieved a deep advance (the infantry would soon outdistance its protective artillery screen and its logistical support). Battle veterans were wary—no matter what tactics were employed or how much firepower was brought to bear, in the open it always came down to **flesh and bone against steel and fire**.

Through June and July 1918, infantry units practiced employing open tactics working together cooperatively with artillery gunners, mobile field gunners, mortar sections, heavy machine-gunners, tanks and tactical aircraft, along with signallers and engineers (as a result, they became much better at locating and eliminating enemy guns and perfecting the creeping barrage so infantry could advance). Smoke would be used more frequently to cover troops as they advanced.

More heavy artillery and light mortars were added, and more heavy and light Lewis machine guns were added to each battalion; machine-gunners perfected the use of indirect fire; all infantrymen now carried grenades into battle; and **motor machine brigades** (with guns and mortars mounted on armoured cars and trucks) were added (ie. more firepower saved lives). The size of engineering battalions increased, making for more efficient logistical support (building roads, pontoons and railways), allowing infantry to move forward rapidly in the preparation phase, during the battle and in exploiting successes (the larger engineer battalions also relieved the infantry of having to dig trenches, fill sandbags...).

Also added to the Canadian Army Service Corps was a Canadian Corps Troops Mechanical Transport (MT) Column with a Divisional MT Company for each of the four divisions (more trucks), and a Motor Machine Gun MT Company; along with an Engineer MT Company, a Bridging Transport Unit, two Tramway Companies and a Canadian Works Group Headquarters—each of these were responsible for specific tasks (eg. bringing supplies, building bridges, digging trenches, constructing rail lines, building roads, handling ammunition, etc...) with the manpower and capability of doing them quickly and without having to use infantry units for labour.

The Canadian Corps four divisions worked and trained together, giving them a stronger sense of **national pride and identity**, that was reinforced by a rise of more Canadians to higher positions; more Canadians making up each division; and the corps own publicity machine disseminating stories of Canadian heroism and endurance. The Canadians fought side by side (though many of the supporting units were not Canadian).^{4G, 5J, 11C}

• **CANADA'S HUNDRED DAYS CAMPAIGN**, France and Belgium, August 8-November 11, 1918: In this final three-month period, marking the **"beginning of the end"** of the Great War, Canadians were called on again and again to lead the offensives. Canadians played a critical role scoring victory after victory against the toughest German defences on the Western Front—victories that repeatedly drove the Germans back, culminating in Germany's unconditional surrender (and dramatically shortening the First World War). Canadian historian and author J.L. Granatstein stated that, *"The greatest victories of the Canadian Corps took place in the critical period known as the Hundred Days.... In fact, Canada's Hundred Days was the most important Canadian role in battle ever, the only time that this nation's military contribution might truly be called decisive."*⁵¹ Granatstein and Canadian historian and author Tim Cook agree that, *"The Hundred Days Campaign was unquestionably the greatest and most decisive campaign ever fought by Canadian troops in battle."*

The Canadian Hundred Days Campaign included; **the Battle of Amiens, the Battle of Arras and breaking the Drocourt-Queant Line, the Battle of the Canal du Nord and Cambrai, the Battle of Valenciennes, and the Pursuit to Mons**. Under the command of Canadian Lieutenant-General Sir Arthur Currie, the four Canadian divisions, some 105,000 Canadians advanced 130 kilometres through Belgium and France in that time, captured approximately 32,000 prisoners and nearly 3,800 artillery pieces, machine guns and mortars. During the "Hundred Days" thirty Canadians and Newfoundlanders earned the Victoria Cross. But it came at a high price. In the final three months of war, approximately 45,835 Canadians and Newfoundlanders were killed, wounded and missing (this includes more than 6,800 killed). The almost 46,000 casualties is 18.7%, or almost one in five, of the Canadian casualties suffered in four years and three months of the Great War.^{E, 4G, 5J, 8H, 11C}

It was during this final campaign of the war that the highest number of men from Sarnia lost their lives. At least thirty-three young men from Sarnia gave their lives during Canada's Hundred Days Campaign. Three of the deaths were termed "wastage"—occurring between major set-piece battles: Thomas Hazen, Albert Rodber and Thomas Wright. The thirty others were killed in action during the major battles of the Campaign. Descriptions of the battles, along with the Sarnia men lost in each, are in the following pages.

• **THE BATTLE OF AMIENS**, France, August 8-14, 1918: The massive advance was to be spearheaded by the Canadians, with Australian and French divisions flanking at its side, along with British Fourth Army tanks (to assist in mopping up and to support the infantry push). All four Canadian divisions were involved in the battle on August 8, along with the Canadian Cavalry Brigade. The Canadians code-named their operation "*L.C.*," for the *Llandovery Castle*, the Canadian hospital warship that was torpedoed by a German U-boat in late June 1918. The Canadian Corps had an 8.5-kilometre-wide front and had to advance about 14 km to reach their final objectives. The plan divided the battlefield into Green, Red, and Blue lines, with each successive line more strongly defended.

Planning: The Amiens operation was planned as a surprise attack and started with deception. The Canadian Corps' reputation was such that the mere presence of Canadians on a section of the front warned the enemy that an attack was coming. This meant that great secrecy would be involved in the movements of the Canadian Corps. To deceive the enemy, several Canadian infantry, medical and signals units were sent north to the Ypres section. There they carried out small raids and passed messages to alert the Germans of their presence—this made the Germans think a major attack was coming there. After making their presence known to the Germans the Canadians secretly hurried back to the Amiens sector for the real attack.

A week before the battle, the Canadians took on the enormous logistical challenge of transporting more than 10 million rounds of small-arms ammunition, over 290,000 artillery rounds, tanks, food, water, medical supplies and all manner of war supplies, along with moving the 100,000-strong Canadian Corps south to their assault positions, all without alerting the enemy of their presence. Much of this work was done at night taking back roads or indirect rail routes. The guns moved into their firing positions only on August 6 and 7 and the Royal Air Force flew back and forth over the front, making noise to hide the sounds of men and equipment getting in place.

On the eve of the attack, tens of thousands of troops moved to their jumping-off positions, where they lay shivering in the wet grass or in shallow slit trenches. The infantry were ordered to shed most of their equipment and go in "battle order"—equipped with only emergency rations and water, 250 rounds of ammunition, an entrenching tool, two grenades, two sandbags, a respirator, and their weapon. An infantryman wrote, *"Each unit knew exactly where it was to go and what it was to do, and when the zero hour arrived they were all in place and ready."*^{4G, 5J, 11C}

The assault begins: On August 8, 1918, the surprise assault began at 4:20 a.m., an hour before sunrise, as 2,000 Allied artillery pieces began a devastating bombardment of German front line defences, followed by a creeping

barrage that moved forward at 200 metres per minute. The creeping barrage moved forward at six times the speed of the Vimy barrage (with no long preliminary artillery bombardment as was usually done which also warned the enemy that an attack was coming). The infantry and tank assault advanced rapidly through a dense cover of fog and smoke across a nightmarish battlefield of fire, smoking craters and shredded barbed wire, made ghostly and terrifying by the shadows of soldiers along with the noise generated by the metal clanging of tanks, the drone of planes overhead, the loud high explosive bursts, the crack of rifle fire, and the shrieks of the wounded. One Canadian gunner described the scene, “*within ten minutes from the start, the tanks, by the hundreds, and the cavalry, by the thousands, were passing our guns. It made an awful pretty picture to see tanks and cavalry looming up in the mist, over the crest, just about dawn. The field guns began to pass at a gallop too, not to mention the infantry by the hundreds of thousands.*”^{4G}

Above the front, RAF aircraft bombed and machine-gunned enemy positions, and observation planes helped to direct artillery fire and provide reports on the advance. Tanks initially proved effective during the Amiens battle in supporting the infantry, by assisting in clearing out enemy strongpoints, and by drawing fire and sheltering troops. Often though, the tanks were late for battle, fought uncoordinated skirmishes, broke down over the terrain, were destroyed by enemy anti-tank or artillery fire, or couldn’t keep up with the advancing infantry. Of 342 Mark V tanks at the start line on August 8, only 38 were left in running order by August 11.

Initially, many of the Canadian sections and platoons infiltrated past enemy strongpoints quickly, with secondary waves or first wave attackers doubling back to destroy them. With their fire and movement tactics, the Canadians continued their advance into the face of enemy fire—past machine-gun nests and pockets of resistance, they crossed open fields, marshy areas, a river, over hills, and through forests, ravines and occupied villages. As they advanced, they lost the support of their tanks and artillery. All along the front, the advance moved forward much faster than expected, and before 9 a.m. the first of the attackers had reached the Red Line, their objective. By 5:30 p.m., Canadian troops were on their final objectives, the Blue Dot Line.

Over the course of intense fighting, in the face of intense Canadian pressure, the Germans fled from their positions, three entire divisions had been shattered, and over 5,000 surrendered. The Allied armies had achieved their greatest single-day victory of the war. The Canadians had advanced 13 kilometres, the Australians 11, the French 8, and the British 5. The German commander who ran the nation’s war effort, General Erich von Ludendorff, lamented that, “*August 8th was the **black day** of the German Army in the history of the war... We have reached the limits of our capacity. The war must be terminated.*” For the Canadians, the August 8th victory was costly, with 1,036 killed and 2,803 wounded.^{2I, 2N, 4G, 5J, 11C}

The second day: The second day of fighting was far more difficult than August 8—the Canadian infantry were now spread over the battlefield and out of range of many of their own artillery guns (especially the heavier guns); surprise was no longer a factor; many of the men were exhausted having fought the day before and had endured hours of shellfire during the night; moving ammunition, food and other supplies forward was slowed by the distance and traffic on the worn roads (eg. prisoners going opposite direction); army headquarters was mired in confusion (because of the astounding success) resulting in problems with orders being issued, then cancelled, and then issued again; and the Germans rushed reserve divisions to the their front lines, dug in and improved defensive positions and rushed up fresh guns.

Through the course of the day, using a combination of dogged frontal assaults and quick-moving flanking attacks, the Canadians were able to pierce the German lines. Against a desperate enemy that one Canadian infantryman described as, “*were fighting furiously for every yard of ground*”, the Canadians again had to fight over open areas, past machine-gun nests, through fortified villages, concentrated artillery fire and German counterattacks. August 9 ended with the Canadians having advanced another astonishing 6 kilometres, deeper than any other force involved in the battle. The second day cost the Canadians 2,574 killed or wounded.

The wounded: Inefficient clearing of the wounded was an ongoing problem throughout the battle with casualty clearing stations too far to the rear. There were not enough stretcher-bearers or motor ambulances to assist in the clearing of the wounded. Often it fell to the terribly wounded to make it to the rear on their own, usually driven by survival instinct alone. With casualty clearing stations too far back, Canadians were dying of shock and loss of blood before getting medical attention. The primary dressing station on the Canadian front received over 2,600 wounded in the first twenty-four hours, then over 1,330, 2,540, 1,610, and 700 over each of the next four days. Even when they managed to arrive at the stations, the wounded lay for as long as twenty-four hours without treatment. There were simply not enough doctors and orderlies to keep up with the onslaught of wounded.

Pounded to pieces: There were two more days of battle, and several additional days after that of sporadic fighting. The enemy defences stiffened and Allied casualties mounted. The advance slowed and then ground to a halt, a breakthrough no longer possible, as the Allies could no longer provide sufficient supplies and reinforcements to the front lines against a desperate and determined enemy. On August 13, General Currie, supported by the Australian corps commander, were able to successfully convince Allied command that the battle should be called off before his corps was “*pounded to pieces*” (an annoyed Allied Supreme Commander Ferdinand Foch wanted the British to continue to push forward).^{4G, 5J, 11C}

“The finest operation”: The Battle of Amiens, from August 8 to 14, 1918, was truly an **all-arms battle**: artillery (fired over 409,000 shells), mortar teams, machine-gun units, armoured cars, cavalry, tanks, and airplanes supported the infantry. The Canadian Corps, as a spearhead force in the battle, met and defeated elements of fourteen German divisions and captured 9,311 prisoners and advanced 22 kilometres. Days after the battle, British Field Marshal Douglas Haig told Canada’s General Arthur Currie that the victory at Amiens was “*the finest operation of the war*”, while British general and historian J.F.C. Fuller called it one of “*the decisive battles of the Western World*.”^{5J}

The Cost of Victory at Amiens: There were numerous times all along the Amiens front when the difference between defeat and victory was determined by the incredible acts of courage and bravery by a platoon, or section, or even a single soldier, who charged into the face of enemy fire, outnumbered and against overwhelming odds in order to capture a machine-gun nest or enemy strongpoint. Ten Victoria Crosses, seven on the first day, and 3,000 other decorations were awarded to Canadian Corps soldiers for their actions at Amiens. At the same time, the Canadian Corps suffered 11,822 casualties. Shortly after the Amiens battle, conscripted men, returned wounded soldiers, and remnants of the broken-up 5th Division provided 12,000 reinforcements to bring the Corps up to full strength again.^{4G} At least seven young men from Sarnia gave their lives in the Battle of Amiens: Urban Noel, Albert Potter, William Reynolds, Walter Scott, Herbert Stott, Edward Timpson and Frederick Williams.

• **THE 2ND BATTLE OF ARRAS and BREAKING THE DQ LINE**, France, August 26-September 3, 1918: After the breakthrough at Amiens, Allied commanders agreed to keep the pressure on, and that a multi-army offensive all along the Western Front could possibly crack the now vulnerable Germans. Beginning on August 21, French, British, Belgian, and American armies renewed their attacks all along the entire Western Front. Beginning on August 19, the Canadian Corps trekked 65-kilometres back north to the Arras sector, where they would be part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line (the main defensive line), to the east of Arras.

The Hindenburg Line was not a single line but a series of strong defensive trenches, stretching 80 km southeast from Arras to Soissons, France. Built by the Germans in the winter of 1916-17, it was 30 kilometres deep on the Canadian front—twice the depth of anywhere else along the Allied front. A kilometer and a half behind the forward line was the Fresnes-Rouvroy Line, then the strongest of them all the Drocourt-Queant Line, and behind that was the yet unfinished Canal du Nord, and then the key logistical city of Cambrai.

The German strategy was to hold the Hindenburg Line, inflicting maximum losses on the Allies and surviving until the winter. Most of the Allied generals and politicians believed the Germans would do just that, and were planning for at least one, likely two, more years of fighting. On the opposite end of the cratered and broken battlefield, Germans had secured their defensive lines with thick rolls of barbed wire, concrete pillboxes, tunnels, a maze of trench lines, fortified villages, hundreds of interlocking machine-gun nests, and hidden artillery guns.

The Canadians had almost no time to plan and prepare for the assault (less than a week), while the German force opposite them were fully prepared, well-fortified and desperate to resist to the bitter end. One Canadian brigade major wrote, “*Vimy took months of preparation. Four days ago I knew nothing of this affair and this job is at least the equal magnitude.*” The campaign was to begin on August 25, but Currie did not think he could get his artillery sufficiently ready by then, so the attack was postponed until the next day (disappointing Haig).^{4G, 5J}

The assault begins: With no chance to surprise the Germans, Currie opted for a risky night operation. In the hours before the attack, heavy rain drenched the exposed troops anxiously hunkered down in their forward trenches. On August 26, at 3:00 a.m., the frontal assault was launched in the dark during a heavy rain. Behind a massive creeping barrage and artillery bombardment (Canadian, British and other Allied guns) that blasted enemy positions, Canadian 2nd and 3rd Divisions battered their way forward, firing and advancing over the open and broken ground. Two British divisions on the flanks were to draw enemy fire and exploit Canadian successes; a strong aerial armada

of RAF spotter planes, fighters and bombers provided essential and valuable intelligence and firepower in shooting up targets; and a few tanks also helped in the advance.

In the chaos of the battlefield, multiple battles took place simultaneously, with the Canadians fighting past thick rolls of barbed wire, small arms fire, machine gun nests, pillboxes, mortars, howitzers, artillery fire (high explosives and shrapnel), poison gas, hand-to-hand fighting and enemy counterattacks. The 2nd and 3rd Divisions took their initial objectives by 7:40 a.m. after very hard fighting. At the end of the day, the Canadians had punched a hole into the German line, and the exhausted men dug in and fortified their new trenches, as shell and mortar fire fell continuously, as fresh brigades moved into the jumping-off lines.

“The hardest battle”: The second day (August 27) was a repeat of the first, with chaos and confusion reigning across the battlefield with dozens of fierce clashes taking place simultaneously. Again, the problems of this type of warfare surfaced as battalions, platoons and sections fanned out over the battlefield: communication between each other and the rear was more difficult; heavy rain grounded the air force; supporting artillery fire for each group was sporadic at best; the logistics of moving supplies to the front groups was more difficult; casualties mounted leaving exhausted and fewer men to press on; and there was no hope of surprising the dug-in enemy.

Intense, brutal fighting continued for three days. The Canadians relentlessly clawed their way forward through a maze of trenches, uncut barbed wire, and hundreds of machine-gun nests, advancing more than 8 km past three separate defensive lines and towards the DQ Line. They shattered several German divisions and captured some 3,300 prisoners. Canadian success was achieved by relying on massive firepower, innovative infantry tactics (fire and movement), Royal Air Force support, and countless acts of sacrifice and bravery, at a cost of 5,800 casualties over the three days. Currie later called the Corps advance to the DQ Line, *“the hardest battle in its history.”*^{E, F, 2I, 4G, 5J, 11C}

Next phase: After the three days of brutal fighting, British Command ordered the Canadians to start the next phase (attacking the DQ Line) on September 1. Again Currie demurred, delaying it an additional day. He wanted to wait to attack “the backbone of the enemy resistance” not “until we are ready, then we will go out.” He also knew that the Germans (with three divisions holding the front and five in reserve) would go all out to defend this important position. The Canadians had only two divisions (plus backed by the Corps’ full artillery). As they prepared for the attack, German artillery saturated the Canadian front day and night. Light railways, tramways, trucks, mules, and men all slugged ammunition, food and weaponry forward on muddy, cratered roads praying that the shells would go long or short. The Canadians had no chance of surprising the enemy, very little time to prepare for the battle, and limited aerial intelligence, so the Canadians were going blind into a heavily-fortified line.

Beginning on the night of August 30, 1918, battalions of the Canadian 1st Division launched a series of attacks, which would continue for two days, in order to secure stronger jumping-off points including the deep trench Vis-en-Artois Switch. In the see-saw warfare with dozens of individual battles, the Canadians attacked, retreated, were overrun, and overran in return. In harsh days of fighting before the big push against enemy troops who, as one battalion commander described them, *“fought bitterly until the end in almost every instance, and in many cases were killed rather than captured”*, the Canadians lost over 1,200 men.^{4G, 5J, 11C}

The Drocourt-Queant (DQ) Line: On September 2, the next big push began, with the Canadian 1st and 4th Divisions leading the charge to take the next formidable objective, the Drocourt-Queant (DQ) Line. The DQ Line was the very heart of the German defence system. The Germans had taken more than two years to build it. It was heavily fortified with a front line and support line both with clear fields of fire—both protected by dense rolls of barbed wire, concrete pillboxes and bunkers, hundreds of machine gun posts, with interlocking trench systems. Several villages were incorporated into their positions becoming miniature fortresses, and eight fresh German divisions were situated in depth. The Germans knew an attack was coming, and through the night and in the hours before the offensive was to begin, they sent out forces to disrupt plans and destroy jumping-off trenches. Fierce battles raged back and forth in the hours before zero hour. The attack on this objective would become the **hardest single battle of the war** for the Canadian Corps.^{4G, 5J}

The assault begins: On September 2 at 4:50 a.m., the men of the Canadian 1st and 4th Divisions leapt from their forward trenches behind the creeping barrage. A Canadian gunner wrote, *“At dawn the whole valley and the hills around burst into a living hell of flame and of hunks of shells.”* The enemy was ready and their counter-barrage came down almost immediately. The Canadians advanced, often in the open, into small-arms and sweeping machine-gun fire, shrapnel and high-explosive shellfire, and poison gas. Lead troops, then follow-on forces pushed on through the smoke and fire, following their heavy barrage (90 metres every three minutes, then 90 metres every five minutes).

Artillery batteries and tanks assisted in taking out strong points. The Canadians had massive artillery support—the most they had for any Canadian attack during the Hundred Days Campaign, and over 70 Mark V tanks, and also taking part was the Canadian Independent Force, an armoured machine-gun brigade. Often it was the infantry (the remains of platoons), who would spread out and engage the strong points with rifle, Lewis-gun, and grenade fire and then manoeuvre around them to attack from the sides or rear. Again they were dogged by the same problems as they pushed deeper into enemy lines, the artillery and logistical train struggled to keep up.

“Turning point in the campaign”: Against nearly unimaginable odds, bombarded mercilessly by enemy shellfire and raked by machine guns (the Canadians faced machine guns ten or twenty times the density of guns that they faced on the Somme, many of them in concrete bunkers), the battered Canadian infantry advanced through two days of intense fighting, and succeeded in breaking the Drocourt-Queant Line (on September 3), advancing almost 6 kilometres.

Elements from at least seven German divisions had been defeated, and over 6,000 prisoners were captured. Sir Julian Byng cabled General Arthur Currie after the battle, telling him that the Canadian Corps’ *“smashing of the Drocourt-Queant Line was the turning point in the campaign.”* Currie believed the Canadian operation at Arras was one of the hardest-fought battles of the war. He wrote on September 3 in his diary that *“it is a question whether our victory of yesterday (DQ Line) or of August 8th (Amiens) is the greatest, but I am inclined to think yesterday’s was.”* The official historian of the CEF agreed writing, *“The Corps’ success in destroying the hinge of the German defence system had not only made it impossible for the German Third Army to advance; the repercussions were to be felt along the whole front.”* The Canadians crashing of the D-Q hinge sent reverberations all along the line, allowing forces to the south to push forward and, in combination with an Australian breakthrough, forced the Germans to relinquish all remaining territory they had captured in March and April. It also proved to the Germans that even their most fearsomely protected defences could be smashed.

For the Canadians, during the first three days of September, they suffered over 5,600 killed or wounded. There were countless acts of bravery and soldiers’ selfless acts of sacrifice for their brothers-in-arms. A testament to the tenaciousness of the Canadian infantrymen—seven Victoria Crosses were awarded for uncommon valour on September 2, most given to soldiers who single-handedly charged machine-gun nests.^{E, F, 2I, 4G, 5J, 11C}

Canadian historian and author Tim Cook wrote the following DQ Line account in his book *“Shock Troops”*: *When the bone tired Seaforths (Highlanders) of the 72nd Battalion were relieved after losing a staggering total of 448 officers and men, they trudged out of the line, half-dead from exhaustion. But when they heard that their fallen mates were going to be picked up and placed in temporary mass graves by divisional burial parties, they showed their mettle and esprit de corps, and marched back into the line. Exhausted sweat- and blood-stained infantrymen collected the remains of their comrades and interred more than sixty of them, side by side, thus ensuring that their comrades were buried with dignity by the men who had stood beside them in battle.*

Private George Bell was one who volunteered to help clear the battlefield (the strength of his platoon had been reduced from forty to fewer than ten in two days of fighting). *Bell and the burial team received a stiff tot of rum to help deal with their grim work, and after arranging the bodies in the (mass) grave, they began to search them, taking identification tags and emptying pockets to identify the slain. An anguished Bell remarked, “Too often we pull out a picture. There he stands and she stands beside him. How smart he looks in his new uniform and how proud and happy she looks. Here’s a family group. There he is, the others must be his father and mother and kid sisters... Damn this dirty, lousy, stinking bloody war.”*^{4G}

The Cost of Victory at Arras/DQ Line: The Canadian Corps suffered 11,400 casualties during the 2nd Battle of Arras and the breaking of the DQ Line. At least ten young men from Sarnia gave their lives in the Arras/DQ Line battle: Alfred Adams, Cameron Bissett, Edward Causley, Albert Eberly, William Eddy, George Hall, Amos Iveson, Albert McDonald, James Steele and Daniel Thomson.

• **NEEDED REST:** After the two significant victories at Amiens and Arras, the Canadian Corps had been nearly shattered, suffering almost 24,000 casualties (most of them infantry) in less than a month of battle. With such losses, the morale of the Canadians, though buoyed by their victories, was fragile. Earl Bolton, a Private from Ingersoll, Ontario, survived the 2nd Battle of Arras, and wrote his sister on September 22nd, *“just a few lines to let you know I am still alive. Things are pretty lively here with us. We are sure giving Fritz all he wants now. I have been in one scrap and just out on rest getting ready for another... my friend was killed in the last push which makes it pretty lonesome for me... You never know what minute you are a dead man here. Shells burst around you that would*

blowup a building the size of a house.” Earl Bolton, a member of the Canadian Machine Gun Corps, was wounded ten days later and died on October 9, 1918.^{2G,5J}

After Arras and breaking the DQ Line, the Canadian Corps enjoyed a well-earned rest, and reinforcements were sent from camps in England, bringing the Corps to full strength. Canada’s Fifth Division (all volunteers), who were in England, were also used to feed men to the front. A few men went on leave, the lucky going to Paris or London; most just rested in the rear areas or remained close to the front and hoped to avoid the German artillery shells that regularly came over the lines (and caused about 100 casualties a day).

Of note: Some of the reinforcements at this time were **conscrip**ts, drafted under the Military Service Act, who underwent shortened training and then were rushed to the front (the first conscripts arrived in France for brief training in May 1918. Substantial numbers fought at Amiens on). Over 24,000 conscripts reached France before the Armistice, providing valuable reinforcements for depleted battalions in the Corps, keeping them at or near full strength (900 to 1,000 men). More information on the Conscription Crisis and Sarnia conscripts who lost their lives during this final campaign is on pages 156-158.

• **THE BATTLE OF CANAL-DU-NORD and CAMBRAI**, France, September 27-October 11, 1918: The Germans had now retreated to the other side of the Canal du Nord, part of the main Hindenburg Line, the last trench system of German defence. Cambrai, a city of 30,000 inhabitants was a vital German-held logistical hub and railway centre and the key to their Hindenburg Line defences, and was located on the Canadian front. The Germans would defend this city with a ruthless desperation.^{4G}

Once again, Allied commanders Marshal Ferdinand Foch and Douglas Haig called on Arthur Currie and the Canadian Corps to spearhead another attack—to cross the Canal du Nord, which the Germans had flooded leaving a marsh-like bog; then punch through a series of fortified villages and deep interlocking trenches and through dense barbed wire; to capture Bournon Wood, a fortified strongpoint; and then capture the city of Cambrai, an important railway and supply hub for the German army. No one was sure how the Canadians would respond to being thrown into one final titanic battle against seemingly impossible odds and a desperate enemy whose back was against the wall.^{4G} All along the Allied front, British, French, and American armies were to launch assaults along the German lines, and the Canadians were assigned the toughest sector.

The Canadian Corps had almost a full month of planning and preparation for the attack (all four divisions were now commanded by Canadians), however, the Germans knew an attack was coming and complete surprise was impossible. Separated by the canal, both sides dug in and fortified their fronts. The Canadians remained out of sight during the day (hiding in their trenches, often with their muddy groundsheet thrown over them), and at night worked on their trenches, barbed wire and dugouts. Observation balloons tethered to the ground and reconnaissance aircraft circled the battlefield gathering information. German bombers also flew tactical runs, dropping their payloads on the Canadians. Both sides continued to rain down high explosive and shrapnel shells on each other, day and night. The Germans also fired heavy concentrations of chemical shells, mixing their gases to form a witches’ brew that permeated the entire battlefield.^{4G, 5J, 11C}

The Canal-du-Nord: The Canal-du-Nord banks were high, the canal wide (the western bank varied between 3 and 3.6 metres in height, the eastern bank was 1.2-1.5 metres high), and the canal bed ranged from 40 to 60 metres across. The Canal-du-Nord waterway had been under construction in 1914 when war broke out, and it lay incomplete. The Germans had flooded the region to recreate a Passchendaele-like bog. To the south was a narrow, dry portion only 2,600 metres wide. The Germans held an area on the west side of the canal (with machine-gun nests and barbed wire) that the Canadians would have to fight their way through just to get to the canal.

On their side of the canal, the Germans had seven divisions (with four more in reserve), an extensive trench system, many interlocking machine-gun posts, concrete bunkers, row upon row of barbed-wire entanglements and a series of fortified towns. A mile to the east and parallel to the Canal was a similarly defended Marquion Line trench system, and then the fortified Bournon Wood (bristling with machine guns and artillery batteries). Further on, they would have to break the Marquion defence system and the high ground north of Cambrai. Eight German divisions held the area across from the Canadians (three in the line and five in reserve).^{4G, 5J, 11C}

The Plan: Currie came up with a breathtaking and audacious plan—the 50,000 men of the Canadian divisions were to be channelled through the 2,600 metre dry section of the Canal du Nord in a few hours, and then were to fan out on a front of 14 kilometres. They were to hit hard and fast, then were to keep plunging forward into the depths of

the enemies' defences. There was to be no heavy bombardment until just prior to the assault, but masses of artillery were put in place, with careful planning in conjunction with the RAF for counter-battery work to suppress the German guns. Currie knew that any success would require his artillery to move across the canal quickly. With the Canadian field artillery limited in range to some six kilometres, planners plotted how to get guns over the canal quickly to provide the fire support the infantry would need. Much depended on the engineers who had to construct seven bridges for the foot soldiers and 10 larger bridges to get the guns across, all this to be done under fire.

The Germans were so confident in their defences and positions here, that they did not expect an attack in this area. If the Germans repulsed the lead Canadian units, clogging up the canal, the traffic jam of humanity and horses leading back from the front would be ripe for slaughter from enemy artillery. The Commander of the British First Army, General Henry Horne, tried to convince Currie to try something else. Field Marshal Haig and Sir Julian Byng also visited Currie before giving the plan their blessing.^{4G, 5J, 11C}

Assaulting the Canal-du-Nord: On the eve of the attack, a steady drizzle rained down on the troops as they tried to remain as quiet as possible in their muddy holes and slit trenches. The activity in the days preceding could not be masked, the Germans knew that an operation was impending. The Currie-planned assault was launched on September 27 at 5:20 a.m., with a creeping barrage consisting of shrapnel and high explosive shells, along with smoke and gas shells, plus Vickers heavy machine-guns added to the barrage with tens of thousands of bullets in a ferocious **“shock and awe”** operation—with the full weight of the Canadian Corps' Royal Artillery, comprising 785 guns—thrown ahead of the infantry's assault. It was the heaviest single-day bombardment of the entire war.

The narrow front allowed only four (depleted) battalions of the 1st and 4th Divisions, totaling 2,100 men (of the total 100,000-strong Canadian Corps), to spearhead the attack across the dry unfinished corridor of the canal that was only 2,600 metres wide. Several more battalions would leap through them in succession. The infantry moved forward at a measured pace through a No Man's Land of enemy machine-gun and artillery fire toward the canal, then up and into the canal, across the canal (ranging from 40 to 60 m across), then scrambled up the far wall of the canal (1.5 m high) using ladders or on the backs and shoulders of others. Adding to the chaos, because the front was not straight, barrages moved forward at different paces, and some soldiers moved forward too quickly, so some infantrymen were killed by their own barrage or gunfire.

Assisting in the advance were Mark IV armoured tanks (each division only had eight) and RAF squadrons providing air cover, its pilots, a large number of them Canadian, all young and many were inexperienced. RAF pilots attacked anti-tank guns, pinpointed enemy guns and troop concentrations for the artillery. This use of air, armour and infantry in combination was a precursor of the blitzkrieg of WWII. One Canadian pilot of the RFC (from southwestern Ontario) who was above the battle on September 27 wrote, *“I have never in all my life and never again do I expect to see anything to equal this morning's war. We crossed the line just as the sun was coming up out of the east and it certainly added to the wonderful scene that was going on below. The whole front was one mass of smoke, dust and flames... the poor boys on the ground certainly deserve great praise... How anything or anyone could live through it, I do not know. I do know though, that all the time I was buzzing around through the air I was thanking my stars that I was not on the ground”*

On the other side of the canal, as the barrage continued to move forward, the Canadians continued their advance into the enemy firestorm. Advancing in single file, going to ground when necessary, sections thrust forward in short rushes, laying down fire to provide cover for other units as they moved ahead.

The **Canadian combat engineers** were essential here, following close behind the first wave. They built roads, ramps and bridges across the canal for trucks, horses and artillery; erected footpaths over some of the wet spots for the infantry; and carried out mine clearing—all often while under intense fire—in order to move infantry and artillery in support of the advancing front. One bridge was quickly completed with the first guns going across at 8:40 a.m. Seven additional bridges had been thrown over the canal by 6 p.m. Currie wrote, *“Let me tell you that those bridges were begun not only under shell fire, but under machine gun fire, and yet nothing could deter the work of our men.”*

First day continues: Follow-up battalions crossed the fabricated and larger bridges, reassembled on the opposite side, then leapfrogged over the spearhead battalions and fanned out to a full 10,000 metre front (all while under fire). Over the course of the first day, as the Canadians fanned out, they faced a firestorm from the German defenders making a determined stand, including machine-gun nest fire, sniper fire, artillery barrages, and counterattacks. Displaying great grit and determination, with their numbers thinning and artillery support dwindling,

the Corps continued to work its way forward, steadily driving through the enemy trenches and strongpoints in dozens of chaotic piecemeal assaults.

The German strongpoint **Bourlon Wood**, a forested hill overlooking the flat, exposed plain and canal was expected to be the most difficult objective on the entire front. In fact, the Canal du Nord set-piece battle was sometimes referred to as the “B.W.” operation in official documents. To capture this objective, the Canadians first captured the village Bourlon. Then several battalions fiercely fought through the Bourlon forest, tree by tree, bush to bush, under cover of a phosgene gas attack, knocking out the German strongpoints, but suffering terrible casualties.

The bitter fighting went on into the night of the September 27th, the casualties heavy, with more than 840 Canadians killed and many more wounded in a single bloody day of battle. One ambulance driver wrote of his gruesome task searching the battlefield, *“Dead men lay here and there... Those with heads torn off, sides shot away and bullet holes through many heads—many soaked in blood and lying in it...”* At the end of the first day, the Canadians had broken through three lines of German defence, and were successful in reaching their initial objective, advancing nearly 8 kilometres, crossing the Canal-du-Nord and capturing the strongpoint Bourlon Wood.^{4G, 5J, 11C}

The last days of September: September 28-30 were much more difficult for the Canadians as they advanced further east, fighting through a more fortified Marcoing Line, numerous enemy occupied villages and towards Cambrai. German high command was desperate to hold Cambrai, so seven German divisions were rushed to the front on September 28 and 29—thus outnumbering the three Canadian divisions (1st, 3rd and 4th, and one British to the north). The Germans also added over a dozen marksman machine-gun companies. This was a positive in that, one of the goals of the Allied plan was for the Canadians to draw essential enemy reserves to the Hindenburg Line, relieving pressure in other areas along the Western Front. A number of German units on the Canadian front were personally visited by Field Marshal von Hindenburg, who urged them to hold the line to their collective deaths. No retreat, no surrender.

With the Canadian forces now spread out over an almost 10,000 metre front, communication lines broke down, artillery support was insufficient and sporadic, and multi-pronged attacks were uncoordinated and chaotic, so the often overextended, understrength and beleaguered Canadian units suffered shocking levels of casualties against an enemy that was more determined and desperate, and one that continually mounted counter-attacks against any ground lost. Canadian assaults were made into areas of sweeping machine gun fire, hidden snipers, barbed wire and enemy shells with enemy aircraft overhead raining down fire.

One Canadian infantryman remembered his experience of playing dead along with his section mates as they lay in shallow craters pinned down by raking machine-gun fire, *“It was certain death to breathe deeply. The moaning and groaning of the wounded put fear into those who were more fortunate, but still we could not move to help them. As the wounded rolled over to ease the pain of their wounds, the Germans would riddle them with bullets.”* A Canadian gunner wrote, *“The Canadians have suffered terrible losses during the last 3 days. Some companies have fought to the last man, but we have taken all our objectives.”* Another Canadian infantryman recounted his shock as he marched to the rear with the remnants of his battalion, *“The last five days and nights we have been in battle... the shattered remnants of our battalion, to the number of 60, groped our way out of death and hell... I bore a charmed life through it all, of close calls, I ceased to count them. I am still numb... every time I look around for a familiar face, I find they have all gone.”*^{4G, 5J}

All along the front, **Canadians found ways to attack and counterattack**, moving from a smoking shell crater to a ditch, from a ditch to a depression in the ground, pushing ahead in small groups, metre by metre. Daunting acts of bravery, grit, skill, self-sacrifice and tactical innovation continued in the chaotic piecemeal assaults, but too often the infantry were called on to attack without time to prepare or reconnoiter the ground. On many occasions, after taking an objective, the German prisoners outnumbered the surviving attacking Canadians. The cycling of Canadian infantrymen through the battered units kept up the Corps’ momentum, but the Germans were also pouring in reinforcements, so the battle was reduced to one of hard-pounding, brutal engagements of attritional warfare. The Germans kept on resisting hard, their counterattacks heavy and in large numbers, their enemy machine-gunners took a heavy toll every time the Canadians tried to move forward. By October 1, the Canadians had crossed the Marcoing Line, fought through a number of occupied villages and had surrounded Cambrai on two sides.

General Arthur Currie finally halted his offensive on October 1, giving his weary battalions a few days to bring up reinforcements. The cost of the Canadian success was high, and casualty numbers continued to mount day by day. In the five days of battle from September 27 to October 1, the Canadian Corps suffered some 10,000

casualties. Currie wrote in a letter to Prime Minister Borden that the breaking of the canal and its eastern defences was “*some of the bitterest fighting we have experienced... It was attack and counterattack every day.*” In another letter to a friend, he wrote that “*we have never known the Boche to fight harder. He is like a cornered rat.*” ^{4G, 5J, 11C}

Moving into Cambrai: The fighting in the first week in October was of a minor scale, the Canadians alternating between offensive operations and an active defence, keeping the Germans back on their heels, although heavy enemy shelling and gassing were a constant both day and night. Also during this time, preparations for an assault on Cambrai continued with ammunition columns, light rails, and pack trains stockpiling the front lines, and artillery was moved forward. Because of Cambrai’s importance as a logistical centre, the French implored the Canadians not to destroy it with artillery fire. Currie, not willing to throw his forces into battle without an adequate barrage, decided he would wait and see what the Germans planned to do with the Canadians on their doorstep. The Germans held the bridges that criss-crossed the moats and canals near Cambrai, and capturing them intact was crucial to the final assault on the city.

On October 6, 1918, orders arrived directing the capture of Cambrai in conjunction with the British Third Army, which was in good position south of the city. On the night of October 7, a series of probing battles by the 2nd Division was successful in gaining key terrain northeast of Cambrai, strengthening the Canadians hold on the city. The Canadian attack was launched by the 2nd Division at 1:30 a.m., on the cold, wet and dark night of October 8-9.

As the Canadians readied for their assault and the dreaded urban warfare among civilians, hostiles, and rubble, the Germans pulled out of the city on October 9, behind a screen of smoke, having first set parts of the city on fire (though there was some enemy shelling and opposition from small German rearguards including snipers and machine-gunners). As the Canadians (2nd and 3rd Divisions) entered the city, and through its many booby-trapped streets, Cambrai appeared to have been gutted.

The Germans had looted everything they could manage; parts of the city had been deliberately set afire; many bridges had been blown up; and it seemed that a serious attempt had been underway to destroy the city. This pattern of rampant destruction, a **scorched-earth** policy, was their ruthless norm as the Germans retreated east during the final phase of the war. Only the rapid Canadian advance had frustrated this plan, so Cambrai and its ashes had fallen to the Canadians, saving the city from complete ruin. On October 11, the Canadians handed over its responsibilities to the British troops. Over the following two days, lead Canadian forces followed the retreating enemy carefully, who still had fight left in them. ^{D, E, F, 2I, 2N, 4G, 5J, 11C}

Frederick Banting: One Canadian soldier who was wounded in the Battle of Canal-du-Nord/Cambrai was Captain Frederick Banting. Born in Alliston, Ontario in November 1891, Fred Banting was a medical student when the war began. He tried to enlist in the Canadian Army, was rejected for poor eyesight, but nonetheless became a medical officer in the Canadian Army Medical Service when he graduated in December 1916. Captain Banting went to France in June 1918, where he served with a field ambulance and as a relief officer filling in for battalion medical officers. He was the medical officer for the 44th Battalion during the attack on the DQ Line, had repeatedly come under fire, and treated dozens of wounded.

During the attack across the Canal-du-Nord and toward Cambrai on September 28, Banting was ordered to replace the wounded medical officer of the 46th Battalion. He wrote in his diary that an “*absolutely wonderful*” barrage began at 5:30 a.m. followed by “*cases coming about 6 and from then on they actually poured in.*” Later, he came under heavy shellfire, stopped to treat his wounded stretcher-bearers, and continued forward. Banting was then wounded in the right arm by shrapnel, suffering a severed artery. Some accounts suggest he continued to treat the wounded for hours before he went to the rear for treatment. For his “energy and pluck,” Banting was awarded the Military Cross in 1919.

Banting’s war had ended. His arm became infected, and he was not released from hospital until December. He returned to Canada in March 1919, continued his studies, practiced medicine in London, Ontario, and became interested in methods of treating **diabetes**. Working with Charles Best, in November 1921, their experiments resulted in the discovery of **insulin**, still a treatment for diabetes today. Banting was awarded the Nobel Prize for Medicine in 1923, sharing it with Best. ^{11C}

When the Second World War broke out, he served as a liaison officer between the British and North American medical services. He was killed in February 1941 when the aircraft he was in, being ferried to Britain on a war mission, crashed in Newfoundland.

The Cost of Victory—Arras to Cambrai (Aug. 26-Sept. 3 and Sept. 27-Oct. 11): Many historians consider the breaking of the Drocourt-Queant Line, and the taking of the Canal du Nord, the most difficult and one of the greatest Canadian tactical achievements of the war. Currie's plan was complicated but innovative, and the infantry, engineers, artillery, air support and armour had cooperated to make it work—while the supply and transport system, which had to move ammunition dumps across the Canal du Nord under fire, performed miracles to sustain the attack.

From August 26 to October 11—the Battle of Arras and breaking the DQ Line to the Battle of Canal du Nord and taking Cambrai, the four Canadian divisions had advanced 37 kilometres against the enemy's most formidable defences. They had faced 31 German divisions, and they had smashed many of them decisively, capturing almost 16,000 prisoners. After receiving praise from General Horne on the brilliant record of the Canadian Corps, Currie wrote to a friend that since August 8, *"We took care of 25% of the total German army on the Western Front... leaving it to the American Army, the French Army, the Belgian Army, and the rest of the British Army to look after the balance."*

For the Canadian Corps, some 100,000-men strong, it was one of the bloodiest operations of the war—suffering 30,806 killed, wounded, and missing. Add to that, the Canadians had earlier lost another 11,822 casualties in the fighting at Amiens (August 8 to 14). In all, during this period (August 8 to October 11), the vast majority of these 42,000+ killed, wounded, and missing would have fallen on the infantry at the sharp end, who were fewer than 50,000 men. One historian wrote, *"Counting the casualties, the German machine-gunners proved to be the Canadians nemesis through the last half of the 100 Days."*^{46, 51}

From Arras to Cambrai: at least ten young men from Sarnia gave their lives in the 2nd Battle of Arras and DQ Line (August 26-September 3) including Alfred Adams, Cameron Bissett, Edward Causley, Albert Eberly, William Eddy, George Hall, Amos Iveson, Albert McDonald, James Steele and Daniel Thomson; **and** at least eleven young men from Sarnia gave their lives during the Battles of Canal-du-Nord and Cambrai (September 27-October 11) including George Beaumont, Joseph Carson, Royal Crawford, Alexander Cunningham, Sidney Davies, George Johnston, George Jones, Albert Pringle, Frederick Robinson, John Salsbury and Edward Watson.

• **PURSuing THE RETREATING ENEMY:** German positions had been broken all along the Western Front by the Allied forces, which were growing stronger with each month as the Americans arrived in force. The British Expeditionary Force, the French army, and the American army were all pressing the Germans eastward. German allies were in poor shape: Bulgaria sued for peace at the end of September; the Turks surrendered on October 30; and the Austrians surrendered four days later. Morale had never been lower in the German army as a result of their heavy casualties at the front, the devastating effects of the Spanish flu that killed and weakened thousands, and the ongoing plight of their loved ones at home who were struggling to obtain sufficient food. With the Germans retreating and on the verge of defeat, Allied Commanders Ferdinand Foch and Sir Douglas Haig ordered their tired forces to continue to hound the enemy.

After taking Cambrai, Canadian forces advanced tentatively using artillery and battle patrols, pushing against the retreating German forces, occasionally running into significant opposition. They were now moving into parts of France that had been in German hands since the beginning of the war in 1914. To purchase much-needed time, the retreating Germans destroyed bridges, flooded areas to make them impassable, destroyed roads and placed sacrificial forces behind them to harass any Allied advance. The soldiers were generally shocked by the destruction the Germans had inflicted on French farms and factories, and even more by the sights of untold suffering—homeless refugees, widows and orphans. The civilians had initially had some reservations, however, as the Germans had portrayed the Canadians as wild colonials who would rape and murder their way through the French population.

As the Canadian divisions advanced through tiny villages and mid-sized towns, they were delighted to find themselves greeted as liberators by the French civilians lining the roads and cheering on the victors. A Canadian Private wrote to a friend at home, *"Instead of dugouts, we are living in houses, most of the time with civilians... They don't seem to be able to do enough for you and should you offer them money they get peeved."* Once greeted into the French homes, the Canadians were told stories of the German occupation that included the ill-treatment of the elderly and women, and the looting of livestock and destruction of homes, farms and factories. Robert Connors, serving with the Canadian Railway Troops, wrote home, *"Nearly all the girls and women from about 15 years up are certainly in some condition...I can't explain exactly what I mean in a letter but you can surmise what I mean."*

The Canadian troops also found themselves in a relief role as they cared for malnourished and sick civilians. Many of the Canadian units voluntarily gave up their warm rations to feed the destitute and hungry. The Canadians

continued pushing east throughout the third and fourth weeks of October 1918. Still, Canadians died by the score every day, the result of German resistance. And just when it looked like a straight march to Berlin, the Germans stopped running at Valenciennes, a city of 36,000.^{4G, 5J, 11C}

- **THE BATTLE OF VALENCIENNES**, France, November 1-2, 1918: Valenciennes was the last major French city still in German hands, and after their experience at Cambrai, they believed that the British and Canadians would not bombard the city. The Canal de l'Escaut, along the western part of the city, was a major obstacle—filled with water, its banks were wired with explosives and machine guns were directed into it. To the south of the city was Mont Houy, a forest-covered hill that rose to a height of 150 metres. It provided a dominating view of any Canadian advance, and was strengthened by five divisions of German defenders, backstopped by additional defences in depth, secondary trenches, and the fortified city of Valenciennes itself.

The British XXII Corps opened operations on October 24, striking from the south and over two days, sometimes against strong opposition, the British reached Mont Houy. On October 28 at 5:15 a.m., a single battalion of 500 men from the British 51st Highland Division, behind a massive artillery barrage, attacked Mont Houy. They did manage to capture the hill through some dogged fighting, but German counterattacks drove them from their gains. The task of taking Mont Houy and pushing into the south end of Valenciennes fell to the Canadians.

At Valenciennes, the Germans held every advantage: they were dug in; had flat, open fields of fire; and outnumbered the Canadians by at least two or three to one. Currie and his staff worked almost non-stop over two days to prepare for the battle. Unlike the British, who had thrown just one battalion against the position, Currie employed the entire 10th Brigade, with two battalions (47th and 44th) up, and the 46th Battalion as a second-wave formation, and the 50th Battalion in reserve. Before the attack, not wanting to waste his men's lives, Currie ordered the Canadian Corps heavy artillery to pound the enemy positions day and night. Brigadier-General Andrew McNaughton, newly promoted to command the heavy artillery, and Lieutenant-Colonel Harry Crerar, the counter-battery staff officer, devised the plan for the guns. (Both men would command the First Canadian Army during the Second World War). More than 250 field and siege guns supported the 10th Brigade when they stormed the enemy positions—the largest force to support a single Canadian brigade in the entire war.^{11C}

First day: After a night of cold rain falling over the Canadians as they lay crouched in their shallow jumping-off trenches, on November 1 at 5:15 a.m., a massive Canadian artillery bombardment (field artillery, heavy artillery, augmented by machine gun fire and mortars) opened up, shattering enemy strongpoints and artillery batteries with accurate fire. When the creeping barrage moved off, the two understrength lead Canadian battalions of the 10th Brigade advanced (they were so under-strength that one of the special mopping-up platoons consisted of a group of batmen, signallers, orderlies, and runners—men who rarely went into battle).

Within forty-five minutes, the 44th Battalion had achieved their objectives against an enemy that was shocked by the power of the Canadian bombardment, and hundreds surrendered freely. The 46th Battalion swept past the 44th, and through four hours of desperate fighting, pushed nearly 2,500 metres through residential areas that were heavily-fortified by the Germans. The 47th Battalion followed their barrage, and had to fight through pockets of enemy formations (including vicious hand-to-hand fighting) and strong resistance, and reached their objective by 10:20 a.m. Once at the south end of the city, the 46th and 47th spent the rest of the day trading fire with the enemy across the canal. Time and again, brave pockets of Canadian attackers banded together and advanced in short sprints, behind a Lewis gunner, or as a rifle grenadier laid down a covering explosion, or while other formations covered them, in order to clear enemy strongpoints.

As the 10th Brigade advanced north to the city, the 12th Brigade launched a flanking attack from the west of the city. A little before noon on November 1, two battalions (38th and 72nd) crossed the Canal de l'Escaut on rafts and on cork bridges laid down by the corps' engineers. With strong covering fire from rifles, Lewis guns, field guns and mortars, the two battalions were able to successfully make the amphibious crossing while under direct enemy fire. Throughout the day, elements of these two battalions swarmed through the western part of Valenciennes, engaged in urban warfare, pushing forward aggressively overtaking German units. Further to the north, the 4th Canadian Mounted Rifles (CMR) completed the third side of the encirclement, crossing the canal and infiltrating through the northern part of the city under the cover of darkness.

Second day: On the morning of November 2, the various Canadian battalions spread through the city from three directions. By the end of the day, Valenciennes had fallen and was completely in the hands of Canadian and British troops. The Germans were in full retreat. The Canadians took some 1,400 prisoners from 19 enemy battalions.

This **last set-piece battle** at Valenciennes, the last major prearranged assault staged by the Canadian Corps, cost the Canadians 501 casualties, of whom 121 were killed or listed as missing.^{D, 4G, 5J} Private Alfred Corrick of Sarnia was wounded by enemy gunfire at Valenciennes on November 1. He was returned to England to recover from “severe shell wounds”. He never made it home. He died in an English hospital in early January 1919. Alfred Corrick’s story is included in this Project on page 251.

A Sarnian at Valenciennes: Following is a story from the *Sarnia Observer*, November 1918;

French City Thanks Sarnian

An interesting souvenir of the recent advance in France has reached Sarnia in the form of a letter under the seal of the French City Valenciennes, addressed to Capt. Johnston MacAdams, conveying the thanks of the municipality in connection with an incident which took place when the city fell into the hands of the Canadians.

A large part of the fine civic collection of art had been left behind by the Germans, and was found to be exposed to the elements through the damage done by shell fire to the civic building. The Sarnia officer took prompt action, and with the assistance of a party of soldiers, work on the roof was commenced and rapidly completed, and other prompt steps taken to preserve the treasures of art from further damage.

The letter was accompanied by a memento from the city which will doubtless be held in permanent regard by Capt. MacAdams as a remembrance. The letter was signed;

F. Billiete, L’Adjoint Faisant Fonctions de Maire de Valenciennes, Valenciennes, France

• **PREMATURE PEACE:** On November 7, 1918, Sarnia, like the rest of the world, received news (falsely) that the war had ended. The *Sarnia (Canadian) Observer* large print headline on that day was, “PEACE DECLARED.” The sub-heading was a report out of Washington, “Navy cable censors reported today that unofficial messages had come thru from abroad, announcing that the Germans had signed the Armistice terms delivered by Marshal Foch. No authority was given for the statement, and while it added to the air of expectancy everywhere, officials said nothing except an official dispatch could be believed. Neither the American government nor any of the Allies’ embassies or war missions had been advised even that Marshall Foch actually had presented the Armistice terms. It was assumed however that the German envoys had been conducted through the French lines some time during the day.”

Another sub-heading was a report out of Toronto, “One of New York’s news agencies carried the story today that an Armistice had been signed, to become effective at 2:30 today but there is nothing official or corroborative yet.” A related headline stated, “Celebrations in all the large cities - Detroit has received official information that the armistice had been signed at 10 o’clock today, and the hostilities had ceased at 2:00 pm. Celebrations are being held in all the large cities of the United States and Canada this afternoon.” A report out of Toronto stated, “This city went into furious demonstrations of joy on the report today about 1:10 of unofficial news that an armistice had been signed on behalf of Germany. Whistles were blown continuously and bells rung all over the city. Business was suspended and the streets were crowded with celebrating thousands.” As it turned out, peace would not become official until four days later.

• **THE PURSUIT TO MONS**, Belgium, November 1918: After Valenciennes (Nov. 1-2), the German armies were drawing back, but there was no rest for the Canadians, as Haig ordered a full advance against the retreating forces. This was no easy task as rearguard enemy snipers and machine-gunners, frequently fighting to the death, made pursuit dangerous. Complicating the assignment: the countryside was dotted with farms, hedges, and sunken roads, all of which were perfect spots for ambushes; a steady week-long rain left the men wet, cold and exhausted in their continual march over the few muddy roads; the Germans destroyed most of the roads, bridges, railways and planted landmines; villages had been ravaged and looted; evacuated trenches, dugouts and homes were booby trapped; enemy aircraft continually strafed and bombed troop concentrations; and the Canadians own supply lines had trouble keeping up with the rate of movement.

Despite the difficulties, battalions leapfrogged each other as they gave chase as pockets of small fierce engagements continued to rage, involving the clearing of houses, farms, and villages and the crossing of river obstacles (which required the work of the engineers). With the war winding down, amid rumours of an impending peace, followed by rumours that peace was refused, Canadians continued to advance and were still being killed daily by the dozens. Whenever the Germans were defeated or fell back, French civilians lined the roads, cheering on the Canadians as they continued their march and fight through France. As the Canadian Corps’ logistic system struggled to keep up with the demands of the advance, soldiers ate hard tack and tinned beef and grumbled, despite the liberating civilians cheering and offering kisses and cognac.

On the night of November 6-7, 1918, the 2nd Division replaced the 4th in the line, and along with the 3rd Division to the north, continued to push towards Mons. On November 7, the Canadians crossed into Belgium, continuing to push the enemy before them, fighting against German bitter-enders, when they reached the outlying suburbs of the city of Mons on November 9, where resistance stiffened.

Mons: The city of Mons in Belgium, a key coal-mining centre, was an important symbol for the entire BEF. It was the site of their first significant battle in the early days of the war in August 1914; and the spot from which the small British troops had been forced to retreat in the face of overwhelming German pressure, suffering heavily in the process. The Germans had occupied the city through the entire war, using it as a critical logistical hub for the movement of troops, and as a source to supply their army with much-needed coal.

Though there were rumours of an upcoming peace, and the German Kaiser had abdicated on November 9, at the front, Canadian Corps had no confirmation of either of these as the Germans across from them fought resolutely. With the rest of the Allied forces pushing forward, the Canadians were ordered to capture Mons. At 10:00 p.m. on November 9, Currie ordered the capture of Mons, to be done the next day. He ordered the capture of Mons through an encircling approach—the 2nd Division would attack from the south and southeast, while the 3rd Division (42nd Battalion and RCR) would attack eastward. The city was ringed by canals and German gunners covered the crossing points.

Liberating Mons: On the outskirts of Mons, the Canadian patrols began probing the enemy defences around the city on November 10, but the Germans were holding tough: occupying several strongpoints; dug in along key woods; having established machine-gun nests and snipers at all bridges and canal crossings leading into the city; keeping up heavy small-arms fire; and sending out raiding parties. On orders from High Command, the Canadians had been forbidden the unfettered shelling of the city—so they didn't mount any large-scale attacks for fear that it would be too costly in lives.

On November 10 at 11:00 p.m., the Canadian 42nd Battalion and RCR patrols crept through the dark in search of weak spots in the enemy lines. Throughout the night of November 10 and into the early morning hours of November 11, Canadian combat patrols engaged in small-scale attacks, infiltrating the city streets, shooting up strongpoints and engaging in running gun battles with the enemy.

By 7:00 a.m. on November 11, the Canadians had liberated Mons at a cost of 280 men killed, wounded or missing during the final two days of the war. To drive the point home, the 42nd Highlanders marched their pipe band through the city, stirring the emotions of the soldiers and announcing their arrival to the 60,000 citizens of Mons.^{E, 21, 2N, 4G, 11C}

The fighting from November 7 to November 10 cost 645 killed and wounded in just the 2nd and 3rd Canadian Divisions. At least one young man from Sarnia gave his life during the pursuit to Mons—Private John Howarth of the 3rd Battalion, age 29, was killed by enemy fire on the morning of November 6th. His story is included in this Project on page 301.

• **NOVEMBER 11, 1918 – THE WAR ENDS:** On November 8, Marshall Foch, the Allied Supreme Commander, met with German leadership in a railway carriage parked in the forest of Compiegne, France and presented them with the terms of armistice. They were given 72 hours to accept the Allies' terms, which amounted to **unconditional surrender**. The Germans tried to negotiate but were rebuffed on every single major item. At 5:05 a.m. on the morning of November 11, they signed, knowing that they had absolutely no choice.

The “**War That Will End War**” ended with the signing of the ‘**Armistice of Compiegne**’ not far from Paris, on November 11th, 1918, though it would not take effect until 11:00 a.m. Officers on horseback then had six hours to inform their troops of the Armistice.

Not long after 5:30 a.m., news of the ceasefire reached the belligerents' capital cities long before it reached the frontline soldiers. Celebrations began in London and Paris before word arrived in the trenches. Many would die before 11 a.m., including over 860 British Empire soldiers, and more than 3,000 American troops would become casualties.

At 6:30 a.m., about the time when the last of the German defenders in Mons were being killed or forced to surrender, Canadian Corps headquarters received word that the Armistice would be struck at 11 a.m., at which time all hostilities would cease. The official telegram read, “*Hostilities will cease at 1100 hours 11/11/18. Troops will stand fast on line reached at that hour which will be reported by wire to Army HQ as soon as possible. Defence*

precautions will be maintained. There will be no intercourse with enemy until receipt of instructions from GHQ. Further instructions follow."

The signalmen in the corps sent the message to their companions in the divisions and brigades, after which runners raced across the battlefield with the good news. The Canadian Corps were spread out over several kilometres of frontage and to a depth of twenty to thirty kilometres, including those on the flanks that had pushed beyond Mons, still driving the Germans before them. Some units did not learn of the ceasefire until after 9:00 a.m.

• **LAST COMMONWEALTH SOLDIER KILLED:** To the east of Mons, pockets of German resistance were still holding out, resulting in a number of Canadian casualties on the last day of fighting. About 7 kilometres east of Mons, the 28th Battalion had captured the town of Havre, and the men had been ordered to stay down and not expose themselves.

George Lawrence Price, born December 15, 1892 in Falmouth, Nova Scotia, was the son of James and Annie Price of Church Street, King's County, Nova Scotia. As a young man, he had moved west (although his parents remained in Nova Scotia), ending up for a time with Canadian Pacific Railway and later a farm labourer in Moose Jaw, Saskatchewan. He was **conscribed** to service in October 1917 under the Military Service Act of 1917, and enlisted in Regina, Saskatchewan in December 1917. Standing five feet seven and a half inches tall, with brown eyes and brown hair, he arrived in England in early February 1918, and in France on May 1, 1918. Private George Price of the 28th Battalion Canadian Infantry served during the Hundred Days campaign, and in September 1918, was hospitalized for three weeks after a gas attack. Without a wife or children, he wrote home diligently, sending stoic and hopeful postcards to his little sister, Florence. In one he wrote, "*Just a line to let you know I still think of you. I will see you someday.*" In another he wrote, "*So be a good girl and help momma and I will come to see you some time soon.*"

In the early morning hours of November 11, by 9:30 a.m., many of the units would have heard by runner or telegram that an armistice would come at 11 that morning. And yet for some reason, twenty-five-year-old Private George Price was leading a small platoon to the east of Mons – and they hadn't heard the news. There are a few versions of what exactly happened with Price that morning. According to one account, Price suggested they go sweep some buildings sitting across a narrow canal in Ville-sur-Haines to look for German soldiers. Five soldiers walked across the small bridge and arrived at one home, kicking down a door to enter. While inside, German machine guns on a small knoll opened up, picking at the bricks of the house. As the Canadians ventured back out, Price was shot through the back and to the heart by a sniper at the end of a street.

Various accounts mention a young woman who ran over and tried to help. A "Killed in Action" report filled out afterward records Private George Price's death at three minutes before 11:00 a.m. Other accounts say it was just two minutes before, at 10:58 a.m. In another version, Price had crossed the bridge to say hello to a young Belgian woman who had waved to him, perhaps for a kiss or a handshake, perhaps to have a story to tell his grandchildren some day. After more than four years of fighting, on the 11th hour of the 11th day of the 11th month, the guns fell silent. On November 11, Canadian casualties were 1 killed and 15 wounded.

On the other side of the ocean, Price's family had joined countless others that morning, gathering at a local park to celebrate the end of the war. They returned home and soon learned that George Price had been killed in action. Price left behind his family and his fiancée. George Price was buried in St. Symphorien Military Cemetery, 2 km east of Mons, which is also the resting place for several German soldiers.

Also buried there is Private John Parr, thought to be the first British Commonwealth soldier to die in action on the Western Front, in August 1914. Private John Parr, of the 4th Battalion, Middlesex Regiment, was only fifteen or sixteen when he was killed on August 21, 1914. Canadian Private George Price was the last Commonwealth soldier killed before the Armistice. In the city of Le Roeulx, there is a stone monument honouring George Price, just under the George Price Footbridge, also named in his honour, which sits close to the spot where he was killed.^{E, 2I, 2N, 4G, 5J}

• **CELEBRATIONS IN MONS:** In Mons, the Belgians welcomed their Canadian liberators with kisses, hugs, backslaps, songs, blessings and gifts of flowers, sweet biscuits and wine. A Canadian captain with the 58th Battalion, described in a letter home to his father, the reception in Mons; "*We certainly received a wonderful reception, something that I shall never forget, for as soon as we reached the outskirts the people were crowding around us, so that we could not even trot, throwing flowers on us, and in front of our horses on the road, and crying "vive les canadiens", "long live our deliverers"... All the houses were decked with Belgian and French flags and bunting,*

and people at every window when we reached the square in front of the town hall it was packed with people cheering, and singing and dancing. Everyone's wildest imagination could not have pictured a more stirring or glorious demonstration for the day of victory and peace. I had hoped to be in London or Paris on this day, but that could never compare with being in Mons, the place where Britain started and ended the war, and to think that our division had the honour of taking this place.^{7A}

A Private in the PPCLI wrote in his diary, "Civilians almost crazy with joy. They decorate us with colours and flowers but best of all the young maidens are right there with beaucoup kisses... civilians can't believe it's over. Rid of terror of German rule." And when the PPCLI marched into Mons with bands playing, he noted that, "thousands of people lined the streets. Old women cried as we went by. When the band played the Belgian national anthem the civilians went clean bug house—first time they had heard it in 4 years. A man threw his arms around the bandmaster and kissed him."^{4G, 5J, 7A}

The same kinds of wild, jubilate celebrations were taking place in the streets of Paris, London, Toronto and Allied capitals and across the Dominion.

• **NEWS IN SARNIA:** The *Sarnia (Canadian) Observer's* bold headline on that day was, "HUMANITY SAVED!" Two story headlines on the first page of the *Observer* read, "Ten Million Lives is the Terrible Toll of Most Bloody War in History" and "All Allied Prisoners, Soldiers and Civilians Alike Held in Germany Are To Be Released." Following is one story on the front page of the *Sarnia Observer*:

Our Gallant Canucks Capture Mons to Finish War Fittingly

London, Nov. 11 - The official statement today says: To Canadian troops fell the honor of capturing the last important town before the armistice put an end to hostilities. Mons, where the British made a brilliant stand at the beginning of the war, was retaken early this morning by the Canadians.

Following is another story in the *Observer* that day:

Citizens of Sarnia Go Wild On Receipt of News

The receipt of the joyous tidings that had been declared was heralded in this city early this morning, and the streets were crowded with an eager populace anxious to hear a confirmation of the report. Port Huron went wild and whistles on boats, factory, and every noisemaking device was unearthed and the racket kept up for hours. All morning the streets of the city were thronged with an enthusiastic crowd, autos were pressed into use, schools and stores closed, industries were shut down, and people went wild with joy when the news was confirmed that kaiserism and prussianism had been trampled to dust. Their joy knew no bounds, and thousands marched in procession armed with impromptu noise makers, consisting of old cans, drums, and anything from which they could produce a noise.

Thousands of flags and firecrackers were purchased by the enthusiasts. Business was at a standstill. Hundreds crossed to Port Huron and engaged in the celebration of their American cousins, who in turn came over to Sarnia to share in the demonstration here. The employees of the Loughhead Machine Co. went over the river in full force. At 1:30 a monster parade was held, which was participated in by several thousand joy-maddened citizens. This outburst, however, will have no effect on the demonstration that has been planned for the past several days, and which will be held tomorrow evening as originally intended.

It will, no doubt, be the greatest in the history of the Imperial City; it will probably eclipse anything ever attempted in Canada. Hundreds of workmen are at work at the old golf grounds building platforms and making preparation for the big event. The committee in charge have everything in readiness, the fireworks and paraphernalia will arrive to-morrow morning and everything will be in readiness. Everybody turn out for to-morrow night.

The next day, the *Sarnia Observer* continued to report on the impromptu celebrations held in the city on November 11th. Following is a portion of one report:

The Great Throng Could Not Wait

The people of Sarnia were so overjoyed at the news of the Kaiser's downfall that Tuesday (Nov. 12) was too far away to give vent to their feelings, and an impromptu demonstration was held in which hundreds of autos, carriages and vehicles of all kinds participated, and to noise and music of all kinds marched up and down the streets proclaiming the glad tidings of victory. It was a hilarious and spontaneous affair by a people who had awaited for over four years for such a celebration... The fact that no previous arrangements had been made added to the spontaneity of the affair, and men, women and children, old and young, men in khaki, some on crutches and others maimed by German soldiery were out to add their quota to the enthusiasm of the joy maddened crowd. Others with saddened hearts, owing to the loss of their loved ones joined in The Day, and while thinking of their loved ones who

would never return, they too, were overjoyed that the great struggle was over and that victory had rested with the armies in which their brave sons, fathers and brothers had given their lives...

The *Sarnia Observer* also outlined the details of the planned celebration for that evening. The headline read, "The Biggest Celebration in Sarnia's History Will Begin At Seven O'clock Tonight."

• **SARNIA CELEBRATES THE WAR'S END:** On the evening of November 12, 1918, one day after the Armistice was signed, a tremendous peace celebration was held in Sarnia. Thousands of citizens from Sarnia and surrounding communities joined in the celebration, including hundreds of people from each of Corunna, Courtright, Forest, Petrolia and Walpole Island. Cheering crowds packed the darkened streets as a huge torchlight parade, thousands strong, made its way starting at Victoria Park and moved through the downtown to the golf grounds. The noise was bewildering with the sounds of noisemakers of all kinds—such as tin cans, bells, clappers, clinkers, whistles, horns, cymbals, triangles, old saws and anything else that would make a noise. The bewildering noise combined with the music played by seven different bands, including those from Forest and Petrolia.

Participating in the celebration were the Collegiate boys procession; the local and very boisterous Chinese community, who even imported a Chinese band from Toronto; Goodison's Hun Thrasher; the Imperial Oil Company's Tank float and every truck they had along with hundreds of its employees with torches; a mass of citizens from Port Huron who had come across on the late ferry to rejoice; a number of Spanish War Veterans; First Nations community members who were out in full war dress of feathers and paint; members of the Sarnia Bridge Works; members of the Great War Veteran's Association; and people in every conceivable sort of costume.

The immense line of flaming torches stretching through the darkness was described as "a sight of magnificent grandeur" made even more unforgettable by the confetti and fireworks rocketing skyward in countless streaks of flame and falling in brilliantly multi-coloured showers. By the time the last of the parade arrived at the old golf grounds, an estimated twenty-five thousand people had gathered. A pile of boxes twenty-five feet high was ignited to create an enormous bonfire, warming the chilly night air. After more celebrating which included the burning of the Kaiser in effigy, the crowd began to disperse about eleven o'clock. Yet many moved to Front Street where the merrymaking continued, with bands playing, cheering, singing and dancing. One reporter stated, "It was a once in a lifetime civic celebration."

Following is a portion from the *Sarnia (Canadian) Observer* report on the celebration printed the next day:
Thousands of People from All Over Lambton County Celebrated Last Night

Sarnia's peace celebration has come and gone, but it leaves in the memory of all who attended or took part a lasting impression that will remain as long as life itself... Four long years have the people been storing up their hilarity for that glad occasion when they could once more breathe freely and shout lustily for the new birth of freedom in seas of blood. Each and every unit in the immense crowd last night let his or her feelings give vent in loud, long cheering, in the manner that young boys cheer, unrestrainedly, without thought of deportment or age. Everybody was glad and the whole world looked rosier, even to they who had sent their loved ones overseas to fight the battles of the country, who would never tread their native soil again. They forgot the individual and looked at it in a broader, more comprehensive way that rose above mere self, and instead of being downcast at the thought of their heroic dead, they joined in the thanks giving of they who had given their lads and who would once more welcome them to their hearthsides. It was a noble, it was a Canadian spirit that prevailed and held that vast crowd in its grasp last night...

• **SARNIA'S COST IN CANADA'S HUNDRED DAYS CAMPAIGN:** During the final three months of war, Canada and Newfoundland suffered it's greatest number of casualties—from August 8 to November 11, 1918, approximately 45,835 Canadians and Newfoundlanders were killed, wounded and missing (this includes more than 6,800 killed).

It was during this final campaign of the war that the highest number of men from Sarnia lost their lives. At least thirty-three young men from Sarnia gave their lives during Canada's Hundred Days Campaign. Three of the deaths were termed "wastage"—occurring between major set-piece battles—Thomas Hazen, Albert Rodber and Thomas Wright. The thirty other Sarnians were killed in action during the major battles of the Campaign: at least seven young men gave their lives in the **Battle of Amiens** (August 8-14)—Urban Noel, Albert Potter, William Reynolds, Walter Scott, Herbert Stott, Edward Timpson and Frederick Williams; at least ten young men gave their lives in the **2nd Battle of Arras and DQ Line** (August 26-September 3)—Alfred Adams, Cameron Bissett, Edward Causley, Albert Eberly, William Eddy, George Hall, Amos Iverson, Albert McDonald, James Steele and Daniel

Thomson; at least eleven young men gave their lives during the **Battles of Canal-du-Nord and Cambrai** (September 27–October 11)—George Beaumont, Joseph Carson, Royal Crawford, Alexander Cunningham, Sidney Davies, George Johnston, George Jones, Albert Pringle, Frederick Robinson, John Salsbury and Edward Watson; at least one Sarnian was killed in the **Battle of Valenciennes** (November 1–2)—Alfred Corrick; and at least one Sarnian was killed in the **Pursuit to Mons** (November 1–11)—John Howarth.

- **THE DYING CONTINUES:** After the signing of the Armistice on November 11, many more lost their lives or had their lives shortened in the months and years following the war, the result of their service overseas. At least five young men from Sarnia lost their lives shortly after the war was over. Frederick Doxtator died as a result of tuberculosis in Halifax on his way home on November 15, 1918; Neil Hanna was killed in a flying accident in Italy while observing the Austrian retreat on November 20, 1918; Earl Simmons died at his home in Sarnia on December 17, 1918; Alfred Corrick (noted above), who had been wounded at Valenciennes on November 1, died as a result of his wounds in an England hospital on January 13, 1919; and Frank Hickey died as a result of the effects of his service in a Windsor hospital on September 1, 1919. Four of these names are inscribed on the Sarnia cenotaph.

- **ARMISTICE TERMS:** Though it was termed an armistice, it was a German surrender in truth. The Armistice document contained 34 terms for Germany to follow that imposed a crippling and punitive defeat on Germany. Some of the terms included: immediate evacuation of all the territory they had invaded; the German army and navy had to surrender vast quantities of weapons (including artillery pieces, machine guns, mortars, aircraft, locomotives, rail cars, trucks and submarines); they agreed to repatriate all citizens of Allied nations and all Allied prisoners of war (some 3,500 of whom were Canadian); they agreed to pay billions in reparations; no removal or destruction of civilian goods or inhabitants in evacuated territories; all minefields on land and sea had to be identified; all means of communication (roads, railways, canals, bridges, telephones) to be left intact, as well as everything needed for agriculture and industry; and to admit guilt for causing the war. Germany also agreed to evacuate the left bank of the Rhine and bridgeheads behind it, to be held by Allied occupation forces, maintained at Germany's expense, until the peace terms had been met.

Though the Armistice deal was signed, it did not mean that the war was over. No one was sure what kind of terms would be imposed by the Allies on the defeated enemy now that they had laid down their arms. Though they retreated in good order, no one knew how the Germans would react to the Armistice terms, and though defeated, the German Imperial Army remained a force of several million strong. An army of occupation was needed in Germany to ensure that hostilities would not flare up again. No one relished the thought of asking these men, who had served for years—often dreaming of getting home again, to continue to serve for an indefinite period. As part of the British Expeditionary Force, Sir Arthur Currie's Canadian Corps, recognized as one of the most disciplined and hard-hitting forces, was asked if it would contribute two divisions to the occupation of Germany.^{4G, 5J, 11C}

- **CANADIANS MARCH TO GERMANY:** So on November 17, 1918, the 1st and 2nd Canadian Divisions—the units that had been on French soil the longest—began the long, hard 22-day march of 400-kilometres in a cold, wet November through Belgium to the Rhine River and Germany to take up occupational duties. The Canadian Corps 3rd and 4th Canadian Divisions remained in Belgium until they could be moved to England and then repatriated to Canada.

During their advance on Germany, the Canadian 1st and 2nd Divisions had the satisfaction of passing village after village of liberated French and Belgians, where civilians often flocked to the streets, shouting, cheering, and waving. The inhabitants of Nivelles, Belgium, dug up eight thousand bottles of wine for them. The Canadians also passed refugees carrying everything they had returning home, and thousands of abandoned German guns, helmets, and destroyed equipment that had been left by the side of the road.

However, towards the end of November, cold sheets of rain drenched the marching men who were covered in mud; the German destruction of bridges and railheads, as well as logistical problems including horses, mules, and motorized transport floundering on the muddy roads, caused delays—resulting in food, supply and fuel shortages; and then the influenza epidemic struck. The first wave of the worldwide deadly flu had hit earlier in 1918, with devastating effects on hunger-weakened civilians. The strain of the virus that struck at the end of the year was more virulent.

- **THE SPANISH INFLUENZA EPIDEMIC:** The most damaging epidemic disease—for Canada and the world—appeared in the latter stages of the war. The first case of Spanish influenza was diagnosed in Kansas on March 11,

1918. Soldiers spread it across Canada and carried it to the front in Europe. The Spanish Flu that swept the globe in the spring of 1918 through to the winter of 1919 was undoubtedly given a boost by the war. Soldiers living in close quarters huddled in trenches and tents; troop trains and transatlantic troop crossings; soldiers returning home; refugee populations; malnourishment; and unsanitary conditions all contributed to the spread of the contagious disease. Soldiers who had survived the war tragically died of Spanish influenza.

The virus damaged lungs, so fluid built up that could not be expelled. Oxygen was prevented from getting into the bloodstream so breathing became more and more laboured. It soon led to uncontrolled hemorrhaging and the coughing of blood, as writhing patients slowly suffocated. Blood from damaged respiratory cells seeped and foamed from the nose and mouth. The inflammation spread to other organs, causing swelling and leaking of blood from damaged vessels, leading to organ failure. Many also died from secondary bacterial infections.

Some 500 million people—a third of the world’s population—were infected and at least 20-50 million people worldwide died from the disease from 1918 to 1920, including 50,000 people in Canada. Within the CEF, an estimated 45,000 Canadian soldiers were afflicted with fever, aches, and chills, and at least 776 died from the illness, although the number could have been higher, as another 3,049 were recorded as having died under the generic category of “disease”.^{2E, 2I, 2N, 3R, 4G, 5J, 8H}

• **CROSSING THE RHINE:** By early December 1918, the Canadians had crossed the German border, and finally arrived at the Rhine. The crossing into Germany was a significant event, with dignitaries, journalists and photographers there to capture it for posterity. On December 13 in the cold, pouring rain, the lead Canadian units crossed the bridge over the Rhine at **Bonn** with colours flying and bayonets fixed. General Currie was there to take the troops’ salute. The parade of troops was 18 km long and took over five hours to cross the bridge. “*We looked like a bunch of drowned rats,*” one soldier said. The 2nd Battalion entered the Rhineland with their band playing “O Canada,” and the 14th Battalion were played forward to the tune of “The Maple Leaf Forever.” At the same time, about 32 km to the north, a similar event was taking place in **Cologne**, where citizens lined the streets to witness the arrival of the 1st Canadian Division as they too crossed the river in the pouring rain to take control of that city.

As days and weeks passed into a cold winter, the Canadian army of occupation became increasingly frustrated and discontent, unhappy with the continued military discipline, and anxious and eager to return home to their loved ones. The two Canadian divisions (1st and 2nd) in Germany moved back to Belgium in mid-January 1919. They did not begin to return to Canada via England until March and April 1919. The two divisions in Belgium (3rd and 4th) moved to England in February and March 1919.^{4G, 5J, 11C}

• **DEMOBILIZATION:** The logistics of getting hundreds of thousands of Canadians, and over a million Americans, back to North America would be long and trying process due to a number of factors: shipping shortages; an increasing number of strikes by dock workers, police officers and railway employees in Britain; a lack of suitable ports in Canada; and Canadian railways that didn’t have the capacity to handle the influx of people. The initial demobilization plan was to have troops sail from France to Canada, however, England became the embarkation point for the troop ships since the demobilization camps were there, and many of the soldiers in the CEF had family there whom they wanted to see before they returned to the Dominion (Currie made the case for this and got his way).

There was disagreement amongst the soldiers, Ottawa and General Currie on just how demobilization should proceed: many of the soldiers asked for a “first one in, first one sent home” policy; the government in Ottawa wanted first to reintegrate men with skills, known as “pivotal men,” to guard against a recession and kick-start the economy after the war; while Currie fought for Canadians to return in their units and under their officers. Currie argued that it would be more efficient, would better maintain discipline, and would ensure that units disembarking in Canada would be properly welcomed by their communities.

The solution arrived at was a compromise—complete units from within the four divisions, and the rest of the Canadian Corps, would be sent back under their own officers (accounting for approximately 100,000 men), while the rest of the CEF, from reserve units, conscripted men and the vast logistical support members, would be organized into drafts and sent home piecemeal.

Eager to get home: Military officers and civilian planners worked with aid agencies to speed the process but for soldiers overseas, the months of waiting were long, boring, frustrating and difficult to understand. Discouraged soldiers were unhappy with continuing harsh discipline, poor food, weak officers, and no firm departure dates. During this period, there were a number of instances of Canadian soldiers’ raucous behaviour in and around

demobilization camps. For example, on March 4 and 5, 1919, there were 13 incidents of unrest at demobilization camps, the most serious at the overcrowded **Kimmel Park** (near Liverpool), where rioting left five soldiers dead and another 25 seriously injured. To sustain morale, the military promoted physical training programs, organized sports, a theatre school was established, and a wide range of recreational activities. It also expanded the Khaki University, first established in 1917.

Paperwork and medicals: Before embarking for home, soldiers filled out 13 documents and answered 363 questions. This included Regiment and Company Conduct Sheets; Copies of Convictions; Medical History and Medical Examination Sheets; and a Dental Certificate for Demobilization, which recorded all fillings, extractions, crowns, dentures and any dental treatment received. Many took the opportunity to be “dentally fit for peace”, and having half a dozen teeth pulled at a time was not uncommon (a procedure often performed without anaesthetic).

Soldiers also had to complete a medical exam, for example to determine if they carried any kind of communicable disease, and if they would be eligible for a pension. A typical medical form completed by an examining doctor stated, “This is to certify that the man named above has been examined and found free from infectious diseases, transmissible skin disease, venereal disease and vermin, and is fit to travel.” For the soldiers, admitting to a medical illness meant delaying their demobilization, as more tests would have to be performed. So many of the men shrugged off or downgraded their illnesses and wounds from probing medical members, and were labelled “fit” when they should not have been.

The transportation of the troops to Canada did proceed much faster than anticipated. The original estimate had been that it would take 18 months, but two-thirds of the men were home within five months. Most of the Canadian Corps were returned to Canada between February and May 1919, and almost all of the men were back on Canadian soil by late summer.^{2I, 4G, 5J, 11C}

• **RETURNING HOME:** One of the soldiers returning home in 1919 was Nova Scotia native **William Bird** of the 42nd Canadian Infantry Battalion. He had arrived in France in December 1916 and served with that battalion until the end of the war, taking part in the battles at Vimy Ridge, Passchendaele, Amiens, Arras and Mons. Returning to Canada in March 1919 aboard the *Adriatic*, Williams’ thoughts were representative of many of the frontline soldiers as they approached home. Following is his description of his thoughts on his final night aboard the ship:

In my fine sheets I could not sleep and began to forget where I was. I seemed to be in an atmosphere rancid with stale sweat and breathing, the hot grease of candles, the dampness of the underground. I saw cheeks resting on tunics, mud-streaked, unshaven faces... men shivering on chicken-wire bunks. Then, from overhead, the machine-gun’s note louder, higher, sharper as it swept bullets over the shell crater in which I hugged the earth... the rumble of guttural voices and heavy steps in an unseen trench just the other side of the black mass of tangled wire beside which I lay. The long-drawn whine of a coming shell... its heart-shaking explosion... the seconds of heavy silence after, then the first low wail of the man down with a blood-spurting wound... It was too much. I got up and dressed, although it was only four o’clock in the morning.

It was cold but I wore my greatcoat, and to my amazement there were other dark figures near the rail. We stood, hunched together, gazing ahead into the darkness... The way we stood (in silence) made me think of a simile. Ah—we were like prisoners. I had seen them standing together, staring over the wire to the field beyond, never speaking. And we were more or less prisoners of our thoughts. Those at home would never understand us, because something inexplicable would make us unable to put our feelings into words. We could only talk with one another.

All at once the watchers stirred, tensed, craned forward. It was the moment for which we had lived, which we had envisioned a thousand times, that held us so full of feelings we could not find utterance. Far ahead, faint, but growing brighter, we had glimpsed the first lights of home!^{11A}

• **HOME AT LAST:** Departing England and crossing the Atlantic, the many ships docked in east coast ports, and the soldiers then boarded trains for the last leg of their journeys home. Upon arriving by train at their home stations, the soon to be demobilized battalions, batteries and units formed up for one last time before dignitaries. Speeches were given, soldiers stood proud, and then it was over. The demobilized men received their back pay, a bonus depending on their length of service, a maximum of \$420 for single men, \$600 for married men, \$35 for a set of clothes, and the option to keep parts of their kit. The “**returned men**,” as the veterans were initially called, of Canada’s most effective fighting formation were then expected to reintegrate back into Canadian society.

The transition to peacetime was difficult—the men reconnected with wives who had been forced to run the household without them; with children who had grown up; and with parents who had become aged by stress and

strain. One Canadian soldier expressed how many of the veterans felt—that the brotherhood of soldiers would never be understood by civilians. Those who had survived in the trenches and stared out into No Man’s Land, he believed, “*would remain a separate, definite people,*” forever haunted by the war.^{2I, 4G}

On their return home, at the very least, the veterans expected jobs. Instead, war factories were shutting down and there was unemployment, inflation and a housing shortage. One example of the unrest was the **Winnipeg General Strike** in the spring of 1919, which culminated in “Bloody Saturday,” where two strikers were killed in a Winnipeg demonstration. Compounding the homecoming problems was the Spanish Flu pandemic, which killed thousands across the country.^{2E}

Pensions: The war created hundreds of thousands of veterans who came home to a country with no formal pension process. Politicians and most bureaucrats were cautious about the long-term costs of veterans’ welfare. The concern of the government was that all returning soldiers should integrate back into civilian life, return to their jobs and resume making a living for themselves. Federal, provincial, municipal and charitable organizations provided financial support and a wide range of services to veterans and their families. Most aid remained grounded in the belief that soldiers and their families would remain responsible for their own post-war re-establishment.

The government’s desire to ensure that veterans did not become wards of the state, meant that they were paid pensions they could barely survive on, which would, it was thought, provide an incentive for the recipients to find work. The process also required a veteran, or his family, to plead his case before a jury of superiors. Full pension payments varied among ranks, with privates receiving a maximum of \$480 per year, plus monthly child allowances of \$6 per child. The vast majority of disabled soldiers received pensions of less than twenty-five percent of the possible allotment for their rank. Thousands of veterans were denied pensions, or never even applied for them, too proud to go before a board who would pass judgement on them and their service.^{2I, 4G, 8H}

Military Hospitals Commission: In 1915, the Canadian government created this Commission to offer medical and convalescent care to returned veterans. The Commission’s philosophy stressed will power and determination in overcoming personal adversity. Benefits and advice directed to disabled soldiers included: there is no such word as ‘impossible’ in his dictionary; that his natural ambition to earn a good living can be fulfilled; that he can either get rid of his disability or acquire a new ability to offset it; that he must help them to help him; that he will have the most careful and effective treatment known to science; that his strength and earning capacity will be restored to the highest degree possible; if he requires an artificial limb or kindred appliance it will be supplied free; that every man disabled by service will receive a pension or gratuity in proportion to his disability; if a disability prevents him from returning to his old work he will receive free training for a new occupation; that his own willpower and determination will enable him to succeed; and that neither his treatment nor his training nor his transportation will cost him a cent.^{2I}

In 1918, the Military Hospitals Commission was replaced by the **Department of Soldiers’ Civil Re-establishment**. It oversaw pension administration and the creation of hospitals across the country, along with rehabilitation centres, long-term care facilities, vocational training, specialized facilities for the blinded and shell-shocked, and even prosthetic limb factories.

Disabled soldiers: Though the transition to “normal life” was hard for able-bodied veterans, it was far worse for disabled soldiers who came home wounded in body and spirit. Tens of thousands of injured soldiers required prolonged medical treatment, some for the rest of their lives. Some of the disabled veterans were so badly injured that they were shuffled off to the veterans’ hospitals and renovated private homes that sprang up across the country to care for the legless, the armless, the blind, and insane. Veterans who were not badly enough injured to spend the rest of their days in a medical facility were often left to the care of loved ones. Or they fended for themselves, becoming less forgotten soldiers than invisible ones. Amputees were fitted with prosthetics from limb factories that opened to meet a new demand. Some of the wounded had faces reconstructed in painful surgery, while the worst cases were consigned to wearing masks for the rest of their lives. Long-term illnesses from disease were common among many men, and resulted in more hospital cases than did wounds from the weapons of war.

It is unknown the number of injured Canadian soldiers who returned to Canada and soon succumbed to their wounds, or had their lives cut short after the war as a result of wartime injuries, disease, and long-term trauma to the body and mind.^{4G} As mentioned on page 185, five Sarnians (four are inscribed on the cenotaph) lost their lives shortly after the war was over—Frederick Doxtator, Neil Hanna, Earl Simmons, Alfred Corrick and Frank Hickey. Many more had shortened lives and died as a result of their service overseas, but are not recorded on the cenotaph.

Compensation: Surviving dependents of soldiers killed in the war received compensation for their loss. Some 12,000 women were left as war widows, with thousands of children orphaned, countless lives disrupted, and families broken up. These grief stricken families were also forced to go before pension boards to receive their compensation for a father's or a husband's life. For example, a widow of a soldier who was killed on the Somme, who was left to care for their seven children, was awarded the \$384 per-annum allotment for a private's widow, plus \$6 per child per month.^{4G}

Sarnia's Civic Gratuity Fund: Not long after the conclusion of the First World War, Sarnia mayor William Nisbet was instrumental in creating the "Soldiers' Civic Gratuity Fund." It provided a grant for Sarnia officers and men who had served overseas and who were residents of the city for six months prior to enlistment. The by-law, passed in late 1919, authorized the sale of \$70,000 worth of debentures to create the fund. Pro-rata allotments were given out based on the number of applicants, which turned out to be approximately \$103 per soldier.

Suffering in silence: For those who came home, who had lost years of their lives and endured unspeakable hardships, they returned to a nation that wanted to forget everything about the war. Veterans were told to "move on" with their regular lives; to forget about the experiences they had endured; the horrors they witnessed; and their physical, psychological and emotional wounds. Survivors of this war generation had firm ideas about masculinity and how a man should conduct himself—they stifled the hurt and pain and carried on in silence. And so the war was obscured and buried deep, often revealed only in short bursts over the course of a lifetime, even as parents, wives and children yearned to know what happened over there. Many lives were shortened and many suffered in silence.

Following is a story written by Sarnia historian Randy Evans, printed in the November 2015 *Sarnia Journal*:

My Grandfather's Story

On January 4, 1916, my maternal grandfather, Percy Bodaly enlisted to serve with the Canadian Expeditionary Forces in World War One. He was 19 years old. Initially as a Private and later a Corporal, his entire wartime career would be spent in the medical corps at the Canadian war hospital at Taplow, England.

Like so many of his colleagues from that conflict, Grampa did not speak much of his war time experiences. A few funny anecdotes, perhaps, but nothing of consequence. Except on one occasion during a visit in the mid 1970's. As it happens, I was at the time reading Robert Service and thus came to my Grandparents' home with a book of the poet.

As clear as if it happened today, I recall my Grandfather spotting the volume and taking it in his large workman's hands. Without opening the cover, he began to recite lyrics from The Cremation of Sam McGee, The Spell of the Yukon, and the yarn of Dangerous Dan McGrew and the lady who was known as "Lou."

This spontaneous recital was followed by a moment of silence – me in astonishment and my Grandfather clearly in Remembrance. I asked the obvious question and was responded to as follows: After his daily shift at the war hospital my Grandfather would stay and read to the soldiers who had been blinded at the Front. Many of the sightless would ask for works by Service, so much so that his prose became a matter of memory. Some 60 years later the poems were still fresh in the mind of my Grandfather. So too was his recollection of those brave souls who sought solace in the words of Mr. Service.

I will never forget that precious story received from my Grandfather. Arising simply by chance, it gave to me a brief but lasting glimpse of my Grandfather in uniform, as well as those wounded soldiers so richly deserving of our esteem and Remembrance. Bless all their hearts and service. Lest we forget.

• **SHELL SHOCK:** It was during the Great World War that the term "shell shock" first came into being, appearing in a British medical journal in February 1915, only six months after the outbreak of the war. Others referred to the condition as "battle fatigue," doctors referred to it as "neurasthenia." Mental breakdown caused by the unending strain of combat such as the constant crash of high explosives, the never-ending stress and fear of death, hours and days of sleep deprivation, as well as the brutality of what they witnessed and what they were forced to do to other men pushed many soldiers over the edge of sanity.^{4F}

Poorly understood at the time and for many years afterward, shell shock meant its victims experienced a myriad of unpleasant symptoms: crying, fear, mutism, nightmares, spasms, uncontrollable trembling, paralysis, and insanity due to the prolonged exposure to the stresses and horror of combat. Early in the war, military authorities often saw its symptoms as expressions of cowardice, weakness or lack of moral character. Generals far from the front, fearing a mass breakdown of soldiers rendered unable to fight due to mental wounds, responded with punishment, thinking that it might stiffen the backbone of those wobbling. But the cowardice-weakness of character

argument was heard less often when it became known that officers were more likely than the men to break down.

Shell shock was rarely mentioned in letters home, but the effects of stress did come through in some. Following is a portion of a letter written by a twenty-four-year-old Canadian infantryman in January 1918 to his parents describing his situation after his battalion took and held a trench;

We were relieved after a very trying day at about eleven at night (after four days of it on bully beef and captured rations) and had to make about six miles back to reserves. Naturally we were exhausted before we started our trip out and we had to go through a veritable ocean of mud, all the time Fritz was throwing all he had at us... At about three miles out, he described, I was so exhausted that I was almost delirious and I began counting my steps. I would count to ten or so and then forget that I intended to count so I'd start in again and count perhaps to fifteen and then forget again. All the time the boys were falling out one by one but I still kept plodding on counting my steps when I could remember... We finished the trip at six a.m., six [men] only of the three companies got in without falling out, the rest were scattered all the way along the road. The cooks had a hot breakfast for us and we ate like wolves but all the time we ate the lot of us cried like babies. I'll never forget the way the tears rolled out of my eyes and I couldn't have told you why I cried excepting that my nerves were completely gone.^{7A}

Following is a story from the *Sarnia Observer*, November 29, 1916, entitled "CURE FOR SHELL SHOCK":

Simple Invention For Wrecked Nerves Used by Canadians

Wounded soldiers suffering from shell shock and various nervous complaints are being cured at the Ontario Military Hospital, Orpington, Kent, by a novel treatment of baths with continuously flowing water. A soldier who went into the bath a raving maniac was held down by rubber bands, and emerged cured and able to walk out after eleven days' continuous treatment. The treatment is pleasant, judging from the blissful expression on the face of a patient sleeping in the bath. The patient lies on a sheet and pillow suspended in the bath with the water up to his chin. The water is regulated to the man's temperature, and flows with a rippling motion from head to foot.

At the mid-point of the war, high command ordered that the term "shell shock" be dropped. The military tried to downplay the implications of shell shock, instructing doctors to use the term "N.Y.D." standing for "Not Yet Diagnosed" which the men cynically transformed into "Not Yet Dead." It was also designated "N.Y.D., N" standing for "Not Yet Diagnosed, Nervous".

Like those who were physically wounded, shell shock victims were often treated quickly, frequently at rest stations close to the front, with treatments that included shaming, physical therapy, Freudian psychotherapy and crude electroshock therapy. In most cases, the goal of treatment was to return the soldiers to the front lines as soon as possible to replace the depleting ranks.

Doctors diagnosed almost 10,000 Canadians with shellshock during the course of the First World War. One contemporary Canadian Army Medical Corps doctor claimed that there were at least 15,000 diagnosed cases, and this did not include all the men who were killed even before they made it out of the line to be diagnosed.^{4G} Tens of thousands more sustained stress injuries and somehow kept going. For the countless who survived the war, doctors knew little of what is now known as **Post-Traumatic Stress Disorder** (PTSD), so there were few treatment programs after the war for returned veterans who suffered from it. For these sufferers, their minds remained a battlefield, never able to leave behind the Western Front—they experienced flashbacks, nightmares and daytime horrors.^{2I, 3P, 4F, 4G, 9U}

• **SHATTERED LIVES AT HOME:** In both World Wars, soldiers families in Sarnia coped each day with the possibility that those whom they loved might not return, and for many, ultimately had to face the terrible reality that their worst fears were realized. They received only a short and vague telegram at their homes from Ottawa (Ministry of National Defence—Director of Records) informing them that their son or husband was "*listed as missing in action*", and that more information would follow later. Often it wasn't until many weeks or even months later that they received another simple telegram that contained very little information other than, "*We regret to inform you that your son has been officially declared killed in action*". Usually, very few or no other details were included.

Young widows, their lives shattered at the news of the loss of their husbands, and parents were left to wonder where and how their sons had died, and about their last agonizing moments in a faraway land. They wondered whether their sons' bodies were buried in a grave, and if so, where, or if their bodies were even recovered. Many were left with only their memories and a sepia photograph, and the knowledge that they would never be able to see their loved one's final resting place. They were not given the opportunity to say good-bye to their loved ones or to give them a proper funeral. Parents were left with memories of those special junctures in their sons' life—the day they

were born; special family occasions; going to school; appearing in uniform for the first time; and waving good-bye for the last time as the train left the station.

Following is an example of one mother's experience, one that was too common: Private Donald Ross, the only son of Mabel Ross from Grafton, Ontario, was only seventeen when he enlisted in 1916. A member of the Canadian Infantry, 87th Battalion, he was wounded at Vimy Ridge in April 1917. During his fourteen months of recuperation in England, he became engaged to an English woman who called him "Smiler," because he smiled, danced, and whistled and was "the happiest boy in the world." Donald Ross was sent back to France in August 1918. The next month, on September 2, he was killed in action. In October 1918, Donald's mother wrote a letter to one of Donald's friends, Conners. Following are portions of that letter:

Dear Friend Conners,

My Friend Conners is the way my Dear Son Donald Ross spoke of you when he wrote me the last letter he ever will write to me... He was killed Sept 2nd, I believe the day you were wounded. You know I do not know what your name is but believe Donald mentioned it in his letter... I am very sorry to know you are wounded then again if not dangerously so I am glad as you will be safe for awhile at least and now I am going to cry out a mother's sore heart to you for some little news of my son's death or at least something about his last days or hours on earth.

Ah if you only knew how I want to hear something about him you see he wrote me the Friday before he was killed and he said like this – my old friend Conners is Sargent and I am going in his company so do not be surprised if I get a stripe myself that is if I am lucky enough to stay here long enough to get one. And as I have nothing except the cable and a letter from a Chaplain by the name of Jackson who put another man's name and number in the letter he wrote about my boy's death so you see it had very little interest for me. So I just made up my mind I would appeal to you for news. Perhaps you can give me some details and if not get into connection with some of the boys who were near him when he fell and also try and have his little personal effects sent to me they are nothing to anyone else but ah how precious they would be to me his Mother anything touched by his dear hands.

Ah Conners may you never have that longing to see anyone that I have to see my son for I am so lonely for him and have been waiting for so long and now ah now I must wait all in vain and I loved him so. Please do all you can in this for me and I shall give you a Mother's blessing.

... hoping and praying that you will be able to write me some news any little thing about him even the fact you spoke with him and how he looked etc. etc. would be a great source of comfort to me. Now I will close and I do hope this awful long selfish letter will not tire you too much and that you will try to send me some little news.

Hoping this finds you as comfortable as can be and trusting you to do what you can for a poor lonesome mother. I will close with best wishes.

Mrs. Hugh Ross

Grafton Ontario Canada

Mrs. Ross's letter was returned unopened; Conners was also dead. ^{C, D, 2G, 4F, 7A}

Over the course of the war, thousands of telegrams reporting deaths were sent out to loved ones at home. Parents' dreams of seeing their children again were shattered after reading the first line: "Deeply regret to inform you..." Following is a poem written by Myrtle Corcoran Watts and printed in the *Sarnia Observer* in late September of 1918 that expresses the emotion of a mother's grief:

My Son

*Somewhere in France there lies my youngest son,
It seems such little time since he was small.
And now his life on earth so soon is done,
His Master needed him. He heard the call,
Within my sleep I dream of him each night,
And wake to find he cannot come to me,
For with the coming of the morning light,
I seem to see his grave across the sea.
I know the sorrow and the bitter loss,
That Mary felt when on that day at noon,
Her Son was nailed upon that cruel cross,
While all the heavens turned to darkening gloom.
Oh, may I help some mourning one,
Who, like myself, has lost her much loved son.*

- **THE SILVER CROSS:** In 1916, William Alexander Fraser, a Toronto novelist, proposed a tribute in the form of a silver cross, to mothers who had lost sons. *“The mothers are the heroines of the bitter home trenches. They suffer in silence with no reward but the sense that they have answered the call with their heart’s blood – their sons.”* By December 1, 1919, such an award was approved, taken a step further by including the mothers *and* widows of Canadian soldiers who died on active duty or whose deaths were later determined to be attributable to their active duty. Officially, the award is called the **Canadian Memorial Cross**; unofficially it is referred to as the **Silver Cross**. Many people have termed it, “the medal no mother wants.”

The first Silver Cross was presented to Charlotte Susan Wood, of Winnipeg, who had lost five sons in the Great War. When Charlotte Wood met King Edward VIII at the inauguration of Canada’s Vimy Memorial in France in July of 1936, King Edward, holding her hand said, *“I wish your sons were all here”*. As they gazed across the former killing fields subsequently planted with uncountable white crosses row on row, Charlotte replied, *“Oh Sir, I have been looking at the trenches and I just can’t figure out why our boys had to go through that”*. During the two World Wars, approximately 100,000 Silver Crosses were given to the mothers and wives of soldiers who were killed.²¹

- **THE “DEAD MAN’S PENNY” and MEMORIAL SCROLL:** In October 1916 the British Government set up a committee regarding the idea for a commemorative keepsake that could be given to the relatives of soldiers serving with the British and Empire forces whose deaths were attributable to the Great War of 1914-1918. It was agreed that the memorial to be issued to the next of kin would be produced and paid for by the British Government. The Next of Kin Memorial Plaques and Memorial Scrolls were produced to commemorate those that gave their lives and to acknowledge their sacrifice. They were intended to give the close family a tangible memorial of their lost loved one.

In August 1917 the committee set up a competition for any British-born person to enter who could put forward a suitable design for a small bronze plaque to record the name of a fallen British or Empire Forces serviceman or woman. The top few selected entries would be offered prizes of up to £500. The design of the plaque competition was held while the war still raged. There was so much interest from people wanting to submit designs for the memorial plaque that the closing date (November 1, 1917) was extended by a few weeks to December 31, 1917 so that servicemen on active service overseas would have an opportunity to submit a design. There were more than 800 entries to the competition from within the United Kingdom, from countries in the British Empire and from the theatres of war. The winning design, announced March 31, 1918, was by Mr. **Edward Carter Preston**. His initials, E CR P, appear above the foot of the lion.

The Next of Kin Memorial Plaque is a circular bronze plaque approximately 11 cms in diameter. Its design features the figure of Britannia bowing her head. She is facing to her left and holding a laurel wreath in her left hand over the box with the name of the fallen soldier. The rank of the soldier was not given, so as to make no form of distinction of the level of sacrifice made—each death was to receive the same honour regardless of regiment or rank. In Britannia’s right hand she is holding a trident. In representation of Britain’s sea power there are two dolphins each facing Britannia on her left and right sides. A lion (the symbol of England) is standing in front of Britannia at her feet, also facing to the left with a menacing growl. A very small lion, with his head facing to the right can be seen underneath the larger lion’s feet, biting into a winged creature representing the German Imperial eagle. Around the margin of the circular plaque are the words, “He died for freedom and honour.”

Manufacture of plaques did not start until late in 1918. In the first month after the war was over the first plaques began to be produced in December 1918 at the Government’s Memorial Plaque Factory in Acton in London, and was moved in December 1920 to the Woolwich Arsenal munitions factory in south London. The circular shape and coin-like appearance (like the smaller British penny coin) of the Next of Kin Memorial Plaque soon contributed to the nickname of this plaque becoming widely known as the **“Dead Man’s Penny”**, the “Death Penny”, “Death Plaque” or “Widow’s Penny”.

The Memorial Scroll: In October 1917 it was announced that the committee had decided also to issue a commemorative scroll to the next of kin in addition to the bronze plaque. The scroll would be printed on high quality paper, size 11 x 7 inches (27cm x 17cm). By January 1918 the wording on the scroll was being discussed. The committee found the choice of words very difficult and asked for advice from numerous well-known writers including Rudyard Kipling, whose only son John was missing in action, believed killed, at the Battle of Loos. The text was to be printed in calligraphic script beneath the Royal Crest followed by the name of the commemorated serviceman giving his rank, name and regiment, this time individually written. The production of the memorial

scrolls began in January 1919, being printed from a wood block by artists at the London County Council Central School of Arts and Crafts. The accepted wording agreed upon by the committee was; “He whom this scroll commemorates was numbered among those who, at the call of King and Country, left all that was dear to them, endured hardness, faced danger, and finally passed out of the sight of men by the path of duty and self-sacrifice, giving up their own lives that others might live in freedom. Let those who come after see to it that his name be not forgotten”

King’s message: The plaque was sent out to relatives in an “On His Majesty’s Service” white envelope with a printed “Official Paid” stamp. Inside this outer envelope there was another white envelope with the Royal Crest embossed on the reverse enclosing a letter with a copy of King George V’s signature. With Buckingham Palace letterhead, the letter read “I join with my grateful people in sending you this memorial of a brave life given for others in the Great War. George R.I.”

Distribution of Plaques and Scrolls: Manufacture of Next of Kin Memorial plaques began in late 1918, and the Memorial Scrolls in January 1919, as the supply of the metal and the paper were difficult to obtain in wartime. The plaques and scrolls were posted out separately, typically in 1919 and 1920, and a ‘King’s message’ was enclosed with both. From 1919 and for several years after the end of the Great War there were over 1,300,000 Memorial Plaques and Memorial Scrolls sent to next of kin in commemoration of the soldiers, sailors and airmen, including approximately 600 women who died as a direct consequence attributable to service in the Great War. In those cases the motto on the plaques was amended to “She died for freedom and honour”. ^{21, 3R, 4C, 90}

• **THOSE LEFT BEHIND:** Many of the fallen left behind wives and children. The following poem, *The Soldiers’ Widow*, written by Edgar Guest and printed in the *Sarnia Observer* in March of 1915, expresses the emotion of a widow’s grief:

*The babies ask: Where’s papa gone?
And when’s he coming back?
And oh, it hurts to look upon
His little Joe and Jack,
And oh, it hurts so much at night
When all the lights are low!
I wonder was it wrong or right
For me to let him go.
They need so much his gentle care,
They look for him each day;
‘Twas I that sent him marching there
And brushed the tears away.
‘Twas I that heard his country call
Nor asked him not to go;
Alone I could have borne it all,
But there are Jack and Joe
They look for him both night and day,
So good and kind was he,
They want him now to share their play,
And when they question me
I have to turn away to hide,
The bitter, scalding tear,
It hurts to think that had I tried
I might have kept him here
I know his country needed him,
But oh, my heart is sore,
For through the future, dark and grim,
His babies need him more.
And when they ask: “Where’s papa gone?”
‘Tis then it hurts me so,
To think I strapped his knapsack on
And said he ought to go.*

- **WAR BRIDES:** While overseas, a large percentage of the wounded Canadian soldiers spent time at hospitals in the British Isles or travelled there while on leave. Many soldiers fell in love with the women they met during their extended stay. By war's end Canadian soldiers were marrying British and European women at the rate of 300 a week, over 1000 per month. Many of the soldiers served long enough overseas to begin families. There are no official figures given for the total number of Canadian Expeditionary Force soldiers who married abroad and returned to Canada with a war bride and/or children. By November 1918 reports in the Canadian press estimated that there were at least 20,000 war brides who had never been to Canada before. By mid August 1919 that number swelled to 35,000.

Most of the women were from the British Isles, but a number of them also came from France and Belgium. A handful of ships brought the war brides to Canada after the war, with the voyage across the Atlantic taking an average of 7 days. Many of the women travelled with young children or infants. The greatest risk while travelling to Canada during the winter of 1918/1919 was the Spanish flu epidemic. A number of war brides and their children succumbed to influenza on ships travelling to the Dominion during this time and were buried at sea, while others died shortly after arriving on Canadian shores.

In an immigration scheme in January 1919, the Government of Canada offered the dependents of Canadian soldiers free third class passage from their homes in Europe to their final destination in Canada. The Department of Immigration and Colonization repatriated over 54,500 soldiers' dependents to Canada in all. Approximately 17,000 returned to Canada between July 1917 and November 1918. After the armistice a further 37, 748 came to Canada by the end of 1919. This remarkable group of young Canadian citizens followed their veteran husbands and made their homes in this young and growing country. Their contributions would extend far beyond the walls of their homes and their growing families as they entered their communities and enriched it with their many abilities and hard work.^{D, F, 5K, 5L}

- **GENERAL ARTHUR CURRIE'S RETURN TO CANADA:** (more information on Arthur Currie is on pg. 137)

Sir Arthur Currie commanded the Canadian Corps from June 1917 until its disbandment in late 1919. He proved to be an excellent commander who always did his best for his Canucks to enhance the prospects for success and save Canadian lives. He had put his career on the line several times to ensure that more guns were available to support an attack; pushed back start times against his superiors' wishes; demanded more preparation time prior to major assaults; refused to let his forces serve under weak British generals; and even turned down an army command to preserve the fighting efficiency of his corps. Under his leadership, the Canadian Corps cemented their reputation as an elite assault formation, with an unbroken string of major victories that included Hill 70, Passchendaele, Amiens, Arras, and the Canal du Nord. Lieutenant-General Sir Arthur Currie is believed by many military experts and historians to be one of the **best military commanders** Canada has ever produced.^{4G, 5J}

Despite his sterling wartime standing, Currie received a cold welcome on his return to Canada – his reputation damaged by Sir Sam Hughes, who had been Minister of Militia and Defence at the start of the war until his firing in late 1916. In fact, Currie had been selected as a brigade commander in the First Contingent in 1914 by Sam Hughes, in part because of his friendship with Hughes' son, Garnet.

Years before his return to Canada, Currie had refused to promote Sam Hughes' son, Garnet, and reward him with a key leadership position in the Canadian army. Sam and Garnet Hughes both vowed revenge. Father and son Hughes accused Currie of having sacrificed Canadian lives in fruitless battles in the days leading to the Armistice. It was not true, but the accusations would dog Currie for many years. On his return to Canada, exhausted from the war and suffering from what we would now call post-traumatic stress disorder, Currie offered a poor defence of his war record. Though he was celebrated throughout the British Empire as one of the finest corps commanders of the war, the Canadian government accorded him no special honours.

Currie helped create the postwar army and in 1920, he exited the military to become principal of McGill University in Montreal where he would be a resounding success. In June 1927, a Port Hope newspaper, owned by the Hughes family, published a scathing editorial repeating the substance of Hughes charges in 1919. The accusations were untrue, but they shook the country. Currie struck back against the paper, suing for libel of character, asking for \$50,000 in damages, but really to clear his name and reputation.

The war was refought in the Cobourg courtroom, as Currie's battlefield decisions were attacked, his motives interrogated, his character assassinated, and the cost of the war questioned. Backed by almost all of the surviving Corps officers, hundreds of whom offered to testify on his behalf, Currie would win the sixteen day high-profile court case in May 1928. Though the verdict came down in his favour—the jury decided that he had been libeled, but

awarded him only \$500—the trial had damaged Currie’s spirit and health. Universally seen by military historians as Canada’s greatest soldier, and one of the finest leaders of the Great War, Arthur Currie died at age fifty-seven in November 1933 after a stroke. Tens of thousands attended his military funeral in Montreal; it was broadcast on radio coast-to-coast; the largest funeral for any Canadian to that point in the country’s history.^{21, 2N, 5J, 7Z, 8H, 11C}

Towards the end of the war, in response to the criticism that the Canadian Corps had taken too many casualties, General Sir Arthur Currie pointed out that it was the Canadians who spear-headed the attacks during the final 100 days. He continued, *“The Germans fought us exceedingly hard all the way, for whenever the Canadian Corps goes into a battle he seems to throw a far higher proportion of men and ammunition at us than he does at any other part of the front. He assumes that if he stops the Canadian Corps, everything else stops. This is a point that should be remembered by the people of Canada...”*^{7A}

On reflecting on the Canadian Corps extraordinary victories in the last months of the Great War, General Arthur Currie told Prime Minister Sir Robert Borden that, *“to my mind, there is no doubt, that no force of similar size played anything like so great a part in bringing the proud enemy to his knees.”* Currie had written to a friend in late October 1918 that, *“peace when it does come must be a peace that will last for many, many years. We do not want to have to do this thing all over again in another fifteen or twenty years.”*^{4G, 5J}

General Sir Arthur Currie had no illusions about the horrors of war. In an address to the Empire Club in Toronto on August 29, 1919, he stated, *“We picture war as a business of banners flying, men smiling, full of animation, guns belching forth, and all that sort of thing. One, somehow or other, gets the impression that there is a great deal of glory and glamor about the battlefield. I never saw any of it. I want you to understand that war is simply the curse of butchery, and men who have gone through it, who have seen war stripped of all its trappings, are the last men that will want to see another war.”*^{5J}

• **TECHNOLOGY OF THE GREAT WAR:** The weapons used in the Great War expanded killing to an industrial scale with the goal of each side being to kill as many as possible, as fast as possible. The First World War was primarily a land war. Trench weapons included rifles and bayonets, grenades, and rifle grenades. The new Mills bomb became the main grenade used by the Allies—weighing half a kilogram, the bomb’s exterior was serrated so that when it detonated it broke into many fragments. For Canadian soldiers, the unreliable Canadian-made Ross rifle was replaced with the British Lee-Enfield rifle, designed to fire 15 rounds per minute. Machine guns that included the heavy, water-cooled Vickers machine gun and the more portable Lewis, with its cylindrical feed drum, were capable of firing 400 to 500 rounds per minute, devastating weapons that made any frontal assault a costly affair.

Flamethrowers were used for the first time in warfare in the trenches. Artillery had the most devastating effect in the war; mortars and field guns fired high explosive shells, shrapnel shells that released hundreds of steel balls, as well as smoke, incendiary and gas shells. As the war progressed the artillery pieces became larger and more accurate in their fire. The new ‘106 graze trigger fuse’ enabled artillery shells to explode on the slightest contact rather than burying themselves in the ground, an extremely useful weapon at cutting barbed wire.

Soldiers and miners dug tunnels under enemy trenches and planted explosive charges. Tanks, first used at the Battle of the Somme, improved over the course of the war. The first large-scale use of poison gas was used by the Germans at Ypres. Chlorine gas caused a burning sensation in the throat and chest pains, leading to suffocation. Other gases such as mustard gas and phosgene were used, the former causing blistering skin, vomiting, blinded eyes, internal and external bleeding, and death in days. Phosgene was many times deadlier than chlorine, and nearly invisible and odourless. In the air, planes were used for the first time, initially for spying, aerial photography and dropping bombs. Planes evolved into fighter aircraft, with machine guns and sometimes cannons. In the water, submarines and torpedoes, sea mines and depth charges were added to the navies.^{E, 2I, 7Z}

• **MEDICINE:** A number of medical innovations and improvements were made during the First World War, brought on by the havoc created by the new lethal weapons of war. More than 3,600 Canadian soldiers returned home missing an arm or a leg – and sometimes more than one. The Military Hospitals Commission (see pg. 188), responsible for restoring wounded veterans to health and productivity, promised free **prosthetics**—artificial limbs for soldiers who lost them in the war. They promised to produce the best arms and legs devised anywhere in the world, as well as **orthopedic** apparatuses such as splints, braces and orthopedic shoes.

The War Amps organization traces its origins back to September 23, 1918, when the Amputation Club of British Columbia held its first meeting. It was the first of many groups of war amputees across Canada to organize

and, eventually, amalgamate into a national organization. Formally chartered in 1920 as the “Amputations Association of the Great War”, with a philosophy of “amputees helping amputees”, the organization pledged to “bind together in the spirit of fraternity all men who have lost a limb or limbs whilst in service to Canada.” In its constitution, The War Amps identified a threefold purpose: to bring their case to the Canadian government; to help amputees with retraining and rehabilitation; and to explore and initiate research into the little-known world of artificial limbs. Today, the charitable Association continues to serve war amputees, and all Canadian amputees, including children.^{9T}

Physiotherapy, referred to as “rehabilitation therapy” at the time, involving massage, manipulation and exercise, grew in importance as a method used to help many of the wounded. Another development came early in the war when Canadian Dr. Lawrence Bruce Robertson was credited with performing the first **blood transfusions** in a British hospital. Before the war, he had studied blood transfusion techniques and had used them to save infants at Toronto’s Hospital for Sick Children. By war’s end, the prompt transfusion of blood in wounded soldiers saved thousands of lives, yet there was always substantial risk as the knowledge of blood types and Rh blood groups was still in its’ infancy. The technique of blood transfusion would be honed by Canada’s **Dr. Norman Bethune** in the 1930’s in Spain and China.

Countless veterans returned from war with burns, gaping facial wounds in their faces, missing noses and chins and holes in their cheeks. Innovations in skin grafts and facial reconstruction revolutionized **plastic surgery**. Advances in **X-rays**, including mobile X-ray machines that could be brought to surgical stations at the Front, helped to locate bullets, shrapnel, shell and grenade fragments, as well as broken bones. Certain diseases like typhoid could be controlled by the use of **vaccinations** and treatments for dysentery and tetanus improved. Canada became a leading producer of tetanus vaccinations during the war thanks to research and development conducted at the University of Toronto. Jagged steel from shell casings, shrapnel balls and bullets tore through flesh. In “good” wounds, the metal passed through the body without hitting organs, though a man could still bleed to death. In bad cases, the steel shattered bones, pulped organs, cut arteries, tore up intestines and lodged in the body. **Antibiotics** such as penicillin had not yet been discovered, so many of the wounded soldiers died a slow and agonizing death, a result of infections of their wounds.

• **BIRTH OF THE CANADIAN NAVY:** Prior to 1910, the Canadian government had little interest in naval affairs. However, on May 4, 1910, with conflict brewing in Europe, the Canadian Parliament, under the authority of the Naval Services Act, established the Canadian Navy. One year later, on **August 29, 1911**, by command of the King George V, it was designated the **Royal Canadian Navy** (RCN). In the beginning, it consisted of 350 sailors and two second-hand British cruisers, *HMCS Niobe* and *HMCS Rainbow*, with bases divided between Halifax, Nova Scotia and Esquimalt, British Columbia. In May of 1914, the Royal Naval Canadian Volunteer Reserve (RNCVR) came into being (on January 31, 1923, it was renamed the Royal Canadian Naval Volunteer Reserve - RCNVR).

The protection of Canada’s coasts was entrusted to the RCN. With the threat of enemy attack, British Columbia’s premier even purchased two submarines (CC-1 and CC-2) to help patrol the coasts. New ships were built and a number of patriotic citizens loaned or gave their personal yachts to aid in naval defence. By 1918, the navy had grown to over 100 war vessels, with 5,500 Canadians serving in the Royal Canadian Navy, and another 3,000 Canadians serving in Britain’s Royal Navy. Over 150 Canadian sailors lost their lives during the Great War, serving with the RCN. No casualty figures exist for the 3,000 Canadians in service with the Royal Navy. The first four Canadians to die on active service during the Great War were serving on the *HMS Good Hope*, a British armoured cruiser that was sunk on November 1, 1914.^{D, 2I, 4G}

• **BIRTH OF CANADA’S AIR FORCE:** It was in December 1903 that Orville and Wilbur Wright had piloted the first successful powered flight on the beach at Kitty Hawk, North Carolina, U.S.A. The first Canadian powered flight, organized by Alexander Graham Bell and flown by Douglas McCurdy was in 1909. Canada’s first attempt at an air force was the Canadian Aviation Corps (CAC), formed in September of 1914. It consisted of two officers and a mechanic and one biplane that was shipped to England with the Canadian Expeditionary Force. The plane was trucked to Salisbury Plain where the Canadian troops were training, but never flew, as not one of the three members was a qualified pilot. By February 1915, the CAC had disappeared, so during the First World War, Canada did not have a distinct air force.

However, approximately 22,800 Canadians volunteered to serve in the British flying services—the Royal Flying Corps (RFC) and the Royal Naval Air Service (RNAS)—which amalgamated on April 1, 1918 as the **Royal**

Air Force (RAF). Some of those who joined the flying services enlisted in Canada. Another approximate 13,100 Canadians served as aircrew.

Canadians served at home and overseas as fighter and reconnaissance pilots, aerial observers, mechanics, flight instructors and women served as clerks, mechanics and vehicle drivers. Most of the Canadians in the British flying services were those who transferred from the CEF, who were fairly liberal about allowing such transfers, with only occasional protests that the army was losing too much talent to the flying services.

Flying, still in its infancy, was extremely dangerous. The demands of war meant that pilot training was often cursory. Many recruits had only a few hours of instruction before being expected to fly solo; consequently, more pilots died from flying accidents and mechanical failure than from enemy fire. The flyers, the so-called “**cavalry of the clouds**”, went up in rickety mono and biplanes made of wood and canvas with propeller engines, few instruments and no parachutes. At the war’s beginning, flimsy aircraft were unarmed, used in a reconnaissance role, and pilots carried pistols or dropped hand-held bombs. Advances in air technology were rapid so by war’s end: sturdy aircraft were armed with machine guns that could fire through the propeller’s arc; fighters fought for air superiority and strafed enemy soldiers; bombers carried the war to the front and beyond enemy territory; observation planes spotted enemy troops movement, located gun batteries and passed information back by wireless; and pilots at last were issued parachutes. Pilots strove to achieve surprise through advantages of sun, altitude and attacks from behind. Most pilots lasted only ten weeks in action, and one third of all the fliers died in combat.^{4G, 5J, 10Q, 11C}

Canada produced its share of flying aces, who became household names at home, including William Barker, the single most decorated Canadian of the Great War; Arthur Roy Brown, who is credited by many as the one who shot down German flying ace Manfred von Richthofen, better known as the “Red Baron” on April 21, 1918; Raymond Collishaw; and William A. “Billy” Bishop to name a few. Billy Bishop shot down 72 planes during the war, including four German planes during a solo mission in July of 1917, for which he was awarded the Victoria Cross.^{D, 2I, 2Q, 2S, 3R, 4G, 5J, 8H}

One Sarnian who was a member of the RFC during the war was **John Wilfred Randolph**. He was born October 5, 1897, the son of Harry DeBeaumont Randolph of London Road, Sarnia. Seventeen year-old John Randolph enlisted in the Canadian Expeditionary Force on February 15, 1915 in Sarnia, and became a member of #3 Stationary Hospital with the rank of Private. He arrived in England on April 29, 1915, and in France on April 8, 1916, as a member of #2 Canadian Field Ambulance. On January 31, 1918, John Randolph joined the Royal Flying Corps, becoming a member of #2 Cadet Wing, training at Hastings, East Sussex, England. On May 28, 1918, he was appointed Flight Cadet, RFC. John Randolph survived the war, returned to Sarnia, married and worked at the post office.^F

During the Great War, at least one in four (possibly one in three) pilots who flew British planes were Canadian. Of the 22,800 pilots there were 6,166 British Empire air service fatalities, of which approximately 1,400 Canadian airmen were killed or died of wounds or disease either during training or combat. An additional 1,130 Canadians were wounded or injured, and 377 became prisoners of war or were interned. At least five young men from Sarnia gave their lives during the Great War while serving with the Royal Flying Corps including Nelson Brown, Neil Hanna, Thomas Hazen, David McGibbon and Leslie Playne.

In September of 1918, the Canadian government approved the formation of a Canadian Air Force (CAF), which was comprised of two British squadrons made up entirely of Canadian personnel—designated No. 1 (Fighter) Squadron and No. 2 (Day Bomber) Squadron. With the signing of the Armistice on November 11, 1918, the CAF never flew an operational mission. The government cut air force funding and it was disbanded by 1920.

On **April 1, 1924**, the **Royal Canadian Air Force (RCAF)** was reorganized and established permanently. At its inception, it was heavily involved in civil air operations including forestry patrols, anti-smuggling, forest spraying, mail delivery and surveying. It was not until 1936 that the RCAF would be a purely military operation.^{2I, 2Q, 2S, 3R, 4G}

In July 1916, Point Edward born **Arthur W. Crawford** wrote a letter from Belgium to his mother Mrs. George Crawford, of 153 Christina Street, Sarnia. In it, he described his experiences at a special signaling course with a flying squadron. Following is a portion of his letter:
Dear Mother,

I am late again as usual but will try to make up for lost time by writing more than usual. I forgot exactly what I told you in my last letter but will try to give an account of my wanderings during the past week or so.

Shortly before we came back to reserve camp, I was sent along with several other N.C.O. 's to our flying squadron, to take a special course in signaling. Cannot tell you the particulars, but will give a brief account of what I did. Arthur Crawford would walk to a small village, then was taken to the headquarters of the flying squadron. In a lecture room awaiting a major he continued, In the midst of a gramophone selection we were called to attention as the major entered and then the course began. We were given not only a summary of the course but a brief history of the work of the aviator since the war began... As you know, we have many types of aeroplanes just as we have different types of war vessels. I was surprised to learn that each type is used for a special purpose. We have small planes, designed for speed and climbing ability, large planes designed for long flights and carrying power, to work far behind the lines and fast but stable planes for observing our artillery fire and photographing the trench areas, etc. The flying corps is divided into squadrons of eighteen planes, each squadron having its own particular work and consisting of three flights of six planes each.

Our own particular squadron consisted of eighteen very stable machines of the latest pattern for trench observation work... We were taken to the aerodromes and told to ask as many questions as we liked and learn all we could about aeroplanes... We had all been promised a trip if we wished it, so within ten minutes after meeting the lieutenant, I was donning helmet, goggles, etc and receiving final instructions for the flight.

The machine was wheeled on to the starting ground, I climbed into the forward or observer's seat and fastened the wide belt about my waist. When the engine was running to the satisfaction of the pilot, the blocks were pulled from in front of the wheels and we ran out along the starting field or course. At the far end, we wheeled around into the wind and were across the green like a race horse. Before I grew accustomed to the roar of the engine and rush of the wind, the lever (or joy stick) was pulled back and the earth started to slide away... At less than a thousand feet, we flew for some distance on an even keel with the trees, fields, houses, etc., passing in review below us. It was a beautiful sight and I thoroughly enjoyed it.

Suddenly the plane tilted to one side and the earth seemed to swing up till it hung like a wall on my right. The end of the right plane remained stationary and we swung around in a circle. It was thrilling for me and I felt none too safe until reassured by the smile of the pilot who righted the plane with a jerk and once more we were off on an even keel. I could tell by the weight of my feet that we were climbing and the motion of the earth grew slower and all objects became gradually smaller. Except for occasional swaying due to "air bumps" the plane was quite steady and apparently very easy to control.

At about five thousand feet we flew along over familiar country and I had an interesting lesson in map reading as I picked out our various camps, familiar buildings, etc., and endeavored to locate human beings on that beautiful "flat" earth, away below. The tiny tents, huts, transport parks, etc., were easily discerned but I could not see a man. As we neared the line we again soared upward until we flew at about eight thousand feet. Below were demolished towns and farms all spotted with shell holes which showed up very clearly, although not a moving object could I see. Puffs of smoke showed the bursting shells but none came near us and we circled in peace high above the din of war.

On the return trip I was treated to a few thrillers and lost a little of my enthusiasm. As we sailed calmly along just above a large cloud bank, I suddenly had the sensation of falling and before I could my breath we shot through the bank and saw the earth straight ahead. Suddenly we swung up again and I was forced into the seat once more. Then we did a long spiral and finally to top it all, we actually looped the loop. I cannot say that I was frightened but I certainly did not enjoy it at the time. I grasped the sides of the machine, put my head inside and just held on... When we finally landed, I was almost deaf and expected to be sick, but wasn't. I don't like looping but will certainly fly at every opportunity. It was a great experience for me and I shall never forget it...

Best to all, Art

Note: More on Arthur Crawford and his letters home to Sarnia are included on pages 106 and 119.

• **THE PARIS PEACE CONFERENCE:** Just over two months following the end of World War I, the victors organized the Paris Peace Conference to negotiate the peace treaties between the Allied victors and the defeated Central Powers. The conference took place over a period of six months between January and June of 1919 and involved diplomats from more than 32 countries. Among them were Canada's Prime Minister Robert Borden and the "Big Four" – Woodrow Wilson, President of the United States; David Lloyd George, Prime Minister of Great Britain; Georges Clemenceau, Prime Minister of France; and Vittorio Orlando, Prime Minister of Italy. Major outcomes of the Paris Peace Conference included the creation of the League of Nations; the signing of five peace treaties including the Treaty of Versailles with defeated enemies; and the formation of new national boundaries. The

remaking of the world map through the drawing of new boundaries and divisions of territory continues to impact the world today.^{2N, 3Q}

The Treaty of Versailles was signed in Paris on June 28, 1919 at the Palace of Versailles inside its Hall of Mirrors, exactly five years to the day after the assassination of Archduke Franz Ferdinand and his wife, an event that triggered the start of World War I. The Treaty ratified the terms of peace and was a formal recognition of the end of the Great War. The Treaty of Versailles broke up and redistributed the German Empire and imposed substantial reparations on Germany which would linger for years and play an important role in the lead up to World War II.^{2N, 3Q}

The Treaty of Versailles also included a plan to form a ‘**League of Nations**’. It was an international body with representatives from many countries whose purpose was to promote international co-operation and to achieve peace and security. Prime Minister Robert Borden managed to get Canada a separate seat on the League, independent and no longer a colony of Britain. When the United States objected, the Canadian delegates pointed out that Canada, despite its small population, had lost more soldiers during the war than the Americans and had been in the war from the beginning, three years before the Americans.

The League of Nations, established on January 10, 1920, was designed to maintain global peace through security, arms control, and negotiation. League of Nations membership brought Canada its first official contact with foreign governments as an equal, helped establish its position as an independent nation and confronted it with both the opportunities and the dilemmas associated with problems of international co-operation and attempts to prevent war. Though flawed from the outset, the League of Nations over the course of its history did experience a number of successes as well as some failures. It ceased its activities after failing to prevent the Second World War and gave way to its successor, the United Nations, in 1945.

Though it was the great powers that decided all of the major issues at Versailles, from the redrawing of countries’ borders to the punishment to be meted to Germany, Canada’s presence was a diplomatic victory—the nation of Canada was now recognized not only within the circle of the British Empire, but also internationally.^{2N, 3V, 3W, 5A, 8H}

• **SARNIA’S PEACE CELEBRATION:** On a summer weekend in mid-July 1919, Sarnians rendered homage to the fallen of the Great War of the city and Lambton County, by holding a peace celebration picnic and veterans parade with memorial service at Victoria Park. Following is a portion of the account of this event from the *Sarnia Observer* newspaper:

Sarnia Honors the Noble Dead who fell on the world’s greatest Fields of Battle in Europe

With muffled drums and with standard borne high, over one hundred of Sarnia’s war heroes, the majority khaki clad, with here and there a civilian, his war badges signifying service, paraded to Victoria Park on Sunday afternoon, to participate in the memorial services held in honor of those who fell in the conflict. There are many people in Sarnia who were unable to participate with unrestricted joy in the peace celebration on Saturday, those who had hoped to welcome their own beloved soldier sons, or husbands or sweethearts home from the war, but they never came and the sight of the marching veterans on Sunday made more acute their sense of loss and intensified their yearning for their “unreturning brave.”

The mingled pride and grief which they felt in bidding those dear ones God speed when they went away to the war; the long days and nights – many sleepless nights – of suspense and anxiety after every report of a great battle in which the Canadians took part; the shock of the terrible news which brought lasting grief to them, and the numbing heart ache that succeeded and will not wear away, all were recalled and revived by the sight of the marching men, some minus an arm, and some with a limp, outward evidence of suffering.

Yet even for them there was a note of joy, of subdued and chastened joy, in the celebration of peace and as Rev. Newton stated in his memorial address, the lives of those fallen soldiers were not wasted. Every home that sent forth to war, a soldier who will never come back is a shrine dedicated to the honored memory of that soldier.

When the veterans had reached their allotted space near the bandstand in the park and the citizens who had lined the streets to witness the solemn parade had encircled the stand, the entire gathering stood with bowed heads for one minute, time being taken by the bugle to give a silent prayer of Thanksgiving for Peace and a prayer that those that mourn may be comforted....

• **LOCAL DECORATED SOLDIERS:** A number of Sarnia and Lambton men were rewarded with decorations for their bravery and gallantry during the Great War. The exact number of awards is not known, but in October of 1942, the *Canadian (Sarnia) Observer* compiled a list of local decorated World War I soldiers. Following is that list:

Local decorated soldiers included Major Bart Charlton (Distinguished Service Order and Croix de Guerre), Captain George Williams (Distinguished Conduct Medal – D.C.M.), Sergeant Leonard Francis Allingham (D.C.M.), Captain George Stirrett (D.C.M. and Military Cross – M.C.), Corporal A.R. Mendizabal (D.C.M.), Major N.L. LeSueur (M.C.), Flt.-Lieut. Jack Church (M.C.), Major Jack Newton (M.C.), Col. S.C. Stokes (M.C.), Capt. Dick Bolton (M.C.), Lieut. Niven MacKenzie (M.C. and Military Medal - M.M.), George Lucas (M.M.), Clarence Duncan (M.M.), Ernest Tilley (M.M.), Douglas K. MacDonald (M.M.), Sergeant Frank Baxter (M.M.), Sergeant Maxfield Harper (M.M.), and Thomas E. Wood (Mons Star and M.M.).

• **THE COMMONWEALTH WAR GRAVES COMMISSION:** Formerly the Imperial War Graves Commission, this commission owes its existence to the vision and determination of **Sir Fabian Ware**. He was born in Clifton, near Bristol, England in June 1869. Unable to enlist in the British army in August 1914 on account of his age, he still volunteered to work at the head of a mobile British Red Cross unit in France. Striving to save the wounded, saddened by the sheer number of casualties, he was also struck by the obvious lack of a system of recording the graves of the men killed in action. Ware knew that both saving the wounded and recording the burial places of the dead were of crucial importance to the soldiers who survived, each of whom feared that he might be left behind wounded or dead and forgotten.

Under his leadership, his mobile unit of the Red Cross began recording and caring for all the graves they could find. By 1915, Ware had come up with the idea of establishing an official body to perform this task—one quickly approved by the British government—not only in dealing with queries from relatives of the deceased, but also in terms of improving the morale of the troops in the field. Ware was also keen from the outset to ensure the co-operation of not only the Allied powers but also those of the Central powers. In May 1917, the Committee for the Care of Soldiers Graves that Ware had created was transformed to the **Imperial War Graves Commission (IWGC)**, with Ware as its Vice Chairman and the Prince of Wales as its President. In 1960, the IWGC was renamed the Commonwealth War Graves Commission (CWGC).

At the end of the Great War, the Imperial War Graves Commission's work began in earnest. Along with the enormous task of recording the details of the Empire's million dead, it had to guarantee land for war cemeteries and memorials, and work with architects, artists and poets in order to design and construct the appropriate cemeteries and memorials. The cemeteries were to follow a basic pattern with a Cross of Sacrifice and a Stone of Remembrance. All of the memorials and cemeteries would be maintained in perpetuity to ensure lasting remembrance of the fallen.

Two of the key pressing issues discussed and decided upon by the Imperial War Graves Commission were: first, the bringing into cemeteries of bodies buried in isolated graves on the battlefields; and second, the exhumation of bodies, whether in isolated graves or in cemeteries, in order to repatriate the bodies to their native countries.

On the first issue: *"The Commission recognized the existence of a sentiment in favor of leaving the bodies of the dead where they fell, but, in view of the actual conditions, regarded it as impractical. Over 150,000 such scattered graves are known in France and Belgium. In certain districts notably those of Ypres and the Somme battlefields, they are thickly strewn over areas measuring several miles in length and breadth. These are, or will shortly be, restored to cultivation, or possibly be afforested, and the bodies cannot remain undisturbed. They must, therefore, be removed to cemeteries where they can be reverently cared for."*^N The army arranged for this work to be done by volunteers from among the comrades of the fallen. The bodies would be disinterred from their haphazardly dug battlefield graves and placed into cemeteries as close as may be possible to the place where they lay, all under **uniform white wooden crosses**.

In the 1920's, the Imperial War Graves Commission started removing the wooden crosses from the graves and replacing them with the **stone headstones** that are still present today. The wooden crosses were offered to the families of the fallen. Part of its mandate was to commemorate all Commonwealth war dead individually and equally in a uniform fashion. The IWGC demanded the headstones (normally of white Portland stone) be uniform, and for the fallen to be buried side by side regardless of military or civilian rank, religion, origin or colour. Every headstone contains the national emblem (eg. the iconic Maple Leaf, or a caribou for Newfoundlanders) or regimental badge; soldiers' rank; name; enlistment number; unit; decorations conferred; date of death; and age of casualty. Inscribed below these are an appropriate religious symbol (eg. a cross or Star of David) and a more personal valediction chosen by relatives (epitaph).

On the second issue: *"To allow removal by a few individuals of necessity only those who could afford the cost, would be contrary to the principle of equality of treatment; to empty some 400,000 identified graves would be*

colossal work and would be opposed to the spirit in which the Empire had gratefully accepted the offers made by the Governments of France, Belgium, Italy and Greece to provide land in perpetuity for our countries to adopt our dead. The Commission felt that a higher ideal than that of private burial at home is embodied in these war cemeteries in foreign lands, where those who fought and fell together, officers and men, lie together in their last resting place, facing the line they gave their lives to maintain. They feel sure – and the evidence available to them confirmed the feeling – that the dead themselves, in whom the sense of comradeship was so strong, would have preferred to lie with their comrades. These British cemeteries in foreign lands would be the symbol for future generations to the common purpose, the common devotion, the common sacrifice of all ranks in a united Empire.”^N In battle, the Empire had fought together; in death, the fallen soldiers would remain a unique army of comrades for all eternity, an “Empire of the Silent Dead.”^{C, 2B, 8H, 8O}

The Stone of Remembrance inscription: Also at the end of the Great War, the Imperial War Graves Commission requested submissions for an inscription that would be placed on the Great War Stones of Remembrance in the many British and Commonwealth military cemeteries located around the world. It was British author and poet **Rudyard Kipling’s** recommendation that was approved by the commission. Kipling himself had lost his only son John, who was eighteen years old when he was killed in battle during the Great War. John Kipling was burdened by abysmal vision and had no business being in the army, but his well-connected father had managed to secure him a position in the Irish Guards. In September 1915, only one month after his unit arrived in France, they were engaged in what turned out to be a “near rout” according to one account. The Irish unit suffered heavy casualties and among the dead or missing was John Kipling, whose disappearance would haunt his parents for the rest of their lives.

In Rudyard Kipling’s submission to the War Graves Commission, he wrote, *“It was necessary to find words of praise and honor which should be both simple and well known, comprehensible and of the same value in all tongues, and standing, as far as might be, outside the flux of men and things. After search and consultation with all ranks and many races in our armies and navies, as well as those who had given their sons, it seemed to me that no single phrase could better that which closes the tribute to ‘famous men’ in Ecclesiasticus 44:14: ‘Their bodies are buried in peace; but their name liveth for evermore.’”* Kipling’s submission, **“Their Name Liveth For Evermore”** was inscribed on the memorial Stones of Remembrance. Rudyard Kipling also suggested the words, **“Known Unto God”**, for an inscription to be placed on the foot of headstones marking the remains of unidentified British or Commonwealth soldiers.^{4G, 8H}

Today, the Commonwealth War Graves Commission ensures that 1.7 million Commonwealth servicemen and women who died in the two World Wars will never be forgotten. The Commission cares for cemeteries and memorials at 23,000 locations in 153 countries worldwide.

Epitaphs: From the outset, the Imperial War Graves Commission embraced the idea of encouraging loved ones to be directly involved in selecting an epitaph with personal meaning. So if they wished, family members could write a short valedictory inscription of their choice that would be engraved on the headstone (with a prescribed length of 66 characters, including the spaces between words).

Never before in history had the families of the fallen had the opportunity to express their reaction to the loss of a beloved son, husband or father, laid to rest in a foreign land. The insertion of a personal inscription was for the vast majority of families the only way to bid farewell to a beloved husband, son, or father laid to rest in a foreign land, in a grave far from home.

For next of kin, how does one find words to capture the haunting loss of a son, brother, father, uncle or daughter, and sum up a life in 66 characters or less? These moving inscriptions convey in a few words the impact of a young soldier’s death on his family and preserve the voice of the bereaved – those who bore the burden of loss for the rest of their lives. These inscriptions, chosen at a time when most people would be at a loss for words in the face of overwhelming sorrow, were drawn from Scripture, hymns, literature, and popular songs of the day. Others were composed by loved ones who thought carefully about their valediction. The quotations give recognition to the parents, wives, and children who used epitaphs to express the ideals for which Canadians had fought, or to reconcile themselves to the loss of a loved one whose grave they would in all likelihood never see.^{C, 2B, 8O}

Sarnia Epitaphs: For every Sarnia fallen soldier, in every war, who has an epitaph, their epitaph is included in their biography. A collection of all of Sarnia’s fallen soldier’s epitaphs (words of valediction and remembrance) is included in the Appendix section of this Project on page 1205.

- **THE GREAT WAR VETERANS ASSOCIATION:** With the end of the Great War, Canada and its government was for the first time ever, faced with the issue of the mass return of men from their service overseas. Formed during or shortly after the Great War, there were a number of veteran groups and regimental associations existing to aid returning service men in Canada. In Sarnia, as in communities across the country, there were a number of veterans' organizations that sprang up after the War.

Founded on April 10, 1917, during the Vimy battle, the "**Great War Veterans Association**" (GWVA) was Canada's largest and most influential national organization. Initially formed by wounded veterans returning home, it was an organization devoted to prosecuting the war to the fullest, no matter the cost, including enacting conscription and restricting the rights of some new Canadians, especially those from enemy countries in the war. Across the country, they also pushed for government recognition and rewards for veteran soldiers. This included a failed effort to convince the federal government to give a \$2,000 bonus to every veteran. Sarnia had its branch of the GWVA that aided servicemen make the transition to civilian life.

In June 1925, at the urging of Field Marshal Earl Haig of the British Empire Service League, an appeal for unity of the different organizations led to the formation of the "Dominion Veterans Alliance". In November 1925, the "Canadian Legion of the British Empire Service League" was founded in Winnipeg, Manitoba, commonly known as the "**Canadian Legion**", and it was incorporated by special Act of Parliament in 1926. In Sarnia, the last meeting of the Great War Veteran's Association and the first meeting of the new branch of the Canadian Legion (Branch 62) were held at the Sarnia Soldiers Service Club in October 1926.

Canadian Legion Halls began to be erected across the country in the late 1920s as sanctuaries for the veterans. Much like the soldiers' wartime dugouts or the *estaminets* (taverns) behind the lines, the halls were sites for veterans to gather together and share wartime culture—reliving the camaraderie, sharing stories and rehashing old jokes.^{9U}

- **THE ROYAL CANADIAN LEGION:** Initially, the principal objectives of the Canadian Legion were to provide a strong voice for World War I veterans and to advise the government on veterans' issues. World War II brought new demands, and the Canadian Legion increased its efforts to help veterans, returned service members, and those serving abroad. In 1960, the Canadian Legion was granted royal patronage by Queen Elizabeth II, and it became the "Royal Canadian Legion". The Royal Canadian Legion, a not for profit organization, is the largest veterans service organization in Canada. It has never faltered in its efforts to serve veterans, to serve military and RCMP members and their families, to promote remembrance and to serve the community and country.^{2Q}

Initial meetings of the **Sarnia Legion Branch 62** were held in quarters opposite the city hall. As the branch became stronger, plans were made to secure a larger building. Patriotic moneys left when the armistice was declared had been placed in a war chest and these were used to purchase the building on Front Street—the Sarnia Soldiers' Service Club. The Royal Canadian Legion in Sarnia, Branch 62, is located at 286 Front Street, the original address of the Sarnia Soldiers' Service Club.

In July 1987, there was a sod-turning ceremony to break ground for the construction of the Sarnia Legion's new \$1.2 million building, which would be double the size of the original building. The original "old white house" Legion building was located where the current Legion's parking lot is. The "white house" Legion was demolished when the new building was constructed. The new hall, which included pillars similar in design to those of the original building, opened in late April of 1988, with its official opening in mid-September of 1988.

The "Calamity" tank: The tank that sits outside the Legion hall was donated to the City of Sarnia by the First Hussars and Sarnia Legion in 1970. The tank is model type M4A2 HVSS Sherman medium tank with a 76-mm gun, serial number 65042, built by Fisher, with Reg. No. 30123021. Sherman tanks were manned by a five-man crew that included the commander, gunner, loader/wireless operator, driver, and co-driver/machine-gunner.^{3F, 5O}

The First Hussars is a Primary Reserve Armoured Reconnaissance Regiment of the Canadian Army, based in London and Sarnia. The First Hussars "C" Squadron was formed in Sarnia in 1964, serving as a reserve armoured reconnaissance training unit. To facilitate training, they brought with them a 76 MM cannon and a Sherman tank. The cannon was installed in the basement of the Sarnia Federal Building, while the tank was housed at the Hydro building located at Front and Nelson Streets. The tank had steel tracks that would have destroyed city streets, so the tracks were changed to rubber. In 1967, the First Hussars' responsibilities shifted from armoured artillery training to reconnaissance, and the heavy weaponry became expendable.

The Sherman tank was offered to Royal Canadian Legion Branch 62, and was dedicated three days before Remembrance Day in 1970. The tank was christened “Calamity” to honour First Hussars member **Brandon (Brandy) Conron**, who drove a tank named “Calamity” as the Canadians stormed ashore on D-Day, June 6, 1944. More information on Captain Brandon Conron and D-Day is in the World War II section of this Project on page 501.

Sarnia’s Sherman “Calamity” tank’s dedication plaque is inscribed: *To the Memory of Our Fallen Comrades. Dedicated by the 1st Hussars and Royal Canadian Legion Branch 62. 8 November, 1970. ‘Lest We Forget’*. In 1994, a second plaque was unveiled on the Sherman tank. This second plaque is inscribed: *1944-1994 This plaque is placed here to commemorate the 50th Anniversary of the Allied Invasion of Normandy on D-Day, 6th June 1944. It is dedicated to the soldiers of the First Hussars; to those who took part in the assault, to those who fought in the European Campaign, and to those who gave their lives to liberate France, Belgium, and Holland. “Hodie Non Cras”*. Sarnia’s “Calamity” tank has served as a tribute to the fighting soldiers of the First Hussars. “Calamity” is not the only memorial tank celebrating the regiment—for example, “Bold” remains in Normandy, and “Holy Roller” performs a similar service in London, Ontario.

- **THE FIRST HUSSARS:** In 1856 in London, Ontario, a group of settlers who had trained in cavalry skills formed an independent cavalry unit, the First London Volunteer Troop of Cavalry. It would amalgamate with several other troops including ones in St. Thomas, Courtright and Kingsville. It was deployed to meet the Fenian threat in 1866, and again in 1870, and would undergo several changes in title, including the 1st Regiment of Cavalry in 1872. In April 1892, the regiment was officially designated the **1st Hussars**. The 1st Hussars Regiment motto is “Hodie Non Cras” – Today Not Tomorrow.

During the Boer War, the 1st Hussars sent a contingent of officers and men to South Africa, and earned the Regiment’s first Battle Honour. Battle Honours are given to units that have displayed distinguished achievements during battle. During World War I, the 1st Hussars served as part of the **7th Canadian Mounted Rifles**, going overseas in June 1915. The soldiers fought with distinction, often seeing action dismounted as infantry. They were awarded thirteen additional Battle Honours for outstanding performance in battle, including at the Somme, Hindenburg Line, Arras, Vimy, Cambrai and Amiens. One of the more famous local members of the 1st Hussars from the Great War was Forest-born and Petrolia-raised George Stirrett. The Sarnia Armoury is named in his honour. Information on George Hunter Stirrett is on page 131.

Upon the outbreak of World War II, the 1st Hussars were the first Non-Permanent Militia to be mobilized, moving overseas in 1941 as part of the **5th Canadian Armoured Division**. Following training, the 1st Hussars were one of the units to take part in the Normandy Landing on D-Day. The tanks of the 1st Hussars were actually the only Allied force to reach their D-Day objectives. Following that, the Regiment took part in the bitter battles in the Normandy bridgehead, the closing of Falaise Gap, and clearing of the cross channel guns at Calais. The 1st Hussars fought with distinction through Belgium and Holland, ending the war in Germany. During this period, the 1st Hussars won 72 Decorations, Certificates, or Mentioned in Dispatches, more than any other unit in the 1st Canadian Army, and were awarded 20 additional Battle Honours for outstanding Bravery, including at Normandy, Falaise, Caen, Calais, The Rhineland, Apeldoorn and North West Europe. Members of the Gallant Hussars have served and continue to serve in peacekeeping missions around the world including in the Middle East, Bosnia, Kosovo, and Afghanistan with NATO and the United Nations.^{3G, 5R}

In 1964, as part of the larger London-based regiment, the 1st Hussars “C” Squadron was formed in Sarnia. The local squadron was based out of the federal building in downtown Sarnia until moving to the armoury in 1983. In late September 2019, as part of the 1st Hussars C Squadron 55th Anniversary weekend, a plaque was unveiled at the George Stirrett Armoury. The plaque, located beside a Cougar AVGP (armoured vehicle general purpose), tells the stories of the 1st Hussars “C” Squadron on D-Day and of the Cougar tank. Following is the plaque content:

1st Hussars “C” Squadron

On the sixth of June, 1944, the First Huusars were one of three Canadian Armoured Regiments to lead the assault on Juno Beach. 2 Troop, C Squadron, of the 1st Hussars, led by Lt. Bill McCormack, supported the Winnipeg Rifles in taking the French town of Creully and then pushed on to their objective, Secqueville-en-Bessin. In doing so, they became the only element of the Allied Seaborne assault forces to reach their objective. Finding themselves isolated without infantry or anti-tank support, they retraced their steps and rejoined the Regiment.

Cataraqui “The Story of”

Lt. McCormack’s tank was named “Cataraqui” and thus to honour the actions of 2 Troop, on the 6th of June,

we have named this Cougar “Cataragui” and affixed the same Tactical signs that would have been on his original Sherman Tank. Cougar AVGP’s were originally issued to the 1st Hussars in 1983 and were intended to be used by Primary Reserve, Armoured Units as a tank trainer. However, the vehicles were deployed to Bosnia-Herzegovina on a Peacekeeping Mission. They served the 1st Hussars Regiment well until they were retired in the year 2005.

• **FAMOUS CANADIANS THAT SERVED IN THE GREAT WAR:** More than 620,000 Canadians served in the First World War. Many of their names are forgotten to time, but some of this country’s soldiers later became famous for other feats, in the fields of government, medicine, sports, business and the arts to name a few. Following are just a few of these well-known Canadians that served with the Canadian Corps:

John Diefenbaker, Canada’s 13th Prime Minister; Lester B. Pearson, Canada’s 14th Prime Minister; Frederick Banting, co-discoverer of insulin; Charles Best, co-discoverer of insulin; Norman Bethune, famous physician; Grey Owl, Canadian conservationist; A.Y. Jackson, Group of Seven artist; Conn Smythe, built Maple Leaf Gardens; Dick Irvin, Montreal Canadiens Hall of Famer; Raymond Massey, Hollywood actor; Georges Vanier, first French-Canadian Governor General; Sam Steele, noted member of North West Mounted Police; Tom Longboat, long distance runner, see below; Gregory Clark, famous journalist; Sir William Stephenson, businessman, inventor, master spy in WWII, code named “Intrepid”; and 40 Hockey Hall of Fame inductees.^{2G, 5M}

There were six **Canadian Olympians** who fought in the First World War, five of them died while serving: Geoffrey Taylor won two bronze medals in rowing at London 1908, and later competed at Stockholm 1912. He was killed in action at the Second Battle of Ypres in April 1915; Percival Molson was a star athlete who won a Stanley Cup in 1897 with the Montreal Victorias, and competed in the 400 metres at St. Louis in 1904. He was killed in 1917 near Vimy Ridge; Robert Powell played in men’s tennis—singles and doubles—at London 1908. Lt. “Bobby” Powell died leading a charge at Vimy Ridge in 1917; Alex Decoteau competed in the men’s 5,000 metres at Stockholm 1912, placing 6th. He was killed at the Second Battle of Passchendaele in 1917; James Duffy competed at Stockholm 1912 in the marathon, placing 5th. He went on to win the Boston Marathon in 1914. He was killed a year later at Ypres, Belgium; and Tom Longboat competed in the marathon at 1908 London and was later inducted into Canada’s Sports Hall of Fame. He was the only Canadian Olympian to fight and survive the First World War.

• **THE MEMORIAL CUP:** Each year, the Sarnia Sting Major Junior A Hockey Club vies for an opportunity to challenge for the Memorial Cup. The Memorial Cup is the junior hockey club championship trophy awarded annually to the Canadian Hockey League champion. It is one of the oldest and most prestigious trophies in North American sport.

The idea to present such a trophy was brought forward by Captain James T. Sutherland, who was the president of the Ontario Hockey Association and who served overseas during the First World War. “*Many of the young men who headed overseas were more comfortable wielding a hockey stick than a rifle,*” he was quoted as saying. Captain Sutherland spoke of the splendid work done by Canadian boys in France and suggested the creation of a suitable memorial to hockey players who had fallen. Sutherland was also sparked by the World War One deaths of Allan ‘Scotty’ Davidson and George Richardson, two former hockey greats whom he coached when they played for the Kingston Frontenacs.

The trophy was originally known as the ‘OHA Memorial Cup’ and was donated by the Ontario Hockey Association in March of 1919, in remembrance of the many men and women who paid the supreme sacrifice for Canada in the First World War. The first Memorial Cup was awarded in 1919 to the University of Toronto team who defeated the Regina Patricia’s. What made that first championship game truly unforgettable was that it was delayed by nearly an hour-and-a-half. There were jubilant parades in Toronto the same day—for Canadian regiments just returning home from the First World War—and fans were late to their seats because of them. A more fitting start for the cup, named in honour of the Canadian soldiers who did not return, could not have been contrived. In 2010 the Memorial Cup was rededicated to the memory of all fallen Canadian military personnel.^{3B}

• **WORLD WAR I NUMBERS** – More than twenty nations were drawn into a war that would for more than four years be fought in Europe, East Africa, Macedonia, Mesopotamia (now Iraq), and the Dardanelles. World War I is also referred to as “The Great War” and, as British author **H.G. Wells** characterized it in August 1914, “**The War That Will End War**”, which over time shifted to become “the war to end all wars.”

World War I altered the nature of warfare and changed the landscape of the modern world. It employed new technologies, including poison gas, flamethrowers, warplanes, tanks, and submarines, which demonstrated an

unimaginable capacity for death and destruction.^{2K} Over the course of the Great War, an estimated 10 million soldiers were killed, another 15 to 20 million soldiers were wounded, and 8 million civilians died. World War I was slaughter on a scale that is almost incomprehensible.

For Canada, World War I was the bloodiest conflict in this nation's history. More Canadian soldiers died in World War I, than Canadians died in all the other wars combined. However through the great achievements of Canadian soldiers on the battlefields, the world witnessed "**the birth of a nation**", Canada. Also, the Canadian Corps was made up of men from all parts of the country, from all classes, religious affiliation and ethnic origin. Never before had there been anything to bring together this diverse collection of Canadians. This terrible war forged a new Canadian nationalism.

Approximately 620 000 men and women served in the Canadian Forces, and more than one of every ten who fought in the war did not return. Another 8,826 sailed with the Royal Canadian Navy and the British Royal Navy. Another 13,160 served as aircrew in the British flying services, plus 9,652 served as ground crew. Close to seven percent of the country's total population left Canada during the war years, which included an astonishing **twenty percent** of the total male population between the ages of eighteen and forty-five.^{4G, 9U}

Very few of the Canadians who served had previously been professional soldiers. Canada's army was largely an army of **citizen-soldiers**, from every corner of the nation and every walk of life. Of the 620 000 attested, approximately 425 000 served overseas as part of the Canadian Expeditionary Force. Of the Canadian men and women that served, over 61 000 gave their lives, as well as 1,300 Newfoundlanders, over 172,000 were wounded, and over 3,800 became prisoners of war. Of the 425,000 who travelled overseas in the land forces, only 345,000 Canadians ever made it to France. If the figure of 345,000 is used to represent those Canadians who fought in Europe, then at least 6.5 out of every 10, and likely closer to **7 out of every 10 soldiers**, serving on the Western Front were killed or wounded.^{4G, 5J}

More than 18,000 Canadians died in France or Belgium during the First World War and have **no known grave**, their bodies swallowed in the mud or dismembered in shellfire. For over 6,840 Canadian sons who fought in the Great War, their remains were never identified.

The **deadliest period** of World War I for Canada, and for Sarnia, occurred during the Last Hundred Days offensive, August 8 – November 11, 1918. In that three-month period, approximately 45,835 Canadians and Newfoundlanders were killed, wounded and missing, representing approximately 20 per cent of Canada's total wartime casualties.^{E, 4G, 5J} At least 33 Sarnians lost their lives during the Hundred Days Campaign.

After the war was over, between 1919 and 1921, some 6,000 additional Canadian veterans died as a result of the injuries of war. Historians are still struggling with the total death count of Canadians in the Great War. The Commonwealth War Graves Commission lists 64,962 fallen between August 4, 1914 to August 31, 1921. Canada's Books of Remembrance in the Peace Tower at the House of Commons in Ottawa contains 66,755 names of WWI Canadian fallen (its cut-off date was April 30, 1922). So the death figures range from 61,000 to 67,000, and from 62,300 to 68,600 if Newfoundlanders are included. The number of Canadian wounded ranges from 172,000 to 176,000.^{D, E, 2I, 2Q, 4G, 8H, 9U}

Of the 61,000+ Canadians who died in World War I, less than 3% **died in service with the air forces**. Of the 114 identified Sarnia WWI fallen included in this project, five of them lost their lives while serving with the Royal Flying Corps (4.3%). A generation later, in World War II, technological advances changed the methods by which war was fought, and close to 45% of Canada's war dead lost their lives in service with the Royal Canadian Air Force or the Royal Air Force.^{2B} Approximately 49% of Sarnia's World War II fallen lost their lives while serving with the Air Force.

Sarnia's population in 1914 was approximately 10,900. An estimated **1100 Sarnia men and women served** in the Great War. The Sarnia cenotaph has 112 names of World War I fallen inscribed on it. This *Sarnia War Remembrance Project* records 119 Sarnia World War I fallen soldiers (the identities of five names inscribed on the Sarnia cenotaph have yet to be identified).

Due to the nature of the Great War, it too common that the bodies of those killed were never recovered, or they were vapourized, shredded, eviscerated or destroyed beyond recognition. It was one more sad reality of this war, a tragic nightmare that family members back home had to cope with. The Commonwealth War Graves Commission notes that 49% of its 1,146,982 Great War soldiers have **no known graves**.^{4F} Of the 114 identified Sarnia fallen

soldiers included in this Project, 42 of them have no known graves (37%). For those young men from Sarnia with no known grave, their names are inscribed on war memorials including at Vimy Ridge, France (28 names); Menin Gate (Ypres), Belgium (9 names); Arras, France (3 names); and Halifax, Nova Scotia (2 names).

- **THE VICTORIA CROSS:** The British War Office established new gallantry medals during the course of the Great War, a way to single out the uncommonly courageous. These included the Military Medal (MM), the Military Cross (MC), the Distinguished Service Order (DSO), and the Distinguished Conduct Medal (DCM). The MM and DCM were given out to NCOs and other ranks, and the MC and DSO were reserved for officers.

The Victoria Cross (VC) was the highest-ranking award for bravery at that time, and could be issued to officers or the rank and file. It was awarded for most conspicuous bravery or some daring or pre-eminent act of valour or self-sacrifice or extreme devotion to duty in the presence of the enemy. Established by Queen Victoria in January 1856 during the Crimean War, it was a crimson ribbon with a simple bronze cross, made from cannons captured from the Russians during the Crimean War, inscribed with “For Valour.” The first one awarded to a Canadian was in February 1857, to **Lieutenant Alexander Dunn** (Charge of the Light Brigade). The last Canadian to earn a Victoria Cross was **Lieutenant Robert Hampton Gray**, a pilot whose posthumous award came for actions on August 9, 1945, when, under heavy fire, he led a Corsair attack on a Japanese destroyer, sinking it with a direct hit even as his aircraft burned. No crosses were awarded to Canadians during the war in Korea.

Of the total 98 Victoria Crosses awarded to Canadians over the last 150 years, seventy-two went to Canadians in the Great War. Of the seventy-two Canadians who were awarded the Victoria Cross in World War I, more than one-third were awarded posthumously, and twenty-seven of the recipients were awarded for their actions during Canada’s Last Hundred Days.

In an incredible phenomenon, three of the Canadian VC recipients in World War I were from the same street, a sleepy avenue on the outskirts of Winnipeg. Corporal Leo Clarke, Sergeant-Major Frederick William Hall and Lieutenant Robert Shankland had all lived on Pine Street in Winnipeg. Of these three Victoria Cross recipients from Pine Street, only Robert Shankland survived the war. In 1925, as a way to honour the bravery and sacrifice of these men, the City of Winnipeg renamed the street **Valour Road**. It reminds Canadians that ordinary men from small towns across the nation, can do and did extraordinary things for their country.^{4E, 4G, 7R, 9U}

The British decoration was eliminated in Canada when Ottawa began overhauling the Canadian honours system in 1972. In February 1993, a Canadian version of the award was created – the **Canadian Victoria Cross**, with the same criteria as the original British decoration. The first Canadian Victoria Cross was manufactured in 2007, and unveiled at Rideau Hall in Ottawa in May 2008. The Canadian VC is cast from some of the bronze from the Crimean War captured Russian cannons, donated by Queen Elizabeth II, as well as metal from the 1967 Confederation Medal, and metal from each of Canada’s regions. The inscription borne on the medal is the Latin phrase “PRO VALORE”, replacing the British insignia, “For Valour.” Not one Canadian VC has been awarded since the Canadian version was created, despite a number of heroic individual actions by Canadians in Afghanistan.

- **SARNIA’S OLD HOME WEEK, 1925:** During the third week of July in 1925, the City of Sarnia held its “Old Home Week” celebrations. One of the events during the week-long celebrations was a Drumhead Service held on a Sunday afternoon at Victoria Park in Sarnia. A notable part of this event was a military parade of soldiers and ex-servicemen. Ex-servicemen in the parade included a handful of grey-haired veterans of the Fenian Raids and North West Rebellion under Sarnia’s veteran magistrate Major Henry Gorman, as well as veterans of the South African War and the “youthful” heroes of the Great War.

The Fenian Raid (1866) veterans were Henry Gorman, Don J. Finch, W.W. Finch, Rich Causley, W.S. Percival, J. Hoskins and Andrew Logan. Northwest Rebellion (1882-5) veterans included Charles Finch, David W. Finch, James Spurway, and T.J. Walker. Following is a portion of the report from the *Sarnia (Canadian) Observer*: *How they held up their heads as they marched with the younger men these loyal citizens of long ago and even men who faced the horrors of modern warfare in 1914-18 must have experienced a thrill of pride as this little band displaying medals with unfamiliar ribbons kept pace with them.*

Veterans of the South African war were under command of Major Fred Gorman; and veterans of the Great War included details of the 1st, 18th, 34th and 70th Battalions, under command of Major N.L. LeSueur; members of the 149th Lambton Battalion under Lt.-Col. MacVicar; the 27th Lambton’s Battalion under Lt.-Col. C.S. Woodrow; ex-imperial army and navy veterans under Col. A. Rowland Davies, D.S.O.; and No. 2 Company 2nd Canadian

Machine Gun Battalion under Major George Lucas. The parade was under command of Col. Robert MacKenzie. The Windsor Salvation Army band led the march, and the Machine Gun pipe band was also in the parade. Hundreds of people attended the service in Victoria Park, which opened with the singing of “The Maple Leaf Forever” and “Onward Christian Soldiers.” Rev. Canon D.W. Collins then read a psalm and prayers before addressing the gathering with a stirring address touching on companionship and spirit. In speaking about the soldiers and ex-soldiers, he said, *“Their companionship, rich in its recollections of stirring events when they fought together and won or lost, was higher than a mere companionship. It was a companionship that should be and was cherished. I believe we have the greatest force for the preservation of peace in the world and also that we have the highest form of civilization in the world today.”*

• **REMEMBRANCE DAY:** Until 1931, Remembrance Day was known as **Armistice Day**. The **first** Armistice Day, declared by King George V to be a day to remember all those who had made the supreme sacrifice in service to their country, took place throughout the Commonwealth on November 11, 1919. Days earlier, King George V had said to the world, *“... at the hour when the armistice came into force, the eleventh hour of the eleventh day of the eleventh month, there may be (a moment) of two minutes... (so that)... the thoughts of every one may be concentrated on reverent remembrance of the glorious dead.”*

In 1920, Armistice Day was also held on November 11th. After that, the Canadian government decided that Armistice Day would be celebrated on the same day as Thanksgiving Day, which would take place on the Monday of the week in which November 11 fell. For many, having Thanksgiving Day, a day of festivities and celebrating the “bountiful harvest”, and Remembrance Day, a time of commemoration, meditation and solemn ceremonies at cenotaphs, on the same day was not a popular decision. Following a decade of lobbying by veteran’s organizations, the government amended the Armistice Act in March 1931, renaming Armistice Day to Remembrance Day. The Act also ensured that from that year on, it would always be on November 11, the anniversary of the day the First World War ended, when the guns fell silent, on the 11th hour of the 11th day of the 11th month.

A central element in the Remembrance Day ceremony is the **Two Minutes of Silence** at precisely 11:00 a.m. The two minutes of silence tribute was adopted after the First World War to commemorate those who fought and those who died in battle. It was adopted in 1919 when King George V issued his proclamation. The Two Minutes is preceded by the playing of *O Canada* and the *Last Post*. Originally known as *Setting the Watch*, the mournful bugle melody was used to signify to soldiers that the camp’s perimeter had been secured for the night, or it indicated the end of the day’s duties. In the 19th century, buglers began playing it at funerals to signify the end of life’s duties. In 1873 it was renamed *The Last Post*.

The two minutes of silence is a time of reflection, where Canadians pause to honour, thank and remember our fallen. The end of the silence is signaled by the playing of a lament, the bugling of *The Rouse* and the reading of the *Act of Remembrance* (from “For the Fallen”, Laurence Binyon) *The Rouse* was once played by bugle (or trumpet) to get soldiers out of bed. At remembrance services, it represents the dead awakening to a better world and is a call to the living to return to their duties.

The Act of Remembrance
They shall grow not old, as we that are left grow old;
Age shall not weary them, nor the years condemn.
At the going down of the sun and in the morning
We will remember them.

• **THE RED POPPY:** The poppy has been widely recognized internationally as a **symbol of Remembrance**. The first person to use the poppy as a symbol of remembrance was an American teacher, Moina Michael, a member of the American overseas YMCA in the last year of the Great War. After reading John McCrae’s 1915 poem *In Flanders Fields*, she was so moved that she pledged to keep the faith and always wear a red poppy of Flanders Fields as a sign of remembrance of all who died. She led a successful campaign to have the American Legion recognize the poppy as the official symbol of remembrance in April 1920.

At the same time, Madame Anne Guerin of France, who was also inspired by John McCrae’s poem, became a vigorous advocate of the poppy as the symbol of remembrance for war dead. Her own organization, the American and French Children’s League, sold cloth copies of the flower following the war to help raise money for the orphaned children in war-devastated areas in Europe. In 1921, Madame Guerin travelled to Britain and Canada, and convinced both the recently formed British Legion and the Canadian Great War Veterans Association to adopt the poppy as

their symbol of remembrance. Canada adopted the poppy as its national flower of Remembrance on July 5, 1921. In Canada, wounded veterans started making poppies in 1922. Other versions were made, but Canadians were urged to purchase veteran-made ones as a “true memorial.” Britain and Australia also adopted the poppy in 1921. New Zealand and the United States adopted the poppy symbol in 1922.^{21, 11C}

The **wearing of a poppy** prior to and including Remembrance Day is a visual pledge to never forget those Canadians who have fallen in war and military operations. It is a way to demonstrate our gratitude to those who gave their lives for the freedoms we enjoy. Funds raised during the **Poppy Campaign** each year are used to provide immediate assistance to ex-servicemen and women in need. Funds are also used for educational bursaries, medical research and training, donations for disaster relief, and community medical appliances, to name a few.

- **THE PEACE TOWER:** Also known as the Tower of Victory and Peace, it is the dominant feature on Parliament Hill in Ottawa. It is the freestanding tower connected to the Centre Block of the Canadian parliament buildings. Nearly 98-metres in height, it features the Peace Tower clock, Peace Tower carillon (53 bells), and a copper-covered apex that is topped with the Canadian flag. It is also adorned with approximately 370 stone carvings, most depicting Canadian flora, fauna and historical elements. The Peace Tower is dedicated to all Canadian men and women killed during wartime and the peace which they died to achieve.

It is the second tower to stand on this site – the first was the 60-metre tall Victoria Tower, completed in 1878. It crumbled to the ground during a fire that destroyed most of the Parliament Buildings in 1916. Reconstruction of the destroyed section began almost immediately, as the First World War raged in Europe. When dedicating the new tower’s building site in July 1917, Prime Minister Robert Borden reminded the country of the need for peace: “*(the tower will be a) memorial to the debt of our forefathers and to the valour of those Canadians who, in the Great War, fought for the liberties of Canada, of the Empire, and of humanity.*” Two years later, on September 1, 1919, the Prince of Wales laid the cornerstone of the tower and designated it “The Tower of Victory and Peace.” The inauguration of the then named “Peace Tower” took place on July 1, 1927, the Diamond Jubilee (60th anniversary) of Canadian Confederation.

Located within the heart of the Peace Tower is the **Memorial Chamber**, built as a tribute to the Canadians who lost their lives during the First World War. The walls of the Chamber display many stone carvings depicting the symbolic history of the Great War, and stained glass windows of heraldic symbolism soar on three walls. The floor is inlaid stone brought from various battlefields in France and Belgium, and laid in the form of a cross. Brass plates in the floor inscribed with the names of major WWI battles, such as the Somme and Passchendaele, were hand-crafted from spent shell casings from the war. The stone walls in the Chamber were originally to have been inscribed with the names of all Canadian war dead – but as the First World War’s death toll mounted, it was realized that there were just too many names. The solution was to create a resting place for the names within carefully crafted books, handwritten on vellum parchment.

The centerpiece of the Chamber is a massive stone central altar that is surrounded by seven altars made of stone and bronze. Each altar holds one of the eight **Books of Remembrance** that together contain the names of more than 118,000 Canadians who fought and made the ultimate sacrifice in the service of Canada. The main altar, resting on steps made of stone quarried from Flanders, holds the *The First World War Book of Remembrance* (66,600+ names). Seven other Books of Remembrance are displayed open in glass cases on the other altars; *The Second World War Book of Remembrance* (44,800+ names), *The South African War-Nile Expedition Book of Remembrance* (almost 300 names), *The Korean War Book of Remembrance* (516 names), *The Newfoundland Book of Remembrance* (2,300+ names), *The Merchant Navy Book of Remembrance* (2,100+ names), *In the Service of Canada Book of Remembrance* (1,800+ names), and a *War of 1812 Book of Remembrance* (1,600+ names).^{D, 3G} (see page 1121)

- **THE NATIONAL WAR MEMORIAL:** Following World War I, there was a strong sentiment in Canada that a memorial should be erected to those who had served their country in that war. In 1925, a worldwide competition was held to choose a design for a national commemorative war monument to be erected in the capital of Canada. Open to architects, sculptors and artists, the monument was to be “expressive of the feelings of the Canadian people as a whole, to the memory of those who participated in the Great War and lost their lives in the service of humanity”. The competition regulations further stipulated that the vision which the government wished to keep alive was “the spirit of heroism, the spirit of self-sacrifice, the spirit of all that is noble and great that was exemplified in the lives of those sacrificed in the Great War, and the services rendered by the men and women who went overseas”.

In January 1926, the Board of Assessors selected the model submitted by sculptor Vernon March of Farnborough, Kent, England, his theme was "the Great Response of Canada". His concept was of a monument that in no way glorified war or victory; rather, it was intended to commemorate the events of 1914-1918 on a more human scale. It took thirteen years from the time the memorial's concept was approved until it was unveiled, and March, unfortunately, was unable to see the project to its completion; he died of pneumonia in 1930.

The impressive structure includes 22 uniformed bronze figures from all services marching through a granite archway. Included are infantrymen, a mounted cavalryman, a mounted artilleryman, an aviator, a sailor, a sapper, a forester, a stretcher-bearer and nurses, among others. Overhead are two winged figures representing Peace and Freedom. The National War Memorial, named "**The Response**," was officially unveiled in downtown Ottawa by His Majesty King George VI and Queen Elizabeth at eleven o'clock on the morning of Sunday, May 21, 1939, before an estimated 100,000 persons who gathered to witness the ceremony. Sadly and ironically, less than four months later, World War II would begin. ^{D, 2N, 5M}

Over the years, the monument came to symbolize Canada's involvement in all wars of the 20th century and the dates of the Second World War (1939-1945) and the Korean War (1950-1953) were added. In 2014, the dates of the South African War (1899-1902) and the mission in Afghanistan (2001-2014) were added. A plaque was also added to honour **Corporal Nathan Cirillo** who was killed while standing as a sentry on October 22, 2014.

• **THE CANADIAN TOMB OF THE UNKNOWN SOLDIER:** This monument is located at the National War Memorial in Confederation Square, Ottawa. The Tomb of the Unknown Soldier was added to the war memorial in the year 2000. The Tomb holds the remains of an unidentified Canadian soldier who died near Vimy Ridge, France during World War I. The Tomb is positioned directly in the line of sight of the foremost soldier advancing through the arch in the National War Memorial. The tomb's only inscription reads, "The Unknown Soldier" in English and "Le Soldat inconnu" in French. Each year hundreds of thousands of Canadians continue to visit the Tomb of the Unknown Soldier and pay their respects.

On the second Armistice Day, November 11, 1920, the British buried one of their unknown soldiers at Westminster Abbey in London, England. Known as the "Unknown Warrior", he represented 908,000 dead from Britain and its empire, including Canada. The original entombing ceremony, presided over by King George V, had included many of the British Empire's Victoria Cross winners, and a group of one hundred women, each of whom had lost their husband or sons during the war. Eleanor Watson was one Canadian mother whose son had been killed in the war and lay buried with no known grave. Years later when she visited the Westminster Abbey Unknown Warrior tomb, she confided in her diary that she was moved by "a wonderful feeling and I suppose each of us thought that 'he' may have been our dear 'missing one'".

France and the United States followed Great Britain's example in 1921, as did numerous other countries in subsequent years. In 1993, Australia marked the 75th anniversary of the end of the First World War by repatriating from France the remains of its Unknown Soldier, the first Commonwealth country to have done so since 1920. He was buried in the Australian War Memorial's Hall of Memory in Canberra. In 1996, Canadian officials and the Royal Canadian Legion worked with the Commonwealth War Graves Commission to bring home one of Canada's unknown soldiers.

The selected Canadian fallen soldier was one formerly buried in Cabaret-Rouge British Cemetery in Souchez, France, near the memorial at Vimy Ridge. It was selected among the over 1,603 graves of unknown Canadians buried in that cemetery, killed between 1916 and 1918, most of whom fell during the April 1917 Vimy battle. In total, there were 6,846 Canadian sons who fought in the First World War whose remains were never identified, their bodies so badly mangled in battle that in death they could not be identified. Carved into their headstones are the words "A CANADIAN SOLDIER OF THE GREAT WAR – KNOWN UNTO GOD".

On May 25, 2000, the remains of the nameless Canadian fallen soldier were disinterred from Plot 8, Row E, Grave 7, and laid to rest in a casket of silver-maple wood. The body was taken to Vimy Ridge for a ritual service and then flown in a Canadian Forces aircraft to Ottawa, accompanied by a guard of honour, a chaplain, Royal Canadian Legion veterans, and representatives of Canadian youth. From May 25 to 28, an estimated 15,000 Canadians silently passed by the soldier who lay in state in the Memorial Chamber of the Peace Tower.

On the afternoon of May 28, 2000, the casket was transported to the National War Memorial by a horse-drawn carriage in a funeral procession accompanied by the Governor General Adrienne Clarkson, Prime Minister

Jean Chretien, veterans, Canadian Forces personnel and members of the RCMP. More than 20,000 Canadians attended the internment ceremony, while Canadians could watch the nationally televised event. The tomb consists of a dark granite sarcophagus enclosing the casket containing the remains of the Unknown Soldier. The remains are surrounded by soil from the original grave in France as well as from all the Canadian provinces and territories. A bronze relief sculpture atop the sarcophagus includes a medieval sword, a World War I helmet, and branches of maple and laurel leaves. Grand Chief Howard Anderson laid a golden eagle feather upon the soil, a symbol of a strength and loyalty among First Nation warriors. A 100-year-old Canadian Great War veteran, and a Victoria Cross recipient from the Second World War then read poet Laurence Binyon's words, "At the going down of the sun, and in the morning, we will remember them."^{D, 2I, 2N, 8H}

At the first Remembrance Day following the tomb's installation, a new tradition of respect formed spontaneously as attendees placed their poppies on the tomb at the conclusion of National Remembrance Ceremony. Now a widely practiced tradition, others leave small Canadian flags, cut flowers, photographs, or letters to the deceased. The tomb honours more than 118,000 Canadians who have sacrificed their lives in the cause of peace and freedom, including about 28,000 soldiers whose resting place is unknown.^{D, 2I, 4H, 8H}

- **NATIONAL HISTORIC SITES OF CANADA:** These are places that have been designated by the federal Minister of the Environment on the advice of the Historic Sites and Monuments Board of Canada (HSMBC), as being of national historic significance. There are over 975 designated National Historic Sites located all across the provinces and territories of this country. Only two of these national sites are located outside of Canada. In 1997, the HSMBC designated two battlefields and monuments in France as National Historic Sites: the **Beaumont-Hamel National Historic Site of Canada**, commemorating the 1st Newfoundland Regiment's bravery and sacrifice at the Battle of the Somme on July 1, 1916 at the Battle of the Somme; and the **Vimy Ridge National Historic Site of Canada**, commemorating Canada's accomplishment, contributions and sacrifice in the First World War.^{8I}

- **CANADA'S LAST WORLD WAR I VETERAN:** Canada's last known First World War veteran was **John "Jack" Babcock**. He was born on a farm in Frontenac County (near Kingston), Ontario in July 1900 as part of a family of 13 children. When he was six years old, he lost his father in a tree-cutting accident. Impressed by the salary of \$1.10 a day and two recruiting officers who quoted the poem "The Charge of the Light Brigade," fifteen year-old John Babcock first joined the army in Sydenham, Ontario, with the 146th Battalion, Canadian Expeditionary Force. He was sent to Valcartier, Quebec where they discovered he was underage. He was turned down, but managed to get to Wellington Barracks in Halifax where he dug ditches and loaded freight on army trucks. When he was sixteen years old, lying about his age (he claimed he was eighteen), he was able to volunteer for the Royal Canadian Regiment. Arriving in England a few months later, officials discovered he was only 16 so he wasn't allowed to go to the front. So in August 1917, Babcock was sent to the Boys (Young Soldiers) Battalion – 1,300 young soldiers doing endless military drills and digging ditches until they were old enough to fight the Germans. The war ended a few months after Babcock's 18th birthday, so he never saw front-line action.

In the 1920's, with relatives in the United States, he moved there and would serve in the U.S. Army from 1921 to 1924. At the time, dual citizenship was not allowed, so he had to give up his Canadian ties. He became an electrician and worked in the oil and natural gas business before operating his own business as a mechanical contractor. Later, he worked for his son's waterworks equipment wholesale business and did not retire until he was 87. His first marriage lasted 45 years, his second 33 years. He took up flying at age sixty-five and earned his high school diploma at age ninety-five.

In 2007, Babcock became the last known Canadian veteran of the First World War. He was proud, though a little uncomfortable being known as the last surviving veteran. Babcock was of the opinion that, "they should commemorate all of the fellows who spent time in the front lines and were actually in the fighting, instead of just one." Reflecting on his WWI experience, he never felt like a "real soldier", referring to himself as a "tin soldier". He said, "I think if I had a chance, I would have gone to France, taken my chances like the rest of them did. A lot of good men got killed." In 2008, Babcock asked for and was granted his Canadian citizenship back. His wife Dorothy said, "Jack loved Canada, his heart was there." John Babcock would later say, "I think it would be nice if all the different people in the world could get along together so we weren't having wars. I don't suppose that'll ever happen, though."

In 2009, **Sarnia city firefighters** were busy gathering gifts of clothing, coffee and other treats for Canadian soldiers in Afghanistan. The idea of honouring Canada's last living First World War veteran seemed a fitting

extension of the program. Sarnia firefighter Kevin McHarg travelled to Spokane, Washington (where John Babcock was residing) several times to meet with him, to chat, and present gifts including a Sarnia Sting jersey and a white fire helmet designating “Private Babcock” as honorary chief of the Sarnia fire department.^z

John Babcock passed away on February 18, 2010, at the age of 109. Ever conscious of not actually serving at the front, he did not feel the need to be honoured with a state funeral as suggested by Canadian officials. On April 9, 2010, on the anniversary of the Battle of Vimy Ridge, Queen Elizabeth II, issued a statement marking the two events, stating: “As proud and grateful Canadians, we pause today to mark not only the ninety-third anniversary of this Nation's victory at Vimy Ridge but also to pay tribute to the passing of a truly remarkable generation who helped to end the most terrible conflict the world had ever known... And now, they are all gone – and all Canadians mourn our collective loss. Yet they will remain forever etched in the hearts of a grateful people and on the pages of our history as symbols of service, honour and dedication.”^{D, 2N, 7S, 8J}

• **SARNIA’S WORLD WAR I TREES OF REMEMBRANCE MEMORIAL:** In November 2013, local Beavers, Cubs and Scouts from troops across Sarnia planted trees of Remembrance in Heritage Park, Sarnia. The project was undertaken by Scouts Canada–Bluewater area, and was completed with the cooperation of the City of Sarnia, and with generous assistance of Enbridge Pipelines, Sun Life Financial, the Sarnia Horticultural Society and Union Gas.

There are 102 Autumn Blaze maple trees planted in the park, one tree for each fallen soldier listed on the World War I section of the Sarnia Cenotaph*. The trees in the living memorial are planted in the formation of a cross. In November 2014, local Cubs, Beavers and Scouts held a dedication ceremony in the park, unveiling a plaque commemorating the Scouts “**Trees of Remembrance Project**”. The plaque reads; “*These one hundred and two trees were planted to honour the memory of the soldiers from Sarnia who fought in World War I, and in particular the memory of the 102 soldiers from this community who died in battle – one tree for each fallen soldier.*” The names and information on the World War I Trees of Remembrance Memorial plaque are included on page 1168.

*Note: In 2019, ten new names were added to the World War I section of the Sarnia cenotaph.

• **FOUND SARNIA HONOUR ROLL:** In the spring of 2015, Roslyn Green, a young lady residing in Toronto, came across two World War I honour rolls on a curbside in that city destined for the trash. She decided to salvage the rolls to give to her boyfriend. She also carried out some research on the names on the roll, and through the on-line version of this *Sarnia War Remembrance Project*, discovered that they had a link to Sarnia.

Roslyn then contacted Ron RealeSmith of the Sarnia Historical Society. Ron RealeSmith along with Randy Evans then worked together to uncover the history behind the rolls. They discovered that the honour rolls were linked to either Parker Street United Church (it became Dunlop United) or Devine Street Methodist Church in Sarnia. Through the graciousness of Roslyn Green, she desired that the honour rolls should be returned to Sarnia. Ron RealeSmith travelled to Toronto to retrieve the rolls and he returned them to Sarnia in March 2016. The decision was made to donate them to the Sarnia Armoury where they would be cared for and available for public viewing. The names on the two found honour rolls are included in this Project on page 1172.

• **PETER MANSBRIDGE REFLECTS:** When people describe their experiences after touring World War I battlefield sites, following in the footsteps of those who served, or visiting the military cemeteries and memorials throughout France and Belgium, they use words like educational, contemplative, emotional, reflective, memorable and deeply moving.

In 2014, Peter Mansbridge, former CBC News correspondent and the recipient of the Officer of the Order of Canada, wrote of his visit to the overseas war cemeteries:

If you visit the cemeteries of France and Belgium where Canadians are buried, you’re confronted by rows of gleaming white headstones. They are arranged beautifully. Visitors are appropriately quiet. They whisper as they walk. The peacefulness is in complete contrast to the way these men lived and died during the war. The cemeteries have the power to overwhelm our emotions. They bring us closer to those who were killed. But it’s only when you start reading the individual inscriptions on the tombstones that you understand the intimacy of the loss. Suddenly, the dead aren’t just soldiers. They’re sons, brothers, fathers, husbands. And they’re so young. Some are teenagers. It’s rare to find someone as old as thirty-five or forty.

There’s a maple leaf on every Canadian headstone. So no matter what else they were, these dead were part of us... They forfeited love, children, walking in the park, seeing a hockey game, reading books, suppers around the kitchen table, playing charades in the parlour.^{6E}

A Working Party

*Three hours ago he blundered up the trench,
Sliding and poising, groping with his boots;
Sometimes he tripped and lurched against the walls
With hands that pawed the sodden bags of chalk.
He couldn't see the man who walked in front;
Only he heard the drum and rattle of feet
Stepping along barred trench boards, often splashing
Wretchedly where the sludge was ankle-deep.*

*Voices would grunt "Keep to your right—make way!"
When squeezing past some men from the front-line:
White faces peered, puffing a point of red;
Candles and braziers glinted through the chinks
And curtain-flaps of dug-outs; then the gloom
Swallowed his sense of sight; he stooped and swore
Because a sagging wire had caught his neck.*

*A flare went up; the shining whiteness spread
And flickered upward, showing nimble rats
And mounds of glimmering sand-bags, bleached with rain;
Then the slow silver moment died in dark.
The wind came posting by with chilly gusts
And buffeting at corners, piping thin.
And dreary through the crannies; rifle-shots
Wood split and crack and sing along the night,
And shells came calmly through the drizzling air
To burst with hollow bang below the hill.*

*Three hours ago he stumbled up the trench;
Now he will never walk that road again:
He must be carried back, a jolting lump
Beyond all need of tenderness and care.*

*He was a young man with a meagre wife
And two small children in a Midland town;
He showed their photographs to all his mates,
And they considered him a decent chap
Who did his work and hadn't much to say,
And always laughed at other people's jokes
Because he hadn't any of his own.*

*That night when he was busy at his job
Of piling bags along the parapet,
He thought how slow time went, stamping his feet
And blowing on his fingers, pinched with cold.
He thought of getting back by half-past twelve,
And tot of rum to send him warm to sleep
In draughty dug-out frowsty with the fumes
Of coke, and full of snoring weary men.*

*He pushed another bag along the top,
Craning his body outward; then a flare
Gave one white glimpse of No Man's Land and wire;
And as he dropped his head the instant split
His startled life with lead, and all went out.*

*By Siegfried Sassoon
1918*

BIOGRAPHIES OF SARNIA'S WORLD WAR I FALLEN SOLDIERS

ACKERMAN, Ralph Louis (#602916)

In a letter to his father in January 1917, Ralph Louis Ackerman mentioned that front line action *has a fellow a little scared the first time in, but you soon get used to it and don't pay any attention to all the bullets whistling and zipping round you*. Months later during a front line attack on Hill 70, Private Ackerman, 25, was killed, his body never recovered.

He was born in Sarnia on November 16, 1891, the son of Wilbert Albert and Jane Elizabeth (nee Malcolm, born June 1859 in Hamilton, Scotland) Ackerman. Wilbert Albert and Jane Elizabeth Ackerman were married on October 14, 1885 in Norwood, near Peterborough, Ontario. To support his family, Wilbert worked for the Grand Trunk Railroad, first as a railway brakeman and later a conductor. The Ackermans had four children together: Florence Annetta (born March 22, 1888); Clarence Franklin (born September 24, 1890); Ralph (1891) and George A. (born in 1908). The older children grew up in Point Edward, but the family moved later to 390 Russell Street, Sarnia.

Ralph's sister Florence Annetta married Albert Ernest Chambers (from Cobalt, Ontario) on March 31, 1909 in Sarnia. Two years later, Albert (a barber) and Annetta Chambers were residing at 132 College Street (they later moved to 146 Mitton Street). Albert and Florence Annetta would have a son, Harold Wilbert Chambers, born October 28, 1911, a nephew for Ralph Ackerman. Harold Wilbert Chambers would go on to graduate from Sarnia Collegiate, and enter the military, becoming a Captain in the Royal Canadian Army Pay Corps (RCAPC).

Little is known about Ralph's early life, but his family dynamic changed drastically when his mother Jane passed away on August 19, 1912 in Sarnia at the age of 53. George, the youngest Ackerman child, lost his mother when he was only four. Years later, widowed father Wilbert remarried a widow, Mary Evelyn McLean in Sarnia on August 29, 1916.

Ralph's life also changed dramatically when, at age 23, he enlisted in the Canadian Over-Seas Expeditionary Force on August 16, 1915 in Sarnia. Joining the 34th Battalion, he stood five feet eight and one-half inches tall, had blue eyes and red hair, was single, and recorded his trade or calling as switchman (railway). He listed his father Wilbert of 390 Russell Street as his next-of-kin.

Ralph Ackerman embarked overseas on October 23, 1915 with the 34th Battalion aboard the *S.S. California* and arrived in England on November 1, 1915. He trained at various English camps that included Aldershot, Bramshott and Shorncliffe and on February 3, 1916 at Bramshott, Ralph became a member of the 23rd Reserve Battalion.

On May 25, 1916, he was transferred to the Canadian Army Infantry, British Columbia Regiment, 7th Battalion. The next day, he arrived in France with the 7th Battalion and twelve days later, on June 7, 1916, he was in the field. During his time in France, Ralph wrote a number of letters home. The following are portions of a few of them:

To his sister Mrs. Albert Ernest Chambers (Florence Annetta), living on North Mitton Street, on July 10th, 1916:
Somewhere in France

Dear Sister,

Just a line or two to let you know that I am well and hoping this letter finds you the same. We are having lovely weather over here now and the roads are pretty dry. I had a letter from Dad just before we went into the trenches the last time. I met Andy McIntosh and a bunch of the 70th boys the other day. They had not been in the trenches, but expected to go in soon. It has a fellow a little scared the first time in, but you soon get used to it and don't pay any attention to all the bullets whistling and zipping round you. I have certainly seen some interesting sights since being over here, and if I get back safe and sound will tell you all about it.... Say, don't send me any tobacco, for we get all we can use issued to us. We get it in the trenches just the same as when we are out. We also have our mail delivered to the trenches. I suppose it is pretty quiet around town now. I have certainly met a lot of fellows from home here. I met Charlie Warren the other night. He was in the hospital with fever the same time as myself.... I have got a big bunch of German souvenirs. I would like you to see them. There are lots of them to be had, but I don't bother with them much. I suppose Harold is growing like a weed. There is hardly any need of money over here. We get fifteen francs every two weeks, and we don't even have to buy tobacco with it. Well Sis, I guess I have told you all the news for this time so will sign off.

From your loving brother, Ralph

Ralph wrote Florence two letters in August 1916 from "Somewhere in France". Portion of these letters read as follows:

Dear Sister,

Just a line or two to let you know that I am well and hoping that this letter finds you the same. I received your letter today and am answering it right back... The trenches are nice and dry and I have been on "listening post" every time I have been in the trenches. It is a pretty good job, and exciting at times. You have to go out in "No Man's Land" and lay and listen and watch for "Fritz." You have lots of bullets and rifle grenades flying around, but you soon get used to them. I was out one night and I had a fellow with me who was not on it before with me. It was certainly a lively experience for the beginner. We spotted three "Fritzs" working on their wire entanglements. They were about fifty yards from me. You could see them quite plain, but were a little too far away to toss a bomb at, and our scouts were out patrolling. I didn't dare take a chance at bagging them. I was out another night when the trenches were only 40 yards apart. I was out pretty close to them on this occasion. You could hear them talking in their trenches quite plain... Fritz has a shell they call a sausage. They are about three feet long, and are awful high explosives. You can see them coming through the air and can generally get out of the way of them. They make an awful noise when they explode. But we have just as good, and a lot better explosives than he has though, and can always give him twice the amount he serves us...

In his second letter, Ralph, in his matter-of-fact way, gives more details about the dangers of life on the front lines.

Dear Sister,

We have been having nice weather over here. It has been pretty dry. The farmers are all busy cutting their crops. It seems funny to see them cutting grain just a few miles from the firing line... It is pretty near three months now since I landed here. It doesn't seem that long, but I have had some warm times in that period, and I suppose, will have warmer yet before it is through. We had a mine sprung on our line just recently, a big one too. I thought Fritz was going to send a bunch of our boys up in the air, but we came out lucky. A mine is a tunnel dug under the ground. They generally dig right under the trench and fill it up with high explosives. When it goes off, you would think it was an earthquake the way it shakes the ground. The one he sprung on us was thirty feet deep. I was just a little way from it... We have lots of straw to lay on, and lots of lice and rats for company. The latter are pretty thick.

Ralph

At his Russell Street home, Wilbert Ackerman heard from his son, still "somewhere in France", in January 1917.

Dear Dad,

It is a beautiful spring day here today, but I suppose you have lots of snow at home. We have been having pretty good weather lately, but pretty cold. We sure had some Christmas dinner. We were pretty lucky this year. This is a list of the few things we had for Christmas, so you can imagine if we enjoyed it or not: roast beef, roast pork, mince pie, fried potatoes, cabbage, water cress, nuts, apples, oranges and a lot more stuff... We had a pretty good time before the day was over. Christmas only comes once a year, and we sure made it a merry one. There are about 40 of us in the bombers and we got our own dinner up. Our officer helped us out a lot. He is an awful nice fellow... Say Dad, I could write a book about France now and what I have seen. I've witnessed some sights that some people would give thousands of dollars to see. I have had the pleasure of seeing some nice air duels, only one time, our pilot came out second best, being forced to land in our lines, but the pilot himself was not hurt. Another time an enemy airplane started to fall after a battle with one of our aviators, and his gasoline tank exploded and he came down in one big flame. The pilot was burned so bad that you could not recognize him. He fell within a few feet of where we were stationed. In an attack one day in which I participated, we were accompanied by two tanks. It was a great sight to see them go after Fritz.

PS. Believe me dad, if I am spared to come home, I will have lots to tell you.

Ralph

Ralph's letters may have minimized the dangers all around him, but they were very real as he soon discovered. On September 27, 1916, he was admitted to No. 5 Canadian Field Ambulance for shell shock. He would be out of the front line action for two weeks before rejoining his unit on October 11, 1916. In late January 1917, he was admitted to No. 23 Casualty Clearing Station due to impetigo, a highly infectious skin disease caused by bacteria. He was transported to No. 20 General Hospital in Camiers on February 1, 1917 where he was again diagnosed with impetigo, and then six days later to No. 26 General Hospital in Etaples for further treatment of skin disease. On February 13, 1917, he was discharged to Base Details Camp at Etaples, diagnosed with impetigo.

Private Ackerman rejoined his unit on March 1, 1917, but he wasn't with them for long. On April 10, 1917, he was admitted to No. 8 Station Hospital at Wimereaux as a result of a "gun shot wound to the scalp, slight". The

next day he was moved to No. 1 Convalescent Depot in Boulogne. Three days later, on April 14, 1917, he was discharged to Base Details Camp at Boulogne. Two weeks later, on April 28, 1917, he rejoined his unit in the field.

In mid-August, 1917, the 7th Battalion was in the vicinity of Lens, and would take part in the second-largest Canadian military undertaking up to that point in the war, second only to Vimy. The **Attack on Hill 70 and Lens** in France (August 15-25, 1917) was the first major battle orchestrated by Canadian commander Lieutenant-General Arthur Currie and the first time German forces first used flame-throwers and mustard gas against the Canadians. Known as “Canada’s forgotten battle of the First World War”, the Canadians were able to capture Hill 70 but not the city of Lens, at a cost of approximately 9,100 Canadians listed as killed, wounded or missing.

On August 15 near Loos, the attack began at 4:25 a.m. The first objective was captured with fairly light casualties, but enemy fire became heavier as the battalion advanced, with very heavy machine-gun fire and active sniping troops. The battalion advanced shell hole to shell hole toward their final objective, but outflanked by the enemy and enfiladed from the right, the unit withdrew to the intermediate objective and consolidated. It was on August 15, 1917, that Private Ralph Ackerman was reported “missing in action” while fighting on the first day of the Attack on Hill 70, France.

On September 2nd, 1917, Wilbert in Sarnia received the following telegram about his son from the Officer in charge of records: SINCERELY REGRET TO INFORM YOU 602916, PTE. RANDOLPH LOUIS ACKERMAN, INFANTRY, OFFICIALLY REPORTED MISSING AUGUST 15TH, 1917. WILL SEND FURTHER PARTICULARS WHEN RECEIVED.

It was not until late-March 1918, that Private Ralph Ackerman of the 7th Battalion was officially recorded as *killed in action (previously reported missing) on August 15, 1917*. The Circumstances of Death Register records him as; *Date of Casualty: 15-8-17. Previously reported Missing, now reported Killed in Action. Casualty occurred at Hill 70*. Twenty-five-year-old Ralph Ackerman has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. On the Sarnia cenotaph, his name is inscribed as, Ackerman, R.H.

ADAMS, Alfred Roy (#90801)

Alfred Roy Adams survived Vimy Ridge, the Somme, Arras, Ypres, Passchendaele, and Cambrai. He was killed in action three weeks before The Great War ended.

He was born in Sarnia on January 13, 1886, the third son of Joshua Fourth and Jessie Loretta (nee Clarke) Adams, of 191 Brock Street, Sarnia. Joshua Adams (born April 22, 1840 in Carleton, Ontario) married Jessie L. Clarke (born 1851 in Markham, Ontario) in Sarnia on October 25, 1876. Joshua’s work as a customs officer in Sarnia supported Jessie and their four sons: Charles Frederick (born March 13, 1880, who would become a schoolteacher in Calgary); Ernest Joshua (born May 9, 1882); Alfred; and George Percy (born December 31, 1889). Tragedy, however, struck the family in their Brock Street home when, on May 29, 1896, its youngest member, George, passed away from diphtheria at age six.

What distinguished Alfred before the war was his musical talent that made him prominent in musical circles. After residing in Sarnia for many years, he left for Goderich a few years before enlisting. His talent, especially in playing the piano and organ led him to becoming the leader, organist and choirmaster at Goderich’s St. George’s Anglican Church from 1910 to 1914.

At age 29, Alfred Adams enlisted in the Canadian Over-Seas Expeditionary Force on June 17, 1915 in Sarnia with the 29th Battery, Canadian Field Artillery. He stood five feet six and a half inches tall, had blue eyes and fair hair, was single, and recorded his trade or calling as civil engineer. Alfred listed his father, J.F. Adams on Brock Street, as his next-of-kin. Alfred trained at Guelph and embarked overseas on the *S.S. Missanabie* on February 23, 1916. He disembarked in the U.K. at Plymouth on March 12, 1916, moving first to Bramshott Camp and later to Witley Camp. On June 21st 1916, Alfred wrote to his mother from Witley Camp, in Surrey, England where he was training. Following is a portion of that letter:

Dear Mother,

I know it is a long time since I wrote, but it was pretty hard to do any writing while we were on our tick to Larkhill, and they have formed a habit recently of springing parades of one kind or another on us for Saturday afternoons and Sunday, so that leisure time is rather a scarce article. We had quite a time on our “trek.” It was done under actual service conditions. We left here on the 5th about 8 a.m., the whole brigade the 29th, 41st, 44th and 46th

Batteries, travelled of course at a walk. Every hour we would halt for about 10 minutes, see that everything was alright, then on again. Any time near noon we would halt where there was a stream of water to water the horses, feed them and eat a sandwich ourselves. We moved by easy stages only about 12 to 16 miles a day, usually reaching our bivouac for the night about 2 or 3 p.m....

He later described his stay in the area of Over Wallop: ... In the evening as soon as the horses are fed and watered, we had a hot meal usually a stew, then we would wander off to the town to see what it looked like. Then there was a roll-call at 9:30 so we didn't have much time to look around. It is broad daylight here now at 9:30 with the daylight saving bill in force, Summer time as they call it. Reville was at 4 a.m. and we moved off again at 6. Of course we slept in the open with a rubber sheet and two blankets, fortunately we did not get much rain at night.... The soil all through is chalk but there is plenty of good sticky mud on the surface, and even a short shower turns the place into an abominable mud hole. The first contingent must have suffered tortures in such a place during the rainy season.... It will not be long before we move to France now by the looks of things and I guess leave is hard to get then, but the war will soon be over. I think this brings my tale nearly up to date so I'll end here. Everything is going fine, good health and everything else. I'm glad father is keeping up. Hope everything is O.K.

Yours, Roy

Lieutenant Alfred Roy Adams

Sergeant Alfred Adams disembarked in France with the 11th Howitzer Brigade on July 15, 1916. In the ensuing months, he participated in many historic battles and, amazingly, escaped with no major injuries. In late-November 1916, he was hospitalized at No. 5 General Hospital in Rouen due to influenza. Approximately three weeks later, he rejoined his unit.

In April 1917, he became a member of the 8th Brigade, Canadian Field Artillery. In January 1918, Alfred took his Officer's Training Course (OTC) in Witley Camp, Godalming, England, and attained the rank of Lieutenant. He returned to the front in June 1918 as a member of the Canadian Army Field Artillery, 3rd Brigade. While in France, Alfred took part in the battles at Vimy Ridge, the Somme, Arras, Ypres, Passchendaele, Cambrai and others. His good fortune ended when he participated in what became known as The Hundred Days Campaign.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a high price, approximately 46,000 Canadian were killed, wounded or missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km.

The second offensive in Canada's Hundred Days Campaign was the **Battle of Arras and Breaking the DQ**

Line in France (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line – a series of strong defensive trenches and fortified villages. General Sir Julian Byng called the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line “*the turning point of the campaign*”, but it came at a cost of 11,400 Canadian casualties.

Near the end of the 2nd Battle of Arras on September 4th, 1918, Lieutenant Adams fractured his skull when a shell burst near him on the front lines. He would be confined to No. 20 General Hospital in Camiers, France where he was operated on and a piece of shell was removed from his skull. His doctors thought he was recovering well enough to move him to No. 3 London General Hospital in Wandsworth, England on October 2nd, 1918. Two weeks later, on October 17, 1918, seriously ill, the lieutenant from Sarnia died. Alfred Adams was officially recorded as; *Died of wounds – 3rd London General Hospital (England), Wandsworth Common, S.W.* Approximately three weeks after Alfred’s death, the First World War ended.

Alfred’s family received his British War Medal and the Victory Medal posthumously. His father, Joshua, passed away less than two years later in Sarnia, in April 1920 at the age of 79. He is buried at Lakeview Cemetery, Sarnia. At St. George’s Anglican Church in Goderich, not long after the war, a plaque was unveiled in Alfred Roy Adams honour. The plaque is still in the church today and reads

TO THE GLORY OF GOD
AND IN LOVING MEMORY OF
A. ROY ADAMS
LIEUTENANT 9TH BATTERY 3RD BRIGADE C.F.A.
SOMETIME ORGANIST OF THIS CHURCH
WHO DIED OCTOBER 17TH 1918 OF WOUNDS RECEIVED AT
THE STORMING OF DROCOURT QUEANT SWITCH LINE

Thirty-two-year-old Alfred Adams is buried in Brookwood Military Cemetery, Surrey, United Kingdom, Grave III.D.12.

ALLAN, Arthur John (#602258)

Like many Sarnians, Arthur John Allan fought in brutal conditions and died in front line action. At his Central United memorial service, the pastor remarked that only faith in the cause and in God *could lead men to endure what our men have endured and to meet so heroically every demand made upon them.*

Arthur John Allan was born in Palmerston, Wellington County, Ontario on September 18, 1891, the son of James Alexander (born October 1, 1863) and Florence (nee McArthur, born March 11, 1863) Allan. At some point, they moved to Sarnia where James found work with the Grand Trunk Railroad. It was fortunate he did for his steady job helped support Florence and their nine children: Mabel Florence (born November 15, 1884); William Albert (born March 18, 1886); James Howard (born December 23, 1887, see below); Mary Violet (born June 8, 1889); Arthur; Robert Earl (born August 1, 1893); Sarah Gladys (born December 1, 1894); Edna B. (born 1899); and Velma (born November 1900). The Allan family were members of Central United Church and lived at 382 Brock Street and, later, 239 Mitton Street.

At age 23, Arthur Allan enlisted in the Canadian Over-Seas Expeditionary Force in Sarnia on January 13, 1915, with the 34th Battalion (his older brother James would enlist seven months later). He stood five feet six inches tall, had blue eyes and dark hair, was single, and recorded his trade or calling as a rig brakeman. He listed his father, James on Brock Street, as his next-of-kin.

Arthur Allan and his brother James embarked overseas together with the 34th Battalion, ‘D’ Company, aboard the *S.S. California*. They disembarked in England on November 1, 1915 and were initially posted to Camp Bramshott with 23rd Battalion. On May 25 1916, the Allan brothers were transferred to the 2nd Battalion and the next day were deployed to France.

Upon arriving in France on May 26, Privates Arthur and James Allan were immediately transferred to 7th Battalion, Canadian Army Infantry, British Columbia Regiment. Both Arthur and James fought in the June 1916 **Battle of Mont Sorrel**. Arthur survived this battle, but his brother James was killed in action on June 13, 1916. Arthur Allan was then transferred to the Somme Front.

The **Battle of the Somme** (July 1-November 18, 1916) was one of the bloodiest and most futile battles in

history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

The second major offensive of the Somme battle was the week-long **Battle of Flers-Courcelette** (September 15-22). It was here where tanks made their first appearance in the war. The Battle was a stunning success for the Canadians, but it came at a cost of over 7,200 casualties. Only days after this battle, another one of the many soldiers that the Battle of the Somme claimed was Private Arthur Allan of Sarnia. On September 27, 1916, Arthur was killed during fighting at Hessian Trench near Courcellette, a mere three months after his brother died.

On Brock Street, James Allan Sr. received the following message about his son from the militia headquarters at Ottawa not long afterwards: *Sincerely regret to inform you, 602258, Private Arthur John Allan, infantry, officially reported missing since Sept. 27th, 1916. Will send further particulars when received.*

Officer in charge record office.

Later, James received letters from two young Sarnians who were on active service in France. Both men informed James of Arthur's death. The circumstances of his passing provide insight into the chaotic nature of the WWI battlefields. Arthur was initially reported missing in action, but four weeks elapsed before authorities confirmed that he was *now killed in action Sept. 27, 1916*. His Circumstances of Death Register records Arthur Allan as; *Date of Casualty: 27-9-16. "Previously reported missing, now reported Killed in Action". Killed in trench leading up to Regina Trench in the Area of the Somme, France. No record of burial. Killed in area of the Somme, France.*

Twenty-five-year-old Arthur Allan is buried in Cerisy-Gailly Military Cemetery, Somme, France, Grave III.A.6.

Private Arthur John Allan

James Howard Allan (L) and Arthur John Allan (R)

ALLAN, James Howard (#602544)

James Howard Allan, 28, had only been in France for a few weeks before he was killed on the last day of the Battle of Mont Sorrel. At a Central United memorial service for James and his brother, Arthur, the pastor emphasized that the brothers had *the deepest love for home, country and the cause for which they were giving their lives*.

James Howard Allan was born in Palmerston, Wellington County, Ontario on December 23, 1887, the son of James Alexander (born October 1, 1863) and Florence (nee McArthur, born March 11, 1863). At some point, they moved to Sarnia where James found work with the Grand Trunk Railroad. It was fortunate he did for his steady job helped support Florence and their nine children: Mabel Florence (born November 15, 1884); William Albert (born March 18, 1886); James Jr.; Mary Violet (born June 8, 1889); Arthur John (born September 18, 1891, see above);

Robert Earl (born August 1, 1893); Sarah Gladys (born December 1, 1894); Edna B. (born 1899); and Velma (born November 1900). The Allan family were members of Central Baptist Church and lived at 382 Brock Street and, later, 239 Mitton Street.

Twenty-seven-year-old James Allan enlisted in the Canadian Over-Seas Expeditionary Force on August 21, 1915 in Sarnia with the 34th Battalion (his younger brother Arthur had enlisted seven months earlier). He stood five feet five inches tall, had blue eyes and brown hair, was single, and recorded his trade or calling as railway brakeman. He listed his father, James Allan Sr. on Brock Street, as his next-of-kin.

James and his brother Arthur embarked overseas together with the 34th Battalion, 'D' Company, aboard the *S.S. California*. They disembarked in England on November 1, 1915 and initially were posted to Camp Bramshott with 23rd Battalion. On May 25 1916, the Allan brothers were transferred to the 2nd Battalion and the next day were deployed to France. Upon arriving in France on May 26, Privates James and Arthur Allan were immediately transferred to 7th Battalion, Canadian Army Infantry, British Columbia Regiment.

Both James and Arthur Allan fought in the June 1916 **Battle of Mont Sorrel** in Belgium (June 2-13, 1916). Mont Sorrel was the last remaining high ground in the Ypres salient still in British hands. Over two weeks of fighting that resulted in almost no change in the ground held by both sides, the "June Show," as the battle was known informally, came at a cost of 8,700+ killed, wounded or missing Canadians.

Private James Allan was killed at Mont Sorrel, less than three weeks after he had arrived in France. On late June 12 and into June 13, 1916, his unit was tasked with attacking enemy positions. Despite incessant rain, heavy artillery bombardment, and machine gun fire, the unit took their assigned objectives, held them, and then reinforced their position.

On June 13, 1916, James Allan died while fighting on the final day of the Battle of Mont Sorrel, Belgium. His brother Arthur Allan fought in the same battle, and survived to fight another day, but was killed in action only three months later in the Battle of the Somme. James Allan was later officially recorded as; *Killed in Action. Ypres (Mt. Sorrel). Cemetery: Railway Dugouts Burial Ground. (Transport Farm). Commune: Zillebeke. 157/c.28.I.21.c.6.8.*

In early November 1916, Central Baptist Church held a memorial service for the Allan brothers. Following is a portion of the story from the *Sarnia Observer* on the service:

The evening service on Sunday at the Central Baptist church was in memory of two young men of this city who have been killed in action – Private James Howard Allan and Arthur John Allan, sons of Mr. and Mrs. James A. Allan of Brock street south, who went overseas in the 34th Battalion, and upon that unit being broken up in England, went to the front as members of the Seventh Battalion. In the fight at Hill 60 the first named laid down his life. Arthur passed safely through the same action, and later was transferred to the Somme front, and there in one of the many engagements, he too made the supreme sacrifice. Appreciation of their service for king and country, and sympathy for the twice stricken family, were evident throughout the entire service, which opened with Chopin's Funeral March. The pastor's remarks included, "Only faith in the righteousness of our cause, in the honorable action of our national leaders, and in God, could lead men to endure what our men have endured and to meet so heroically every demand made upon them." Pastor McKay concluded his address by reading some extracts from letters written amidst the carnage of the battlefield showing deepest love for home, country and the cause for which they were giving their lives.

Twenty-eight-year-old James Howard Allan is buried in Allan Railway Dugouts Burial Ground (Transport Farm), Belgium, Grave VI.D.17.

ANSBRO, George Patrick (#124280)

Born in Ireland and living in Sarnia when he enlisted, George Patrick Ansbro was killed at Passchendaele exactly two years to the day after he enlisted in 1915. He has no known grave.

George Patrick Ansbro was born in the village of Hollymount, Ireland on March 3, 1895, the son of William William and Margaret W. (nee Loughlin) Ansbro, of Ireland. William and Margaret were blessed with a large family. George's siblings included his brothers William, Frank, Patrick, Martin, Peter Paul and Joseph, and three sisters: Annie, Mary and Francis. In 1912, George Ansbro, now 17, immigrated to Canada, arriving in Quebec in June 1912. By November 2012, he was residing in Sarnia and working as a contract labourer in the Imperial City. At least one of

his siblings had also immigrated to North America. In November 1912, George crossed the border at Sarnia on a trip to visit his brother William who was living in Detroit.

When the Great War started in 1914, George was a member of the Sarnia Fire Department. A year later on October 30, 1915, at age 20, he enlisted in the Canadian Over-Seas Expeditionary Force in Sarnia with the 70th Battalion. He stood five feet seven inches tall, had blue eyes and black hair, was single, and recorded his trade or calling as fireman. George listed his next-of-kin as his father William Ansbro of Hollymount, Ireland.

On April 24, 1916, Private Ansbro embarked from Halifax for England aboard the *S.S. Lapland*. He landed safely at Liverpool on May 5, 1916. He continued his training at Shorncliffe with the 39th Battalion. In mid-July 1916, he was deployed to France as a member of Army, 5th Canadian Mounted Rifles Battalion, 1st Quebec Regiment.

Like many soldiers, George did not escape the terrible conditions unscathed. Within three months, in mid-September 1916, he entered No. 3 Canadian General Hospital in Boulogne with suspected enteric fever. He returned to the U.K., and in mid-November 1916, was at Shorncliffe with typhoid fever. In January 1917, he was still being treated for enteric fever at Enteric Depot at Woldingham. After being away from action for six months, George returned to the 5th Canadian Mounted Rifles in France in April 1917. By mid-October 1917, Ansbro arrived with the Canadians in an area of Flanders, Belgium known as Passchendaele.

The **Battle of Passchendaele** in Belgium (October 26 – November 10, 1917) was waged in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and glutinous mud. Overcoming almost unimaginable hardships and horrific fighting conditions, the remarkable Canadian victory that few thought possible, came at a cost of almost 12,000 Canadian wounded and more than 4,000 Canadians killed.

Two years to the day after he enlisted, on October 30, 1917, Private George Ansbro lost his life during fighting in the Battle of Passchendaele, Belgium. The Circumstances of Death Register records George Ansbro as; *Date of Casualty: 30/31-10-17. "Killed in action". Passchendaele.*

Twenty-two-year-old George Ansbro has no known grave. He is memorialized on the Menin Gate (Ypres) Memorial, Belgium, Panel 30, 32.

NOTE: George Ansbro recorded his birthdate on his Attestation Paper as March 3, 1895. Thus in his military records, his enlistment age and his age at time of death are based on that; however, based on Ireland Birth and Census records, his birthyear was 1897. Thus the likelihood is that George Ansbro lied about his age in order to enlist, making himself two years older than he actually was.

BARNES, Charles Harris (#2356758)

Despite his best intentions, Charles Harris Barnes, 20, never got to fight overseas. En route to join his countrymen in Canada's Hundred Days Campaign, Charles succumbed to acute pneumonia. He was buried at sea.

He was born in Oil Springs, Ontario on February 15, 1898, the third oldest child of George (born August 14, 1866) and Annie (nee Campbell, born December 1872) Barnes, of 413 Confederation Street, Sarnia. George Barnes and Annie Campbell were married on November 2, 1892 in Oil Springs, Ontario. Their marriage blessed them with six children in the next dozen years: George Walter (born February 1894); John Thomas (born February 4, 1896); Charles; Robert Clayton (born February 20, 1899); Reta Mae (born August 1902); and Kathleen Victoria (born August 1904). Sadly, their oldest son, George, died at age three in January 1897, one year before Charles was born. The other siblings, however, reached adulthood. John Barnes enlisted in the United States Medical Corps, attaining the rank of Sergeant and sisters Reta and Kathleen became nurses.

Charles' younger brother, Robert, a former blacksmiths helper at the Mueller Company, also served in the Great War with Charles. On May 27, 1918, Robert, 19, and Charles, 20, enlisted together in the Canadian Expeditionary Force in London, Ontario. Their lives in the military would soon take divergent paths.

Robert embarked overseas to England on June 29, 1918 and two months later arrived in France on August 19, 1918, as a Sapper with the 7th Battalion, Royal Canadian Engineers. When the Great War ended on November 11, 1918, Robert was discharged in March 1919 on demobilization.

Charles' story is much different. Prior to enlisting, he worked as a Still Helper at the Imperial Oil Company

as a Still Helper. Enlisting with his brother, Charles stood five feet seven inches tall, had brown eyes and brown hair, was single, and was residing at home with his family on Confederation Street at the time. He recorded his trade or calling as Still Helper Imperial Oil Co. and his next-of-kin as his father, Mr. George Barnes of 413 Confederation Street. At enlistment, he became a member of the Army, Canadian Infantry, Western Ontario Regiment, 4th Reserve Battalion with the rank of Private. In mid-July 1918, he spent four days in the Military hospital in London, Ontario (Wolseley Barracks) with measles.

Private Charles Harris Barnes

Charles Barnes left London, Ontario for overseas on September 27, 1918. Two weeks later, on October 10, 1918, he would lose his life while at sea on his way to England, on board the *HMS City of Cairo*. He died as a result of acute broncho-pneumonia, and was buried at sea. He was on his way to join in Canada's **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) the “beginning of the end” of the Great War. Canadians were called on again and again over a three-month period to lead the offensives against the toughest German defences. The greatest victories of the Canadian Corps took place in this critical period, but it came at a high price, approximately 46,000 Canadian casualties.

One month after Charles' death, the Armistice was signed ending the Great War. In mid-October of 1918, George Barnes Sr. was officially notified that his son, *Private Charles Harris Barnes 2356758 had died at sea on route to England, on board the SS City of Cairo, October 10th of broncho-pneumonia*. Charles Barnes was later officially recorded as, *Died on board H.M.T. 'City of Cairo' of acute bronchial pneumonia. Buried at sea*. Twenty year-old Charles Barnes has no known grave. He is memorialized on the Halifax Memorial, Halifax, Nova Scotia, Panel 1.

BATEY, Robert Arthur (#123951)

In 1915, Robert Arthur Batey lied about his age on his Attestation Papers. Nearly a year after he enlisted, the 15 year old Sarnian was killed in the Battle of the Somme. He is the youngest fallen soldier inscribed on the Sarnia Cenotaph.

He was born in Heaton, Newcastle upon Tyne, Northumberland, England on June 14, 1901, the oldest child of Robert Thomas Batey Senior and Blanche Isabel (nee Rowe) Batey. Robert Thomas Batey Sr. (born February 8, 1877) and Blanche Isabel Rowe (born December 1880 in Chatham, Kent, England) were married in April 1900 in Maidstone, Kent, England. Robert Batey Sr., a railway worker in England, immigrated to Canada in 1910 and two years later was joined in Sarnia by Blanche, age 30, and their children Robert Arthur, 11, Douglas, 7, and Hilda Mary, 3. They arrived from Liverpool aboard the *SS Virginian* in Quebec City on May 31, 1912. In the next eight years, Robert and Blanche saw their family grow. Along with Robert (born June 14, 1901); Douglas (born June 1905 in Heaton, Newcastle); and Hilda (born July 4, 1909 in Backworth, Northumberland); the following children were born in Sarnia: Arthur Aitchison (born April 25, 1913); William (born 1915); Margaret Lillian (born December 15,

1916, would later marry becoming Margaret Waller); and Blanche (born 1920). The family moved often and their various addresses included 106 Julia Street; 274 Campbell Street; 124 South Savoy Street; 165 South Mitton Street; and 561 Christina Street.

At age 14, Robert Batey enlisted as a bugler in the Pioneers in September 1915. One month later, on October 4, 1915, he completed his Canadian Over-Seas Expeditionary Force Attestation Papers in Sarnia. He was residing with his family at 106 Julia Street at the time. To do so, he presented a brief letter penned by his mother on Grand Trunk Railway System letterhead that would change his life.

Dear Sir,

This is to certify that I give my consent for my son R.A. Batey to enlist in his Majesty's Service.

The youngster must have been desperate to serve. On his Attestation Paper, he wrote his birthdate as being June 14, 1898, a deliberate lie which, for official purposes, made him three years older than he actually was. Robert recorded his trade or calling as call Boy and his next-of-kin as his mother, Blanche Batey of 106 Julia Street. So at fourteen years and four months of age, five feet five and three quarter inches tall Batey, with gray eyes and dark brown hair, joined the army, becoming a member of the 70th Battalion.

Private Robert Arthur Batey

On April 24, 1916, Robert embarked overseas from Halifax aboard the *S.S. Lapland*. After arriving in England on May 5, he was transferred to the 5th Canadian Mounted Rifles (CMR) Battalion, Bombing Section, 2nd Quebec Regiment. A month later, on June 7, 1916, he arrived in France as a Private and a member of the 5th Canadian Mounted Rifles.

The teenager fought and died in the **Battle of the Somme** in France (July 1-November 18, 1916), one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

The second major offensive of the Somme battle was the week-long **Battle of Flers-Courcelette** (September 15-22). It was here where tanks made their first appearance in the war. The Battle was a stunning success for the Canadians, but it came at a cost of over 7,200 casualties. It was during this second major offensive of the Somme battle where Robert Batey was killed in action.

On September 15, 1916, he was initially reported as “wounded and missing after action” and was later recorded as “presumed to have died on or since 15-9-16”. Robert’s Circumstances of Death Register records him as; *Date of Casualty: On or since 15-9-16. “Previously reported missing, now for official purposes presumed to have died.” Courcelette Sector.*

He was fifteen years old when he died and became the youngest fallen soldier inscribed on Sarnia’s cenotaph. Robert Batey has no known grave and is memorialized on the Vimy Memorial, Pas de Calais, France.

The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

Such was the chaotic nature of the battle that few details were immediately available about how the young Sarnian was killed; however, in late September 1916, **Private Beecher Carr** wrote a letter to his parents Mr. and Mrs. Douglas Carr in Corunna. Edward John Beecher Carr, born in June 1895 in Sarnia, was a farmer when he enlisted in November 1915 in Sarnia, and went overseas with the 70th Battalion. Two of his other letters home are included in this Project on page 112. In his September 1916 letter home, he described his own wounding, and he makes mention of Robert Batey. The following is a portion of his letter:

France, Sept. 28, 1916

Dear Mother,

Well, I suppose you no doubt have heard of the work the Canadians have been doing on their new front in taking part in the great offensive. In every scrap we have come out on top until we have the Germans pushed away back. Every day there are new gains. On the morning of the 15th we went over in an assault on his front line. The scene cannot be described as under cover of our curtain of fire we went over in one line... At exactly the same moment, the whole line – Canadians, British and French leaped out and rushed across. Men were falling on every side. How I myself escaped I do not know, but I never got a scratch. Out of our little squad of 10: Timmins, a man from the United States was killed; Paget, was shot dead; Moore, a boy from London was wounded in three places. I dressed him and helped carry him out when we were prevented by the German guns from getting him all the way. We had to leave him on the stretcher and return. I heard a big shell landed on top of him afterwards – too dreadful to think of. He always was a close friend of mine. Being only just a kid I always sort of looked after him. We always had the same dugout, etc., and many a trial and discomfort we shared together. The corporal, myself and another man were all that returned. However I got it at last and in a rather unusual place.

*Since being relieved out of the line we have been doing working parties, making roads, etc. and the day before yesterday we had breakfast at 3 a.m., and then started out on a five mile walk. When we had gone about three miles Fritz started sending over shrapnel on the main road and I was the only man hit, although the balls fairly rained around us. I got a ball just below the right knee, not bad, but the bone is rather sore and may take some time to heal. I am now in the hospital and hardly know what to do with myself after the strenuous life. Art Gunn was killed, you know him. **R.A. Batey** was dangerously, perhaps fatally wounded. He is only 16 years old. He used to work "calling" in Sarnia. Keene from Oil Springs will lose a leg. S. Grooms, Canning Factory manager's son, from Alvinston, was wounded. Our officer, poor fellow, was shot dead. Harry Beresford, the only old 70th officer we had with us was badly wounded. But their lives were not in vain. We took and held their front line and the battalion gets much credit along with the rest who went over, from the General. With love and best wishes.*

Pte. Beecher Carr

Three years after the war's end, in 1921, the Batey family was residing at 124 Savoy Street--parents Robert Sr. (a janitor) and Blanche, and children Douglas, 17, Hilda, 12, Arthur, 8, William, 6, Margaret, 4, and Blanche, 1. The Batey family in Sarnia must have been crushed with the death of their oldest child and sibling. It was a grief they took to their graves years after Robert was killed serving his country. Robert Sr., 69, passed away on August 5, 1946 and Blanche outlived her husband by nine years, passing away at age 74 on March 20, 1955. They are both buried in Lakeview Cemetery, Sarnia.

BEAUMONT, George (#844052)

George Beaumont had only been in action for six weeks when he was killed by machine gun fire in a German counter attack. Five weeks later, The Great War ended.

George Beaumont was born in Wyoming, Lambton County, Ontario on April 8, 1895, the eldest son of George Beaumont Sr. (a railway employee) and Mary Jane (nee Young) Beaumont. George Beaumont Sr. (born April 24, 1857 in London, England) immigrated to Canada in 1870. Thirty-four-year-old George Beaumont Sr. (residing in Wyoming, Ontario at the time) married twenty year-old Mary Jane Young (born 1871 in Michigan) on February 8, 1892 in Wyoming, Ontario. George and Mary Jane Beaumont resided at 212 and later 191 Cobden Street and had five children together: Amy May (born January 30, 1893); George Jr.; John (born February 25, 1897); Julie Martha (born May 10, 1899); and Mary Gladys (born March 11, 1901). Sadly, Mary Gladys passed away from bronchitis at the age of five months on August 17, 1901. The year 1901 was a difficult time for the entire family. Not

only because of young Mary's passing, but also because George's mother, Mary Jane, died two weeks after giving birth to their youngest child. Mrs. Beaumont was only twenty-nine when she passed away from typhoid fever and pneumonia on March 24, 1901 in Sarnia.

The following year, George Sr., now 44 and employed as a labourer, remarried someone familiar to the rest of the family. His second wife, who he married on April 24, 1902 in Sarnia, was 21 year old Rachel Maria Young, the sister of their deceased mother and George's former sister-in-law; in other words, the children's former aunt, now their stepmother. George Sr. and Rachel Maria Young (born October 14, 1881 in Sanilac, Michigan), had two children together, step-siblings for George and his siblings. Tragically both would die very young. Eva Ruth (born January 22, 1908) was only eight months when she passed away on September 22, 1908 succumbing to cholera infantum. Lillian Margaret (born September 23, 1909) died at age 10 months two years later on August 3, 1910 from the same disease.

Prior to enlisting, George Beaumont Jr. had worked for some time as a butcher with Sarnian Alex Rose. When he was twenty, Beaumont enlisted in Sarnia with the Canadian Over-Seas Expeditionary Force on December 13, 1915, becoming a member of the 149th Battalion. He stood five feet eight and a half inches tall, had blue eyes and brown hair, was single, and was residing in Sarnia at the time. He recorded his trade or calling as butcher, and his next-of-kin as his father, George Beaumont of 191 Cobden Street.

One year later, in mid-December 1916, George spent a week in London hospital recovering from pneumonia. On March 25, 1917, he embarked overseas from Halifax aboard the *S.S. Lapland*. He arrived in Liverpool, England on April 7, 1917. He was posted initially to Camp Bramshott where he continued his training as a member of the 25th Reserve Battalion. On June 1, 1917, he was taken on strength into the 161st Battalion, stationed at Camp Witley.

Beaumont initially had problems adjusting to the strict and unyielding discipline that the military demanded of its soldiers at all times. On three occasions while at Camp Witley, George was confined to barracks for several days, a punishment levied for such offences as, "When on Active Service dirty equipment and rifle"; "When on active service having untidy bunk"; and "When on active service improperly dressed on parade." However, in mid-December 1917, George was awarded a Good Conduct Badge with the 161st Battalion at Camp Witley. In February 1918, the 161st Battalion was absorbed into the 4th Canadian Reserve Battalion.

The following August 1918, George was deployed to France and was transferred into the 18th Canadian Battalion in Etaples. On August 23, 1918, he arrived at the Canadian Corps Reinforcement Camp, where he was transferred to the 43rd Battalion, Manitoba Regiment, of the Canadian Infantry. He was a participant in what became known as "The Hundred Days Campaign." As it turns out, he fought only six weeks before he was killed.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the "beginning of the end" of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called "*the finest operation of the war*", the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line "*the turning point of the campaign*".

The third offensive in Canada's Hundred Days Campaign was the **Battle of Canal-du-Nord and Cambrai** in France (September 27-October 11, 1918). Against seemingly impossible odds and a desperate fully prepared enemy, in a series of brutal engagements in the two weeks, the Canadians would successfully channel through a narrow gap in the canal, punch through a series of fortified villages and deep interlocking trenches, capture Bournon Wood and the city of Cambrai. General Arthur Currie would call it "*some of the bitterest fighting we have experienced*" and it came at a cost of 14,000 Canadian casualties.

On October 1, 1918, while fighting in the Battle of Canal du Nord and Cambrai, Private George Beaumont

was killed by enemy machine gunfire. George Beaumont's Circumstances of Death Register records him as; *Date of Casualty: 1-10-18. "Killed in Action". This soldier was killed by an enemy machine gun bullet, during an attack. Location of Unit at time of Casualty: Near Tilloy. Cemetery: Cameron British Cemetery. Tilloy, France. Commune: Tilloy.*

Approximately five weeks after his death, the Great War would end. On November 13th 1918, two days after the Armistice was signed and with the world celebrating peace, Rachel Maria Beaumont in Sarnia received the following overseas letter about her stepson:

Lieut. Smith, 43rd Canadians overseas, France, October 14, 1918

Dear Madame,

It is with deepest regret I have to inform you of the death of your son, Pte. George Beaumont, No. 844052, killed in action October 1, 1918. Your son was killed during a counter attack made on our newly won lines, by the enemy. He was killed instantly thereby suffering no pain. He died bravely facing the enemy and defending the honour of our cause. The officers and men of the company tender their sincere sympathy in the loss of your son and may God assist you to bear the sad bereavement. I am,

Yours sincerely, S.G. Smith, Lieut. "D" Co'y, 43rd Can. Bn.

A few years later, Joseph Acton of the Salvation Army and the son-in-law of George Sr. and Rachel, had gone to France to visit George Jr.'s grave. Following is a portion of Acton's April 1921 letter to George Sr. and Rachel:

... The location of the cemetery is in a splendid district situated on the brow of a hill three miles outside of Cambrai. There are about 60 graves in this cemetery, the neighbourhood in which George fell is all under crop now, the grain was about 4 inches high when I crossed the field to the cemetery. I walked over the ground no doubt George had walked many times. I viewed the town from the fields which he had viewed it from, only in his time, the field was all trenches. I traversed the streets leading to Cambrai which George and his comrades had fought in and driven the Germans out, the devastation is everywhere, houses are smashed to the ground. The very trees along the road which leads to George's cemetery are being cut down while I was there as they are dead being hit with shrapnel. I took one or two pictures which I will forward to you later.

My visit to the battlefield was a wonderful education to me from many aspects. I saw the terrible picture which I had previously only read of. My heart ached as I looked at the many cemeteries everywhere. I was in one in Belgium with fourteen thousand British boys graves, there is another with twenty thousand graves. Another sad part is that many bodies are still being found. I saw 70 Germans being buried which had been picked up the day previous. A lamentable sad feature is the number of unknown soldiers. I went through a large cemetery and read the names on the crosses and found 70 out of every 100 unknown. The parents of these boys must often think of where their Jack is lying....

God Bless to all, Joseph Acton

George Beaumont, 23, is buried in Mill Switch British Cemetery, Tilloy-les-Cambrai, Nord, France, Grave C.16.

BELL, A. – No information found in searched records links this name to Sarnia.

Possibly Alex Bell or another Arthur Bell. No confirmed information from a number of sources.

BELL, Arthur William (#226053)

Arthur William Bell, 24, was a popular young man who died in France after nearly a year of fighting. Gone, but not forgotten to those who knew him. A memoriam in a local paper, published on the anniversary of Arthur's death, ends with this line: *Friends we were, and pals together, he but waits for me above.*

Arthur Bell was born in Point Edward, Ontario on March 26, 1891, the son of Harry "Henry" (born December 18, 1853 in England) and Mary Jane (nee Brook, born January 23, 1854 in Ontario) Bell. Henry Bell and Mary Jane Brooks were married on September 23, 1875 in London, Ontario and later moved to 288 Campbell Street, Sarnia. Henry was a railway porter when he married, later becoming a GTR conductor in Sarnia, and later the immigration inspector for Sarnia. As Henry's work portfolio expanded, so did his family. Mary Jane and he would have seven children together over the next fifteen years: Edith (born June 20, 1876); Ella (born May 6, 1877); Albert James (born June 25, 1879); Harry Henry (born November 24, 1884); Alice Jane (born July 21, 1890); and Arthur (1891). A half sibling Ettie was born in 1882.

When Arthur was nineteen years old, Mary Jane Bell passed away on April 28, 1910. His mother, only fifty-six, succumbed to bronchitis.

Those who knew Arthur described him as being well known and popular. He had lived most of his life in Sarnia, but had moved out west residing in Winnipeg, Edmonton and Medicine Hat for a few years. Three years before enlisting, however, Bell had returned to his hometown where he worked as a machinist.

His life changed when he decided to enlist at age twenty-four. He did so in Sarnia on October 26, 1915, joining the Canadian Over-Seas Expeditionary Force with the Depot Regiment, Canadian Mounted Rifles. He stood five feet six and a half inches tall, had brown eyes and brown hair, was single, and was residing in Point Edward at the time. He recorded his trade or calling as machinist and his next-of-kin as his father, Harry Bell of 288 Campbell Street. After some time spent training in London and Hamilton, Arthur embarked overseas on May 20, 1916 aboard the *SS Empress of Britain*.

Arthur Bell disembarked in England on May 30, 1916 and was originally stationed at Shorncliffe. In mid-June 1916, he was transferred to the Fort Garry Horse Reserve Regiment (FGHRR). On September 17, 1916, he was taken on strength into the 9th Battalion and proceeded to France. Once in France, he became a member of the 10th Battalion in late September, where he served for some time as a Private in the infantry. The 10th Battalion took part in the Battle of the Somme (July 1-November 18, 1916)--one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

In March 1917, Arthur Bell was transferred to the Canadian Army Service Corps (CASC), Reinforcement Pool as a Private. Not all infantry fatalities in the Great War were on the battlefield. Thousands of soldiers, including Arthur Bell, were victims of disease. On October 5, 1917, Arthur was suffering from tonsillitis and was admitted to No. 10 Canadian Field Ambulance. He was then moved to No. 6 Casualty Clearing Station. Still seriously ill six days later, he was transferred to St. John's Ambulance Brigade Hospital in Etaples, France. Within a week and despite the doctor's efforts, Arthur was dead on October 13, as a result of infection.

In mid-October 1917, his father Henry received the following telegram:

October 17, 1917 to H. Bell, Immigration Inspector, Sarnia, Ontario

Deeply regret to inform you 226053, Private Arthur William Bell, previously reported seriously ill, now officially reported died at St. John's Ambulance Brigade Hospital, Etaples, October 13th, 1917.

Director of Records

Arthur William Bell's Circumstances of Death Register records him as; *Date of casualty: 13-10-17. "Died" (Tonsillitis) at St. John's Ambulance Brigade Hospital, Etaples. Etaples Military Cemetery, France. Commune: Etaples. 1/100,000 Calais, 13-B-6-5-4.* At the time of his death, Arthur was survived by his father Henry, his three sisters; Mrs. Wyckoff, Sarnia, Mrs. Finch and Mrs. Earl Foster of Medicine Hat; and his two brothers, Albert in Saskatchewan (a locomotive foreman) and Harry in Fort Francis, Ontario. Unfortunately only three years after Arthur's death, Henry, his widowed father, passed away on November 10, 1920, at the age of sixty-seven in a London, Ontario hospital. Henry Bell is buried in Sarnia.

Arthur Bell, 26, is buried in Etaples Military Cemetery, Pas de Calais, France, Grave XXX.C.15A. In October 1918, one year after Arthur's death, the following 'In Memoriam' appeared in the *Sarnia Observer*: *In loving memory of Arthur William Bell, who died October 13th, 1917, in St. John's Ambulance Hospital, Etaples, France. Friends may think that he's forgotten, when at times I laugh and smile, but they little know the loneliness. Which that smile hides all the while. Friends we were, and pals together, he but waits for me above.*

A friend and pal

BENDALL, William George Henry (#123569)

William George Henry Bendall, 29, was killed in action mid-way through the Battle of Passchendaele. He left behind a young wife and a seven-month old son.

He was born in Marylebone, London, England on April 23, 1888, the eldest child of Mahala Ann Fonvielle (born April 1869 in Middlesex, England). Mahala had three children, all with the surname Fonvielle: William; Thomas (born May 7, 1889); and Mahala (born August 16, 1891). Tragically, the infant girl Mahala lived for only

two hours before she passed away.

Three years later, on August 5, 1894, Mahala married Joshua Scales in Marylebone Parish Church, England. They had five children together, step-siblings for William and Thomas. Joshua John Jr. (born July 1895); Albert Edward (born December 1897); Arthur Sidney (born December 26, 1899); Louis Stanley (born January 20, 1902); and Ena (born February 1, 1906) were all born in Marylebone, a borough of London, England. Unfortunately, William's stepfather, Joshua Scales passed away in 1909. William, 21, was residing with the rest of his family in London in 1911 and was employed as a clerk. The following year, he was working in the milk trade with his brother, Thomas, when he changed his surname to Bendall.

The following year, William Bendall married Ethel Louisa Collins of London, England. Ethel did not have her father's permission to marry, so they arranged a secret registry office wedding on January 23, 1913 in London and they later eloped. On May 15, 1913, the couple left England (travelling steerage) aboard the passenger ship *Sicilian* and arrived in Quebec two weeks later. William had intended to go into farming, but he had no experience.

By July 1913, William and Ethel (or Ethelwyn as he referred to her as) had settled in Sarnia, residing at 132 Savoy Street. They later moved to 426 George Street, Sarnia. The young couple's first child, William Harold George Bendall Jr., was born in Sarnia on June 7, 1914. Tragically, he passed away at six months due to enteritis on December 19, 1914. He is buried in Lakeview Cemetery, Sarnia.

In May 1914, William's brother, Thomas (also now Bendall) immigrated to Canada. He arrived in Sarnia hoping to become a factory hand like William. Instead, he enlisted in the Canadian Over-Seas Expeditionary Force in Sarnia on January 16, 1915. Thomas was twenty-five years old and single, recorded his trade or calling as labourer, and his next-of-kin as his mother Mahala Bendall in London, England. He stood only five feet three and a half inches tall, and became a member of the 34th Battalion, CEF.

Private Thomas Bendall arrived in England in mid-June 1915. Two months later, on August 5, 1915, he landed in France as a member of 1st Battalion Canadian Infantry. During his time fighting in the trenches of France, he had to recover from scabies and a severe case of pneumonia. After surviving the war and being discharged on demobilization in November 1919, he returned to Sarnia and resided at 121 Proctor Street. Thomas Bendall passed away at the age of fifty-six in January 1946 and is buried in Lakeview Cemetery, Sarnia.

At least two of William's step-brothers also served in the Great War. Arthur Scales and Joshua Scales Jr., both served with the London Regiment, British Army. Private Joshua Scales Jr, age 21, of the 19th Battalion, London Regiment, was killed in action on May 22, 1917 in France.

Eight months after his brother Thomas enlisted, William did so in Sarnia on September 20, 1915. He joined the Canadian Over-Seas Expeditionary Force becoming a member of the 70th Battalion. Twenty-seven-year-old William stood five feet five inches tall, had blue eyes and light brown hair, and he and his wife were residing at 132 Savoy Street at the time. William recorded his trade or calling as cooper and his next-of-kin as his wife Ethelwyn of Savoy Street (her address later changed to 426 George Street, Sarnia). Seven months later, on April 24, 1916, William embarked overseas aboard the *SS Lapland*.

After William landed in England on May 5, 1916, he was initially stationed at Shorncliffe and became a member of the 39th Battalion at West Sandling in early June 1916. In mid-August 1916, he was transferred to the 23rd Reserve Battalion and, by November 1916, had attained the rank of Acting Corporal while stationed at Dibgate. In January 1917, Bendall was transferred twice, becoming the Officer Commanding of the 11th Battalion and later of the 14th Canadian Reserve Battalion at Shorncliffe, with the rank of Lieutenant. At some point while William was overseas, Ethelwyn returned to England, residing at Hartismere House, Fulham, London. William and Ethelwyn had a second child, Denis Lendon, born on March 25, 1917 in London.

In late-May 1917, William Bendall was transferred to the 8th Canadian Reserve Battalion in Shorncliffe and reverted to the rank of Private. He arrived in France on June 27, 1917 as a member of the Canadian Infantry, Eastern Ontario Regiment, 38th Battalion. In mid-August 1917, he was evacuated to No. 12 Canadian Field Ambulance, then No. 10 Canadian Field Ambulance because he was suffering from trench fever. He was re-deployed to his unit two weeks later and by mid-October 1917, Bendall arrived with the Canadians in an area of Flanders, Belgium known as Passchendaele.

The **Battle of Passchendaele** in Belgium (October 26 – November 10, 1917) was waged in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and

glutinous mud. Overcoming almost unimaginable hardships and horrific fighting conditions, the remarkable Canadian victory that few thought possible, came at a cost of almost 12,000 Canadian wounded and more than 4,000 Canadians killed.

On October 31, 1917, five months after his step-brother Joshua Scales Jr. had been killed in action, Private William Bendall was wounded in action at Passchendaele when a piece of enemy shrapnel penetrated his left side. He was taken to No. 2 Canadian Casualty Clearing Station and died there as a result of wounds. William's Circumstances of Death Register records him as; *Date of Casualty: 31-10-17. "Died of wounds" (Shrapnel Wound Left Side, Penetrating) at No. 2 Casualty Clearing Station. Lijssenthoek Military Cemetery, 1 ¾ miles South West of Poperinghe, Belgium. Commune – Poperinghe.*

He left behind Ethelwyn, his wife of four years, and his seven month old son, Denis. William Bendall, 29, is buried in Lijssenthoek Military Cemetery, Belgium, Grave XXI.AA.18. On his headstone are inscribed the words, OMNIA VINCIT AMOR (Love Conquers All).

A year and a half after WWI ended, William's widowed mother, Mahala (nee Fonvielle) Scales, immigrated to Canada. Departing Liverpool, she arrived in Halifax aboard the *SS Caronia* on May 15, 1920 with three of her children by Joshua Scales: Arthur Sidney, Louis Stanley and Ena. William George Phillips, the family's enduring friend and protector, was also on board. Their destination was Sarnia. One month later, William's step-brother Albert Scales, along with his wife Lillian (nee Sage) and their infant daughter, immigrated to Canada arriving aboard the same *SS Caronia*. Their final destination was Sarnia, Albert wanted to be a farmer. Mahala had lost two sons in war, but she made a new life with her remaining children in Sarnia, residing at 121 Proctor Street.

BENNETT, James William (#602276)

When he enlisted in Sarnia in 1915, James William Bennett left behind Emily, his young wife. A year later his dreams of returning home ended at the Battle of the Somme.

He was born in Glossop, Derbyshire, England on February 15, 1890, the eldest child of George and Mary A. Bennett, both of 89 Hall Street, Glossop, Derbyshire, England. James' siblings included John, Millie, Mary, Hester and Frank. At some point, he left his parents and siblings behind and immigrated to Canada. He arrived in Sarnia where he found work as an oiler on a steamship.

In Sarnia, he made two decisions that changed his life. The first was that he married a young lady named Emily and the newlyweds made their home at 176 Ontario Street. The second was that at age twenty-four, he enlisted in the Canadian Over-Seas Expeditionary Force on January 27, 1915 in Sarnia and became a member of the 34th Battalion. He stood five feet four and a half inches tall, had grey eyes and dark hair, recorded his trade or calling as "oiler on steamship", and his next-of-kin as his wife, Emily of 176 Ontario Street, Sarnia. On October 23, 1915, James embarked overseas for the United Kingdom aboard the *S.S. California*, disembarking on November 1, 1915, at Bramshott Camp in Hampshire, England.

Private James William Bennett

James, like many soldiers, was on the move before he was deployed to France. On February 3, 1916, Private Bennett was transferred to the 23rd Battalion, stationed at West Sandling Camp. Later that month he took a cookery course at Blackheath. On June 6, 1916, he was transferred to the Canadian Infantry, 5th Canadian Mounted Rifles (CMR) Battalion, Quebec Regiment.

Private James Bennett arrived in France with the 5th CMR's the following day. James fought in the **Battle of the Somme** (July 1-November 18, 1916), one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and would see the Allies advance around 10 kilometers. The futility of the Somme battle is revealed in the telling statistics of those wounded and killed: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties. One of those victims was James Bennett.

Sometime on October 1-2, 1916, approximately four months after he arrived in France, Private Bennett was reported missing in action. Nearly one year elapsed before he was reported "now killed in action" between October 1st and 2nd.

It must have been a terrible time for his young wife, Emily, in Sarnia. She knew he was missing, but had to wait almost one year for confirmation that he was still living or had died in battle. The dreaded news arrived by telegram to her home on Ontario Street.

*Adjutant General's Office, Militia Headquarters, Ottawa, Canada
Certificate of Death*

Certified that No. 602276, Private James William Bennett, 5th Canadian Mounted Rifles, Canadian Expeditionary Force, has been officially reported as missing between the 1st and 2nd of October, 1916, and that, after full enquiry made no information has come to hand which would indicate that he is not dead. For official purposes, therefore, his death is presumed to have occurred on or since the last named date.

W.E. Hodgins, Major General, Adjutant-General. September 5th, 1917.

His Circumstances of Death Register records him as; *Date of Casualty: 1/2-10-16. "Killed in Action". This soldier was wounded during the advance on October 1st on Regina Trench and when his Battalion retired to its former position, he was missing. No further details are available relative to the actual circumstances of his death. Location of Unit at the time of Casualty: Courcelette. Regina Trench Cemetery, Courcelette. Commune: Courcelette 61-22.c 4 ½ miles North East of Albert, France. 57.d.R.23.1.3.1.*

Emily later resided at 430 Wellington Street and then 474 Davis Street, Sarnia. James Bennett, 26, is buried in Regina Trench Cemetery, Grandcourt, Somme, France, Grave II.D.10. On his headstone are inscribed the words, GOD TOOK HIM HOME IT WAS HIS WILL BUT IN OUR HEARTS HE LIVETH STILL.

BENTLEY, David Benjamin (Doctor)

When he enlisted in September 1914, Dr. David Benjamin Bentley, 49, was more than double the age of most of the soldiers he treated. He died three years later but not before saving the lives of hundreds of wounded men on the battlefield. Of note, David Bentley's experiences at the front lines and back in England parallel those of Lt-Col. John McCrae, the author of iconic poem 'In Flanders Fields'.

He was born in Warwick Township, Ontario, on December 16, 1864, the son of John (of Yorkshire, England) and Julia Ann (nee Rogers) Bentley. John Bentley and Julia Ann Rogers were married on December 15, 1863 in Warwick, Lambton County. John Bentley worked as a farmer to support Julia and their five children: sons David, George Albert (born October 1867); William Joseph (born March 3, 1871); and John Rogers (born February 21, 1873) and daughter Anne Louisa (born June 1869). Tragically, when David was eight, his father John passed away on September 2, 1873 at the age of thirty-five in Warwick.

Education was important to David and it determined his path in life. He attended public school in Woodstock and then Woodstock College and Trinity Medical College in 1887. Four years later, he graduated in medicine from the University of Toronto. He was a busy young man.

The year before he graduated in medicine, on November 13, 1890, David, 25, married twenty-three-year-old Ellen Evelyn Allen of Wyoming, in Toronto. Their union eventually produced three sons—Othel Allan (born January 24, 1891); Albert William (born August 9, 1893); and David Walter (born January 7, 1900). Before they had children, David and Ellen settled in Sarnia sometime in 1891 after they had resided in Oil Springs and then Forest. They lived at 197 Wellington Street where David practiced medicine. The Bentley family attended St. Andrew's

Presbyterian Church and needed all the consolation and prayers that the church community could offer when Ellen passed away on March 9, 1904 at the age of 37. It must have been a difficult time for the males in the family: for David who had also lost his father at a young age and for their three young sons, now without a mother.

In June 1904, David Bentley became a member of the Mason Victoria Lodge No. 56. Two years after his wife's death, forty-two-year-old widower Dr. David Bentley remarried, to thirty-eight-year-old Alice Shaw (nee Shepherd, born in Plympton) on October 31, 1906, in St. Mary's, Ontario. The family continued to live at 197 Wellington Street, and in August 1907, Alice gave birth to their only child together, Margaret Alice.

Fighting in the Great War was a young man's game, but someone forgot to tell David Bentley the rules. On September 23, 1914, after leaving behind his practice and his family, forty-nine-year-old Dr. David Bentley enlisted in the Canadian Over-Seas Expeditionary Force with the First Contingent at Valcartier Camp, Quebec. He stood five feet eight inches tall, had blue eyes and grey hair, recorded his trade or calling as physician, and his next-of-kin as his wife Alice of 195 Wellington Street. He was made a member of the Canadian Army Medical Corps (CAMC), 2nd Field Ambulance, with the rank of Major. Doctors were a valuable commodity for the military then.

Dr. David Bentley went overseas in October 1914, first spending several months stationed at Salisbury Plains, England. In late November 1914, he wrote a letter home to A.F. McVicar, a friend of his in Sarnia. Following is a portion of that letter:

November 28, 1914

Dear Friend Alf,

.... I am sitting on my sleeping bag in my tent, one of those hospital tents, and by the way they are pretty comfortable, notwithstanding the fact that the weather conditions are bad, rain nearly every day and mud, very bad around the camp. The Downs or Plains, are ideal for training purposes...land is very rolling, hills and valleys making it ideal for all sorts of training for every branch of the service, artillery, cavalry, infantry, etc.. Weather conditions have interfered very materially with the training, but all are keen for business and very little grumbling is ever heard.

At present we are acting as a clearing hospital for two brigades. We only keep patients for four days and all who are not fit are sent to a general hospital. We have ten ambulance wagons and about fifteen G.S. wagons, about 260 men and 11 officers, so you can judge about the amount of road space we take up when on the march. I am in command of B Section...

This is a great life, there being just enough variation to it to prevent it becoming monotonous. If we get across the channel I am sure we will find less comforts than at present. Most of the medical work so far is being attended to in this country as the wounded can be brought over within 24 hours or 48 hours and I believe some are in hospitals within a few hours of their being brought back from the firing line.

Yours very truly, Major D.B. Bentley

In early January 1915 while still in England, David wrote a letter to his wife Alice about his holiday time there. The following is an excerpt from that letter:

January 10th, 1915

I found one of your letters waiting for me on my return from holiday.... Capt. Fraser and I went to London and spent New Year's Eve at the Savoy. I sent you their social calendar, which shows a picture of how the last night of the year is spent by society in London. Dinner began about 11 p.m. after which or during which the fun began, all sorts of bon bons (as noisy as firecrackers) being pulled, and grotesque headgear, etc., resulting. All were soon properly decorated, and all were soon friends. A delightful orchestra in every dining room enlivened the place. Then all adjourned to the beautiful ballroom, where the most beautiful women with most exquisite gowns were in crowds. I had only two dances, but such a crowd. On the following day we proceeded to Birmingham, where we stayed with friends of Capt. Fraser... Here we had a most enjoyable, old-fashioned, home-like visit, in a splendid old English home, with such comfortable rooms, cheery fireplaces, hot water heating and too much to eat....

On Sunday night we went to Edinburgh, which we found in such a fog that our pleasure there was not so great. However, we saw through the castle and did a little running around, staying at a splendid hotel.... On our return, we found to our surprise that our camp had been deserted, and new quarters taken in a grand old manor.... Two of our sections (200 men), are now conducting a hospital, with good large rooms, well heated, grates and hot water radiators, clean and comfortable....

On February 11, 1915, Dr. Bentley arrived in France with the Canadian Army Medical Corps. He wrote this letter to Alice upon his arrival.

Sunday, February 14, 1915

S.S. City of Dunkirk

Here we are on the coast of France at St. Navaire, after being on board since Tuesday night. We embarked at Avenmouth, near Bristol and had a rather rough voyage. Fortunately I was one of the few who was not seasick and never missed a meal. It would appear that we are due to remain on board until midnight as the tide is out and several other troop ships are in port ahead of us waiting. This is a cattle boat and accommodation rather limited for officers, but we managed to get on ok. Our men of course had their blankets and had to do as best they could on the floors between decks. Our horses came through in very good condition, but the poor animals have had no chance to lie down. Where we will go of course is not known, but the whole contingent will be here and will likely have some weeks or longer on the lines of communication before seeing the trenches. At present we are anchored in a bay within sight of a town.

Our last month has been a very comfortable one as far as housing is concerned and about which I have written rather fully. We are in hopes that letters written on the boat will reach you earlier than if we waited until ashore. We are rather a long way from where Will is but may go in that direction. Our men are in good condition and will be ready for any emergency. Being pretty well up in the seniority list, I had a good place to sleep on the trip. It was too rough to get about on the ship very much, but I managed to take one look around and found many who were quite done up with sickness. However, all are around this morning and look quite recovered. Many kept quiet and did not appear for meals, but say they were not ill. Our whole unit are on the boat together with some artillery and the headquarters staff of the Highland Brigade.

As there is nothing very important about which to write on a short voyage like this, I will close with love to all at home who will be glad to know that we have not been exposed to submarines and have reached terra firma again.

D.B. Bentley

David younger brother, **William Bentley**, was also a doctor—a dentist. At the age of forty-three, William enlisted on September 23, 1914 – the same day as his brother. Both brothers embarked overseas to England in early October 1914. Serving as a dentist with the Canadian Army Medical Corps, Dr. William Bentley rose to the rank of Lieutenant-Colonel. The paths that the two brothers took as the war progressed were markedly different.

In early February 1915, William, who was also with the No. 2 Canadian Stationary Hospital, wrote a letter to his friend H. Gorman in Sarnia. The following is a portion of that letter:

February 8, 1915 Le Touquet, Boulogne Base, France

Dear Sir,

I wish to tender my personal thanks for the copies of the Observer. It is certainly a source of much satisfaction, I can assure you, to us members of this corps from the home town to receive them.... I am glad to say that the Sarnia quota are all in the very best of health and in excellent spirits. Our hospital is a credit to the Dominion... While it is not as large and commodious as some of the others, nevertheless it enjoys the reputation of being one of the most thoroughly equipped in France. We provide accommodation at the present time for three hundred patients... Since opening we have taken care of a large number of wounded. Many of the cases have proven most interesting from a professional standpoint and the success of numerous operations performed have reflected much credit upon the status of our Medical Officers. We were recently honored by a visit from H.R.H. Prince of Wales... He expressed himself as being most favorably impressed with what he saw. Even the minutest detail was not slighted during his tour of inspection, every ward being visited.

I might also mention the fact that following the futile attacks of the enemy upon the Allies' lines on the anniversary of the Kaiser's birthday, we have had the first prisoners of war interned in our hospital. Subsequently they were transferred via hospital ship to England from Boulogne base, as soon as favorably convalescent to warrant them taking passage across the channel.

Life while on active service is one strenuous demand in the discharge of duties. We are kept constantly on the "go" to use a common expression. Ambulance trains are continually arriving from "rail head," at irregular and intermittent periods, in fact any hour of the day or night, we never can tell, as we get but brief notice in advance of their coming, possibly a half an hour at the extreme, that is all. Therefore it may be seen that we are required to hold ourselves in readiness at all times, in order to be able to take care of all emergencies...

Sincerely yours, W. J. Bentley

Dr. William Bentley served in both England and France with the Canadian Army Medical Corps (CAMC) and the Canadian Army Dental Corps (CADC). In January 1918, he was made a Member of the Most Excellent

Order of the British Empire (Military Division). In June 1919, for his valuable services rendered in connection with the War, he was made an Officer of the Order of the British Empire. He was discharged in July 1920 on general demobilization. In October 1924, Dr. William Bentley married Helen Addah Taylor in Sarnia, and the couple would reside at 193 Queen Street in Sarnia. William Bentley passed away in March 1934, and is buried in Lakeview Cemetery, Sarnia.

Captain John Adda MacDonald of the Army Medical Corps in France sent this letter to his parents on South Brock Street. MacDonald's letter references the Bentley brothers and describes the process of handling the wounded at No. 2 Stationary Hospital, First Canadian Expeditionary Force, Le Touquet, France.

March 28th, 1915

Dear Father and Mother,

I received your letter of February 24 a day or so ago and was more than delighted to get it and know that all are well. We receive our mail quite regularly, a noncommissioned officer being to go to Bontogne daily for that purpose. Our Canadian mail comes in about two weeks, although I have known some mail to come in thirteen days. We have now been in France almost five months. About the first of December, we came here and converted a large hotel into one of the finest Field hospitals in France, and have been busy constantly ever since. In your letter you ask how we handle the wounded etc. Well, I will endeavour to give you a brief outline of the way we do it.

When a train load of wounded arrive, the ambulance drivers are immediately warned for duty, also the squad for duty at the train and when ready leave for the station, some distance away. Meanwhile the hospital is got in readiness for the reception of the wounded. Hot cocoa and oxo are prepared in the kitchen and by the time the first ambulance arrives the sisters have the wards prepared. The patients are transferred from the ambulance to the reception room where the registrar gets all particulars concerning the patient, such as name, rank, age, regiment, length of service, religion etc. They are then removed to the wards; by the way, we have ten wards, each bearing the name of a Canadian province. Ontario being the officer's ward.

On arriving in the ward, the orderly removes all the patients clothing which is often torn and covered with mud and blood, and gives him a bath, then the patient receives medical attention. Often the wounded present a pitiful appearance, men with frightful wounds, covered with mud, but full of pluck and very seldom, even a murmur comes from them although they are suffering terrible pain in many cases. We have had very few deaths among the patients, thanks to the constant attention and good nursing care of the sisters, and the skillful surgery and treatment by the physicians. Often bullets and splinters are located by means of the x-ray. When I see a man all smashed up I wonder that he is alive at all, so bad are some of his wounds.

***Capt. Bentley** is kept busy looking after "Tommy's" teeth, and has a beautiful dental office fitted up with field dental instruments. **Staff Sergeant C. Luscombe, Sergt. Jack Smuck and Corp. S. Battley** are all well and kept busy. I may add that the rumor of **Jack Ward's** death was unfounded and Jack is very much alive. Corporal Battley is now in the wards and is acquiring a great deal of valuable information in surgery.*

*I heard indirectly from **Maj. D.B. Bentley** a short time ago and the major was quite well. I was in Bologne a short time ago and saw a London man, Sergt. Murray, who is attached to the post office department. Last night a large bundle of Observers arrived for me per kindness of Mrd. McGibbon who sends a bundle about every two weeks. I can assure you they looked good to me; after reading them I pass them on to the rest of the boys.*

Hoping to hear from you soon, believe me.

Yours lovingly, J.A. MACDONALD

NOTE: Other soldiers of No. 2 Stationary Hospital were referenced by Captain MacDonald:

Capt. Bentley – (later Lieutenant Colonel) is William Joseph Bentley, a younger brother of David's, and a dental surgeon with the Canadian Army Dental Corps.

Sergeant Major John Crawford Luscombe – born in Sarnia (son of James Luscombe) and survived the war.

Lance Sergeant John (Jack) Wesley Smuck – born in Point Edward (son of Emily Smuck) and survived the war (see page 65); however, his brother, David Smuck, did not (his story is included in this Project on page 373).

Corporal Sinclair Battley – service #34267, survived the war (see page 66 and 86).

Lance Corporal Jack Ward – born in Courtright, the son of Joseph E. Ward of Sarnia, and survived the war.

Note: Another letter written by Captain John Adda MacDonald is on page 71.

In April 1915, **Private John Carolan**, of Sarnia, wrote a letter home describing how he owed his life to Dr. David Bentley. Pte. Carolan was hit on April 23 at Ypres. He was with his unit of the 1st Battalion and rushing to fill a breach in British defence lines when he declared he felt a burning pain in his head. The *Observer* covered the story in October of 1915. The following is a portion of that story:

Shot through the head during the hottest part of the engagement of Canadian troops at Ypres, Pte. John Carolan of Sarnia, declares he owes his life to Dr. Bentley. When Carolan was carried to the rear, among hundreds of others who had fallen under the grueling fire from the enemy's guns, practically unconscious from the loss of blood and exposure on the battlefield, about the first face he recognized was that of Dr. Bentley. "Why that's one of my boys" Carolan says he remembers coming from the doctor's lips through the haze. Dr. Bentley at once gave Carolan the immediate attention that was needed if his life was to be saved. The result of that attention is that Carolan is now well on to the road to recovery. The wounds in his skull, where the bullet entered and plowed its way out, are practically healed, and give him little trouble he says, although at times there is a burning and almost unbearable pain in his head. His left arm is partly paralyzed, but this too, doctors have declared, will be better in time.

John Carolan was born in Ireland and resided for many years in Africa and the East. After being wounded, John was honourably discharged and returned to Canada. More information on John Carolan is on page 111.

Major Dr. David Benjamin Bentley

Major Dr. David Bentley with two of his sons Albert (L) and David (R)

In late April 1915, while still in France, David wrote another letter home to his wife Alice. The following is a portion of that letter:

April 30th, 1915

My Dear Alice,

You have no doubt read of this terrific battle in which our good Canadian troops played such an important part. It is impossible for me to describe just what our brave men did. I had been waiting for several days for leave... when this sudden battle began. I am glad indeed that I had not got away for our experience was one which we may never again witness. I was at the main dressing station and during the four days there passed through our hands an average of 600 wounded daily. I worked through it all and was able to give attention to a great number. I had two tables going all the time and had one patient being prepared while attending to another. This went on for hours and hours without let up. Two or three other officers were doing similar work, so you can imagine how fast they were cared for. Some of our officers and all of our bearers were at advanced dressing stations and in the trenches caring for and removing the wounded back. We had three of our men killed, 15 men wounded but no officers killed or wounded. Considering the severe character of the fighting it is really miraculous that our casualties were not greater. Our men worked unceasingly and bravely through it all and gave us every reason to be proud of them. James Mair and Sidney Smith, both from Sarnia, are among the wounded, and have been sent down to the base – neither are so far as I can learn, serious. As you will have read the Germans poured poisonous gases into the trenches, which rendered fighting very difficult, but it did not prevent our men from saving the situation and earning them the praise and gratitude of the British Empire.

At present we are some miles back in the country, giving our men a much needed rest for a few days. We are living in a field and bivouacking. I have a large tarpaulin for a tent, which is simply a pole with a water proof covering over it.... Since coming here we have been sleeping, cleaning up and taking our ease and I can assure you

all very much needed the change after five days and nights of constant strain. When not working we could not rest for we were shelled out of every place we were in and some of the buildings which we occupied as dressing stations are now in ruins. It is feared that our last mail was burned, as our post office was set on fire by an incendiary shell and no trace so far has been found of it. Hoping to soon write you from England.

Yours lovingly, D.B. Bentley

During his three months in France, Dr. David Bentley served on the front lines between Armentieres and Ypres and then through the Second Battle of Ypres, Belgium where he was slightly gassed. By the early part of May 1915, he had returned to England, where he was appointed to the command of the Canadian Convalescent Hospital, Monk's Horton Hospital, in Kent. He wrote a letter to his wife Alice to inform her of the news. In part, it reads as follows:

London, May 4, 1915

My Dear Alice,

Just a few lines today to let you know that I am back in England and have orders to proceed to Shorncliffe tomorrow afternoon to take command of and to complete the organization of the Canadian Convalescent Camp. I received a very warm reception this morning when I presented myself to the General, due there is no doubt, to the fact that he has received none but good reports of the efficient work of the Canadian Field Ambulances in the recent engagements in Belgium. I have gone over all the correspondence having a bearing on the work of organization and find that although a lot has been done there still remains much to be done to complete the organization. I hope to be able to call to my assistance several of my old officers and N.C.O.'s, particularly those who have already done good service under trying conditions and have earned a change. I have another reason to hope for this as it will make way for some of the officers of the later contingents to get nearer to the firing line where they will be better able to redeem the good name of their native land as some are reported to have said they intend doing.

This afternoon I took a trip out a few miles to see another convalescent home for Canadian officers, which has just been opened out at Bromley Park Hotel, Kent.... The city is still kept pretty dark at night, but the general gaiety indoors keeps up pretty well. Most of the men in khaki that one sees however have a decided limp or are carrying an arm in a sling. I somehow felt as if I should find a quiet corner and keep in the shade as I have no sign of having gone through the horrors of war. I can tell a remarkably thrilling story however, if necessary, but so far I have not been challenged to say why I am here.

With love to yourself and the children.

Yours lovingly, D.B. Bentley

In June 1915, Dr. Bentley wrote a letter home to his friend Mr. Gorman in Sarnia, describing the Canadian Convalescent Hospital, in Kent. The hospital's purpose was to accept and to care for all convalescent Canadians from the many different hospitals in France and England. The following is a portion of that letter:

Monks Horton, Kent, England, near Hythe, June 20th, 1915

My Dear Mr. Gorman,

... we are now serving our mother land and camping on the grounds where the Royal Canadian regiment were camped 57 years ago. The old Cinque Ports are still interesting places and the old forts and canals still remain, though of no military value today.... The old Roman road from Hythe to Canterbury runs past this estate and I often think how nice it would be if we could exchange some of these old roads for the paved street in Sarnia which has to be taken up every winter and laid again in the spring...

The hospital is one which will most probably develop to immense proportions as it is intended as a clearing house for all Canadian sick and wounded who are ready to leave the ordinary hospitals in all parts of the British Isles, but are not as yet fit for duty. Here they will receive further treatment, will be fed, comfortably housed or tented, given such work or recreation as each individual case demands until such time as it is decided that they are again fit for duty or should be otherwise disposed of. We are being provided with indoor and outdoor games and the estate is one which lends itself admirably to all sorts of outdoor enjoyment. There are beautiful hedges, wooded areas, fine gardens and everything which goes to make one enjoy living.... We hope to have a number of motor vehicles in time with which to entertain our boys who so well deserve all the comfort which can be given them. Even now we seldom go on a business trip without taking one or more of them along for a motor ride...

Already we have had splendid results from this country life to poor chaps who came to us in very nervous conditions due to the effect of wounds and the shock of continued exposure to shell fire, and we hope to do great benefit to many more who might otherwise do badly....

Yours very truly, D.B. Bentley

In August 1915, Alice and her three step-sons Othel, Albert and David Jr., arrived in England from Sarnia.

While there, on August 26, 1915, David Jr. at the age of fifteen years and seven months, enlisted in the Canadian Army Medical Corps. The medical doctor who examined him and pronounced him fit for service was his father, Major Dr. David Benjamin Bentley.

Private David Bentley Jr. served most of the war in England with the Canadian Army Medical Corps Base Depot Medical Stores. He did serve briefly in France at the end of the war with the Canadian Army Dental Corps at 4th Canadian Clearing Casualty Clearing Station. Private Bentley was discharged on demobilization in May 1919 and returned to Sarnia to 195 Wellington Street.

In September 1915, Dr. David Bentley wrote the following letter to his friends Mr. and Mrs. Hugh Chittick in Sarnia:

Malvern House, East Park Terrace, Southampton, August 18, 1915.

Dear Mr. and Mrs. Chittick,

I wish to thank you for your thoughtful remembrances. Mrs. B. and the youngsters had a very nice voyage and got by without meeting any "tin fishes". I met them at Liverpool and we came direct to this place. This town is quite a pretty place in which to live and our windows look out on one of its many pretty parks. It is only a short run by boat from here to the Isle of Wight. There are also some large Forest Parks not far from here, numerous military camps, remount depots with horses and mules by the thousand. There is a good "tram car" service and train service to all the places of interest near by.

We get a lot of rainfall here, and although the heat is not so great as at home the humidity of the atmosphere makes one feel rather lazy. David is not particularly pleased by the remarks which he hears passed about his bloomers. All the boys here, or nearly all, wear tight fitting long trousers. So he is quite an attraction. As the only Canadians in this town are my own small staff, we are quite conspicuous. English people however, have an unbounded respect for Canadians, as they all know the good work done by the mistrusted and unjustly criticized "First Canadian Contingent"

With love, yours very truly, D.B. Bentley

The previous month, Major David Bentley had been appointed to command the Canadian Medical Stores, Base Depot, in Southampton, England. He wrote a letter home to his friends A.B. Johnston and Alex J. Kelly in Sarnia. The following is an excerpt from that letter:

August 18, 1915

My Dear Friends,

Just a few lines to let you both know where I am and what I have been doing. The fortunes of war have now placed me as O.C. of the Canadian Medical Stores, Base Depot, Southampton, with a small unit made up of a quartermaster, one staff sergeant, two corporals and five men. Our work here is to assemble all technical, medical and ordnance equipment for Canadian hospitals going overseas....

My office is in the docks and here we see troops passing through daily, the train being run into the docks and the troops at once placed on board the numerous transports in waiting. We don't ask questions or give information as to how many there are or as to their destination, but we know and see the best troops obtainable in the world passing on their way to do battle with our enemies in all parts of the war zone. Were it not for the presence of so many khaki uniforms one would scarcely know there was a war on. In this port too, we see numerous hospital trains daily coming to meet the hospital ships, take on their load of wounded and depart for the numerous hospitals in all parts of the British Isles.... The organization of the medical service from the firing line back to the hospitals in England is well high perfect, and I have had an opportunity of observing it from both extremes....

I hope some day to have an opportunity of giving you an account of some of our experiences during the last few days of April in Ypres, Brielen, Vlanenturghe and Poperinghe. It was one of the grandest and most terrific exhibitions of fireworks which I ever witnessed for with every explosion there was something happening either overhead, or around us. To attempt to write about it is rather a huge task. Give my regards to all the old boys.

Yours very truly, D.B. Bentley

Major Bentley had never been well since being in France, but was always able to look after his duties. In mid-December 1916, he consulted a specialist who sent him to the Royal Victoria Military Hospital at Netley. He remained for some weeks but did not improve much. Diagnosed with "chronic interstitial Nephritis with high blood pressure", his treatment included complete rest in bed, light diet and small doses of iodides. After spending a few days with his family, he was sent to a Canadian Hospital at Ramsgate in mid-February 1917, where he was listed as "dangerously ill". For a few weeks his condition seemed to have improved; however, by the first of April he developed pneumonia that his weakened body could not shake. On April 3, he was listed as "dangerously ill". The

next day his condition was assessed as “critically ill and sinking rapidly”.

Major Dr. David Benjamin Bentley

During his last weeks in Ramsgate, David longed for his beloved home on Wellington Street. On April 5, 1917, Major David Benjamin Bentley passed away at Granville Hospital, Ramsgate, Kent, England. At his bedside when he passed were his wife Alice, their daughter Margaret (age ten), his son David Jr. (age seventeen) and his brother, William. The cause of death was officially recorded as, *Nephritis Chr. And Lobar Pneumonia, Left*.

Major Bentley was posthumously awarded the following medals: The British War Medal, the Silver Memorial Cross and the 1914-1915 Star. The Lambton County Archives is currently in possession of these medals. Alice presented additional personal items to the Royal Canadian Legion Branch 62, Sarnia. These items—the doctor’s officer’s riding crop and spurs—are preserved and on display at the Legion.

Fifty-two-year-old Doctor David Benjamin Bentley is buried at Ramsgate and St. Lawrence Cemetery, Kent, United Kingdom. Grave LA.657. He was laid there with full military honours – a large firing party of perhaps three hundred from the Queen’s Regiment fired a salute and the Queen’s Buglers sounded the “Last Post”.

On his headstone are inscribed the words, AT THE GOING DOWN OF THE SUN AND IN THE MORNING WE SHALL REMEMBER THEM. At Lakeview Cemetery in Sarnia, a headstone commemorates David and Alice Bentley. On their headstone are inscribed these words: IN MEMORY OF MAJOR DAVID B. BENTLEY M.D. 1864 – 1917 WHO DIED AND IS BURIED IN RAMSGATE, KENT ENGLAND. HIS WIFE ALICE BENTLEY 1868 – 1947. The name of Sarnia’s oldest fallen soldier in the Great War is inscribed on Sarnia’s cenotaph.

BENWARE, Neil (#6886)

In a letter he wrote home a month before he was killed in 1916, Private Neil Benware, 27, thought the war would be over soon, that the Allies would *finish the job, which will be this summer*. Little did Neil or anyone know that the fighting, waged in brutal, nightmarish conditions, would continue for another thirty months.

He was born in Sombra, Ontario, on June 10, 1888, the son of Tuffield and Margaret (nee Quinn, born February 7, 1858 in Springfield, Ontario) Benware, of Courtright, Ontario. Tuffied Benware, born August 25, 1860 in Mooretown, Ontario, worked as a labourer. Fortunately, he found work for Margaret and he had six sons to feed and clothe: Gabriel (born February 1887); Neil; Patrick (born March 25, 1893); Grant Louis (born April 17, 1894); Charles (born March 22, 1896); and Albert (born June 1898). The Great War changed the fortune of many families and the Benwares were no exception. Neil and two of his brothers joined the war effort with completely different results.

After joining the 149th Battalion, CEF on February 23, 1916 in Courtright with the rank of Private, **Patrick Benware** was discharged one year later on February 8, 1917 in London, Ontario. Though his conduct, habits and character were deemed “Good”, he was recommended for discharge as he was deemed medically unfit because of issues with varicose veins in his legs.

Grant Benware enlisted on January 26, 1916 in Courtright and, like Patrick, became a Private with the 149th Battalion, CEF. Nine months later, on October 11, 1916, he was discharged at Camp Borden because he was declared as medically unfit due to vision problems. The front line losses that Canada suffered were staggering and to replace those killed, the government introduced and enforced conscription. Thus it was that a year after he was discharged for poor vision that Grant was drafted under the Military Service Act of 1917, Class One. He underwent his medical examination in Sarnia on November 2, 1917 and was called to service on January 9, 1918 where he reported to the 1st Depot Battalion, Western Ontario Regiment in London, Ontario. His poor vision, however, was still an issue. Four months after being drafted, on May 28, 1918, he was discharged from the Canadian Garrison Regiment (CGR) in London, Ontario. Though his conduct and character were deemed “Very Good”, he was recommended for discharge. The reason was that Grant was declared medically unfit due to his defective vision.

Neil Benware’s story in WWI, unfortunately, would be altogether different from his brothers’ medical discharges in Canada. Before joining the service, he was employed as a sailor and had some prior military experience with the 27th Regiment, St. Clair Borderers. When war broke out, Neil, now 26, enlisted in the Canadian Over-Seas Expeditionary Force on September 22, 1914 in Valcartier Camp, Quebec. He stood five feet nine inches tall, had brown eyes and brown hair, was single, and was residing in Point Edward at the time. He listed his next-of-kin as his brother, Gabriel of Courtright, later Point Edward, Ontario. Neil became a member of the Canadian Infantry, Western Ontario Regiment, 1st Battalion. He embarked overseas for the United Kingdom on October 3, 1914 and four months later, on February 11, 1915, arrived in France with the 1st Battalion, part of the 1st Brigade of the 1st Canadian Division.

In early April 1915, the 1st Division of Canadians arrived at the Ypres salient battlefield in Belgium, an area known as Flanders. It was here that the Canadians engaged in their first battle of the war, the Second Battle of Ypres, their baptism by fire. It was here that the Germans unleashed the first lethal chlorine gas attack in the history of warfare. In the first 48 hours at Ypres (April 22-24), there were more than 6,000 Canadian casualties. Fighting continued in the Ypres salient on and off until May 25, 1915 including battles at St. Julien, Festubert, and Givenchy. In just over one month at Ypres, one third of the Canadian force, over 8,600 soldiers were killed, wounded or captured. Neil Benware survived this first major engagement in Belgium.

More than one year after arriving in France, in March 1916, Neil wrote the following letter from France to his former employer in Sarnia:

Dear Mr. Grace

I received your welcome letter last night and was very glad to hear that everything, and all the boys are getting on good. I have seen a few boys here that I used to sail with. I am in the trench mortars and we can soon knock a trench down. I got your cigarettes last week. They were badly damaged, but I had a few good old smokes. I think we boys are nearly due to go back (to the front). If the young men in Canada would only join up we would have been out by this time, but if they don’t we will have to finish the job, which will be this summer.... I have something good to tell you. I was called over to our company today and was congratulated by four of our old men. Wondered what was coming, when I was told I am recommended for a D.C. medal. So that isn’t so bad for the old 27th St. Clair Borderers. It is getting late so I must close. Be sure and remind me to all the boys.

Pte. Neil Benware 58th Trench Mortar Battery, 1st Canadian Division, France

On May 23, 1916, two months after writing the above letter, Private Neil Benware died while fighting in Belgium. On that day, he was hit in the right shoulder and back with pieces of shrapnel and died a few hours afterward a result of the wounds. His Circumstances of Death Register records him as; *Date of Casualty: 23-5-16. “Died of Wounds” at No. 10 Casualty Clearing Station. Lijssenthoek Military Cemetery. Commune – Poperinghe.* He was posthumously awarded the following: the 1914/15 Star; the British War Medal (1914-18); and the Victory Medal (1914-18).

Sometime after Neil’s death, Private **Leonard F. Allingham** of Sarnia (see page 115) wrote a letter to his mother at 402 Wellington Street, Sarnia. A portion of his letter reads, *Neal Benware was killed a few days ago. He was hit by a couple of pieces of shrapnel and died a few hours afterward. I looked up his grave. He is buried near us in Lyssenthock military cemetery, Grave plot No. 7-A-17, so you can inform his mother.*

Twenty-seven-year-old Neil Benware is buried in Lijssenthoek Military Cemetery, Belgium, Grave VII.A.17. On his headstone are inscribed the words, IN LOVING MEMORY HE GAVE HIS LIFE FOR HIS COUNTRY MAY HIS SOUL REST IN PEACE. On the Sarnia cenotaph, his name is inscribed as N. Benward. Neil Benware’s

name is also inscribed on the plaque on the cenotaph in Veterans Memorial Park in the village of Point Edward.

It was undoubtedly a difficult time for the Benware family. Fifteen months prior to Neil's death, on February 15, 1915, Tuffield and Margaret lost their son, Gabriel, when he accidentally drowned at age twenty-eight. Tragedy followed Neil's death when a third son, Charles, died at thirty-one when he was struck by a train on October 8, 1927. Gabriel and Charles, along with parents Margaret (passed October 1929) and Tuffield (passed June 1933) are all buried in Our Lady of Mercy Roman Catholic Cemetery in Sarnia.

BISSETT, Cameron Robertson (#3131545)

Cameron Robertson* Bissett, 21, was drafted to fight in The Great War and arrived in France in time to fight in The Hundred Days Campaign. Three months later, as he was "digging in" with the rest of his company, an enemy shell burst close to him, killing him instantly. Cameron has no known grave.

He was born in Brooke Township, Ontario on October 30, 1896, the only son of Cameron R. Sr. (born September 1863) and Margaret (nee Smith, born February 1866) Bissett. Cameron R. Bissett Sr. and Margaret Smith were both born in Scotland, but at some point they immigrated to Canada with their families or by themselves. On May 18, 1892 they were married at Margaret's residence in Plympton Township. Cameron Bissett Sr. farmed in Brooke Township to support Margaret and their children: Margaret Jane (Maggie, born August 21, 1892); Elizabeth (born November 13, 1893) and Cameron Jr. The Bissett family were members of St. Andrew's congregation, Inwood. In 1901, four year-old Cameron Bissett was residing in Brooke Township with his thirty-one-year-old uncle George Bissett, the son of James and Jane Bissett, who had emigrated from Scotland in 1889.

Years later, Cameron's two sisters would both marry. Elizabeth Bissett became Mrs. Ed Ironsides and resided in North Brooke Township. Sister Margaret Jane Bissett married George Reid on December 13, 1911 in Petrolia. Margaret Jane and George Reid resided at 136 Dundas Street, Sarnia. Despite being in her early twenties, Margaret Jane (nee Bissett) Reid became a war widow when her husband, George Reid, was killed in a training accident in London, Ontario. George Reid's story is included in this Project on page 357.

Private Cameron Robert Bissett

In Europe, with the Canadian troops thinning at an alarming rate and no end to the war in sight, the government instituted the Military Service Act in 1917. In 1917, Cameron, 21, was drafted under the Military Service Act of 1917, Class One. After undergoing his medical examination in Sarnia on October 9, 1917, he was called to service on January 9, 1918. Cameron immediately reported to the 1st Depot Battalion, Western Ontario Regiment in London, Ontario. He stood five feet eleven inches tall, had hazel eyes and light hair, was single, and was residing on Dundas Street in Sarnia with his family at the time. He recorded his trade or calling as a farmer and his next-of-kin as his mother Margaret Bissett of 136 Dundas Street. Bissett became a member of the Canadian Infantry, Western Ontario Regiment, embarking overseas from Halifax for the United Kingdom aboard the *S.S. Grampian* on February 5, 1918. When he arrived eleven days later, Cameron became a member of the 4th Canadian Reserve

Battalion, stationed at Bramshott. After over four months of training in the U.K., he arrived in France on June 2, 1918, as a member of the 47th Battalion, British Columbia Regiment.

Private Bissett ended up fighting in what became known as The Hundred Days Campaign. The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens in France (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km.

The second offensive in Canada’s Hundred Days Campaign was the **Battle of Arras and Breaking the DQ Line** in France (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line – a series of strong defensive trenches and fortified villages. General Sir Julian Byng called the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line “*the turning point of the campaign*”, but it came at a cost of 11,400 Canadian casualties.

On September 3, 1918, three months after arriving in France and less than eight months after being conscripted to service, Private Cameron Bissett was killed by enemy shellfire while fighting in the 2nd Battle of Arras/DQ Line. Cameron Bissett’s Circumstances of Death register records him as; *Date of Casualty: 3-9-18. “Killed in Action”. This soldier was instantly killed by an enemy shell bursting close to him as he was ‘digging in’ with the rest of his company just after an advance. Location of Unit at time of Casualty: Near Saudemont. Cemetery: Provisional & Missing Memorial. Reported location of Grave: Sht. 5lb.P.24.c.90.10.*

In mid-September 1918, Margaret Bissett would receive a telegram informing her that her only son, Cameron, had been killed in action on September 3rd, 1918. Twenty-one-year-old Cameron Bissett has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

*[Note: Ontario Birth Records record Cameron’s middle name as Robertson, but his Military Records record it as Robert].

BOLTON, Mason Walter (#331605)

Four months after completing his Military Will and eight weeks after arriving in France, Gunner Mason Walter Bolton was fatally wounded in action in Belgium. He was only twenty-one.

He was born in Adelaide, Lambton County, Ontario, on June 18, 1895, the youngest son of Charles J. and Sarah (nee Scott) Bolton. Charles J. Bolton (born January 1863) and Sarah Scott (born December 1865) were married on October 20, 1886 in Warwick Township. Mason had an older brother, Frederick George, born in Strathroy on September 19, 1891. Charles initially supported his wife and two sons by farming. In 1901, the Bolton family was residing in Middlesex West District, but a decade later, they were residing at 122 South Forsyth Street in Sarnia. Some time after 1911, the family moved out west, residing at R.R. #1, Chilliwack, British Columbia.

Both Bolton sons served in the Great War. **Frederick Bolton**, 23, enlisted on May 1, 1915 in Montreal, becoming a member of the 27th Battery, 7th Brigade, Canadian Field Artillery (CFA), CEF. He was employed as a Royal Bank clerk at the time, recording his next-of-kin as his father Charles J. Bolton in Chilliwack, B.C. Gunner Frederick Bolton arrived in Plymouth, England on August 18, 1915. His rise in the ranks was rapid.

Five months later, Frederick embarked for France, arriving in Havre on January 18, 1916. In mid-November of 1916, he was appointed in the field as Acting Bombardier of the 7th Brigade. In late August 1917, he was promoted to Bombardier of the 4th Brigade, Canadian Field Artillery.

His good fortune ran out two months later on October 30, 1917 when he was killed in action in Belgium. Bombardier Frederick Bolton’s Circumstances of Death Register records him as; *Date of Casualty: 30-10-17. “Killed in action” at Zonnebeke. Brandhoek New Military Cemetery. 1 ¼ miles West of Vlamertinghe, Belgium.* Frederick George Bolton, 26, is buried in Brandhoek New Military Cemetery No. 3, Belgium, Grave I.M.16.

Frederick’s younger brother, Mason, was living on Welwyn Street in Vancouver, B.C. and working as a

mercantile reporter when he enlisted. **Mason Bolton**, 20, enlisted in the Canadian Over-Seas Expeditionary Force in Vancouver on February 22, 1916 (nine months after his older brother Frederick had enlisted). A strapping young man, he stood six feet tall, had blue eyes and brown hair, and was single at the time. He recorded his next-of-kin as his mother Mrs. C. Bolton of Chilliwack, B.C. He was originally a member of the 68th Overseas Depot Field Battery but by early June 1916, he was stationed at Camp Petawawa and was then transferred to the 3rd Section, 4th Canadian Division Ammunition Column (DAC), Canadian Field Artillery (CFA).

Gunner Mason Walter Bolton

Private Mason Bolton embarked overseas from Halifax for the United Kingdom on September 12, 1916 aboard the *S.S. Northland*. Disembarking in Liverpool, England ten days later, he became a member of the 15th Brigade, Canadian Field Artillery, stationed at Camp Witley. Four months later, on January 25, 1917, Mason completed his Military Will on the required page of his Pay Book. He wrote, "In the event of my death I give the whole of my property and effects to my Mother Mrs. Chas. J. Bolton R.R. #1, Chilliwack, B.C. Canada". He signed the Will with Mason W. Bolton, Driver, 3rd Sec. 4th DAC.

On March 13, 1917, Mason Bolton was posted to the 82nd Howitzer Battery. Five days later, he arrived in France as a member of the 2nd Brigade, Canadian Field Artillery, with the rank of Gunner. Unfortunately, he was dead eight weeks later.

On May 11, 1917, Private Mason Bolton was killed as a result of multiple shot or shell wounds in his head, body and legs. He was taken from the battlefield but died as a result of his wounds at No. 4 Canadian Field Ambulance. His Circumstances of Death Register records him as; *Date of Casualty: 11-5-17. "Died of Wounds" at No. 4 Canadian Field Ambulance. Aux Rietz Military Cemetery. South West of Neuville St. Vaast, 3 ¾ miles North of Arras, France.* Twenty-one-year-old Mason Walter Bolton is buried in La Targette British Cemetery, Pas de Calais, France, Grave II.A.14. Five months after Mason lost his life in France, his older brother Frederick, age 26, was killed in action in Belgium.

BREARLEY, Norman Osborne (#602786)

Norman Brearley lied about his age to get into the army. After beating the odds and surviving the Somme and Vimy Ridge, Private Brearley, 17, was killed by enemy shellfire.

He was born in London, Ontario, on June 13, 1899, the youngest son of Edward and Carlina (nee Broad) Brearley. Edward Brearley (born March 1865 in Oxford County) and Carlina Broad (born October 1865 in Coburg, Ontario) were married on March 11, 1890 in Norwich, Ontario. Edward and Carlina moved from 7 Pearl Street, London; to 454 Drew Street, Woodstock; 585 George Street, Oxford; and then to 183 Terrace Hill Street, Brantford. Perhaps the many moves were because of Edward's job, originally a farmer, then a carpenter, and then a salesman at a lumberyard. The family grew to include three sons--Earl Watson (born May 1, 1891), Vernon Adolphus (born September 12, 1894) and Norman. Norman would never know Vernon who passed away in London on March 13, 1898 at the age of three.

When he was sixteen, Norman enlisted in the Canadian Over-Seas Expeditionary Force in Woodstock on

July 24, 1915, and became a member of the 34th Battalion. A discrepancy existed with his age. His official Ontario birth records indicate he was born June 13, 1899. On his Attestation papers, Norman recorded his birth year as 1897, making himself two years older than he actually was.

He stood five feet nine inches tall, had blue eyes and blonde hair, was single, and was residing at home with his parents in Woodstock at the time. He recorded his trade or calling as student, and his next-of-kin as his father Edward Brearley of 454 Drew Street, Woodstock, Ontario.

On October 23, 1915, Norman Brearley embarked overseas for the United Kingdom aboard the *S.S. California*. When he arrived in England on November 1, 1915, he was stationed at Camp Bramshott where he was transferred to the 12th Battalion. Like many recruits, he spent time at different camps and with different battalions. In February 1916, he continued his training with the 12th Battalion at Shorncliffe. In late April 1916, he trained for two months as a member of the 1st Canadian Tank Battalion (CTB), Machine Gun Company, before returning to the 12th Battalion. On July 5, 1916, Private Norman Brearley arrived in France as a member of the Canadian Infantry, 13th Battalion, Quebec Regiment.

Private Norman Brearley

The 13th Battalion was part of the 3rd Brigade of the 1st Canadian Division. As part of the 1st Canadian Division, Brearley fought with the battalion in two of Canada's major engagements in France. The Battle of the Somme (July 1-November 18, 1916) was one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. Of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties. The Battle of Vimy Ridge (April 9-12, 1917) was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps, and significant victory for Canada, later referred to as "the birth of a nation". Of the 97,000 Canadians who fought at Vimy Ridge, approximately 7,004 were wounded and 3,598 were killed in four days of battle.

The 13th Battalion remained in the area of **Vimy Ridge** following its epic capture April 9-12. They supplied parties to help clean up the battlefield and to make roads which enabled the artillery to bring up their guns. The salvage work continued in various parts of the battlefield for some days, and on April 17th, the 13th Battalion took up positions in Farbus Wood, where the men got into some of the old German dugouts. They continued to clean up the area and to repair the shattered dugouts and shelters. As they did so, enemy shellfire continually landed in their vicinity in Farbus Wood.

It was risky work and German shells claimed some victims. On the night of April 20, 1917, one casualty was Private Norman Brearley. After improbably surviving the Somme and Vimy Ridge, he was killed when his company had been relieved of its duty at Farbus Wood and was moving back to its shelter. Norman had stopped to take a rest in a shell hole and was killed by enemy shellfire. On that day, Norman was initially reported "missing" and later recorded as "previously reported missing, now killed in action." He lost his life two months before his eighteenth birthday.

His Circumstances of Death Register records him as; *Date of Casualty: 20-4-17. "Previously reported*

Missing, now reported Killed in Action.” On the night of April 20th 1917, when his company had been relieved from FARBUS WOOD and were moving back to Nine Elms, this soldier fell out at the top of Farbus Hill to rest. He was No. 1 of his Lewis gun section and carried the gun. He was afterwards found dead, having been hit by a shell which landed in the shell hole in which he was resting. Cemetery: Provisional & Missing Memorial.

Seventeen year-old Norman Brearley has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. On the Sarnia cenotaph, his name is inscribed as N. Brearly.
SOURCES: A, B, C, D, E, F, L, N, 2C, 2D, 2G, 6O, 7C, 8X, 8Y, 10Z

BROWN, Nelson William (#273002)

At age 20, popular Sarnian Nelson Brown enlisted in the Royal Air Force but he never got to serve. Days after enlisting, he contracted the deadly Spanish influenza and died in Toronto three weeks before the Great War ended.

He was born on June 6, 1898, the son of William Alexander and Martha Arilla (nee Teeter) Brown. William Brown (born September 24, 1861) and Martha Arilla Teeter (born January 1868 in Michigan) were married on February 3, 1886 in Sarnia Township. The union of William and Martha produced a sprawling family of nine children: daughters Lena May (born December 8, 1887); Myrtle Lillian (born November 9, 1892); Orral Evaline (born December 1, 1900); and Elmira Catherine (born November 14, 1904); and sons David Mitchell (born January 1, 1889); Ernest Everett (born November 19, 1894); Nelson; John Henry (born September 1899); and Roy Alexander (born August 8, 1906). The Brown family lived at 462 Maxwell Street and later 462 Christina Street, Sarnia. The family had its share of heartache when children Lena and David passed away before 1901.

William Brown worked a series of jobs to support his family. He was employed as a fisherman for a time, then a farmer, and later became a Sarnia merchant, operating a family coal, wood and ice enterprise at 226 Front Street. Nelson attended Sarnia schools and was a member of the Free Methodist Church on Russell Street.

In early October 1918, twenty year-old Nelson Brown left Sarnia and enlisted in the Royal Air Force in Toronto. Tragically, just days later, Air Cadet Nelson Brown contracted the deadly Spanish influenza. He succumbed to the disease in Toronto on October 22, 1918. His Veterans Death Card records him as: *Cadet Recruits Depot RAF. Casualty: 22 Oct. 1918. Base Hospital Toronto. Influenza.* Of note: Ontario Death Records record his death as occurring on October 23, 1918 (after four days in hospital), and the cause of death as pneumonia and broncho pneumonia.

Nelson's body was returned to Sarnia where two days later, the funeral service and internment at Lakeview Cemetery took place. The *Canadian (Sarnia) Observer* wrote this of him: *Young Brown was well and favourably known and popular among his associates.* Following is a portion of the article from the October 31, 1918 *Sarnia Observer*:

The funeral of the late Cadet Nelson William Brown was attended by a large number of friends yesterday. Services were conducted at the residence of his parents Mr. and Mrs. W.A. Brown, 462 Christina street, conducted by the Rev. Mr. Allan, interment being held to Lakeview cemetery. The pallbearers were Jack Barrie, Thomas McGraw, Lyle Smith, Stuart Hitchcock, Wesley Allen, Jas. McGraw. About ten days ago the deceased went to Toronto and enlisted in the Royal Air Force. He contracted Spanish Influenza and passed away after only a few days illness at the age of 20 years, 4 months and 16 days. Young Brown was popular and well liked by all who had the pleasure of his acquaintance. Surviving are his parents, three sisters, Misses Myrtle, Oral and Almira, and three brothers, Ernest, John and Roy, who will have the sympathy of our citizens.

World War I ended just three weeks after Nelson's death. Three years later in November 1921, by the direction of the local branch of the Great War Veterans Association, a committee under the chairmanship of J.E. Lea, carried out the decoration of the graves of soldiers buried in Sarnia and district of those who lost their lives in the Great War. J.E. Lea and members visited the Indian Reserve, the Roman Catholic cemetery and Lakeview cemetery. At each location, they held a service and placed a flag with the motto "Lest We Forget" and a wreath of poppies on each grave or memorial. Nelson Brown's grave was included. Twenty year-old Nelson Brown is buried at Lakeview Cemetery, Sarnia.

SOURCES: C, D, E, F, L, N, 2D, 2G, 7C, 8X, 8Y, 10Z, 2i

BURY, Harry Garfield (#8068)

Twenty-four-year-old Harry Bury was the second Sarnian to lose his life in the Great War and the first Lambton born casualty of the Great War. He was one of 6,000 Canadian casualties at the Second Battle of Ypres.

Harry Bury was born in Sombra, Ontario, on October 3, 1890, the eldest son of George Henry (born February 24, 1859 in Sombra Township) and Martha (nee Wells, born February 8, 1861 in Waterdown, Ontario) Bury. George Bury and Martha Wells were married on October 18, 1882 in the Township of Moore. The Bury family resided on River Road, two miles north of Sombra, and later 357 Devine Street, Sarnia. George Bury supported Martha and their two sons by farming. Harry's brother, Russell V. (born September 28, 1894), who was four years younger than Harry, was residing in Detroit at the time of Harry's death.

Prior to enlisting, Harry was a sailor on the Great Lakes, complete with tattoo marks on both forearms. He underwent his medical examination at Valcartier Camp on August 26, 1914. One month later, on September 22, 1914, twenty-three-year-old Harry Bury enlisted in the Canadian Over-Seas Expeditionary Force in Valcartier Camp, Quebec. He stood five feet eight inches tall, had blue eyes and fair hair, and was single at the time. He recorded his trade or calling as sailor, and his next-of-kin as his mother Mrs. George Bury of Sombra, Ontario.

He became a member of the Canadian Infantry, Eastern Ontario Regiment, 2nd Battalion. Less than two weeks after enlisting, on October 4, 1914, Private Harry Bury of the 2nd Battalion embarked overseas from Quebec for the United Kingdom aboard the *S.S. Cassandra*.

In early April 1915, Harry arrived along with the rest of the 1st Division of Canadians at the Ypres salient battlefield in Belgium, an area traditionally referred to as Flanders. It was here that the Canadians engaged in their first battle of the war, the **Second Battle of Ypres**, their baptism by fire. It was here that the Germans unleashed the first lethal chlorine gas attack in the history of warfare. In the first 48 hours at Ypres (April 22-24), there were more than 6,000 Canadian casualties - one Canadian in every three became casualties of whom more than 2,100 died and 1,410 were captured.

It was during the Second Battle of Ypres, on April 24, 1915, that Harry Bury was killed in action. The Commanding Officer recorded that Private Bury was, *Killed on the morning of 24th April 1915 during the occupation of the recaptured German trench aaa this trench was evacuated the afternoon of the same day aaa the field was cleared & the dead were buried by the Germans aaa the approximate location of the spot where he was killed is Ypres Reference Map 1/40000 G.17 A. 3.3 aaa it was impossible to bury any of our men during the day & we were ordered to retire at 1.30 pm the same date.*

His Circumstances of Death Register records him as; *Date of Casualty: 24-4-15. "Killed in Action". He was killed on the morning of April 24th, 1915 during the occupation of a recaptured enemy trench. Location of Unit at the time of Casualty: Attack South West of St. Julien. Cemetery: Provisional & Missing Memorial.*

Twenty-four-year-old Harry Bury was the second Sarnian to lose his life in the Great War and the first Lambton born casualty of the Great War. Harry Bury has no known grave, but is memorialized on the Menin Gate (Ypres) Memorial in Belgium, Panel 10-18-26-28.

CARSON, Joseph (#3131559)

Irish born Joseph Carson had been on the front lines for only a month when he was killed instantaneously by German machine gun fire during the Battle of Canal-du-Nord and Cambrai in France. The 26 year-old had been residing on Campbell Street when he was drafted to serve.

He was born in Fintona, Cty. Tyrone, Ireland, on July 22, 1892, the son of Samuel and Margaret Carson, of Garvallah, Siskinore, County Tyrone, Ireland. Samuel and Margaret Carson were blessed with five sons and one daughter: Edward (born 1885); Margaret (born 1889); Thomas (born 1891); Joseph; Samuel (born 1895); and Isaac (born 1899). In 1911, nineteen year-old Joseph was residing in Derrybard, Tyrone County, Ireland with his parents and his younger brothers Samuel and Isaac.

In 1913, Joseph and his brother Thomas immigrated to Canada. They departed from Glasgow, Scotland aboard the *SS Pretorian*, and arrived in Quebec on June 24, 1913. Their original intent was to work as farm labourers in Watford. Upon arriving, however, they moved to Sarnia, and lived with their relative, Mrs. William Shedden, at

322 Campbell Street. Joseph Carson was employed with Imperial Oil Company for over four years prior to joining the service.

In Europe, with the Canadian troops thinning at an alarming rate and no end to the war in sight, the government instituted the Military Service Act in 1917. When he was twenty-five, Joseph Carson was drafted under the Military Service Act of 1917, Class One. He underwent his medical examination in Sarnia on October 18, 1917 and was called to service on January 9, 1918. He reported to the 1st Depot Battalion, Western Ontario Regiment in London, Ontario. He stood five feet seven inches tall, had blue eyes and brown hair, was single, and was residing at 322 Campbell Street, Sarnia at the time. He recorded his trade or calling as a farmer, and his next-of-kin as his father Samuel Carson in Garvallah, Tyrone, Ireland.

Joseph Carson embarked overseas from Halifax for the United Kingdom on February 4, 1918 aboard the S.S. *Grampian*. He disembarked in England on February 16, 1918, and was transferred originally to the 4th Canadian Reserve Battalion, stationed at Bramshott. Three and a half months later, in early June, he was transferred to the Canadian Infantry, 47th Battalion, British Columbia Regiment stationed at Camp Witley. Joseph arrived in France with the 47th Battalion on June 2, 1918 and by mid-July, he was attached to the Canadian Corps Reinforcement Camp (CCRC). In mid-August 1918, he was deployed to the front lines with the 47th Battalion. Private Joseph Carson was soon embroiled in the intense fighting of what became known as The Hundred Days Campaign.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line “*the turning point of the campaign*”.

The third offensive in Canada’s Hundred Days Campaign was the **Battle of Canal-du-Nord and Cambrai** in France (September 27-October 11, 1918). Against seemingly impossible odds and a desperate fully prepared enemy, in a series of brutal engagements in the two weeks, the Canadians would successfully channel through a narrow gap in the canal, punch through a series of fortified villages and deep interlocking trenches, capture Bourlon Wood and the city of Cambrai. General Arthur Currie would call it “*some of the bitterest fighting we have experienced*” and it came at a cost of 14,000 Canadian casualties.

One of those 14,000 Canadian casualties was Private Joseph Carson. Mercifully, he died quickly. On September 29, 1918, during fighting in the Battle of Canal-du-Nord, Joseph died after being hit by enemy machine gun fire. In late October 1918, his relative Mrs. William Shedden in Sarnia received the news that Joseph had made the supreme sacrifice for his country on the battlefield. His Circumstances of Death Register records him as; *Date of Casualty: 29-9-18. “Killed in Action”. During operations outside of the village of Sailly, he was hit in the stomach by enemy machine gun bullets and instantly killed. Raillencourt Communal Cemetery Extension. Commune: Raillencourt. 57c.F.5.a.25.85.*

Twenty-six-year-old Joseph Carson is buried in Raillencourt Communal Cemetery Extension, Nord, France. Grave I.A.19. On the Sarnia cenotaph, his name is inscribed as R.J. Carson.

CAUSLEY, Edward Frank (#844180)

The letter from her brother overseas arrived at Margaret Causley’s home in Sarnia in October 1918, one month before the Great War ended. It contained devastating news: her son, Edward, had been killed in action. Her grief stricken brother mentions that *I nearly fainted. I could not believe it until I saw his grave. He was to communion a few days before, when I last saw him. I thought the world of him, our dear, darling boy that is gone....*

Edward Causley was born in Sarnia, on November 24, 1897, the eldest child of Levi Francis (born May 18,

1868 in Sarnia) and Margaret (nee Ward, born April 4, 1877 in Selby, England) Causley. The Ward family, parents Edward and Bridget, and their children Andrew, Margaret, Mary and James, had immigrated to Canada in 1883. They had departed from Belfast, Ireland to Liverpool, England, and arrived aboard the *SS Montreal* in Quebec on July 23, 1883. Eight years later, in 1891, the Ward parents along with their four English-born children and Sarnia-born Michael and Bridget were residing in Sarnia.

Levi Francis Causley married Margaret Ward on October 12, 1896 in a Catholic Church in Sarnia. Levi Francis and Margaret Causley resided at RR#3 Sarnia Township, later 124 Bright Street, Sarnia. In 1901, Levi Causley worked as a porter at a local hotel and later was employed as a labourer. Levi needed to work to support Margaret and his growing family of six children: Edward (baptized November 28, 1897 at Our Lady of Mercy Church with his parents and sponsors Andrew and Mary Ward present); Marie Teresa (born July 22, 1899); Leo (born June 22, 1901); Andrew (born January 3, 1904); Arthur Aloysius (born December 31, 1906); and Margaret Eileen (born May 13, 1909). Tragically, Arthur, the youngest boy in the family, passed away from cholera infantum at nine months of age on October 2, 1907.

At age eighteen, Edward Causley enlisted in the Canadian Over-Seas Expeditionary Force on January 26, 1916 in Sarnia with the 149th Battalion. He stood five feet two and a half inches tall, had blue eyes and black hair, was single, and was residing at home with his family at the time. He recorded his trade or calling as a labourer and his next-of-kin as his father Levi Causley of Sarnia Twp. R.R. #3.

Edward Causley embarked overseas from Halifax for the United Kingdom on March 25, 1917 aboard the *S.S. Lapland*. He arrived in Liverpool, England on April 7, 1917, becoming a member of the 25th Reserve Battalion, stationed at Bramshott. This was the first of many moves. On June 1, 1917, he was posted to 161st Battalion, stationed at Camp Witley, and it was here that Edward received a Good Conduct Badge on January 26, 1918 with the 161st. On February 23, 1918, he would be absorbed into the 4th Canadian Reserve Battalion, stationed at Bramshott. Six weeks later, on April 5, 1918, Edward arrived in France with the Canadian Infantry, 1st Battalion, Western Ontario Regiment.

Private Edward Frank Causley

Private Edward Causley was attached initially to the Canadian Corps Reinforcement Camp (CCRC), and by June 1918 was with the 1st Battalion at the front lines. Edward was soon embroiled in The Hundred Days Campaign, one that featured intense fighting as the end of the war neared. It was during this period that Edward was killed in action.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back,

culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called "*the finest operation of the war*", the Canadians would advance nearly 14 km.

The second offensive in Canada's Hundred Days Campaign was the **Battle of Arras and Breaking the DQ Line** in France (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line – a series of strong defensive trenches and fortified villages. General Sir Julian Byng would call the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line "*the turning point of the campaign*", but it came at a cost of 11,400 Canadian casualties.

On August 30, 1918, less than five months after arriving in France, Edward Causley was killed after being hit by enemy shellfire while fighting in the 2nd Battle of Arras. On that day, he was initially reported as "missing", and was later recorded as "previously reported as missing, now killed in action." In September 1918, Levi Causley in Sarnia received a telegram from Ottawa informing him that his son, Private Edward F. Causley, previously reported missing, was now listed as killed in action, August 30th.

Edward Causley's Circumstances of Death register records him as; *Date of Casualty: 30-8-18. "Previously reported Missing, now Killed in Action". He was hit in the head by shrapnel and died a few minutes later. Location of unit at time of casualty: Vicinity of Upton Wood. Cemetery: Upton Wood British Cemetery 8 ½ miles S.E. of Arras, France. Commune: Hendicourt Les Cagnicourt.2-5/c.51b.U.5.b.5.5.*

In October 1918, Margaret Causley in Sarnia received a letter from her brother, Jim Ward, informing her of her son's death. The following is a portion of that letter:

France, Sept. 22, 1918

My Dear Sister,

I really don't know how to start this letter. May God give you strength to bear this terrible news of our brave hero, Eddie, who was killed, charging Upton Woods in France. I was inquiring for Eddie, thinking I would see his smiling face, but when they told me the news and how brave he was, I nearly fainted. I could not believe it until I saw his grave. He was to communion a few days before, when I last saw him. How pleased I was to see him. I thought the world of him, our dear, darling boy that is gone....

He had no pain; he did not know what hit him. It was a machine gun bullet. He fought all day and went about thirteen miles on, then had the misfortune to get killed, just as they had driven the Germans out. There are three hundred in the cemetery. I will go over to his grave every day and say the beads. I have the Rosary beads he gave me in England. I am heart-broken and sorry over your terrible loss. Well, my dear sister, this is terrible and you don't know how I feel. I really loved the ground he walked on. I will write to you again soon and tell you more. With love to you and your dear family, I remain

Your loving brother, Jim

Twenty year-old Edward Causley is buried in Upton Wood Cemetery, France, Grave B.30.

CHAPMAN, William Herbert (#123017)

The front lines, Sergeant William Herbert Chapman wrote in July 1917, were "no place for an old man." The reality was that Chapman, nearly 41, was 15 years older than the average Canadian soldier in the Great War. His age did not prevent him from serving admirably on the front, a battle he wanted to fight.

He was born in Uxbridge, Ontario, on October 29, 1876, the son of Charles Dillon (born April 1846, a factory labourer, later a farmer) and Mary Ann (nee Harmon, born January 1851) Chapman. William had four siblings: Charlotte Frances (born August 1873); Frederick Ira (born April 12, 1874); Florence Alexena (born March 1880); and Della Minnie Ellen (born June 1883). Frederick, William's older brother, died before he was one, so William never knew him. In 1891, when William was fifteen, the Chapmans were residing in York West, Toronto. In 1900, they had moved to Bingham Township, Huron County, Michigan.

On February 7, 1906, William Chapman, an established contractor, married Bessie Violet Boyd (of Newfoundland, born 1885) in Etobicoke, York. Soon after, the young couple moved to Blair, Pennsylvania, where William was employed as a contracting carpenter and house builder. In Pennsylvania, the family grew with the

addition of three daughters: Della Mary (born October 12, 1906); Florence Albertha (born December 23, 1907); and Charlotte Evelyn (born December 22, 1909).

In 1911, the Chapman family moved to Lambton County where William and Bessie would be blessed with four more children, all born in Sarnia: Dorothy May (born November 18, 1911); Ruth Marguerite (born July 17, 1913); Charles Harmon (born October 3, 1914); and James Douglas (born December 7, 1915). The Chapman family would reside at Concession 9, later at 107 South Christina Street, and then 206 Maria Street, Sarnia. Many years later, James Chapman served five years with the Royal Canadian Air Force as an instrument mechanic, attaining the rank of Sergeant. He passed away at the age of thirty, on May 8, 1946 in Toronto, the result of Cachexia and Hodgkins disease. His death was recorded as a result of his military service.

Perhaps James' desire to serve was because his father had done so years before. William Chapman could certainly have chosen not to fight in the Great War, to never enlist with the Canadian Over-Seas Expeditionary Force. And people would have understood. He was a married father of seven whose youngest son was born in the year he decided to enlist. And at 38, he was at least ten years older than the typical Canadian soldier. The need to do one's duty, however, impelled William to action.

Thirty-eight-year-old William Chapman enlisted in the Canadian Over-Seas Expeditionary Force on August 27, 1915 in Sarnia, becoming a member of the 70th Battalion. He stood five feet eight and a half inches tall, had blue eyes and light brown hair, and was residing at 107 South Christina Street at the time with his family. He recorded his trade or calling as a gardener, and his next-of-kin as his wife Bessie. On April 26, 1916, William embarked overseas for the United Kingdom aboard the *S.S. Lapland* and arrived in Liverpool, England on May 5, 1916.

Like many soldiers, William experienced an indirect route to the front lines, full of training, delays and transfers. Chapman was initially stationed at Shorncliffe, and on July 6, 1916, was transferred to the 39th Battalion and promoted to the rank of Sergeant, stationed at West Sandling. Three months later, on October 6, 1916, he was transferred to Canadian Casualty Assembly Centre (CCAC), at West Sandling. The following month, on November 4, 1916, William returned to Canada aboard the *S.S. Northland* on a granted furlough scheduled to December 16, 1916. His furlough was then extended another month to January 16, 1917. While in Canada, the 39th Battalion was absorbed by the 6th Reserve Battalion, which transferred William to the 257th Battalion in Canada.

William Herbert and Bessie Violet Chapman
Daughters (L to R) Florence, Della and Charlotte

The Chapman children;
Della, Florence, Charlotte, Dorothy, Ruth, Charles, James

On February 13, 1917, Chapman, now 40, enlisted again, this time in Ottawa. It was not necessary for him to re-enlist, as he had not been discharged and was still a member of the 257th Battalion (it was an error on the part of the 257th Battalion to have him re-attested). On this Attestation Paper, he recorded his present address as 206 Maria Street, and his occupation as a building contractor. He also recorded that he had previous military experience as he had served with the 70th and 39th Battalions overseas for seventeen months. On February 16, 1917, he embarked overseas again from St. John, New Brunswick for the United Kingdom aboard the *S.S. Missanabie*. He was never to see Bessie or his children again. After arriving in England on February 27, 1917, he joined the 257th Battalion, then known as the 7th Battalion, Canadian Railway Troops. Chapman was stationed at East Sandling, and later Hastings, with the rank of Sergeant.

What makes William Chapman's experience memorable today is the written correspondence he shared with his friend, Thomas Peacock, a Sarnian who resided at 294 Wellington Street and worked as a G.T.R. Conductor. Following is the excerpt of a letter Thomas received in March 1917, one that William penned before he was deployed to France.

Dear Friends

Just a few lines to let you know how and when we arrived and how I am standing it. Well, we were not long in getting away from Canada after I joined the battalion. I reported at Renfrew on Saturday night, February 9 and we left Ottawa for overseas Tuesday, evening, Feb. 12th at 10:30. Had a rather slow trip to St. John's, New Brunswick. Did not arrive there until noon on the following Friday. Immediately went aboard ship. We sailed about 6:30 p.m. on the same Friday on which we boarded the ship. Arrived at Halifax about 2 a.m. Sunday and got our escort on another troop ship and we never knew what troops were on board of it until we arrived at our camp in England when we saw them march in and take quarters alongside of our battalion. We had a very pleasant and uneventful passage most of the way over, no rough seas at all but quite a few of the men got seasick just the same but I stood it like a veteran never missed a single meal or felt the least bit sick at any time and also never felt the least alarm about our safety at any time, not even when passing the danger zone. The last night out we were right in the midst of the submarines...

We arrived in Liverpool harbor in the evening and got off the boat or rather disembarked at nine o'clock on Tuesday morning and took the train for our destination which proved to be Penfleet Camp, Essex, only 17 miles from London at five o'clock in the evening... We were in being on the first ship to disembark as we got quartered in tin huts and the battalions off the other vessel had to go into tents. We had fine weather here until Saturday evening. It was bright and fine spring weather, birds singing and little lambs running around the fields and the farmers sowing grain; but when we got up Monday morning the ground was covered with a two inch fall of snow, which made it sloppy, but we are lucky enough to be camped on sandy soil. Next day was colder with heavy cold raw winds and we feel the cold worse than the zero weather in Canada, the climate is so damp over here. Today the sun came out bright and looked like a fine day but the wind came up again and clouded up and have just had a squall of snow. The surface of the ground is slightly frozen but saw a farmer planting potatoes yesterday with a plow.

In his letter, William discussed a weekend pass he had in London, describing the many sights that he had seen including Petticoat Lane, Trafalgar Square, Buckingham Palace, the Canadian jubilee gates, Hyde Park, the Queen Victoria monument, the residences of the Queen-mother and of the Duke of Connaught. He also gave details about having dinner at the King George and Queen Mary Soldiers' Club on Charing Cross Road and seeing the House of Parliament, Westminster Abbey and Westminster Cathedral. His letter then continues...

Expect to be soon going over as we had our medical inspection last Monday... We are expecting to get 100 mules tomorrow for our transport. A battalion alongside of us just got their 100 mules today and, believe me, it is lots of fun watching them tying them and hobbling them to the picket rope. We are looking forward to some better weather soon and I am anxiously looking for letters.... Please excuse the writing as one has to write under difficulties.

I remain as ever, your friend

Sergt. W.H. Chapman

257th Railway Con. Batt., C.E.F.

On March 29, 1917, William Chapman arrived in France, a member of the 7th Battalion, Canadian Railway Troops. These railway units played a major role in the construction and maintenance of railways of all gauges, including light railways, to transport troops and materiel to the Front Lines of the five British Army areas in France and Belgium. Their work was made more difficult by an undulating terrain full of obstacles, an almost impassable sea of mud and the constant threat of enemy gun and shell fire. On more than one occasion, it also became necessary for the railway troops to transfer themselves into fighting men.

William advanced in rank from Corporal, and by mid-June 1917, was a Sergeant. In August 1917, Thomas Peacock received another letter from William. His friend's letters, always honest and occasionally visceral, describe the horrors of the front and his unwavering belief in the Allied cause. The following is an excerpt from that letter:

Somewhere at the Front,

Thurs., July 5, 1917

Dear Friend and Bro.

Just a few lines to let you know that I am still well at present, but working hard. We have had some very

strenuous times at this part of the front as you have no doubt seen by the papers of the past month. It took lots of hard work and preparation to make the move successfully, but it was accomplished day and night under constant observation of the enemy, and he tried to put every obstacle in the way by sending over all kinds of shrapnel and high explosives. But still we outwitted him and when the time came our artillery simply smothered him with one of the greatest bombardments the world has ever known. Part of his works was blown up by one of the largest blasts ever set off. You could bury a large farm in the crater or hole of the same. Hundreds of Hun were buried in it and will never come out till judgement day. I saw the craters of no less than three of those mines. I had the opportunity of being on the battlefield directly after the big advance and saw some terrible sights. Fritz's trenches for a mile in depth were literally wiped out... Dead Germans lying all over, some partly buried by shells, some caught in the ruins of their trenches as they had been trying to climb out to come over to us to give up, others lying dead in their concrete dugouts where they had crawled to die, or by being bombed by our advancing Tommies...

We are all looking forward to the time we push the cruel Hun to final defeat which we hope will come soon. But it looks like as though those still at home will have to send a few more over to make good our losses. Victories are never won without paying the price, which in this case is human lives and must draw heavily upon the young manhood of the country as it is indeed a young man's war, for it is no place for an old man.

I was lucky enough to see the explosion of the mines mentioned, and believe me, it was a sight the like of which few will ever have the pleasure of seeing again. It literally filled the air with flame and the tremble of the ground was felt for miles around. It was a grand spectacle if one could forget that part of the setting was human lives. Talk about rivers being red with blood, here it was shell holes filled with water that was red with blood. There is nothing to compare to the work of our guns. If you see their results you would think as one German sergeant, a prisoner, said to me, that a fly could not go through the fire, and come out alive, let alone a human being. The prisoners I saw looked pretty tough, being from young boys to old men, and looked pretty shaky from the dreadful mauling they went through. Have had quite a number of miraculous escapes myself from high explosive shells and shrapnel. One sharp piece of shrapnel split the end of my thumb and cut down my puttee, ripping it or rather cutting it all down the outside of my left leg about a week ago, and three pieces put three dents in my steel helmet or "Easter bonnet" as I got it issued to me Easter Sunday, but did no further harm. The steel helmets are a God send as they ward off many a serious blow on the head which might cause a fatal wound. I had a dozen or more high explosive shells burst within fifteen and twenty feet of me and still escaped unhurt.

While I was in charge of a detachment of men on advance patrol I was on the same detachment duty for 10 weeks, and never lost a man of my patrol, but all have had some wonderful narrow escapes. It was a night patrol and sometimes had to prowl around with gas helmets on. You can imagine how interesting it was to us with gas masks on a dark night – worse than being out on the railroad on a dark night. I came off patrol two weeks ago, and believe me it is a big relief to get at something else, although we still see plenty of shells. They go whizzing over our camp at night and the nervous lads go running around chattering like magpies. I think you might just as well stay in your bed as try to run around dodging them in the dark. You are just as liable to run into one as not. I don't like them, but I feel just as safe in bed as out although a tent don't offer much protection from splinters of shell.

Had His Gracious Majesty King George around our part of the front yesterday along with the Commander-in-Chief of the British Forces here, Sir Douglas Haig. We are glad to see the advance guard of the American forces have arrived in France to help us along, and believe me, every little bit is welcome. Has the conscription bill finally passed at home yet? It seems to me to be the only fair way to get men as so many stand back and wait under the voluntary system, and let the other fellow do all the fighting, while they stay at home and enjoy all the comforts, while the other has to suffer the hardships incidental to war. They have had some terrible air raids in England. It seems horrible to think they slaughter the innocent women and children, but if they think that will stop our boys they are mistaken, as it makes them all the more determined to crush the cruel Hun. Things begin to look better on the Russian side again now.

I guess I will have to close for this time, but wish to thank the kind friends who have sent me papers and magazines, as papers are a luxury here. When I read them they are passed on to someone else. I met Sergt. Bill Walker a Sarnia man of the old 70th Batt. about a month ago, but he is a Sergt-Major now.

I remain as ever your friend,

Sergt. W.H. Chapman, 123017, A Company, 7th C.R.T., B.E.F., France.

PS. How is your garden coming on? You said you had turned gardener. My wife says she has a lovely one this summer. Wish I was there to eat some of it.

Peacock received a third letter from William in August 1917. A portion of the letter, dated ten days after the previous letter, reads as follows:

*Somewhere at the Front,
Sunday, July 15, 1917
Dear Friend,*

Just a few lines to let you know that I am still here and still on top, although my previous injury to my back bothers considerable at times, but I am still hanging on. I received a letter a few days ago from Col. R.I. Towers, colonel of the old 70th, and wish he was in command of us now. He is at home at present for a short time. Had a heavy rain last night filling up ditches and shell holes and holes in cross-country transport tracks with water and believe me, the continual stream of ammunition column teams soon turn wet clay into mud. Six horses are hitched to each ammunition wagon and when it comes wet and muddy, the reason for so much horse power is easily ascertained, for they have to drag the wagons through some awful holes, and it is simply astonishing the number of horses and mules it requires to handle things over and above the hundreds of thousand motor transports. We see some fine horses here and it is a common sight to see nice horses and mules lying dead along the road, killed by shell fire, as the poor horses get it just the same as men.

I used to think the war would end this summer, but the summer is going fast and still the end is not in sight. Hope it don't go into the winter, as winter here is just harsh, you know. Canadian winters are much more comfortable....

I guess you will have conscription by the time this reaches you. I have been informed that myself and 5 or 6 other men have been mentioned by the commanding officer for coolness and bravery under shell fire. I had charge of an advance patrol continuously without relief for ten weeks and one night when the three N.C.O.'s in charge of an emergency repair crew brought their men in, took them and myself and repaired three large shell breaks in the line under continuous shrapnel and high explosive shell fire. Kept the men at work and finished the repairs and got the men back without a casualty. I did not like the job but ammunition had to be got up to the guns, and we could not let a battery be lost through lack of ammunition, so we have to do our duty.

I sent you a German steel shrapnel helmet. You can give the German water bottle that is inside to my wife. I thought you would like something from the front as a souvenir and hope it reaches you safely. I remain as ever your friend.

Sgt. W.H. Chapman, 123017

As part of the 7th Battalion, Chapman would have taken part in the Attack on Hill 70 and Lens in France (August 15-25, 1917). It was the second-largest Canadian military undertaking up to that point in the war, second only to Vimy. It was the first major battle orchestrated by Canadian commander Lieutenant-General Arthur Currie and the first time German forces used flame-throwers and mustard gas against the Canadians. Known as "Canada's forgotten battle of the First World War", the Canadians were able to capture Hill 70 but not the city of Lens, at a cost of approximately 9,100 Canadians listed as killed, wounded or missing

Two months after writing the above letter, on September 27, 1917, Corporal William Chapman lost his life as a result of gun shot wounds in the abdomen received while fighting in Belgium. He had been admitted to No. 61 Casualty Clearing Station (CCS) on September 21, 1917, and would pass away there six days later as a result of his wounds (two days before his 41st birthday).

In October 1917, Bessie received the following letter from the chaplain of the Battalion:

*Mrs. W.H. Chapman, Sarnia, Ontario
Dear Madam,*

France, Oct. 6, 1917

You have no doubt already learned of the death of your husband, W.H. Chapman, of this battalion, and of the cause. On behalf of the commanding officer and all ranks of the battalion, I beg to offer you our most sincere sympathy. Your husband died at the post of duty. He came here knowing the danger, and he bravely made the noble sacrifice, the greatest any man can, for a good cause. Assuredly he will receive a splendid reward hereafter. Let this be your consolation in your bereavement. He was buried in a military cemetery attached to the hospital where he died, alongside so many others who have also laid down their lives at the call of duty. Assuring you once more of our sincerest sympathy.

Sincerely yours, J.R.O. Gorman, Chaplain

William's Circumstances of Death Register records him as; *Date of Casualty: 27-9-17. "Died of Wounds" (Gunshot Wound Abdomen) at No. 61 Casualty Clearing Station. Dozinghem Military Cemetery, Belgium. Commune: Westvleteren 2 ½ miles N. of Poperinghe. 2.44c.27.F.11.a.5.7.* William Chapman left behind his wife Bessie and their seven children. Forty year-old William Chapman is buried in Dozinghem Military Cemetery, Belgium, Grave V.F.7.

CHESTER, Frederick Aloysius (#214292)

Frederick Aloysius Chester was only 22 when he was on sentry duty on a September night during the Battle of the Somme, one of the bloodiest and most futile battles in history.

He was born in Sarnia, on November 23, 1894, the son of John and Isabella Chester, of 315 North Brock Street. Twenty-one-year-old Frederick Chester enlisted in the Canadian Over-Seas Expeditionary Force on April 14, 1916 in Windsor, Ontario with the 99th Overseas Battalion, Canadian Expeditionary Force. He stood five feet nine inches tall, had blue eyes and grey hair, was single, and was residing at 176 Bagg Street in Detroit, Michigan at the time (his parents were still in Sarnia). Frederick recorded his trade or calling as Chief Clerk, and his next-of-kin as his father John Chester of 315 North Brock Street, Sarnia. On May 31, 1916, Frederick Chester embarked overseas from Halifax for the United Kingdom aboard the *S.S. Olympic* (*Titanic's* sister ship).

He disembarked in Liverpool, England on June 8, 1916, and a month later, was transferred to the 35th Canadian Reserve Battalion at West Sandling. On August 6, 1916, he was transferred to the Canadian Infantry, 19th Battalion, Central Ontario Regiment and the next day, Private Chester arrived in France with the 19th Battalion. One week later, his unit was at the front lines.

Private Chester ended up fighting France during the **Battle of the Somme** (July 1-November 18, 1916), one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

The second major offensive of the Somme battle was the week-long Battle of Flers-Courcelette (September 15-22). It was here where tanks made their first appearance in the war. Frederick Chester lost his life in the days leading up to this offensive.

On September 13, 1916, Frederick Chester was killed by enemy shellfire during the Battle of the Somme. His Circumstances of Death Register records him as; *Date of Casualty: 13-9-16. "Killed in Action". While on sentry duty, in the front line trenches about 10 P.M. on September 13th 1916, he was instantly killed by shrapnel from an enemy shell. Location of Unit at the time of Casualty: COURCELETTE. Cemetery: Missing Memorial Card only. Reported locations of grave: Sheet 57d.S.E.R.35.d.*

Twenty-one-year-old Frederick Chester has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. On the Sarnia cenotaph, his name is inscribed as F.J. Chester.

CORRICK, Alfred James (#3131566)

When the popular Alfred James Corrick was wounded in the Battle of Valenciennes in France ten days before WWI ended, no one realized how serious his injury was.

He was born in Sarnia, on July 12, 1884, the youngest son Robert Charles (born April 2, 1846 in Taunton, Somerset, England) and Mary (nee McNally, born April 10, 1842 in Middlesex, England) Corrick. Robert (born April 2, 1843 in England) and Mary (born April 10, 1844 in England) Corrick immigrated from Kent, England to Canada in 1872. They ended up in Sarnia by accident. From their port of arrival, Robert, Mary and their three young children at the time, left by train for their intended final destination of Toronto. On arrival, they didn't get off the train, not realizing they were in Toronto. So they remained on the train until it reached the end of the line – Sarnia.

Robert, a labourer/bricklayer by trade, became a stonemason and started a successful contractor business in Sarnia. One of the first homes he built was the Corrick family home at 404 George Street. To keep the cold out, he constructed the home with two layers of yellow-coloured bricks—bricks unique to Lambton County. His business also got the contract to build the first Sarnia General Hospital at Mitton and George Streets.

Altogether, Robert and Mary were blessed with ten children: Charles Robert (born June 28, 1864); Louise Emily (born December 11, 1867, though she passed away shortly after); Emma Louise (born November 27, 1869); Annie Josephine (born April 21, 1871); Frederick (born November 20, 1873); John Augustus (born June 21, 1876); Andrew (born November 21, 1878); Alice Helen (born May 17, 1881); Alfred; and Beatrice Mary (born September 1, 1886). Years later, Charles and John moved to Detroit where they started their own contracting business that became quite successful. Alfred would join his brothers in Detroit on occasion to help construct homes.

By all accounts, Alfred was a pretty quiet individual, a skilled athlete and popular among a large circle of

friends in Sarnia. He went by “Alf” to his friends and family members. He took an active part in sports and was a baseball player of considerable ability. He was known as “Home Run Haggerty” for his batting prowess. He was a member of the local Maple Leafs indoor baseball team that won the Canadian championship, along with two of his brothers and a brother-in-law (B. Luscombe). Following is a portion of a June 1972 *Sarnia Observer* story written by O.N. (Red) Wilson:

*Rube McCart, probably the greatest softball pitcher in Sarnia’s history, bloomed during the closing days of the last century and the beginning of the 1900’s. He pitched the Maple Leafs indoor baseball team to the Canadian championship twice between 1898, when it was organized, and 1905 when it disbanded. Names of that great team are familiar to Sarnians today even if the faces are not. Andy Corrick caught; Earl Drake and W.A. (Bill) Watson played first base; Jack Corrick, second; J.B. Williams and Wm. Tennant, third; Wm. Pierce and Jimmy Thomson, shortstop; Billy Luscombe, Eddie Mills, Bob Nelson and **Alf Corrick**, outfielders. Charlie (Mike) Fleming was the manager; Fred Stanley and George B. Dawson, presidents, and Billy McDonald the club’s official referee.*

Front row, second from right: Alfred Corrick
 Front row, left side: Bill Luscombe (brother-in-law)
 Back row, right side: Jack Corrick (brother)

Alfred became a member of Sarnia Lodge, No. 126, I.O.O.F. and by trade was a mason, following in the footsteps of his father and brothers. When Alfred was twenty-seven, his father Robert, a local contractor, passed away in Sarnia on December 12, 1911 at the age of sixty-five.

In Europe, with the Canadian troops thinning at an alarming rate and no end to the war in sight, the government instituted the Military Service Act in 1917. Shortly after, thirty-three-year-old Alfred Corrick was drafted under the Military Service Act of 1917, Class One. He underwent his medical examination in Sarnia on October 4, 1917. He was called to service on January 9, 1918 in London, Ontario, reporting to the 1st Depot Battalion, Western Ontario Regiment. He stood five feet six inches tall, had blue eyes and brown hair, was single, and was residing with his widowed-mother on George Street at the time. He recorded is trade or calling as a bricklayer and his next-of-kin as his mother Mrs. Mary Corrick of 404 George Street.

On January 8, 1918, prior to his leaving for service, members of the Bricklayers Union No. 23 held a send-off for Alfred in the Board of Trade room. The following is a portion of the address given by the Union chairmen and signed by the Union president, as they presented Alfred with a gift of a wristwatch:

We, your brother members of local No. 23 Ontario, meet here tonight with mingled feelings of pride and regret. Tomorrow we all know you leave the old home town and all your old associations, for a grand purpose, that of serving your king and country and doing your little bit, with lots of boys who have gone before. Bro. Corrick, we have all known you for a number of years now and we have always found you to be a good upright and honest union man; and when you leave tomorrow for London to don the khaki you will take with you the good wishes of the union for a safe journey to France and then a happy reunion when the boys come marching home.... May this little token of our regard, ever remind you of your friends across the sea.

Alfred then spoke about how much he appreciated what they were doing. A few members delivered short speeches which expressed their regret at losing Brother Corrick. At the end of the social, all the boys joined together in wishing him the best of luck for a pleasant journey and a safe return. Within six months, Alfred was fighting in the front lines in France.

On February 4, 1918, Alfred Corrick embarked overseas from Halifax for the United Kingdom aboard the

S.S. Grampian. Arriving in England on February 16, 1918, he was initially posted with the 4th Canadian Reserve Battalion in Bramshott. Three and a half months later, on June 1, 1918, Private Corrick was transferred to the Canadian Infantry, 47th Battalion, Western Ontario Regiment. He arrived in France the next day and, two weeks later, was with the 47th Battalion at the front lines.

Private Alfred Corrick

Alfred (R), all “kitted up”

During his time overseas, Alf Corrick often wrote many letters home to his mother and siblings. Below is a postcard that he wrote on June 10, 1918 to his sister Beatrice. On the back he wrote: *Dear Sister, Just a souveneir of France I got tonight having an easy time just now. Yours lovingly, Alf*

In October 1918, Alf sent a letter home to his widowed mother in Sarnia from France. In it, he expressed that he was doing his bit and he was well. He also stated that he had several narrow escapes; and that two of his comrades on a gun had been put out of action, one being killed and the other wounded.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

Alfred Corrick took part in all of the major offensives during this campaign. The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line “*the turning point of the campaign*”.

The third offensive in the Campaign was the Battle of Canal-du-Nord and Cambrai (September 27-October 11, 1918). Against seemingly impossible odds and a desperate fully prepared enemy, the Canadians fought for two weeks in a series of brutal engagements--successfully channelling through a narrow gap in the canal, punching through a series of fortified villages and deep interlocking trenches, and capturing Bourlon Wood and the city of Cambrai. General Arthur Currie would call it “*some of the bitterest fighting we have experienced*”.

After taking Cambrai in the second week of October 1918, Canadian forces advanced tentatively toward Valenciennes, the last major French city in German hands. Through the third and fourth weeks of October 1918, using artillery and battle patrols, they pushed east against the retreating German forces, occasionally running into significant opposition, and Canadians continued to die by the score every day.

At Valenciennes, the Germans stopped running – they held every advantage in this heavily-fortified city protected by a canal. In the **Battle of Valenciennes**, France (November 1-2, 1918), the Canadians were able to capture the city through two days of desperate fighting that included urban warfare. This last set-piece battle, the last major prearranged assault staged by the Canadian Corps, cost the Canadians 501 casualties. Private Alfred Corrick was one of those casualties.

On November 1, 1918, Private Alfred Corrick was wounded by enemy gunfire at Valenciennes. That same day, he was admitted to No. 6 Casualty Clearing Station with shrapnel wounds in the left hip/buttock. Six days later, on November 7, 1918, the Canadians would cross into Belgium toward their final goal, the German-occupied city of Mons. On November 8, 1918, Alfred Corrick was admitted to the Kitchener Military Hospital in Brighton, England with “severe shell wounds”. Three days later, on November 11, 1918, the Canadians liberated the city of Mons and World War I would end.

While recovering in hospital, Alf sent letters home to his friends in Sarnia, in which he reported that he was progressing well (he demonstrated satisfactory improvement for one month in recovery); however, complications arose, as he had symptoms of blood poisoning (streptococcus pyaemia) from the shrapnel wounds that required two more operations. They were to no avail.

On January 9, 1919, he was in hospital reported as “seriously ill”, and four days later, he was “dangerously ill”. It was unexpected news in Sarnia when on January 13, 1919, one year after his send-off in Sarnia, and two months after the war’s end, Alfred Corrick died in Kitchener Military Hospital, Brighton, as a result of the wounds that he had received two months earlier.

Alfred Corrick was the last man with his name on the Sarnia cenotaph to lose his life in the Great War. His death was officially recorded as: *Died of wounds, (previously reported wounded), dangerously ill. Gun shot wound: Buttock Septicemia. Kitchener Military Hospital, Brighton.*

In the early 1950s, a family member discovered a box of letters in the family home on George Street. The letters were those written by Alf from England and France to his mother and his younger sister Beatrice, with whom he had always been close. Unfortunately, the letters were destroyed after a family member, upon reading them, felt they were too sad a reminder of his tragic death in the Great War.

Thirty-four-year-old Alfred Corrick is buried in Seaford Cemetery, Sussex, United Kingdom, Grave A.549. On his grave marker are inscribed the words, IN LOVING MEMORY OF ALFRED J. CORRICK BORN 12TH JULY 1884 DIED AT BRIGHTON 13TH JAN: 1918. FRANCE: NOW HERE – AT REST.

NOTE: The Commonwealth War Graves Register records his death date as January 13, 1919, which is correct; however his grave marker incorrectly records his death as January 13, 1918.

COULTER, William James (#334850)

William James Coulter beat the odds by surviving the Battle of Passchendaele, but the enemy was relentless. Four days after the battle ended, Gunner William Coulter was felled by enemy gunfire.

He was born in Woodstock, Oxford County, Ontario, on January 21, 1897, the only son of William John Coulter Sr. (of Stratford, Perth, Ontario) and Belinda Jane (nee Clark, of Oxford, Ontario) Coulter. William Coulter Sr. (born February 2, 1866) and Belinda Jane Clark (born August 22, 1871) were married on March 16, 1892 in Oxford County. To support his wife and four children, William Coulter Sr. worked as a carpenter, then as a machinist, and later as a County Constable policeman. William and Belinda Coulters first three children—daughters

Isabelle Louise (born October 26, 1892); Annie Gertrude (born December 12, 1894); and William Jr.—were born in Woodstock. Mildred Jane was born in Lambton County on July 31, 1907. At some point, William Coulter Jr. moved to Petrolia and later resided in Sarnia. Prior to enlisting, he was employed as an express driver by the Canadian Express Company and also at the Northern Navigation Company in Sarnia.

Nineteen year-old William Coulter enlisted in the Canadian Over-Seas Expeditionary Force on April 24, 1916 in Guelph, Ontario with the 64th Depot Battery, Canadian Field Artillery. He stood five feet nine and one-quarter inches tall, had greyish blue eyes and brown hair, was single, and was residing at home with his parents in Sarnia at the time. He recorded his trade or calling as an express driver, and his next-of-kin as his father William John Coulter of 345 South Vidal Street, Sarnia.

On November 23, 1916, Coulter embarked overseas from Halifax for the United Kingdom aboard the *S.S. Mauretania*. Disembarking in Liverpool, England on November 30, 1916, he became a member of the Composite Reserve Brigade, Canadian Field Artillery based at Shorncliffe. Just over three months later, in mid-March 1917, he was appointed Acting Bombardier with the Reserve Brigade in Shorncliffe.

On March 21, 1917, William arrived in France with the Shorncliffe Composite Battery and was attached as a re-enforcement to the 1st Canadian Divisional Ammunition Column (CDAC). He then reverted to the rank of Gunner. Not long after arriving, he would be with the four divisions of Canadian Corps that took part in the Battle of Vimy Ridge in April 1917. It was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps, and significant victory for Canada, later referred to as “the birth of a nation”. Of the 97,000 Canadians who fought at Vimy Ridge, approximately 10,600 became casualties.

Gunner William James Coulter

A few years earlier, on December 25, 1914, William’s sister Annie Gertrude married George Henry Williams (born May 21, 1890 in Lilley near Wantage, Berkshire, England) in Sarnia. When twenty-four-year-old George Williams (William Coulter’s brother-in-law) got married, he was already a soldier, having enlisted on October 26, 1914 in Sarnia with the 18th Battalion, CEF. Private George Williams (a locomotive fireman prior to enlisting), embarked overseas in mid-April 1915 with the 18th Battalion, first training in England, then moving to France in September 1915. While overseas, his wife Annie resided with her parents, William and Belinda Coulter at 345 Vidal Street. George Williams rose up the ranks to Sergeant, then Sergeant Major and then to Lieutenant. In the area of the Somme, Sergeant George H. Williams was awarded the Military Medal (MM) “for Bravery in the Field”, dated December 21, 1916. Fifteen months later, Sergeant George Williams was awarded the Distinguished Conduct Medal (DCM) “for gallantry and distinguished service in the field”, dated March 28, 1918. The DCM reads, “For conspicuous gallantry and devotion to duty in organizing a new line after the trench had been destroyed by an enemy barrage. During a heavy bombardment he succeeded in establishing communication with the company on his right.

He was unceasing in his efforts in getting rations up to the front line and guiding stretcher parties.” Also during his time overseas, George Williams was wounded yet remained on duty in May 1917, and was later hospitalized for a time in July 1918 recovering from influenza. George Williams served 34-months in France, and returned to Canada, being discharged on demobilization in mid-March 1919. While still overseas, Lieutenant George Williams would only be a few hundred yards away from his brother-in-law, William Coulter, when he was fatally wounded.

On July 7, 1917, William Coulter was transferred to the 8th Brigade, Canadian Field Artillery. He later advanced to the rank of Corporal, receiving his stripes in the field. By mid-October 1917, Gunner Coulter had arrived with the Canadians in an area traditionally referred to as Flanders, Belgium known as Passchendaele. The **Battle of Passchendaele** (October 26 – November 10, 1917) was waged in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and glutinous mud. Overcoming almost unimaginable hardships and horrific fighting conditions, the Canadians achieved a remarkable victory that few thought possible. But it came at a cost of almost 12,000 Canadian wounded and more than 4,000 Canadians killed.

William survived the worst of Passchendaele, but he could not escape the constant fighting. On November 14, 1917, Gunner William Coulter was wounded in action by enemy gunfire in the days following the Battle of Passchendaele. He was taken to No. 3 Casualty Clearing Station but lost his life that day, as a result of the gunshot wounds in the left thigh that also severely fractured his left femur. When William Coulter met his death, he had been acting as Sergeant in place of his own Sergeant, who had been killed beforehand.

Before learning of his son’s death, William Coulter Sr. had received a letter from his son. William Jr. had also sent home his belt and many souvenirs, including buttons from German prisoners as well as buttons and emblems representing regiments from Australia, South Africa, Manitoba, Calgary Battalions, Royal Engineers, Mounted Rifles, Infantry, Gordon Highlanders, 48th Highlanders, Connaught Rangers, American Battalion, C.V.O., Buglers, Northumberland Hussars, and Devonshire Regiment, R.C.H.A. Also included in the collection were two paper knives that had been skillfully hammered out of shells. In late November 1917, one week after receiving his son’s letter and souvenirs, William Sr. received the following telegram:

Wm. John Coulter, 345 South Vidal Street, Sarnia

Deeply regret to inform you that 334850, Corporal William James Coulter, artillery, officially reported died of wounds, 3rd Casualty clearing station, Nov. 14, 1917, gunshot wound in left thigh. *Director of Records*

William Coulter’s Circumstances of Death register records him as; *Date of Casualty: 14-11-17. “Died of Wounds” (Gunshot Wound Fracture Left Thigh) at No. 3 Casualty Clearing Station. Lijssenthoek Military Cemetery. 1 ¾ miles South West of Poperinghe, Belgium.* Twenty year-old William James Coulter is buried in Lijssenthoek Military Cemetery, Belgium, Grave XXII.DD.6. On his headstone are inscribed the words, OUR ONLY SON. SOURCES: A, B, C, D, E, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z, 3h

COWAN, Stewart

Stewart Cowan was a successful barrister who left his family and girlfriend behind to fight for a cause he believed in. Less than a year after he enlisted, Lieutenant Cowan was killed at the Battle of the Somme.

He was born in Sarnia on April 30, 1890, the son of John and Eliza Ann (nee McIntire) Cowan. His paternal grandparents’--John Cowan Sr. (the eldest of nine children, born 1815 in Roxburghshire, Scotland) and Catherine Katie (nee Sinton, the eldest of six children, born 1819 in Roxburghshire, Scotland) Cowan--had left Scotland and sailed for Canada in 1849 in what became a memorable voyage for the Cowans for two reasons. John Cowan Sr. had married Catherine Sinton on April 1, 1842 in Roxburghshire, Scotland, and they had three children there, Annie (born July 1843), Mary (born May 1845) and Agnes (born October 1847). John Sr. and Catherine Cowan and their three children immigrated to Canada in July 1849. It was what happened during their cross-ocean voyage that made it memorable.

First, their youngest child Agnes, just over a year-and-a-half in age, passed away during the Atlantic crossing. Her parents hid their young daughters’ body in a lifeboat to avoid her being buried at sea. After arriving in America, they buried Agnes properly in New York. Secondly, Stewart’s father, John Jr., was born on July 8, 1849 during this trans-Atlantic voyage—or “on the high seas” as it became known in Cowan family lore.

It was the reports of excellent agricultural opportunities open to one in America that induced John Cowan Sr. to leave Scotland and come with his family to Ontario. After a short residence in Galt the family settled in 1850 upon

a farm in Huron County, and engaged in agriculture. As much of the land was new he had the undesirable task of clearing and breaking it, but in time he had as good a farm as any in the vicinity. Settling in Ontario, John Sr. and Catherine Cowan (Stewart's grandparents) were blessed with another six children to their family: Agnes (born 1852); Hector (born May 1854); James (born October 1856); Jean (born October 1858); Catherine (Kate, born April 1861); and Maggie (born 1863). John Cowan Sr., a successful farmer and father of ten children, passed away in March 1894 at age 79. Catherine Katie Cowan (nee Sinton) passed away the following year in July 1895 at age 76. John Cowan Sr. and Catherine Katie Cowan are buried in Maitlandbank Cemetery in Seaforth, Huron County.

John Cowan Jr., son of John Sr., started life as an ordinary farm boy growing up in Huron County. He had an inquisitive mind and a thirst for knowledge making him a promising student. In his early 20s he was hired out as schoolmaster in the township of Hibbert, Perth and spent his spare moments in the study of law. He went on to graduate from Osgoode Hall, Toronto in 1879, was admitted to the Bar the same year, and began practicing law in Dresden, Kent County. Six months later he moved to Watford and practiced law there until 1883. In February 1883, he formed a partnership with Mr. Lister, of Sarnia, and the Cowan family moved to Sarnia. In 1898, the firm of Cowan and McCarthy was formed, and the following year it was changed to Cowan, McCarthy and Towers. In September 1901, the firm became Cowan and Towers. A successful solicitor, he acted in that capacity for the townships of Sarnia, Moore, Warwick, Brooke, Dawn, the town of Sarnia and other municipalities, also for the Traders Bank, the Industrial, Mortgage & Savings Co., and several other institutions.

On August 31, 1881, thirty-two-year-old John Cowan Jr. married twenty-seven-year-old Eliza Ann McIntire (born April 28, 1854 in Huron County) in Stratford, Perth County, Ontario. John Cowan was residing and practicing law in Watford when he married Eliza. Eliza Ann was the daughter of John (a farmer) and Caroline Mary (nee Phelps) McIntire, and was residing in Stratford when she married John. John Jr. and Eliza Ann Cowan eventually settled in Sarnia and lived at 322 North Christina Street. John Jr. had a successful practice and they had a sprawling family of eight children together: Caroline Mary (born December 17, 1883); Kate Sinton (born October 27, 1885); John Jr. #2 (born January 6, 1888); Stewart; Annie (born December 15, 1892); Susan McIntire (born February 11, 1896); Hector (born April 4, 1897); and Frank Phelps (born March 1, 1900).

Cowan family circa 1906
 Back (L to R): Caroline, John Jr #2., Stewart, Kate
 Middle (L to R): Eliza (mother), Annie, Hector, John Jr. (father)
 Front (L to R): Susie, Frank

In 1891, the Cowan household included parents John Jr. and Eliza, and their children: Carrie (age 7); Kate (age 5); John Jr. #2 (age 3); and Stewart (age 1); along with lodger Eliza Phelps (age 61); and domestic (general

servant) Mary Heslip (age 28). Twenty years later, in 1911, the Cowan family residing at 322 Christina Street included parents John Jr. and Eliza, their children: Carrie (a stenographer, father's office); Kate (a nurse); John Jr. #2 (a law student); Stewart (a law student); Annie, Susie, Hector, and Frank; and their fifteen year-old Scottish-born servant Elizabeth Cuchan (born May 1896, had immigrated to Canada in 1901).

Stewart's younger brother **Hector Cowan** also served in the Great War. On January 22, 1916, eighteen year-old Hector Cowan, standing five feet eight and one-quarter inches tall, with blue eyes and fair hair, enlisted in Sarnia with the Canadian Over-Seas Expeditionary Force (about seven weeks after his brother Stewart had enlisted). Hector was a student at the time, residing with his family on Christina Street.

Private Hector Cowan was initially a Gunner (Cadet) in the 43rd Overseas Battery, Canadian Field Artillery (CFA), 11th Howitzer Brigade. From training camp in Guelph, Hector embarked overseas on February 26, 1916 aboard the *SS Missanabie*, arriving in England on March 12, 1916. He initially trained at Bramshott Camp, and one month later, arrived at Witley Camp. On May 25, 1916, he was transferred to the 10th Brigade, CFA., and three weeks later embarked from Portsmouth arriving in Havre, France, with the rank of Acting Sergeant. Hector would take part in the Battle of the Somme, one of the bloodiest battles in history, one that his brother Stewart would lose his life in.

On October 22, 1916, two weeks after his brother Stewart had been killed in action, Hector wrote the following letter from somewhere in France to his father John in Sarnia:

Dear Dad,

Just a little note to tell you that things are going fine and that I'm well. I suppose things have been rather blue at home lately and I can assure you that my sympathy has been with all the family. To you who are so far away from actual war the news must have come as a shock but to me Dad it was different I knew from Stew would fall sooner or later, the sooner the better for him, its the same with all infantry men they might get wounded but its just a prolongation of the worst, its simply impossible to live through what they have to endure. Ewart Towers came through for a year but now he's gone it will be the same with all of them. I haven't heard yet how Lyle and Geof came out of it but am hoping for the best. The casualties amongst our Canadian battalions were pretty large and in a few cases there is just enough men left in a brigade to make up one battalion, that is one out of every four have gone. I've been trying to locate Stewart's grave through his regiment's chaplain and as I expect word any day from him I'll see that the grave is tended to and fixed up to the best of my ability. I'll also mark and locate it well.

Now Dad since one of us has made the sacrifice I suppose you will be worrying more about my safety. I wouldn't if I were you, there's a huge difference between artillery and infantry and I'll be just as careful as I can be, the chances we run in this branch are nothing like the ones the infantry runs.

I've seen some pretty barren spots in my life but I don't think any of them can compare to this country. Around here in peace time it must be bad enough but after seeing this war its something beyond description from here up to our line I can honestly say that there isn't one tree left standing, everything is either knocked off by shells or blown up by mines, up the road from our horse liveries there used to be a town but I passed through it four times before I ever knew there was a town there at all its the same all the way up just mud and wreckage, there is a road up the line a little way where the Germans first tried to make a stand I wish you could see it now there isn't ten square yards of it that hasn't been hit by a shell do you wonder that infantry can't live through it, the way we shoot ammunitions around here is something terrible if a German battery fires anyways near any of our guns we open up and throw back a hundred for his one, consequently not many German shells come over. I think they are beginning to believe that we really have the upper hand over them if you could have seen the surprising look on some of the German's faces that came down yesterday you would believe that they thought they were nearly done for, they say that the war will be over in two months in that I can't believe it is true if next summer sees the end of this war I'll be satisfied. I was telling Mother to-night we had quite a scrap here yesterday, it came off at noon and by three o'clock in the afternoon German prisoners started to come down it sure looked good to see them too they all had that war-worn look about them and underneath that look of disgust and hatred you could see that they were quite satisfied to be alive and safe at last. There is a Canadian hospital just across the road from us and we watched the wounded arrive and leave. They get out of the ambulance at one end of the hospital, go through have their wounds dressed get ticketed either to England or to France then get into the ambulance again & by next morning they are in England its simply wonderful how fast they can put them through.

Ed and I and a boy from Pembroke a friend of Mr. Homes are living together in a sand-bag hut, we have a real good grate fire and the shack keeps out cold and the rain so we are fine, lots to eat, lots of cards and lots of time

to sleep. To-day is Sunday I hate to think of it, over here its just the same as any other day I think that's what I'll enjoy most when I get home, church and decent Sundays again. I believe the British army is making quite a mistake by ignoring religion, if it doesn't show up here it will when all the men are turned loose again.

I must close Dad, the candles getting low and six o'clock comes pretty early. Hoping you and the family are in the best of health. I am

*Your loving son
Hector Cowan*

Almost one year later, on May 5, 1917, Hector Cowan was transferred to the 8th Army Brigade, CFA. On July 29, 1917, he was granted 10 days leave to Paris, before he rejoined his unit. On October 4, 1917, he was attached to the 1st Army Rest Camp for twelve days. On November 23, 1917, he was admitted to No. 99 Field Ambulance, diagnosed with "synovitis right knee", and was then transferred to No. 18 General Hospital, Camiers. Two months later, on January 29, 1918, he was discharged from hospital.

By February 6, 1918, Hector Cowan had rejoined the 8th Army Brigade in the field. In mid-March 1918, he was granted 14 days leave in the U.K., and then rejoined his unit in the field on April 8. In early October 1918, Hector was transferred to England posted to the Canadian Artillery Reinforcement Depot (CARD) at Camp Witley, with a view to being granted a commission in the CFA. The Great War ended in November 1918. In early January 1919, Hector Cowan returned to Canada, arriving in Halifax on January 17. He was discharged on demobilization from the Canadian Field Artillery, with the rank of Cadet, in London, Ontario on February 6, 1919, and returned to Sarnia.

Hector Cowan, after graduating from the University of Toronto, like his father and his late brother Stewart, became a successful lawyer in Sarnia with Cowan, Cowan and Gray Barristers. On March 22, 1924, twenty-six-year-old Hector Cowan married twenty-four-year-old Lillian Henrietta Hayes at St. Andrew's Church in Sarnia. Hector and Lillian were blessed with three children together: Alexander Hayes (born August 20, 1925 but sadly passed away one week later); Joan (born July 11, 1927) and Anne. In March 1936, Hector Cowan skipped his team from the Sarnia Curling Club (along with William McCart, Alex Hayes and Murray Chilton) to a championship winning the Ontario Silver Tankard (Southern Ontario provincial championship). Tragically, just seven months later, on October 17, 1936, Hector Cowan was involved in a fatal car accident in Detroit. He and Maurice Chilton were on their way home from a Saturday football game when their car was in a collision with another vehicle at an intersection. Maurice Chilton was slightly injured and Hector Cowan was killed in the accident. Hector Cowan, 39, is buried in Lakeview Cemetery, Sarnia.

Hector Cowan

Lawyer Stewart Cowan

Stewart Cowan grew up in the family home on Christina Street in Sarnia and was an active young man. He attended Sarnia public elementary schools and Sarnia Collegiate where he played high school football and was a member of the Sarnia Collegiate Cadet Corps in 1907. He also enjoyed pick-up hockey games on Sarnia Bay in the winter. After high school, Stewart attended University College 1907-08; Delta Kappa Epsilon; Law School. After

graduating he became a barrister (lawyer) in Sarnia, practicing law with his father with the firm of Cowan, Towers and Cowan. He became well known outside the law firm by being a member of the newly formed Sarnia Golf Club Limited and becoming a member of the Masons in Victoria Lodge No. 56 in 1915.

Stewart was also dating a young lady, Pauline Louise Pardee, who came from a prominent family. Pauline (born January 3, 1893) was the daughter of Senator Frederick Forsyth Pardee (born December 29, 1867, Sarnia) and Mary Eleanor Johnston (born November 1, 1867, Goderich). Frederick Pardee and Mary Johnston had married on December 31, 1891. Stewart and Pauline's relationship was serious enough that they were "an item" and there was talk of marriage.

Twenty-five-year-old Stewart Cowan enlisted (and underwent his medical examine) in the Canadian Over-Seas Expeditionary Force on November 26, 1915 in London, Ontario. He completed his Officers' Declaration Paper, Canadian Over-Seas Expeditionary Force, on December 14, 1915, in London, Ontario, becoming a member of the 70th Battalion, with the rank of Lieutenant. He stood five feet nine inches tall, was single, and was residing at home with his parents at the time. He recorded his trade or calling as lawyer, his prior military experience as a member of the 27th Militia Regiment, and his next-of-kin as his mother Eliza Cowan of 322 Christina Street.

John (L) and Stewart (R) with their mother Eliza Cowan (ca. 1912)

On April 24, 1916, Lieutenant Stewart Cowan embarked overseas from Halifax for the United Kingdom with the 70th Battalion. In July 1916, Mrs. W.B. Elsworth of Sarnia received the following letter from Stewart while in England:

Dear Mrs. Elsworth,

Two dozen pairs of socks arrived today. I distributed them amongst Sarnia men who are with us. They were certainly more than glad to receive them and being from home they were doubly welcome. I wish you could have seen the men double out of their tents when they heard, "socks from Sarnia" called out. They asked me to thank the members of the Pro Patria Chapter, I.O.D.E. and to say that the socks were needed, as Kitchener boots are to say the least, a bit rough on socks.

I notice that you sent three dozen pairs. As I expect to leave for France any day now I have arranged for the distribution of the third dozen when they arrive. Our battalion is pretty well broken up. We have only about five hundred men left, and by the end of this week all the officers except five will be in France. About sixteen are there are now. Everybody would have liked to have gone across as a unit. But the Battalions in France have to be reinforced, so we are being sent to several different battalions.

Again many thanks for the socks and best regards from everybody here to all the members of the chapter.

Yours sincerely, Stewart Cowan

Shorncliffe, England July 5th, 1916

Two days after writing the above letter, on July 7, 1916, Lieutenant Cowan joined the Canadian Infantry, 24th Battalion, Quebec Regiment, CEF. On that same day, he disembarked in Boulogne, France. The next day, he joined the 24th Battalion "in the field" at the front. Lieutenant Stewart Cowan took part in the fighting during the **Battle of the Somme** (July 1-November 18, 1916), one of the bloodiest and most futile battles in history. The

Somme battle lasted for more than four brutal months, and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

Lieutenant Stewart Cowan

Seven weeks after arriving, on September 1, 1916, he injured his rib, but was only out of action for one day. The second major offensive of the Somme battle was the week-long Battle of Flers-Courcelette (September 15-22). It was here where tanks made their first appearance in the war. The Battle was a stunning success for the Canadians, but it came at a cost of over 7,200 casualties. One month after injuring his rib, on October 1, 1916, Stewart Cowan lost his life “in the field” while fighting during the Battle of the Somme. He was initially recorded as, “Reported from base – killed in action 1-10-16”. His Circumstances of Death register records him as; *Date of Casualty: 1-10-16. “Killed in Action”. Killed while leading his Platoon over the parapet in an attack on enemy trenches. Location of Unit at the time of Casualty: COURCELETTE.*

The Cowan family later learned that the night Stewart was killed, brother Hector Cowan had arranged for a friend to take his shift so that he could go look for his brother. Hector along with another Sarnian and Cowan family friend Richard Lesueur, were not able to find Stewart’s body or his grave. Stewart Cowan’s body was never recovered and he has no known grave.

Following is the report on Stewart Cowan’s death from the October 13, 1916 *Sarnia Observer*, under the heading “LIEUT. STEWART COWAN MAKES SUPREME SACRIFICE”:

Another Sarnia young man has laid down his life for King and Country in the person of Lieut. Stewart Cowan, son of Mr. and Mrs. John Cowan of this city, and a promising young law student, who was killed in action somewhere in France. Sunday morning a cablegram was received by Mr. Cowan from Col. R.I. Towers in England, stating, “All Sarnia boys well on the 5th.” In the evening another cablegram was received from Col. Towers stating, “Death of Stewart Cowan reported. First information was incorrect. Trying to verify later report.” The receipt of the latter cable brought sorrow to the parents, relatives and many friends of the young soldier who was one of the most popular young men of this city. He took an active interest in all athletic sports and was especially active in the great winter game of hockey. He qualified for a Lieutenant and went overseas with the 70th Battalion leaving London last Good Friday, April 21st.

Days later, a memorial service for Lieutenant Stewart Cowan was held at St. Andrew’s Presbyterian Church. Before a church filled to capacity, Reverend Mr. Patterson quoted from scripture the words, “Now when the centurion saw what was done, he glorified God, saying, certainly this was a righteous man.” Following is a portion of the words spoken by Reverend Mr. Patterson:

The note of respectful admiration inherent in the Roman Centurion’s tribute to the dead Christ is being re-echoed these days. We are conscious of it as we scan the weary casualty lists that appear with such monotonous regularity, day by day. We should be conscious of it in all memorial services—the least the Church can do for men

who have fallen in a righteous cause. In the midst of deep sorrow for losses sustained, our admiration for the heroic fortitude of our dead soldiers should bind us closer to the cause for which they died, and fill us with an ever-increasing resolve that their sacrifice will not be in vain.

... we hold this memorial service—over one young in years but who has fought a good fight and finished his course, having held fast the Faith. Stewart Cowan left us in all the flush of young manhood, buoyant, eager, enthusiastic, anxious to do his share in the world-war, as he was ever willing and anxious to do his share in anything that came to his hand. His cheeriness and kindliness of spirit endeared him to us all. He was preeminently manly in word, deed, character—just the type who would have been a credit to his profession—to the community in which he lived, and the Church in which he worshipped. When the call to arms came, he could do nothing else—he had to go. When the last great call came we believe he met it fearlessly, and without regret.

Our farewell to men of this type while sad, is not all sadness. It is both proud and sad. Sad indeed for the loss sustained, but proud that the dead left behind an unblemished character, that they hastened home early to their God, without reproach. Surely in some other sphere God has a great place and work for the hosts of young men who are appearing before him with the dew of their youth upon them.

The service concluded with Reverend Patterson appealing for donations on behalf of the British Red Cross Fund, the organist playing the Dead March, and the congregation singing the National Anthem, “bringing this most impressive service to a close.”

Pauline Louise Pardee, who had been dating Stewart before he went to war, ended up marrying Stewart’s older brother John, on March 19, 1919 in Sarnia. Pauline and John Cowan resided on Vidal Street and had two children together: Jane (born 1920) and John (born 1924). Years later, John served with the RCN in World War II.

In the mid-1930’s, Pauline and her friend, Mrs. Rooney, travelled to France to pay her respects at the grave of Stewart. In the area of Vimy, she purchased from street vendors, a ceramic arrangement of white roses and a ceramic wreath of white roses. Her intention was to leave these on Stewart’s grave. It was not until she was in France that she learned that Stewart had no grave. Stewart Cowan’s name, however, is inscribed on the Vimy Memorial, which was unveiled on July 26, 1936.

According to family members, Stewart’s parents, John and Eliza, rarely mentioned the son whom they had lost in the Great War. Pauline, however, strove to keep Stewart’s memory alive. When she returned to Sarnia with the two ceramic white rose carvings, she displayed them on a table in their family home. Today, they are the possession of her son, John.

When Pauline passed away in March 1986, she had outlived her husband, John (died January 1965), by over three decades. Both John and Pauline Cowan are buried in Lakeview Cemetery in Sarnia.

Lakeview Cemetery is also the final resting place of Stewart Cowan’s parents; John Jr. (died June 10, 1926) and Eliza Ann Cowan (died July 16, 1938). Twenty-six-year-old Stewart Cowan has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France, and has a memorial stone in Lakeview Cemetery in Sarnia.

CRAWFORD, Robert Palmer (#46570)

Promoted to Lance Corporal just three months before, Robert Palmer Crawford, 29, was killed in the Battle of the Somme on September 7, 1916. Inscribed on his gravestone in France are the words HE DIED FOR KING AND COUNTRY.

Robert was born in Petrolia, Ontario, on November 2, 1886, the middle son of George Johnson Adair and Lomila Kathleen (nee Stafford) Crawford, of Lambton East (Enniskillen). The family later moved to Sarnia and lived at several addresses: 323 Christina Street, then 279 Russell Street, and 110 Victoria Street. George Crawford (born 1859 in Perth County), an engineer, and Lomila Stafford (born 1859 in Dawn Mills) were married on March 19, 1877 at the bride’s father’s house in Marthaville, just outside Petrolia. George and Lomila had eight children together: sons Clifford (born 1885); Robert and Royal Bruce (see below); and daughters Bessie (born 1879); Cora (born 1881); Celia Grace (born April 1892); Murtle (born August 1893); and Vera Agnes (born June 20, 1900).

Prior to enlisting, Robert was working as a farmer and had served two years with the 27th Lambton Borderers Militia. At age twenty-eight, he enlisted in the 37th Battalion, Canadian Expeditionary Force, at Niagara Camp on May 27, 1915. Perhaps he was influenced by his younger brother Royal, age eighteen, who had enlisted

seventeen days earlier. Robert stood five feet ten inches tall, had blue eyes and fair hair, and was single at the time. He recorded his trade or calling as farmer, and his next-of-kin as his mother, Mrs. Lomila Crawford of 279 Russell Street. Less than one month later, on June 20, 1915, he was transferred to the 17th Reserve Battalion, with the rank of Private. Tragedy struck the Crawford family on July 20, 1915 when father George Crawford (an engineer) age fifty-six, drowned in the St. Clair River.

On September 6, 1915, Robert Crawford arrived in France, and was transferred to the Canadian Infantry, 15th Battalion, Central Ontario Regiment. On March 30th of 1916, Robert sent this letter from France to his widowed mother Lomila in Sarnia:

Dear Mother,

Just a few lines to let you know I am well and kicking. I have not had any mail for some time. In fact our mail system seems to have been all shot to pieces lately, or else everyone has quit writing, and I hate to think the latter. However I expect that everything will be all right soon as things are settled down again. We have moved again since my last letter. At this rate we will soon see the most of France and Belgium. We are in Belgium at present, but quite a way from the front line. This is a fine day but we have had some very nasty weather lately with cold winds and heavy frosts, but spring must come soon now. I will be pleased when the warm weather comes again. I had a few pictures taken in the last town we were in. If they are any good I will send some, otherwise I won't. Best to all.

Your loving son, Bob

On June 3, 1916, Robert was with the 15th Battalion (48th Highlanders, Machine Gun Section), and was promoted in the field to Lance Corporal. Three months later, the Lance Corporal from Lambton County was killed in France while fighting during the **Battle of the Somme**. The Battle of the Somme, waged from July 1-November 18, 1916, was one of the most futile and bloody battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

On September 7, 1916, Lance Corporal Robert Crawford was wounded in action during fighting at the Somme. He was taken to No. 49 Casualty Clearing Station (CCS) with a gunshot wound in the left shoulder. He never left the CCS and five days later, on September 12, he was dead as a result of his wounds.

Robert died only ten days prior to his younger brother Royal's arrival in France. Robert's Circumstances of Death Register records him as; *Date of Casualty: 12-9-16. "Died of Wounds" (Gunshot Wound Left Shoulder) at No. 49 Casualty Clearing Station. Contay British Cemetery, 2 miles West of Warloy-Baillon, 7 ¼ miles west of Albert, France.*

On September 19, 1916, Lomila, now living on Durand Street, received a telegram from Ottawa informing her that her son Robert was officially reported as wounded. The following day she received another telegram from the War Record Office at Ottawa. The latter official telegram reads as follows:

MRS. L. CRAWFORD, 132 DURAND STREET,

DEEPLY REGRET INFORM YOU NO. 46570, LANCE-CORP ROBT PALMER CRAWFORD, OFFICIALLY REPORTED DIED OF WOUNDS, 49TH CASUALTY CLEARING STATION, SEPT 12TH, GUNSHOT WOUNDS SHOULDER.

SIGNED, O.I.C.R.O.

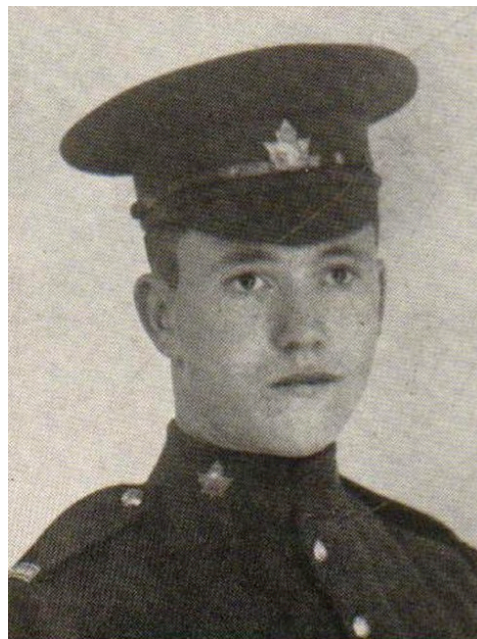

The headline in the September 22, 1916 edition of the *Sarnia Observer* read *Two Sarnia Young Men Make Supreme Sacrifice*. The second Sarnian besides Robert was Captain Norman Ewart Towers who had died of wounds eight days after Robert Crawford. (Norman Tower's story is included in this Project on page 385).

Lance Corporal Robert Crawford, 29, is buried in Contay British Cemetery, Somme, France, Grave I.C.2. On his headstone are inscribed the words, HE DIED FOR KING AND COUNTRY. Approximately two years later, Lomila Crawford lost a second son in France, twenty-one-year-old Royal Bruce Crawford. With eerie similarity, she first received the news that Royal was wounded and missing; then days later, she received the news that he had been killed in action.

Lance Corporal Robert Palmer Crawford

Lieutenant Royal Bruce Crawford

CRAWFORD, Royal Bruce (#400908)

The death of decorated lieutenant Royal Bruce Crawford caught many at home by surprise. In mid-October, 1918, an article in the *Sarnia Observer* stated that *Sarnia is proud of Lieut. Crawford, as it has every reason to be. Going to the front he has worked his way from the rank and file to the commissioned officers' ranks... His mother received his Military Medal a few days ago and is justly proud of the honor her son has brought on her home.* Unknown to anyone in Sarnia at the time, Royal had been killed in action on October 1, 1918.

Royal was born in Sault Ste. Marie, Ontario, on December 28, 1896. Royal was the youngest son of George Johnson Adair and Lomila Katharine (nee Stafford) Crawford, of Lambton East (Enniskillen). The family later moved to Sarnia and lived at several addresses: 323 Christina Street, then 279 Russell Street, and 110 Victoria Street. George Crawford (born 1859 in Perth County), an engineer, and Lomila Stafford (born 1859 in Dawn Mills) were married on March 19, 1877 at the bride's father's house in Marthaville, just outside Petrolia. George and Lomila had eight children together: sons Clifford (born 1885); Robert Palmer (see above) and Royal; and daughters Bessie (born 1879); Cora (born 1881); Celia Grace (born April 1892); Murtle (born August 1893); and Vera Agnes (born June 20, 1900).

Prior to enlisting, Royal was employed as a clerk in the office of the Imperial Oil Company. At age eighteen, he enlisted on May 10, 1915 in London, Ontario with the 33rd Overseas Battalion, Canadian Expeditionary Force. (His older brother Robert, age twenty-eight, enlisted seventeen days later). Royal stood five feet eleven inches tall, had brown eyes and black hair, and was single at the time. Royal recorded his trade or calling as Clerk, and his next-of-kin as his mother Mrs. George Crawford of 279 Russell Street. It must have been a difficult time for his mother. Not only did she see two of her sons going off to war, but tragedy struck when her husband, 56-year-old George Crawford (an engineer), drowned in the St. Clair River on July 20, 1915.

Royal received training in London, Ontario and by December 1915, had been promoted to the rank of Corporal. He embarked overseas on March 13, 1916 aboard the *S.S. Lapland* and arrived in England on March 26, 1916 with the 33rd Infantry Battalion, with the rank of Acting Corporal. Royal trained at Shorncliffe and then West Sandling. He revealed his strength of character when, on September 9, 1916, he reverted to the rank of Private at his request, so that he could get to the front sooner. He got his wish.

Royal Crawford arrived in France with the 1st Canadian Battalion on September 22, 1916. Upon his arrival, the first news he received was that Robert, his older brother, had been killed only ten days prior to Royal's arrival in France. This was a severe blow to young Royal. By early October 1916, however, Royal was with his unit in the trenches of the front lines.

On February 17, 1917, Royal was admitted to No. 2 Canadian Field Ambulance, where he remained for

eighteen days while recovering from Inflammation of Connective Tissue (ICT) in his feet, a common condition of soldiers in the trenches. Royal went on to earn his commission in the field, first being promoted to Lance Corporal. In June 1917, Royal Crawford sent a letter home to his widowed mother, Lomila, in Sarnia. The following is a portion of that letter:

Dear Mother,

I am well and getting along alright. Hope the folks are all well over there. The weather still continues fine and that is a great thing here. The country looks very nice just now only they have a nasty habit of blowing the scenery into little bits every now and then. But I guess we can stand it if Fritz can.... Hope this is soon over, so we won't have to do much writing. By the way, you can address my letters to Lance-Corporal Crawford now....

Roy

His superiors were taking note of Royal's actions in the field. On November 1, 1917, he was promoted to the rank of Corporal, then to Lance Sergeant, and on December 1, 1917 to the rank of Sergeant. In December 1917, he was awarded the Military Medal (MM) for his bravery on the field. The award reads, "*At Passchendaele on Nov 6th 1917 this N.C.O. immediately took command of the platoon when his Platoon Commander was killed during the early stages of the attack. This N.C.O. succeeded in capturing and consolidating the portion of the objective allotted to his platoon. After the objective had been gained he acted as C.S.M. the Coy S.M. having become a casualty, and rendered invaluable services in consolidating position gained. By his courage and skill he assisted greatly in keeping up the spirit of the men. Although wounded he remained on duty until the Company was relieved.*"

Recognizing his worth, his superiors recommended him for a commission, and on February 5th, 1918, he was returned to Bramshott, England to begin his course to fit him for a commissioned officer's post. Attached to the 4th Canadian Reserve Battalion, he received training at Canadian Training Schools in Shorncliffe, Camp Witley and Bexhill. Royal Crawford received his commission as Lieutenant on August 6th, 1918. In early September 1918, Lomila received her son's Military Medal that he had won for bravery on the field. It brought her great joy and pride and, perhaps, helped her forget Robert's death. On September 17, 1918, Lieutenant Royal Crawford returned to France, arriving first at the Canadian Corps Reinforcement Camp (CCRC). Ten days later, he rejoined his old unit in France, the "Fighting First" Battalion, Western Ontario Regiment.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the "beginning of the end" of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called "*the finest operation of the war*", the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line "*the turning point of the campaign*".

The third offensive in Canada's Hundred Days Campaign was the **Battle of Canal-du-Nord and Cambrai** in France (September 27-October 11, 1918). Against seemingly impossible odds and a desperate fully prepared enemy, the Canadians fought for two weeks in a series of brutal engagements. They successfully channelled through a narrow gap in the canal, punched through a series of fortified villages and deep interlocking trenches, and captured Boursin Wood and the city of Cambrai. General Arthur Currie would call it "*some of the bitterest fighting we have experienced*" and it came at a cost of 14,000 Canadian casualties.

On October 1st, 1918, Lieutenant Royal Crawford of the Canadian Infantry, 1st Battalion, Western Ontario Regiment, was killed while fighting in the Battle of Canal-du-Nord and Cambrai. He was initially reported as "wounded and missing", and later recorded as "killed in action" on the same day.

In mid-October 1918, word of Royal's death had not reached home in Sarnia. The *Sarnia Observer* printed an article on the two Crawford boys, noting that Robert had already made the supreme sacrifice. For Royal, it reported on his rise in the ranks, on his wounding and recovery, and on the Military Medal that he was awarded. It also stated:

... Sarnia is proud of Lieut. Crawford, as it has every reason to be. Going to the front he has worked his way from the rank and file to the commissioned officers' ranks, and if his past history is any criterion of what his future is to be, the young hero has not by any means reached the apex of his military career.

Previously to enlistment Roy was employed on the office staff on the Imperial Oil Company, where he has many friends, who are glad to hear of his successes in the war and hope for the return of his strength to enable him to carry on in the heroic way he has to date. His mother received his Military Medal a few days ago and is justly proud of the honor her son has brought on her home.

A few days after the above article appeared in the *Observer*, Lomila received a telegram informing her that her youngest son, LIEUT. ROY BRUCE CRAWFORD WAS OFFICIALLY REPORTED WOUNDED AND MISSING OCTOBER 1ST. A few days later, she received another telegram, this one informing her that her son, ROYAL BRUCE CRAWFORD, WHO HAD BEEN PREVIOUSLY REPORTED MISSING AND WOUNDED, IS NOW REPORTED KILLED IN ACTION, DATE OF CASUALTY, OCTOBER 1ST, 1918.

The news must have been devastating for widowed Lomila. Robert first, in September 1916, and now Royal two years later.

Royal Crawford's Circumstances of Death register records him as; *Date of Casualty: 1-10-18. "Previously reported Wounded and Missing, now Killed in Action. Was killed by machine gun bullets through the abdomen and one lung. Location of Unit at time of Casualty: VICINITY OF BLECOURT. Sancourt British Cemetery. 10 ¾ miles South East of Douai, France. Royal Crawford, 21, is buried in Sancourt British Cemetery, Nord, France, Grave I.C.19. On his headstone are inscribed the words, HE DIED FOR KING AND COUNTRY.* SOURCES: A, B, C, D, E, F, L, N, 2C, 2D, 2G, 7C, 8A, 8X, 8Y, 10Z

CREIGHTON, Thomas (#24657, also A2878)

Born in England, Thomas Creighton had immigrated to Sarnia at age thirty-five and made the Imperial City his home. A few years later, he was married and working steadily and his wife, Clara, and he were parents to Thomas Jr., their only child. Thomas, now 38, enlisted with every intention of serving overseas, but died before he got the chance.

Thomas was born in Camberley, Surrey, England, on August 31, 1876, the son of Michael (born 1850 in Ireland) and Mary (nee Degan, born 1849 in England) Creighton, of South Farnborough, England. Michael and Mary Creighton had eleven children together: seven sons--William (born 1875); Thomas; James (born 1877); Francis (born 1883); Harry (born 1885); Christie (born 1887); and Frederick (born 1889). Their four daughters were Bridgett (born 1870); Ellen (born 1873); Mary (born 1880); and Winifred (born 1893).

In June 1911, Thomas, 35, departed Liverpool, England and arrived in Canada. He disembarked in Montreal and made his way to Sarnia, with plans to be a general labourer. Six months after arriving in Sarnia, on December 16, 1911, Thomas married twenty-eight-year-old Clara Harcourt (born October 1883 in Suffolk, England, daughter of Walter and Louisa Harcourt).

Thomas Creighton was employed as a painter at the time. Early in 1911, Clara had been residing in Hertfordshire, England, residing with William and Mabel Farrell, where she was employed as a General Servant. Clara had arrived in Port Huron, Michigan in June 1911 to visit her brother Arthur Samuel Harcourt (born 1878) and his wife Lilly who had immigrated to Port Huron the previous year.

After their marriage, Thomas and Clara had one child together: Thomas (Junior) Michael Walter Creighton, born July 1, 1912 in Sarnia. Of note: Thomas' brother-in-law, twenty-seven-year-old Arthur Harcourt, enlisted in the CEF on May 24, 1917 in Windsor, Ontario (he and his wife Lilly were residing in Detroit at the time). Arthur had served in the Boer War with the Norfolk Regiment, and in the First World War he served in England with the 21st Regiment, CEF. He was discharged in January 1919.

At age 38, Thomas Creighton enlisted in the Canadian Over-Seas Expeditionary Force in Sarnia on January 16, 1915. He stood five feet seven inches tall, had hazel eyes and fair hair, and was residing with his wife and son at 268 London Road at the time. Thomas recorded his previous military experience as: twelve years with the York and Lancashire Regiment in England and time with the 27th Militia Regiment in Sarnia. He recorded his trade or calling as fireman, and his next-of-kin as his mother Mary Creighton of South Farnbough, Hants., England.

Thomas Creighton became a member of the Army, Canadian Infantry, 34th Battalion, Central Ontario

Regiment, with the rank of Private. Two weeks after enlisting, on February 1, 1915, Thomas was promoted to the rank of Sergeant, attached to the 34th Battalion, Machine Gun Section. Though scheduled to go overseas, Thomas did not have the opportunity to do so.

On February 20, 1915, Thomas took ill and was taken to Guelph General Hospital. He was given the best of care including the services of a special nurse both day and night; however, on February 27, 1915, less than six weeks after enlisting, Thomas Creighton passed away due to pneumonia. He died at Guelph General Hospital, the Circumstances of Casualty officially recording him as; *Date of Death 27-2-15. Pneumonia – Admitted to hospital 20-2-15. Given every care and attention. Had special nurse night and day. Cemetery: Our Lady of Mercy, Sarnia, Ontario. Single grave, C.1, wooden marker.*

Thomas' funeral notice was in the Guelph and Sarnia newspapers.

TO BE LAID AT REST WITH MILITARY HONOURS

Funeral of Sergt. Creighton of 34th Battalion, To Be Held Tomorrow.

Guelph, February 28, 1915 – The remains of the late Sergeant Thomas Creighton, of the 34th Battalion, who died in the general hospital here, were conveyed to the Grand Trunk station at 11 o'clock this morning with full military honors for burial at Sarnia. It was one of the most impressive sights seen in this city for some time. The casket was placed on a gun carriage and the cortege was led by the Salvation Army band, playing the dead march from Saul. The 34th bugle band played "Last Post" and "Lights Out" at the station as the train moved out.

Thomas' remains arrived in Sarnia the next day, accompanied by an officer and six privates from the 34th Battalion, who acted as pallbearers. The funeral took place from his late residence, 268 London Road, on March 2, 1915 to Our Lady of Mercy Church and then to the Roman Catholic cemetery for internment. It was conducted with military honors and a firing party of twelve men from the wireless and Tunnel guards that had been detailed for duty for the occasion. The 27th regimental band also attended the funeral.

Thomas Creighton, 38, is buried in Our Lady of Mercy Roman Catholic Cemetery, Sarnia. On his headstone are inscribed the words, LOVING WIFE AND SON. After Thomas' death, Clara returned to England, and later remarried. Her second husband, Arthur George Groves, and she lived at Chesterfield, Derbyshire, England, and had two children together: Clara Louisa and Percy Ernest Groves.

CROUCHER, Jesse Henry Edward (#602611)

Less than four months after arriving in France, Jesse Henry Edward Croucher, 28, was killed in action at the Battle of the Somme. Private Croucher has no known grave, but is memorialized on the Vimy Memorial, Pas de Calais, France.

Jesse Croucher was born in Herne Bay, Kent, England, on May 28, 1888, the son of English-born parents John Thomas and Annie Marie (nee Anderson) Croucher. John Croucher (born February 1848 in Sittingbourne, Kent, England), a labourer/brick maker at the time, married Annie Anderson (born April 1846 also in Sittingbourne, Kent, England) in England in 1865. John and Annie Croucher were blessed with twelve children together: three sons-- James Thomas (born 1868); John Thomas Jr. (born 1870); and Jesse--and nine daughters. They included Alice Matilda (born 1866); Harriett Ann (born 1872); Anne Susan (born 1875); Louisa Jane (born 1877); Elizabeth Jane "Rose" (born 1883); Isabelle (born 1885); Lizzie (born 1889); Florence Eleanor (born September 1890); and Violet May (born 1895).

Jesse originally enlisted with British Royal Engineers and Army Service Corps in Canterbury, England on December 29, 1908 when he was twenty. Like his father, Jesse was a brick maker.

Things changed for John and Annie Croucher when they, along with at least two of their children, Jesse and Violet, immigrated to Canada in 1910. Jesse, 21, arrived at the Port of Quebec aboard the passenger ship *Empress of Britain* on July 21, 1910. He listed his destination as Watford and his intended occupation as farm labourer. A number of other Croucher family members also immigrated to Canada (and Sarnia), including Jesse's siblings James Thomas, John Thomas Jr., Elizabeth "Rose", Florence and Violet May. By 1911, John and Annie, along with Jesse and Violet, were residing in Warwick Township, where both John and Jesse were employed as brick makers. Brother John Thomas Jr. also served in the First World War, as a Private with the British Army, Labour Corps, but his experience would differ from that of his younger brother.

When he was twenty-seven years old, Jesse Croucher enlisted in the Canadian Over-Seas Expeditionary

Force on July 1, 1915 in Sarnia, becoming a member of the 34th Battalion. He stood five feet four and a half inches tall, had grey eyes and dark brown hair, was single, and was residing with his parents John and Annie at the time. Jesse recorded his trade or calling as car repairer, and his next-of-kin as his father John Thomas Croucher of Devine Street (they later resided at 353 Wellington Street and then Ontario Street, Sarnia). Jesse had several tattoos on his arms including, on his right forearm – a heart and clasped hands with a lady's face with the words "true love".

Private Jesse Croucher

Jesse Croucher embarked overseas on October 23, 1915 aboard the *S.S. California*. He arrived in England on November 1, 1915, where he was initially stationed at Bramshott. Three months later, on February 3, 1916, he was transferred to the 23rd Battalion, stationed at West Sandling. Three-and-a-half months later, on May 25, 1916, he was transferred to the 2nd Battalion and departed with them the next day to France.

On May 26, 1916, Private Jesse Croucher became a member of the Canadian Infantry, 7th Battalion, British Columbia Regiment in France. Less than two weeks after arriving in France, on June 7, 1916, Private Jesse Croucher was with his unit, the 7th Battalion, at the front lines. He soon found himself taking part in the fighting during the **Battle of the Somme** (July 1-November 18, 1916)--one of the most futile and bloody battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

The second major offensive of the Somme battle was the week-long Battle of Flers-Courcelette (September 15-22). It was here where tanks made their first appearance in the war. In the days leading up to this offensive, and only three months after arriving at the front lines, on September 9, 1916, Jesse Croucher was killed while fighting during the Battle of the Somme. He was later officially recorded as; *Date of Casualty: 9-9-16. "Killed in Action". Location of Unit at time of Casualty: COURCELETTE. Reported Locations of Grave: Buried outside Tom's Cut Trench Somme.*

In early November 1916, St. John's Church in Sarnia held a memorial service for several of the local fallen. The following is the report on it from the *Sarnia Observer*:

MEMORIAL SERVICE AT ST. JOHN'S CHURCH

*A memorial service was held at St. John's Church Sunday evening for Thos. Littlefield, **Jesse Croucher** and George Giles, who were recently killed at the Front. There was a large attendance, and the service was of a very solemn character. A practical address was delivered by Rev. F.G. Newton, rector, who eulogized the men and their work in defence of the empire. He also spoke words of consolation to those mourning for their dead, and exhorted the congregation to do all they could by constant acts of kindness to the bereaved, to show they appreciated the sacrifice made by the men who are now no more. The music and hymns which were appropriate to the occasion, were exceedingly rendered. Mr. Hargreaves played with effect the "Dead March in Saul."*

Note: George Giles' story is included in this Project.

Twenty-eight-year-old Jesse Croucher has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

CUNNINGHAM, Alexander (#3131569)

Alexander Cunningham, 24, died in action five weeks before the Great War ended. In Sarnia, his family was devastated. His parents penned the lines *Dear son of mine, you sleep with the brave/Where no tears of your mother can drop on your grave*. His siblings expressed their grief with these words: *In life we loved you dear/In death we do the same*.

Alexander was born in Fauldhouse, Lanarkshire, Scotland, on March 28, 1894, the eldest son of James and Isabella (nee Wark) Cunningham. James and Bella had five children together over a period of fifteen years: sons Alexander; John Wark (born 1896); James (born 1902); and Robert (born 1909); and daughter Agnes (born 1898). On November 25, 1913, the entire Cunningham family immigrated to Canada (the children's ages were Alexander 19, John 17, Agnes 14, James 11, and Robert 4). They departed from Glasgow, Scotland aboard the *Cassandra* and arrived in St. John's Newfoundland. Their final destination was Sarnia where James found work as an engineman to support his family.

Alexander and his brother John both enlisted and served in the Great War, although John's stint in WWI had a much different ending. **John Cunningham**, born March 15, 1896 in Fauldhouse, Scotland enlisted in Sarnia on October 7, 1915. He was nineteen years old, stood five feet ten and a half inches tall, had blue eyes and light hair and was single at the time. He was employed as a fireman at Imperial Oil and recorded his next of kin as his father James Cunningham on George Street. John became a member of the 70th Overseas Battalion, CEF.

Four months after enlisting, on February 11, 1916, Private John Cunningham, 19, married Sarah Ann McClymont, 20, in Sarnia. Sarah was born in Scotland and had immigrated to Canada, also in 1913. John's next-of-kin was then changed to his wife Sarah, living at 112 Maria Street, and later 347 Cameron Street (with John's parents James and Bella).

Approximately six weeks after getting married, on April 24, 1916, John embarked from Halifax aboard the *SS Lapland* and arrived in England on May 5. He underwent training at Shorncliffe and later West Sandling where he was transferred to the 39th Battalion in July. John arrived in France on August 27, 1916, as a member of the 18th Battalion. He continued his training, including two weeks with the 1st Army School of Mortars. In mid-January 1917 he was promoted to Lance Corporal.

John Cunningham fought in the Battle of Vimy Ridge in France, April 9-12, 1917. It was the very first time and the only time that all four divisions of the Canadian Corps, with soldiers from every region in the country, would attack together as one formation. Of the 97,000 Canadians who fought at Vimy Ridge, approximately 7,004 were wounded and 3,598 would lose their lives in four days of battle. The Battle of Vimy Ridge was a seminal battle and significant victory for Canada, later referred to as "the birth of a nation".

On the first day of the Battle, on April 9, John was wounded in action by enemy shrapnel. His wounds were recorded as "gun shot wounds legs and left arm, severe". He was treated at #10 Casualty Field Station; then at #24 General Hospital, Etaples, before being returned to England in early May. He continued recovery at 3rd Western General Hospital, Cardiff, and in September at Canadian Convalescent Hospital Bearwood, Wokingham. In early December 1917, he was returned to Canada and continued his recovery at Guelph Convalescent Hospital. Corporal John Cunningham was discharged from the military in Guelph on February 28, 1918 as he was deemed "being medically unfit for further military service". In November 1918, the Great War ended.

John Cunningham returned to Sarnia and in 1921, Sarah and he were living at 561 George Street. John was employed as a pumpman at Imperial Oil. John and Sarah had a two-year-old son then, Alexander James—named to honour John's brother Alexander, killed in action in October 1918.

In Europe, with the Canadian troops thinning at an alarming rate and no end to the war in sight, the government instituted the Military Service Act in 1917. Twenty-three-year-old **Alexander Cunningham** was drafted under the Military Service Act of 1917, Class One. He underwent his medical examination in Sarnia on October 10, 1917. He was called to service on January 9, 1918, reporting to the 1st Depot Battalion, Western Ontario Regiment in London, Ontario. Just as Alexander was starting his military service, his brother John's service was over. John, wounded at Vimy, had just returned to Canada the previous month.

Alexander stood five feet ten and a half inches tall, had blue eyes and brown hair, was single, and was residing with his parents at the time. He recorded his trade or calling as farmer, and his next-of-kin as his father James Cunningham of 347 Cameron Street, Sarnia. Two days later, he would complete his Military Will, bequeathing his estate to his mother Mrs. Bella Cunningham.

On February 5, 1918, Alexander Cunningham embarked overseas from Halifax aboard the *S.S. Grampian*. He arrived in England on February 16, 1918, becoming a member of the 4th Canadian Reserve Battalion stationed at Bramshott. Six months later, on August 18, 1918, he was attached to the 18th Battalion at Camp Witley, and one week later was transferred to the Canadian Infantry, 43rd Highlanders Battalion, Manitoba Regiment, with the rank of Private. Private Alexander Cunningham arrived in France with the 43rd Battalion the next day, on August 26, 1918.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line “*the turning point of the campaign*”.

The third offensive in Canada’s Hundred Days Campaign was the **Battle of Canal-du-Nord and Cambrai** in France (September 27-October 11, 1918). Against seemingly impossible odds and a desperate fully prepared enemy, the Canadians fought for two weeks in a series of brutal engagements. They successfully channelled through a narrow gap in the canal, punched through a series of fortified villages and deep interlocking trenches, and captured Brouillon Wood and the city of Cambrai. General Arthur Currie would call it “*some of the bitterest fighting we have experienced*” and it came at a cost of 14,000 Canadian casualties.

Five weeks after arriving in France, on October 1, 1918, while fighting in the Battle of Canal-du-Nord and Cambrai, Private Alexander Cunningham suffered gun shot/shrapnel wounds to his right arm and to his head. He was taken to No. 30 Casualty Clearing Station and died two days later on October 3, 1918, the result of his wounds.

In mid-October 1918, James Cunningham in Sarnia received a telegram informing him of his son’s death and the cause of it. Alexander’s Circumstances of Death Register records him as; *Date of Casualty: 3-10-18. “Died of Wounds”. On October 1st 1918, he was wounded by enemy shrapnel. After receiving attention, he was evacuated to No. 30 Casualty Clearing Station where he succumbed to his wounds two days later. Bucquoy Road British Cemetery, France.*

After learning of their son’s death, Alexander’s mother Bella and father James wrote the following:

*Dear son of mine, you sleep with the brave,
Where no tears of your mother can drop on your grave,
Unknown to the world, you stand by my side,
And whisper, dear mother, death cannot divide.*

The following was written by Alexander Cunningham’s sister, sister-in-law, and brothers:

*Peaceful be thy rest, dear brother;
‘Tis sweet to breathe thy name;
In life we loved you dear;
In death we do the same.*

Approximately one month after Alexander’s death, the Great War would come to an end. Alexander Cunningham, 24, is buried in Bucquoy Road Cemetery, Pas de Calais, France, Grave IV.D.19. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

DAVIES, Sidney Richard (#844276)

When he enlisted in 1916, thirty-three-year-old Sidney Richard Davies was older than the typical recruit. He was a competent soldier who rose quickly in the ranks from Corporal to Sergeant. Exactly one month before the war ended, Sergeant Sidney Davies was killed by an enemy shell in the Battle of Canal-du-Nord and Cambrai.

Sidney Davies was born in Strood, Kent County, England, on August 24, 1882, the son of Richard Vickers (born 1843) and Mary Ann (nee Gorman, born 1857) Davies, of Strood, Kent, England. Richard and Mary Ann were married on May 31, 1874 in All Saints Parish Church, Frindsbury, Kent and were blessed with nine children together: sons John Thomas (born 1876); George Ernest (born 1881); Sidney; Ernest William (born 1889); Richard Stanley (born 1893); and Percy Oracio (born 1894); and daughters Eliza Jane “Sissie” (born 1878); Maud E. (born 1886); and Mabel Hilda (born 1899). To support his family, Richard had a number of jobs over the years. He was at various times a mariner; a china and glass merchant; a foreman for a coal contractor; and a stevedore dock labourer.

On March 22, 1900, at the age of seventeen and working as a plumber’s mate, Sidney Davies enlisted with the Royal Marine Light Infantry in Chatham, England. He served with them until February 1904. At some point afterwards, Sidney immigrated to Canada and eventually resided in Sarnia. Chances are Sidney never saw his parents again. His father Richard, passed away in Kent, England on January 14, 1913 at the age of seventy; and Mary Ann, his mother, passed away in Kent, England on February 26, 1916 at the age of sixty. Richard and Mary Ann Davies are buried together in All Saints Churchyard in Frindsbury, Kent, England, near the church where they were married. On the couple’s headstone is a pedestal inscribed with the words, “Sidney Richard Davies 18th Batt. Canadians – Killed in Action in France 11th October 1918 Aged 36 Years.”

Thirty-three-year-old Sidney Davies enlisted in the Canadian Over-Seas Expeditionary Force on February 14, 1916 in Sarnia. He stood five feet ten and a half inches tall, had grey eyes and black hair, was single, and was residing at 132 Forsythe Street at the time. He recorded his trade or calling as Actor, and his next-of-kin as his sister Mrs. A. Wilson of 54 Longley Road, Rochester, England. Sidney initially became a member of the 149th Battalion, where he rose in rank to Corporal and then Sergeant. It would be over one year before he embarked overseas. On March 28, 1917, Sidney Davies embarked overseas from Halifax for the United Kingdom aboard the *S.S. Lapland*.

And once he arrived overseas, it would be almost a full year before he saw action at the front. On April 7, 1917, Davies arrived in Liverpool, England and was initially attached to the Segregation Camp at Bramshott. He was later transferred to the 25th Reserve Battalion, remaining at Bramshott and reverting to the rank of Private. On February 15, 1918, he was transferred to the 4th Canadian Reserve Battalion. Over one month later, on March 29, 1918, Private Sidney Davies became a member of the Canadian Infantry, 18th Battalion, “C” Company, Western Ontario Regiment. He arrived in France on April 3, 1918, at the Canadian Corps Reinforcement Camp. On April 12, 1918, he arrived with the 18th Battalion at the front lines.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians would be called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

DICKINSON, George (#402727, also A2727)

Undoubtedly, English-born George Dickinson, 35, wanted to serve when he enlisted in Sarnia at age thirty-five. The reality was that he tried to serve at the front and did so briefly, but his poor health, exacerbated by his time at the front, hospitalized him. He suffered from a host of ailments brought on by nephritis, the inflammation of his kidneys that ultimately killed him in Sarnia in March 1918.

George Dickinson was born in Leeds, Yorkshire, England, on November 18, 1879, the son of Robert and Hannah (nee Barmingham) Dickinson, of Hyde Park Road, Leeds, Yorkshire, England. [NOTE: On his Attestation Paper, George Dickinson recorded his birthdate as November 18, 1879, and that date continues through his military records. However, both the 1881 and 1901 English Census' record his birth year as 1876].

Robert and Hanna Dickinson had five children together: daughters Alice (born 1873); Lucy (born 1874); and Maud (born 1883); and sons Harry (born 1878) and George. In 1881, Robert, Hannah, and four of their five children were living together living in Leeds – only eight year-old Maud was not registered as living with them. Two decades later, in 1901, the Dickinson family was still living in Leeds. Residing with parents Robert and Hannah (both age fifty-two), were George (age twenty-four), Harry (age twenty-two) and Maud (age eighteen).

At some point, George Dickinson married a young lady named Beatrice (born July 1880) in England. George immigrated to Canada, departing Liverpool aboard the *Dominion*, and arrived in Halifax on March 28, 1910. He arrived with \$45 and a written declaration that he was a plumber who intended to move to Toronto. Beatrice soon followed him to Canada and the young couple first lived at 348 Brockar Street in Toronto, where George, true to his word, was employed as a plumber. Sometime after 1911, George and Beatrice moved to Sarnia, first living at 142 Elgin Street, then 383 Russell Street and later 553 Confederation Street.

At age thirty-five, George Dickinson enlisted in the Canadian Over-Seas Expeditionary Force on January 18, 1915 in Sarnia. He stood five feet five inches tall, had hazel eyes and dark hair, and was residing with his wife on Elgin Street at the time. He recorded his trade or calling as plumber, and his next-of-kin as his wife Beatrice Dickinson of 142 Elgin Street. He also recorded his prior military experience as "5 years in Territorials" and with the 27th Militia Regiment in Sarnia. He became a member of the Canadian Infantry, 34th Reserve Battalion, Central Ontario Regiment. More than five months later, George embarked overseas.

On July 5, 1915, George was in Shorncliffe, England, as a member of the 11th Reserve Battalion. One month later, on August 3, 1915, he became a member of the Canadian Infantry, 1st Battalion. In December of 1915, he had suffered severe pain in his legs that lasted for several weeks, but he was not hospitalized. After some treatment, the pain subsided. Shortly after, however, he began to experience shortness of breath and sweating a good deal on exertion, physical weakness, coughing and choking spells that affected his ability to sleep, all of which lasted for several months.

He served for a time in Flanders in 1916. On July 7, 1916, Private George Dickinson was admitted to Moore Barracks Military Hospital in Shorncliffe, with a diagnosis of bronchitis. Five days later, on July 12, his condition was described as "seriously ill".

On July 26, George was discharged from Moore Barracks Hospital, and reported to Shorncliffe Canadian Casualty Assembly Centre (CCAC), Folkestone. There he was assessed for either further treatment or return to duty. Described as "a well developed muscular man weighing 146 lbs. about his normal weight" his conditions at the time included diminished breathing sounds, shortness of breath, high blood pressure, rapid pulse increase on slight exertion and enlarged liver. He was diagnosed with chronic nephritis, high blood pressure and cardiomegaly. The Medical Board determined that his disability was the result of his active service against the enemy, and due to "strain and exposure". The medical report also stated that though the conditions were "not caused by conditions at the

front, they were intensified and hastened by active service at the front". The Medical Board recommended that he be discharged to Canada. George Dickinson embarked from England on August 9, 1916 aboard the *S.S. Olympic*.

On September 1st, 1916, Private George Dickinson of the 1st Battalion was admitted to the Military Hospitals Commission of Canada (MHCC) in London, Ontario. On September 9, 1916, he was diagnosed with nephritis. In late-April 1917, he was discharged from the army, "being no longer physically fit for war service". One and a half years after his return to Canada, on March 6, 1918, George Dickinson lost his life at Sarnia General Hospital, the result of the effects of war. The War Graves Register (Circumstances of Casualty) records him as; *Nephritis Chronic. Died from the effects of wounds and gas. Lake View Cemetery, Sarnia, Ontario. Grave C.223. Unmarked.*

Private George Dickinson's funeral in Sarnia was held with full military honours. The funeral was attended by the Sarnia Citizens Band, the Great War Veterans, the Sons of England, the Mayor and Council members, and representatives of the St. John's Ambulance Society. His comrades acted as pallbearers and there was a firing party and the playing of the "Last Post." The funeral parade route followed Plank Road to Mitton Street, onto Davis to Christina, then north, where they were met and saluted by the Collegiate Cadets at the corner of George and Christina Street. George Dickinson, 38, is buried in Lakeview Cemetery, Sarnia.

DOXTATOR, Frederick (#844252)

Born at what is now known as Aamjiwnaang First Nations, Frederick Doxtator was a First Nations soldier who enlisted with the 149th Battalion in 1915 when he was nineteen. He trained as a Sapper and served in France, but he was diagnosed with tuberculosis and treated for it. Sadly, Frederick passed away from the disease in Halifax, four days after the war ended officially. His name is on the Aamjiwnaang First Nations cemetery.

Frederick Doxtator was born at the Sarnia Indian Reserve, on August 4, 1896, the eldest child of Edward (of Oneida Settlement, Middlesex County, Ontario) and Sarah (nee George) Doxtator. Edward and Sarah were blessed with eleven children together: Frederick; Eva Millicent (born 1898); Mattie Levina (born 1900); Norah Hazel (born 1902); Reuben Edward (born 1904); Beatrice Winnefred (born 1905); Lucinda Violet (born 1907); William Henry (born 1908); Julia (born 1909); George Leonard (born 1910); and Austin (born 1914). The Doxtator family lived at 304 Rose Street, later 319 Confederation Street, Sarnia.

Prior to enlisting, Frederick was employed as a car inspector on the Pere Marquette railway. At age nineteen, Frederick Doxtator enlisted with the 149th Lambton Battalion, Canadian Expeditionary Force in Sarnia on December 16, 1915. He stood five feet four inches tall, had brown eyes and black hair, was single, and was residing on Rose Street with his parents at the time. He recorded his trade or calling as labourer, and his next-of-kin as his father Edward Doxtator of 304 Rose Street, Sarnia.

Frederick Doxtator embarked overseas from Halifax for the United Kingdom on March 28, 1917 aboard the *S.S. Lapland*. He disembarked in England on April 7, 1917, and became a member of the 25th Reserve Battalion stationed at Bramshott. Seven months later, on November 30, 1917, Frederick arrived in France, and was initially posted to the Canadian Corps Reinforcement Camp (CCRC). During the winter of 1917/1918 in France, Frederick experienced chest symptoms that included coughing, shortness of breath and being run down, but he was always able to carry out his duties. On June 21, 1918, he became a member of the 4th Battalion, Canadian Engineers, "B Company" with the rank of Sapper. Two days later, he arrived at the front lines with the 4th Battalion.

Frederick soon found himself taking part in the preparatory and early stages of the **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium). It was the "beginning of the end" of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

Approximately two months after arriving at the front, in mid-August 1918, Frederick was admitted to a Casualty Clearing Station, and then moved to No. 47 General Hospital in Le Treport, France. On August 31, 1918, he was invalided back to England due to his ill health that had been brought on by the hardships at the Front. Diagnosed with pulmonary tuberculosis, he remained in Second Southern General Hospital in Bristol until late September 1918. On September 28, 1918, he was admitted to Canadian Special Hospital in Lenham, Kent, where he remained until

October 30, 1918. The next day, Frederick was invalided to Canada. He was admitted to Cogswell Street Military Hospital in Halifax on November 10, 1918, with “general tuberculosis”. Frederick Doxtator would not make it home to Sarnia.

On November 11, 1918, the day that the Great War ended and the world was celebrating, Frederick’s father, Edward on Confederation Street, received a telegram informing him that his son, SAPPER FREDERICK DOXTATOR OF THE CANADIAN ENGINEERS WAS DANGEROUSLY ILL AT THE COGSWELL STREET MILITARY HOSPITAL HALIFAX. No particulars as to his ailment were given in the official telegram.

On November 15, 1918, at approximately 6:55 p.m., Frederick Doxtator lost his life, having been in the Halifax hospital for only a few days. Shortly afterwards, Frederick’s mother, Sarah Doxtator, received the following telegram; REGRET TO INFORM YOU 844252 SAPPER FRED DOXTATOR DIED AT 6:55 P.M. NOVEMBER 15. M.O. COGSWELL STREET MILITARY HOSPITAL.

The War Graves Register (Circumstances of Casualty) records the particulars of Frederick Doxtator’s passing as; *Date of Death: 15-11-18. Military Hospital, Halifax. Tuberculosis. Date of Admission to Hospital unknown. Cemetery: St. Clair Indian Reserve, Sarnia. Grave No. C6126. Marking: Nil.* At Frederick Doxtator’s funeral in November 1918 in Sarnia, he was given full military honours, with members of the Great War Veterans and Sarnia Citizens’ band in attendance. The funeral procession began at the family residence on Confederation Street and ended at the Indian Reserve Cemetery. Services were conducted by Reverend Alford of the Sarnia Reserve, assisted by Reverend Hazen, pastor of the Devine Street Methodist church. A firing squad paid their last respect of the deceased soldier.

Frederick Doxtator, 22, is buried alongside his grandparents in Sarnia Chippewa’s First Nations Cemetery, Sarnia. His name is inscribed on the Sarnia cenotaph and also on the Aamjiwnaang First Nations cenotaph in Sarnia. The central column of the Aamjiwnaang cenotaph is inscribed, *To our glorious veterans who have served our nation and its allies for peace and freedom – Lest We Forget.* One of the side columns is inscribed, *World War I – In memory of the young men from this nation who served King and country throughout the world 1914-1919 – Frederick Doxstater.*

Note: On the Aamjiwnaang cenotaph, Frederick’s surname is spelled Doxstator. The spelling used in this Project is based on the Sarnia cenotaph spelling and how Frederick spelled and signed his name on his Attestation (enlistment) Papers.

EBERLY, Albert Edward (#3131578)

Albert Edward Eberly was drafted under the Military Service Act of 1917 and was called to service in January 1918. Only weeks after arriving at the Front, Albert was severely wounded in action while fighting in the 2nd Battle of Arras. He passed away as a result of his wounds the next day, on September 3, 1918.

Albert Edward Eberly was born in Parkhill, Ontario, on January 24, 1895, the first child of Elizabeth Melinda “Minnie” Eberly. On April 7, 1899, twenty-nine-year-old “Minnie” (born December 1870 in Parkhill, Middlesex County) married Irishman Charles Cathers (born February 1851, immigrated to Canada in 1861). Charles was a farmer in Middlesex County and later Lambton County East, in Bosanquet. “Minnie” and Charles Cathers had five children together (step-siblings for Albert Eberly): Lucy Ida Ellen (born October 3, 1896); Annie (born August 11, 1898); Bessie (born June 9, 1900); Ettie Beetress (born October 31, 1902); and John James Cathers (born October 29, 1905). In 1911, the Cathers family were living in Lambton East. At some point later, “Minnie” was living at 175 South Christina Street, Sarnia.

In Europe, with the Canadian troops thinning at an alarming rate and no end to the war in sight, the government instituted the Military Service Act in 1917. Twenty-two-year-old Albert Eberly was drafted under the Military Service Act of 1917, Class One. He underwent his medical examination in Sarnia on October 11, 1917 and was called to service on January 9, 1918. He reported to the 1st Depot Battalion, Western Ontario Regiment in London and filled out his personal information. Albert stood five feet five and a half inches tall, had brown eyes and dark hair, was single, and was residing with his mother in Sarnia at the time. He recorded his trade or calling as Traction Engineer, and his next-of-kin as his mother Minnie Eberly Cathers of 275 South Christina Street. Albert also recorded that he had two years of prior military service with the 136th Regiment, Edmonton Militia.

Albert Eberly embarked overseas for the United Kingdom on February 4, 1918 aboard the *S.S. Grampian*.

After arriving in England on February 16, 1918, he became a member of the 4th Canadian Reserve Battalion, stationed at Bramshott. Three and a half months later, on June 1, 1918, he arrived in France as a member of the Canadian Infantry, 47th Battalion, initially stationed at the Canadian Corps Reinforcement Camp (CCRC). Two and a half months later, in mid-August 1918, he arrived at the front lines with the 47th Battalion as a Private.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km. The second offensive in Canada’s Hundred Days Campaign was the **Battle of Arras and Breaking the DQ Line** in France (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line – a series of strong defensive trenches and fortified villages. General Sir Julian Byng called the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line “*the turning point of the campaign*”, but it came at a cost of 11,400 Canadian casualties.

Only weeks after arriving at the Front, on September 2, 1918, Albert Eberly was severely wounded in action while fighting in the 2nd Battle of Arras. During an advance he received shell wounds in the back and left thigh and was taken to No. 42 Casualty Clearing Station. He passed away as a result of his wounds the next day, on September 3, 1918.

In mid-September 1918, Minnie Eberly in Sarnia received the following telegram about her son: PTE ALBERT EDWARD EBERLY INFANTRY HAS DIED OF WOUNDS AT 42ND CLEARING STATION SEPTEMBER 4TH WITH GUNSHOT WOUND IN BACK AND LEFT THIGH. His Circumstances of Death Register records him as; *Date of Casualty: 3-9-18. “DIED OF WOUNDS”. During an advance on the Arras Front September 2nd, 1918, he was severely wounded in the back and left thigh by an enemy shell. He was attended to and evacuated to No. 42 Casualty Clearing Station where he died from the effect of his wounds the following day. Aubigny Communal Cemetery Extension, 8 ½ miles North West of Arras, France.*

In October 1918, Minnie received another telegram, this one informing her that the date Albert’s death was September 3rd, 1918. Approximately two months after Albert Eberly’s death, the Great War ended. Albert Eberly, 23, is buried in Aubigny Communal Cemetery Extension, Pas de Calais, France, Grave IV.E.66. SOURCES: A, B, C, D, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z

EDDY, William Peter (#333930)

William Peter Eddy, 32, was killed in action during the Second Battle of Arras in the closing days of the war. An enemy shell exploded near him and the gunner from Sarnia was killed instantly. He has no known grave, but is memorialized on the Vimy Memorial, Pas de Calais, France. In Sarnia, he is memorialized with the naming of a street after him, Eddy Drive.

William Eddy was born in Sarnia, on October 25, 1885, the only son of Walter Roach and Mary (nee Kyle) Eddy. Walter Eddy (born March 1861 in Lanlivery, Cornwall, England) emigrated from England to Canada in 1880 and ended up working as a labourer in Sarnia. There he met Mary Kyle (born April 15, 1864 in Scotland) who had immigrated to Canada in 1866. Walter and Mary Eddy were married in Sarnia on July 2, 1885 and were blessed with three children together: a son, William, and two daughters--Margaret Elizabeth Ethel (born December 20, 1887) and Elleda Mary (born December 22, 1890). The Eddy family lived on Christina Street and later at 330 South Vidal Street, Sarnia.

William Eddy’s first military experience was at the age of twenty-nine in Winnipeg, Manitoba. From June 1 through early-August 1915, William served as a Lieutenant with the 61st Battalion in Winnipeg. He resigned from the unit on August 7, 1915 (he did not proceed overseas with the 61st). Three months later, on November 15, 1915, thirty year-old William Eddy completed his Officers’ Declaration Paper, Canadian Over-Seas Expeditionary Force with the 90th Overseas Battalion, Winnipeg Regiment in Winnipeg. He was assigned the rank of Lieutenant. At the time he was residing at 214 Donald Street, Winnipeg, was employed as an engineer, and was a member of the 90th

Regiment Winnipeg Rifles Militia. He also recorded that he had served for two months with the 61st Overseas Battalion. William Eddy served with the 90th Battalion in Winnipeg from November 15, 1915 until May 26, 1916.

On June 16, 1916, thirty year-old William Eddy completed his Attestation Paper for the Canadian Over-Seas Expeditionary Force in London, Ontario. He stood five feet eight and three-quarter inches tall, had brown eyes and dark brown hair, was single, and was residing with his parents in Sarnia at the time. He recorded his trade or calling as engineer and his next-of-kin as his mother Mrs. Mary Eddy of 330 South Vidal Street, Sarnia. He also recorded that he was a Prov. Lieutenant with the 90th Regiment Winnipeg, and that he had served six months with the 90th Regiment Winnipeg. William Eddy became a member of the 63rd Depot Battery, and in mid-August 1916 was transferred to the 55th Battery, 14th Howitzer Brigade, Canadian Field Artillery. He would revert to the rank of Gunner in the artillery in order to serve his country in the field.

William Eddy embarked overseas for the United Kingdom on September 12, 1916 aboard the S.S. *Metagama*. Disembarking in England on September 22, 1916, he was initially attached to the 2nd Canadian Command Depot (CCD) in Bramshott. Four months later, on January 22, 1917, William Eddy was transferred to the 13th Canadian Brigade at Camp Witley.

On March 21, 1917, while exercising horses while on drill at Witley Camp in England, William Eddy met with an accident when he was thrown from a bucking horse and kicked while on the ground. He was admitted to Bramshott Hospital with a diagnosed fractured right arm. In May 1917, William sent a letter home to his parents on Vidal Street, from Bramshott Camp, England. The following is a portion of that letter:

My Dear Parents,

I am sure you must be thinking something has happened to me and indeed it has but I am now recovering, although slowly. I have not been to France, but when we were at Salisbury Plains for firing practice I had the misfortune to get thrown from a runaway horse, breaking both arms. The left arm is nearly alright. I am writing with it – but my right arm is still pretty sore and it will be some time yet before I am fit for service. I am now at the Canadian Military Hospital at Bramshott... Well, how are you all at home anyway, well I hope. I get the papers you send and am glad everything goes well at home. I hope it will not be many months now before I am with you again....

Your loving son, Will

William continued his recovery from a fractured right shoulder at Princess Patricia Canadian Red Cross Special Hospital, Ramsgate, Kent from May 11, 1917 until August 17, 1917. In September 1917, William Eddy was stationed at the Canadian Artillery Reinforcement Depot (CARD) at Camp Witley.

Bad luck seemed to follow Eddy in France. Two months later, on November 2, 1917, Gunner William Eddy arrived in France with the 3rd Brigade, Canadian Field Artillery (CFA). By November 11, 1917, William was with the 3rd Brigade at the front lines. On November 29, 1917, he was admitted to No. 22 Casualty Clearing Station with diphtheria, where he would recover after twelve days. Almost three months later, on February 20, 1918, he was admitted to No. 6 Casualty Clearing Station with Trench fever. He would be moved through several locations during his recovery, including No. 18 (USA) General Hospital at Camiers, No. 6 Convalescent Depots (CD) Etaples and No. 5 CD Cayeux. He was discharged back to the front lines on April 5, 1918. Gunner William Eddy then returned to his unit, the 3rd Brigade, Canadian Field Artillery.

Four months later, he was taking part in the **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium)—the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km.

The second offensive in Canada’s Hundred Days Campaign was the **Battle of Arras and Breaking the DQ Line** in France (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line – a series of strong defensive trenches and fortified villages. General Sir Julian Byng called the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line “*the turning point of the campaign*”, but it came at a cost of 11,400 Canadian casualties.

Approximately five months after being discharged from hospital, on September 2, 1918, William Eddy died while fighting during the 2nd Battle of Arras. He was killed by an enemy shell.

In October 1918, William's mother, Mary, received the following letter at her Sarnia home about her only son:

11th Battery C.F.A.

September 8th, 1918

Dear Mrs. Eddy,

It is with deep regret that I have to inform you of the death in action of your son, 333930, Gunner W.P. Eddy, and which occurred on the 2nd instant. Your son at the time was with his gun which was in action in support of the Infantry. During a period of enemy shelling a shell burst close by the gun killing your son instantly and wounding one of his comrades. He was buried by his comrades at P.25 A. 85-75, Sheet 51B., and all his personal effects have been sent to the base and will be forwarded to you. The men of the Battery have expressed their deep regret at the loss of a most popular comrade. On behalf of both officers and men I wish to extend to you our deepest sympathy in your great grief.

Sgt. Geo W. Shearer, Major O.C. 11th Battery, C.F.A.

William Eddy's Circumstances of Death Register records him as; *Date of Casualty: 2-9-18. "Killed in Action". During military operations in the vicinity of Vis-en-Artois, and Dury, whilst his Battery was supporting the Infantry, an enemy shell exploded near his gun, instantly killing him.* William Eddy, 32, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. In Sarnia, he is memorialized with the naming of a street after him, Eddy Drive.

EDWARDS, Fred Christopher (#402729)

People might not know the sacrifices that Fred Christopher Edwards, 27, made in the Great War, but they can appreciate his patriotism and perseverance. Before Fred saw action, he was hospitalized overseas for months to receive treatment for deafness and pleurisy. After surviving the Battle of the Somme and Vimy Ridge, Private Fred Edwards was killed on May 3, 1917, during the first day of fighting in the Battle of Fresnoy. He has no known grave.

Fred Edwards was born in Bermondsey, London, England, on December 25, 1892, the son of Frederick Christopher Edwards (Sr.) and Margaret (Mary Ann) Edwards, of Walworth, London, England. At some point, Fred immigrated to Canada and on January 11, 1915, twenty-two-year-old Fred Edwards enlisted in the Canadian Overseas Expeditionary Force in Sarnia. He stood five feet three and a half inches tall, had blue eyes and fair hair, and was single at the time. He recorded his trade or calling as Sailor, and his next-of-kin as his mother Mary Ann Edwards of 85 Linton Road, Bermoudsley, London, England. Fred became a member of the 27th Regiment, and later the 34th Battalion, Canadian Expeditionary Force.

Fred's experiences overseas were daunting to say the least. By July 5, 1915, he had arrived overseas and was attached to the 11th Battalion, stationed at Shorncliffe, England. On August 3, 1915, he became a member of the Canadian Infantry, 1st Battalion, Western Ontario Regiment with the rank of Private. While overseas, Fred was hospitalized on at least two occasions: on August 17, 1915 for over three months at Duchess of Connaught Canadian RC Hospital at Taplow and then Hillingdon House Convalescent Hospital in Uxbridge due to deafness; and on March 11, 1916 for almost a month at Canadian Convalescent Hospital in Woodcote Park, Epsom due to pleurisy. After his recovery from pleurisy, he was stationed at West Sandling. In mid-May 1916, Private Fred Edwards arrived in France as a member of the 1st Canadian Infantry Battalion.

Fred Edwards fought in and survived two of the defining battles of the war. The Battle of the Somme (July 1-November 18, 1916) was one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months; saw the Allies advance around 10 kilometers; and cost the Canadian Corps more than 24,000 Canadian casualties. The Battle of Vimy Ridge (April 9-12, 1917) was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps, and significant victory for Canada, later referred to as "the birth of a nation". Of the 97,000 Canadians who fought at Vimy Ridge, approximately 10,600 were casualties in four days of battle.

After taking Vimy Ridge, the Canadian Corps experienced more success in France with an attack on the

Arleux Loop on April 28-29 that drove the Germans to the village of Fresnoy-en-Gohelle. General Sir Douglas Haig then had two objectives: to secure a more defensible position and to draw German attention away from the Aisne sector, where the French Army was fighting to capture a strategic ridge. Haig planned a new attack by three armies across a 22-kilometre front, aiming to consolidate a good defensive line by mid-May. Fresnoy was the Canadian target.

Fresnoy was heavily fortified and the area of manoeuvring very small. The attack began under the cover of darkness at 3:45 a.m., May 3, 1917. But the Germans were expecting it, and began shelling the Canadians as they advanced over the open plain. The Canadians captured Fresnoy within several hours, but it was immediately counter attacked. The Germans fired some 100,000 artillery and gas shells into the village over the next week, and then stormed it. The Canadians fought them off and were relieved by British troops. The Germans attacked again the next day, and the village was lost. In the **Battle of Fresnoy**, May 3-8, the Canadian Corps suffered 1,259 casualties. The Germans suffered their deepest losses on the first day of the battle.

On May 3, 1917, approximately one year after arriving in France, Fred Edwards lost his life in action on the first day of the Battle of Fresnoy. On that day, he was initially reported wounded and missing. He was later officially recorded as “now for official purposes presumed to have died on or since May 3rd 1917.” Fred Edward’s Circumstances of Death Register records him as; *Date of Casualty: On or since 3-5-17. “Previously reported wounded and missing, now for official purposes presumed to have died.” Location of Unit at time of Casualty: ATTACK ON FRESNOY.* Fred Christopher Edwards, 27, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. On the Sarnia cenotaph, his name is inscribed as F.W. Edwards.

ELLIOTT, Joseph Martin (#602999)

After working as a brakeman in Sarnia for several years, Joseph Martin Elliott enlisted in 1915 with the Canadian Over-Seas Expeditionary Force when he was twenty-eight. His stay at the front was brief and tragic. After arriving in France three months earlier, Joseph died as a result of wounds incurred at the Battle of the Somme.

Joseph Elliott was born in Point Edward, Ontario, on June 12, 1887, the youngest child of John (born October 1844 in Gloucester, England) and Alexandria (nee McKay, born December 1845 in New Brunswick) Elliott. John Elliott had emigrated to Canada in 1861 and worked in Sarnia as a car repairer and later as a Grand Trunk employee. John and Alexandria Elliott raised eight children together: Henry J. (born January 1871); Alexander (born October 1872); Harriet “Hattie” (born April 1873); John (born May 1877); Daniel (born 1879); Mary C. (born April 1882); Lettie (born October 1884) and Joseph.

The family dynamic changed when Joseph was nineteen years old. On January 7, 1906, his father John died in Sarnia at the age of 61. Five years later, in 1911, widowed mother Alexandria Elliott was residing at 147 Johnston Street with her children: Henry J. (age forty, a switchman), John (age thirty-three, a brakeman), Lettie (age twenty-five) and Joseph (age twenty-three, a brakeman).

At the age of twenty-eight, Joseph Elliott enlisted in the Canadian Over-Seas Expeditionary Force on August 21, 1915 in Sarnia, becoming a member of the 34th Battalion. He stood five feet five and a half inches tall, had blue eyes and light brown hair, and was single at the time. He recorded his birth year as 1886; however, his birth registration records the year as 1887. He also recorded his trade or calling as Brakeman, and his next-of-kin as his mother Alexandra Elliott of 147 Johnston Street, Sarnia.

Joseph embarked overseas for the United Kingdom on October 23, 1915 aboard the *S.S. California*. Disembarking in England on November 1, 1915, he initially became a member of the 23rd Battalion, stationed at Bramshott. Six months later, on May 25, 1916, he embarked for France as a member of the 2nd Battalion. The next day, he was transferred to the Canadian Infantry, 7th Battalion, British Columbia Regiment with the rank of Private.

A little over one month later, Private Joseph Elliott took part in the fighting in France during the **Battle of the Somme** (July 1-November 18, 1916)--one of the most futile and bloody battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

Just over three months after arriving in France, on September 9, 1916, Joseph Elliott was wounded while fighting during the Battle of the Somme. He was taken to No. 3 Canadian Field Ambulance and passed away that day as a result of his wounds. Joseph’s Circumstances of Death Register records him as; *Date of Casualty: 9-9-16. “Died*

of wounds” at No. 2 Canadian Field Ambulance. Albert Communal Cemetery Extension, France.

In late September 1916, Alexandria Elliott in Sarnia received word from militia headquarters in Ottawa informing her that her son, JOSEPH MARTIN ELLIOTT HAD DIED OF WOUNDS AT NO. 2 CANADIAN FIELD AMBULANCE STATION ON SEPTEMBER 9. Joseph Elliott, 29, is buried in Albert Communal Cemetery Extension, Somme, France, Grave I.L.5. His widowed mother Alexandria (nee McKay) Elliott passed away several years later, in March 1920, and is buried with her husband John Elliott in Lakeview Cemetery. FAIR, Roy Nichols (#6914)

The last moments of Roy Fair’s life defined the twenty-one year old’s character. After a bullet lacerated his arm in the Battle of Givenchy, the Lance Corporal with the grenade section of the 1st Canadian Division was ordered to return to the Dressing Station. He refused and insisted on advancing to the German trenches. As he neared the closest trench, a bomb killed him instantly and his body was never recovered.

Roy Fair was born in Londesborough, Huron County, Ontario, on May 17, 1894, the son and youngest child of Reverend Hugh James (born 1854 in Brant County, Ontario) and Elizabeth “Eliza” Jane (nee Nicholls, born February 1857) Fair. Reverend Hugh Fair and Eliza Nicholls were married in 1875 in Brant County and they had six children together: Henry Egerton (born May 16, 1876); Mabel (born January 25, 1878); Clara Maud (born January 9, 1880); Mary Edith (born October 4, 1881); Hugh Harold (born July 30, 1891), and Roy Nichols. Reverend Hugh Fair was a Methodist clergyman, so the Fair family was constantly on the move and resided in a number of locations over the years: Brant County, Elgin County, Huron County, Lambton County (Warwick Township), Goderich Township, Middlesex County, and later Indian Road Crescent in Toronto.

Roy’s brother, Hugh Harold Fair, also served in the war. When he was twenty-four, **Hugh Fair** enlisted with the 84th Battalion, CEF in Niagara on September 1, 1915, one year after Roy had enlisted. An electrician at the time, Harold recorded his next-of-kin as his mother, Eliza Fair in Arkona, Ontario. By the end of that month, Harold had embarked overseas to England. Approximately three months later, in January 1916, he arrived in France and ended up serving with a number of units including the 84th Battalion, the 36th Reserve Battalion and the 1st Canadian Machine Gun Company. Harold Fair would survive the war and was discharged on demobilization in January 1919.

Roy’s experiences were vastly different. In August and September of 1914, just before enlisting, **Roy Fair** was serving with the 27th Regiment, St. Clair Borderers Militia. On September 22, 1914, Roy, age 20, enlisted in the Canadian Over-Seas Expeditionary Force in Valcartier Camp, Quebec. He stood five feet nine inches tall, had blue eyes and light brown hair, and was single at the time. He recorded his trade or calling as salesman and his next-of-kin as his mother Mrs. H.J. Fair in Arkona, Ontario. Private Roy Fair embarked overseas for the United Kingdom as a member of the Canadian Infantry, 1st Battalion, Western Ontario Regiment, on October 3, 1914. He was part of the 31,000 soldiers that made up the First Contingent of Canadians that departed the port of Quebec aboard some thirty ocean-liners.

The Canadians underwent rigorous training over the cold, wet winter of 1914-1915 at Salisbury Plain, England. In February 1915, Roy, as part of the 1st Canadian Division, embarked for the trenches in France. Arriving at the front, Canadian soldiers found themselves in a cratered, eviscerated wasteland of mud, wasted vegetation, and unburied bodies. For two weeks at the end of February 1915, the Canadian Division had its first taste of action when each of its brigades did a seven-day familiarization tour with British units.

On March 3, the Canadians took over 6,400 yards of the front near Armentieres, supported a British attack, and suffered their first casualties. By the end of the month, the division had marched north to Ypres, Belgium, the centre of the salient jutting into the German line, surrounded on three sides by enemy soldiers and artillery.

Several months later, on April 6, 1915, Roy Fair was admitted to No. 2 Canadian Field Ambulance due to blistered feet. It was at the Ypres salient, an area traditionally referred to as Flanders, that the Canadians engaged in their first battle of the war, the **Second Battle of Ypres**, April 22-May 25, 1915. It was their baptism by fire. It was here that the Germans unleashed the first lethal chlorine gas attack in the history of warfare. In the first 48 hours at Ypres (April 22-24), the Canadians incurred more than 6,000 casualties. One in every three Canadians became a casualty. A staggering 2,100 were killed and 1,410 were captured. Later that month, on April 24, 1915, Roy Fair was awarded in the field the rank of Lance Corporal with the Canadian Infantry, 1st Battalion.

Fighting continued in the Ypres salient on and off until late May 1915 at a cost to the Canadian Corps of just

over 8,600 soldiers killed, wounded or captured in just over one month. Following the Battle of Ypres, the decimated units of the 1st Canadian Division marched south to join in the Allied offensives which were already under way. The Canadians were thrust into the fighting near the villages of Festubert in mid-May 1915 and Givenchy in mid-June, both in northern France, part of a wider British offensive against German lines.

The **Battle of Festubert** was the second major engagement fought by Canadian troops in the war. The main attack began on May 18, with two brigades of the 1st Division launching frontal assaults against heavy German defences near the village. The fighting here followed the grim pattern of frontal assaults against entrenched German forces that had all the advantages of terrain, firepower and well-positioned machine guns. With little planning and inaccurate maps, they repeatedly charged over open ground with little artillery support. By May 25, after a week of fighting, the battle was over. The result was slaughter on both sides, and the Canadians had made only small gains.

About three weeks later, in mid-June 1915, the 1st Canadian Division was thrust into the fighting at **Givenchy**. Supposedly, lessons had been learned at Festubert, and plans were made to address the issues of German barbed wire and machine gun nests. Three artillery pieces were secretly moved closer to the front line and a tunnel was dug under the German trenches and packed with explosives in the hope that it would eliminate a large section of the enemy front line trenches. Although the Canadians achieved some of their objectives, the gains were negligible and the cost was extremely high—2,468 casualties at Festubert and a further 400 at Givenchy.

On June 15, 1915, Lance Corporal Roy Fair died while fighting near Givenchy in France. He was wounded during an advance, was ordered back, but continued forward where he was killed by a bomb. Roy Fair's Circumstances of Death Register records him as; *Date of Casualty: 15-6-15. "KILLED IN ACTION". He was a member of the grenade section and during the attack near Givenchy on the night of June 15th, 1915 just before reaching the first trench he received a bullet wound in the arm. His wound was immediately bandaged and he was ordered to return to the Dressing Station, but he insisted on going forward, and on reaching the German trench he was hit by a bomb and instantly killed. Body not recovered for burial.*

Roy Fair, 21, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. His name is also inscribed on the Village of Arkona cenotaph and on the cenotaph in the Village of Point Edward. Roy's mother Eliza, passed away the following year after the loss of her youngest son, at age fifty-nine, on November 3, 1916.

FITZGERALD, Albert Le Roy (#124737)

Like many other young men, Albert Le Roy Fitzgerald had a brief time at the front. The Sarnia born nineteen year old died in early October 1916, one month after arriving at the front. Albert was killed during the Battle of the Somme and has no known grave.

Albert Fitzgerald was born in Sarnia, on June 29, 1897, the youngest son of Ashley Cooper and Elizabeth J. (nee English) Fitzgerald. Albert's father was born Ashley Cooper Flynn, in Hamilton on August 23, 1867. Around 1875, his surname was changed, so thereafter he became Ashley Cooper Fitzgerald. On April 10, 1886, nineteen year-old Ashley Fitzgerald, employed as a finisher, married nineteen year-old Elizabeth J. English (born 1867 in Michigan) in St. Thomas, Elgin, Ontario. Ashley and Elizabeth Fitzgerald had five children together: Bertin (born December 16, 1886 in London, Ontario); Wilbur John (born December 29, 1887); Mildred B. (born December 30, 1890); Gladys (born September 17, 1894); and Albert Le Roy. To support his family, living at 353 Devine Street, Ashley was working as a grocer in Sarnia at the time of Albert's birth. In 1905, when Albert was eight years old, his mother, Elizabeth, died at the age of thirty-eight.

Ashley Cooper Fitzgerald later wed again, this time to Alfreda Mae Williams (born August 24, 1883 in Lapeer, Michigan) on April 9, 1906 in Port Huron, Michigan. At the time, Ashley was working as a painter/finisher in Sarnia at the time. Ashley and Alfreda had four children together, step-siblings for Albert: Velma Mae (born August 5, 1906 in St. Clair, Michigan); brother Ashley Cooper Jr. (born November 26, 1908 in Sarnia); and Amy Alfreda (born March 13, 1911 in Sarnia). They had a fourth child, a baby girl born September 6, 1907 in Sarnia. Tragically, the infant girl passed away four days later. In 1911, the Fitzgerald family was residing at 593 Christina Street, Sarnia.

Eighteen year-old Albert Le Roy Fitzgerald enlisted in the Canadian Over-Seas Expeditionary Force on April 5, 1916 in London, Ontario. He stood five feet seven inches tall, had blue eyes and light hair, and was single at the

time. He recorded his trade or calling as driver, and his next-of-kin as his father Ashley Cooper Fitzgerald of 200 Wellington Street, Sarnia. Albert Fitzgerald initially became a member of the 70th Battalion, Canadian Expeditionary Force.

Albert embarked overseas for the United Kingdom on April 24, 1916 aboard the *S.S. Lapland*. Disembarking in Liverpool, England on May 5, 1916, Albert was initially stationed at Shorncliffe. Two months later, on July 6, 1916, Albert was transferred to West Sandling, becoming a member of the 39th Battalion. Less than two weeks later, on July 18, Private Albert Fitzgerald arrived in France, as a member of the Canadian Infantry, 5th Canadian Mounted Rifles (CMR) Battalion, Quebec Regiment.

By September 1916, he arrived at the front lines with the 5th CMR's. Private Albert Fitzgerald was thrust into the fighting in France during the **Battle of the Somme** (July 1-November 18, 1916)--one of the most futile and bloody battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

Approximately one month after arriving at the front lines, on October 1, 1916, Private Albert Fitzgerald was killed while fighting during the Battle of the Somme. He was initially reported "missing after action", and later recorded as "presumed to have died on or since 1-10-16." Albert's Circumstances of Death Register records him as; *Date of Casualty: On or since 1-10-16. "Previously reported missing, now for official purposes presumed to have died."* *Location of Unit at time of Casualty: ATTACK NEAR COURCELETTE. Attack near Courcellette.* Albert Fitzgerald, 19, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. SOURCES: A, B, C, D, E, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z

FORD, Peter John (#6915)

Peter John Ford lived an adventurous life before he even came to Sarnia. The son of an Irishman who had enlisted as a teen in the British army, Peter followed in his father's footsteps and joined his father's former infantry unit. He fought in the Boer War from 1899-1901 and in 1914, now living in Sarnia, Peter enlisted in the Great War when he was forty years old. Sergeant Ford died tragically in action on June 15, 1915 at Givenchy, France. His body was never recovered.

Peter Ford was born in Buttevant, County Cork, Ireland, on June 29, 1874, the eldest son of John and Ellen Jane (nee: Sheehan) Ford. John Ford (born 1841) set an example for his sons when he enlisted in the British Army at the age of seventeen in 1858. He served in the army for fourteen years. In April 1872, John married Ellen Jane Sheehan (of Buttevant, Ireland, born 1851 or earlier) who was a servant in a household at the time. John continued to serve in the army, including time in China and Japan (for 3 years, 9 months); in South Africa (for 4 years, 3 months) and in Mauritius (for 6 months). Though John and Ellen's time together was intermittent, they had three children together: Peter John; William Joseph (born December 14, 1878 in Portland Castle, Dorset, England); and an unnamed daughter (born December 1880). After serving for over twenty-three years in the army, forty year-old father John Ford was discharged in Manchester on July 26, 1881. Within one year after his discharge, John Ford passed away at the age of forty-one.

Ellen, now widowed and the mother of three children, remarried one year later. Her second husband was Sergeant John McMahon, from Tulla, County Clare, Ireland. Not long after they were married at Aldershot, the main British army camp in England, Peter and William were shipped to the Duke of York School – a school for boys of soldiers who were disadvantaged. In the case of the Ford brothers, their father had passed away at a relatively young age.

At their first opportunity, both Peter and William Joe Ford enlisted in the British Army. [Note: William always went by the short form of his middle name - Joe]. Peter enlisted at the age of fifteen when he stood only five feet tall and weighed ninety-five pounds. He served for three and a half years in the Royal Garrison and then for thirteen years in the Dorsetshire Regiment of Foot, a British infantry unit and his father's old regiment. His brother, Joe, joined the British Army on December 22, 1891, just days after his thirteenth birthday. He would originally serve with the Dorsetshire as a musician.

Both Peter and Joe Ford were deployed to South Africa where they served in the Boer War from 1899 to 1901. They were at the battles of Spion Kop, Tugela Heights and the relief of Ladysmith. They returned to England when the war ended and they were stationed near Hamel Hempstead in May 1901. It was here that the brothers' lives took divergent paths but they ended up together.

Joe married a young lady named Lillian Parsons and they had two children together: Helen (born September 20, 1903); and Mary (born 1905). Joe continued to serve in the British Army and rose to the rank of full Corporal before being discharged on May 15, 1906. To earn money, the Ford brothers distributed posters that encouraged people to immigrate to Canada. They would take the invitation to heart and sailed together from Ireland to Canada in 1905 (followed later by Joe's wife Lillian and their two daughters).

By 1911, both Peter and Joe Ford were employed as railway locomotive engineers in Sarnia. At that time, Peter was residing with Joe and his family at 151 Emma Street. In August 1914, when the war broke out, forty year-old **Peter John Ford** joined the 27th Regiment, St. Clair Borderers, serving as a Private. On September 1, 1914, one month after war was declared, Peter underwent his medical examination at Valcartier Camp, Quebec, and was declared fit for service. In early September 1914 while in Quebec, Peter sent a postcard to his young niece Helen, or Nellie as he called her (it was one of many he wrote to young Nellie), with a brief message:

Dear Nellie,

Hope you are getting on alright. I suppose you are going to the big school now. Do not forget me while I am away. Good bye for the present. Uncle Pete

On September 22, 1914, forty year-old Peter John Ford completed his Attestation Paper at Valcartier, becoming an enlisted member of the 1st Battalion, Canadian Over-Seas Expeditionary Force. He stood five feet seven and three-quarter inches tall, had hazel eyes and dark hair, and was single at the time. He recorded his trade or calling as locomotive engineer, and his next-of-kin as his brother William Joe Ford of 151 Emma Street, Sarnia. He also recorded his previous military experience with Dorsetshire Regiment-10 years, and Royal Garrison Regiment-3 years, 163 days and Foreign Service-3 years. In a nod to his religious beliefs perhaps, his forearm tattoos were of a crucifix on one arm and the Virgin Mary and child Jesus on the other.

As a member of the Canadian Infantry, 1st Battalion, Western Ontario Regiment, Peter embarked overseas for the United Kingdom on October 4, 1915 aboard the *S.S. Laureutic* (this ship would later sink when it struck two mines north of Ireland in January 1917). Canada's First Contingent of the CEF spent the cold, wet winter of 1914-15 training at Salisbury Plain in England. The 1st (Western Ontario) Battalion became part of the 1st Canadian Division, 1st Canadian Infantry Brigade. Once overseas, Private Peter Ford was soon promoted to the rank of Corporal, and on January 9, 1915, he was awarded the rank of Lance Sergeant.

In February 1915, the 1st Canadian Division embarked for France. Arriving at the front, Canadian soldiers found themselves in a cratered, eviscerated wasteland of mud, wasted vegetation, and unburied bodies. For two weeks at the end of February 1915, the Canadian Division had its first taste of action when each of its brigades did a seven-day familiarization tour with British units. On March 3, the Canadians took over 6,400 yards of the front near Armentieres, supported a British attack, and suffered their first casualties. By the end of the month, the division had marched north to Ypres, Belgium, the centre of the salient jutting into the German line, surrounded on three sides by enemy soldiers and artillery.

It was at the Ypres salient, an area traditionally referred to as Flanders, that the Canadians engaged in their first battle of the war, the **Second Battle of Ypres**, April 22-May 25, 1915, their baptism by fire. It was here that the Germans unleashed the first lethal chlorine gas attack in the history of warfare. On April 22, the Germans launched the first ever large-scale use of chlorine poison gas, the wind blowing it over the French and Canadian lines. On April 24, the Germans launched another gas attack, this time targeting the Canadian line. In the first 48 hours at Ypres (April 22-24), there were more than 6,000 Canadian casualties. One in every three Canadians became a casualty. A staggering 2,100 were killed and 1,410 were captured. On April 24, 1915, while in the field, Peter Ford was awarded the rank of Sergeant.

Following the Battle of Ypres, the decimated units of the 1st Canadian Division marched south to join in the Allied offensives which were already under way. The Canadians were thrust into the fighting near the villages of Festubert in mid-May 1915 and Givenchy in mid-June, both in northern France, part of a wider British offensive against German lines.

The **Battle of Festubert** was the second major engagement fought by Canadian troops in the war. The main attack began on May 18, with two brigades of the 1st Division launching frontal assaults against heavy German defences near the village. The fighting here followed the grim pattern of frontal assaults against entrenched German forces that had all the advantages of terrain, firepower and well-positioned machine guns. With little planning and inaccurate maps, they repeatedly charged over open ground with little artillery support. By May 25, after a week of

fighting, the battle was over. The result was slaughter on both sides, and the Canadians had made only small gains. It was about this time that Peter sent his last letter home to Joe in Sarnia.

About three weeks later, in mid-June 1915, the 1st Canadian Division was thrust into the fighting at **Givenchy**. Supposedly, lessons had been learned at Festubert, and plans were made to address the issues of German barbed wire and machine gun nests. Three artillery pieces were secretly moved closer to the front line and a tunnel was dug under the German trenches and packed with explosives in the hope that it would eliminate a large section of the enemy front line trenches. Although the Canadians achieved some of their objectives, the gains were negligible and the cost was extremely high—2,468 casualties at Festubert and a further 400 at Givenchy.

In the early evening of June 15, 1915, Sergeant Peter Ford was killed in action at Givenchy, France. His battalion was ordered to attack the German trenches. To weaken the enemy, a mine was set to explode under the German trenches at approximately 5:45 p.m. The mine, however, was not placed far enough forward and more than fifty men from the 1st Battalion simply vanished in the explosion. Peter Ford was one of those men. He was initially reported “wounded”, updated to “wounded and missing”, and later recorded as “for official purposes presumed to have died on or since 15-6-15 in the field”. Sergeant Peter Ford’s Circumstances of Death register records him as; *Date of Casualty: 15-6-15. “Previously reported wounded and missing, now for official purposes presumed to have Died.” Location of unit at time of Casualty: AT CALONNE.* Forty year-old Peter Ford’s body was never found, and he has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

Some time after Peter’s death, brother Joe in Sarnia received a commemorative Next of Kin Plaque (Dead Man’s Penny) and Memorial Scroll that read; *He whom this scroll commemorates was numbered among those who, at the call of King and Country, left all that was dear to them, endured hardness, faced danger, and finally passed out of the sight of men by the path of duty and self-sacrifice, giving up their own lives that others might live in freedom. Let those who come after see to it that his name be not forgotten. Sergt. Peter J. Ford, Canadian Infantry Bn.*

Peter John Ford

William Joseph "Joe" Ford

Undoubtedly, his older brother’s death six months earlier led **William Joseph “Joe” Ford** to enlist in the Great War in December 1915. He enlisted on December 27, 1915 in Sarnia despite having promised Lillian, his wife, that he would never enlist again. At the time, Joe and Lillian were living at 245 Chippewa Street with their five children: Ellen Annie, Mary Ann, Michael Anthony, Nora Bridget and their youngest Peter Joseph Festubert.

Thirty-seven-year-old Joe stood five feet seven and a half inches tall, had blue eyes and brown hair, and recorded his birthplace as Buttevant, Ireland. He also listed his previous service of fourteen years with the Dorset Regiment in England and his present occupation as a locomotive engineer. Joe became a member of the 149th Battalion, and embarked overseas on March 25, 1917 aboard the *Lapland*. Arriving in Liverpool on April 7, 1917, from the 1st Segregation Camp, he was initially posted to the 25th Reserve Battalion at Bramshott.

Five months later, on September 10, 1917, Joe Ford (#844404) arrived in France, as a member of the Canadian Railway Troops, 85th Canadian Eng. Crew Company with the rank of Sapper. Two months later, in November 1917, he was gassed in France. In August 1918, he began to have attacks of rheumatism. Joe survived the war and in early February 1919, he would be returned as "invalid sick" to England, posted to CRT Depot in Knotty Ash. On February 9, 1919, he was admitted to #16 Canadian General Hospital, Orpington, England, diagnosed with myalgia (muscle pain) and rheumatism. Joe was discharged from hospital on March 18, 1919 and returned to Canada aboard the *SS Aquitania*, arriving in Halifax on May 25, 1919.

On his return, Joe Ford entered the Military Hospital at Wolseley Barracks in London, Ontario. He would be treated there with rest and fresh air in hospital, due in part from "infection gas and exposure under active service conditions." He was diagnosed with rheumatism, chronic bronchitis and flat feet. He remained in hospital until June 24, 1919, and was honourably discharged from service on June 26, 1919 in London, Ontario.

For his service, William Joe Ford was awarded the British War Medal and the Victory Medal. He returned to his family in Sarnia where they still resided on Chippewa Street until moving to 403 Confederation Street. Joe and Lillian had a sixth child, John Jack Ford. Years later, their son Peter Joseph Festubert Ford served in the Canadian Army during World War II. Joe Ford passed away in Sarnia at the age of sixty on November 16, 1939, and is buried in Our Lady of Mercy Cemetery. The cause of his death was recorded as "Coronary thrombosis, etc. Death was due to service".

One of Joe Ford's granddaughters is Judy Arthurs in Sarnia. In her words, "I never knew him personally as he died the month that I was born. I certainly heard lots of stories about him over the years. He and Lillian lived on Confederation at Stuart Street where later Whitie Stapleton was to grow up. My sisters would tell about running to that house after first Friday mass at St. Joes and jumping into bed with Grandpa yelling at Lil to get these girls some breakfast. I often think about him and what I learned about that war over the years. I have a piece of memorabilia that was his. I don't what it is called but it is a brass gizmo that a soldier would slide under a brass button when cleaning it and it would keep the cleaning agent off the fabric. That article has probably traveled and seen more of the world than I could ever hope to. I also have his medal from Africa. I don't have many pictures of him but there is a story that goes with each picture." When Judy and husband Peter were first married, he was teaching in St. Catharines and was a leader in the Cadet Corps where he used the same gizmo to polish his uniform buttons.

GARROD, Angus (#53571)

English born Angus Garrod immigrated to Canada before the Great War and was working as a labourer at Imperial Oil when war broke out in 1914. He enlisted in the Canadian Over-Seas Expeditionary Force on October 23, 1914 in Sarnia and departed overseas on April 18, 1915. Nearly a year later, Private Garrod was killed in the trenches at the Battle of St. Eloi in Belgium. Angus, 28, has no known grave.

Angus Garrod was born on January 21, 1888 in Clayton near Bradford, Yorkshire, England, the only son of Jesse (born 1864 in Tibenham, Norfolk, England) and Mary Ann (nee Archer, born March 1863 in Lincolnshire, England) Garrod. Jesse Garrod and Mary Ann Archer were married on November 20, 1886 in St. Peter Bradford Cathedral in Yorkshire, England and they had two children together: son Angus and daughter Mabel, born December 1890 in Clayton, Yorkshire. Angus was baptized on July 29, 1888 at Wesleyan Methodist Chapel in Bradford. In 1891, the Garrod family was residing in Clayton, Yorkshire, where father Jesse was supporting his family as a weaving overlooker. In October 1893, when Angus was five years-old, he lost his mother Mary Ann Garrod, who passed away at the age of thirty-one.

On October 28, 1896, Jesse Garrod remarried, his second wife being Elizabeth Thrower (born 1866). In 1901, the Garrod family was still residing in Yorkshire, England with Jesse still employed as a weaving overlooker. Angus, now thirteen, worked as a worsted spinner (a method to spin yarn). When Angus was sixteen years old, he became a registered member of the Royal Navy of Seaman's Services. He served with the Royal Navy for almost two years -- his first service date was March 17, 1904, aboard the ship *Vivid I*, and his last service date was January 26, 1906 aboard the *Euryalus*.

At the age of twenty-two, Angus Garrod immigrated to Canada, departing from Liverpool, England aboard the *SS Lake Manitoba*, and arrived in St. John New Brunswick on April 10, 1910. On August 24, 1911, he crossed from Port Huron, Michigan into Sarnia, with the intention to work as a farm labourer. In 1914, Angus was residing at 122 Mary Street, Sarnia and working as a labourer at Imperial Oil.

Twenty-six-year-old Angus Garrod enlisted in the Canadian Over-Seas Expeditionary Force on October 23, 1914 in Sarnia. He stood five feet seven and a quarter inches tall, had blue eyes and light hair, and was single at the time. He recorded his trade or calling as laborer, and his next-of-kin as his father Jesse Garrod, of Clayton, Bradford, Yorkshire, England. Angus also recorded his previous military service of two years in the Royal Navy. Angus became a member of the 18th Battalion (Western Ontario Regiment), Canadian Infantry.

Private Angus Garrod embarked overseas from Halifax aboard the *SS Grampian* on April 18, 1915. He arrived in England on April 29, 1915. Four and a half months later, on September 14, 1915, Angus arrived in France with the 18th Battalion. Approximately two months later, on November 10, 1915, he was admitted to 5th Canadian Field Ambulance due to rheumatism. Two days later, he was transferred to Div. Rest Station in Locre. On November 19, he was admitted to No. 6 Canadian Field Ambulance, diagnosed with influenza. He was discharged from care the next day. On November 21, 1915, he rejoined his unit in the field at the front.

Four and a half months later, on April 10, 1916, Private Angus Garrod of “C” Company, 18th Battalion, was killed in action during the **Battle of St. Eloi** in Belgium (March 27-April 16, 1916). This battle, known as “the Battle of the Craters” would be two weeks of attacks and counterattacks with Canadians dealing with thigh deep mud, incessant rain, poor communication, a lack of coordination and reconnaissance, and superior positioned German artillery. When the battle was over, more than 1,370 Canadian soldiers were killed or wounded.

Private Angus Garrod’s Circumstances of Casualty records him as; “*Killed in Action*” Location: *TRENCHES AT ST. ELOI. No record of burial.* The Commonwealth War Graves Register records him as, “No record of burial, killed in area of St. Eloi”. The April 27, 1916 *London Free Press* reported that; “Pte. Angus Garrod, of Sarnia, killed, was an old British navy man and had seen much previous service.” In early May 1916, the *Sarnia Observer* reported the following: “Pvt. Angus Garrod, whose death was mentioned in yesterday’s casualty list, leaves many relatives here to mourn his loss. They are his aunt Mrs. J. Baker, Martin St. and several cousins including Private Archie Baker, Private Willie Waller and Private Alfred Weston... Private Garrod had resided in Sarnia for several years prior to enlisting. While here he was employed at the Imperial Oil Company Works.”

Angus Garrod, 28, has no known grave. Though his name is not on the Sarnia cenotaph, it is recorded on the Sarnia Royal Canadian Legion Memorial Plaque. Angus Garrod is memorialized on the Menin Gate (Ypres) Memorial, Belgium, Panel 10-26-28. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

GILES, George Thomas (#124381)

The fact that he was a husband and a father of four young children did not prevent George Thomas Giles from enlisting. He joined the Canadian Expeditionary Force in November 1915 and six months later was at the front lines. George, 29, was killed during the brutal fighting at the Battle of the Somme and has no known grave. The real tragedy of his death is that George never got to meet his fourteen grandchildren and fifteen great-grandchildren.

George Thomas Giles was born in Liverpool, England on April 6, 1887, the eldest son of Edwin and Annie (nee Rooney) Giles. Both Edwin (born 1865) and Annie (born 1864) were born in Liverpool, and they got married in their hometown in 1885 when they were in their early 20s. They were blessed with four sons: George Thomas; James Edwin (born June 6, 1888, but passed away at the age of three in 1891); Frederick Wright (born September 8, 1890); and Edwin Jr. (born February 13, 1893). George Giles was baptized on April 17, 1887 at Everton, St. Polycarp, Lancashire. In 1894, when George was only seven years old, his mother, Annie, passed away at the age of thirty.

In 1901, Edwin Giles remarried, his second wife being twenty-one-year-old Mary Jane Foulds (born January 1880), in Berkinhead, Cheshire. Mary Jane Giles gave birth to three daughters in a six-year span. Mary Elizabeth May (born May 1, 1903); Doris (born 1908); and Selina (born 1909) were step-sisters to George and his brothers. In 1911, Edwin, a baker’s manager, and Mary Jane were residing in Cheshire, England with their children: Edwin Jr. (age eighteen); Mary E. May (age seven); Doris (age two); and Selina (age one).

Four years earlier, George Thomas Giles had married Sophia Ann Walker on December 30, 1907 at St. Nicholas Church in Liverpool, England. Some time after marrying, the young couple emigrated from England to Canada and eventually made it to Sarnia where they resided at Confederation Street and later Campbell Street. George and Sophie Ann Giles had four children together: Annie (born 1912); Lillian Edith (born October 3, 1913); Marty, and George Jr.

Now a father of four, twenty-eight-year-old George Giles enlisted in the Canadian Over-Seas Expeditionary Force on November 9, 1915 in Sarnia. He stood five feet nine inches tall, had blue eyes and brown hair, and was residing on Campbell Street with his wife Sophie Ann and their four children at the time. George recorded his trade or calling as R.R. Fireman and his next-of-kin as his wife Sophie Giles of 418 Campbell Street, Sarnia. He also recorded his prior military service of "4 years Territorials". George Giles became a member of the 70th Battalion, Canadian Expeditionary Force, with the rank of Private.

Five months after enlisting, on April 24, 1916, Private George Giles embarked overseas. He arrived in England on May 5, 1916 and approximately six weeks later, on June 18, 1916, he was transferred to the Canadian Infantry, 58th Battalion, Central Ontario Regiment. George arrived in France with the 58th Battalion the next day, June 19, 1916. Two days later, on June 21, 1916, he arrived at the front lines.

Private George Giles soon found himself taking part in fighting during the **Battle of the Somme** (July 1-November 18, 1916)--one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

The second major offensive of the Somme battle was the week-long Battle of Flers-Courcelette (September 15-22). It was here where tanks made their first appearance in the war. The Battle was a stunning success for the Canadians, but it came at a cost of over 7,200 casualties. Approximately two weeks after this battle, and three and a half months after arriving at the front lines, on October 7, 1916, Private George Giles was killed in action while fighting during the Battle of the Somme. George Giles' Circumstances of Death Register records him as; *Date of Casualty: 7-10-16. "Killed in Action". Location of Unit at time of Casualty: TRENCHES AT COURCELETTE. No record of burial.*

Private George Thomas Giles

In early November 1916, St. John's Church held a memorial service for several local fallen. The following is the report on the service from the *Sarnia Observer*:

MEMORIAL SERVICE AT ST. JOHN'S CHURCH

*A memorial service was held at St. John's Church Sunday evening for Thos. Littlefield, Jesse Croucher and **George Giles**, who were recently killed at the Front. There was a large attendance, and the service was of a very solemn character. A practical address was delivered by Rev. F.G. Newton, rector, who eulogized the men and their work in defence of the empire. He also spoke words of consolation to those mourning for their dead, and exhorted the congregation to do all they could by constant acts of kindness to the bereaved, to show they appreciated the sacrifice made by the men who are now no more. The music and hymns which were appropriate to the occasion, were exceedingly rendered. Mr. Hargreaves played with effect the "Dead March in Saul."*

[Jesse Crouchers' story is also included in this Project].

George's wife, Sophie Ann and their four children were residing on Bank Street in Ottawa at time of

George's death. Over five decades later, Sophie Ann Giles passed away at the age of eighty-three in January 1970 in Ottawa. Among those who she left behind were her four surviving children: Mrs. James E. Sherman (Annie); Mrs. N.E. Arnold (Lillian); Mrs. F.H. Nielson (Marty), of Ottawa; and George E. of Kingston; along with 14 grandchildren and 15 great-grandchildren. George Giles, 29, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

GORE, George (#844493)

George Gore's story differs from many Sarnians who fought in the Great War. First, he was an American who, at some point, immigrated to Sarnia. And, at thirty-six, he was much older than others when he enlisted in 1916.

George Gore was born in Mound City, U.S.A, on April 18, 1880. At some point, George immigrated to Canada and resided in Sarnia. At age thirty-six, he enlisted in the Canadian Over-Seas Expeditionary Force on May 15, 1916 in Sarnia. He stood five feet seven inches tall, had brown eyes and black hair, and was single. He recorded his present address simply as "Sarnia" and his trade or calling as a cook. He did not immediately record any next-of-kin, but amended it later to his cousin George Core in Mound City, USA. Later, George changed it again to Magnolia Lewis, a friend at 620 East Harrison Street in Danville, Illinois, USA.

George Gore initially became a member of the 149th Battalion, Canadian Expeditionary Force. He embarked overseas from Halifax for the United Kingdom on March 25, 1917 aboard the *S.S. Lapland*. Disembarking in Liverpool, England on April 7, 1917, he became a member of the 25th Reserve Battalion, stationed at Bramshott. One month later, on May 2, 1917, Private George Gore was transferred to 36 Company, Canadian Forestry Corps (CFC), stationed at Sunningdale. Eleven days later, on May 13, 1917, now with the rank of Acting Sergeant, George Gore arrived in Havre, France, a member of 57th Company, Canadian Forestry Corps, where he served as a cook. Four months later, on September 21, 1917, George Gore reverted to the rank of Private, at his own request.

More than seven months later, on May 1, 1918, a seriously ill Private George Gore was admitted to Canadian Forestry Corps Hospital La Joux Jura, France. He passed away in hospital that day, the result of a Haematuria Cerebro-Haemorrhage. This is a type of bleeding that occurs inside the skull, around or within the brain, often caused by some type of head trauma.

George Gore's Circumstances of Death Register records him as; *Date of Casualty: 1-5-18. "DIED" (Haematuria cerebro haemorrhage) at Canadian Forestry Corps Hospital La Joux Jura. Location of Grave: Campagnole Communal Cemetery, Jura, near Andelot between Pontalier and Dyon.* George Gore, 38, is buried in Champagnole Communal Cemetery, Jura, France, Grave A.12.

GRAY, George (#81334)

George Gray of Sarnia was a Private in the 32nd Battalion, Canadian Expeditionary Force, when he arrived in France in February 1915. He was killed in The Battle of Festubert, the second major engagement fought by Canadian troops in the war. The only consolation for George especially, as well as for his family and for his fellow soldiers who admired him greatly, is that his death was painless and instantaneous. Private Gray, 26, was killed when an enemy shell exploded in a trench near him. He has no known grave.

George Gray was born in Sarnia on November 30, 1888, the youngest son of Scottish born parents Donald (born September 3, 1833) and Mary (nee Black) Gray. Donald Gray had emigrated from Scotland to Canada in 1852 and by 1871, he had wed Mary and was working as a farmer in Plympton Township. Donald and Mary Gray had five children together: James (born December 26, 1876); Daniel A. (born May 29, 1879); Euphemia (born October 3, 1881); George and Jessie. Sometime before 1891, Mary Gray passed away and in 1901, widowed father Donald was still residing in Plympton with four of his children; James, Daniel, Euphemia and George. At some point after, Donald Gray moved into Sarnia and resided at 327 Russell Street until he passed away at age seventy-nine on September 23, 1912.

George Gray resided in Sarnia until he finished his schooling and then moved to the Canadian Northwest. At the age of twenty-six, he enlisted in the Canadian Over-Seas Expeditionary Force on December 12, 1914 in Winnipeg, Manitoba. He stood five feet ten inches tall, had grey-blue eyes and medium brown hair, and was single at the time. He recorded his trade or calling as farmer, and his next-of-kin as his brother Daniel A. Gray of 327 Russell Street, Sarnia. George Gray became a Private in the 32nd Battalion, Canadian Expeditionary Force. Two months

later, on February 23, 1915, he embarked overseas for the United Kingdom aboard the *S.S. Vaderland*.

Private George Gray trained in England for a little over nine weeks and then embarked for France on May 5, 1915. He soon found himself taking part in the final weeks of the Second Battle of Ypres.

The 1st Canadian Division soldiers had arrived at the front in February 1915 and found themselves in a cratered, eviscerated wasteland of mud, wasted vegetation, and unburied bodies. By the end of March, the division had marched north to Ypres, Belgium, the centre of the salient jutting into the German line, surrounded on three sides by enemy soldiers and artillery. It was at the Ypres salient, an area traditionally referred to as Flanders, that the Canadians engaged in their first battle of the war, the Second Battle of Ypres, April 22-May 25, 1915, their baptism by fire. It was here, on April 22, with the wind blowing it over the French and Canadian lines, that the Germans unleashed the first lethal chlorine gas attack in the history of warfare. On April 24, the Germans launched another gas attack, this time targeting the Canadian line. In the first 48 hours at Ypres (April 22-24), there were more than 6,000 Canadian casualties. One in every three Canadians became a casualty. A staggering 2,100 were killed and 1,410 were captured.

Following the Battle of Ypres, the decimated units of the 1st Canadian Division marched south to join in the Allied offensives that were already under way. On May 5, 1915, George Gray became a member of the Canadian Infantry, Eastern Ontario Regiment, 2nd Battalion, No. 12 Platoon, #3 Company. The Canadians were thrust into the fighting near the villages of Festubert in mid-May 1915 and Givenchy in mid-June, both in northern France, part of a wider British offensive against German lines.

The **Battle of Festubert** was the second major engagement fought by Canadian troops in the war. The main attack began on May 18, with two brigades of the 1st Division launching frontal assaults against heavy German defences near the village. The fighting here followed the grim pattern of frontal assaults against entrenched German forces that had all the advantages of terrain, firepower and well-positioned machine guns. With little planning and inaccurate maps, they repeatedly charged over open ground with little artillery support. By May 25, after a week of fighting, the battle was over. The result was slaughter on both sides, and the Canadians had made only small gains.

On May 30, 1915, Private George Gray was killed in action while fighting near Festubert in France. He was killed by an enemy shell. His Circumstances of Death Register records him as; *Date of Casualty: 30-5-15. "Killed in Action". Location of Unit at time of casualty: TRENCHES IN VICINITY OF FESTUBERT. No record of burial.*

About three weeks later, in mid-June 1915, the 1st Canadian Division were thrust into the fighting at **Givenchy**. Supposedly, lessons had been learned at Festubert, and plans were made to address the issues of German barbed wire and machine gun nests. Although the Canadians achieved some of their objectives, the gains were negligible and the cost was extremely high—2,468 casualties at Festubert and a further 400 at Givenchy.

In early June 1915, George's brother, Daniel, in Sarnia received the following letter informing him of the circumstances of his brother's death:

France, June 2nd, 1915 D.A. Gray, Esq, 327 Russell Street, Sarnia
Dear Sir,

I am sorry to have to advise you of the death of your brother George who was killed in action on Sunday night, the 30th of May. He, with a party of men from my platoon, was detailed to complete a communication trench from our own to that of our No. 4 company, which was 100 yards ahead of us.

Suddenly, without warning a big German shell struck the side of the trench and exploded almost beside him. I was close by, and immediately had him lifted out of the trench. Pieces of the shell had struck him in the back and his death was painless and virtually instantaneous. We did what was possible before he passed away and I then took his papers, which I am sending through our orderly room, who will forward them through the regular channels.

Four of his chums carried him back behind our lines and laid him decently in a grave which they had dug. I have marked this with a cross, giving his name and regiment number and stating that he was killed in action on the 30th of May, 1915. George was a very fine man and most popular with his companions. I have had a very high opinion of him since I took command of the platoon, and I feel his loss very keenly. There is little I can say to make the blow easier for you to bear, but a man can ask no finer end than death met in the service of his country and though the toll is heavy it must be paid to prevent German savagery overrunning the world. Please accept my sincere sympathy in your bereavement and believe me I share the sorrow with you.

Yours sincerely, T.C. Biggar

Lt. No. 12 Platoon, No.3 Co., 2nd Batt., C.E.F.

At the time of George Gray's death, his siblings were residing in different areas: James was in Camlachie; Daniel A. (a Grand Trunk engineer) was at 327 Russell Street, later 229 Brock Street in Sarnia; Euphemia was in Sarnia residing with brother Daniel; and Jessie was in Milburn, Ontario. George Gray, 26, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. His name is also inscribed on the Camlachie Cenotaph. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

GUERTIN, Percival Edward (#649389)

Percival (Percy) Edward Guertin was one of four brothers who served in the Great War and the only one of the four to be killed. A father of four, Percy was killed in action in April 1918 four months after arriving in France. He has no known grave.

Percival (Percy) Guertin was born in Chatham, Ontario, on September 29, 1886, the son of Alexander Napoleon and Julia (nee Turcott) Guertin. Alexander Guertin was born January 1, 1857 in the U.S.A. and came from a military family. His grandfather was a veteran of the American Civil War and his great-grandfather a veteran of the War of 1812. Three years before Confederation, Alexander immigrated to Canada in 1864 where he was initially employed as a grocer and later a general labourer.

Alexander and Julia (born August 23, 1856 in Ontario) Guertin had nine children together: Joseph Edward (born December 13, 1882); Florence Adelaide (born June 14, 1884); William John (born July 8, 1886); Percival; Clyde Alexander (born August 14, 1888); Mary Stella (born April 26, 1892); Norman Peter (born June 12, 1893); Charles Edmond (born September 14, 1895); and Rena Margaret (born March 15, 1900). Alexander Guertin was an employee of the Dominion Salt Company for forty years, and the Guertin family lived first at 352 Maxwell Street and later 143 Elgin Street, Sarnia. The American born patriarch, Alexander, lived in Sarnia for fifty-three years, before passing away at the age eighty-five in June 1943 and being interred at Our Lady of Mercy Cemetery, Sarnia.

Four sons—William, Clyde, Norman and Percival—served with Canadian regiments during the First World War. During the Second World War, at least two of Alexander and Julia's grandsons followed the family tradition: Lt. T.J. Forlan, son of Florence Forlan (nee Guertin), was a flight commander overseas with the American Air Force; and Sgt. William Guertin, son of Norman Guertin, served with the R.C.A.F., and ended up as a prisoner of war in an Italian prison camp.

William John Guertin (#171778) was the first son to enlist. Born July 8, 1886 in Chatham, Ontario, he enlisted in the Canadian Over-Seas Expeditionary Force on August 17, 1915 in Toronto. The twenty-nine-year-old stood five feet five inches tall, had brown eyes and dark brown hair, was married, and was living in Toronto at the time. He recorded his trade or calling as blacksmith, and his next-of-kin as his wife Olive Guertin at 905 Queen Street, Toronto. William became a member of the 83rd Overseas Battalion, as a signaller and embarked overseas for the United Kingdom on April 24, 1916 aboard the *S.S. Olympic*. He arrived in Liverpool on May 7, 1916.

During training at West Sandling, he was transferred to the 39th Battalion. Private William Guertin arrived in France on December 22, 1916 as a member of the 27th Battalion, Canadian Infantry. Less than four months later, he would be part of the 97,000 Canadians who fought in the Battle of Vimy Ridge, April 9-12, 1917. It was the very first time (and last time in the war) that all four divisions of the Canadian Corps would attack together as one formation. The seminal battle resulted in a significant victory for Canada, but at a cost of approximately 7,004 wounded and 3,598 lost lives in four days of battle. The following month, in May 1917, William Guertin was gassed in France.

Private William Guertin also took part in the Battle of Passchendaele, Belgium, October 26-November 10, 1917. Fought in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and glutinous mud, and overcoming almost unimaginable hardships and horrific fighting conditions, the Canadians achieved a remarkable victory that few thought possible. It came at a cost of almost 12,000 Canadian wounded and more than 4,000 Canadians killed. Days after the Battle, on November 19, 1917, William Guertin was awarded the "Military Medal for Bravery in the Field".

In early August 1918, the Canadians began their Hundred Days Campaign, the "beginning of the end" of the Great War, where they were called on again and again over the three-month period to lead the offensives against the toughest German defences. On August 9, 1918 Private William Guertin was wounded in action, the result of a "gun

shot wound right hand". The rifle bullet was removed from his hand at the 18th American General Hospital in France; he was discharged from hospital after a month of recovery and was then returned to England.

William Guertin returned to Canada in December 1918, and was discharged as "medically unfit for further military service" in January 1919 in Toronto. His wounds resulted in partial loss of function of his right hand and his lungs.

Clyde Alexander Guertin (#186128) was the second son to enlist. Born August 14, 1888 in Fish Creek, Michigan, he enlisted in the Canadian Over-Seas Expeditionary Force on November 15, 1915 in Winnipeg, Manitoba. The twenty-seven-year-old stood five feet six and a half inches tall, had blue eyes and dark brown hair, was single, and was living in Brandon, Manitoba at the time. He recorded his trade or calling as barrel maker and his next-of-kin as his father Alex Guertin at 351 Maxwell Street, Sarnia. Clyde became a member of the 90th Canadian Infantry Battalion (Winnipeg Rifles), and embarked overseas for the United Kingdom on May 31, 1916 aboard the *S.S. Olympic*, arriving in Liverpool on June 8, 1916.

Private Clyde Guertin arrived in Havre, France on August 21, 1916 as a member of the 78th Battalion, Canadian Infantry and was later transferred to the 24th Battalion. In August 1916, Clyde mailed a letter home from France to their sixteen year-old sister, Miss Rena Margaret Guertin of 351 Maxwell Street. The following is a portion of that letter:

Dear Sister,

I am just going to say "Hullo" for there isn't much else to say. We have just been over a few days, and it's pretty much like England. I guess they took me for a Scot for I am in the 78th (a Scotch Battalion) from Winnipeg. They are a great bunch of fellows, and we are all happy, no matter what comes or goes. There isn't many more of my old Battalion in it. I am well and happy and hope all at home are the same. Do your best to keep mother cheered up. I know she worries like the mischief having four sons out of five in the army, but the only thing to do is to look on the bright side. I am glad I'm here, and the other boys are in it... if it should happen that I am one of the ones that don't come back, don't feel sorry, as I'll give a good account of myself over here. You can bet your sweet life on that. We have a good name here and will do our best to keep it up till the last. Well dear, be a good girl and I'll bring you back a lock of the Kaiser's hair – or at least a German helmet. With lots of love and kisses, I will say goodbye to the dearest sis in the world.

Your brother Clyde.

PS. Give my best to everyone at home.

Private Clyde Guertin was wounded in action the first time on April 10, 1917, during the Battle of Vimy Ridge, the result of a "gun shot wound left arm, fracture". Approximately ten weeks later, he was discharged from hospital and returned to his unit. On August 9, 1918, during the Battle of Amiens, he was wounded again, the result of a "gun shot wound, bullet, scalp". Clyde Guertin survived the Great War, and returned to Canada in April 1919 where he was discharged on demobilization in Montreal.

Norman Peter Guertin (#844465) was the third son to enlist. Born June 12, 1893 in Sarnia, he enlisted in the Canadian Over-Seas Expeditionary Force on January 17, 1916 in Sarnia. The twenty-two-year-old stood five feet two and a quarter inches tall, weighed 104 pounds, had brown eyes and black hair, was single, and was living in Sarnia at the time. He recorded his trade or calling as an electrician, and his next-of-kin as his father Alexander Guertin at 351 Maxwell Street, Sarnia. Private Norman Guertin became a member of the 149th Battalion.

In March 1917, medical officials were concerned about his health as he had some breathing difficulties -- diagnosed as due to possible disease of nasal framework, bronchitis or asthma--and was undersized. He weighed a mere 104 pounds and had, since birth, a "congenital undersized chest". He was transferred to No. 1 Special Service Company in London to be given one month "special physical training in order to develop his chest size to normal". In October 1917, he was promoted to the rank of Sergeant with the 1st Depot Battalion, Western Ontario Regiment. Norman served only in Canada and was discharged on demobilization in January 1919 in London, Ontario.

Two days before his twenty-second birthday, **Percival (Percy) Edward Guertin** (a labourer at the time) married Maud Grace (nee Noel, of Bay City, Michigan) Guertin on September 27, 1908 in Sarnia. Like her husband, Maud came from a family of nine children. One of her brothers, eight years her junior, was Urban Joseph Noel. Urban Noel, of Sarnia, also served in the Great War and, at age twenty-two, lost his life in action in Somme, France on August 8, 1918. Urban Joseph Noel's story is included in this Project on page 343.

One year after their marriage, Percy and Maud Guertin were residing at 355 Maxwell Street, Sarnia, and Percy was employed at a local sawmill. The couple later moved to South Porcupine, Ontario, before returning to Sarnia, where they lived at 109 Collingwood Street and then at 214 Parker Street. Percy and Maud Grace had four children together: Percy Edward Jr. (born August 2, 1909 in Sarnia); Francis Alexander (born December 19, 1910); Laura Genevieve (born June 11, 1913); and Marguerite Louise (born 1914).

Twenty-nine-year-old Percy Guertin enlisted in the Canadian Over-Seas Expeditionary Force on May 23, 1916 in South Porcupine, Ontario. He was the fourth Guertin son to enlist. He stood five feet six inches tall, had brown eyes and dark hair, and was a married father of four, residing in South Porcupine at the time. He recorded his trade or calling as moulder and his next-of-kin as his wife Maud Guertin of South Porcupine, Ontario. He also recorded that he had prior military experience with the 97th Regiment. Percy became a Private with the 159th Battalion, Canadian Expeditionary Force and embarked overseas for the United Kingdom on October 31, 1916 aboard the *S.S. Empress*.

Percy's brothers, William and Clyde, also served overseas in the Great War. Percy was able to meet-up for a brief time with his brother Clyde overseas. Their encounter turned out to be shortly before Percy's death.

Percy Guertin disembarked in England on November 11, 1916. More than two months later, on January 30, 1917, he became a member of the 8th Reserve Battalion stationed at Seaford. On February 9, 1917, he was transferred to the 4th Canadian Railway Troops (CRT) stationed at Shoreham, and then Purfleet. Later that month, on February 24, 1917, Percy arrived in France as a Sapper with the 4th CRT. Eleven months later, on January 26, 1918, he was transferred to the Canadian Infantry, 24th Battalion, Quebec Regiment, with the rank of Private.

Private Percival Edward Guertin

Maud Guertin with son Francis Alexander

Fourteen months after arriving in France, on April 11, 1918, Private Percy Guertin was killed in action during fighting there. His Circumstances of Death Register records him as; *Date of Casualty: 11-4-18. "Killed in Action". Location of Unit at time of Casualty: TRENCHES EAST OF NEUVILLE VITASSE. Reported locations of grave: Sheet 5lb.N.19.a.08.75.* In late April 1918, Maud Guertin, residing at 109 Collingwood Street, received the following telegram:

OTTAWA ONT APRIL 23

MRS MAUD GUERTIN, SARNIA ONT

DEEPLY REGRET TO INFORM YOU THAT 649389 PRIVATE PERCY ED. GUERTIN INFANTRY, OFFICIALLY REPORTED KILLED IN ACTION APRIL 11TH.

DIRECTOR OF RECORDS

Percy Guertin left behind his wife of nine years Maud and their four children. Percy Guertin, 31, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. Four months after her husband Percy's death, Maud Guertin's brother, Urban Joseph Noel, was killed in action in Somme, France.

HALL, George (#189862)

George Hall enlisted at age thirty-two and arrived in England in early April 1917. A week before his thirty-fifth birthday, he was killed by enemy shell fire while fighting in the Battle of Arras.

George was born in Highgate, Kent, Ontario, on September 4, 1883, the son of Henry and Hannah (nee Jacques) Hall. Henry (born January 1841) and Hannah (born August 1852) both emigrated from England to Canada, (Henry in 1857, and Hannah in 1869), and together had twelve children, all born in Ontario: Margaret (born 1873); John (born March 1874); Emma (born September 1876); Mary (born 1877); Frederick (August 1879); Harry William (born October 1881); George; Thomas (born November 1885); Ann (born 1889); Rosie (July 1890); Velma (July 1892, later Velma McClung); and Frank (August 1895).

In 1881, the Hall family was residing in Bothwell, Ontario, where Henry was working as a farmer, and in 1891 through to 1901, the Hall family was residing in Oxford, Elgin West District. In 1911, they were residing in Highgate Village, Kent East District. Their father Henry was employed as a labourer, while sons Frederick, 32, and George, 28, were both employed as bricklayers.

At age thirty-two, George Hall enlisted in the Canadian Over-Seas Expeditionary Force on January 14, 1916, in Ridgeway, Ontario. He stood five feet four and a half inches tall, had light brown eyes and dark brown hair, was single, and was residing with his father in Highgate at the time. George recorded his trade or calling as bricklayer, and his next-of-kin as his father Henry Hall of Highgate, Ontario. Initially a member of the 91st Battalion, he was transferred to the 186th Overseas Battalion, Canadian Expeditionary Force on February 28, 1916. George embarked overseas from Halifax bound for the United Kingdom on March 28, 1917 aboard the *S.S. Lapland*.

George Hall arrived in Liverpool, England on April 7, 1917 where he became a member of the 4th Canadian Reserve Battalion, stationed at Bramshott. Four and a half months later, on August 24, 1917, George arrived in Etaples, France and became a member of the Canadian Infantry, 18th Battalion, Western Ontario Regiment. George Hall was part of the 18th Battalion when it took part in the Battle of Passchendaele in Belgium (October 26 – November 10, 1917). It was waged in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and glutinous mud. Overcoming almost unimaginable hardships and horrific fighting conditions, the remarkable Canadian victory that few thought possible, came at a cost of almost 16,000 Canadian casualties.

Nine months after arriving in France, on May 31, 1918, George was admitted to No. 5 Canadian Field Ambulance, the result of a shell wound in the back. He was discharged six days later and rejoined the 18th Battalion. Two months later, he was taking part in the **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium)—the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km. The second offensive in Canada’s Hundred Days Campaign was the **Battle of Arras and Breaking the DQ Line** in France (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line – a series of strong defensive trenches and fortified villages. General Sir Julian Byng called the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line “*the turning point of the campaign*”, but it came at a cost of 11,400 Canadian casualties.

Approximately two and a half months after being released from hospital, on August 28, 1918, Private George Hall was killed by enemy shell fire while fighting in the Battle of Arras. George’s Circumstances of Death Register records him as; *Date of Casualty: 28-8-18. “Killed in Action”. During operations in front of Vis-en-Artois on the afternoon of August 28th, 1918, he was instantly killed by enemy shell fire.* In mid-September 1918, George’s brother Harry, in Sarnia, received a telegram informing him of his brother George’s death. George Hall, 34, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

HANNA, William Neil

William Neil Hanna was born with a sense of adventure that never left him. Born into a prominent Sarnia family, Neil was studying law when the Great War started and the call to serve his country drove him to the battlefields of Europe. A pilot in the RAF, Neil was killed when his aircraft crashed in Italy ten days after the war officially ended.

Neil Hanna was born in Sarnia, on January 18, 1895, the only son of prominent Sarnian William John “Jack” Hanna (born October 13, 1862, of Adelaide Township, Middlesex County, Ontario), and his first wife Jean Gibson (nee Neil, born in 1863 in Sarnia). A few years before Neil was born, William (known as “Jack”) had fallen in love with the beautiful red-headed Jean Neil who lived in Point Edward. Jean Neil was the great-niece of Canada’s second Prime Minister, Alexander Mackenzie. Jack Hanna and Jean Neil were married on January 1, 1891 at St. Paul’s Rectory in Point Edward.

Four years into their marriage, Jean (nee Neil) Hanna passed away on January 25, 1895 in Sarnia at the age of thirty-three. Her death was the result of William Neil’s birth, where after seven days in hospital, she died as a result of septicemia (a serious bloodstream infection). Jack was devastated by Jean’s death and named their son after her surname. As author Debbie Marshall noted, “the ghost of Jean Neil would never entirely leave him. Her memory would long be reflected in the face of their son Neil.” Jean (Neil) Hanna is buried in Lakeview Cemetery in Sarnia.

The grief-stricken Jack was ill-prepared to care for his son, especially with a busy practice to run. His mentor, Robert MacAdams, suggested that his daughter, 25 year-old Maud (born August 6, 1870), help care for Neil. Jack agreed and in the ensuing months was drawn to Maud. Within a year, Jack Hanna and Maud MacAdams married on June 30, 1896 at St. George’s Church in Sarnia. Jack was a member of Central Methodist (United) Church while Maud was a life-long member of St. George’s Anglican Church.

Maud MacAdams, the daughter of Robert and Catharine (nee Brown) MacAdams of Sarnia, had three brothers: Leslie, Johnston and William; and two sisters, Roberta and Mary. Of note, Maud’s sister, Roberta Catherine MacAdams, served in the war and went on to be a women’s political trailblazer. Born in Sarnia in 1880, Roberta attended the Ontario Agriculture College and graduated from the Macdonald Institute for Domestic Science (now the University of Guelph) in 1911. Shortly afterward, she made her way to Alberta where she worked with the provincial government as one of the first domestic science instructors – a job that required her to travel to rural communities to teach about health and nutrition.

In 1916, Roberta enlisted in the Canadian Army Medical Corps and was given the rank of Lieutenant. She performed the first-ever role of dietician at the Ontario Military Hospital in Orpington, England (in 1917 the hospital was renamed No. 16 Canadian General Hospital). While she serving in England in 1916, the Alberta government created a special constituency for the 38,000 Alberta soldiers and nurses serving overseas. The 1917 provincial elections was the first time the vote was extended to white women in Alberta. Roberta MacAdams decided to run as a candidate – her campaign slogan, “Give one vote to the man of your choice and the other to the sister.” On September 18, 1917, she was elected as a Representative at Large for the nurses and soldiers overseas – one of the first two women elected to any legislature in the British Empire.

Roberta MacAdams remained dedicated to helping soldiers. The first piece of legislation she introduced was the “Great War Next-of-Kin Association,” which was intended “To secure economic justice for men and women who have taken part in the Great War.” It passed and she earned the distinction of being the first woman in the British Empire to introduce legislation. Subsequently, she returned to England and began working for Khaki University, a place for returning soldiers to continue their education. When the war ended, she served as a chaperone to British war brides travelling to Canada. She was eventually appointed to the Alberta Soldier Settlement, a body which granted land rights to returning veterans. In 2016, the Roberta MacAdams School in Edmonton was named in her honour.

Jack and Maud Hanna had two daughters together, step-sisters for Neil: Margaret (born April 13, 1897, later Margaret Spaulding); and Katherine (born November 3, 1899, later Katherine Sproat). In 1901, also residing with the Hanna family in Sarnia was their sixteen year-old servant, Agnes Druscilla Siddall. Agnes Siddall was born on June 26, 1884 in Sarnia Township, the youngest daughter of Robert John Siddall (a farmer in Sarnia Township) and Mary Ann (nee Laforge) Siddall. On August 18, 1905, twenty year-old Agnes Siddall married twenty-three-year-old David Kerr, a labourer in Sarnia originally from Scotland. Agnes and David Kerr had four children together. In 1915, David Kerr enlisted in Sarnia to serve in the war. He was killed in action on the first day of the Battle of Vimy Ridge. David Kerr’s story is included in this Project.

In 1911, Jack and Maud Hanna, and their children Neil, Margaret and Katherine, along with their twenty-three-year-old Domestic Bessie Dale, were residing at 236 Brock Street N., Sarnia. Jack Hanna was an influential force in the community and beyond. As the years passed, the Hanna’s were recognized as one of Sarnia’s most prominent families. And besides its social status and political connections, the family was wealthy—by 1912, Jack was a millionaire. At the couple’s home, they entertained such dignitaries as future prime minister Arthur Meighen and the Royal Highness Princess Patricia of Connaught, the granddaughter of Queen Victoria. Jack had graduated from Sarnia Collegiate Institute at seventeen, taught at a primary school near his home for three years, and then attended law school at Osgoode Hall in Toronto. He was called to the bar in 1890 and settled into his law practice in Sarnia. In 1902, he was elected to the Ontario legislature for Lambton West as a Conservative cabinet member.

While practicing law and building his political base, he had many connections. He was counsel for Imperial Oil Company from the time it came to Sarnia in 1897; and was a director with several companies including Imperial Bank of Canada, the Sterling Bank of Canada, and the Western Canada Settlers Mutual Company. As a legislative member, Jack Hanna had an enormous capacity for political work. For example, by 1914 he had brought in nearly forty changes to liquor legislation for the purpose of restricting sales and distribution. In March 1916 he introduced the Ontario Temperance Act, which closed all bars, clubs, and liquor shops for the duration of World War I, and prohibited sales except for medicinal, scientific, or sacramental purposes. After the war broke out, Jack Hanna served as one of Prime Minister Robert Borden’s advisors. When food shortages and inflationary prices appeared to threaten the war effort, Jack was appointed food controller for Canada on June 21, 1917. In ill health, he resigned his political position in January 1918, and later that year he assumed the presidency of Imperial Oil. In fact in December of that year, he initiated collective bargaining and employee benefits at Imperial.

From an early age, their son Neil Hanna, showed an adventurous streak that never left him. No tree was unclimbable; no horse, unrideable; no dare, unacceptable. A family member described Neil as being “as rough and tumble as his father.” Neil was educated in Sarnia public schools and Sarnia Collegiate, and then attended St. Andrew’s College in Aurora from September 1908 to June 1910. Having graduated from high school, Neil was not yet ready for university--or so his parents thought. Jack, therefore, arranged for Neil to article in the summer at his law office of Hanna, LeSueur and McKinley at 145 ½ Front Street. His articling experience must have been positive, for Neil decided to study law. With his parents’ blessing, he attended Victoria College Delta Upsilon, University of Toronto from 1913 until 1915. He fully intended to practice law as a profession, but the lure of serving his country in the Great War proved too strong for Neil.

Early in 1915, Neil registered at the Royal Military College in Kingston to train as a gunner. He was planning to attend a military aviation course in Hendon, England in September. The news distressed his parents, but they kept their emotions to themselves. They hoped he would remain with the Artillery, for his odds of surviving were much better on the ground than in the air. They got their wish in the spring of 1915.

That spring, twenty year-old William Neil Hanna, single at the time, enlisted in the Canadian Over-Seas Expeditionary Force and became a member of the Army, Royal Field Artillery 26th Battery, Gunner. He embarked overseas in September 1915. He obtained his commission in England in the Royal Field Artillery, and departed for

France with his unit early in 1916. He requested and was soon transferred to the cavalry. Jack and Jean Hanna in Sarnia wrote Neil a few times each week and sent news of his replies to other family members concerned about his safety. According to historian Debbie Marshall, “the sun rose and set” on their only son.

A little more than a year after enlisting, the Hanna’s received news of Neil’s wounding in battle in mid-July 1916, during the early stages of the Battle of the Somme (July 1-November 18, 1916). Neil Hanna was severely wounded in his hip at Mametz Wood on July 12, 1916. Mametz Wood had been one of the worst battles of the war thus far. The battle began along a twisting series of trenches stretching forty kilometres long north of the Somme River in the heart of Picardy. British and French troops had planned to mount an extensive infantry attack on the German trenches, thus creating a breach in the line that would allow the Allied cavalry to ride to victory. The first day of the battle was the bloodiest. It began with the Allies launching 250,000 shells at the Germans. At the end of the barrage, the troops emerged from their trenches and moved forward into the hellstorm of enemy fire. At the end of the first day, 21,000 Allied soldiers were dead and another 21,000 were wounded.

The Allies were successful in taking the villages of Mametz and Montauban as well as the Leipzig Redoubt, an important German fortification. On July 12, the British took Mametz Wood, just north of the village of Montauban. At some point, the order was given for the British cavalry to charge into the battle-scarred remains of Mametz Woods. As Neil charged on horseback amidst the exploding shells and machine gun fire, his horse stampeded and fell, throwing him to the ground. In the next instant, he was run over by a gun carriage. He regained consciousness in No. 13 Field Ambulance, was later transferred to No. 2 Stationary Hospital at Abbetville, and then moved to England. Convalescing at Queen Alexandra’s Hospital in London, Neil had a cracked rib and a fracture of the crest ileum—a pelvic injury that caused him much pain.

In October 1916, Neil Hanna returned to Sarnia on leave to recover and was greeted by his anxious and relieved parents. He was, however, experiencing intense pain even though he seldom complained. Jack and Maud insisted he see a specialist in bone fractures and the news was not good. The doctor noted that *Neil’s left iliac bone of the pelvis is very much crushed and fractured, the upper fragment is markedly displaced downwards and impinges somewhat upon the hip joint interfering with its freedom of action. In addition to this, one of the processes of the lumbar spine is fractured.* The doctor warned Neil that if he returned to the trenches, he risked permanent disability. Neil wanted to continue serving, but in his current capacity, he would be a liability to his artillery unit. He had to find another way to do his duty, so he returned to London, England and took a desk job at Canadian headquarters. He would not be there for long. In February 1918, Neil Hanna expressed a desire to do what he wanted to do in the first place: to join the RAF like his cousin Harold.

In April 1918, Jack Hanna’s nephew, Harold, celebrated his seventeenth birthday by enlisting in the Royal Air Force and starting flight training in England. Less than a month later, he died when his plane crashed. In a letter to William, Jack provided more details: *Harold was making his last flight for that course and had given a perfect performance up to the time of the accident. Just what happened is not definitely known, but it would appear that coming down at a distance of 1500 feet from the ground, the controllers broke or otherwise went wrong and he struck the ground at a very high speed, probably never knowing what happened.*

Life in a comfortable desk job was not to Neil’s liking, so he chose to return to his unit in France. By May, he was “in a quiet part of the line” and, despite Harold’s death, was lobbying his superiors to transfer him to the Royal Air Force. In May 1918, when his request was finally granted, he started his training with the RAF.

Jack Hanna, of course, disapproved of his son’s decision. In a letter to Neil, the concerned father wrote, *I do think it would be a great mistake for you to attempt to push your way as a pilot. I do not believe you are fitted for it. We want you back alive and able to carry on here. Please exercise the necessary care.* Jack had every reason to be worried. Flying, still in its infancy, was extremely dangerous. The wooden-framed planes were flimsy and equipping the light aircraft with heavy weaponry was problematic. The demands of war meant that pilot training was often cursory. Many recruits had only a few hours of instruction before being expected to fly solo; consequently, more pilots died from accidents and mechanical failure than from enemy fire. By war’s end, almost a quarter of all British flyers were Canadian. Of 6,166 British Empire air service fatalities, 1,388 were Canadian. An additional 1,130 Canadians were wounded or injured, and 377 became prisoners of war or were interned.

After successfully passing his initial training, Neil Hanna was appointed to service with the Royal Flying Corps, 36th Training Squadron, with the rank of Lieutenant. In mid-October 1918, Lt. Neil Hanna was sent to Italy to complete his training. While there he was engaged in flying over the Austrian front. Shortly after his arrival in Italy,

the Austrian armies surrendered. The Armistice Treaty was signed on November 11th, officially ending the war.

Lieutenant William Neil Hanna

Ten days later, in his oak-lined study in Sarnia, an elated Jack Hanna wrote a letter to Neil, his thoughts pouring out from relief that his son had survived the war. They hadn't heard from Neil since he had begun training as a pilot in Italy, but Neil's latest letter had arrived at their Brock Street home earlier that day. In it, Jack and Maud learned that Neil had been bedridden with influenza, but had survived it and was eager to return home. The burden of worrying about Neil's safety disappeared, and Maud and he could look forward to the comfortable life they wanted for him when he returned. Jack signed his letter *With love from all here, Very sincerely, Your dad* and set the letter aside. He would ask his secretary to type it and send it by the first post tomorrow.

Jack and Maud Hanna went on a short trip to New York where he had to attend to some legislative business, and a few days later, Jack made his way home alone. It was late on Sunday, November 24, 1918 in Toronto when a knock on the front door drew Jack to answer it. Before him stood a messenger holding a buff-coloured envelope. Jack knew immediately what news it contained, opened it and read the telegram, DEEPLY REGRET TO INFORM YOU LIEUTENANT W.N. HANNA ROYAL AIR FORCE IS REPORTED TO HAVE BEEN KILLED ON NOVEMBER TWENTIETH PERIOD AIR COUNCIL EXPRESS THEIR SYMPATHY. They were given no particulars about how the fatality occurred. Few details emerged other than Neil had been observing the Austrian retreat and had been killed in a flying accident in Italy on November 20, 1918.

The next morning, Jack sent telegrams to his daughters Margaret (Mrs. Harry Spaulding) and Katherine, both in New York, providing them with the details of the cable that he had received the previous night. Jack and Maud soon received letters of condolence from friends. Following are portions of some of them;

Dear W.J. Hanna,

Let me tell you how much grieved we were to hear of the loss of your dear son. After so bravely doing his part in the great struggle it seems peculiar and hard he should not return when peace with victory is in sight. To live in the hearts of those we love and leave behind is not to die...

Dear Jack,

We were completely knocked out this evening when the news of Neil came. It must be worse of course for you people. I cannot write any words to express our feelings & sympathy better than you know both us and our feelings where Neil is concerned. We are all sure here that if the Almighty and white angels are in heaven to welcome white clean boys our Neil has a front seat for he was white through and through and will require no training whatever as he lived his life doing decent things for people...

My Dear Jack,

Please accept my heartfelt sympathy; may your wonderful courage remain with you in your overwhelming sorrow. With love and sympathy for Maud and the girls.

Dear Jack,

Leslie has just telephoned me of the cable. There is of course, nothing to be said – but if sympathy is of any help be sure it is yours. Dot and I feel it's a dreadful shock and a great grief. Our much love and all sympathy to you and Maud.

In December 1918, the St. Andrew's College yearbook included a section on former students who had lost their lives while serving in the Great War. Included was a synopsis on William Neil Hanna's education, military career and tragic loss. It concluded with, *Quiet, unassuming and steadfast, Neil Hanna endeared himself to many friends and he will be missed by all who knew him at school and in his later days.* Neil Hanna had also attended Victoria College at the University of Toronto. The Soldiers' Tower was built at the University of Toronto between 1919-1924 in memory of those lost to the University in the Great War. Lt. William Neil Hanna is among the 628 names carved on the Memorial Screen in the Tower. To this day, each year, the university awards "The William Neil Hanna Scholarship". It is awarded to "the Third Year student who, by her or his academic standing and by other qualities displayed in college life, shows outstanding promise of leadership and public service."

The loss of his only son was devastating for Jack Hanna. He had become president of Imperial Oil but had been in ill-health for a while. He travelled to Augusta, Georgia that winter for warmer weather. While in Augusta, fifty-six year-old Jack Hanna suffered a stroke and passed away on March 20, 1919, only four months after his son William Neil's death. Jack Hanna had been an influential figure in both national and provincial politics and his passing garnered much attention. According to *Saturday Night Magazine*, "his health was undermined not merely by his strenuous activities during the past decade, but by grief over the death of his only son." William John "Jack" Hanna is buried in Lakeview Cemetery.

His second wife, and William Neil Hanna's step-mother Maud Hanna was very public minded, serving her community in many ways, and became a celebrated Sarnia philanthropist. She contributed half of the money the city needed in 1932 to purchase the land for Canatara Park. She also made another large donation toward the purchase of Lake Chipican. She made many other contributions: donating land on Mitton Street for Hanna Park; purchasing the Horticultural Garden on College Avenue; paying the cost of operating the street car to Huron Park, so children could use the beach; and contributing to services benefitting children such as playground equipment, the hospital and to schools. Shortly after Maud Hanna's death in 1946, the Sarnia School Board opened its newest school at 369 Maria Street. The name for the new building, "Hanna Memorial School" was chosen to honour the memory of Mrs. Maud Hanna who had done so much philanthropic work in Sarnia. In Lakeview Cemetery, there is a large memorial "Hanna" stone in honour of all of the family buried there. In front of the large Hanna stone are a group of smaller stones, each commemorating a family member, including Margaret Hanna Spaulding, Maud Hanna, W.J. Hanna and Neil Hanna, Lieutenant R.A.F.

Twenty-three-year-old William Neil Hanna is buried in Montecchio Precalcino Communal Cemetery Extension, Italy, Plot 9, Row A, Grave 6. On Neil Hanna's headstone are inscribed the words, BELOVED AND ONLY SON OF JEAN NEIL & WILLIAM J. HANNA BORN AT SARNIA, ONT. JAN. 16, 1895.

HARRIS, George Henry (#123570)

English born George Henry Harris was residing in Sarnia when he enlisted in September 1915. He had been married for only three years and was the father of a two year-old daughter when he arrived at the front lines in France. Six months later, Private Harris, 26, was killed in action in the area known as Vimy Ridge.

George Harris was born in Brockley, Kent, England, on November 30, 1890, the son of Benjamin and Elizabeth (nee Bates) Harris, both originally of Middlesex, England. Benjamin and Elizabeth were blessed with seven children together: Benjamin Jr. (born January 9, 1880); Matilda (born February 14, 1882); Mary Ann (born 1885); John W. (born 1887); Emma E. (born 1889); George; and Ellen Rosina (born December 27, 1892). George Harris was baptized on December 24, 1890 in Deptford St. John Lewisham, England. In 1911, the Harris family was residing in Lewisham, London, England with Benjamin supporting his large family working as a brick maker. Elizabeth took care of their home and by now some of their children were working: John, as a milk carrier; Ellen, as a drapers assistant; and twenty year-old George as timekeeper.

In 1913, part of the Harris family immigrated to Canada. Benjamin and Elizabeth Harris, along with their children Benjamin Jr., 33—including his wife, Alice, and their four children; twenty-two-year-old George and twenty

year-old Emma departed Liverpool aboard the *Tunisian* and arrived in Quebec on May 26, 1913. Their final destination was Sarnia, where they resided at 278 Bright Street. Eventually, all the Harris children immigrated to Canada. Benjamin Jr. and Alice (nee: Howe) resided in Dartmouth, Nova Scotia. Matilda, with husband William immigrated to Canada in 1919 and were residing in Point Edward. Mary Ann, who married Sidney William Savage, lived in Sarnia as did John Harris and his wife Hannah Beatrice Chappell. Emma married Albert Christopher Blay and resided in Lambton. Ellen, who married Bertram Leslie Pusey, resided in Sarnia. Benjamin and Eliza Harris spent the rest of their lives in Sarnia and both are buried in Lakeview Cemetery, Sarnia.

On March 7, 1914, twenty-three-year-old George Harris, then a labourer, married twenty-four-year-old Alice Savage at St. George's Church in Sarnia. Alice was born December 29, 1889 in Lewisham, London, England, the daughter of William and Susanah (nee Akers) Savage. George and Alice Harris, the newlywed couple, resided at 264 Cameron Street, and later 401 George Street, Sarnia. George and Alice Harris had one child together, a daughter, Renee May Harris, born January 11, 1915 in Sarnia.

Twenty-four-year-old George Harris enlisted in the Canadian Over-Seas Expeditionary Force on September 20, 1915 in Sarnia. He stood five feet seven and a quarter inches tall, had dark brown eyes and black hair, was married with a newborn at home, and was residing on Cameron Street at the time. George recorded his trade or calling as pumpman, and his next-of-kin as his wife Alice of 264 Cameron Street, Sarnia. He also recorded that he had 154 previous days military experience with the West Yorkshire Regiment. George became a member of the 70th Battalion, Canadian Expeditionary Force with the rank of Private and embarked overseas from Halifax bound for the United Kingdom on April 24, 1916 aboard the *S.S. Lapland*.

Private George Harris arrived in Liverpool, England on May 5, 1916. In late May and into mid June 1916, George had to spend twenty-one days in Moore Barracks Canadian Hospital in Shorncliffe recovering from the mumps. On July 6, 1916, he was transferred to the 39th Battalion, stationed at West Sandling. Six weeks later, on August 20, 1916, he was transferred to the Canadian Infantry, 73rd Battalion, Quebec Regiment. He arrived in Havre, France the next day.

In early September 1916, Private George Harris arrived with the 73rd Battalion at the front lines. He joined the battalion during the Battle of the Somme (July 1-November 18, 1916)--one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties. George Harris survived this battle.

In the spring of 1917, Private Harris and his battalion, along with the rest of the Canadian Corps, made their way to an area in northern France dominated by a long hill known as Vimy Ridge. Just over six months after arriving in France, on March 1, 1917, Private George Harris was killed in action in the lead up to the famous Battle of Vimy Ridge (April 9-12, 1917). George Harris was initially reported as "Missing" on March 1, and later recorded as "Now reported Killed in Action". His Circumstances of Death Register records him as; *Date of Casualty: 1-3-17. "Previously reported Missing, now Killed in Action." Location of Unit at time of Casualty: NEAR VIMY.*

George Harris left behind is wife of less than three years Alice, and their two year-old daughter Renee, who were both then residing in Lewisham, London, England. Twenty-six-year-old George Harris has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

HAZEN, Thomas Douglas (#2265916)

Thomas Douglas Hazen, the only son of John and Lydia, enlisted in July 1917 and eventually became a member of the Royal Flying Corps (RFC). Unfortunately, only three months after arriving in France, on August 19, 1918, RFC Lieutenant Thomas Hazen lost his life while fighting during Canada's final Hundred Days Campaign.

Thomas Hazen was born in Forestville, Norfolk County, Ontario, on March 13, 1896, the only son of John William (born January 1865 in Charlotteville, Norfolk) and Lydia (nee Martin, born February 1868 in Walpole Township) Hazen. John Hazen, a carpenter and later a cabinet-maker, married Lydia Martin on November 14, 1888 in Charlotteville, Norfolk County. Together, they had four children together: Thomas, and daughters Elizabeth Marsh "Bessie" (born February 24, 1889); Frances Edith "Fannie" (born November 3, 1891); and Olive Ester Louise "Lula" (born August 25, 1898).

In 1891, John, now a farmer, and Lydia were residing in Norfolk South with their only child at the time, two

year-old Elizabeth, along with John's mother Mary Hazen (born March 1829). A decade later in 1901, John, a labourer, and Lydia were still residing in Norfolk District but their household had grown to include Bessie, Fannie, Douglas, Lula and paternal widowed grandmother, Mary Hazen. At some point, the Hazen family moved to Sarnia and resided at of 123 Proctor Street and later 239 Proctor Street.

Twenty-one-year-old Thomas Hazen enlisted in the Canadian Over-Seas Expeditionary Force on July 4, 1917 in Sudbury, Ontario. He stood six feet tall, had blue eyes and fair hair, was single, and was residing in Matheson, Ontario at the time. He recorded his trade or calling as school teacher, and his next-of-kin as his mother Lydia Hazen of 123 Proctor Street, Sarnia. Thomas became a member of the Divisional Signal Corps Corps, Canadian Engineers with the rank of Sapper. He began his training at the Signal Training Depot in Ottawa.

Two and a half months later, on September 28, 1917, Thomas was discharged from the Signal Training Depot so that he could enlist in the Air Force, Royal Flying Corps (RFC). He received air training in Toronto and Texas and would become a member of RFC 56th Squadron, with the rank of Lieutenant. Thomas Hazen embarked overseas in February 1918, where he continued his training in England. Three months later, in May 1918, Lieutenant Thomas Hazen arrived in France.

Parents John William and Lydia Hazen & baby "Bessie"

Lieutenant Thomas Douglas Hazen

Just over two months later, Thomas Hazen found himself taking part in Canada's **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium). This campaign was the "beginning of the end" of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories, the greatest of the Canadian Corps, repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. It was in the lead up to the second offensive where Thomas Hazen lost his life.

Only three months after arriving in France, on August 19, 1918, RFC Lieutenant Thomas Hazen was killed in action at Bapaume, France while fighting there during Canada's Hundred Days Campaign. In late August 1918, his mother Lydia, in Sarnia received a brief telegram informing her that her only son Thomas, had been reported missing on August 19th, and that a letter would follow later. Until then, the details would not be known. In early September 1918, several weeks after Thomas' death, his father, John, received a telegram informing him that his son, **FLIGHT LIEUTENANT THOMAS DOUGLAS HAZEN, WHO HAD BEEN REPORTED MISSING SOME TIME AGO, WAS NOW OFFICIALLY REPORTED AS A PRISONER OF WAR IN GERMANY.**

It was not until 1921 that John and Lydia Hazen in Sarnia received a War Service Gratuity of \$240.00 for the loss of their only son. John and Lydia Hazen resided at 239 Proctor Street at least into 1921, and by 1926 they were living in Middlesex County.

Thomas Hazen, 22, has no known grave. He is memorialized on the Arras Memorial, Pas de Calais, France. He is also memorialized on his father's grave in Dorchester Union Cemetery in Dorchester, Ontario. The headstone reads J. WILLIAM HAZEN 1865-1926 BELOVED HUSBAND OF LYDIA MARTIN 1868-1952 THEIR SON LT. T. DOUGLAS HAZEN 1896-1918 SLEEPING IN FRANCE. On the Sarnia cenotaph, his name is inscribed as G.D. Hazen.

HICKEY, Frank J. (#402759, also A2759)

The war ended on November 11, 1918, but it was a bittersweet time for Frank Hickey. He was a newlywed but the war had taken a drastic toll on Frank's health. When he died in Windsor on September 1, 1919, Frank's cause of death was recorded as *Circumstances of Casualty: Cause: Renal Calculus Left Kidney (nephritis). Death due to Service.*

Frank Hickey was born in Clifford, Ontario, on December 24, 1882, the eldest son of James B. (born February 4, 1851) and Bridget (nee O'Donnell, born March 6, 1850) Hickey. James and Bridget Hickey were blessed with five children together: Katie A. (born August 11, 1876); Frank; Dell (born May 19, 1883); John J. (born March 13, 1886); and Wilfred (born August 1, 1888). In 1901, the Hickey family was residing in Colchester, Essex South, where James was employed as a railway section foreman. Also working on the railway were Dell, 24, as a bookkeeper, and Frank, 19, as a railway labourer/brakeman. In 1911, James, now a railway foreman, and Bridget were residing at 312 Vidal Street, Sarnia. Living with them were; a lodger, Frank Hubbard, a twenty-one-year-old store bookkeeper and; a boarder, twenty-four-year-old bookkeeper, Mary Brady.

At age thirty-two, Frank Hickey enlisted in the Canadian Over-Seas Expeditionary Force on January 27, 1915 in Sarnia. He stood five feet nine and a half inches tall, had blue eyes and fair hair, and was single at the time. He recorded his trade or calling as RR switchman, and his next-of-kin as his father James Hickey in Sarnia. He also recorded that he had prior military experience with 27th Regiment Militia. He became a member of the 34th Battalion with the rank of Private. Private Frank Hickey embarked overseas bound for the United Kingdom on June 19, 1915 aboard the *S.S. Corsican*.

On July 5, 1915, Frank Hickey was attached to the 11th Battalion, stationed at Shorncliffe. One month later, on August 3, 1915, he became a member of the 1st Canadian Infantry Battalion, and embarked with them to France. Three months later, in late November 1915, Private George Hickey was wounded in the right hand by a bullet. His hospitalization, including his recovery from septic poisoning, lasted until November 1916.

The following spring, on March 12, 1917, Frank Hickey was transferred to the 14th Canadian Reserve Battalion, and in early April 1917, was transferred to the Western Ontario Reserve Depot (WORD) stationed at Bramshott. At the end of April, he was posted to the 4th Reserve Battalion. In August 1917, he returned to WORD and was discharged back to Canada. His last posting was with the 1st Battalion, Canadian Garrison Regiment.

On August 22, 1918, in London, Ontario, Frank Hickey was discharged "as medically unfit for further general service." He had lost part of his right hand index finger prior to the war and had lost another finger in his right hand during the war (making handling a rifle difficult). He also had bunions on both feet and cramping of toes—both conditions made walking difficult. His address when discharged was 312 Vidal Street, Sarnia. At least there was some good news for Frank personally. Six days after being discharged, on August 28, 1918, thirty-six-year-old Frank Hickey married twenty-seven-year-old Sarah Jane Patterson (born in Belfast, Ireland, residing in Brooklyn, New York at time of marriage) in London, Ontario.

The Armistice that ended the Great War was signed on November 11, 1918. Approximately ten months later, on September 1, 1919, Frank Hickey lost his life in Windsor, due to nephritis, his death the result of his service. His Veterans Death Card records his death as, *Renal calculus left kidney. Death was related to service.* Frank Hickey's Circumstances of Casualty Record records him as; *Date of Casualty: 1-9-19 (midnight). Circumstances of Casualty: Cause: Renal Calculus Left Kidney (nephritis). Death due to Service. Location of Casualty: At Hotel Dieu Hospital, Windsor, Ontario.* Frank Hickey's funeral was held from the residence of his mother, Mrs. James Hickey, of 312 Vidal Street. His wife Sarah Hickey would later reside in Astoria, Long Island, New York. Frank Hickey, 37, is

buried in Our Lady of Mercy Roman Catholic Cemetery, Sarnia. In November 2019, Frank Hickey's name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

HOWARTH, John Lewis (#844551)

John Lewis Howarth was born in England and immigrated to Sarnia with his young wife, Emma. Described by a fellow soldier as "a straight-forward young man, obliging, and a good soldier," John, 29, became the last Sarnian to die before the Armistice. He was killed instantly by an enemy shell five days before the war ended officially.

John Lewis Howarth was born in Rochdale, Lancashire, England, on June 25, 1889, the son of John Sr. (born 1860) and Harriet (born 1866) Howarth. John Sr. and Harriet Howarth had four children together: Marion Macmanus (born 1888); John Jr.; Harry Macmanus (born 1890); and Clara (born 1897). In 1901, the Howarth family was residing in Rochdale, England--John Sr. was supporting his family as an overlooker in a cotton mill, while thirteen year-old John Lewis Howarth was a hairdresser's assistant. In 1911, Harriet, still recorded as married, was residing in Heywood, Lancashire with daughters Marion and Clara where all three were employed in the cotton industry. Harriet and Clara were reelers/cotton spinning; and Marion was a cotton weaver. At some point, John Jr. married his wife Emma and they immigrated to Canada. The young couple ended up in Sarnia residing at 260 Mitton Street and later 296 Queen Street.

Twenty-six-year-old John Jr. Howarth enlisted in the Canadian Over-Seas Expeditionary Force on September 14, 1915 in Sarnia, with the 70th Overseas Battalion. He stood five feet five and a half inches tall, had grey eyes and dark brown hair, and was married and residing on Queen Street at the time. He recorded his trade or calling as labourer, and his next-of-kin as his wife Emma Howarth of 296 Queen Street, Sarnia. Three months later, in early December 1915, he was discharged from the 70th Battalion in London, Ontario.

Intent on joining the service, only days after being discharged, on December 9, 1915, John Howarth completed another Attestation Paper for the Canadian Over-Seas Expeditionary Force, this time becoming a member of the 149th Battalion in Sarnia. Still married, residing on Queen Street and employed as a labourer, his eye colour was now recorded as brown and his hair colour as black. It would be approximately fifteen months before John Howarth went overseas.

He embarked overseas from Halifax bound for the United Kingdom on March 25, 1917 aboard the S.S. *Lapland*. He arrived in Liverpool, England on April 7, 1917. From the Segregation Camp at Bramshott, he was taken on strength into the 25th Reserve Battalion. Early the following year, in mid-February 1918, John was moved to the 4th Canadian Reserve Battalion and, in late-March 1918, was with the 47th Battalion at Bramshott. Only days later, on April 2, 1918, he became a member of the 43rd Battalion and arrived in France. By May 1918, John Howarth was a member of the Canadian Machine Gun Corps, 3rd Battalion.

Four months after arriving in France, John Howarth was taking part in the **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium)—the "beginning of the end" of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

Private John Howarth took part in all of the major offensives during this campaign. The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called "*the finest operation of the war*", the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line "*the turning point of the campaign*".

The third offensive in the Campaign was the Battle of Canal-du-Nord and Cambrai (September 27-October 11, 1918). Against seemingly impossible odds and a desperate fully prepared enemy, the Canadians fought for two weeks in a series of brutal engagements--successfully channelling through a narrow gap in the canal, punching through a series of fortified villages and deep interlocking trenches, and capturing Bourslon Wood and the city of Cambrai. General Arthur Currie would call it "*some of the bitterest fighting we have experienced*".

After taking Cambrai, Canadian forces advanced tentatively toward Valenciennes, the last major French city in German hands. There, the Germans stopped running – they held every advantage in this heavily-fortified city protected by a canal. In the Battle of Valenciennes (November 1-2, 1918), the Canadians were able to capture the city through two days of desperate fighting that included urban warfare.

After capturing Valenciennes in France (November 2), the Canadian forces continued advancing tentatively east towards Mons, Belgium. Using artillery and battle patrols, they pushed against the retreating German forces, occasionally running into significant opposition. With the war winding down, in their **Pursuit to Mons**, Canadians were still being killed by the score every day, the result of German ambushes, rearguard snipers, machine-gun nests, artillery fire, booby traps and aircraft strafing fire.

Seven months after arriving in France, on November 6, 1918, Private John Howarth was killed by an enemy shell while fighting during the Pursuit to Mons, part of Canada's final Hundred Days Campaign. The Canadians crossed into Belgium on November 7, 1918, toward their final goal, the German-occupied city of Mons. Only five days after he was killed, the Canadians liberated Mons, and the Armistice agreement was signed ending the Great War. Private John Howarth was the last Sarnian to be killed in action prior to the Armistice.

In late November 1918, his wife Emma Howarth received a telegram informing her that her husband, 844551, PVT. JOHN LEWIS HOWARTH, MACHINE GUN CORPS, HAS BEEN OFFICIALLY REPORTED KILLED IN ACTION ON NOVEMBER 6TH. John Howarth's Circumstances of Death Register records him as; *Date of Casualty: 6-11-18. "Killed in Action". He was killed by enemy shell fire on the morning of November 6th 1918, while taking part with his Battalion in operations in the vicinity of Onnaing. Valenciennes Communal Cemetery British Extension, France.*

In January 1919, widowed Emma Howarth received a letter from Private Allen Kirk, L Battery, Third Canadian M.G.C., France, a companion of her husband. In the letter, Private Kirk expressed his sympathy on the death of Private Howarth, who had been instantly killed. Private Kirk stated that they had received parcels since the death of the young soldier. Private Kirk was a Hamilton, Ontario man, with a wife and two children. He extended an invitation to Emma Howarth to visit their home in Hamilton when he returned, when he would give her the particulars of her husband's death. In closing his letter, Private Kirk said of the dead hero, *"He was a straight-forward young man, obliging, and a good soldier, and often spoke of his wife to me."*

Emma Howarth later returned to England and would reside in Rochdale, Lancashire. John Howarth, 29, is buried in Valenciennes (St. Roch) Communal Cemetery, Nord, France, Grave II.E.19.

HOWE, Charles (#A/2753)

English born Charles Howe immigrated to Sarnia and enlisted with the Canadian Over-Seas Expeditionary Force on January 11, 1915 in Sarnia. Less than two years later, at age 30, he was killed instantly by enemy gunfire during the second major offensive in the Battle of the Somme.

Charles Howe was born in Boston Spa, Yorkshire, England, on June 21, 1886, the eldest son of Joseph (born about 1851) and Ada (born about 1858) Howe. Yorksire born Joseph and Ada Howe had four children together: daughter Annie (born about 1883); and sons Charles, Robert (born about 1889), and Wilfred (born about 1890). In 1891, the Howe family--parents Joseph and Ada, along with their children Annie, Charles (age four), Robert and Wilfred were residing in Boston Spa, Yorkshire, England where Joseph supported his family working as a groom/domestic servant at the time. Ten years later, in 1901, the Howe family—parents Joseph and Ada, along with their three sons Charles (age fourteen), Robert and Wilfred--were residing in Walton, Yorkshire. In 1911, Joseph and Ada, along with their son Wilfred and three year-old granddaughter Doreen Howe, were residing in Boston Spa, Yorkshire. At some point, Charles Howe immigrated to Canada and resided in Sarnia.

Twenty-eight-year-old Charles Howe enlisted in the Canadian Over-Seas Expeditionary Force on January 11, 1915 in Sarnia. He stood five feet six inches tall, had blue eyes and fair hair, and was single at the time. He recorded his trade or calling as farmer, and his next-of-kin as his father Joseph in Boston Spa, Yorkshire, England. Charles initially became a Private in the 34th Battalion, Canadian Expeditionary Force. He embarked overseas bound for the United Kingdom on June 19, 1915 aboard the *S.S. Corsican*.

Once in England, Private Howe was attached to the 11th Battalion stationed in Shorncliffe. In early August 1915, he became a member of the Canadian Infantry, 1st Battalion, Western Ontario Regiment. In mid-August 1915,

Private Charles Howe arrived with the 1st Battalion in France.

Four and a half months later, in early January 1916, he was granted a nine-day leave to England. He returned to France, and by that summer, Charles Howe found himself fighting in the **Battle of the Somme** in France (July 1–November 18, 1916)—one of the most futile and bloody battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

The second major offensive of the Somme battle was the week-long **Battle of Flers-Courcelette** (September 15–22). It was here where tanks made their first appearance in the war. The Battle was a stunning success for the Canadians, but it came at a cost of over 7,200 casualties. It was during this second major offensive of the Somme battle where Private Charles Howe was killed in action.

Eight months after returning to his unit, on September 22, 1916, Private Charles Howe of the 1st Battalion, lost his life while fighting in the Battle of Flers-Courcelette. He was struck by enemy gunfire during an attack. He was initially recorded as “Previously reported Missing, Believed Killed”, and later recorded as “NOW KILLED IN ACTION”. Charles Howe’s Circumstances of Death Register records him as; *Date of Casualty: 22-9-16. “Previously reported Missing, believed Killed, now Killed in Action”. While taking part with his Battalion in an attack in the vicinity of Courcelette, he was hit by a bullet and instantly killed. Adanac Military Cemetery 6 ¼ miles North East of Albert, France.*

Charles Howe’s remains were initially buried near Courcelette, 5 ¾ miles North East of Albert, and were later exhumed and reburied in Adanac Military Cemetery. Charles Howe, 30, is buried in Adanac Military Cemetery, Miraumont, Somme, France, Grave II.B.26. On his headstone are inscribed the words, UNTIL THE DAY BREAK AND THE SHADOWS FLEE AWAY.

SOURCES: A, B, C, D, E, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z

ILIFFE, Roy Spencer (#6927)

Roy Spencer Iliffe was born in England and immigrated to Sarnia sometime after 1911. He served with the St. Clair Borderers for five weeks before enlisting with the Canadian Over-Seas Expeditionary Force on September 22, 1914. Six months later, the former bank clerk was killed in Belgium on the first day of the Second Battle of Ypres. Roy, 28, became the first person from Sarnia killed in The Great War.

Roy Iliffe was born in Nuneaton, Warwickshire, England, on July 6, 1886, the son and youngest child of George (born 1847 in Nuneaton) and Caroline Laura (nee George, born 1846 in Wales) Iliffe. Newdegate Square, Nuneaton, Warwickshire natives George Iliffe and Caroline George were married in October 1875 in Middlesex, England. Their union blessed them with six children together: Laura Marion (born August 4, 1876); Oliver George (born February 4, 1878, would serve with the Royal Army Medical Corps); Gwendolen Mary (born February 16, 1881); Kathleen Margaret (born October 23, 1882); Gladys Myfanwy (born September 4, 1884); and Roy Spencer. Roy Spencer Iliffe was baptized on October 3, 1886 in Nuneaton.

In 1891, George and Caroline Iliffe, along with their six children Laura, Oliver, Gwendolen, Kathleen, Gladys, and Roy (age four) were residing in Nuneaton, Warwickshire where George supported his family working as a pharmaceutical chemist. Also residing with the Iliffe family at that time were Harriet Davies, a 24 year old domestic housekeeper; Maria Jones, a general servant, age twenty; and boarder Valentine Barford, a 26 year old chemist’s assistant. Ten years later, in 1901, the entire Iliffe family—George and Caroline, and children Gwendolen, Kathleen, Gladys, and Roy (age fourteen), along with their seventeen year-old domestic housemaid, Annie Penfold, were residing in Nuneaton, Warwickshire.

In 1906, twenty year-old Roy suffered the death of his mother Caroline Iliffe, who passed away at the age of sixty-one in England. In 1911, widowed father George, along with his daughters Gwendolen and Gladys, and his son Roy, 24, and their general servant, twenty-one-year-old Ellen Knight, were residing in Nuneaton, Warwickshire. George Iliffe was still employed as a pharmaceutical chemist and Roy worked as a bank clerk.

Sometime after 1911, Roy Iliffe immigrated to Canada and came to reside in Sarnia. From August 12 to September 21, 1914, Roy served with the St. Clair Borderers in Sarnia. Now twenty-eight, Roy Iliffe enlisted in the Canadian Over-Seas Expeditionary Force on September 22, 1914 in Valcartier Camp, Quebec. It had been only six weeks since the United Kingdom, and Canada, declared war on Germany. Roy stood five feet five and three-quarter inches tall, had grey blue eyes and dark brown hair, and was single at the time. He recorded his trade or calling as

clerk, and his next-of-kin as his father George Iliffe of Newdegate Sq. Nuneaton Wk., England. Roy embarked overseas bound for the United Kingdom on October 3, 1914, part of the 30,000 men of the First Contingent, travelling overseas aboard thirty ocean-liners.

Arriving in England in mid-October, Roy became a member of the Canadian Infantry, 1st Battalion, Western Ontario Regiment, with the rank of Private. The First Contingent would spend that cold, wet winter training at Salisbury Plain in England. Two months after arriving in England, in December 1914, Roy received the sad news that his father George had passed away at the age of sixty-seven in Nuneaton, England.

In early February 1915, the then named First Canadian Division, including the 1st Battalion, embarked to France and the Western Front. The following month, on March 17, 1915, Roy was diagnosed with bronchitis and admitted to No. 1 Canadian Field Ambulance in Sailly. He was returned to duty nine days later. In mid-April 1915, the Canadians arrived at the Ypres salient battlefield in Belgium, an area traditionally referred to as Flanders.

It was here that the Canadians engaged in their first battle of the war, the **Second Battle of Ypres**, their baptism by fire. It was here that the Germans unleashed the first lethal chlorine gas attack in the history of warfare. In the first 48 hours at Ypres (April 22-24), there were more than 6,000 Canadian casualties--one Canadian in every three became casualties of whom more than 2,100 died and 1,410 were captured.

On April 22, 1915, Private Roy Iliffe lost his life while fighting on the first day of the Second Battle of Ypres, in Belgium. He was initially reported "killed in action between April 22 and April 30, 1915." Roy Iliffe's Circumstances of Death Register records him as; *Date of Casualty: 22/30-4-15. "Killed in Action". Location of Unit at time of Casualty: VICINITY OF ST. JULIEN. No record of burial.* His Commonwealth War Graves Register includes *No record of burial. Unofficially reported to have been buried on banks of Yser Canal 2 miles from Ypres.*

Roy Iliffe was killed approximately eight months after the start of the war, and on the first day of Canada's first major battle. According to *Sarnia Observer* reports at the time, Roy Iliffe was the first man from Sarnia to lose his life in the Great War. Roy Iliffe, 28, has no known grave but is memorialized on the Menin Gate (Ypres) Memorial, Belgium, Panel 10-26-28.

SOURCES: A, B, C, D, E, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z

IVESON, Amos (#844603)

Born in Norway, Amos Iveson, a sailor by trade, left for war two weeks after getting married. While he was overseas, his wife gave birth to their daughter, Amy Patricia "Pat", whom he would never get to meet. In the final months of the Great War, Amos was wounded in the arm by shrapnel from an enemy shell and died in action. Amos, 31, has no known grave.

Amos Iveson was born in Drobak, Norway, on February 27, 1887, the son of John and Mary (nee Swanson) Iveson of Norway. At some point, Amos immigrated to Canada and resided in Sarnia. At age twenty-nine, Amos Iveson enlisted in the Canadian Over-Seas Expeditionary Force on March 14, 1916 in Sarnia. He stood five feet seven inches tall, had brown eyes and brown hair, was single, and was residing at 178 Cameron Street in Sarnia at the time. He recorded his trade or calling as sailor, and his next-of-kin as his mother Mary Iveson in Drobak, Norway. Amos Iveson initially became a member of the 149th Battalion.

One year after enlisting, on March 12, 1917, soldier Amos Iveson, 30, married twenty-six-year-old Mary Ada (nee Donohue, of Courtright, Ontario) in Sarnia. Mary Ada Donohue, who went by her middle name, was born September 6, 1890 in Moore Township, Lambton County, the daughter of Michael James, a farmer, and Sarah Alice (nee Hardick) Donohue. Ada Donohue was baptized on September 21, 1890 at St. Joseph's Church in Corunna.

Ada came from a sprawling family. Her parents, Michael (born March 1857) and Sarah (born November 1862), married on June 29, 1881 in Sarnia and had nine children together: George Lawrence (born April 1882); Martha Jane (born February 1884); John Sylvester (born August 1887); Margaret Alice (born November 1888, died before 1891); Mary Ada; James Harvey (born May 1894); Edward Roy (born July 1897); William Thomas (born April 1899); and Helen Loretta (born April 1907).

Ada's brother, Edward, would be conscripted into service under the Military Service Act of 1917. Enlisting in early January 1918, Edward departed Halifax bound for the United Kingdom on February 5, 1918. Eight months later, on October 29, 1918, he arrived in France as a Private in the 47th Battalion. Less than two weeks later, the Armistice was signed ending the Great War. Edward Donohue returned to Canada in July 1919. His brother-in-law from Norway would not be as fortunate.

Two weeks after marrying Ada, Amos Iveson left for war. He embarked overseas from Halifax on March 25, 1917 aboard the *S.S. Lapland* and arrived in Liverpool, England on April 7, 1917. From the Segregation Camp he was taken on strength into the 25th Reserve Battalion stationed at Bramshott. Ten months later, in mid-February 1918, he was still at Bramshott, then as a member of the 4th Reserve Battalion. The following month, and just over one year after getting married, on March 28, 1918, Private Amos Iveson became a member of the Canadian Infantry, 18th Battalion, Western Ontario Regiment. He arrived in France the next day with the 18th Battalion. Two weeks later, in mid-April 1918, he arrived at the front lines.

While Amos was overseas, Ada gave birth to their baby girl, Amy Patricia (Pat) in Corunna. Amos sent letters home to Ada back in Courtright and Ada would bake cookies to send to Amos by post on the battlefield. She would press their baby daughter's hand on each one. Sadly, Pat Iveson would never know her father.

Amy Patricia Iveson 1922 (age five)

Amy "Pat" Iveson 1936 (age nineteen)

Approximately four months after arriving in France, Amos Iveson was taking part in the **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium)—the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in German unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km.

The second offensive in Canada's Hundred Days Campaign was the **2nd Battle of Arras and Breaking the DQ Line** in France (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line – a series of strong defensive trenches and fortified villages. General Sir Julian Byng called the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line “*the turning point of the campaign*”, but it came at a cost of 11,400 Canadian casualties.

Five months after arriving in France, on August 27, 1918, Private Amos Iveson was killed during an attack by an enemy shell while fighting in the 2nd Battle of Arras. He was initially reported as “Wounded and Missing after Action”, and later recorded as “Now for official purposes Presumed to have Died on or since 27-8-18.” Amos Ivesons' Circumstances of Death Register records him as; *Date of Casualty: On or since 27-8-18. “Previously reported Wounded and Missing, now for official purposes presumed to have died.” When last seen he had been wounded in the arm by shrapnel from an enemy shell, while taking part with his Company in an attack near Vis-en-Artois in front of Arras.*

In 1921, Amos' widow, Ada, and their four year-old daughter Pat, were residing in Moore Township, with Ada's parents Michael (a farmer) and Alice Donohue, along with four of her siblings: John Sylvester (age thirty-four, a farmer); Edward Roy (age twenty-three, a sailor); William Thomas (age twenty-two, a farmer); and Helen Loretta

Donohue (age fourteen, a student).

Fifteen years later, Amy “Pat” Iveson would marry. After obtaining their marriage license on August 24, 1936 in North Bay, nineteen year-old Pat Iveson married twenty-six-year-old truck driver Lawrence Albert Muxlow on September 5, 1936 in Kearney, Parry Sound, Ontario. The bride and groom were both from Courtright. Lawrence and Pat Muxlow would have eleven children together: Alice, Margaret, Charles, Robert, James, twins Ronald and Donald, Mary, Bill, twins Jerry and Lynn (sadly, both Jerry and Lynn died at birth). Their third child, and first boy, was named Charles Amos, to honour Pat’s father.

Ada Iveson never remarried. She raised her daughter, Pat, on the family’s dairy farm in Courtright, and worked alongside her brother John Donohue. They raised cattle and chickens, and sold milk, cream and eggs. Ada kept the letters that Amos had mailed home to her while he was overseas. Her grandchildren remember the letters sitting on their grandmother’s dresser. The granddaughters used to peek at them as kids and have a wee giggle, as they always started with, “To my Dearest Ada”.

Amy Pat (nee Iveson) Muxlow passed away at the age of forty-two on December 27, 1959 in Sarnia. She is buried in St. Joseph’s Catholic Cemetery in Corunna. Her mother, Ada Iveson, passed away at the age of eighty in February 1970. After her death, no one knows what happened to the letters that Amos had mailed to her. Ada is buried alongside her brother John Donohue in St. Joseph’s Catholic Cemetery in Corunna.

Thirty-one-year-old Amos Iveson has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

NOTE: The spelling of Amo’s surname “Iveson” used in this Project is based on Amos Iveson’s own signature on his Marriage Certificate and in his WWI Personnel File (although the odd time, he did sign as Iverson). Even in his Personnel File, most documents have his surname spelled “Iveson”, and a few as “Iverson”. On the CWGC and CVWM websites, and on the Vimy Memorial, his name is recorded as Amos Iveson. On the Sarnia cenotaph, his name is inscribed as A. Ireson.

JANES, G.J. – No information found in searched records links this name to Sarnia.

JOHNSON, Frederick (#124029)

On April 9, 1917, Frederick Johnson, 29, was killed in action on the first day of the Battle of Vimy Ridge, ten months after arriving in France. If his mother, Delia, found any consolation in her son’s death, it would have, perhaps, been from the letter that arrived in Sarnia the month after Frederick’s death. Battalion Chaplain, Captain C. Stuart consoled the grieving mother by telling Delia that Frederick “was always so cheerful in his work, and in his whole life as a soldier that he won a feeling of respect and esteem with both officers and men. His loss is one which we all feel, and yet how better can a man die than in defence of a cause which defends his home, his country and his God.”

Frederick Johnson was born in London, Ontario, on September 24, 1888, the son of James and Amelia Julia ‘Delia’ (nee Cahill) Johnson. James Johnson, born in September 1868 in Ontario married Amelia Julia Cahill, born June 14, 1862 in Portsmouth, England, on June 29, 1887. Their union blessed them with four children: Frank Lawrence (born May 17, 1887 in Middlesex County); Frederick; Charlotte May (born December 15, 1890 in London, Ontario); and Edward Norman (born January 27, 1894 in Petrolia). Frederick was baptized at St. Peter’s Cathedral in London, Ontario on November 4, 1888.

Twenty-seven-year-old Frederick Johnson enlisted in the Canadian Over-Seas Expeditionary Force on October 9, 1915 in Sarnia. He stood five feet nine inches tall, had blue eyes and brown hair, was single, and was residing on Rose Street in Sarnia at the time. He recorded his trade or calling as labourer, and his next-of-kin as his father James Johnson of Piccadilly Street, London, Ontario. His next-of-kin was later changed to his mother Mrs. James Johnston of 278 Rose Street, Sarnia. Frederick initially became a member of “A” Company of the 70th Battalion, Canadian Expeditionary Force. He embarked overseas bound for the United Kingdom on April 26, 1916 aboard the *S.S. Lapland*.

Private Frederick Johnson arrived in England on May 5, 1916. Six weeks later, on June 28, 1916, he was transferred to the Canadian Infantry, 24th Battalion, Quebec Regiment at Shorncliffe. The next day, he arrived in France. Two weeks later, on July 14, 1916, Frederick Johnson arrived at the front lines with the 24th Battalion.

Five months later, in December 1916, Frederick mailed a letter from France to his brother Frank, at 516 Christina Street, Sarnia:

Well, I suppose you heard all about the Canadians down on the Somme. We had some hard fighting and we beat the Huns at every turn and I came out with the best of luck. We were a hard looking lot of fellows. We were mud from head to foot, but we don't mind that as long as we are beating the Huns and taking his trenches. They won't stand and fight with us for they don't like the bayonet. I suppose old Sarnia is just the same old place.

Your loving brother, Pte. Fred Johnson

In the spring of 1917, Private Frederick Johnson and his battalion along with the rest of the Canadian Corps, made their way to an area in northern France dominated by a long hill known as Vimy Ridge. The **Battle of Vimy Ridge** (April 9-12, 1917) was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The first day of the battle, April 9, 1917, was the single bloodiest day of the entire war for the Canadian Corps and the bloodiest in all of Canadian military history. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps, and significant victory for Canada, later referred to as "the birth of a nation". Of the 97,000 Canadians who fought at Vimy Ridge, approximately 7,004 were wounded and 3,598 were killed in four days of battle.

Ten months after arriving in France, on April 9, 1917, Private Frederick Johnson was killed in action during fighting on the first day of the Battle of Vimy Ridge, France. Another Sarnian, David Kerr of the Royal Canadian Regiment, also lost his life in the same battle on the same day (David Kerr is included in this Project on page 311).

Frederick Johnson's Circumstances of Death Register (which has his surname misspelled as Johnston) records him as; *Date of Casualty: 9-4-17. "Killed in Action". Location of Unit at time of Casualty: AT VIMY RIDGE.* It was in the May 11, 1917 edition of the *Sarnia Weekly Observer* that Sarnians learned the news that, *Private Fred Johnson of the 70th Battalion, transferred to the 24th Mounted Rifles, was killed in action April 9, 1917 at the Battle of Vimy Ridge, France.*

In late May 1917, Frederick's mother Amelia, received a letter in Sarnia from the 24th Battalion Chaplain, Captain C. Stuart. The following is a portion of that letter:

Dear Madam,

I am sorry to have been so long in writing to express my sympathy with you in the loss of your son, Pte. F. Johnson, No. 124029, of this battalion, who was killed in action on April 9th.... Your son as you know, was killed in the advance at Vimy Ridge and was buried there in a forward cemetery on the Ridge itself, side by side with his comrades. One can only express to you our deep sympathy and appreciation of the life and the noble example of your son. He was always so cheerful in his work and in his whole life as a soldier that he won a feeling of respect and esteem with both officers and men. His loss is one which we all feel, and yet how better can a man die than in defence of a cause which defends his home, his country and his God.

I always feel so strongly that these lads are continually in the presence of God, that when the end comes, he goes to meet them with hands outstretched, saying, "Well done, thou good and faithful servant, enter thou into the joy of the Lord." For it is a good faithful service they have rendered, the same sort of service which Jesus Christ himself offered in His life, and death on the Cross. But one knows the sadness his loss must bring into your heart, and one can only pray that these may be also a pride and solace in the thought that he has lived and died as a Christian soldier... May God send you His Holy Spirit to comfort you in these sad days.

Yours faithfully, C. Stuart, Chaplain, 24th Can. Bn.

Twenty-nine-year-old Frederick Johnson has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

NOTE: The spelling of Frederick's surname as "Johnson" (vs. Johnston) used in this Project is based on the spelling found most often in his genealogical records and the documents in his WWI Personnel File. In his file, most of the time, Frederick signed his own surname without the "t", but a few times he included it. On the CWGC and CVWM websites, his name is recorded as Frederick Johnson. On the Sarnia cenotaph, his name is inscribed as F. Johnston.

Frederick Johnson's younger brother **Edward Norman Johnson** also served in the Great War. On March 30, 1916, at the age of twenty-two, and while residing at 273 Shamrock Street, Sarnia and recording his occupation as labourer, Edward enlisted in Sarnia with the Lambton 149th Battalion, CEF (he enlisted five months after his older brother Frederick had enlisted). Almost one year later, on March 2, 1917, Edward Johnson married Elizabeth Caroline Carter in Point Edward. Less than four weeks later, on March 28, 1917, Private Edward Johnson embarked

overseas from Halifax bound for England. Less than two weeks later, his older brother Frederick died in action in France.

Exactly one year after he had departed Canada, on March 28, 1918, Private Edward Johnson arrived in France as part of the 47th Battalion, Canadian Infantry. Just over four months later, Edward became part of Canada's Hundred Days Campaign (August 8 – November 11, 1918 in France and Belgium). This campaign was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in German unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km. On August 8, 1918, on the first day of the Amiens offensive, Private Edward Johnson was wounded slightly, yet remained on duty. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line – a series of strong defensive trenches and fortified villages. General Sir Julian Byng called the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line “*the turning point of the campaign*”, but it came at a cost of 11,400 Canadian casualties.

On the last day of this second offensive, on September 3, 1918, Edward Johnson was wounded in action again, this time by shell fragments and/or shrapnel that caused “multiple gun shot wounds” in both feet, his thigh and his left arm. Initially Edward was treated at No. 33 Casualty Clearing Station, but the damage to his “shattered” left arm was so bad that it had to be amputated two days later at No. 2 Stationary Hospital in Abbeville. Edward Johnson was returned to England where he underwent a number of operations—including to remove chunks of metal and pieces of bone and to have his arm re-amputated on October 21, 1918.

Edward Norman Johnson survived the war, was invalided to Canada on September 11, 1919, and was discharged as medically unfit for service in late October 1920 in Toronto. Edward and his wife Elizabeth would reside in London, Ontario for a number of years after the war before returning to Sarnia and residing at 124 Brock Street.

JOHNSTON, George Charles (#2006885)

When he enlisted with the Canadian Over-Seas Expeditionary Force in December 1917, George Johnston, 36, left behind his wife of two years in Detroit and his parents in Sarnia. He arrived in France in early July 1918 as a Sapper with the Canadian Engineers, 5th Battalion. During the Battle of Canal-du-Nord and Cambrai a gunshot wound in his thigh proved fatal and George succumbed to his injury on the same day. The Great War officially ended a month after the 37 year-old Sarnian was buried in Pas de Calais, France.

George Johnston was born in London, Ontario, on March 25, 1881, the son of William Harry and Mary Catharine (nee Walker) Johnston, of 182 Napier Street, Sarnia. George had at least one sibling, William Harry Jr., born April 19, 1891 in Sarnia. In Sarnia on September 28, 1915, George Johnston, 34, a machinist at the time, married Isabella Morgan, a Montreal born widow who was residing in Detroit, Michigan at the time. Isabella, 39, was the daughter of Stephen Mallette and Isabelle (nee Chapleau) Morgan.

When George Johnston, 36, enlisted in the Canadian Over-Seas Expeditionary Force in Windsor two years later on December 28, 1917, the couple were residing on 12th Street in Detroit, Michigan. He stood five feet six and a quarter inches tall, had grey eyes and dark hair, and recorded his trade or calling as woodworker and carpenter, and his next-of-kin as his wife Isabella Johnston of 878 12th Street, Detroit, Michigan. George became a member of the 7th Field Company, Canadian Engineers Training Depot (CETD). He embarked overseas bound for the United Kingdom on February 28, 1918 aboard the *S.S. Metagama*.

George disembarked in England on March 11, 1918. By May 21, he was stationed at Seaford where he became a member of the Canadian Engineer Railway Battalion (CERB). One month later, on June 23, 1918, he was posted to the Canadian Engineers Reinforcement Pool (CERP). The following day, George Johnston arrived in France. One week later, on July 2, 1918, Johnston became a member of the Canadian Engineers, 5th Battalion, with the rank of Sapper.

George Johnston soon found himself part of **Canada's Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium). This campaign was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line “*the turning point of the campaign*”.

The third offensive in Canada's Hundred Days Campaign was the **Battle of Canal-du-Nord and Cambrai** in France (September 27-October 11, 1918). Against seemingly impossible odds and a desperate fully prepared enemy, the Canadians fought for two weeks in a series of brutal engagements. They successfully channel through a narrow gap in the canal, punched through a series of fortified villages and deep interlocking trenches, and captured Boursin Wood and the city of Cambrai. General Arthur Currie would call it “*some of the bitterest fighting we have experienced*” and it came at a cost of 14,000 Canadian casualties.

Just over three months after arriving in France, on October 6, 1918, Sapper George Johnston was wounded in action by enemy gunfire while fighting in the Battle of Canal-du-Nord and Cambrai. He was taken to No. 22 Casualty Clearing Station with a gunshot wound in the right thigh, recorded as “wounds, GSW R thigh, dangerously ill”. George died that day as a result of his wounds. His Circumstances of Death register records him as; *Date of Casualty: 6-10-18. “Died of Wounds.” At No. 22 Casualty Clearing Station. Bucquoy Road British Cemetery, Ficheux, South of Arras, France.*

In mid-October 1918, George's brother Harry Johnston at the Wanless Grocery store in Sarnia, received a telegram informing him of his brother George's circumstances of death—that George had lost his life at the 22nd Clearing Station, as a result of wounds that he received, a gunshot wound in the thigh. Approximately one month after George's death, the Armistice was signed ending the Great War.

George Johnston, 37, is buried in Bucquoy Road Cemetery, Pas de Calais, France. Grave IV.E.2. In 1921, George's parents were still living at 182 Napier Street in Sarnia. Harry, 71, was still working as a watchman and Catharine, 72, was a housewife. Isabella Johnston, George's widow, later remarried and resided in Torrance, California as Isabella Fulton.

JONES, George Andrew (#334403)

Sarnian George Andrew Jones wanted to serve his country, but one impediment prevented him from doing so until the summer of 1916. His family was of the “African” or “Negro” race as recorded on Canada census records, or the “Black race”, as recorded on George's Attestation papers. It was not until the summer of 1916, when recruiting sources had largely dried up, that army officials allowed minorities to serve. On October 8, 1918, George lost his life as a result of the wounds he received in the brutal Battle of Canal-du-Nord and Cambrai. Just over one month after George died, the Great War ended.

George Jones was born in Sarnia on December 12, 1898, the youngest child of William Andrew and Georgina Ella (nee Ford) Jones. William Jones and Georgina Ford were married on May 24, 1886 in Port Huron, Michigan. Although they were both born in Sarnia—William (born January 7, 1864) and Georgina (born September 8, 1862)—their parents and George's grandparents were born in the United States.

William and Georgina Jones were both residing in Sarnia when they married, and William was employed as a painter. They lived at 167 Cameron Street and together had five children: William Andrew Jr. (born April 14, 1887); Ellen Elizabeth (born October 11, 1891); Carrie (born December 22, 1893); John Austin (born December 24, 1895) and George Andrew. Tragedy struck the Jones family on September 19, 1894, when first born William Andrew Jr. passed away as a result of appendicitis in Sarnia at the age of seven. The Jones family was of the “African” or “Negro” race as recorded on Canada Census records, or the “Black race”, as recorded on George Jones' Attestation papers.

At the start of the war, racist beliefs prevalent in the military (and reflecting those of the larger society) resulted in visible minorities such as Blacks, Ukrainians and Japanese, being excluded from the First Contingent. It was not until the summer of 1916, when recruiting sources had largely dried up, that army officials allowed minorities to serve.^{4F}

George's older brother **John Austin Jones** also served in the war and enlisted approximately fifteen months before George did. John Austin Jones, 21, enlisted in the Canadian Over-Seas Expeditionary Force on January 25, 1916 in Sarnia. He stood five feet eleven and a half inches tall, had brown eyes and black hair, was single, and residing at home with his parents on Cameron Street at the time. He recorded his trade or calling as painter, and his next-of-kin as his father William Andrew Jones of 167 Cameron Street, Sarnia. John Jones became a member of the 149th Battalion, CEF. Just over six months after enlisting, on August 3, 1916, John Jones married twenty-two-year-old Elizabeth Ethel Hunt in Sarnia. Elizabeth Hunt was born in London, England, the daughter of Harry and Louisa (nee Thurlow) Hunt. Elizabeth Hunt had immigrated to Canada in 1913.

Private John Austin Jones embarked overseas on March 28, 1917 aboard the *SS Lapland* and arrived in England on April 7, 1917 (his brother George would enlist one month later). Once in the U.K., Private John Jones became a member of the 25th Reserve Battalion (Western Ontario Regiment) at Bramshott and was later transferred to the 2nd Canadian Pioneers. Seven months after arriving in England, John arrived in France on November 27, 1917, as a Sapper with the Canadian Engineers.

On June 22, 1918, he was transferred to the 6th Battalion, Canadian Engineers, and the next day arrived with that unit at the front lines. John Jones soon found himself part of Canada's Hundred Days Campaign (August 8 – November 11, 1918 in France and Belgium). His brother George Jones also found himself part of Canada's Hundred Days Campaign.

Sapper John Jones survived this final campaign and the war. Six months after the war's end, he was discharged on demobilization on May 29, 1919 in Ottawa. He returned to Sarnia and resumed his pre-war life. He and his wife Elizabeth lived at 179 Cameron Street, just down the street from John's parents, and John's job as a painter supported his family. In 1920, Elizabeth gave birth to their daughter, Marion. On November 5, 1967, World War I veteran John Austin Jones passed away at the age of seventy-two. He is buried in Lakeview Cemetery in Sarnia.

Eighteen year-old **George Andrew Jones** enlisted in the Canadian Over-Seas Expeditionary Force on May 14, 1917, in Sarnia. He stood five feet seven inches tall, had brown eyes and black hair, was single, and was residing at home with his parents on Cameron Street at the time. He recorded his trade or calling as painter, and his next-of-kin as his father William Andrew Jones of 167 Cameron Street, Sarnia. George Jones became a member of the 63rd Depot Battery, Canadian Field Artillery with the rank of Gunner. Seven months after enlisting, on December 14, 1917, George Jones embarked overseas bound for the United Kingdom aboard the *S.S. Missanabie*.

Gunner George Jones arrived in England on December 19, 1917 and was in Glasgow on December 31, 1917. He became a member of the Reserve Battalion, Canadian Field Artillery stationed at Witley. Three months later, at the end of March 1918, George arrived in France joining the Canadian Corps Reinforcement Camp (CCRC). Days later, on April 4, 1918, he was transferred from the Artillery Pool, and became a member of the Canadian Field Artillery, 4th Light Trench Mortar Battery.

Four months after arriving in France, George Jones found himself taking part in **Canada's Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium). This campaign was the "beginning of the end" of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called "*the finest operation of the war*", the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line "*the turning point of the campaign*".

The third offensive in Canada's Hundred Days Campaign was the **Battle of Canal-du-Nord and Cambrai** in France (September 27-October 11, 1918). Against seemingly impossible odds and a desperate fully prepared enemy, the Canadians fought for two weeks in a series of brutal engagements. They successfully channel through a narrow gap in the canal, punched through a series of fortified villages and deep interlocking trenches, and captured Bourlon Wood and the city of Cambrai. General Arthur Currie would call it "*some of the bitterest fighting we have experienced*" and it came at a cost of 14,000 Canadian casualties.

Six months after arriving in France, on September 27, 1918, Private George Jones was wounded in action by enemy artillery fire while fighting during Canada's final Hundred Days Campaign. He was admitted to No. 33 Casualty Clearing Station with "shell wound right buttock". A week later, on October 5, he was recorded as "dangerously wounded". On October 7, he was at No. 20 General Hospital, Dannes, Camiers recorded as "now reported dangerously ill". On October 8, 1918, George Jones lost his life as a result of the wounds received. Just over one month after George Jones died, the Great War ended.

In mid-October 1918, William and Georgina Jones on Cameron Street received a telegram from England and Ottawa with news of their youngest son informing them that; 334403, PVT. GEORGE ANDREW JONES, ARTILLERY, PREVIOUSLY REPORTED DANGEROUSLY WOUNDED, NOW REPORTED DANGEROUSLY ILL AT 20TH GENERAL HOSPITAL, DANNES, CAMIERES.

Approximately one month after George Jones death, the Armistice was signed ending the Great War. George Jones' Circumstances of Death Register records him as; *Date of Casualty: 8-10-18. "Died of Wounds." (Shrapnel wound, right buttock). At No. 29 General Hospital, Camiers. Etaples Military Cemetery, France.* The following is the October 17, 1918 *Sarnia Observer* report of his death:

Local Man Dies of Wounds

The citizens of the city will regret to learn of the death of another of Sarnia's war heroes in the person of Private George Andrew Jones, of the artillery, a message arriving to that effect. The young man was a son of Mr. and Mrs. W.A. Jones, 167 Cameron Street, and was known as a quiet, unassuming young fellow and well liked by all who knew him. He went overseas a couple of years ago with an artillery draft of the 63rd battery. He was in his 20th year, and is survived by his parents, two sisters, and a brother Private Austin Jones, now with the Canadian forces in France.

William Andrew and Georgina Ella Jones lived at 167 Cameron Street in Sarnia their entire lives. Georgina passed away on June 17, 1929 in Sarnia at the age of sixty-seven. She was buried in Lakeview Cemetery, Sarnia. George Jones, 19, is buried in Etaples Military Cemetery, Pas de Calais, France, Grave LXVI.H.17. On the Sarnia cenotaph, his name is inscribed as A. Jones.

KERR, David (#402653)

Scottish born David Kerr wanted to serve his country despite his age, 35, and his situation—a married father of four children under the age of eleven. Four months after arriving in France, Sergeant David Kerr was killed on the first day of the Battle of Vimy Ridge. The popular Sarnian is buried in La Chaudiere Military Cemetery, Vimy, Pas de Calais, France. On his headstone are inscribed the words, ASLEEP IN JESUS BLESSED SLEEP FROM WHICH NONE EVER WAKE TO WEEP. WIFE AND FAMILY.

David Kerr was born in Newton Grange, Midlothian County, Scotland, on September 5, 1881, the eldest child of Alexander and Helen 'Ellen' (nee Hare) Kerr, of Scotland. Alexander Kerr, born April 23, 1856, Scotland, and Ellen Hare, born March 16, 1858, were married on November 21, 1879 in Newbattle Manse, Scotland. They had four children together: sons David and Thomas Harwell (born August 13, 1883); and daughters Euphemia Hare (born September 3, 1885) and Jane (Jennie) Meek (born January 24, 1889).

In 1901, at age nineteen, David Kerr was residing in Musselburgh, Scotland and was working as a coal miner, like his father. All of their lives were to change dramatically in the next few years. The following year, on April 13, 1902, David's mother Ellen, passed away as a result of lung and heart problems at the age of forty-four. In June 1903, Alexander remarried, this time to Ellen Reid (born June 29, 1870) in Scotland. Shortly after, the Kerr family decided to immigrate to Canada. On July 11, 1903, David and his family left Glasgow, Scotland and arrived at the port of Montreal aboard the *Corinthian*. On October 25, 1905 in Halifax, Ellen gave birth to a son, Alexander Jr., a half-sibling for David.

Two years later, on August 18, 1905, twenty-three-year-old David Kerr, a labourer at the time, married twenty year-old Agnes Druscilla (nee Siddall) in Sarnia. Agnes Siddall was born on June 26, 1885 in Sarnia Township, the youngest daughter of Robert John Siddall, a farmer in Sarnia Township, and Mary Ann (nee Laforge) Siddall, of Wellington Street, Sarnia.

Four years earlier, in 1901, sixteen year-old Agnes Siddall was living with the Hanna family in Sarnia and was employed as a servant. The Hanna family included father William John Hanna and his second wife Maude (nee MacAdams) Hanna, along with their three children: William Neil Hanna, Margaret and Katherine Hanna. Agnes Siddall's employer, William John "Jack" Hanna, was an influential and well-respected member of the community--he was a lawyer, and member of the Ontario legislature. One of the Hanna children, William Neil Hanna, served in the Great War, and would lose his life only days after the Armistice. William Neil Hanna's story is included in this Project.

David and Agnes Kerr resided first at 310 Cromwell Street and later at 136 N. Brock St. in Sarnia. They had four children together: Alexander Hugh (born June 14, 1906); twin girls Florence Mae and Helen Fidelis (born May 21, 1908); and Angus Stewart (born July 28, 1911). David was a well-known singer in Sarnia who sang on special occasions in connection with the different churches of the city. He was, for a few years, connected with the Prudential Life Insurance Company (as an agent) and was a member of the old Concert Band.

Thirty-three-year-old David Kerr enlisted in the Canadian Over-Seas Expeditionary Force on January 15, 1915 in Sarnia. He stood five feet seven and a half inches tall, had blue eyes and fair hair, and was married with four young children at the time. He recorded his trade or calling as labourer, and his next-of-kin as his wife Agnes Kerr of 136 Brock Street, Sarnia. He also recorded that he had prior militia experience with the 27th Regiment. He was initially a Private with the 34th Battalion, Canadian Expeditionary Force. Five months later, in June 1915, he was promoted to Sergeant, receiving a raise in pay from \$20 to \$25 a month. On August 17, 1915, David Kerr embarked overseas bound for the United Kingdom aboard the *S.S. Hesperian*.

Sergeant David Kerr

Arriving at Devonport, England on August 26, 1915, David Kerr became a member of the 9th Reserve Battalion, "B" Company, stationed at East Sandling. From October 18 to November 12, 1915, he attended a military school in Shorncliffe where he earned a certificate in a bomb-throwing course. In mid-December of 1915, the *Sarnia Observer* printed a letter that David Kerr had mailed to them from East Sandling Camp, Shorncliffe, England. Following is a portion of that letter:

Dear Mr. Editor

Allow me a small space in your valuable paper to let you know how the Sarnia boys are faring in England. We left Canada on August 17, and had a very good trip overseas until we came into the danger zone, then we had to sleep on deck all night, so as to be ready for the life boats in case the German subs were near, but luckily for us they let us pass, but the Hesperian was doomed on her return trip to Canada. She landed us at Devonport on the 26th of

August, and was sunk on Sept. 4th, so when we heard about the mishap to her we said: "God bless the Germans", but we thought of other words which would look bad on paper.

Now I'll start with our camp life here. The first is the weather, which is very bad. It rains every other day, and the mud is supreme. Salisbury was no worse than Shorncliffe. The mud is ankle deep, but the boys shut their eyes and plough, which is the only way to do, as we have come too far to kick now.... Now for our training, which finished Saturday, December 4, after 14 weeks pretty hard drill. We get up at 6 a.m., fall in at 7:30, physical drill till 8, breakfast 8:15, fall in at 9, inspection by company officer, then we have an inspection by the colonel, which takes about an hour, and we have to stand at attention all the time; but thank God, the Brigadier put a stop to that. You had to shave, clean your buttons and shoes, and if he couldn't see his face in your buttons it was Orderly room at 4 p.m. The boys call him some funny names. We have three route marches a week, from ten to fifteen miles, and full marching at that.... One thing we miss here is the brown shoes which were issued to us in Canada. We have the black ones here, with heel plates and hob nails, but they are good shoes for marching with, though when we go up town you would think it was a team of Clydes we make so much noise on the pavement....

We are attached to the 9th Reserve Battalion and they come from Edmonton, but the most of them have either been wounded, killed or taken prisoners, and we are filling up the gaps. They are coming and going all the time. I will give you an instance, it is hard to believe but is nevertheless true. I shook hands with a Sergeant going out on draft on Thursday morning and I was in Folkestone on Saturday evening watching the hospital ship come in, and the same Sergeant was the second man to come ashore, wounded, shot through the left shoulder. We are only six hours journey from the trenches. We can hear the big guns bombarding the Belgium coast, so you see it doesn't take long to get put out of commission over there. All the boys here are ready for the fray. I don't think it will be long till they get their wish, as the quartermaster sergeant has everything ready for them. I don't think I will get away with them, as I am instructing in bomb throwing. I was at school for a month for instruction and I got through with a first class certificate. I go to London next week to finish my course in explosives.

The scenery around here is lovely. We have lots of old land marks, such as the oldest house in Kent, and that makes the route marches more agreeable to the boys, and they enjoy them. The people have always a cheery word for the Canuck's wherever we go, and the roads are good, which makes it better for us.

Now about the food; the most important factor of all. Well, it is wholesome and we get plenty of it.... The men have porridge, bacon and tea, bread and butter for breakfast and it is changed from time to time. For dinner they have roast, spuds, stew, at times it is always changed. Supper, tea and different kinds of fruit. I pay six cents for extras in the sergeant's mess, and we feed good. I have to see the rations we are getting, and I know I never felt better in my life.

Well, Mr. Editor, all the Sarnia boys join me in wishing you and your staff and readers a Merry Christmas and a Happy New Year, and tell the young men of Sarnia that they are needed here to do their bit. We don't want Sarnia the Imperial City to have the name of having "Slackers" in its boundaries. From the boys of the Second draft of the old 34th Battalion, C.E.F. I remain one of the boys,

Sergt. D. Kerr

In mid-March 1916, David Kerr spent five days infirmed at Moore Barracks Hospital, Shorncliffe, due to bronchitis. Fifteen months after arriving in England, on November 27, 1916, he was transferred from the 9th Reserve Battalion to the Royal Canadian Regiment (RCR) with the rank of Sergeant. Sergeant David Kerr arrived in France with the RCRs the next day. A little over two months later, in early February 1917, David Kerr spent two weeks infirmed at No. 8 Canadian Field Hospital and Corps Rest Station due to influenza. After his release from hospital, David rejoined his unit in an area in northern France dominated by a long hill known as Vimy Ridge.

The **Battle of Vimy Ridge** (April 9-12, 1917) was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The first day of the battle, April 9, 1917, was the single bloodiest day of the entire war for the Canadian Corps and the bloodiest in all of Canadian military history. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps, and significant victory for Canada, later referred to as "the birth of a nation". Of the 97,000 Canadians who fought at Vimy Ridge, approximately 7,004 were wounded and 3,598 were killed in four days of battle.

Just over four months after arriving in France, on April 9, 1917, Sergeant David Kerr of the RCR, lost his life while fighting on the first day of the Battle of Vimy Ridge in France. His Circumstances of Death register records him as *Date of Casualty: 9-4-17. KILLED IN ACTION. Location of Unit at time of Casualty: ATTACK AT VIMY*

RIDGE. La Chaudiere British Cemetery, 3 miles South South West of Lens, France. Remarks: Exhumed from 1 ½ miles South of Givenchy-en-Gohelle, 4 ¾ miles South South West of Lens. Sheet 44a.S.27.b.7.6.

Sarnians learned of David Kerr's death on the front page of the April 27, 1917 *Sarnia Weekly Observer*, with the first line; *Word was received here Tuesday of the death in action of Sergt. David Kerr, a well known and popular young Sarnian.* He would receive the citation: The 1914-15 Star. Another Sarnian, Frederick Johnson of the 24th Infantry Battalion, also lost his life in the same battle on the same day (Frederick Johnson is also included in this Project on page 306).

David Kerr left behind his wife Agnes Kerr and their four small children (ages six through eleven), who were residing at Market Square in Windsor, Ontario at the time of his death. The Kerr family later resided at Field Avenue, Detroit, Michigan. David Kerr, 35, is buried in La Chaudiere Military Cemetery, Vimy, Pas de Calais, France, Grave IX.B.12. On his headstone are inscribed the words, ASLEEP IN JESUS BLESSED SLEEP FROM WHICH NONE EVER WAKE TO WEEP. WIFE AND FAMILY.

KETCH, Albert Harold Willsea (#405569)

Harold Ketch had responsibility thrust upon him in his teens and he was up to the challenge. After his father died, Harold quit school and, at age 15, assumed his father's job—running the printing office of the *Alvinston Free Press*. He also came from a military family and honoured the tradition of serving his country. At age 23, the remarkable and decorated Harold Ketch died on August 15, 1917 while fighting on the first day of the Attack on Hill 70. He has no known grave.

Albert Harold Ketch was born in Oil Springs, Ontario, on July 16, 1894, the only son of Albert Edward and Helena Pamela (nee Willsie) Ketch. Albert Edward Ketch was born on December 26, 1870 in Manchester, England. Fifteen years later, in 1885, he arrived in Toronto and entered the printing establishment of Warwick Brothers. He remained in Toronto for three years and then went to London, Ontario where he attended a military school for three years, and then a cavalry school in Quebec for three months. He returned to London and worked in different offices until 1893 when he came to Alvinston, Ontario. Eight years after immigrating to Canada, on October 7, 1893, Albert Edward Ketch married Helena Pamela Willsie (born April 1869 in Avon, Ontario) in Alvinston. Albert Edward Ketch purchased the *Oil Springs Chronicle*, and ran it for six years. After selling the paper in August 1899, he purchased the *Alvinston Free Press*. In the meantime, the Ketch family was expanding with the birth of three children: eldest son Albert Harold; and daughters Lylla Marilla (born January 1896), and Clara Hazel (born October 1897, later resided in London, Ontario, employed at the London Free Press).

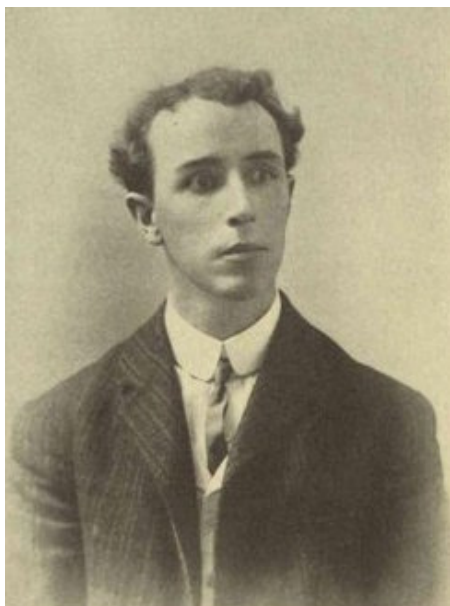

Albert "Harold" Ketch came from a military family. His father Albert Sr. had first-class certificates from Military College and from London; and his uncle, Robert Ketch, was an officer who was killed in the trenches of France in March 1915. A cousin, Henry Ketch, was also killed at the Dardanelles--there were only 35 soldiers left out of 1,000 who were trying to land at that time.

Harold had a rather tumultuous time in his teens due to events beyond his control. As a young boy, he was an enthusiast in baseball, football and hockey but tragedy struck Harold when he was fifteen years old--his thirty-nine-year-old father, Albert, passed away on November 3, 1909 in Alvinston, due to coronary disease (he is buried in Alvinston Cemetery). Less than two years later, on July 12, 1911, forty-two-year-old widow Helena Ketch remarried in Sarnia, to fifty-two-year-old widower James N. Dodd. Both were residing in Alvinston at the time and later moved to 108 Durand Street, Sarnia.

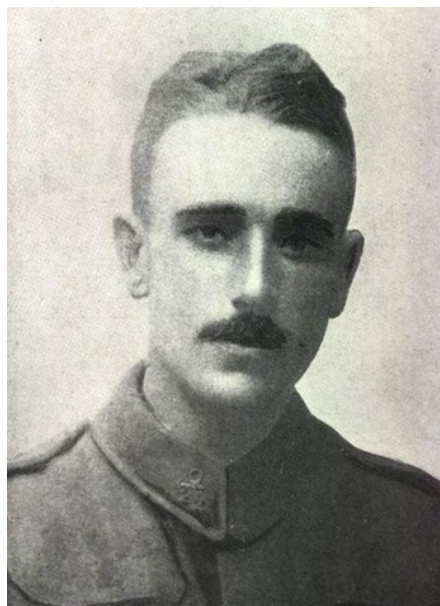

After his father had passed away, Harold left high school at the age of fifteen. He took charge of the printing office of the *Alvinston Free Press* and devoted himself to it full time. Realizing the importance of an education, he returned to school two years later and obtained his second-class certificate. He had experience in several well-equipped offices, such as *The Montreal Herald* and the *Simcoe Reformer*. He then returned to once again take charge of the *Alvinston Free Press*. Albert Ketch was a member of the St. Clair Press Association and the Canadian Press Association.

Twenty year-old Harold Ketch enlisted in the Canadian Over-Seas Expeditionary Force, 48th Highlanders, in Toronto on May 10, 1915. He stood six feet and three quarter inches tall, was single, and recorded his trade or calling as printer, and his next-of-kin as his mother, Mrs. J.N. Dodd of 108 Durand Street, Sarnia. He also recorded his birth year as 1893 (not 1894, the correct date) making himself one year older than he actually was. Harold Ketch

completed a course as a signaler in Toronto, and was transferred to the 35th Battalion, "D" Company, Canadian Expeditionary Force. He embarked overseas bound for the United Kingdom on October 16, 1915 aboard the S.S. *Metagama*.

Albert Edward Ketch (father of A.H.W. Ketch)

Lance Corporal Albert Harold Willsea Ketch

Just over four months after arriving in the U.K., in early March 1916, Harold Ketch became a member of the 24th Battalion, Canadian Infantry, Signal Section. At that time, Harold wrote a letter home to his mother Helena Dodd. Following is the letter as it was printed in an April 1916 edition of the *Sarnia Observer*, under the headline, "*HAROLD KETCH IS A POPULAR SOLDIER*":

My dear mother,

I have just finished telling Hazel (his sister) some news that I consider the best of news, and that is by the time you receive this letter, I will likely be somewhere in France. Two others and I volunteered to reinforce the signal section of the 24th Battalion, which is at the front. We volunteered this morning when Lieut. Woods called for volunteers. We were lucky to be in the front rank and in a jiffy we were out in front. We have had medical examination, and our rifles have been inspected, our bayonets sharpened and we had also had our kit inspected. We have identification discs about our neck on a string. On it is "No. 405569, Pte. A.H.W. Ketch, 24th Batt., Inf., Canadians". On Monday, the 6th, we have a final inspection and then I suppose we leave. The two fellows who go with me, are good chaps and as we have three of our signalers with the 24th now, it won't be like going to a strange bunch by any means. You should see the big black English army boots I have on, No. 10, and I have two pair of socks on. When I get back to civis again I sure won't be able to wear freak shoes. We take the Oliver equipment with us and the Ross rifle. We also take two suits of underwear, three pairs of socks, one rubber sheet, one blanket and a few necessities issued by the army. The rest we pack in our kit bags and they are stored away for us till we claim them. I got the papers you sent to Hettie. Don't worry about me. Buck up and assist in anything you can to help us win the war. Be cheery under all circumstances. Regards to my Sarnia friends and acquaintances. HAROLD

Days after writing the above letter, on March 9, 1916, Harold Ketch arrived in France with the Canadian Infantry, 24th Battalion, First Quebec Regiment. Three months later, on June 8th of 1916, Harold sent his mother Helena another letter, this from Flanders. Following is an excerpt from that letter:

Dear mother,

I am going to write several letters today as there is no telling when I'll get the chance again for as you are aware already by the papers, we are in the thick of things now. I will let you know how I make out at every opportunity. Our regiment has a distinctive hat badge now. It is very bright and is the shape of a star surmounted with a crown. It has the letters V.R.C. on it (Victoria Rifles of Canada)...

Well, we are likely to be in the heat of things so what is in store for me is uncertain. What we want is more help from Canada in the way of willing men. We have a hard fight yet ahead before we beat Fritz, and all the men are needed. If the fellows at home would just stop to realize fully where their duty lay. If they were over here a few

minutes just to see what noble sacrifices our fellows are making for the glory of the old empire, I'm sure they would enlist by the thousands. Well Mother, be cheery and don't worry about me. If anything happens to me you'll know I did my best in a good cause and work hard all the time for more recruits and assistance to those over here....

Well, be cheery and send me a parcel of eats and newspapers.

Lovingly, Harold

In just over one year at the front, Harold Ketch took part in two defining battles of the Great War. The Battle of the Somme (July 1-November 18, 1916) was one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties. In the spring of 1917, the Canadian Corps made their way to an area in northern France dominated by a long hill known as Vimy Ridge. The Battle of Vimy Ridge (April 9-12, 1917) was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps, and significant victory for Canada, later referred to as "the birth of a nation". Of the 97,000 Canadians who fought at Vimy Ridge, approximately 7,004 were wounded and 3,598 were killed in four days of battle.

Harold Ketch of the 24th Battalion, Quebec Regiment, was wounded at Vimy Ridge. On April 10, 1917, he had been appointed Lance Corporal. On April 14, 1917, he was admitted to No. 6 Casualty Clearing Station with a gunshot or shell wound, right knee. He returned to duty the next day. He was awarded a Good Conduct Badge on May 10, 1917, and a Military Medal on May 17, 1917. The Military Medal award read: "*For conspicuous bravery at VIMY RIDGE on April 9th, 1917, when as a Lineman attached to BN. Report Centre, he showed great courage and determination in laying lines and keeping them in repair under heavy artillery fire, thereby enabling communication to be maintained throughout the operation. Although wounded he carried on with his duties for over twenty-four hours, when he was ordered out by his Officer. His action was indeed a most excellent example to his comrades.*"

Sometime in July 1917, Harold Ketch went on furlough in England and was able to visit his uncle, George Ketch. Harold returned to his unit in France on August 12, 1917. Harold then took part in the second-largest Canadian military undertaking up to that point in the war, second only to Vimy. The **Attack on Hill 70 and Lens** in France (August 15-25, 1917) was the first major battle orchestrated by Canadian commander Lieutenant-General Arthur Currie and the first time German forces used flame-throwers and mustard gas against the Canadians. Known as "Canada's forgotten battle of the First World War", the Canadians were able to capture Hill 70 but not the city of Lens, at a cost of approximately 9,100 Canadians listed as killed, wounded or missing.

Three days after returning to his unit, on August 15, 1917, Lance Corporal Harold Ketch of the 24th Battalion, lost his life while fighting on the first day of the Attack on Hill 70. Harold Ketch's Circumstances of Death Register records him as; *Date of Casualty: 15-8-17. "Killed in Action". Location of Unit at time of Casualty: ATTACK NORTH OF LENS. Locations of Grave: He was buried on the roof of a bomb store between two deep Dugout Tunnels, back of Lens, between St. Elio or St. Emile and another small place. Remarks: Grave cannot be located as bomb store and dugouts have been blown up.*

In early September 1917, Mrs. Helena Dodd received the following short telegram from the Director of Records about her only son:

OTTAWA, ONT. SEPTEMBER 3

DEEPLY REGRET TO INFORM YOU 405569, LANCE CORPORAL ALBERT HAROLD WILLSIE KETCH, INFANTRY, OFFICIALLY REPORTED KILLED IN ACTION, AUGUST 15, 1917.

Only a day or two before receiving the above telegram, Helena Dodd had received a letter from Harold, dated August 12th, 1917. In it, he described how he was in England on leave visiting his cousin and uncle George, and that he was that day leaving to return to France.

In mid-September 1917, the *Sarnia Observer* included "an appreciation story" on Harold Ketch. A portion of that story read, *A brilliant journalistic and literary life has been cut short in the death of Lance-Corp. Ketch, but such nobility in sacrifice should steel the hearts of the living, to aid in crushing the satanic power of the would be oppressor of mankind whose only rule is 'might makes right' We submit this appreciation to the memory of one whom we very highly regarded.* A memorial service was held at the Methodist Church at Alvinston on September 16, 1917.

Helena Dodd later resided on Elias Street in London, Ontario. Helena passed away on May 3, 1922 at age fifty-three in London Hospital and is buried in Alvinston Cemetery. Albert Harold Ketch, 23, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. Harold Ketch's name is also inscribed on the Village of Alvinston's Memorial.

KNIGHT, Charles Edwin (#654629)

The legacy of Charles Knight lives on today with his family. The Sarnian survived the Battle of Vimy Ridge, but died in Belgium on October 26, 1917 on the first day of fighting at the brutal Battle of Passchendaele. Charles, 23, has no known grave. He was awarded the Allied Mothers Badge and the Memorial Cross which the Canadian Government presented to his mother, Catherine "Jennie". Jennie wore the Memorial Cross for the remainder of her life, after which it was passed on to her grandson, Fred. Now, it is treasured by her great granddaughter, Jodi.

Charles Knight was born in Sarnia, on July 27, 1896, the son of William Russell, a barber, and Catherine Jean "Jennie" (nee Saunders) Knight. Thirty year-old William Knight (born April 26, 1852 in Hawkestone, Simcoe County) married twenty-two-year-old Catherine Jennie Saunders (born June 28, 1858 in Goderich) in Goderich on October 5, 1882. William and Jennie honeymooned in Kakebeka Falls, west of Thunder Bay, before returning to Goderich, where William worked as a hairdresser/barber.

Their union blessed them with nine children: Alberta Louise (born November 18, 1883, died at birth); William Ernest (born February 9, 1885); Harry Wallace (born May 26, 1887); Arthur Russell (born February 18, 1889); Oliver Saunders (born February 14, 1892, died two weeks later on March 1, 1892); James Abraham (born September 24, 1892); Jennie Mae (born January 12, 1895); Charles Edwin; and Clarence Homer (born April 30, 1899, died at 6 months on November 17, 1899). Sometime around 1892, the Knight family moved to Sarnia and resided at 158 North Brock Street. William Knight continued his career as a barber to support his large family.

Charles' older brother William also served in the war. Two months before Charles enlisted, thirty year-old **William Ernest Knight** enlisted in the Canadian Over-Seas Expeditionary Force in Toronto on January 7, 1916. He stood five feet five and a half inches tall, had brown eyes and dark brown hair, was single, and was residing at 318 Jarvis Street, Toronto at the time, where he was employed as a druggist. He recorded his next-of-kin as his mother Jennie Knight of 158 Brock Street North, Sarnia. He also recorded that he had three months military experience as a Private in the Canadian Army Medical Corps (CAMC).

Arriving in England aboard the *SS Olympic* in mid-April 1916, William was initially detailed for duty to No. 1 Assistant Director of Medical Services (ADMS), and later was posted to Canadian Army Medical Corps Training Centre (CAMCTC). Almost a year later, in March 1917, William went on to serve with the CAMC on hospital ships *Letitia*, *Araguaya*, *Liverpool* and *Llandovery Castle* and made twenty-four round trips across the ocean. He made several trips on the *Llandovery Castle* except, ironically and fortunately, its last ill-fated trip in June 1918. The *Llandovery Castle* was torpedoed by a German submarine, killing two hundred thirty-four, including Private David Smuck of Sarnia (his story is included in this Project).

Prior to the last fateful voyage of the *Llandovery Castle*, William Knight had reverted to the rank of Private so that he could serve in France. On September 10, 1918, Private Knight arrived in Havre, France where he served as a stretcher-bearer with the 13th Field Ambulance. William survived the war that ended in November 1918, and in December 1918, he was admitted to No. 32 Stationary Hospital in Wimereux, France where he was diagnosed with chronic bronchitis. He received treatment in France and in England, and was invalided to Canada in mid-May 1919. On July 5, 1919, William was discharged in Toronto, declared "medically unfit for service".

Despite his hardships, William survived the war, but his younger brother, Charles, wouldn't be as fortunate. On March 20, 1916, nineteen year-old **Charles Edwin Knight** enlisted in the Canadian Over-Seas Expeditionary Force in Goderich. He stood five feet two inches tall, had brown eyes and dark brown hair, was single, and was residing in Goderich at the time. He recorded his trade or calling as factory hand, and his next-of-kin as his father William R. Knight of 158 Brock Street, Sarnia. Charles became a member of the 161st Huron Battalion, Canadian Expeditionary Force. More than seven months later, on November 1, 1916, he embarked overseas bound for the United Kingdom aboard the *S.S. Lapland*. Charles Knight arrived in England on November 11, 1916, and was transferred to the Canadian Infantry, 58th Battalion, Central Ontario Regiment, stationed at Shorncliffe.

Less than three weeks after disembarking in the U.K., on November 29, 1916, Private Charles Knight of the

58th Battalion arrived in France. In the spring of 1917, the Canadian Corps made their way to an area in northern France dominated by a long hill known as Vimy Ridge. The Battle of Vimy Ridge (April 9-12, 1917) was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. Of the 97,000 Canadians who fought at Vimy Ridge, approximately 7,004 were wounded and 3,598 were killed in four days of battle. The victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps, and significant victory for Canada. Charles Knight took part in fighting and survived the Battle of Vimy Ridge in April 1917.

Private Charles Edwin Knight

Less than three months later, on July 2, 1917, Charles Knight was admitted to No. 22 General Hospital at Camiers due to inflammation of connective tissue (ICT) in his heels. He was discharged eighteen days later from No. 6 Convalescent Depot in Etaples and rejoined his unit at the front. By mid-October 1917, he was part of the Canadian Corps that arrived in an area of Flanders, Belgium known as Passchendaele.

The **Battle of Passchendaele** in Belgium (October 26 – November 10, 1917) was waged in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and glutinous mud. Overcoming almost unimaginable hardships and horrific fighting conditions, the remarkable Canadian victory that few thought possible, came at a cost of almost 12,000 Canadian wounded and more than 4,000 Canadians killed.

On October 26, 1917, the first day of the nightmarish Battle of Passchendaele, Charles Knight was killed in action during an attack. Another Sarnian, James Millar Pirrie, also lost his life in the same battle on the same day (James Pirrie's story is included in this Project on page 345).

Medals presented after the war to Charles Knight's mother Catherine "Jennie" Knight;

Allied Mother's Badge
(International Order of Allied Mothers in Sacrifice Medal)

Memorial Cross

Charles Knight's Circumstances of Death register records him as; *Date of Casualty: 26-10-17. "Killed in Action"*. *Location of Unit at time of Casualty: ATTACK WEST OF PASSCHENDAELE*. He was awarded the Allied Mothers Badge and the Memorial Cross, which were presented to his mother, Catherine "Jennie", by the Canadian Government. She wore the Memorial Cross for the remainder of her life and passed it on to her grandson, Fred. Now, it is treasured by her great granddaughter Jodi. Charles Knight, 21, has no known grave. He is memorialized on the Menin Gate (Ypres) Memorial, Belgium, Panel 18-24-26-30.

KNOWLES, Thomas Neville (#226125)

Popular Point Edward resident, Thomas Neville Knowles, 24, was a candy maker in Stratford when he enlisted with the Canadian Over-Seas Expeditionary Force in 1916. Two years later, he was killed in action at the Battle of Moreuil Wood, recognized by historians as "the last great cavalry charge." Thomas has no known grave, but he is memorialized on the Vimy Memorial at Pas de Calais, France.

Thomas Knowles was born in Point Edward, on January 28, 1891, the eldest son of John (born January 25, 1864) and Hughmina "Mina" Elizabeth (nee Mooney, born August 12, 1867) Knowles. John and Mina Knowles had five children together: Sadie Armatage (born March 27, 1889); Thomas Neville; John William (born March 23, 1894); Hughmina V. (born March 26, 1897); and Bernice Winnifred (born July 13, 1903). John Knowles supported his family by working first as a GTR locomotive fireman and then as a retail shoe merchant in Sarnia. The Knowles family lived at 335 London Road and later 339 Christina Street, Sarnia.

Thomas' younger brother, **John William Knowles**, left Sarnia in October of 1915 for London, Ontario to take a course at the Military school there in preparation to enlist for active service. Both Thomas and he enlisted in the same month. Eleven months later, in September 1916, twenty-two-year-old John Knowles completed his Officers' Declaration Paper at Camp Borden and became a Lieutenant with the 149th Battalion, CEF. He stood five feet eight inches tall, had hazel eyes and black hair, was single, and recorded his next-of-kin as his father John Knowles of Sarnia. Six months after becoming a lieutenant, in late March 1917, John Knowles embarked overseas from Halifax bound for the United Kingdom aboard the *SS Lapland*. He arrived in England on April 7, 1917, and became a member of the 25th Reserve Battalion at Bramshott. In mid-February 1918, John was taken on strength into the 4th Reserve Battalion, and on April 9, 1918, Lieutenant John Knowles proceeded to France as a re-enforcement with the 1st Battalion.

Four months later, at the start of Canada's Hundred Days Campaign, on August 9, 1918 at Folies, France (near Amiens), Lt. John Knowles of the 1st Battalion was wounded in action. A bullet passed through his right hip and left leg, and another bullet passed through his left hand. He received initial treatment at No. 48 Casualty Clearing Station and then at No. 2 Stationary Hospital in Abbeville, and later at Royal Free Hospital in London. In December 1918, six months after being wounded (and one month after the Armistice), John was discharged from Granville Canadian Special Hospital in Buxton. He was transferred to Canada where he was admitted to St. Andrew's Military Hospital and later the Dominion Orthopaedic Hospital in Toronto, where he remained until June 1919. John Knowles was discharged in October 1919, struck off strength being declared medically unfit for service.

Thomas Neville Knowles spent his boyhood days in Point Edward village, and later in Sarnia, where he was a popular young man with many friends. Prior to enlisting, he was employed with the Mooney Biscuit Company of Stratford, Ontario. At age twenty-four, Thomas Knowles enlisted in the Canadian Over-Seas Expeditionary Force on October 6, 1915, in Stratford, Ontario. He stood five feet eight inches tall, had brown hair and dark brown hair, was single, and was residing at 57 Church Street in Stratford at the time. He recorded his trade or calling as candy maker and his next-of-kin as his father John Knowles of 335 London Road, Sarnia. Thomas became a member of the "B" Squadron, Canadian Mounted Rifles (CMR), Depot Regiment. He embarked overseas bound for the United Kingdom on April 28, 1916 aboard the *S.S. Metagama*.

He arrived in England on May 6, 1916 and was initially posted at the Canadian Corps Depot (CCD) in Shorncliffe. On June 12, 1916, Thomas became a member of the Canadian Cavalry, Royal Canadian Dragoons Reserve Regiment (RCDRR) stationed at Shorncliffe. Four months later, on November 16, 1916, Knowles of the Royal Canadian Dragoons arrived in France.

More than nine months later, on September 1, 1917, Thomas was admitted to No. 12 Stationary Hospital in St. Pol, France due to scabies (itchy skin infestation caused by mites). He returned to his unit six days later. On September 12, 1917, he was appointed the rank of Lance Corporal. In mid-November 1917, he was granted fourteen

days leave when he was able to return to England and on December 4, Thomas rejoined his unit in France.

During part of their 1918 Spring Offensive, the Germans were able to advance until they occupied Moreuil Wood, a commanding ridge on the riverbank of the Avre River overlooking the village of Moreuil, about 20 kilometers south of Amiens, France. It was here that the Canadian Cavalry Brigade (that included Lord Strathcona's Horse, Royal Canadian Dragoons and Fort Garry Horse) was tasked with holding the Germans back. To this point in the war, mounted cavalry charges were of limited use against barbed wire, deep trenches, mechanized artillery and machine-guns. With the British fighting retreating and fluid enemy lines, the battlefield opened up, so on March 30, the Canadian Cavalry Brigade (CCB) saw their opportunity.

On March 30, 1918, Lance Corporal Thomas Knowles of the Royal Canadian Dragoons took part in the **Battle of Moreuil Wood**, France. At the one-day battle, the charge of the Canadian Cavalry Brigade at Moreuil Wood was the biggest Canadian cavalry charge of the war. Confronting the enemy head-on, the Germans found facing several hundred men and horses riding en masse, with swords drawn, a terrifying experience.

While taking part in a cavalry charge, Lance Corporal Thomas Knowles was hit by a bullet from an enemy rifle and instantly killed. His Circumstances of Death Register records him as *Date of Casualty: 30-3-18. "KILLED IN ACTION". While taking part in a Cavalry charge near the Bois de Moreuil, he was hit just below the heart and instantly killed by a bullet from an enemy rifle. Reported Locations of Grave: North West corner of Bois de Moreuil.* Thomas Knowles' remains were never recovered.

On April 18, 1918, his father, John, on London Road in Sarnia received the following telegram about his son from the Director of Records in Ottawa: SINCERELY REGRET TO INFORM YOU 226125 PRIVATE THOS. NEVILLE KNOWLES, CAVALRY, OFFICIALLY REPORTED KILLED IN ACTION MARCH 30TH 1918.

In May 1918, the *Sarnia Observer* published a review of the engagement in which two Sarnians participated—Private Thomas Knowles lost his life and Private Leonard Galloway received serious injuries. Both men were attached to the Royal Canadian Dragoons. Following is the article:

Review of Great Battle in Which Sarnia Boys Played a Big Part

The commander in chief has mentioned the splendid work of the British cavalry in the recent fighting and I am now able to write things which I wanted to write before because in the first days of this battle I saw cavalry riding out to meet the enemy round about Ham and Guiscard, and afterward on patrol work below Delville Wood and Pozieres. From March 22 onward they fought mounted and dismounted, helped to stop gaps in the line and stem the German tide, charged Germans on foot and Germans on horseback, cleared woods and roads with machine guns and rifles, rode out in patrols to reconnoiter the enemy's position, chased German advance guards out of villages and acted as rearguards to the British infantry. Their losses were not light but light for all the service they did on the hours and days and nights of grave peril.

On March 22 they dismounted and held the Ollezy-Ham line when the enemy was bearing down in vast numbers, and some dragoons fought all night, covering the withdrawal of the tired troops. They could leave only a few men to look after the horses and it was the men of a labor battalion who one night led their horses to the next position, each man with 15 horses tied together on one rope, which was not an easy job on a dark night, with poor, frightened beasts.

The British cavalry had hard fighting around Guivry, and on the 26th they moved up to help the French, who were meeting the enemy hordes bearing down on Noyon. The British squadrons had their left flank exposed when they were ordered to hold Porquericot Ridge, on which the enemy was moving. They went at full speed, pressing their horses forward to something like a gallop, and the infantry soldiers cheered at the sight of this living tide of fine men and fine beasts streaming over the slopes. The enemy was already on the ridge, but the cavalry held the southern side of it, stopping the enemy from gaining the height.

When the allied line withdrew to the Driette river it was necessary for the cavalry to conform to this movement which they did with the enemy again on their left flank, so that the Lancers, Hussars and Canadian cavalry were under furious machine gun fire. After supporting the British infantry near Marcelcave, the dismounted cavalry with one mounted squadron, made a gallant attack through Moreuil Wood and cleared out the enemy. Afterward, however, it was again filled with Germans who had many machine guns and the cavalry were again asked to clear it. It was a perilous task, for two battalions of the enemy held the wood, and their machine gun fire swept through the glades; but in this wood of Moreuil on the morning of April 1 British cavalry performed a feat as fine as the Balaklava charge, and this also should be made into a ballad and learned by heart.

Twelve hundred men who had been riding all through the night went forward in three waves and charged that dark wood next morning at a hard gallop. The first wave rode to the edge of the wood, and the second to the centre, and the third wave went right through to the other side, riding through the enemy and over his machine guns and in the face of a hail of bullets from hidden machines. They cleared the wood of Moreuil and brought back prisoners and thirteen machine guns, but there were many empty saddles, and many men and horses fell.

That was the finest exploit of the British cavalry, but elsewhere it did splendid work, and everywhere the men were gallant and cool, as when some of the dragoons came under a heavy shrapnel fire near Gentille, and many men had to shoot their wounded horses to put them out of their agony.

Despite heavy losses, over 300 casualties, the Battle at Moreuil Wood was a key Allied victory that contributed greatly to the halt of the German Spring Offensive. The charge of the Canadian Cavalry Brigade at Moreuil Wood was not the first Canadian cavalry charge in the First World War, but it was the biggest. Some historians refer to the events of this battle as “the last great cavalry charge,” as there were few other military charges on horseback after this one. Thomas Knowles, 27, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. On the Sarnia cenotaph, his name is inscribed as N. Knowles.

LECKIE, Norman Chester (#472813)

The death of Norman Chester Leckie exemplified the cruelty and brutality of the Great War. At age 26, Norman enlisted and ten months later was wounded in the Battle of the Somme on October 20, 1916. Enemy shrapnel had torn into his left hip, his lower back, and his pelvis. Despite several operations and two years of painful yet hopeful convalescence in England and in Toronto, Norman succumbed to his wounds a month before the Great War officially ended. A full military funeral in Sarnia was held in Norman’s honour before he was interred at Lakeview Cemetery.

Norman Leckie was born in Sarnia, Ontario on May 7, 1889, the youngest child of Robert (born April 23, 1850) and Margaret “Maggie” (nee McVicar, born June 4, 1854) Leckie. Robert and Margaret Leckie had four children together: Elymer Robert (born December 11, 1881); Christy Ann (born July 28, 1883); Sarah Ethel (born August 1, 1886); and Norman Chester. Robert Leckie supported his family working as a farmer in Sarnia.

In 1911, twenty-two-year-old Norman was residing in Battleford, Saskatchewan with his twenty-nine-year-old brother Elymer Leckie, Elymer’s wife Rose, and their infant daughter Freida. Rose was born about 1891 in Germany and immigrated to Canada in 1908. Brothers Norman and Elymer were farming together in Battleford in 1911.

At age twenty-six, Norman Leckie enlisted in the Canadian Over-Seas Expeditionary Force on December 13, 1915 in Saskatoon, Saskatchewan. He stood five feet nine and three-quarter inches tall, had blue eyes and black hair, was single, and was residing with his parents in Unity, Saskatchewan at the time. He recorded his trade or calling as farmer, and his next-of-kin as his father Robert Leckie of Unity, Saskatchewan (the address was later changed to Sarnia, Ontario). Norman became a member of the 65th Battalion, Canadian Expeditionary Force. Six months later, on June 18, 1916, he embarked overseas from Halifax bound for the United Kingdom aboard the *S.S. Empress of Britain*.

Private Leckie arrived in England on June 28, 1916, and became a member of the Canadian Infantry, 54th Battalion, Central Ontario Regiment, stationed at Bramshott. Approximately six weeks later, on August 13, 1916, Leckie departed England, crossed the English Channel and arrived the next day in Havre, France. Norman Leckie arrived one and a half months into the **Battle of Somme** – one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

Two months after arriving in France, on October 20, 1916, Private Norman Leckie, still with the 54th Battalion, was wounded in action by shrapnel. He was struck by a number of pieces of shrapnel, in the left hip and lower back, some pieces piercing portions of his pelvis. He then walked three miles to the Dressing Station and was dressed an hour-and-a-half after being wounded. About five hours after being hit, he was operated on at the Casualty Clearing Station and “some shrapnel was removed.”

Four days after being wounded, on October 24, 1916, Norman was admitted to No. 13 General Hospital in

Boulogne, where doctors recorded he was “dangerously ill with a gun shot wound back”. He was operated on and three more shrapnel pieces were removed. Three days later, still at No. 13 General Hospital, his condition was again recorded as, “dangerously ill, not doing very well, gun shot wound back”. On November 12, 1916, he was at Hacksbury Road Military Hospital in York with “gun shot wound left buttock.” Norman was confined to bed there for two months and underwent another operation where more metal fragments were located and removed along with several small pieces of dead bone. He was able to walk on crutches at times.

On February 5, 1917, Leckie was at King’s Canadian Red Cross Convalescent Hospital at Bushy Park, Hampton Hill, Middlesex with “very deep wounds, several pieces of dead bone and foreign bodies have been discharged,” and was reported weak and anemic. On February 14, he was admitted to Moore Barracks Canadian Hospital at Shorncliffe, still recovering from his “gun shot wound left buttock”. He still had fragments of shrapnel inside his body, including in his arm and some that moved around putting pressure on his spine causing sharp pain. On March 9, he underwent another operation. Two months after that operation, on May 11, 1917, Norman was discharged, “invalided to Canada for further medical treatment”. Two days later, with a recorded “gun shot wound left leg” he sailed from Liverpool bound for Canada aboard the hospital ship *S.S. Letitia*.

When Norman returned to Canada, he was admitted to the Davisville Military Hospital in Toronto. He lay there for over a year with an open wound in the hip, with constant discharge from the wound. He underwent several more operations, including one where pieces of shrapnel were removed from his arm, and another where several small pieces of bone were removed.

On October 10, 1918 at 4:20 p.m., while still in Davisville Hospital, Norman Leckie passed away, the tragic result of the wounds that he had received two years prior. The poison and infection from the German shell that had lacerated his hip could not be stemmed by medical operations. His Circumstances of Casualty Register records him as *Davisville Military Hospital, Davisville, Ontario. Gun shot Wound left Buttock and Thigh. Admitted to hospital on May 25th, 1917, operated on for sequestrum. Three other operations for the same condition. Died at 4:20 P.M. October 10th, 1918. Lakeview Cemetery, Sarnia, Ontario.*

Norman Leckie’s body was returned to the home of his sister, Mrs. Levi Fair, who resided on the 2nd Line in Sarnia Township. His funeral with full Military Honours took place on October 13, 1918. It was one of the largest military funerals seen in the city at that time. It began with a very solemn service at the home of Norman’s sister, with his comrades as pallbearers and members of the Great War Veteran’s Association as guard of honour. The cortege then departed for the deceased’s final resting place. Accompanying the hearse in the full military funeral parade were comrades, infantry veterans, relatives, family members and friends, who travelled in a procession of automobiles and buggies, in a line over half a mile in length. The parade made its way into Sarnia, down Mitton, Davis, and Christina Streets to Exmouth Street on its way to Lakeview Cemetery.

At the cemetery, the funeral party was met by a military band, firing party and wreath bearers. After the burial, a service was read by Reverend Morrison and the band played “Nearer My God to Thee”. The firing party then took its place over the grave and fired three volleys, which was followed by the playing of the “Last Post”. When the military parade left, his parents and relatives remained to view for the last time on earth their son and brother Norman Leckie who paid the supreme sacrifice. One month after Norman Leckie’s death, the Armistice agreement was signed, ending the Great War. Parents Robert and Margaret Leckie later resided in Kitscoty, Alberta, and then Eburne, British Columbia. Norman Leckie, 29, is buried in Lakeview Cemetery, Sarnia. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

LITTLEFIELD, Thomas Edward (#402781)

Born in England, Thomas Littlefield immigrated to Sarnia and enlisted in the Canadian Over-Seas Expeditionary Force in January 1915. Within a year and a half, he was killed in action in the Attack at Maple Copse, part of the Battle of Mont Sorrel in Belgium. Thomas, 19, has no known grave but is memorialized on the Menin Gate (Ypres) Memorial in Belgium and the Sarnia Cenotaph.

Thomas Littlefield was born in London, Middlesex, England on August 7, 1896, the son of Jane Littlefield of Rayne, Braintree, Essex, England. At some point he immigrated to Canada and resided in Sarnia.

Eighteen year-old Thomas Littlefield enlisted in the Canadian Over-Seas Expeditionary Force on January 16, 1915 in Sarnia. He stood five feet nine inches tall, had hazel eyes and light hair and was single at the time. He

recorded his occupation as apprentice machinist and his next-of-kin as his widowed mother Jane Littlefield in Rayne, Essex, England. He also recorded his prior military experience with the 27th Regiment, St. Clair Borderers Militia. Thomas became a member of the 34th Battalion and seven months later, in August 1915, he embarked overseas bound for the United Kingdom as part of the Second Contingent.

He arrived in England on August 26, 1915 and was taken on strength into the 9th Battalion at Shorncliffe on the coast of Kent. He trained in England for almost five months before arriving in France in January 1916 where he became a member of the Canadian Infantry, 4th Canadian Mounted Rifles (2nd Central Ontario Regiment).

Note: Sources including the Commonwealth War Graves Commission and Veterans Affairs Canada as well as the Canadian Virtual War Memorial record Thomas Littlefield as a member of the 4th Canadian Mounted Rifles; however his Personnel Records list him as a member of the 5th Canadian Mounted Rifles.

In May 1915, the 4th Canadian Mounted Rifles (4th CMR) had been asked to volunteer for overseas service as a dismounted unit. With many regrets in abandoning the horses, the men were eager to get to the field of action and so, the following month they joined the 5th and 6th CMRs at Valcartier to form the 2nd Canadian Mounted Rifles Brigade. In mid-July 1915, the *S.S. Hesperian* carried the 4th and 5th CMRs to England, where on July 29 they continued their training at Shorncliffe. Note: The *S.S. Hesperian* was afterwards torpedoed and sunk by the Germans, while returning on her second voyage after conveying the 4th CMR to England.

Three months later, in late October 1915, the Regiment departed England and arrived in Boulogne, France. One month later, they arrived at the front lines in Flanders, Belgium. In late December 1915, with the formation of the Third Canadian Division, six regiments of Mounted Rifles were converted into four battalions of infantry, making the 1st, 2nd, 4th and 5th Battalions of the 8th Brigade.

Private Thomas Littlefield arrived in France on January 21, 1916, and approximately three weeks later, he became a member of the Canadian Infantry, 4th Canadian Mounted Rifles (2nd Central Ontario Regiment). The following are excerpts from Captain S.G. Bennett's 1926 regimental history *The 4th Canadian Mounted Rifles 1914-1919*:

The month of January 1916 had been spent doing infantry training, and by mid-March the Regiment took over the trenches in front of Zillebeke, Belgium. The trenches here were old and known as the most unpleasant of habitations. The very name of the (Ypres) Salient was a nightmare to every man who knew it. *The weather was cold and raw; it had been snowing. Added to these unpleasant conditions were the discomforts of the sodden trenches. Everyone lived a rodent life; in the daytime, nothing stirred but at night the Salient was a hive of moving troops and transports, entering in small groups to relieve and ration the men in the front line. Machine guns raked the roads, shells of all descriptions enfiladed this strategic death-trap, high explosives crashed on the pave or fell in the town of Ypres. The night was made more unreal by the flares and Verrey lights which seemed to surround the mysterious darkness. During the days in the front line, the men's lives were menaced by bombs and grenades. Dodging minnenwerfers and repairing the damage occupied many hours on duty.*

In early May 1916, the 4th CMR went into new trenches located more northerly, again in front of Zillebeke and in Sanctuary Wood. *The water-logged soil did not permit deep dugouts in this low undulating country. The trenches were built up above the surrounding ground and even then in many places the men crouched in water up to their knees. The weather was cold and wet and except for the welcome braziers, improvised from oil-drums, life would have been unbearable. Toward the end of the month the temperature suddenly became warmer, and the men, instead of being chilled to the marrow and grovelling in slime, were now sweltering in the brilliant sunshine. The weather probably more than any other thing, affected the spirits and outlook of the men; good weather enormously diminished their discomforts, though floods of sunshine did not extinguish their irresistible tendency and privilege to "grouse" at the elements.*

In mid-May, the Battalion moved from the front-line trenches toward Ypres, Belgium and beyond where they remained in Divisional Reserve for two weeks. *They had drill and bath parades and prepared themselves for their next move. Little did they know for what they were preparing.*¹⁰⁵

It was during this time that British High Command, hoping to relieve the pressure on their French Ally at Verdun, began preparations for an offensive, which developed into the famous Battle of the Somme (July 1 – November 18, 1916), one of the bloodiest and most futile battles in history.

At the end of May, the 4th CMR returned to the front lines and found themselves skirting the south-easterly

edge of Armagh Wood and holding the strategic elevation of Mount Sorrel. The 5th CMR were in support in Maple Copse and Railway Dug-Outs at Zillebeke-Bund. They both soon found themselves part of the **Battle of Mont Sorrel** in Belgium (June 2-13, 1916). Mont Sorrel was the last remaining high ground in the Ypres salient still in British hands.

The following are more excerpts from Captain S.G. Bennett's *The 4th Canadian Mounted Rifles 1914-1919*:

Daylight on June 1st disclosed clean and dry trenches which afforded the best cover and most comfort of any heretofore occupied. There were good fire-bays and many elephant-shelters with gas curtains protecting the spirit, if not the flesh. It was an unusually beautiful, clear, early-summer day except for some definite shelling on Sanctuary Wood and the appearance of several captive-balloons, there was nothing to foreshadow an impending blow.

Lieut-General Sir Julian Byng had just taken over the command of the Canadian Corps. The large concentrations of enemy troops, the amount of artillery which had been "registered" on vulnerable points for days past and the activity of the Germans building new trenches and saps were menacing, and had been worrying the Staff for some time. Visibility had been poor. Heavy mists had covered the industrious enemy for several days. Preparations against possible attack had been made... but despite an increasing vigilance no definite indications appeared as to the exact point of attack, or when it would be launched.

At sunrise on June 2, 1916, everyone was about early preparing for a visit from Divisional Commander Major-General Mercer. At about 8 a.m., the dignitaries were escorted towards the front line. *It was a calm, beautiful and noticeably quiet morning. Suddenly, without warning, from a heavenly, peaceful sky broke a deafening detonation and cloud of steel which had no precedent for weight and violence. Every conceivable type of gun, howitzer and trench-mortar around Ypres poured everything it had upon the Third Divisional front. The most extravagant imagination cannot picture such a downpour of destruction. Even those who had tasted the bitterest in modern warfare were staggered by the violence of this onslaught.*

Nothing like it had been experienced heretofore and it is doubtful if its fierceness was exceeded by any later bombardment. It continued for four-and-a-half hours. The greatest concentration was directed against the 8th Brigade, but even the trenches which were shelled the least became mere jagged scars, unfit for defence. That anyone lived through it is a miracle. Trenches were soon demolished, shelters caved in, the ground over which tall weeds and long grass had grown was ploughed, beaten and pock-marked by shells. Sanctuary Wood, Armagh Wood and Maple Copse which a few hours before were verdant woods were transformed into charred, jagged stumps.

The intense bombardment continued for five hours with no stopping. Three mines were sprung about 1 p.m. on the Battalion front. *At 1 o'clock the bombardment ceased, but only as a signal for the preparation of further violence. The ground quivered and gently heaved and then came the volcanic roar of a mine. It hurled into the air a large part of the front line and its defenders. Sandbags, wire, machine guns, bits of corrugated iron and bits of men were slung skyward. After this final eruption all was quiet, even our own guns. Immediately the German infantrymen appeared in full equipment, with large spades slung over their backs. They advanced in large numbers with an air of assurance and confidence that all resistance had been removed by their artillery.*

As soon as the bombardment commenced, all realized that this was an affair of prime importance. The men manned the fire-bays until blown out or buried under the debris; some searched for cover to save their lives for the attack they knew would follow. A few went to the "Tunnel", only to be buried or taken prisoner in the defenceless trap. A very few survived to tell what happened on that terrible morning...

... For the 4th CMR it was a day of obliteration. Only three officers out of twenty-two came back from the trenches. Seventy-three men out of 680 answered their names on June 4th... The 1st CMR on the left had an equally bad time and their casualties were almost as heavy. The 5th CMR which so nobly supported the Brigade in Maple Copse, was also cut up. Both of these Battalions lost their commanding officers.¹⁰⁸

In those first few days, the Germans gained some 300 to 700 yards along a varied front by penetrating the front line and some of the support trenches of the Brigade. They subsequently failed to consolidate their gains. Over two weeks of fighting that resulted in almost no change in the ground held by both sides, the "June Show," as the Battle of Mont Sorrel was known informally, came at a cost of 8,700+ killed, wounded or missing Canadians.

Just over four months after arriving in France, on June 2, 1916, Private Thomas Littlefield was killed in action in the area of the Ypres Salient during the attack on Maple Copse, part of the Battle of Mont Sorrel. He was originally reported as "missing between June 2 and June 3". His Circumstances of Casualty record him as

“Previously reported Missing, now Killed in Action, June 2/3, 1916, Attack at Maple Copse.” There was no record of burial.

Thomas Littlefield, 19, has no known grave. He is memorialized on the Menin Gate (Ypres) Memorial in Belgium, Panel 30 and 32. His name is also etched on one of the large Memorial plaques that were part of the original Sarnia cenotaph as having served in World War I. The plaques are now located on the outside wall of the Sarnia Canadian Legion. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

LUMLEY, Roy Henry (#123137)

At age twenty-one, Roy Henry Lumley left his job with Cleveland Sarnia Saw Mills Company to enlist in the Canadian Over-Seas Expeditionary Force on September 7, 1915. During the Battle of Vimy Ridge in the spring of 1917, Roy was wounded in action and had to be cut from barbed wire entanglements. Within days, the Sarnian, 23, passed away as a result of his wounds. He is buried in Lapugny Military Cemetery, Pas de Calais, France.

Roy Lumley was born in Wheatley, Kent, Ontario, on March 4, 1894, the son of Richard Henry (born June 1853, Egermont Twp, Grey) and Sarah Elizabeth (nee Brown, born June 1860) Lumley. Richard Lumley, a farmer at the time, married Sarah Brown on August 25, 1881 in Brooke, Lambton County. He later worked as a labourer with Cleveland-Sarnia Saw Mills Company and they lived at 254 Maria Street; at 241 Exmouth Street; and later on Water Street, Sarnia. Richard and Sarah Lumley had eight children together: William Albert (born 1880); Jida May (born March 1885); Frank (born 1888); Laura Jane (born 1892, passed away at age twelve on January 11, 1904, the result of diabetes); Roy Lumley; Maryle (born July 1896); Dewey Admiral (born December 22, 1901); and Ella (born August 18, 1906).

Prior to enlisting, Roy Lumley, like his father, was an employee of the Cleveland Sarnia Saw Mills Company in Sarnia. At age twenty-one Roy enlisted in the Canadian Over-Seas Expeditionary Force on September 7, 1915 in Sarnia. He stood five feet six inches tall, had dark blue eyes and light brown hair, was single, and recorded his trade or calling as labourer, and his next-of-kin as his father Richard Lumley of Exmouth Street, Sarnia (it was later changed to Water Street, Sarnia). Roy became a member of the 70th Battalion, Canadian Expeditionary Force. Seven months later, on April 24, 1916, Roy Lumley embarked overseas from Halifax bound for the United Kingdom aboard the *S.S. Lapland*.

He arrived in Liverpool, England on May 5, 1916, where like all privates, he earned his \$30 a month pay. On July 6, 1916, he was transferred to the 39th Battalion stationed at Shorncliff and then was moved to West Sandling. On July 23, 1916, he was admitted to Moore Barracks Canadian Hospital in Shorncliffe suffering from German measles. He remained in hospital for over two weeks and was discharged on August 8, 1916. Two months later, on October 13, 1916, he was transferred to the Canadian Infantry, 21st Battalion, Eastern Ontario Regiment. The next day, Private Roy Lumley of the 21st Battalion arrived in France.

In the spring of 1917, Private Roy Lumley and his battalion along with the rest of the Canadian Corps, made their way to an area in northern France dominated by a long hill known as Vimy Ridge. The **Battle of Vimy Ridge** (April 9-12, 1917) was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The first day of the battle, April 9, 1917, was the single bloodiest day of the entire war for the Canadian Corps and the bloodiest in all of Canadian military history. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps, and significant victory for Canada, later referred to as “the birth of a nation”. Of the 97,000 Canadians who fought at Vimy Ridge, approximately 7,004 were wounded and 3,598 were killed in four days of battle.

It was during the Battle of Vimy Ridge that Roy Lumley was wounded in action and had to be cut from barbed wire entanglements. He was taken to No. 23 Casualty Clearing Station to be treated for his wounds. A few days later, on April 15, 1917, Roy Lumley lost his life, the result of fatal wounds he had received in action in the field at Vimy Ridge. His Circumstances of Death Register records him as; *Date of Casualty: 15-4-17. “Died of Wounds.” At No. 23 Casualty Clearing Station. Lapugny Military Cemetery, 5 miles West of Bethune, France.*

Not long after her son’s death, Sarah Lumley received a letter written by the nurse who was caring for her son the day after he had entered the hospital. At the same time, Sarah received another letter from a comrade of her son, which he had penned only the day before the young hero died. The writer apparently had been at the hospital only a short time, and on leaving, was hopeful of Roy’s recovery. The letter reads as follows:

France, April 14th, 1917

Dear Madam,

I am dropping you a few lines at your son's request as I know him quite well. I saw him after he was wounded and he was alright then, and likely he is in England by this time. He went through the hospital on the 11th and I dropped you a card at that time. I hope Madam that you will take no offence at me writing, for your son and myself were in the same battalion in London, Ont., and you don't need to worry for he is all O.K., and hopes to be alright soon. He was very cheerful when I saw him and we had quite a chat together while they were dressing his wounds. He can thank his knife for saving his life. I hope you get a letter soon from him and hope he gets well.

One of his chums, Pte. W.C. Hopwood, B.E.F. France

(Note: the reference in the letter to Roy's knife was taken by his friends to mean that it was used to cut him out of wire entanglements).

In mid-June 1917, Richard and Sarah Lumley on Exmouth Street in Sarnia received a personal letter of sympathy about their son from Honourable A.E. Kemp, Minister of Militia and Defence for Canada. Roy Lumley, 23, is buried in Lapugnoy Military Cemetery, Pas de Calais, France, Grave III.D.11.

MAJOR, Charles Robson (#231712)

At the age of 32, Charles Robson Major enlisted in the Canadian Over-Seas Expeditionary Force in July 1916. Thirteen months later, he was killed in action at the Battle of Hill 70 and Lens, the "forgotten battle of the First World War." Charles Major, 34, has no known grave and is memorialized on the Vimy Memorial, Pas de Calais, France.

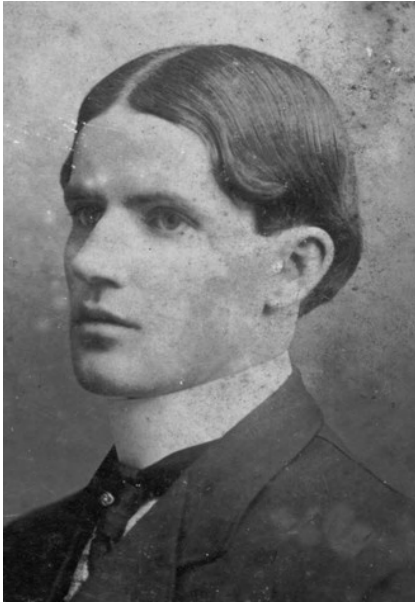

Charles Robson Major was born in Sarnia, on October 30, 1883, the eldest son of Charles Hedley (born August 1859 in Moore Township) and Catharine Alice (nee Dodds, born 1863 in Plympton Township) Major. At the age of twenty-three, Charles Hedley Major married nineteen year-old Catharine Alice Dodds on November 22, 1882 in Moore Township, Ontario. Residing at 273 Davis Street in Sarnia, Charles and Catharine Major had two children together: Charles Robson and his brother, Melvin Willis (born June 15, 1886). Charles was working as a miller when he married, and by 1891 he was employed as an engineer.

When Charles Jr. was five years old, his mother, Catharine, passed away on October 20, 1888 at the age of twenty-five. One year later, on September 9, 1889, Charles Sr. remarried in Sarnia, this time to twenty-three-year-old Chestina Jesse Moffat (born in Edinburgh Township, New York, USA). Charles and Chestina Major had three children together, half siblings for Charles Jr. and Melvin: Herbert Earl (born September 17, 1890); Grace Pearl (born January 1894); and Edna May (born March 1898). The family continued to reside at 273 Davis Street, Sarnia.

At some point, Charles Jr. moved out west. In 1906, the twenty-three-year-old was residing as a roomer in Souris District, Manitoba, and in 1916, he was residing in the town of Camrose, Victoria District, Alberta. At the age of thirty-two, he enlisted in the Canadian Over-Seas Expeditionary Force on July 13, 1916 at Sarcee Camp, Calgary, Alberta. He stood five feet nine and one-quarter inches tall, had blue-grey eyes and black hair, was single, and was residing in Camrose, Alberta at the time. He recorded his trade or calling as clerk, and his next-of-kin as his father Charles Hedley Major, of 273 Davis Street, Sarnia. Charles Robson Major became a member of the 202nd (Edmonton Sportsman) Battalion, Canadian Expeditionary Force. He embarked overseas from Halifax bound for the United Kingdom on November 23, 1916 aboard the *S.S. Mauretania*.

Charles Major arrived in Liverpool, England on November 30, 1916. Approximately six months later, on May 27, 1917, Private Major was transferred to the Canadian Infantry, 31st Battalion, Alberta Regiment at Camp Witley. The next day, he arrived in France with the 31st Battalion. By mid-June 1917, Private Charles Major was at the front lines.

Two months later, in August 1917, Charles Major took part in the second-largest Canadian military undertaking up to that point in the war, second only to Vimy. The **Attack on Hill 70 and Lens** in France (August 15-25, 1917) was the first major battle orchestrated by Canadian commander Lieutenant-General Arthur Currie and the first time German forces used flame-throwers and mustard gas against the Canadians. Known as "Canada's forgotten battle of the First World War", the Canadians were able to capture Hill 70 but not the city of Lens, at a cost of approximately 9,100 Canadians listed as killed, wounded or missing.

Private Charles Robson Major

Brother Melvin Willis Major

Less than three months after arriving in France, on August 21, 1917, Charles Major lost his life in action while fighting during the Attack on Hill 70, France. His Circumstances of Death Register records him as; *Date of Casualty: 21-8-17. "KILLED IN ACTION". WEST OF LENS, France.*

On September 5, 1917, Charles Hedley Major, at 273 Davis Street in Sarnia, received the following telegram from the Director of Records in Ottawa: DEEPLY REGRET TO INFORM YOU 231712 PTE. CHARLES ROBSON MAJOR, INFANTRY, OFFICIALLY REPORTED KILLED IN ACTION AUGUST 21ST.

Charles Major Sr. passed away in Sarnia on June 19, 1919, at the age of sixty, the result of carcinoma. It was less than two years after his son's death. He is buried in Lakeview Cemetery, Sarnia. Charles Robson Major's step-mother Chestina, passed away in 1935, and is also buried in Lakeview Cemetery, Sarnia. Melvin Major, Charles' brother, married Kathleen Sheppard in July 1909. They had three daughters together, and resided at 298 George Street, Sarnia, where Melvin worked as a machinist. Melvin passed away in Sarnia in February 1942 and Melvin and his wife Kathleen are also both buried in Lakeview Cemetery, Sarnia. Thirty-four-year-old Charles Robson Major has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

MANNING, Daniel Edward Vincent (#401650)

Daniel Edward Manning was born in England but came to Canada when he was fourteen. He was part of the British Home Children, a program designed to give impoverished and orphaned children a chance for a better life in Canada. He returned to England in March 1916 as a thirty-one-year-old member of the Canadian Over-Seas Expeditionary Force.

Daniel Edward Vincent Manning was born in Marylebone, Middlesex, England, on December 25, 1883. At the age of seven, in 1891, he was residing at St. Mary's Orphanage for Boys at North Hyde Heston, Middlesex, England, a residence housing approximately one hundred orphan boys between the ages of seven and sixteen. He became a member of a group known as **British Home Children**.

Between 1869 and 1948, over 100,000 children, most between six and fifteen years of age, were sent to Canada from the British Isles during the "British Child Emigration Movement". Circumstances in Britain had resulted in their families experiencing hard times. Churches and philanthropic organizations sent these impoverished, abandoned and orphaned children to Canada in the belief that they would have a better chance for a healthy, moral life in rural Canada. Canadian families welcomed them however far too many were used as a source of cheap farm labour and domestic help.

In 1898, Daniel Manning, now 14, was sent to Canada as part of a group of approximately sixty "poor Catholic children from the Westminster Diocese" in England (the children ranged in age from three to sixteen). The

children departed Liverpool aboard the *Numidian* and arrived in Montreal on September 24, 1898. Sent by the Canadian Catholic Emigration Committee, they were taken into care by St. Marylebone Parish, first settling in St. Sulpice, L'Assomption County, Quebec. At some point, Daniel Manning ended up in Sarnia.

At age thirty-one, Daniel Manning enlisted in Sarnia in the Canadian Over-Seas Expeditionary Force on August 27, 1915. He stood five feet five inches tall, had dark blue eyes and gray hair, was single, and recorded his trade or calling as clerk. He originally recorded no next-of-kin, but it was later changed to Mrs. E. Seveft, of 24 Prospect Avenue, London, Ontario. Daniel enlisted with the 70th Battalion, CEF, but by late October 1915, he was a member of the 33rd Overseas Battalion, Canadian Expeditionary Force. Daniel embarked overseas from Halifax bound for the United Kingdom on March 13, 1916 aboard the *S.S. Lapland*.

He arrived in England on March 26, 1916. Five weeks later, on May 6, 1916, he was taken on strength into the 36th Battalion, stationed at Shorncliffe. Just over two months later, on July 17, 1916, Private Daniel Manning became a member of the Canadian Infantry, 1st Battalion, Western Ontario Regiment. The next day, he arrived in France with the 1st Battalion.

Private Daniel Manning was thrust into fighting in France during the **Battle of the Somme** (July 1-November 18, 1916)--one of the most futile and bloody battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

Less than two months after arriving in France, on the night of September 10, 1916, Private Daniel Manning was wounded by shrapnel while in action during the Battle of the Somme. He was taken to a dressing station and then to No. 21 Casualty Clearing Station, but passed away there the following day, the result of wounds received. His Circumstances of Death Register records him as; *Date of Casualty: 11-9-16. "DIED OF WOUNDS". Was wounded by shrapnel in the stomach while on a working party on the night of September 10th, 1916. He was taken to a dressing station, from there evacuated to No. 21 South Midland Casualty Clearing Station where he died the following day. Warloy-Baillon Communal Cemetery Extension, 5 miles West of Albert, France.* Daniel Manning, 32, is buried in Warloy-Baillon Communal Cemetery Extension, Somme, France, Grave VI.A.10. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always. SOURCES: C, D, E, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z

MANNING, Herbert John (G/9457)

Herbert John Manning was part of a truly patriotic family. Herbert's mother Marion had five brothers and thirteen brothers-in-law who served in the Great War. Harry Manning, the father of the family, along with four of his sons served in the War. Of Harry and his four sons who went to war, only Herbert made the supreme sacrifice.

Herbert John Manning was born in Colchester, Essex, England in January of 1891, the eldest son of Harry Samuel and Marion Manning. Marion (also spelled Mary Ann in early records) went by two maiden names: Marion Mayes – her mother's surname, and Marion Graves – her father's surname. Harry Manning was born in Barrow Green, Suffolk, England on December 9, 1868. In 1881, at the age of fourteen, Harry Manning was working as a farm labourer, alongside his sixteen year-old brother Albert and their father (Michael Manning) in Norfolk, England. Marion Mayes/Graves was born in Thurston, Norfolk, England in 1867. In 1881, at the age of fifteen, Marion Graves was working as a servant under a nurse in Surrey, England.

Harry Manning and Marion Mayes/Graves were married in 1890 in England and they had ten children together: Susanna Graves (born January 1886); Herbert John (born January 1891); William (born 1892); Cecil Francis (born April 8, 1893 or 94); Evelyn Sarah (born 1896, later married George Frederick Ferris, a soldier, on February 12, 1918 in Sarnia and would reside in Point Edward); Harry Frederick (born February 18, 1897 or 98); Alfred George (born August 21, 1899 or 1900 and later married Eva Butler on December 2, 1920 in Sarnia and would reside in Point Edward); Frederick Charles (born 1903, later married Beatrice Maude Herendeen on January 19, 1924 in Sarnia); Gladys Bertha (born 1907); and Frank (born 1909). Note: For a few of the birth years above, official Census records indicate different birth years.

In 1891, residing in Colchester, Harry Manning was a soldier with the British Army, Norfolk Regiment, and Marion Manning was employed as a tailoress, while raising two young children at the time: Susannah (age five) and Herbert (age three months). Ten years later, in 1901, the Manning family was residing in Greenwich, London, England – the household included parents Harry (a general labourer) and Marion, and their four boys: Herbert (age

ten), Cecil (age seven), Harry Jr. (age three) and Alfred (age seven months). In 1911, the Manning family was residing in Croydon, London, England and included parents Harry (general labourer) and Marion, and their children: Cecil (age seventeen, a painter), Evelyn (age fifteen), Harry Jr. (age thirteen), Alfred (age ten), Frederick (age eight), and Gladys (age four). In 1914, Harry and Marion Manning and several of their children---Frederick Charles, Gladys, Alfred George and Frank--emigrated from England to Canada. They ended up living in Point Edward, Ontario.

Marion Manning had five brothers, and thirteen brothers-in-law who served in the Great War (two of whom were killed in action). Marion also had a cousin who lost both legs and arms in the war. Showing her patriotism, she was quoted as saying, "I would enlist myself if I could." Harry Manning, along with four of his sons--Cecil Francis, Harry Frederick Jr., Alfred George and Herbert John--all served in the Great War. Harry and sons Cecil, Harry Jr. and Alfred all enlisted with in the Canadian Expeditionary Force, while Herbert John Manning enlisted in the British Forces.

Herbert's father **Harry Samuel Manning** had seen twelve years of service in the British Army, Norfolk Regiment while residing in England. On December 27, 1915, forty-seven-year-old Harry Manning enlisted in Sarnia in the Canadian Expeditionary Force, Lambton 149th Battalion. At the time, three of his sons--Cecil, Harry Jr. and Herbert--had already enlisted and were serving overseas. His fourth son enlisted one week after he did.

Harry recorded his birthdate as December 9, 1873, making himself five years younger than he was (so recruiters believed he was forty-two years old). He stood five feet seven inches tall, had hazel eyes and dark brown hair, and recorded his occupation as labourer, and his next-of-kin as his wife Marion, living in Point Edward (Victoria Avenue), Ontario. He advanced in rank from Private, to Lance Corporal, to Corporal and then Sergeant in mid-June 1916. Nine months later, he was transferred to No. 1 Special Service Company (S.S. Co.), CEF in mid-March 1917. All of his service was completed in London, Ontario. He was unable to go to France on account of his age. In January 1918, his services with S.S. Co. were no longer required. Sergeant Harry Manning, then recorded as forty-nine years old, was discharged on January 7, 1918 in London, Ontario.

The first Manning son to enlist was **Cecil Francis Manning**. The twenty-one-year-old Cecil enlisted in the Canadian Over-Seas Expeditionary Force on August 1914 in Watford. He was a farmer and had been employed (by Mr. W.H. Kenny) as a chauffeur in the city. Cecil enlisted again on September 22, 1914 in Valcartier, Quebec, becoming a member of the 1st Battalion, CEF. He stood five feet six inches tall, had blue eyes and light brown hair, was single, and recorded his occupation as painter, and his next-of-kin as his mother Marion Manning of R.R. #5, Kingscourt, Watford, Ontario. [Note: Cecil recorded his birth year as 1892; however census records list it as 1893 and 1894]. In early October 1914, Cecil embarked overseas bound for England aboard the *SS Laurentic*. In January 1915, Cecil was promoted to the rank of Lance Corporal, and three months later in France, in April 1915, he was promoted in the field to the rank of Corporal.

In early April 1915, the 1st Division of Canadians arrived at the Ypres salient battlefield in Belgium, an area known as Flanders. It would be here that the Canadians engaged in their first battle of the war, the Second Battle of Ypres, their baptism by fire. On April 24, 1915, Cecil Manning was gassed at St. Julian. Approximately seven weeks later, on June 15, 1915, Corporal Cecil Manning was wounded in action at Givenchy, France. He was injured by shrapnel in the left foot and was buried by a shell explosion. His disability was recorded as "gunshot wound, left foot, severe and neurasthenia". Cecil was in Boulogne Hospital for two days, then No. 8 Stationary Hospital, Wimereux, and then Red Cross Hospital at Broughty Ferry for three weeks, before he was transferred to Canadian Convalescent Hospital, Monks Horton in Kent where he remained for six weeks. He then reported to Dibatgate Camp where he was assigned light duty. In late September 1915, Cecil was transferred to the 36th Battalion at West Sandling, and in late October 1915, he was recommended for Home Service in Canada. Corporal Cecil Manning was discharged on June 10, 1916 in London, Ontario, declared medically unfit for service. After his discharge, Cecil returned to reside in Brixton, London, England.

Another one of Herbert's younger brothers, **Harry Frederick Manning Jr.**, enlisted in the Canadian Over-Seas Expeditionary Force on August 16, 1915 in Watford, becoming a member of the 34th Battalion, CEF. The eighteen year-old stood five feet seven inches tall, had light brown eyes and dark brown hair, was single, and recorded his occupation as farm labourer and his next-of-kin as his father Harry Manning, of R.R. #5, Kingscourt (Watford), Ontario. [Note: Harry Jr. recorded his birth year as 1897, however census records list it as 1897 and 1898]. On October 23, 1915, Harry Jr. embarked overseas bound for England aboard the *S.S. California*. Seven months later, on May 26, 1916, Private Harry Manning Jr. arrived in France as a member of the 2nd Battalion, Canadian Infantry and was then transferred to the 7th Battalion.

One month later, on July 25, 1916 at Ypres, Harry Manning Jr. was blown up by a mine explosion and was buried, causing shock and an injury ("contusion") on his right knee. He was taken to a field dressing station where his knee was bandaged and was then sent through a casualty clearing station to No. 14 General Hospital where his treatment included "hot fomentations". On July 29, 1916, he was sent back to England and admitted to Bagthorpe Military Hospital, Nottingham, as a result of his right knee contusion. He remained there for almost three months, until October 12, 1916, and was then transferred to the King's Canadian Red Cross Convalescent Hospital, Hampton Hill, where he remained for almost a month. He was finally discharged on November 9, 1916. Harry Jr. was then sent to the Canadian Record Office in London, England where he was assigned light duty. In July 1918, the military granted him permission to marry his wife Florence, who lived in Dartmouth Park Hill, Highgate in London, England. Harry Jr. arrived back in Canada in November 1918. He was discharged from service, declared medically unfit, on December 24, 1918 in London, Ontario. Harry Manning Jr. and his wife Florence Manning lived at Victoria Avenue, Point Edward.

Another one of Herbert's younger brothers **Alfred George Manning**, enlisted in the Canadian Over-Seas Expeditionary Force on January 3, 1916 in Sarnia, becoming a member of the 149th Battalion, CEF. He stood five feet one inch tall, had dark blue eyes and brown hair, was single, and recorded his address as Sarnia, his occupation as labourer and his next-of-kin as his mother Marion Manning, of 4 Grand Trunk House, Point Edward, Ontario. Alfred recorded his birthdate as August 21, 1897, when in fact it was August 21, 1899 or 1900, making himself at least two years older than he actually was. Recruiters thought he was 18 years old when he was actually 16 ½ years old. [Note: Alfred Manning recorded his birth year as 1897, however Census records list it as 1899 and 1900]. Private Alfred Manning served with the 149th Battalion until early March 1917. It was then that the Medical Officer recorded that Alfred Manning was underage ("was 17 on August 21st, 1916") and that he had flat feet, though it was recorded that Alfred, "has taken in all route marches and feet have caused no trouble. Some marches were fifteen to twenty miles long. Has reported sick three times in fourteen months service for minor disabilities."

Four months later, on July 26, 1917, Alfred Manning was transferred to the Special Service Company, Class "A". One year later, in early August 1917, he was again recorded as underage ("will be 18 on August 21st 1917"), and as having "flat feet", which were "painful on route marches of five miles or more or when standing in one position any length of time." Approximately two months later, on October 25, 1917, the eighteen year-old Private Alfred Manning arrived in England as a member of the Canadian Forestry Corps. He served there for the duration of the war and returned to Canada in late March 1919. Alfred Manning was discharged as "medically unfit" in April 1919.

Eldest son **Herbert John Manning** (born in Colchester, Essex, England in January of 1891) enlisted at the age of twenty-four with the British Forces in Battersea, Surrey, England in 1915. Herbert became a Sergeant with the Queen's (Royal West Surrey) Regiment, 10th Battalion, Regimental Number G/9457. In early May 1916, the Queen's Regiment, 10th Battalion (Battersea) landed in Havre, France and was engaged in various actions on the Western Front until the end of the war. This included the 1916 Battles of Flers-Courcelette and Transloy Ridges; the 1917 Battles of Messines, Pilkem Ridge, Menin Road and some time on the Italian Front; and the 1918 Battles of St. Quentin, Bapaume, Arras, Lys, Ypres and Courtrai.

Herbert Manning spent two years in the trenches before losing his life on March 27, 1918, during fighting near Arras, France. In early May of 1918, Herbert's mother Marion in Point Edward received a cablegram advising her that her son had fallen while in action.

Herbert John Manning was the only one of the family of five Mannings fighting in the Great War to pay the supreme sacrifice. Their patriotism was outstanding. Herbert John Manning, 27, is memorialized on the Arras Memorial, Bay 2, Pas de Calais, France. Herbert's parents, Marion Graves Manning (passed away in September 1938) and Harry Samuel Manning (passed away in 1955) are both buried in Lakeview Cemetery in Sarnia. SOURCES: A, B, C, F, N, 2D, 2G, 8X, 10Z

McDONALD, Albert Alexander (#3131667)

For Mary McDonald, the loss of her son had to have been particularly devastating. Four years prior to the start of the war, she lost her husband of twenty years. In the final year of the war, her son Albert, was drafted for military service. While fighting in the Hundred Days Campaign, in the closing months of the war, Albert McDonald was killed in action by enemy shrapnel. Albert was Mary's only son.

Albert McDonald was born in Bosanquet, Lambton County, Ontario, on January 5, 1894, the only son of

Alexander (born 1861, a farmer) and Mary (nee Perkins, born June 15, 1873) McDonald. In April 1890, twenty-nine-year-old Alexander McDonald (a labourer at the time, the son of James and Sarah McDonald) married eighteen year-old Mary Perkins (the eldest daughter of Albert and Margaret Perkins) in Petrolia. Alexander and Mary McDonald resided in Courtright for a time, and later 216 Essex Street, and then 237 Bright Street, Sarnia. They had three children together: son Albert, and daughters Edna Mary (born 1895, married Howard Thomas Chambers on November 5, 1913 in Sarnia), and Sarah Jane (born 1898, married Howard Stubbs on January 20, 1920 in Sarnia). When Albert was sixteen years old, he lost his father Alexander, who died in 1910 at the age of forty-nine.

Prior to his service, Albert McDonald was employed for two years in the butcher shop of W.J. Laughlin, North Front Street. In Europe, with the Canadian troops thinning at an alarming rate and no end to the war in sight, the government instituted the Military Service Act in 1917. At the age of twenty-four, Albert was drafted under the Military Service Act of 1917, Class One. He underwent his medical examination in Sarnia on October 29, 1917 and was called to service on January 9, 1918, reporting to the 1st Depot Battalion, Western Ontario Regiment in London, Ontario. He stood five feet eight and a half inches tall, had blue eyes and brown hair, was single and lived at 121 Collingwood Street, Sarnia at the time. He recorded his trade or calling as butcher, and his next-of-kin as his mother Mary McDonald, living in Courtright, Ontario. Albert embarked overseas bound for the United Kingdom on February 5, 1918 aboard the *S.S. Grampian*.

Private Albert Alexander McDonald

Albert arrived in England on February 16, 1918, and became a member of the 4th Reserve, stationed at Bramshott. Approximately three and a half months later, on June 1, 1918, he became a member of the Canadian Infantry, 18th Battalion, Western Ontario Regiment, with the rank of Private. He arrived in France soon after and within two months found himself part of Canada's Hundred Days Campaign.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km.

The second offensive in Canada's Hundred Days Campaign was the **Battle of Arras and Breaking the DQ Line** in France (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line, a series of strong defensive trenches and fortified villages. General Sir Julian Byng called the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line “*the turning point of the campaign*”, but it came at a cost of 11,400 Canadian casualties.

Less than three months after joining the 18th Battalion, on August 28, 1918, Private Albert McDonald was killed in action by enemy shrapnel while fighting in the 2nd Battle of Arras. Several weeks later, in mid-September of 1918, Albert's mother, Mary on Essex Street in Sarnia, received a telegram informing her that her son, PTE. ALBERT MCDONALD HAD BEEN KILLED IN ACTION ON AUGUST 28TH. Albert McDonald's Circumstances of Death Register records him as: *Date of Casualty: 28-8-18. "KILLED IN ACTION". Was hit in the body by shrapnel and killed, during military operations near Vis-en-Artois in front of Arras. Vis-en-Artois British Cemetery, France.*

Albert McDonald, 24, is buried in Vis-En-Artois British Cemetery, Haucourt, Pas de Calais, France, Grave I.B.33. On his headstone are inscribed the words, FAITHFUL UNTO DEATH. In Pinehill United Cemetery in Thedford, there is a headstone that marks the graves of Albert's parents Alexander and Mary McDonald. Inscribed on the headstone are the words, McDONALD ALEXANDER 1861-1910 HIS WIFE MARY PERKINS 1872-1940 PTE ALBERT A. 1894-1918.

McGIBBON, David Hegler (#152600)

Before the war started, David's mother Agnes McGibbon was already a widow and was raising three teenagers on her own. When war came, her two sons that were old enough to fight did just that. Her middle son, David, became a member of the Royal Flying Corps that at the time was a new and highly dangerous endeavor. Two months after arriving in England, David McGibbon lost his life in a flying accident.

David Hegler McGibbon was born in Sarnia, on November 4, 1897, the middle son of David Christie and Agnes Ada (nee Ferguson) McGibbon. Twenty-nine-year-old David Christie McGibbon (born July 26, 1865 in Halton County, Ontario) married twenty-four-year-old Agnes Ferguson (born October 20, 1871 in Ingersol, Ontario) on June 20, 1894 in Ingersol. David was a lumber merchant, like his father, residing in Sarnia at the time of his marriage. David Sr. and Agnes McGibbon had three children together, all boys: Finlay Ferguson (born June 22, 1895); David Hegler; and Kenneth Charles (born December 22, 1901). The McGibbon family lived at 366 Christina Street in Sarnia. At the age of twelve, David lost his father David McGibbon Sr., who passed away in Guelph on August 15, 1910 at the age of forty-five.

David's older brother **Finlay Ferguson McGibbon** also served in the war. The twenty-one-year-old Finlay McGibbon enlisted in the Canadian Over-Seas Expeditionary Force on May 1, 1916 in Toronto, becoming a member of the 92nd Battalion. He stood five feet six and a half inches tall, had blue eyes and fair hair, was single, and lived in Sarnia with his widowed mother and his two brothers. Finlay recorded his trade or calling as advertisement writer, and his next-of-kin as his mother Mrs. D.C. McGibbon at 363 Christina Street, North, Sarnia (later changed to 366 Christina St.). He also recorded that he was a member of the Active Militia, 27th Regiment. On May 20, 1916, Private Finlay McGibbon embarked overseas aboard the *SS Empress of Britain*. He arrived in England nine days later.

Three months later, on August 27, 1916, Finlay McGibbon departed England bound for France, a Sergeant with the 15th Battalion, Canadian Infantry. He was soon part of the Battle of the Somme (July 1-November 18, 1916), one of the bloodiest and most futile battles in history. Just over two months after arriving, in early November 1916, Finlay was evacuated to a field ambulance suffering from influenza and a sprained back. By the end of that month, he was returned to England, and was finally discharged from hospital in April 1917. Finlay served the remainder of the war in England. He returned to Canada and was discharged in July 1919. Six years later, on June 25, 1925, Finlay McGibbon (an insurance broker) married Catharine Eliza Langdon (a graduate nurse) in Toronto.

In mid-1917, one year after his older brother Finlay had enlisted, nineteen year-old **David Hegler McGibbon** enlisted. David McGibbon became a member of the Air Force, Royal Flying Corps, 42nd Training Squadron, with the rank of 2nd Lieutenant.

Flying, still in its infancy, was extremely dangerous. The wooden-framed planes were flimsy and equipping the light aircraft with heavy weaponry was problematic. The demands of war meant that pilot training was often cursory. Many recruits had only a few hours of instruction before being expected to fly solo; consequently, more pilots died from accidents and mechanical failure than from enemy fire. By war's end, almost a quarter of all British flyers were Canadian. Of 6,166 British Empire air service fatalities, 1,388 were Canadian. An additional 1,130 Canadians were wounded or injured, and 377 became prisoners of war or were interned.

Only in England for about two months, on September 15, 1918, David McGibbon lost his life in a flying accident. In late September 1918, the sad news of Flight Lieutenant David McGibbon's death was received in Sarnia via two telegrams: one from the Secretary of Air Ministry, London, England; the other from Major James G. Merrison. Besides expressions of sympathy, the messages contained very little information beyond the fact that David had been killed in an airplane accident on September 15th.

David Hegler McGibbon, 20, was buried on September 22, 1918 in St. Gregory and St. Martin Churchyard, Wye, Kent, United Kingdom, Grave 125. On his gravestone are inscribed the words, IN LOVING MEMORY OF 2ND LIEUT. D.H. McGIBBON, R.A.F. SARNIA, CANADA. KILLED IN A FLYING ACCIDENT SEPT 15TH 1918. AGED 20 YEARS & 10 MONTHS. Both of David's parents, David Christie McGibbon (passed away in 1910), and Agnes Ada McGibbon (passed away in 1940), are buried in Lakeview Cemetery, Sarnia. On the Sarnia cenotaph, David Hegler McGibbon's name is inscribed as H. Mc Gibbon. SOURCES: A, B, C, D, L, N, 2D, 2G, 7C, 8X, 8Y, 10Z

McINTOSH, Andrew (#124472)

Andrew McIntosh, at age thirty-two, was a railroad conductor in Sarnia when he decided to serve his country. Ten months later, in one of the most horrific battles in all of history, he was killed instantly during an attack when he was struck by an enemy shell. His body was never recovered and he is memorialized on the Vimy Memorial.

Andrew McIntosh was born in London, Ontario, on September 30, 1883, the son of Andrew McIntosh Sr. (born June 1855 in Melrose, Scotland) and Sophie McLarren (nee McPhee, born April 1858 in Inverness, Scotland) McIntosh. At some point, both Andrew McIntosh Sr. (as a child) and Sophie McPhee immigrated to Canada. In 1861, five year-old Andrew McIntosh Sr. was living in Goderich with his family, while Sophia McPhee was residing in Scotland.

On October 22, 1879, twenty-four-year-old Andrew McIntosh (Sr.) married twenty year-old Sophia McPhee in Hamilton, Ontario. At the time, Andrew was employed as a baggageman in Hamilton, and Sophia was residing in London, Ontario. In 1881, Andrew (Sr.) and Sophia, and their two young children at the time, were living in London, Ontario where Andrew was employed as a brakeman. Andrew Sr. and Sophia McIntosh had seven children together: Maggie (born February 15, 1879); Thomas (born January 1880); Andrew Jr.; Mary (born February 1885); Isabelle (born February 15, 1887); Raymond (born 1890); and Alexander (born January 3, 1893). When Andrew McIntosh Jr. was seventeen years old, he lost his father Andrew Sr., who passed away in December 1900 at the age of forty-five. By 1901, widowed Sophia McIntosh and her children had moved to Toronto.

Thirty-two-year-old Andrew McIntosh enlisted in the Canadian Over-Seas Expeditionary Force on November 16, 1915 in Sarnia. He stood five feet eight inches tall, had blue eyes and brown hair, was single, and lived in Sarnia at the time. He recorded his trade or calling as R.R. conductor, and his next-of-kin as his mother Sophia McIntosh, residing at 79 Ryerson Avenue, later changed to 224 Spadina Avenue, Toronto. Andrew became a member of the 70th Battalion, Canadian Expeditionary Force.

Andrew McIntosh embarked overseas from Halifax bound for the United Kingdom on April 24, 1916 aboard the *S.S. Lapland*. He arrived in England on May 5, 1916. Approximately six weeks later, on June 18, 1916, Andrew became a member of the Canadian Infantry, Central Ontario Regiment, 58th Battalion, with the rank of Private. The next day, he arrived in France with the 58th Battalion.

Within weeks, Andrew McIntosh found himself fighting in the **Battle of the Somme** in France (July 1-November 18, 1916)--one of the most futile and bloody battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

The second major offensive of the Somme battle was the week-long **Battle of Flers-Courcelette** (September 15-22). It was here where tanks made their first appearance in the war. The Battle was a stunning success for the Canadians, but it came at a cost of over 7,200 casualties. It was during this second major offensive of the Somme battle where Andrew McIntosh was killed in action.

Three months after arriving in France, on September 17, 1916, Private Andrew McIntosh was killed by an enemy shell during an attack in the Battle of Flers-Courcelette. His Circumstances of Death Register records him as; *Date of Casualty: 17-9-16. "KILLED IN ACTION". While taking part in an attack at Courcelette, he was instantly*

killed in the early morning of September 17th, 1916, by the explosion of a heavy caliber shell. No record of burial.
Andrew McIntosh, 32, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

McKENZIE, Walter Wake

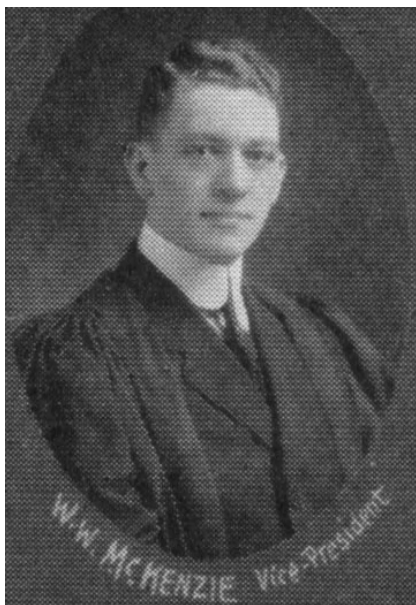

Walter McKenzie's parents were no doubt proud to see their only son go off to war but also somewhat uneasy. Walter at age 24, was a young doctor with a bright future ahead of him when he decided to serve his country. Nine months after arriving in England, he succumbed to illness there, the result of a serious brain disorder.

Walter Wake McKenzie was born in Point Edward, Ontario, on April 28, 1891, the only son of Thomas and Alice Emily (nee Wake) McKenzie. On June 20, 1888, Thomas McKenzie (born May 23, 1860 in Ireland, had immigrated to Canada in 1863) married Alice Wake (born October 4, 1867 in Point Edward) in Point Edward, Ontario. Thomas was employed as a fireman when he married, and later worked as a GTR engineer and a bursar at the Mercer Reformatory. Thomas and Alice McKenzie had two children together: Walter Wake and Frances Alice (born February 18, 1896 in Point Edward). Originally residing in Point Edward (in 1891) and then Sarnia (in 1901), the McKenzie family moved to Toronto in 1911.

Walter McKenzie received his early education in Sarnia public schools, and then attended Parkdale Collegiate, Toronto, and then University of Toronto Medicine (1909-14), becoming a physician. After graduating, Walter was on the medical staff of the Hamilton Insane Asylum for a year, becoming Vice President, Medical Society Staff, of the Hamilton Asylum.

Twenty-four-year-old Walter McKenzie enlisted in the Canadian Over-Seas Expeditionary Force on September 8, 1915 in Niagara, Ontario. He stood six feet two inches tall, had blue eyes and fair hair, and was single at the time. He recorded his trade or calling as physician, and his next-of-kin as his mother Mrs. Thomas McKenzie, living at 66 Melbourne Avenue, Toronto. Two months later, in November 1915, Doctor Walter McKenzie was promoted to Captain and Medical Officer of the 83rd Overseas Battalion, Canadian Expeditionary Force. Six months later, on April 1, 1916, he completed his Officers' Declaration Paper and was declared medically fit at Riverdale Barracks in Toronto. Captain Walter McKenzie of the 83rd Battalion, Canadian Army Medical Corps (CAMC) embarked overseas from Halifax bound for the United Kingdom on April 28, 1916 aboard the *S.S. Olympic*. He arrived in Liverpool, England on May 7, 1916.

In July 1916, Captain Walter McKenzie was attached to the 12th Battalion at West Sandling. Two months later, in mid-September 1916, after suffering a fainting attack, Walter spent eight days as a patient in the Shorncliffe Hospital with stomach trouble--gastritis. On October 10, 1916, he was transferred to the CAMC Training School (attached to the 83rd Battalion), at Shorncliffe Military Hospital. Two months later, in mid-December 1916, he spent nine days as a patient at Westcliff Eye and Ear Hospital in Folkestone due to tonsillitis.

Walter McKenzie, Univ. of Toronto yearbook

Captain Walter Wake McKenzie

In letters home to his parents, even in mid-January 1917, Walter said that he was doing well. In late January, the Director of the Shorncliffe Hospital cabled that Captain Walter McKenzie had taken seriously ill. In late January 1917, he was declared “permanently unfit for general service but fit for home service”. On February 17, 1917, he was admitted to the Shorncliffe Military Hospital recorded as “seriously ill--epilepsy”. Two days later, at approximately 12:30 p.m. on February 19, 1917, Walter McKenzie succumbed to the disease recorded as “cerebrospinal meningitis” at Helena Officers Hospital, Shorncliffe. Captain Walter McKenzie’s death was officially recorded as; *Date of Death: 19-2-17. Died. (Epilepsy) Helena Officers Hospital, Shorncliffe.*

Walter McKenzie, 25, is buried in Shorncliffe Military Cemetery, Kent, United Kingdom, Grave M.506. On his headstone are inscribed the words, HIS NAME LIVETH FOREVER. In Westminster Memorial Park in Toronto, a memorial marker indicates the location of Walter McKenzie’s parents’ graves. Inscribed on it are the words, MCKENZIE IN LOVING MEMORY OF THOMAS MCKENZIE MAY 23, 1860-NOV. 4, 1931 ALICE EMILY WAKE OCT. 4, 1867-APR. 1, 1955 WALTER WAKE MCKENZIE M.B. APRIL 28, 1891-FEB. 19, 1917 GONE BUT NOT FORGOTTEN.

McMULLIN, Leonard Calvin (#844831)

Leonard McMullin’s mother Irene, like thousands of Canadian parents who suffered, was forced to grieve without closure, the body of her teenaged son lying in an overseas grave she could never afford to visit. A single mom, her only son had been killed in the trenches of France in May 1918.

Immediately after the Great War ended Sarnians were debating how the city should honour its fallen soldiers. There were a number of different proposals including that of a more traditional monument--the proposal that Irene McMullin preferred. Late in November 1918 she penned a heartfelt letter to the editor of the *Canadian (Sarnia) Observer*. The powerful words of a grieving mother no doubt resonated with others. Three years after the end of the Great War, the Sarnia Cenotaph Memorial was unveiled.

Leonard Calvin McMullin was born in Bradshaw, Lambton County, Ontario, on November 28, 1898, the only son of William Claude (born April 1869) and Irene (nee Tiderington) McMullin. In 1881, both twelve year-old William McMullin and eleven year-old Irene Tiderington were residing in Bothwell, Ontario. On May 4, 1896, twenty-seven-year-old William McMullin married twenty-five-year-old Irene Tiderington in Wallaceburg, Ontario. Irene (born July 29, 1870 in Cayuga, Ontario) was the daughter of Archibald Tiderington (born September 1836 in Ontario, a blacksmith and later a farmer) and Elizabeth Tiderington (born May 1842 in Scotland).

William and Irene McMullin had only one child together, Leonard Calvin. Ontario Birth Records record Leonard’s middle name as Claude (and his father’s middle name as Claude). However, in all of Leonard’s military records, including his Attestation Papers and his own signature, Leonard recorded his middle name as Calvin. In 1901, Leonard’s father William was residing as a boarder in Chatham, employed as a carpenter, while Irene and Leonard were residing in Sombra with Irene’s parents Archibald and Elizabeth Tiderington. In 1914, Leonard’s parents William and Irene divorced. Irene McMullin would live at 418 South Vidal Street, and later 466 Davis Street, Sarnia.

Growing up in Sarnia, Leonard was an all-round athlete, a great reader and musician and a popular member and willing worker with Devine St. Methodist Church. At age seventeen, Leonard McMullin enlisted in the Canadian Over-Seas Expeditionary Force on February 4, 1916 in Sarnia. He stood six feet tall, had blue eyes and light brown hair, was single and lived on South Vidal Street with his divorced mother at the time. He recorded his trade or calling as labourer, and his next-of-kin as his mother Irene McMullin of 418 South Vidal Street, Sarnia. Leonard became a member of the 149th Battalion, Canadian Expeditionary Force with the rank of Private. Ten months later, on October 20, 1916, Leonard entered the military hospital in London where he spent forty-one days recovering from scarlet fever.

On March 28, 1917, Leonard embarked overseas from Halifax bound for the United Kingdom aboard the *SS Lapland*. Arriving in Liverpool, England on April 7, 1917, he moved to Bramshott Segregation Camp, and was then transferred to the 25th Reserve Battalion. Shortly after his arrival in England, Leonard wrote a letter to his mother Irene in Sarnia. Following is a portion of that letter:

Dearest Mama,

Just a line to let you know we arrived safe. We got into Liverpool about three...our ship had struck a mine in the bay outside the city and had a big hole put in the boat, but we got to the dock O.K. We started on the train

(some jittery it is, too) about an hour ago and I expect we will go to Bramshott. One fellow from the 244th Battalion, from Montreal was drowned and two hurt when the boat struck. It knocked me out of my bunk. We arrived at Bramshott Camp this afternoon at 4 p.m. and are quarantined for ten days so as to be sure that no disease is brought over 'ome from dear old Canada. A man of the 198th Buffs (I have their badge) fell down a hatch of one of the fleet of boats at Halifax and was killed. It is also said that 4 men have died from shock and hurts when the Lapland struck that mine.

The 186th Battalion arrived a little while ago, also the 246th Scots from Halifax, (I also have their badge) and we are all together. We are in tents, but after our ten days (C.B. the boys call it) we will be moved into huts across the road. This place is very much like Camp Borden. You might send me a cake and a pair of woolen mitts: the leather ones are cold.

Your boy, Leonard

Private Leonard C. McMullin

Seven months after arriving in England, on November 17, 1917, Leonard was transferred to the 4th Canadian Reserve Battalion at Bramshott. Four days later, on November 21, he arrived in France, initially posted to the 1st Battalion. Two weeks later, he became a member of the Canadian Infantry, Western Ontario Regiment, 18th Battalion, with the rank of Private.

Six months later, on May 25, 1918, Private Leonard McMullin lost his life in France--he was instantly killed in action by the concussion of a German trench mortar shell. Leonard McMullin's Circumstances of Death Register records him as; *Date of Casualty: 25-5-18. "Killed in Action". While sleeping in his funk hole in a front line trench, near Neuville Vitasse in the early morning of May 25th, 1918, he was killed by an enemy 'fish tail' bomb that dropped near him. Wailly Orchard Cemetery 3 ¼ miles South West of Arras, France.*

On June 6, 1918, Leonard's mother Irene in Sarnia received the following telegram from the Director of Records in Ottawa: DEEPLY REGRET TO INFORM YOU THAT 844831, PTE. LEONARD CALVIN MCMULLIN, INFANTRY, IS OFFICIALLY REPORTED KILLED IN ACTION ON MAY 25TH, 1918.

Not long after learning the news of the death of her only child, Irene McMullin wrote the following poem, which she submitted to the *Sarnia Observer*:

Somewhere in France

*"Somewhere in France," so weary, so faithful! "Innocence," dreaming whilst shells scream overhead;
Dreaming of Home and the Land of the Maple; Knapsack his pillow, the clay for his bed.*

*"Somewhere" in No Man's Land! God grant that mother, Never shall dream what we're bidden to do!
Stake we our life's blood, but leave for no other. Strenuous deeds which a soldier must do!*

*"Somewhere," a mother so lonely is waiting, Craving good tidings from over the sea;
Praying, "O God, should it be Thy good pleasure, Send my darling in safety to me."*

continued over...

*"Somewhere," in Heaven, past troubles and tears, For a voice, "Come, thou blessed," in mercy he heard,
'Neath his cross, khaki clad, fitting garb for our heroes, His dearly loved form now lies undisturbed.*

*"Somewhere in France" his life work has ended, As o'er parapets gleam the first rays of sun.
'Twixt boyhood and man, not a score yet of summers! Now peace, grand, eternal – a living "Well done."*

*Tho' poppies may fade, or the lark's wing grow weary, Mother love – oh so boundless – no living, no end!
Sleep well son! Dear Heart, we ne'er shall forget thee, For thy life thou hast given, for country and friends.*

Leonard McMullin, 19, is buried in Wailly Orchard Cemetery, France, Grave II.F.15. On his headstone are inscribed the words, THE ONLY SON OF HIS MOTHER HE LOVED HONOUR MORE THAN HE FEARED DEATH. On the Sarnia cenotaph, his name is inscribed as L.C. McMullen.

At the end of the Great War, debates ensued in Sarnia as to how the city would pay tribute to the fallen soldiers. Several suggestions for memorials were discussed and included the following: the planting of oak trees with metal plates inscribed with the names of the fallen; the building of some sort of community memorial building; and the erecting of some form of a monument.

Six months after her son's death, in late November 1918, Leonard's mother Irene wrote a letter to the *Canadian (Sarnia) Observer* expressing her preference. She was one of thousands of Canadian families who were forced to grieve without a body, or without an expensive overseas visit to a grave. Many thousands were unable to achieve the necessary closure so important to those who had never had a chance to say a proper goodbye. Following is Irene McMullin's heartfelt letter:

Editor Canadian Observer

Dear Sir,

May I speak for my boy? He is sleeping somewhere in France. I do want to tell you what I believe would please him, could he but speak. For some years prior to enlisting in Lambton's 149th O.S. Bn., he had taken great pleasure in the public library and the park surrounding it (Victoria Park) and since a memorial to the boys who will never return has been under discussion, my greatest comfort has seemed to centre there, and always I can picture to myself a monument of suitable design, bearing the names of all our city's fallen heroes, their graves beyond the reach of loving hands to tend and care for, with no mark save a temporary wooden cross.

Reader, have you a boy sleeping over there? If so, does not the little white wooden cross seem a frail thing? And many of our precious boys have not even that much. A granite monument would be a memorial which would withstand the elements for many generations to come and in that way would perpetuate their names as nothing else could. Also it would be something which the residents of our city and visitors as well, would have cause to admire and revere. Furthermore, if this proposed memorial to the boys who have lost their lives should take the form of a home, or a Y.M.C.A. or Y.W.C.A., it would be natural for the original motive to be lost sight of, within a few years.

There are already associations formed for the purpose of bringing comfort and pleasure to the returned heroes. We feel that they can never be fully repaid for their sacrifices and services for humanity. They are deserving of as good as can be produced, but our city and country are prosperous and wealthy, and can well afford to give our beloved dead a separate memorial.

In the years of the future, when one by one our returned heroes have gone to their reward in the Great Beyond, their earthly remains laid to rest beside their father and mother, perhaps, their names and record engraved upon the family monument, or possibly a gravestone of their very own (not only they but you and I together with all others who have known and loved and been loyal to our faithful armies) this proposed granite monument would still stand firm ever beaming the message of peace on earth.

The little white wooden crosses over there seem to send us the message "Do not forget us," though only wrapped in a blanket, perhaps and buried khaki clad, in a soldier's grave.

Thanking you, Mr. Editor for space and patience, I am

Yours truly,

The Mother of One, Mrs. Irene McMullin, 466 Davis Street.

In 1921, the Sarnia cenotaph was unveiled. That year, Irene McMullin was residing with her Scottish-born mother Elizabeth Tiderington at 118 Samuel Street, Sarnia. Their neighbour at 120 Samuel Street, was Charles Augustus Lester, a local painter. Irene McMullin no doubt visited the memorial with her son's name on it. She later remarried, at the age of fifty-six, on June 18, 1927, in Port Huron, Michigan to fifty-four-year-old Charles Augustus Lester (his third marriage). Irene and Charles Lester resided in Sarnia. On March 20, 1931, at the age of sixty, Irene

Lester (McMullin) passed away in Sarnia, the result of a cerebral hemorrhage. She was buried three days later in Bradshaw Cemetery in Sombra Township, Lambton County.

McMUTRIE, John A. (#53602)

British-born John McMutrie was a thirty-nine-year-old labourer working in Sarnia when he enlisted, an opportunity to return to his home and family and to serve his country. He fought for over a year in France, losing his life in one of the most horrific and prolonged battles in history. His body was never recovered and he is memorialized on the Vimy Memorial.

John McMutrie was born in Manchester, England, on July 3, 1875, the son of William Arnold McMutrie, of Regent Road, Salford, Manchester, England. At some point, John McMutrie immigrated to Canada, and took residence in Sarnia.

On November 2, 1914, thirty-nine-year-old John McMutrie enlisted in the Canadian Over-Seas Expeditionary Force in Sarnia, becoming a member of the 18th Battalion. He stood five feet eight and one-half inches tall, had brown eyes and black hair, was single, and recorded his trade or calling as labourer, and his next-of-kin as his father William McMutrie of Regent Road, Salford, England. John's next-of-kin was later changed to his niece, Mrs. Ellinor Cattermole of 37 Dalton Street, Salford, Lancashire, England. He also recorded that he had served three years with the militia. John McMutrie embarked overseas from Halifax bound for the United Kingdom on January 18, 1915 aboard the *SS Grampian*.

Eight months after his arrival in England, on September 14, 1915, John arrived in France, a member of the Canadian Infantry, Western Ontario Regiment, 18th Battalion, with the rank of Private. He served in France for over a year, including during the **Battle of the Somme** (July 1-November 18, 1916)--one of the most futile and bloody battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

The second major offensive of the Somme battle was the week-long Battle of Flers-Courcelette (September 15-22). It was here where tanks made their first appearance in the war. The Battle was a stunning success for the Canadians, but it came at a cost of over 7,200 casualties. In the days following this battle, John McMutrie was killed in action.

Thirteen months after his arrival in France, on October 3, 1916, Private John McMutrie lost his life in action during the Battle of the Somme. His Circumstances of Death Register records him as; *Date of Casualty: 3-10-16. "Killed in Action". TRENCHES AT COURCELETTE. No record of burial.*

After the war, John's medals and decorations were sent to his niece, Mrs. Ellinor Cattermole of Dalton Street, Salford, Manchester, England. John McMutrie, 41, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

MONTGOMERY, David Chester (#782092)

At Vimy Ridge in the spring of 1917, during the battle that helped define our nation, David Montgomery was severely wounded in action. Sixteen days later, the twenty-three-year-old passed away as a result of his wounds. He is buried in Etaples Military Cemetery in Pas de Calais, France. He was remembered by his seven brothers and sisters when they inscribed on his headstone, IN MEMORY OF OUR BELOVED BROTHER WHO DIED FOR HIS COUNTRY.

David Chester Montgomery was born in Kars, Carleton, Ontario (near Ottawa) on August 1, 1893, the youngest child of James and Harriet Irene 'Hattie' (nee Lee) Montgomery. On March 8, 1878, James Montgomery (born 1851, North Gower, Carleton, Ontario) married Harriet Irene Lee (born December 25, 1860, Marlborough Township, Carleton, Ontario) in Carleton, Ontario. In 1878 and 1881, James was supporting his family working as a farmer in North Gower, Carleton. James and Harriet Montgomery had eight children together: John Simpson (born June 16, 1878, later resided Rouleau, Saskatchewan); James Howard (born February 7, 1880, later resided Chaplin, Saskatchewan, and then Burnaby, B.C.); Laura Eva (born June 7, 1881, resided Carleton, and in April 1904 married blacksmith John Albert McEwen in Carleton); Ida May (born February 1, 1883, and in January 1907 married engineer Stephen James Martin in Ottawa, and later resided Calgary, Alberta); Violet Mabel (born October 29, 1884,

and in 1910 married Ellwood Phillips, and resided Regina, Saskatchewan, and then Sarnia); William Bower (born February 4, 1888, later resided Calgary, Alberta); Robert Henry (born February 26, 1889, later resided Calgary, Alberta) and David Chester.

In 1891, James and Harriet Montgomery and their seven children (David hadn't been born yet) were residing in Carleton District, Ontario, where father James was working as a tanner. Four years later, on October 19, 1895, when David Chester was only two years old, he lost his father, James, who had an accidental death at the age of forty-four. Six years later, in 1901, widowed Harriet Montgomery, the head of household, and her eight children were still residing in Carleton District. Several of her children were now working: John was employed as a farm labourer; James was a carpenter; Laura Eve was a tailor; and Ida was employed as a servant. Tragedy struck the Montgomery family again in March 1907 when Harriet passed away in Carleton at the age of forty-six, the result of pneumonia. For David, now thirteen years old, he had now lost both of his parents.

David's older brother, Robert Henry Montgomery, at the age of twenty-six, enlisted in the Canadian Over-Seas Expeditionary Force on August 2, 1915 in Calgary, becoming a member of the 56th Battalion, CEF. Private Robert Montgomery, still a recruit, was struck off service after only two months. Despite his six foot frame, he was deemed "not likely to become an efficient soldier" by both the Medical Officer and Approving Officer. He was discharged on October 2, 1915 at Sarcee Camp (near Calgary). Four months after Robert Montgomery was discharged, his younger brother David Montgomery enlisted.

David Chester Montgomery's name is inscribed on the Sarnia cenotaph--the following is his link to Sarnia: David's sister Violet Mabel Montgomery married Ellwood Stewart Phillips (of Watford, Ontario) in Moose Jaw, Saskatchewan on July 12, 1910. By 1919, Violet and Ellwood Phillips were residing on Errol Road West in Sarnia. Violet and Ellwood had six children together: Franklin James, Stewart Lee, Harry Ardiel, Alexander Ellwood, Dorothy Caroline and Irene Pearl Phillips (the latter two were born in Sarnia). Violet (nee Montgomery) Phillips was very close to her younger brother David, who spent some time living in Sarnia with his sister before he moved out west to live with his brother James.

Ellwood and Violet Phillips remained and raised their family in Sarnia. Ellwood Phillips passed away in 1941, and Violet Phillips passed away in 1970, and both are buried in Lakeview Cemetery, Sarnia. Of note, Ellwood Avenue in Sarnia is named after Ellwood Stewart Phillips. Of Ellwood and Violet Phillips six children, two served during World War II. Their first child, Franklin James Phillips, served in the Royal Canadian Air Force. Their second child, Stewart Lee Phillips, served in the 4th Anti-tank Regiment, part of the 5th Canadian Armoured Division, seeing action in North Africa, Italy, Holland and Germany. An accomplished athlete, in 1988, Stewart Lee Phillips was inducted into the Sarnia-Lambton Sports Hall of Fame.

Twenty-two-year-old David Montgomery enlisted in the Canadian Over-Seas Expeditionary Force on February 9, 1916 in Moose Jaw, Saskatchewan. He stood five feet nine inches tall, had blue eyes and dark brown hair, was single, and lived in Avonlea, Saskatchewan at the time. He recorded his trade or calling as a hardware salesman, and his next-of-kin as his brother James Howard Montgomery in Chaplin, Saskatchewan. David became a member of the 128th Overseas Battalion, Canadian Expeditionary Force. Six months later, on August 15, 1916, David embarked overseas from Halifax bound for the United Kingdom aboard the *S.S. Grampian*.

Private David Montgomery arrived in Liverpool, England on August 24, 1916. Just over three months later, on December 5, 1916 at Bramshott, he became a member of the Canadian Infantry, 49th Battalion, Alberta Regiment. The next day, he arrived with the 49th Battalion in France. Two months later, in mid-February 1917, David Montgomery and his battalion along with the rest of the Canadian Corps made their way to an area in northern France dominated by a long hill known as Vimy Ridge.

The **Battle of Vimy Ridge** (April 9-12, 1917) was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The first day of the battle, April 9, 1917, was the single bloodiest day of the entire war for the Canadian Corps and the bloodiest in all of Canadian military history. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps, and significant victory for Canada, the battle later referred to as "the birth of a nation". Of the 97,000 Canadians who fought at Vimy Ridge, approximately 7,004 were wounded and 3,598 were killed in four days of battle.

On April 10, 1917, Private David Montgomery was wounded in action by enemy gunfire at Vimy Ridge.

That day, he was admitted to No. 24 General Hospital, Etaples with a “gun shot wound face, fracture base of skull and gun shot wound leg”. Twelve days later, on April 22, he was reported, “dangerously ill (GSW. Fract. base skull & GSW leg)”. On April 26, 1917, Private David Montgomery lost his life as a result of the wounds he received in action. His death was recorded as, “Previously reported dangerously ill now died of wounds received in action – GSW. Frac. Base Skull, 24 General Hospital, Etaples.” His Circumstances of Death Register records him as; *Date of Casualty: 26-4-17. “Died of wounds” (Gunshot Wound Fracture Base Skull) at No. 24 General Hospital, Etaples. Etaples Military Cemetery, France.*

Private David Chester Montgomery

David Montgomery, 23, is buried in Etaples Military Cemetery, Pas de Calais, France, Grave XVIII.A.3. On his headstone are inscribed the words, IN MEMORY OF OUR BELOVED BROTHER WHO DIED FOR HIS COUNTRY.

NASH, Harold (#123209)

Harold Nash, 19, and his brother Frank, 23, immigrated together from England destined for Sarnia where they planned to work as farmers. In September 1915, the brothers left their good jobs at Imperial Oil and enlisted together to serve their country. They embarked overseas together in the same ship and trained together in England. They arrived in France one week apart and both fought in one of the most horrific battles in all of history. Both brothers were seriously wounded on the Somme battlefield, one survived, the other did not.

Harold Nash was born in Great Missenden, Buckinghamshire, London, England, on August 3, 1893, the son of Thomas and Alice Ruth (nee Fulford) Nash, of Buckinghamshire, England. On September 18, 1881, Thomas Nash (the son of a blacksmith, born January 1860) married Alice Ruth Fulford (born January 1861) in Great Missenden, Buckinghamshire, England. Thomas and Alice Nash had thirteen children together: Thomas William (born April 1883); Sarah Maria (born December 1884); Lucy (born April 1888); Frank (born March 7, 1890); Kirby (born July 1891); Harold; Alice Julia (born January 1896); Charles (born July 1898); Dorothy (born August 1899); Oscar (born April 1901, passed away in January 1903 before the age of two); Esther Ruby (born October 1902); Walter (born April 1904); and Mervyn (born August 1905).

In October 1910, when Harold was seventeen years old, he lost his father Thomas who died in England at age fifty. In the spring of 1911, widowed Alice Nash was still residing in Buckinghamshire, England, along with her children Frank, Harold, Charles, Dorothy, Esther Ruby, Walter and Mervyn. Two of her sons, twenty-two-year-old Frank and fourteen year-old Harold were both employed as gardeners.

In the early part of 1913, nineteen year-old Harold and his older brother Frank (age twenty-three), both immigrated to Canada. They departed from Liverpool, England aboard the *SS Tunisian* and arrived in Halifax on March 30, 1913. They both recorded their intended destination as Sarnia; their occupations as gardeners; and their intended occupations as farmers. Harold and Frank Nash lived at 189 Ross Avenue in Sarnia.

Years later, almost four years after the end of the Great War, the youngest Nash sibling, Mervyn Nash, would also immigrate to Canada. Sixteen year-old Mervyn Nash, with \$10 in his pocket, arrived as a 3rd Class passenger aboard the *SS Andonia* at Quebec in June 1922 (his passage was paid for by the Salvation Army). Mervyn recorded his intended occupation as farm work and he came to live in Sarnia. Unfortunately, ten months after his arrival in the country, on April 27, 1923, Mervyn Nash passed away at Sarnia General Hospital at the age of seventeen. His death was due to Landry's ascending paralysis, and he is buried at Lakeview Cemetery in Sarnia.

On September 10, 1915, both Harold Nash and his brother Frank enlisted in the Canadian Over-Seas Expeditionary Force in Sarnia. Both Nash brothers gave up good positions at Imperial Oil Company to enlist and to serve their country. Their widowed mother, Alice, still in England, now had four sons serving in the Great War. Besides Harold and Frank, two others were already fighting in the trenches in France.

Twenty-five-year-old **Frank Nash** enlisted in the Canadian Over-Seas Expeditionary Force on September 10, 1915 in Sarnia. He stood five feet nine inches tall, had dark blue eyes and brown hair, was single, and recorded his trade or calling as fireman, and his next-of-kin as his mother Alice Nash at Great Kingshill, Buckinghamshire, England. He became a member of the 70th Overseas Battalion, Canadian Expeditionary Force. Seven months later, on April 24, 1916, Private Frank Nash embarked overseas from Halifax bound for the United Kingdom aboard the *S.S. Lapland*. He arrived in Liverpool, England on May 5, 1916 and was soon training at Shorncliffe, where on July 6, 1916 he was transferred to the 39th Battalion. Three months after arriving in England, on August 10, 1916, Private Frank Nash was transferred to the 18th Battalion, and two days later he arrived in France.

Frank Nash soon found himself in the Battle of the Somme (July 1-November 18, 1916)--one of the bloodiest and most futile battles in history, a battle that lasted for more than four brutal months. Approximately six after arriving in France, on September 30, 1916, Private Frank Nash was wounded in action by shrapnel at the Somme. He was first taken into a dug-out, and then a field ambulance where his wounds were dressed. The next day, he was taken to a Casualty Clearing Station where he was operated on, and shrapnel was removed. He was then admitted to #10 General Hospital in Rouen with "gun shot wound buttock, left thigh, face, dangerously ill". He remained in various hospitals for close to ten months, including Springburn Woodside Hospital in Glasgow; King's Canadian Red Cross Convalescent in Bushy Park; and Canadian Convalescent Hospital Bearwood in Wokingham, where he would undergo two further operations (haemorrhage and abscess), treatment and convalescing.

Frank Nash was finally discharged from hospital in late June 1917, though his wounds prevented him from returning to the Front. He remained on duty in England for the duration of the war, at Bearwood, Shorncliffe and Orpington. In early March 1918, he was granted permission to marry. On March 13, 1918, Frank Nash married Lucy Rosina Gray (born May 1889 in Paddington, London, England) at St. Columb Church in Notting Hill, London, England. Frank and Lucy Nash's first child, Irene Nash, was born June 17, 1919 in London, England.

In mid-March 1919, Frank was admitted to Canadian General Hospital, Orpington, to receive further treatment for his "debility", that included partial loss of function of his left leg--a permanent condition. He was discharged from the hospital three months later. In July 1919, he was discharged from military service in London, England on demobilization. After being discharged, Frank returned to life in Sarnia, initially residing at 153 Essex Street. His wife Lucy Nash and their daughter Irene immigrated to Sarnia in 1919. The following year, Lucy's parents, her two sisters and her brother also immigrated to Canada and moved to Sarnia. In 1921, Frank Nash, employed as a fireman, and Lucy Nash, along with their daughter Irene, were residing at 228 Maria Street, Sarnia. Residing with them were Lucy's parents Walter and Florence Gray; her sisters Amy (age twenty) and Florence (age nine); and her brother Frederick Gray (age twelve).

Twenty-two-year-old **Harold Nash** enlisted in the Canadian Over-Seas Expeditionary Force on September 10, 1915 in Sarnia (along with his older brother Frank). He stood five feet nine and one-quarter inches, had blue eyes and brown hair, was single, and recorded his trade or calling as stationary engineer, and his next-of-kin as his mother Alice Nash at Great Kingshill, Buckinghamshire, England. He became a member of the 70th Overseas Battalion, Canadian Expeditionary Force. Private Harold Nash and his brother, Frank, embarked overseas from Halifax bound for the United Kingdom on April 24, 1916 aboard the *S.S. Lapland*.

Harold Nash arrived in Liverpool, England on May 5, 1916 and was soon training at Shorncliffe where on July 6, 1916 he was transferred to the 39th Battalion at West Sandling, along with his brother. Six weeks later, on August 20, 1916, Private Harold Nash arrived in France as a member of the 39th Battalion (his brother Frank had arrived one week earlier with the 18th Battalion). The next day, Harold became a member of the Canadian Infantry,

73rd Battalion, Quebec Regiment.

Like his brother Frank, Harold Nash soon found himself in the Battle of the Somme (July 1-November 18, 1916)--one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

Frank Nash was seriously wounded by shrapnel on September 30 at the Somme, and though he survived, his war was over. For Harold Nash, approximately six weeks after arriving in France, on October 4, 1916, during the Battle of the Somme, he completed his Military Will on page twenty of his Pay Book. In it he wrote, "In the event of my Death I give the whole of my property & effects to my Mother – Mrs. Alice Nash, Hatches Lane, Gt. Kingshill Near High Wycomb, Bucks, England."

Harold Nash survived the Battle of the Somme, but not for much longer. One month after the "end" of the Battle of the Somme, Private Harold Nash was wounded by enemy gunfire while fighting in the area of the Somme. On December 26, 1916, Harold was admitted to No. 23 Casualty Clearing Station recorded as, "DANGEROUSLY WOUNDED". Two days later, Private Harold Nash was recorded as "DIED OF WOUNDS. Dec. 28th, 1916, at No. 23 C.C.S.. Nature of Casualty ascertained to be gun shot wound right arm & abdomen." His Circumstances of Death Register records him as; *Date of Casualty: 28-12-16. "DIED OF WOUNDS" (Gun Shot Wounds Right Arm, and Abdomen) at No. 23 Casualty Clearing Station. Lapugnoy Military Cemetery, 5 miles West of Bethune, France.*

Four years after Harold Nash's death, in December 1920, his widowed mother Alice Nash passed away in Buckinghamshire, England at the age of fifty-nine. Harold Nash, 23, is buried in Lapugnoy Military Cemetery, Pas de Calais, France, Grave II.A.4.

NICHOL, Donald Lee (#1045461)

Donald Nichol was just eighteen years old when he made the decision to serve his country. Unfortunately he never had the chance to serve overseas. Only three months after enlisting, he was in hospital suffering from an infection. Three months after that he lost his life the result of pneumonia. He is buried in Woodland Cemetery in London, Ontario, alongside his mother and father.

Donald Lee Nichol was born in Sarnia, Ontario on March 31, 1898, the son of Reverend Frank Ormiston and Margaret Shaw (nee Brown, born April 17, 1866) Nichol. Reverend Frank Nichol (born March 12, 1866 in Brantford, Ontario) was a Presbyterian clergyman of Scottish descent who worked for a time at St. Andrew's in Amherstburg, Ontario. On July 15, 1891, twenty-five-year-old Rev. Frank Nichol married twenty-six-year-old Wilhelmina Minnie Manson in Port Hope, Ontario. A little over one year later, on August 5, 1892, Wilhelmina passed away.

On September 26, 1894, Rev. Frank Nichol remarried, to Margaret Shaw Brown in Austin, Illinois. Rev. Frank and Margaret Nichol had five children together: Arthur (born July 11, 1895 in Sarnia); Donald Lee; Frances (born December 1902); Ewart Gordon (born December 21, 1904 in Bruce); and Norman Grant (born December 5, 1911 in Middlesex). In 1901, the Nichol family was living in Greenock, Bruce, Ontario, and ten years later, in 1911, they were residing in Delaware, Middlesex Township.

Eighteen year-old Donald Nichol enlisted in the Canadian Over-Seas Expeditionary Force on November 3, 1916 in Windsor, Ontario. He stood five feet eight inches tall, had blue eyes and brown hair, was single, and lived at 14 Windermere Road in Walkerville, Ontario at the time. He recorded his trade or calling as a clerk, and his next-of-kin as his father Frank who lived in Amherstburg, Ontario. Donald Nichol became a member of the Canadian Infantry, 241st Overseas Battalion, Quebec Regiment, Canadian Expeditionary Force.

Private Donald Nichol did not have the opportunity to serve overseas. Three months after enlisting, on February 9, 1917, he was admitted to Wolseley Barracks Hospital suffering from otitis media (an infection causing inflammation in the middle ear). He was later transferred to Victoria Hospital in London. Approximately three months after being admitted to Wolseley Barracks Hospital, on May 6, 1917, Private Donald Nichol of the 241st Battalion, lost his life at Victoria Hospital, in London, Ontario.

The Circumstances of Casualty Register records Donald Nichol's death as; *Date of Death: 6-5-17. London, Ontario Victoria Hospital. Circumstances of Death: Pneumonia – Admitted to Hospital 15-2-17 from Wolseley Barracks Hospital where he had been admitted 9-2-17 for Otitis Media. Received every care and attention.*

Woodland Cemetery, London, Ontario. NOTE: In Donald Nichol's Personnel File, the Veterans Death Register, and the Ontario Death Records, his death date is (incorrectly) recorded as April 6, 1917. Nineteen year-old Donald Nichol is buried in London (Woodland) Cemetery, London, Ontario, Grave 194. Section N. On the Woodland Cemetery grave registration report, the date of Donald Nichol's death is correctly recorded as May 6, 1917.

Eight months after Donald's death, on January 24, 1918, his father Rev. Frank Nichol passed away in Amherstburg at the age of fifty-one, the result of cancer. Rev. Frank Nichol is buried alongside his son Donald in Woodland Cemetery, London. In 1921, Donald's fifty-six-year-old widowed mother Margaret Nichol was residing at 166 North Vidal Street in Sarnia, along with her children: Arthur (age twenty-five, employed as a messenger); Frances (age eighteen, a student); Ewart (age sixteen, a student); and Norman (age nine, a student). In December 1947, Donald's mother Margaret Nichol passed away at the age of eighty-one. She is buried alongside her husband Frank and son Donald Lee Nichol.

NOEL, Urban Joseph (#226970)

Urban Noel arrived at the front lines in France only one month after his brother-in-law had been killed there in the trenches. Ten weeks later, Urban was killed by enemy gunfire during an attack at the Battle of Amiens. The Battalion Chaplain who was beside him later described Urban as a noble soldier and a good devout Practical Catholic.

Urban Joseph Noel was born in Bay City, Charlevoix, Michigan, on August 3, 1896, the son of Francis "Frank" P. and Marie Amanda "Maud" (nee Beaudoin) Noel. Frank Noel (born May 23, 1865 in Quebec) married Maud Beaudoin (born March 9, 1868 in Quebec) on July 6, 1886 in Bay City, Michigan. Frank and Maud Noel had eleven children together: Maud Grace (born November 1888 in Michigan); Francis "Frank Jr." (born July 1889); Bertha (born June 1892 in Michigan); Laura (born June 1894 in Michigan); Urban Noel; Eva (born June 1898 in Michigan); Della (born May 10, 1900 in Michigan); Rita Belle (born February 4, 1902 in Ontario); Thelma Margaruite (born January 1, 1904 in Lambton); Verna (born May 31, 1908 in Sarnia); and Norma (born May 1911). In 1900, the Noel family was residing in Munising Township, Alger, Michigan where Frank Sr. was employed as a "day labourer". By 1904, the Noel family had moved to Sarnia, living at 109 Collingwood Street and later 174 Cotterbury Street, Sarnia. In May 1910, thirteen year-old Urban Noel was confirmed at Our Lady of Mercy Catholic Church, Sarnia.

In September 1908, Urban's older sister, Maud Grace, married Percival Guertin in Sarnia. Like Urban, Percival Guertin also served in the Great War. Percival lost his life during fighting in the trenches of France in April of 1918. He is memorialized on the Vimy Memorial and on the Sarnia cenotaph. (Percival Guertin's story is included in this Project on page 289).

Twenty year-old Urban Noel enlisted in the Canadian Over-Seas Expeditionary Force on May 29, 1917 in Hamilton, Ontario. He stood five feet five and a half inches tall, had blue eyes and light brown hair, was single, and was living in Peterborough, Ontario at the time. He recorded his trade or calling as machinist, and his next-of-kin as his father Frank Sr., living at 226 Balcom Street in Eau Claire, Wisconsin, USA. Urban became a member of the Depot Regiment, Canadian Mounted Rifles, Canadian Over-Seas Expeditionary Force.

Urban Noel embarked overseas from Halifax bound for the United Kingdom aboard the *SS Scandinavian* on October 20, 1917. He arrived in Liverpool, England on November 1, 1917 and was transferred to the 8th Reserve Battalion the next day, stationed at Shorncliffe. Five months later, on April 7, 1918, Urban became a member of the Canadian Infantry, 102nd Battalion, Central Ontario Regiment, with the rank of Private. Two days later, Urban arrived in France at the Canadian Corps Reinforcement Camp (CCRC). Just over one month later, on May 20, 1918, Private Urban Noel arrived at the front lines with the 102nd Battalion.

Just over two months after arriving at the front, Urban found himself taking part of the last campaign of the war. The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the "beginning of the end" of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in Canada's Hundred Days Campaign was the **Battle of Amiens** in France (August 8-14,

1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians advanced nearly 14 km--but it came at a cost of 11,822 Canadian casualties.

Approximately ten weeks after arriving at the front lines, on August 8, 1918, Private Urban Noel was killed by enemy gunfire during an attack at the Battle of Amiens. His Circumstances of Death Register records him as; *Date of Casualty: 8-8-18. “Killed in Action.” He took part with his Company in an attack and when emerging from Beaucourt Wood he was hit in the head by a bullet and killed, between the first and second objective. Cemetery: Beaucourt Churchyard, 3 ½ miles East of Moreuil, France.*

In September 1918, Frank Sr. and Maud Noel at 174 Cotterbury Street in Sarnia, received a letter from the Battalion Chaplain. The following is an excerpt from that letter:

102nd Can. Inf. Battalion, France, Aug. 15, 1918

My Dear Mr. Noel,

It is my sad duty to announce to you the death of your son U.J. Noel, No. 226970 which occurred on Aug. 8th while he was in action with the enemy. I was with your son, but a few hours before he met death, and heard his confession and gave him Holy communion. In paying the supreme price for the cause of right your son merits a martyr's crown in Heaven and an inestimable debt of gratitude from mankind. He was a noble soldier and a good devout Practical Catholic.

Your son was buried in the 11th Can. Inf. Batt. Cemetery at Beaucourt en Santerre on Aug. 10th with Military honors and Catholic services.... His personal effects will be forwarded to you in due time through proper channels. Accept my heartfelt sympathy and assurance of prayers for the repose of your son's soul.

Very Sincerely, Chas. A. Fallon, R.C. Chaplain

Urban Noel, 22, is buried in Beaucourt British Cemetery, Somme, France, Grave B.18. Urban's sister Maud had lost her husband Percival Guertin only four months earlier. In 1921, parents Frank Sr. (then a fireman) and Maud Noel were still residing at 174 Cotterbury Street in Sarnia, along with their children: Frank Jr. (age thirty-two, a pipefitter); Rita (age nineteen); Thelma (age seventeen); Verna (age thirteen); and Norma (age ten). On September 2, 1923, Frank Noel Sr., a refinery employee, passed away in Sarnia at the age of fifty-nine. Amanda “Maud” Noel passed away in 1939 in Sarnia at the age of seventy-one. Both Frank Sr. and Amanda Noel are buried in Our Lady of Mercy Roman Catholic Cemetery in Sarnia.

SOURCES: A, B, C, D, E, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z

NORWOOD, James Hamilton (#53605)

Born in Ireland, James Norwood immigrated to Canada in his late teens and less than two years later he enlisted in the Canadian Over-Seas Expeditionary Force in Sarnia. As a soldier, he did what he could to help support his mother--assigning most of his pay to her and bequeathing all his personal belongings to her. One month after arriving at the front lines, Corporal Norwood was killed in action during a major offensive in one of the war's most brutal and prolonged battles.

James Hamilton Norwood was born in Belfast, Ireland, on November 5, 1893, the eldest child of Samuel and Alice Norwood of Belfast, Ireland. Samuel and Alice had seven children together: James, Elizabeth, Mary Jane, Annie, Matthew, Martha and Samuel. In 1901, the Norwood family was residing at 45 Ravenhill Road, Ormeau, Down, Ireland--parents Samuel (age thirty-one) and Alice (age thirty), along with their children James (age seven), Elizabeth “Lillie” (age five), and Mary Jane. Ten years later, in 1911, the Norwood family was residing at 71 Ravenhill Road—parents Samuel (age forty) and Alice (age thirty-nine), along with their children James (age seventeen), Elizabeth (age fifteen), Mary Jane, Annie (age eleven), Matthew (age eight), Martha (age six) and Samuel (age three).

In the spring of 1913, nineteen year-old James Norwood immigrated to Canada. Departing from Liverpool, he arrived in Quebec aboard the *Lake Manitoba* on May 28, 1913. With \$25 in his pocket, he recorded his occupation as moulder, and his destination as Walkerville, Ontario. Two weeks later, on July 10, 1913, James crossed by Canadian Pacific Rail into Detroit, Michigan. Again he recorded his occupation as moulder, and he now had \$16 with him.

Two days before his twenty-first birthday, James Norwood enlisted in the Canadian Over-Seas Expeditionary Force on November 3, 1914 in Sarnia. He stood five feet five inches tall, had gray eyes and red hair, and was single. He recorded his trade or calling as farmer, and his next-of-kin as his father Samuel Norwood of 62 Raven Hill Road,

Belfast, Ireland. James became a member of the Canadian Infantry, 18th Battalion, Western Ontario Regiment. Private James Norwood embarked overseas from Halifax bound for the United Kingdom aboard the *SS Grampian* on April 18, 1915. He arrived in England on April 29, 1915.

After four months of training in England, including time at West Sandling, on September 14, 1915, Private James Norwood embarked for France. Six months later, on March 2, 1916, he was promoted to the rank of Lance Corporal. Of the approximately \$30 a month he was earning as a Private (\$1.10 a day), he assigned \$20 per month of that amount to his mother in Ireland.

Seven months after arriving in France, on April 13, 1916, James Norwood was admitted to No. 6 Canadian Field Ambulance due to a ruptured eardrum. Three days later, on April 16, 1916, he was transferred to a Casualty Clearing Station, and then admitted to No. 13 General Hospital, Boulogne, diagnosed with a ruptured left eardrum and pharyngitis. Five days later, he was admitted to No. 1 Convalescent Depot in Boulogne, and was later discharged to his base on May 5, 1916. Eight days later, on May 13, 1916, he rejoined his unit in the field. On June 6, 1916, James Norwood was promoted to the rank of Corporal in the 18th Battalion. Five days after that, he completed his Military Will, bequeathing all his personal belongings to his mother, Mrs. Norwood of 62 Ravenhill Road, Belfast, Ireland.

James Norwood soon found himself fighting in the **Battle of the Somme** in France (July 1-November 18, 1916)--one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

The second major offensive of the Somme battle was the week-long **Battle of Flers-Courcelette** (September 15-22). It was here where tanks made their first appearance in the war. The battle was a stunning success for the Canadians, but it came at a cost of over 7,200 casualties. It was during this second major offensive of the Somme battle that James Norwood was killed in action.

Three months after completing his Military Will, on September 15, 1916, Corporal James Norwood was reported missing while fighting in the Battle of Flers-Courcelette. Later in the day he was recorded as, "previously reported missing, now reported killed in action." James Norwood's Circumstances of Death Register records him as; *Date of Casualty: 15-9-16. "Previously reported Missing now Killed in Action." ATTACK AT COURCELETTE. No record of burial.*

James Norwood, 22, is buried in Serre Road Cemetery No. 2, Somme, France, Grave XXXV.C.4. He was awarded the: Canadian Memorial Cross Medal.

PIRRIE, James Miller (#602739)

Scottish-born James Pirrie was in his mid-teens when he immigrated with his family to Sarnia. He was just eighteen years old when, following in his brother's footsteps, he enlisted in the Canadian Over-Seas Expeditionary Force in July 1915. Another older brother joined just two months later. James Pirrie took part in some of Canada's most defining battles—the Somme, Vimy Ridge, and Hill 70. Fate finally caught up with him during one of the war's most brutal and costly battles.

James Miller Pirrie was born in Paisley, Scotland, on June 26, 1897, the son of John Alexander and Marion Harkness (nee Wylie) Pirrie. John Alexander Pirrie (born January 27, 1867) and Marion Harkness Wylie (born December 23, 1866) were both born in Paisley, Renfrewshire, Scotland, and were married there on March 7, 1890. John and Marion Pirrie had six children together: John Jr. (born January 18, 1891); Annie (born 1894); Thomas Wyllie (born September 27, 1895); James Miller; Catherine (born 1901); and Ferguson Stewart (born June 23, 1907). In 1891, John Pirrie Sr. was employed as a hot presser, living in Paisley, Renfrewshire along with his wife Marion Pirrie and their two month-old baby John Jr.. Ten years later, in 1901, the Pirrie family was still living in Renfrewshire--parents John Sr. (employed as a printers cutter) and Marion (both age thirty-four), along with their children John Jr. (age ten), Annie (age seven), Thomas (age five), James (age three) and Catherine (age five months).

In 1913, forty-six-year-old John Pirrie Sr. immigrated to Canada. Departing from Glasgow, he arrived aboard the *SS Letitia* in St. John's, Newfoundland on April 14, 1913. He recorded his final destination as Sarnia, and his former, and intended, occupation as printer's cutter. The rest of the Pirrie family immigrated to Canada soon after. Thomas Wyllie Pirrie, age seventeen, immigrated to Canada on his own. He departed Glasgow aboard the *SS*

Cassandra, and arrived in Quebec on July 8, 1913. With \$10 in his pocket, he recorded that he was going to his father in Sarnia, and that his own former, and intended, occupation was as an engineer. The rest of the Pirrie family immigrated the following year, departing from Glasgow aboard the *SS Athenia* and arriving in Montreal in late April 1914. Their recorded ages and occupations were: Marion Pirrie (forty-seven, housewife); and children John Jr. (twenty-three, grocer, along with his twenty-three year-old wife Georgina); Annie (twenty, weaver); James (sixteen, labourer); Catherine (thirteen, scholar); and Ferguson (six, scholar). The Pirrie family resided at 304 Campbell Street, Sarnia. Two of James Pirries' brothers also served in the war.

Thomas Wyllie Pirrie was the first Pirrie to join, enlisting in the Canadian Over-Seas Expeditionary Force on September 23, 1914, just days before his nineteenth birthday, in Valcartier, Quebec. He stood five feet seven and a half inches tall, had light blue eyes and fair hair, was single, and recorded his trade or calling as machinist, and his next-of-kin as his father Mr. John Pirrie Sr. at 304 Campbell Street, Sarnia. Thomas became a member of the Canadian Army Medical Corps (CAMC), No. 2 Field Ambulance. Private Thomas Pirrie embarked overseas from Quebec bound for the United Kingdom aboard the *SS Cassandra* on October 4, 1914. Four months later, on February 9, 1915, he arrived in France, with the 2nd Field Ambulance.

That spring, on April 20, 1915 at the Second Battle of Ypres, Private Thomas Pirrie was admitted to No. 2 Canadian Stationary Hospital in Le Touquet with a "sprained ankle". On April 27, he was evacuated to England and moved to 2nd Southern General Hospital in Bristol. There he was treated for his fractured right (fibula) leg and ankle. On May 5, he was receiving treatment for his fractured fibula at the Military Hospital at Suffolk. One month later, on June 8, 1915, he was discharged to duty from hospital after seven days furlough. Private Thomas Pirrie spent the remainder of his service in England.

He trained as a masseur and performed that duty at locations including hospitals in Monk's Horton, Bushy Park and Orpington. He was awarded Good Conduct Badges in late August 1916, and again in late September 1916. On May 18, 1918 he was granted permission to marry. Twenty-three-year-old Thomas Pirrie married twenty-four-year-old Florence Lillian Helena Fanner (born in England) on June 16, 1918 at St. John the Evangelist in Hammersmith, England. Thomas was living in the Military Hospital in Orpington at the time.

Private Thomas Pirrie survived the war. In mid-January 1919, he spent two weeks in No. 16 Canadian General Hospital in Orpington, receiving treatment for influenza. He was discharged from hospital two weeks later, and eight months later, in early September 1919, he sailed from Liverpool and returned to Canada. Private Thomas Pirrie of the CAMC was discharged from service on demobilization on September 15, 1919. In 1921, Thomas (employed as a mail carrier) and Florence Pirrie, and their one-year-old daughter Iris, were living at 115 Ann Street, Sarnia.

Twenty-four-year-old **John Pirrie Jr.** was the third Pirrie to join, enlisting in the Canadian Over-Seas Expeditionary Force on September 20, 1915 in Sarnia. He stood five feet six inches tall, had brown eyes and dark hair, and recorded his trade or calling as brass worker, and his next-of-kin as his wife Georgina Pirrie at 304 Campbell Street, Sarnia (the address was later changed to 143 Samuel Street, Sarnia). Private John Pirrie Jr. became a member of the 70th Battalion, CEF. He embarked overseas from Halifax bound for the United Kingdom aboard the *SS Lapland* on April 24, 1916. He arrived in Liverpool, England on May 5, 1916.

On June 2, 1916, he was admitted to Moore Barracks, suffering with a severe case of influenza. He recovered after three weeks but had suffered a hernia brought on by excessive coughing while in hospital. On June 29, 1916, he was admitted to Shorncliffe Military Hospital in Hastings where he remained for three and a half months, receiving treatment for his hernia, and varicose veins and chest conditions. While there, on July 10, 1916, John Pirrie Jr. was made a member of the 39th Battalion. He was discharged from the military hospital on October 10, 1916.

Almost three months later, on January 4, 1917, he was transferred to the 6th Reserve Battalion at West Sandling. He remained in England, with some chest trouble, at the Canadian Casualty Assembly Centre (CCAC) at East Sandling, and then the Eastern Ontario Regimental Depot (EOR) at Seaford. On October 31, 1917, he was transferred to the Central Ontario Regimental Depot (CORD), and days later, transferred to Canadian Discharge Depot (CDD) in Buxton. On November 6, 1917, he sailed from Liverpool aboard the *SS Olympic*, to be discharged in Canada. In early December 1917, he was admitted to the London Military Convalescent Hospital. In early January 1918, he was treated for bronchitis. On February 5, 1918, Private John Pirrie was discharged in Guelph, Ontario, "being medically unfit for further military service".

Eighteen year-old **James Miller Pirrie** was the second Pirrie to join, enlisting in the Canadian Over-Seas

Expeditionary Force on July 12, 1915 in Sarnia. He stood five feet seven inches tall, had hazel eyes and light brown hair, was single, and recorded his trade or calling as labourer, and his next-of-kin as his father John Pirrie Sr. at 304 Campbell Street, Sarnia. James also recorded his place of birth as Sarnia (though he was born in Scotland). James Pirrie became a member of the 34th Battalion, Bugle Band, Canadian Expeditionary Force.

Private James Pirrie embarked overseas aboard the *SS California* on October 23, 1915, arriving in England on November 1, 1915. Six months later, in mid-May 1916, following a route march, he noticed swelling of his left leg, with pain on walking. The pain was getting worse and his puttees seemed to cause more pain. On May 17, 1916, he was admitted to Moore Barracks, Canadian Hospital, in Shorncliffe, due to varicose veins. Five days later he was transferred to VAD Hospital in Ashford, where he remained until June 16, 1916. In early July 1916, he was transferred to the 36th Battalion, based at West Sandling, and by the end of the month he was transferred to the 35th Battalion.

Approximately six weeks later, on September 10, 1916, James Pirrie became a member of the Canadian Infantry, 4th Battalion, Canadian Mounted Rifles (CMR), with the rank of Private. [Note: Initially the 4th Regiment, CMR, but in January 1916 it was redesignated the 4th Battalion, CMR]. Days after becoming part of this battalion, in mid-September 1916, James arrived in France. The 4th Battalion, CMR was soon thrust into the Battle of the Somme (July 1-November 18, 1916)--one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

One month into the Battle of the Somme, on October 21, 1916, James Pirrie was admitted to No. 1 Convalescent Depot in Boulogne due to V.D.S. ulcers. The following day, he was transferred to No. 39 General Hospital in Havre, where he remained until being discharged on December 13, 1916. On January 21, 1917, he was admitted to No. 8 Canadian Field Ambulance, due to influenza, remaining there for five days. On January 30, 1917, he was admitted to No. 10 Canadian Field Ambulance, and the following day was transferred to Divisional Rest Station, due to conjunctivitis. He remained there until February 8, 1917, when he rejoined his unit.

In the new year, the 4th Battalion, Canadian Mounted Rifles took part in two of the defining battles of that year in France. The Battle of Vimy Ridge (April 9-12, 1917) was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps. It was a significant victory for Canada, and later referred to as “the birth of a nation”. The Attack on Hill 70 and Lens (August 15-25, 1917) was the second-largest Canadian military undertaking up to that point in the war, second only to Vimy. It was the first major battle orchestrated by Canadian commander Lieutenant-General Arthur Currie and the first time German forces used flame-throwers and mustard gas against the Canadians. Known as “Canada’s forgotten battle of the First World War”, the Canadians were able to capture Hill 70 but not the city of Lens.

By mid-October 1917, James Pirrie arrived with the Canadian Corps in an area in Flanders, Belgium known as Passchendaele. The **Battle of Passchendaele** (October 26 – November 10, 1917) was waged in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and glutinous mud. The Canadian soldiers overcame almost unimaginable hardships and horrific fighting conditions. The remarkable Canadian victory that few thought possible, came at a cost of almost 12,000 Canadian wounded and more than 4,000 Canadians killed.

On October 26, 1917, Private James Pirrie of the 4th CMR lost his life in action during the horrific Battle of Passchendaele, Belgium. His Circumstances of Death Register records him as; *Date of Casualty: 26-10-17. “Killed in Action.” Location of unit at time of Casualty: ATTACK WEST OF PASSCHENDAELE.* Another Sarnian, Charles Edwin Knight, lost his life in the same battle on the same day (Charles Knight’s story is included on page 317).

James Pirrie, 20, has no known grave. He is memorialized on the Menin Gate (Ypres) Memorial, Belgium, Panel 30, 32. On the Sarnia cenotaph, his name is inscribed as J.M. Pierrie. In 1921, the Pirrie family, fifty-four-year-old parents John Sr. (a carpenter) and Marion, and their children Catherine (age twenty) and Ferguson (age fourteen) were still living at 304 Campbell Street, Sarnia. Catharine Pirrie later married James William West on October 19, 1924 in Sarnia. On November 3, 1934, Ferguson Stewart Pirrie (a graduate of Sarnia Collegiate, residing at 214 Emma Street, Sarnia), married Marjorie Ruth Swainson (residing at 196 Queen Street, Sarnia) in Sarnia.

PLAYNE, Leslie (#6985)

Leslie Playne was born in England but came to Canada when he was seventeen. In Sarnia he worked at the Bank of Commerce, was active in local athletics, and was one of the first to enlist in September 1914. Two-and-a-half years later, he was an officer in the Royal Flying Corps, one of the most dangerous postings of the war. Less than a year later, he was killed in action during an attack against the enemy. He has no known grave and is memorialized on the Arras Memorial in France.

Leslie Playne was born in Amberley, Gloucestershire, England on September 15, 1894, the son of Alexander Whateley and Florence Elizabeth (nee Field) Playne, of Stanley Street, Bedford, England. Alexander Playne (born January 1854, Gloucestershire) married Florence Field (born 1863 in Bengal, India) on April 14, 1887 in West Kensington St. Andrew, England. Alexander and Florence Playne had nine children together: daughters Nora (born January 1888); Violet (born October 1889); and Doreen (born July 1906); and sons Penderel (born January 1894); Leslie; Osman (born March 1898); Norman (born July 1900); Vernon (born January 1902); and Courtenay (born October 1903). Leslie Playne was baptized on October 13, 1895 in Amberley. In 1901, the Playne family was residing in the town of Theescombe in Gloucestershire--parents Alexander and Florence, and their children Nora, Violet, Penderel, Leslie, Osman and Norman, and their fourteen year-old servant Lilian Lewis.

Ten years later, in 1911, the Playne family was residing in Bedford, Bedfordshire—parents Alexander and Florence, and their children Violet, Norman, Vernon, Courtenay and Doreen. Alexander supported his family as a master woolen cloth manufacturer, who at the time, was engaged in private indigo dyeing research work. Sixteen year-old Leslie Playne was a student residing in Horsham, Sussex, England attending the Christ's Hospital School, also called Bluecoat School in West Horsham, Sussex (at the time, approximately one hundred boys were registered there, ages 12 – 18).

In February 1912, seventeen year-old Leslie Playne immigrated to Canada, sailing from Liverpool, England aboard the passenger ship *Corsican* and arriving in Halifax, Nova Scotia on February 10, 1912. With \$50 in his pocket, he recorded his final intended destination as Toronto, and his intended occupation as a clerk. At some point after, he ended up in Sarnia working as an accountant at the Canadian Bank of Commerce.

On his twentieth birthday, September 15, 1914, Leslie Playne enlisted in the Canadian Over-Seas Expeditionary Force in Sarnia. He had been a member of the 27th Regiment, St. Clair Borderers, with the rank of Private. He completed his Attestation Paper on September 22, 1914 at Valcartier Camp, Quebec. He stood five feet six and three-quarter inches tall, had brown eyes and black hair, was single, and recorded his trade or calling as bank accountant, and his next-of-kin as his mother Florence Playne at 9 Stanley Street in Bedford, England. He also recorded that he had three years prior military service, in the Officers Training Corps, Christ's Hospital Division, England. Leslie embarked overseas bound for the United Kingdom aboard the *S.S. Laurentic* on October 3, 1914, part of the 1st Division of the Canadian Expeditionary Force, as a member of Canadian Infantry, 1st Battalion.

Two months later, on December 1, 1914, Leslie Playne was stationed in England acting as Pay Sergeant attached to a staff. Four months later, on April 1, 1915, Leslie was taken on strength into the Canadian Pay and Record Office Details in London, England with the rank of Sergeant. Nine months later, on January 6, 1916, Leslie was admitted to No. 2 London General Hospital, Chelsea with a diagnosis of varicocele (a vein enlargement). He remained there for almost three weeks, being discharged to duty on January 26, 1916.

Approximately eight months later, on October 2, 1916, Leslie Playne ceased to be attached to the Pay Office, and was taken on strength to the 36th Battalion in West Sandling for duty. In late December 1916, Leslie proceeded to Royal Flying Corps (RFC) School for Officers Training Course. In early February 1917, he was transferred to the 3rd Reserve Battalion in West Sandling, and two months later in mid-April 1917, he received an appointment to commission in the British Army, Royal Flying Corps (RFC).

Flying, still in its infancy, was extremely dangerous. The wooden-framed planes were flimsy and equipping the light aircraft with heavy weaponry was problematic. The demands of war meant that pilot training was often cursory. Many recruits had only a few hours of instruction before being expected to fly solo; consequently, more pilots died from accidents and mechanical failure than from enemy fire. By war's end, almost a quarter of all British flyers were Canadian. Of 6,166 British Empire air service fatalities, 1,388 were Canadian. An additional 1,130 Canadians were wounded or injured, and 377 became prisoners of war or were interned.

2nd Lieutenant Leslie Playne

Eleven months after receiving his commission in the Royal Flying Corps (RFC), on March 27, 1918, Leslie Playne lost his life during action in France. A RFC 2nd Lieutenant, he was simply recorded as “missing 27-3-18, France”. In May 1918, the *Sarnia Observer* received a letter reporting that the former Sarnia man was missing. Following is a portion of the *Observer* article:

Former Young Sarnia Bank Clerk Is Reported Missing

Lieut. Leslie Playne Pouring Shot and Shell into Enemy When Last Seen

A letter has been received in this city, reporting that a former young Sarnia man was missing... He was reported missing March 27th. The following message was received by his parents: “Regret to inform you that Second Lieutenant Leslie Playne, R.A.S., reported missing March 27th.” Lieut. Playne, prior to his enlistment, was on the staff of the Canadian Bank of Commerce, in Sarnia, and was one of the first to respond to the call, going to England with the First Canadian Contingent, and has been in active service since the early days of the war. He returned to France on March 23rd, after a fortnight’s leave to England and had been on the firing line four days, when he was reported missing. From information received, the last seen of the heroic young officer, he was attacking German infantry with bombs and machine gun. Since then he has failed to return. There is a slight chance that he was taken prisoner and in the hands of the Germans. What ever his fate, the young man did his work nobly and fought to the last. While in Sarnia, he made a host of friends for his manly and gentlemanly ways and was esteemed by all who had the pleasure of his acquaintance. He was a lover of sports, and was actively engaged in the organization of an athletic association in Sarnia when the war broke out.

The Commonwealth War Graves Commission website and the Canadian Virtual War Memorial (Veterans Affairs Canada) website both record Second Lieutenant Leslie Playne as a member of the Air Force, Royal Flying Corps, 16th Squadron. Leslie Playne, 23, has no known grave. He is memorialized on the Arras Memorial, Pas de Calais, France. His name is inscribed on the Sarnia Canadian Bank of Commerce Plaque (pg. 1173). In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always. SOURCES: C, D, E, F, L, N, 2D, 7C, 8X, 8Y, 10Z

POTTER, Albert Edwin (#845109)

Albert Potter was a young man who came from a family that had a long military background and he got to the front through sheer determination. It took him three years to get to the front lines and soon after he witnessed the death of two of his friends. While fighting in a campaign that changed the course of the war, Albert was killed instantly by an enemy shell. He is buried in Longueau British Cemetery, Somme, France.

Albert Edwin Potter was born in Point Edward, Ontario, on July 9, 1896, the son of Albert Victor and Flora Louisa (nee Beaseley) Potter. (NOTE: Ontario Birth Records record Albert Edwin Potter’s birth date as July 10, 1896, however Albert recorded his birthdate in his Military Personnel Files as July 9, 1896). Albert Victor Potter (born September 29, 1867 in Dorsetshire, England) had immigrated to Canada in 1871, and married Flora Louisa Beaseley (born June 3, 1876 in Point Edward, Ontario) on December 27, 1893 in Point Edward, Ontario. Albert Sr.

and Flora Potter had six children together: William Olive (born December 7, 1894); Albert Edwin Jr.; Gordon Clifford (born December 16, 1899); Clarence Willard (born August 21, 1901); Hubert (born 1907); and Lillian Genevieve (born October 7, 1910). The Potter family lived at 173 South Brock Street in Sarnia.

Albert Potter Jr. came from a family that had a long military background; for example, his father, Albert Sr. a GTR locomotive fireman, also tried to enlist in WWI but was not allowed to join. His maternal grandfather ran away at the age of seventeen to fight his country's battles, going through the Crimean and other wars in Europe. After serving for fifteen years, Albert's maternal grandfather immigrated to Canada. Many years later, Albert Potter Jr. trained at Aldershot, the same site in England where his grandfather had trained more than half a century before.

Albert's older brother **William Potter** also served in the war. Twenty year-old William enlisted in the Canadian Over-Seas Expeditionary Force (CEF) on January 27, 1915 in Sarnia. He stood five feet nine inches tall, had blue eyes and fair hair, was single, and recorded his job or calling as painter, and his next-of-kin as his father Albert Potter Sr. of Sarnia, Ontario. William Potter became a member of the 7th Canadian Mounted Rifles, with the rank of Private. He embarked overseas bound for the United Kingdom on June 9, 1915. For almost a year, he remained in England training at locations including Shorncliffe, Aldershot, Bulford and Newcastle. He was also hospitalized a few times while in England due to different illnesses.

On May 21, 1916, William Potter embarked for France. Two months later, in late July, he was in No. 3 Canadian General Hospital in Boulogne with an illness. In late August 1916, he returned to England where he remained for more than a year. While there, he served with a number of units including the Fort Garry Horse Reserve Regiment (FGHRR) in Shorncliffe; the 64th Battalion at Hastings; the 2nd Canadian Labour Battalion (CLB) at Seaford; the 16th Reserve Battalion; and the Canadian Reserve Cavalry Regiment (CRCR). William returned to Canada aboard the *SS Carmania* on September 8, 1917 and was transferred to the Canadian Military Police Corps (CMPC), No. 1 Detachment. Lance Corporal William Potter was discharged on demobilization on February 6, 1919 in London, Ontario.

Albert Edwin Potter Jr. was a young man who got to the front through sheer determination, for he had been rejected three times for active service. On February 12, 1915, at the age of eighteen, he enlisted for the first time in the Canadian Over-Seas Expeditionary Force (CEF) in Sarnia (two weeks after his older brother William had enlisted). Albert recorded his trade or calling as clerk, and his next-of-kin as his father Albert Potter Sr. of 173 South Brock Street, Sarnia. He stood five feet six and a half inches tall and was single. He became a member of No. 3 Stationary Hospital Corps and remained with that unit for three months. His first rejection occurred when he was discharged as medically unfit for service following a severe attack of pneumonia. When his strength returned, he volunteered himself through a reinforcement draft of his old unit, No. 3 Stationary Hospital Unit in July of 1915. He was in uniform barely twenty-four hours when he was again stricken with pneumonia. After his recovery, he was discharged, his second rejection.

Nineteen year-old Albert Potter Jr. enlisted again in the Canadian Over-Seas Expeditionary Force (CEF) on February 9, 1916 in Sarnia. He stood five feet seven inches tall, had blue eyes and light brown hair, was single, and lived on Brock Street with his parents at the time. He again recorded his job or calling as clerk, his next-of-kin as his mother Flora Potter of Brock Street, Sarnia, and that he had prior military service with #3 Stationary Hospital C.E.F. When the Lambton 149th was organized, he became a member of the Lambton 149th Battalion Band in Sarnia. He trained with the battalion at London and Camp Borden. On August 22, 1916, he entered the hospital at Camp Borden where he remained for eight days due to influenza. The following spring, on March 25, 1917, Albert Potter of the 149th Band, embarked overseas from Halifax bound for the United Kingdom aboard the *SS Lapland*. He arrived in Liverpool, England on April 7, 1917.

In England, Albert remained with the band until drafts for active service in France dissolved the band. He was initially posted to Segregation Camp at Camp Bramshott, a member of the 25th Reserve Battalion. On June 1, 1917, he was taken on strength into the 161st Canadian Infantry Battalion, at Camp Witley. Two months later, on August 6, 1917, he was transferred to the 156th Canadian Infantry Battalion, still at Camp Witley. He offered his services to fight but was again rejected as unfit, his third rejection, and became a member of the 156th Battalion Band.

Albert went with that organization on a tour of all the hospitals, giving musical programs throughout England, cheering up the wounded British and colonial soldiers and sailors. He remained with the 156th Battalion Band until February 1918. On February 28, 1918, Albert was at last successful in getting on a draft of

reinforcements, becoming a member of the Canadian Infantry, Eastern Ontario Regiment, 21st Battalion. More than three years after he had first enlisted in Sarnia as an eighteen year-old, on February 28, 1918, twenty-one-year-old Albert Potter finally proceeded to France, as a member of the 21st Battalion, with the rank of Private.

Private Albert Edwin Potter

On March 3, 1918, Private Albert Potter arrived at the front line reinforcement camp with the 21st Battalion. In his first few months there, he saw two of his best chums killed, one on the 1st of April of 1918, and another on the 31st of May. This was a sad blow to the young soldier but, despite his troubles and heartaches, Albert's letters home were never anything but cheery and optimistic. In his last letter to his parents in Sarnia, he told them not to worry, that he was enjoying himself, and that he hoped to be back home with them soon.

Five months after arriving in France, Albert Potter found himself part of **Canada's Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium). This campaign was the "beginning of the end" of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in Canada's Hundred Days Campaign was the **Battle of Amiens** in France (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called "*the finest operation of the war*", the Canadians would advance nearly 14 km--but the achievement came at a cost of 11,822 Canadian casualties.

In the lead up to the Battle of Amiens, on August 6, 1918, Private Albert Potter of the 21st Battalion was killed in action. Albert and his battalion had been moving forward of Villers Bretonneux to occupy new positions in the front line trenches when he was killed by an enemy shell. Albert Potter's Circumstances of Death Register records him as; *Date of Casualty: 6-8-18. "Killed in Action." On the morning of August 6th, 1918, his Battalion moved forward of Villers Bretonneux to occupy new positions, and whilst passing an ammunition dump nineteen men were killed when an enemy shell hit the dump, causing a big explosion. Longueau British Cemetery, 2 ½ miles South East of Amiens, France.*

Mrs. Flora Potter at 173 South Brock Street in Sarnia received a telegram from the Director of Records in early-September 1918, informing her of the circumstances of her son Pte. Albert Potter's death:
Madam,

I beg to transmit herewith a copy of the report setting forth the circumstances under which the late soldier marginally noted (A.E. Potter 845109) killed 6-8-18, met his death: "On the morning of August 6-18, the 21st Can. Bat. moved forward to occupy new positions and while passing one of our ammunition dumps an enemy shell hit the dump, causing explosion, and killing the above mentioned soldier and several others belonging to this unit.

Two days after Albert Potter met his death, the last of the quartet of chums, Sergt.-Major Traynor, "went

West.” This was also a blow to the Potter family, as Sgt.-Major Traynor was the one upon whom the Potter family depended for all particulars of their soldier son. Back in Sarnia, Flora Potter received the following letter of condolence from the 21st Canadian Battalion Chaplain in October of 1918:

Dear Madam,

Our Colonel has asked me to express the sorrow of the whole battalion for the death of your gallant son, Albert Edwin Potter who was killed in the Battle of Amiens on August 8th. He died instantly and suffered no pain. His effects will be sent to you in due course. He was a good soldier.

Yours lovingly, Rev. Renison

Following is a portion of the *Sarnia Observer* newspaper article reporting on Albert Potter’s death:

What a price we are paying for liberty? Sarnia and Lambton sons a few years ago in the schools of this city or district – many of them are to-day sleeping in Flanders – because at the sound of the bugle which sounded the call of the Motherland, they went to stop the advancing hun....

The youngsters are the ones who are paying the toll in this great carnage. Albert was just a boy, barely twenty-two, with his whole life before him. He tried twice to do his bit and could have stayed in Canada with honor, but his was a spirit that would not stay down. His ambition to do his best to the full, and while his passing brings a tear to the eye of all who knew him, they have the consolation of knowing that they had a MAN to call a friend. His parents mourn the heroic passing of a noble son as “One more gone for England’s sake, Where so many go, Lying down without complaint.”

Albert Potter, 22, is buried in Longueau British Cemetery, Somme, France, Grave I.A.I. On his headstone are inscribed the words, THE LORD KNOWETH THEM THAT ARE HIS. II TIMOTHY 2.19. In 1921, the Potter family was still residing in Sarnia--parents Albert Sr. (an engineer) and Flora, and children William (a painter), Gordon (a machinist), Clarence (a teacher), Hubert and Lillian (both students). Flora Louisa Potter passed away in January 1935, and Albert Victor Potter passed away in 1942. Both are buried in Lakeview Cemetery in Sarnia. POWELL, Thomas Edwin (#6948)

English born Thomas Edwin Powell, like his two brothers, were “British Home Children” who were sent to Canada when their parent or parents did not have the resources to care for them. Thomas was working at Imperial Oil when he enlisted in September 1914 with the Canadian Over-Seas Expeditionary Force. Thomas, 23, was killed at the Battle of Ypres on April 30, 1915, six months after he was overseas. He has no known grave.

Thomas Powell was born in London, England, on February 22, 1892, the middle son of Edward Scott Powell Sr. and Fanny (nee Bennett, born about 1865) Powell. Thomas had an older brother, Edward Scott Jr. (born December 6, 1889) and two younger siblings: Henry John (born August 13, 1894); and Ada Louisa Powell (born 1896). Thomas Powell, and his two brothers, were **British Home Children**, who would be sent to Canada by Barnardo Homes.

Between 1869 and 1948, over 100,000 children, most between six and fifteen years of age, were sent to Canada from the British Isles during the “British Child Emigration Movement”. Circumstances in Britain had resulted in their families experiencing hard times. Churches and philanthropic organizations sent these impoverished, abandoned and orphaned children to Canada in the belief that they would have a better chance for a healthy, moral life in rural Canada. Canadian families welcomed them however far too many were used as a source of cheap farm labour and domestic help.

At the age of twelve, in late March 1904, Thomas departed Liverpool aboard the “*Southwark*”, and arrived in Portland on April 5, 1904. His intended destination was Toronto, and he would initially reside in Forest, Ontario. Nine months after his arrival, in late January 1905, Thomas wrote a letter to Mr. A.B. Owen in Toronto, of Barnardo Homes. Following is his letter:

Dear Sir,

I thought of writing to you to let you know how I am getting along. I am getting along very well. My boss thought that I was a great help to him last summer. I can hitch up the team, drive the pony, plough and harrow, disk, stook, help to build a load of grain or hay. I can milk like a milkmaid. I have gained twelve pounds in weight since I came here. We are not milking any cows now since Christmas. I have been going to school since the first of November, and have not missed a day. I have got into the Third Book. I got a nice little Bible at New Year’s from my Sunday school teacher. I hear quite often from my mother. She sent me a nice card at Christmas. I paid my brother a

visit. We are having a nice winter, but it is very cold now. We have fourteen head of cattle, three horses and a little colt that we call "Fly," three pigs and a lot of hens, turkeys, geese and ducks. I have skates, and I have lots of fun. All for this time, I remain one of your devoted Home boys.

Thomas E. Powell

In 1911, nineteen year-old Thomas Powell was residing as a "domestic" with the Core family in Plympton Township. The Core family comprised parents Amos (a farmer) and Lillie Core, and their three children Wesley (age twelve); Roy (age six); and Bruce (age three). But what of the other members of the Powell family?

Widowed mother Fanny Powell, along with her fourteen year-old daughter **Ada Louisa Powell** (born 1896), immigrated to Canada in 1911. Mother and daughter arrived in Halifax aboard the *Corinthian* on May 8th, where Fanny recorded her previous occupation as nurse; her destination as Forest, Ontario; and her intended occupation as a domestic. Later that year, forty-six-year-old Fanny Powell was employed as a domestic at the Warwick home of brothers Samuel (age forty-eight) and Walter (age forty-one) Scott, both farmers, and their mother Jeanette Scott.

Fanny and daughter Ada ended up moving several times. They later resided with Mrs. James Williams of R.R. #4 in Petrolia. In 1921, Ada was employed as a housemaid at the home of Isaac and Coubrough Adams and their three young sons, at 339 Blanche Street, Sarnia. Years later, on May 22, 1935, Ada, now thirty-eight and a cook, residing at 109 N. MacKenzie Street married thirty-three-year-old Nelson Roy Yeates, a farmer in Sarnia Township. Ada Louisa (nee Powell) Yeates is buried in Blackwell Cemetery, Sarnia.

Thomas' two brothers led eventful lives. Also sent by Barnardo Homes, **Edward Scott Powell Jr.**, the oldest sibling, arrived in Canada from Liverpool at the age of eleven in 1900 and was placed with the Evans Martin family residing in Forest, Ontario. In 1901, records show that the Martin family included parents Evans (farmer) and Elizabeth Martin, and their two young children, George (age three) and Alice (age two), with eleven year-old Edward Powell recorded as a domestic. A decade later, in 1911, Edward was a rooming at 171 Victoria Street, Sarnia, and was employed as a sailor on a steamer.

On December 25, 1916, twenty-seven-year-old Edward Powell Jr., then a teamster residing in Sarnia, married twenty-three-year-old Annie May Dobbie (born September 16, 1893 in Halton) in Kitchener, Ontario. Edward and Annie Powell would have one child together, Thomas Edward Powell, who was born April 1918 in Sarnia. The parents named their son after his uncle Thomas Edwin Powell, who had been killed in the war in April 1915. In 1921, Edward, a labourer at Imperial Oil, and his family were residing at 160 Bright Street, Sarnia. Years later, Edward Jr. and Annie Powell's only child, Thomas, served in World War II, as a Warrant Officer-Pilot in the RCAF. Thomas died in October 1942. Note: Thomas Edward Powell's story is included in the WWII section of this Project on page 945.

The youngest brother, **Henry "John" Powell**, was born August 13, 1894 in England. Like his brothers, John was a British Home Child, sent by Barnardo Homes to Canada. Departing from Liverpool, he arrived in the port of Boston aboard the "*New England*" on July 25, 1902. John was seven years old, one of 117 children on board from Dr. Barnardo's with their intended destination as Toronto and Peterborough. Years later, John also served in the First World War.

Now twenty-one, John enlisted in the Canadian Expeditionary Force on August 19, 1915 in Niagara, Ontario. He stood five feet seven and a half inches tall, had blue eyes and brown hair, was single, and recorded his trade or calling as lumberjack, and his next-of-kin as his mother Mrs. Fannie Powell of Petrolia, Ontario. John became a member of the 37th Battalion, CEF, with the rank of Private. He embarked overseas for England from Halifax aboard the *SS Lapland* on November 27, 1915. He spent time in England, training at such camps as Aldershot, Shorncliffe and Bramshott. Six months after arriving overseas, on May 7, 1916, John was transferred to the 60th Battalion, and he would arrive in France the next day. On June 22, 1916, Private John Powell completed his Military Will (a perforated sheet from his Pay Book). In it, he stated that "In the event of my Death I give the whole of my property and effects to my mother Mrs. Fanny Powell RR No 4 Petrolia Ontario".

Ten months later on April 23, 1917, John was transferred to the 87th Battalion, Quebec Regiment. Less than four months later on August 15, 1917, Private John Powell of the 87th Battalion was "Reported from Base missing". Soon after, he was recorded as, "Now for official purposes presumed to have Died on or since 15-8-17". John's Circumstances of Death Register records him as; *Date of Casualty: On or since 15-8-17. "Previously reported Missing now for official purposes presumed to have Died". ATTACK AT LENS.* Twenty-three-year-old Private John Powell has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

Thomas Edwin Powell had many friends in Sarnia as well as Forest, where he had formerly resided. Prior to enlisting, Thomas Powell was employed at the Imperial Oil Works and boarded with Mrs. Cameron, of 192 Lochiel Street, Sarnia (the *Observer* recorded his address as the Union Hotel, Sarnia). The United Kingdom, including Canada and Newfoundland, declared war on Germany on August 4, 1914. Among the first to join was twenty-two-year-old Thomas Edwin Powell, a member of the 27th Regiment, St. Clair Borderers, who enlisted in the Canadian Over-Seas Expeditionary Force on September 22, 1914 in Valcartier Camp, Quebec. He stood five feet five inches tall, had grey eyes and dark brown hair, was single, and recorded his trade or calling as Ironworker, and his next-of-kin as his brother Edward Powell residing at 192 Lochiel Street in Sarnia (and later with the Wright brothers in Petrolia, Ontario).

Thomas Powell embarked overseas bound for England on October 3, 1914 aboard the *SS Laurentic*. He became a member of the Canadian Infantry, Western Ontario Regiment, 1st Battalion, with the rank of Private. In early April 1915, Thomas and the 1st Battalion along with the rest of the 1st Division Canadians, arrived at the Ypres salient battlefield in Belgium, an area traditionally referred to as Flanders. It was here that the Canadians engaged in their first battle of the war, the **Second Battle of Ypres**, their baptism by fire. It was here that the Germans unleashed the first lethal chlorine gas attack in the history of warfare. In the first 48 hours at Ypres (April 22-24), there were more than 6,000 Canadian casualties--one Canadian in every three became casualties of whom more than 2,100 died and 1,410 were captured.

Fighting continued in the Ypres salient on and off until May 25, 1915 including battles at St. Julien, Festubert, and Givenchy. In just over one month at Ypres, one third of the Canadian force, over 8,600 soldiers were killed, wounded or captured. It was during the Battle of Ypres that Private Thomas Powell, six months after arriving overseas, lost his life. On April 30, 1915, Thomas died during an attack in the area of Langemarck in the Second Battle of Ypres, Belgium. His Circumstances of Death Register records him as; *Date of Casualty: 30-4-15. "Killed in Action". ATTACK AT ST. JULIEN. No record of burial.*

Thomas Powell, 23, has no known grave. He is memorialized on the Menin Gate (Ypres) Memorial, Belgium, Panel 10-26-28. Thomas' name is also inscribed on the Village of Camlachie's Memorial.

PRINGLE, Albert Stewart (#2356439)

Sarnia-born Albert Pringle was a thirty-six-year-old pipefitter and a married father of six when he enlisted in the Canadian Over-Seas Expeditionary Force in February 1918. Less than six months later he was in France and soon after, was taking part in the last great campaign of the war. During the brutal fighting of the final offensive, Private Albert Pringle was killed in action by an enemy shell during an advance in the Battle of Canal-du-Nord. One and a half months after his death, the Great War ended.

Albert Stewart Pringle was born in Sarnia, on June 18, 1881, the youngest child of William Elliott and Sarah Jane (nee Williamson) Pringle. William Pringle (born 1833 in Selkirkshire, Scotland) and Sarah Jane Williamson (born April 9, 1846 in York County, Ontario) were married on July 6, 1863 in St. Clair County, Michigan. William and Sarah Pringle had six children together: William James (born 1869); Elizabeth (born 1871); Thomas Edward (born 1872); Margaret (born November 3, 1875); George (born September 2, 1877); and Albert Stewart Pringle. William Pringle was supporting his family working as a tailor in Sarnia at the time of Albert's birth. In 1891, the Pringle family in Sarnia included parents William (a tailor) and Sarah Pringle, and children Elizabeth (a dressmaker), Thomas (a tailor), Margaret, George and Albert (age nine).

Ten years later, in 1901, the Pringle family lived on Brock Street in Sarnia. That year, nineteen year-old Albert lost his father William Pringle, who passed away in Sarnia on March 29, 1901 at the age sixty-eight. On the 1901 census, nineteen year-old Albert Pringle (a clerk at the time) was residing in Sarnia with his widowed mother Sarah and his siblings George (age twenty-three, a painter) and Margaret (age twenty-five). In 1914, Albert lost his mother Sarah Jane, who passed away due to heart disease in Elgin, Ontario on April 30, 1914 at the age of sixty-eight. William Elliott and Sarah Jane Pringle are both buried in Lakeview Cemetery, Sarnia.

On June 4, 1907, twenty-six-year-old Albert Pringle, residing in Detroit and employed as a timekeeper, married twenty-two-year-old Elizabeth Marie (nee Block, of Michigan, USA, born 1885) in Detroit, Michigan. Albert and Elizabeth Pringle had six children together, all born in Michigan: Albert Elliot (born 1907); Elmira May (born 1909); Marion Lorraine (born February 12, 1911); Dorothy Jane (born 1912); James Stewart (born August 17, 1913); and Virginia Jean (born February 5, 1914).

Thirty-six-year-old Albert Pringle enlisted in the Canadian Over-Seas Expeditionary Force on February 26, 1918 in London, Ontario. Albert and his family lived at 1525 Canton Avenue in Detroit, Michigan at the time. He stood five feet six and a half inches tall, had blue eyes and black hair, was married with six children, and recorded his trade or calling as pipefitter, and his next-of-kin as his wife Mrs. Elizabeth Marie Pringle of Canton Avenue, Detroit. He also recorded that he had two years of prior military experience with the 27th Regiment in Sarnia. For some reason, Albert recorded his birthdate as June 18, 1880 (however his birth certificate records his birthdate as June 18, 1881). Albert became a member of the 1st Depot Battalion, Western Ontario Regiment.

Albert Pringle embarked overseas bound for the United Kingdom on March 24, 1918 aboard the SS *Grampian*, and arrived in England on April 3, 1918. He was initially posted to the 4th Reserve Battalion at Bramshott. After training for four and a half months, in mid-August 1918, Albert was transferred to Camp Witley becoming a member of the Canadian Infantry, Western Ontario Regiment, 47th Battalion, with the rank of Private. Days later, on August 20, 1918, Private Albert Pringle arrived in France with the 47th Battalion. He was soon thrust into the last great campaign of the war.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but the victories came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians advanced nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line “*the turning point of the campaign*”.

The third offensive in Canada’s Hundred Days Campaign was the **Battle of Canal-du-Nord and Cambrai** in France (September 27-October 11, 1918). Against seemingly impossible odds and a desperate fully prepared enemy, in a series of brutal engagements in the two weeks, the Canadians successfully channeled through a narrow gap in the canal, punched through a series of fortified villages and deep interlocking trenches, and captured Bourlon Wood and the city of Cambrai. General Arthur Currie would call it “*some of the bitterest fighting we have experienced*” with the victories coming at a cost of 14,000 Canadian casualties.

Just over one month after arriving in France, on September 27, 1918, Private Albert Pringle of the 47th Battalion was killed in action by an enemy shell during an advance in the Battle of Canal-du-Nord. Albert’s Circumstances of Death register records him as; *Date of Casualty: 27-9-18. “Killed in Action.” Whilst taking part in the advance from North West of Moeuvres to Bourlon Wood he was instantly killed by enemy shell fire. Quarry Wood British Cemetery, Sains-lez-Marquion, France.* One and a half months after Albert’s death at Canal du Nord/Bourlon Woods, the Great War ended.

In mid-October 1918, Albert’s sister, Mrs. Hugh Oliver, formerly of Sarnia, then living in St. Thomas, Ontario, received the news of her brother’s death in action. Albert’s widowed wife Elizabeth Pringle returned to her home state of Michigan, residing at 1011 Forest Avenue, and then 4230 Granby Avenue in Detroit, where she received Albert’s medals and her War Service Gratuity. In 1920, Elizabeth Pringle was living at 541 Mack Avenue in Detroit, along with their children Albert Elliott, Elmira May, Marion, Dorothy, James and Virginia. Albert Pringle, 37, is buried in Quarry Wood Cemetery, Pas de Calais, France, Grave II.B.30. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

SOURCES: C, D, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z

RAE, John Duthie Buchan (#505534)

Scotland born and raised John Rae immigrated to Canada in his mid-twenties and moved to Sarnia to live with his sister. He was 27 when he enlisted in the Canadian Over-Seas Expeditionary Force, an opportunity to return to his home and family and to serve his country. After serving for more than a year at the front, the war became too much for him. He is buried in Quatre-Vents Military Cemetery, Pas de Calais, France.

John Duthie Buchan Rae was born in Falkirk, Stirlingshire, Scotland on May 11, 1888, the youngest son of William and Janet (nee Sutherland) Rae. William Rae (born 1852) and Janet Sutherland (born 1855) were married on July 28, 1876 in Falkirk, Scotland. William and Janet Rae had five children together: Livingston Alexander Baird (born April 27, 1877), James Sutherland (born 1880), Maggie McIndoe (born January 22, 1885), John, and Mary Hay (born 1890). The Rae family lived at 107 Union Road, Camelon, Falkirk, Scotland and William supported his family working as an iron-moulder. In 1901, John was living with his family in Falkirk, and in 1914, was living in at Gibsongray Street in Bainsford, Scotland. At some point after he immigrated to Canada.

John's sister, Mary Hay Rae, at age 23, immigrated to Canada aboard the *SS Scandinavian*, arriving in Quebec on May 10, 1914. Just over one month later, on June 21, 1914, Mary Hay Rae married Robert Liddell Hastings in Sarnia. Scotland born Robert Hastings was working as a carpenter in Sarnia. They lived at 121 John Street and later 199 Kathleen Avenue in Sarnia.

Twenty-seven-year-old John Rae enlisted in the Canadian Over-Seas Expeditionary Force on April 8, 1916 in Sarnia. He was living at 121 John Street at the time, with his sister Mary Hay Hastings. He stood five feet six and a half inches tall, had blue eyes and brown hair, was single, and recorded his trade or calling as carpenter, and his next-of-kin as his father, William Rae, in Falkirk, Scotland. His parents' address was later changed to Pennure, Stenhouse St., Cowdenbeath, Fife, Scotland. John became a member of the Canadian Engineers. On September 1, 1916, John allocated \$20 a month of his pay to Mrs. Robert L. Hastings of 121 John St., Sarnia.

Five months after enlisting, John Rae embarked overseas aboard the *SS Scandinavian* and arrived in the United Kingdom on September 22, 1916. He was initially taken on strength into the Canadian Engineers at the training depot at Shorncliffe. Three months later, on December 27, 1917, he completed his Military Will and bequeathed all of his cash, property and effects to his father William. On January 21, 1917, he was taken on strength as a member of the 4th Army Troops Company, Canadian Engineers (4ATCCE) at Crowboro. Two days later, on January 23, Sapper John Rae of the 4ATCCE arrived in Havre, France.

Army Troop Companies and Canadian Engineers worked in the corps area on the construction of defences, accommodation and route communications. In addition, they ran corps workshops and parks, built positions for heavy guns and worked on water supply, frequently in forward areas. One of the most important functions of the Sappers was to dig trenches and dig tunnels for mines underneath enemy trenches.

During the year of 1917, the Canadian Engineers were part of some of the defining battles of that year in France and Belgium. The Battle of Vimy Ridge (April 9-12, 1917) was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps. It was a significant victory for Canada, and later referred to as "the birth of a nation", but it came at a cost of 10,600 casualties.

The Attack on Hill 70 and Lens (August 15-25, 1917) was the second-largest Canadian military undertaking up to that point in the war, second only to Vimy. It was the first major battle orchestrated by Canadian commander Lieutenant-General Arthur Currie and the first time German forces used flame-throwers and mustard gas against the Canadians. Known as "Canada's forgotten battle of the First World War", the Canadians were able to capture Hill 70 but not the city of Lens at a cost of approximately 9,100 casualties.

The Battle of Passchendaele (October 26 – November 10, 1917) was waged in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and glutinous mud. Overcoming almost unimaginable hardships and horrific fighting conditions, the remarkable Canadian victory that few thought possible, came at a cost of almost 16,000 Canadian wounded and killed.

On December 8, 1917, John Rae was granted 14 days leave in the United Kingdom. However, the endless digging, strain of prolonged fighting and nightmarish conditions of war had taken a toll on John Rae as it had many others. Ultimately it became too much for him. Thirteen months after arriving in France, at about noon on February 19, 1918, Sapper John Rae was in a dugout when he took his own life by committing suicide. In the investigation that followed, it was determined that the "cause of death has now been ascertained to be died from wounds willfully self-inflicted during temporary insanity."

A Court of Inquiry was assembled in the field the next day for the purpose of inquiring into and reporting on the death of Sapper John Rae. A number of witnesses from 4th ATCCE gave their testimony of the event. Corporal

R.B.C. Hammond stated, *At about 12 noon on Feb 19th I was having dinner in the dugout of the forward billet. I had previously noticed Sapper Rae standing by his bunk about 8 feet away from me. I had my back to where he had been standing. I heard a peculiar squeal or shriek and turned about. I saw Sapper Rae draw his hand (right) across his throat. I slipped around him got behind him and grabbed both of his wrists. He was still hacking at his throat with a razor and blood was gushing from the wound. He was making peculiar squealing noises. I struggled with him for a fraction of a minute when he fell to the ground with me on top of him. I succeeded in wresting the razor from him and handed it to Sapper Deans who was standing close by. Nothing could be done to stop the bleeding. He was dead in 3 or 4 minutes. The deceased had lately seemed despondent, especially the last few days. He was very quiet and seemed to be brooding. I remarked to him a few days previously cheer up Jack. He then said every body was looking at him.*

Sapper Andrew Deans stated, *At about noon on Feb. 19th I was in the same dugout with Sapper Rae but in another aisle. I was sitting on my bunk. I heard a peculiar squeal and a sound like rushing water. When I heard the squeal I got up and went to the passage. I saw Corp. Hammond seize the deceased and struggle to take a razor away from him. They fell to the floor and Corp. Hammond succeeded in getting the razor which he handed to me. I did not actually see the deceased cut his throat. I left the dugout to find an officer. When I returned in about 8 minutes Sapper Rae was dead. Sapper Rae had seemed very quiet and despondent lately and unlike his usual self.*

Sapper J.R. Kerr stated, *At about noon on Feb. 19th I was having lunch in the dugout with my back to the deceased. When I came in I had noticed him standing by his bunk but we did not speak. I heard several short squeals and turned around. I saw Sapper Rae striking at his throat and thought he was choking. I then noticed blood flying and a razor in the hand of deceased. Corp Hammond then stepped around him, got behind him grabbed him and attempted to take the razor away from him. They both fell to the floor and Corp Hammond obtained the razor and handed it to Sapper Deans. Spr. Rae had seemed unusually quiet and depressed lately.*

Corp. Hammond said get the Sergt. and I left the dugout. When I got outside the dugout I found that the Sergt. Had gone down to the scene of the accident by another entrance. I at once returned to where Spr. Rae was lying. He was dead by this time. This was not more than five minutes from the time I first noticed him striking his throat. It was impossible to stop the flow of the blood.

Lt. R.V. Heathcott stated, *I was in the Officers dugout at about 12:15 on Feb. 19th at the forward billets of the 4th A.T.Coy.C.E. Sapper Deans came into me and said an accident has occurred. I said what has happened? He replied Sapper Rae has cut his throat. I immediately went to the front dug out which was about 100^x-150^x distant and found Sapper Rae lying on the floor in a pool of blood. Corp Hammond, Spr. Kerr and a few others were standing about. Spr Deans gave me the razor. Sapper Rae's pulse had stopped and he was dead. I arranged to have his body removed to Company Headquarters.*

Captain J.D. Stewart, C.A.M.C. examined the body of Sapper Rae about 10 o'clock the next morning. He stated, *I found a large wound extending from one inch below the right ear to about two inches below the left ear, apparently caused by a sharp instrument. The large blood vessels on the right side of the neck had been severed and the resulting hemorrhage had been profuse. Death was due to loss of blood.*

The Court concluded that Sapper J.D.B. Rae "committed suicide by cutting his throat with a razor while temporarily insane." John Rae, 29, was given a full discharge after his death and a military burial. He is buried in Quatre-Vents Military Cemetery, Pas de Calais, France III.C.2. On his headstone are inscribed the words, FOR LIBERTY AND RIGHT.

REID, George Alexander (#403181)

Scotland-born George Reid immigrated to Canada and came to work and live in Petrolia and in Sarnia. At the age of 31 and married less than four years, George made the decision to serve his country. Unfortunately he never had the chance to serve overseas. Only days after he enlisted in October 1915, he was accidentally killed in bizarre circumstances. A full military funeral was held for Private George Reid in Petrolia.

George Alexander Reid was born in Glasgow, Scotland on February 3, 1884, the son of Robert (a policeman) and Jane "Jeanie" (nee Murray) Reid. It is unknown exactly when the Reid family immigrated to Canada, but in March 1909, twenty-five-year-old George Alexander Reid and his parents were living in Petrolia. On December 13, 1911, twenty-seven-year-old George Reid married nineteen year-old Margaret Jane Bissett, in Petrolia, Ontario.

George Reid's wife, Margaret Jane Bissett, born August 21, 1892, was the daughter of Cameron Bissett Sr. (a farmer) and Margaret (nee Smith) Bissett, both from Scotland. Margaret's parents Cameron Bissett Sr. and Margaret Smith were married in May 1892 in Plympton Township, Lambton County, and later lived at 136 Dundas Street, Sarnia. Margaret Bissett had resided in Enniskillen Township and the town of Petrolia all her life. Margaret Bissett had one sister, Elizabeth (born November 1893) and one brother, Cameron Robertson Bissett Jr. (born October 1896). Margaret's brother, Cameron Robertson Bissett Jr. also served in the Great War. Cameron Bissett Jr. was killed in action in September 1918 (his story is included in this Project on page 238).

For a time before he enlisted, George Alexander Reid was employed as a bartender in Petrolia. Thirty-one-year-old George Reid enlisted in the Canadian Over-Seas Expeditionary Force on October 1, 1915 in London, Ontario, becoming a member of the 34th Battalion. He stood five feet seven inches tall, had brown eyes and brown hair, and recorded his trade or calling as clerk, and his next-of-kin as his wife Margaret Jane Reid in Petrolia. George also recorded that he had three years of prior military experience with the Gordon Highlanders (an infantry regiment of the British Army).

Only a few days after enlisting, George Reid lost his life in bizarre circumstances. On October 5, 1915, while doing training exercises in London, Ontario, he was accidentally killed when he was struck by a westbound Grand Trunk train. George had become delirious as a result of being inoculated for typhoid fever earlier in the day, and in a demented condition had wandered away from the camp and out of the city. His Circumstances of Death Register records him as; *Date of Casualty: 5-10-15. Accidently killed by train. Body found on G.T.R. tracks a mile east of Fairfield Station. Was badly mangled. Actions had been noticed to be rather strange just before the accident. Hillsdale Cemetery, Petrolia, Ontario.* Less than three weeks after George Reid's death, the 34th Battalion embarked overseas bound for the United Kingdom.

Private George Alexander Reid

A full military funeral was held for Private George Reid in Petrolia. Prior to the funeral, his body lay in uniform in the Steadman undertaking parlor, guarded by two of Private Reid's friends and fellow soldiers. During the evening prior to, and in the morning of the funeral, nearly one thousand friends, men, women and children viewed the remains. The funeral was held at the Presbyterian Church by Reverend Mr. McGillivray, with a procession headed by the citizen's band, followed by members of the Masonic Order, of which Private Reid was a member. The coffin was draped with a Union Jack, and the "Last Post" was sounded over the grave.

George Reid, 31, is buried in Petrolia (Hillsdale) Cemetery, Petrolia, Ontario. His name is also inscribed on the Petrolia Memorial in the Town of Petrolia. For George's wife, Margaret Jane Reid, tragedy would come again almost three years later. Her brother, Cameron Robertson Bissett Jr., would lose his life during fighting in Amiens, France in September of 1918.

REYNOLDS, William Henry (#845188, #845197)

William Reynolds was born in England but came to Canada when he was ten, part of the British Home Children, a program designed to give impoverished and orphaned children a chance for a better life in Canada. It took two attempts for him to successfully enlist to serve. An officer in the Salvation Army, he felt that God had special work for him to do saying, "If only I could get into the trenches as a stretcher bearer just think of how much I could do for Jesus". Four months after arriving at the front, William lost his life after being severely wounded by enemy machine gun fire near Amiens.

William Henry Reynolds was born in Kent County, England, on October 9, 1892. William Reynolds was a **British Home Child**, who had been sent to Canada by Barnardo Homes. Between 1869 and 1948, over 100,000 children, most between six and fifteen years of age, were sent to Canada from the British Isles during the "British Child Emigration Movement". Circumstances in Britain had resulted in their families experiencing hard times. Churches and philanthropic organizations sent these impoverished, abandoned and orphaned children to Canada in the belief that they would have a better chance for a healthy, moral life in rural Canada. Canadian families welcomed them however far too many were used as a source of cheap farm labour and domestic help.

At the age of ten, William Reynolds departed Liverpool aboard the *Dominion*, and arrived in Montreal, Quebec on July 24, 1903. William was among a group of 209 boys on board the ship from Dr. Barnardo's, and their intended destination was Toronto. William soon after lived in the community of Blackwell, Ontario, with Mr. West. Approximately a year and a half after arriving in Canada, on February 13, 1905, William wrote a letter from Blackwell Post Office (his employer was Mr. David May) to Barnardo Homes in Toronto. Following is a portion of his letter:

[Note: "Ups and Downs" was a quarterly publication printed in Toronto under the auspices of Dr. Barnardo's Homes].

Dear Sir,

As I have seen so many of the boys' letters in the UPS AND DOWNS, I thought I would like to write too, and let you know how I am getting along. I am going to school just now; I started at the New Year, and I am getting along very nicely. I have learned to do a great many kinds of work on the farm, and I am going to try to learn a great deal more, if I can. I have learned to drive the horses, and to plough with the riding plough, and if there is any other boy that can do that at twelve years old I would like to hear of them; and I can rake hay with the horse-rake, and harrow and lots of other things. Last summer I used to go to the lake, about half a mile away, and go in swimming. It was great fun. We have eighteen head of cattle and three horses and two colts. We have a nice warm barn, with concrete stables underneath. It is nice and warm to go into to do the chores.... I am going to church and Sunday school, and I have only missed about two Sundays since I came here, and I will be here a year in April... I have got into as nice a home as any boy would want. I sometimes go out hunting with Mr. West, and we get some rabbits. We set some snares to-day, and we hope to catch some that way. I am having a good time living here, and I hope all the boys and girls who came out the same time as I did (that was in June 1903) are having as good a time as I am. I have a good home and lots of good food....

William Henry Reynolds

William Reynolds later lived in Sarnia, making his home with Mrs. Frederick Sproule at 115 Mitton Street. Prior to enlisting, William, an active worker in the Salvation Army, was promoted to Lieutenant, and stationed at Leamington and Goderich.

Twenty-three-year-old William Reynolds enlisted in the Canadian Over-Seas Expeditionary Force on April 11, 1916 in Sarnia, becoming a member of the 149th Battalion. He stood five feet nine inches tall, had blue eyes and light brown hair, was single, and recorded his trade or calling as Officer in Salvation Army, and his next-of-kin as Mrs. Frederick Sproule, Guardian, 115 Mitton Street, Sarnia. Six months later, on October 10, 1916, William was discharged from the 149th at Camp Borden "in consequence of being medically unfit". William had a pre-service joint condition in his left foot that "hinders him from marching, causing him discomfort and pain".

Five months later, on March 16, 1917, twenty-four-year-old William Reynolds enlisted again with the Canadian Over-Seas Expeditionary Force, Western Ontario Regiment, 149th Battalion, in London, Ontario. With a new regimental (service) number 845197, he was recorded as five feet eight and one-quarter inches tall, with brown eyes and dark brown hair and was single. He recorded his trade or calling as pipe fitter, his present address as 115 Mitton Street, Sarnia, and his next-of-kin as his friend Mrs. Fred Sproule at the same address in Sarnia. Twelve days later, on March 28, 1917, Private William Reynolds embarked overseas from Halifax bound for the United Kingdom aboard the *S.S. Lapland*.

William Reynolds arrived at Liverpool, England on April 7, 1917, and was processed at the Segregation Camp at Bramshott, and then taken on strength into the 25th Reserve Battalion at Bramshott. After ten months of training, on February 15, 1918, he was transferred to the 4th Reserve Battalion, still at Bramshott. Three weeks later, on April 7, 1918, he proceeded across the English Channel to the Canadian Corps Reinforcement Camp at Etaples, France as a member of the 18th Battalion. William joined the 18th Battalion as a stretcher-bearer at the front on May 15, 1918. He soon found himself taking part in the last great campaign of the war.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but the victories came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in Canada’s Hundred Days Campaign was the **Battle of Amiens** in France (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians advanced nearly 14 km--but the success came at a cost of 11,822 Canadian casualties.

On August 8, 1918, Private William Reynolds of the 18th Battalion, was wounded in action by machine gun fire while fighting in the Battle of Amiens. He was transferred to No. 5 Casualty Clearing Station with wounds recorded as “gun shot wounds thumb and chest”. The following day, on August 9, 1918, William lost his life as a result of his wounds. His Circumstances of Death Register records him as; *Date of Casualty: 9-8-18. “Died of Wounds.” While taking part in operations east of Amiens, on August 8th, 1918, he was severely wounded in the chest by enemy machine gun bullets. His wounds were dressed and he was taken to No. 5 Casualty Clearing Station where he died the following day. Crouy British Cemetery, 10 miles North West of AMIENS, FRANCE.*

In August 1918, William Reynold’s friend and next of kin in Sarnia, Mrs. Fred Sproule on Mitton Street, received the following telegram: DEEPLY REGRET TO INFORM YOU 845197, PTE. WM. HENRY REYNOLDS, INFANTRY, OFFICIALLY REPORTED DIED OF WOUNDS, 5TH CANADIAN CLEARING STATION AUGUST 9TH, 1918 GUNSHOT WOUNDS TO CHEST.

In late August 1918, over 400 local citizens of Sarnia joined the Salvation Army in a packed memorial service for William Reynolds at the citadel. The following is an excerpt of the address given by Captain Ashby, Commander of the Sarnia Salvation Army Corps:

Sarnia’s first Salvationist, William Reynolds has fallen in the fight for liberty and freedom “Somewhere in France.” ‘Billie’ died of wounds on August 9th, 1918, from gunshot wounds in the chest, and there is no doubt he would be trying to help some mother’s boy when he received the fatal shot. He enlisted during 1916 in the 149th Battalion but was rejected for further service in the fall of the same year as medically unfit, but on returning here again felt that God had special work for him to do. “If only I could get into the trenches as a stretcher bearer just think of how much I could do for Jesus”, was a frequent saying of his and so he tried again and proceeded overseas as a stretcher bearer in the 18th. As a man in khaki, he took every opportunity to work for his Master and there are many who will thank God that he enlisted. The writer would like to bear witness to his work when at Camp Borden, open air services were conducted at every chance that came his way and it was not a matter of entertaining the boys but always the leading of them to his Saviour and many sought and found Jesus in that camp, thank God....

In mid-November 1918, a special service was held at the Salvation Army in which a memorial tablet was unveiled by Colonel John Rawling, Divisional Commander for the London division, in memory of Private William Reynolds. The tablet commemorated William’s death on August 9th, 1918 and by then, more details of his death had been released: *A young man named Billings found young Reynolds lying in a shell hole badly wounded and asked him if there was anything he could do for him. Willie’s last reply was, “Yes, write to my mother and tell her I was not afraid of death and I was game to the last.”*

Following the war, William’s mother, Mrs. Harriet Moon of 67 Forest Road, Tunbridge Wells, Kent, England, received a Plaque and Scroll Memorial and the Memorial Cross for the loss of her son. William’s brother, Horace Sellar, was also residing at that address. William Reynolds, 25, is buried in Crouy British Cemetery, Crouy-Sur-Somme, Somme, France, Grave VI.A.13. On his headstone is inscribed the word, CROWNED. William Reynolds was the first member of local Sarnia Salvation Army Congregation to lose his life in the war. ROBINSON, Frederick John (#542328)

Born in England, Frederick Robinson immigrated to Sarnia and just before his eighteenth birthday enlisted in the Canadian Over-Seas Expeditionary Force. It was an opportunity to return to his home and family and to serve his country. He arrived in the United Kingdom in May 1917 and approximately a year later was in France. Soonafter, he was taking part in the last great campaign of the war. Five months after arriving in France, Private Frederick Robinson was killed in action while fighting in the Battle of Canal-du-Nord, near Cambrai.

Frederick John Robinson was born in England, on October 23, 1898, the son of Thomas Robinson. At some point, Frederick immigrated to Canada, and lived in Sarnia. On October 12, 1916, approximately two weeks before his eighteenth birthday, Frederick Robinson enlisted in the Canadian Over-Seas Expeditionary Force in London, Ontario. He stood five feet five inches tall, had brown eyes and brown hair, was single, and recorded his trade or calling as tinsmith, and his next-of-kin as his friend C.K. White of 109 Brock Street, Sarnia. Both Frederick Robinson and C.K. White were residing at a boarding house at 109 Brock Street, Sarnia at the time. Frederick's next-of-kin/guardian was later changed to Mrs. John Courtney of Mooretown, Ontario, and later 294 Devine Street, Sarnia. At enlistment, Frederick was attached to the Divisional Cyclist Depot in Toronto.

In late April 1917, Frederick Robinson embarked overseas from Halifax bound for the United Kingdom aboard the *SS Justicia*, and arrived in Liverpool, England on May 14, 1917. At Chiseldon Camp, he was taken on strength into the Canadian Reserve Cyclists Company. On June 30, 1917, he became a member of the 4th Canadian Reserve Battalion. Nine months later, on March 28, 1918, at Bramshott, he became a member of the Canadian Infantry, Western Ontario Regiment, 1st Battalion, with the rank of Private. He soon crossed the English Channel with his battalion and arrived in France. Approximately four months later, he was taking part in the last great campaign of the war.

Private Frederick Robinson

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but the victories came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians advanced nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line “*the turning point of the campaign*”.

The third offensive in Canada's Hundred Days Campaign was the **Battle of Canal-du-Nord and Cambrai**

in France (September 27-October 11, 1918). Against seemingly impossible odds and a desperate, fully prepared enemy, in a series of brutal engagements in the two weeks, the Canadians successfully channeled through a narrow gap in the canal, punched through a series of fortified villages and deep interlocking trenches, and captured Bourlon Wood and the city of Cambrai. General Arthur Currie would call it “*some of the bitterest fighting we have experienced*” coming at a cost of 14,000 Canadian casualties.

Five months after arriving in France, on September 27, 1918, Private Frederick Robinson of the 1st Battalion was killed in action while fighting in the Battle of Canal-du-Nord. His Circumstances of Death Register records him as; *Date of casualty: 27-9-18. “Killed in Action.” Location of Unit at time of Casualty: Attack west of HAYNECOURT. Ontario British Cemetery, 6 miles West of CAMBRAI, FRANCE.* In late October 1918, his next of kin, Mr. White of Brock Street, received a telegram informing him that, PTE. F.J. ROBINSON, INFANTRY, WAS OFFICIALLY REPORTED KILLED IN ACTION ON SEPTEMBER 27TH.

One and a half months after Frederick Robinson’s death, the Great War ended. Frederick Robinson, 19, is buried in Ontario Cemetery, Sains-Les-Marquion, Pas de Calais, France. Grave I.B.4.

RODBER, Albert (#845157)

Albert Rodber was born in England but came to Canada when he was five. He was part of the British Home Children, a program designed to give impoverished and orphaned children a chance for a better life in Canada. At the age of 19, he enlisted in the Canadian Over-Seas Expeditionary Force. Fifteen months later he arrived in the United Kingdom. After arriving in France, four and a half months later he was taking part in the last great campaign of the war. Albert was killed in action in August 1918 after being hit by enemy shrapnel. He has no known grave and is memorialized on the Vimy Memorial.

Albert Rodber was born in England, on June 9, 1896, the son of Alice Mary Rodber (born in Suffock County, England about 1871). Albert Rodber was a **British Home Child**, who would be sent to Canada by Barnardo Homes. Between 1869 and 1948, over 100,000 children, most between six and fifteen years of age, were sent to Canada from the British Isles during the “British Child Emigration Movement”. Circumstances in Britain had resulted in their families experiencing hard times. Churches and philanthropic organizations sent these impoverished, abandoned and orphaned children to Canada in the belief that they would have a better chance for a healthy, moral life in rural Canada. Canadian families welcomed them however far too many were used as a source of cheap farm labour and domestic help.

In the fall of 1901, at age five, Albert Rodber departed Liverpool aboard the *Tunisian*, and arrived in Montreal, Quebec on September 27, 1901. Young Albert Rodber was among a group of 117 children on board the ship from Dr. Barnardo’s, and his intended destination was Peterborough. Albert Rodber came to live in Arkona, later at R.R. #1 Forest, and later still at 212 Durand Street, Sarnia, working for families throughout his childhood. In 1911, fifteen year-old Albert Rodber was residing and working as a “Home Boy” (servant), with the family of Laman Armitage (age thirty-nine, a farmer), Margaret Armitage (age eighty-four, Laman’s mother), and Mary Wells (age fifty-eight, Laman’s sister) in Forest, Bosanquet District.

Nineteen year-old Albert Rodber enlisted in the Canadian Over-Seas Expeditionary Force on December 20, 1915 in Arkona, becoming a member of the 149th Battalion. He stood five feet six inches tall, had blue eyes and red hair, was single, and recorded his present address as Arkona, Ontario. He recorded his trade or calling as farmer, and his next-of-kin as his widowed mother Mrs. Rodber in Arkona. Albert underwent training at London, Ontario and Camp Borden (where he was hospitalized for 13 days due to influenza).

Albert Rodber embarked overseas from Halifax bound for the United Kingdom on March 28, 1917 aboard the *S.S. Lapland*, and arrived in Liverpool, England on April 7, 1917. He was processed at the Segregation Camp at Bramshott, and then taken on strength into the 25th Reserve Battalion at Bramshott. After ten months of training, on February 15, 1918, Albert became a member of the 4th Reserve Battalion, still at Bramshott. Approximately six weeks later, on March 28, 1918, he became a member of the 47th Battalion at the Canadian Base Depot. Days later, he arrived in France with that battalion, and moved to the front lines. Four and a half months later, he was taking part in the last great campaign of the war.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the

offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but the victories came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called "*the finest operation of the war*", the Canadians advanced nearly 14 km--but the success came at a cost of 11,822 Canadian casualties. Private Albert Rodber survived this first offensive, and as it closed, on August 14, he was transferred to the 44th Battalion, Canadian Infantry, Manitoba Regiment.

The second major offensive in this Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line--a series of strong defensive trenches and fortified villages. General Sir Julian Byng would call the Canadian victory at Arras and the DQ Line "*the turning point of the campaign*".

In the days leading up to this second offensive, and just over one week after joining the 44th Battalion, Private Albert Rodber was killed in action on August 22, 1918 after being hit by enemy shrapnel. His Circumstances of Death Register records him as; *Date of Casualty: 22-8-18. "Killed in Action." His Battalion was holding the line in the vicinity of FRANSART when a shell burst at his machine gun post, shrapnel hitting him in the legs and shoulder, killing him instantly.*

While Albert Rodber was serving overseas in France, his widowed mother, Alice Mary Rodber, lived in Sarnia (according to the 1921 Census, she had immigrated to Canada in 1908). On July 8, 1918, forty-seven-year-old Alice Mary Rodber married fifty-three-year-old widower Angus William Mitchell (born in Strathroy, a labourer) in Sarnia. Alice Mary and Angus Mitchell lived at 212 Durand Street in Sarnia.

Two months after marrying, in early September 1918, Alice Mary Mitchell of Durand Street, received an official telegram informing her that her son, PRIVATE ALBERT RODBER HAD BEEN KILLED IN ACTION ON AUGUST 22ND. Three years later, in 1921, fifty year-old Alice Mary Mitchell and her fifty-six-year-old husband Angus William Mitchell, were still living at 212 Durand Street, along with their daughters May Rodber (age twenty-two, born in England) and Gladys Rodber (age four, born in Ontario). Albert Rodber, 22, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

ROGERS, Archibald (#2005528)

Archibald Rogers was married and working in his chosen career when he made the decision to serve his country in early 1917. Within a year of enlisting in Sarnia, he arrived at the horrendous front line trenches in France. Six months later, he lost his life as a result of the horror and gruesome conditions he endured. Twenty-six-year-old Archibald Rogers is buried in Aubigny Communal Cemetery Extension, Pas de Calais, France.

Archibald Rogers was born in London, Ontario, on June 6, 1892, the son of Edward John and Alice (nee Harwood) Rogers. Both of Archibald's parents were born in England: Edward Rogers, born August 22, 1861, had immigrated to Canada in 1875; and Alice Harwood, born June 12, 1860, had immigrated to Canada in 1874. After their marriage, Edward and Alice Rogers had four children together: sons William (born August 29, 1883); Archibald; and Alfred (born July 2, 1899); and daughter Nellie (born August 10, 1886).

In 1891, the Rogers family was residing in London, Ontario where Edward supported his family working as a carpenter. Along with Alice were their children William (age seven) and Nellie (age four). Ten years later in 1901, the Rogers expanded family was residing on Lyle Street in London—parents Edward (still a carpenter) and Alice, and their children William (age seventeen, a bookmaker), Nellie (age fourteen), Archibald (age nine) and Alfred (age one). Edward Rogers later worked as a car builder in London.

On December 26, 1910, eighteen year-old Archibald Rogers, an electrician in London, married eighteen year-old Annie Gould in Petrolia, Ontario. Annie Gould, born October 10, 1892 in Oil Springs, was the daughter of Robert McNaughton (a driller) and Frances "Fanny" Letitia (nee Wade) Gould of Petrolia. Archibald and Annie Rogers initially lived at 408 Cromwell Street, Sarnia, and the following year, they along with her seventeen year-old brother John Gould, were living at 317 Maxwell Street, Sarnia. Archibald continued his work as an electrician and his brother-in-law John Gould was a waiter at a restaurant.

On February 23, 1917, twenty-four-year-old Archibald Rogers enlisted in the Canadian Over-Seas

Expeditionary Force in Sarnia. He stood six feet tall, had brown eyes and fair hair, was married and lived at 408 Cromwell Street at the time. He recorded his trade or calling as electrician. He originally recorded his next-of-kin as his father Edward Rogers of 389 Lyle Street, London, but later changed it to his wife Annie Rogers of 408 Cromwell Street. Archibald became a member of the Canadian Engineers with the rank of Private.

Archibald Rogers embarked overseas from Halifax bound for the United Kingdom on board the *S.S. Justicia* on May 3, 1917. He arrived in England on May 14, 1917, becoming part of the Canadian Engineers Training Depot at Crowborough. Six months later, in November 1917, he proceeded from the Canadian Engineers Pool in Seaford to France. He arrived in France on November 17, 1917. Approximately ten weeks later, on February 3, 1918, Archibald Rogers joined his unit in the field, a member of the Canadian Engineers, 7th Field Company with the rank of Sapper.

Only four and a half months later, on June 26, 1918, Private Archibald Rogers was admitted to No. 8 Canadian Field Ambulance, recorded as PUO (Pyrexia – of unknown origin fever of an undetermined cause). The next day, he was transferred to No. 4 Casualty Field Ambulance. Two days later, on June 29, 1918, he was admitted to No. 42 Casualty Clearing Station, recorded as dangerously ill with pleurisy. Only nine days later, on July 8, 1918, Sapper Archibald Rogers lost his life as a result of the conditions of war, recorded as “*Died of Sickness (Pneumonia) attributable to Field Operations*”. His Circumstances of Death Register records him as; *Date of Casualty: 8-7-18. “Died (Pneumonia), at No. 42 Casualty Clearing Station.” Aubigny Communal Cemetery Extension. 8 ¼ miles North West of ARRAS, FRANCE.*

Archibald Rogers, 26, is buried in Aubigny Communal Cemetery Extension, Pas de Calais, France, Grave IV.J.39. His widow later remarried. On July 12, 1919, twenty-six-year-old Annie married thirty-six-year-old John McDonald (born Chatham Township, a labourer), in Wallaceburg, Kent County.

SALSBURY, John Reginald Sergeant (#803168)

England born John Salisbury immigrated to Canada and enlisted in the Canadian Over-Seas Expeditionary Force in April 1916. Seven months later he arrived in France where over the following year, he had to be hospitalized several times; he survived the Battle of Vimy Ridge; and was wounded by enemy gun fire. In September 1918, in the last big offensive of the final campaign of the war, John Salisbury was killed in action while acting as a stretcher-bearer. On his headstone are inscribed the words, “To live in hearts we leave behind is not to die”.

John Reginald Sergeant Salisbury was born in Northampton, England, in March 1893, the son of Thomas and Mary Jane (nee Pateman) Salisbury. John’s recorded birthdate is based on British Birth Index and Census Records (he recorded his birthyear differently when he enlisted). Thomas Salisbury (born 1868 in Bedfordshire, England) married Mary Jane Pateman (born September 1869 in Bedfordshire, England) in April 1889 in Bedfordshire. Thomas and Mary Jane Salisbury lived at 5 Abington Street, Northampton, and later Ringstead Cottage (near Thrapston, Northants), England, and they had four children together: Thomas Francis (born February 17, 1891); John Reginald Sergeant; Hilda Mary (born June 1894); and Winifred (born March 1896).

In 1901, the Salisbury family was living in Northamptonshire, England—parents Thomas (age thirty-three, a tobacconist, working at home) and Mary Jane (age thirty-two), and their children Thomas (age ten), John Reginald (age eight), Hilda (age six) and Winifred (age five), along with their seventeen year-old domestic servant Priscilla Scrivener. Ten years later, in 1911, the Salisbury family were still living in Northamptonshire--parents Thomas (a shopkeeper/tobacconist, working at home) and Mary Jane, and their children Thomas (age twenty, a motor engineer), John Reginald Sergeant (age eighteen, assisting in the shop), Hilda (age sixteen, assisting in the house) and Winifred (age fifteen, a student). John’s brother, Thomas Francis Salisbury, also served in the Great War, as a member of the British Army – Royal Army Medical Corps.

In April 1912, twenty year-old John Salisbury immigrated to Canada. He departed from Liverpool aboard the *Empress of Britain* and arrived in St. John’s, New Brunswick on April 27, 1912. The ship’s passenger list recorded his surname as Salisbury, and his intended destination as Toronto.

Two years later, twenty-two-year-old John Salisbury enlisted in the Canadian Over-Seas Expeditionary Force on April 18, 1916 in Strathroy, Ontario. For some reason, he recorded his birthdate as January 19, 1897 (not March 1893), and as a result, a few of his military files record him as being three years younger than he was (even though the medical examiner at enlistment correctly recorded John’s “apparent age” as twenty-two). John stood five feet seven and a half inches tall, had blue eyes and auburn hair, was single, and lived at R.R. #5 Strathroy at the time.

He recorded his trade or calling as farmer, then labourer, and his next-of-kin as his mother Mrs. Mary Jane Salsbury, of 5 Abington St., Northampton, England. John became a member of the 135th (Middlesex) Battalion, Canadian Expeditionary Force.

John embarked overseas bound for the United Kingdom aboard the *S.S. Olympic* on August 22, 1916, arriving in Liverpool, England on August 30, 1916. One and a half months later, on October 15, 1916, he was transferred to the 134th Battalion at Witley. On November 28, 1916, he was transferred again, becoming a member of the Canadian Infantry, 15th Battalion. The next day, Private John Salsbury arrived in France with the 15th Battalion. Several weeks later, on December 24, 1916, he completed his Military Will in which he bequeathed all of his personal effects to his mother.

The poor conditions in France caused John to be admitted to the hospital several times in the early part of 1917: January 16, sick; January 25, defective vision; and March 30, sick, rejoining his unit on April 8, 1917. The 15th Battalion took part in the Battle of Vimy Ridge (April 9-12, 1917) in France. It was the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously. The four-day victory at Vimy Ridge was a seminal battle, a turning point in the war for the Canadian Corps, and significant victory for Canada. The battle was later referred to as “the birth of a nation”.

Three months after rejoining his unit, on July 10, 1917, John was admitted to No. 56 General Hospital in Etaples, initially recorded with wounds SW (shell fragment or shrapnel wound). His wounds would be updated to GSW (gun shot wounds—multiple). One month later, on August 9, 1917, he was admitted to No. 6 Convalescent Depot, Etaples, recorded as GSW arms. The next day he was transferred to No. 5 Convalescent Depot Cayeux, recorded as SW left shoulder. He remained there until August 21, 1917, when he was discharged to Base Depot in Etaples, still recorded as GW left shoulder.

In mid-March 1918, John Salsbury rejoined his unit in the field, and three months later, on June 18, 1918, he was granted two weeks leave in the U.K. He returned from leave to the 15th Battalion on July 4, 1918, and soon found himself taking part in the last great campaign of the war. The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but the final victory came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line “*the turning point of the campaign*”.

The third offensive in Canada’s Hundred Days Campaign was the **Battle of Canal-du-Nord and Cambrai** in France (September 27-October 11, 1918). Against seemingly impossible odds and a desperate, fully prepared enemy, the Canadians fought for two weeks in a series of brutal engagements. They successfully channeled through a narrow gap in the canal, punched through a series of fortified villages and deep interlocking trenches, and captured Bournon Wood and the city of Cambrai. General Arthur Currie would call it “*some of the bitterest fighting we have experienced*” and the success came at a cost of 14,000 Canadian casualties.

In late September 1918, the General Currie-led Canadian Corps had been assigned the tasks of taking the Marquion Line, the village of Bournon, and Bournon Woods. The first obstacle the Canadians had to overcome was the Canal Du Nord. As the canal was impassable on the northern part of his front, Currie shifted almost 2.5 km to the south, and proceeded with preparations for the Canadian Corps to make its initial attack through a dry area between Sains-lez-Marquion and Moeuvres. The whole Corps would have to move through a narrow opening before fanning out with four divisions engaged on a battlefield that would rapidly expand to over 10,000 metres. In the dusk of the evening of September 26, 1918, the Canadians moved forward. By midnight they were assembled opposite the dry section of the canal, huddled together for warmth, and for the most part in the open. As dawn broke, at 05:20, the Canadian artillery’s opening barrage flashed out, and all four divisions attacked, shocking the enemy into action. Before they could retaliate, the initial waves had crossed the canal and were fanning out from the bridgehead.

Nevertheless, the follow-up troops suffered casualties as the enemy subjected the canal bed to a violent bombardment.

John Salsbury and the 15th Battalion, commanded by Major John Girvan, began its September 27th morning advance towards the canal at 08:45. Under constant fire, the 15th Battalion dashed across the canal and then the Agache River by making a plank bridge. The companies spread out, taking different routes northwards between the canal and the main road. A bitter struggle began for the streets with the German defenders fighting for every house. By 14:00, Marquion had been taken and the 15th Battalion had reached their final objective. During the day, the 15th Battalion captured 300 prisoners, but the cost had been 153 casualties.

On that September 27, 1918, Private John Salsbury of the 15th Battalion, lost his life while fighting in the Battle of Canal-du-Nord. He was acting as a stretcher-bearer when he was killed by enemy gunfire, shot through the head. His Circumstances of Death Register records him as; *Date of Casualty: 27-9-18. "Killed in Action". Whilst acting as a stretcher bearer with his Platoon in an attack at MILL COPSE, south of MARQUION, he was shot through the head by a bullet and instantly killed. Sains-Les-Marquion British Cemetery, 11 ¼ miles South of DOUAI, FRANCE.* That day, the Canadian Corps were successful in acquiring the canal, and attained the essential objective of capturing Bourslon Wood, a forested high ground.

Today, the "Bourslon Wood Canadian Memorial", located adjacent to the town of Bourslon and about 10 km west of Cambrai, commemorates the attack across the Canal Du Nord. A grey granite block monument sits atop of a hill and bears the message: "The Canadian Corps on 27th Sept. 1918 forced the Canal Du Nord and captured this hill."

The Canadians went on to take Cambrai, Denain, Valenciennes and Mons; then marched to the Rhine with the victorious Allies. One and a half months after John Salsbury's death, the Great War ended. John Salsbury, 25, is buried in Sains de Marquion British Cemetery, Pas de Calais, France. Plot I.A.30. On his headstone are inscribed the words, TO LIVE IN HEARTS WE LEAVE BEHIND IS NOT TO DIE. On the Sarnia cenotaph, his name is inscribed as J. Salisbury. John Reginald's father Thomas Salsbury passed away the following spring, in March 1919, in Northamptonshire, England.

SCOTT, Walter Frank

At age 22, Walter Scott left his career as a schoolteacher in order to serve his country. He arrived in France in March 1918 and was soon taking part in the last great campaign of the war. On the third day of the Battle of Amiens, a battle that British Field Marshal Haig called "the finest operation of the war", Walter Scott was killed by enemy machine-gun fire. He is buried in Cerisy-Gailly Military Cemetery, Somme, France.

Walter Frank Scott was born in the village of Brussels, Huron County, Ontario, on August 11, 1893, the youngest child of Peter (born January 18, 1851 in Huron County) and Margaret 'Maggie' Marion (nee Brine, born May 13, 1860 in Huron County) Scott. On November 13, 1883, thirty-two-year-old Peter Scott (a blacksmith) married twenty-three-year-old Margaret Brine in Harpurhey, Huron County, Ontario. Peter and Margaret Scott resided in Brussels and had five children together: Joseph Brine (born December 15, 1884); Donald Stewart (born December 6, 1886); Margaret 'Maggie' Aileen (born April 17, 1889); James Cline (born October 11, 1892); and Walter Frank Scott.

After being educated at Brussels' public school and Seaforth Collegiate, Walter Scott began teaching at Auburn and Colinville. He then attended the University of Toronto Faculty of Education 1913-14 and became Assistant Principal at Earl Grey School, Toronto the following year. Having taught school at Colinville and being employed by the Reid Wrecking Company for around a year, Walter was well known in Sarnia and the vicinity. Walter's nephew, Archie Scott, and a cousin, Mrs. Bolt Reid, lived in Sarnia as well.

Twenty-two-year-old Walter Scott enlisted in the Canadian Over-Seas Expeditionary Force on December 23, 1915 in Clinton, Ontario, becoming a member of the 33rd Huron Regiment. At the time, he was employed as a schoolteacher in Toronto. He then completed his Officer's Declaration Paper and was appointed Lieutenant of the 161st (Huron County) Battalion. He stood five feet eight and a half inches tall, and recorded his address as Brussels, Ontario, his next-of-kin as his father Peter in Brussels, and his profession as schoolteacher. Walter embarked overseas from Halifax bound for the United Kingdom on October 30, 1916, arriving in Liverpool, England on November 11, 1916.

Lieutenant Walter Frank Scott

Two months later, on January 12, 1917, Walter was at Shorncliffe where he qualified as first class in Musketry. Eleven months later, on December 27, 1917 at Witley Camp, Lieutenant Walter Scott was reported seriously injured, with no particulars given. The next day, his injuries were recorded as not serious--the listed injuries included; incision left eye-lid, forehead and left side of face swollen, lips of mouth swollen and scabbed.

After being under medical care for several days, on January 1, 1918, Lieutenant Scott rejoined the 161st Battalion. On February 23, 1918, he was transferred to the 4th Reserve Battalion at Bramshott, and approximately three weeks later, on March 15, 1918, he was transferred to the Canadian Infantry, 47th Battalion, Western Ontario Regiment. Two days later he arrived at the Canadian Corps Reinforcement Camp in France.

Two months after arriving in France, in mid-May 1918, Walter Scott joined the 47th Battalion for duty at the Front. One month after arriving at the front lines, on June 11, 1918, he was admitted to No. 3 Canadian Field Ambulance with a sprained right ankle. Four days later, he was transferred to No. 20 General Hospital in Camiers where he remained for almost three weeks. On July 3, 1918, he was discharged from the General Hospital to return to his battalion. He soon found himself fighting in the last great campaign of the war.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in Canada’s Hundred Days Campaign was the **Battle of Amiens** in France (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians advanced nearly 14 km--but the success came at a cost of 11,822 Canadian casualties.

Five weeks after being discharged from hospital, on August 10, 1918, the third day of the Battle of Amiens, Lieutenant Walter Scott of the 47th Battalion, lost his life during an attack, killed by enemy machine-gun fire. His Circumstances of Death Register records him as; *Date of Casualty: 10-8-18. “Killed in Action”. While leading his platoon in the attack upon the village of FOUQUESCOURT about noon on August 10th, he was struck by a machine gun bullet and although his wound was immediately dressed, he died half an hour afterwards. Beauport British Cemetery, 8 miles East of MOREUIL, FRANCE.*

Walter Scott, 25, is buried in Cerisy-Gailly Military Cemetery, Somme, France, Grave II.N.15. His name is also listed on the “Roll of Honour of the Ontario Teachers Who Served in the Great War.”

SIMMONS, Earl Sylvester (#845301)

Earl Simmons was eager to serve his country. He enlisted twice, the first time with his older brother, but health issues kept getting in the way of his ability to get overseas. Five weeks after the Great War ended, he lost his life in Sarnia where a full military funeral was held in his honour before he was interred at Lakeview Cemetery.

Earl Sylvester Simmons was born in Petrolia, Ontario, on May 1, 1894, the youngest son of Charles Solomon and Ellen Jane (nee Cleland) Simmons. Note: On both the 1901 and 1911 Censuses Earl Simmon's birth year was recorded as 1893; however, on his Attestation Paper, Earl recorded his birth year as 1894.

Charles Simmons (born November 15, 1864 in Stratford, Ontario) married Ellen Jane Cleland (born January 27, 1864 in Adelaide, Ontario) on November 15, 1884 in Oil City, Ontario. Charles supported his family working as a machinist, and he and Ellen Jane had three children together, all boys, all born in Petrolia: John Edward (born September 27, 1885, was later employed with Mueller Manufacturing Co.); Melville James (born March 10, 1889, also served in the Great War, losing his life fighting in France--see below); and Earl Sylvester Simmons.

In 1891, Charles and Ellen Jane Simmons lived in Petrolia, with their two children at the time, sons John (age six) and Melville (age two). In 1901, the Simmons family was living in Sarnia and included parents Charles and Ellen Jane (both age thirty-five), and their children John (age fifteen), Melville (age twelve) and Earl Sylvester (age eight). Six years later, on April 11, 1907, eldest son John Simmons, age 21 and a machinist, married twenty-one-year-old Sarah Rosanna Zealand in Sarnia. In 1910, John and Sarah Rose Simmons were living in Wayne Michigan, and in 1921, they were living at 309 Maxwell Street in Sarnia. John and Sarah Rose Simmons had seven children together: Earl Melville, Noble Charles, Dwight Sylvester, Edward John, James Percival, Margaret Gertrude and Ellen Maria Simmons.

In 1911, Charles and Ellen Jane Simmons (both age forty-four) lived at 112 Euphemia Street, Sarnia with their two sons: twenty-two-year-old Melville and eighteen year-old Earl Sylvester. Both father Charles and son Melville were employed as machinists at the time, while Earl was a labourer. On September 4, 1911, middle son Melville Simmons, 23, married Rhoda Jane Clark, 22, in London, Ontario, and they would live at 175 Christina Street, Sarnia. By that time, parents Charles and Ellen Simmons were residing at 257 Christina Street.

The next year, on August 12, 1912, Earl Simmons, age 21 and a machinist residing in Sarnia, married eighteen year-old Florence Cora Wagner (residing in Dawn Township) in Petrolia. Cora Wagner was the daughter of George (a farmer) and Sara (nee Morningstar) Wagner of Oil Springs. Earl and Cora Simmons would live at 299 Vidal Street, Sarnia.

Twenty-one-year-old Earl Simmons, along with his brother Melville, enlisted together in the Canadian Overseas Expeditionary Force on January 26, 1916 in Sarnia. Earl stood five feet eleven and a half inches tall, had brown eyes and black hair, was married, and recorded his trade or calling as machinist, and his next-of-kin as his wife Cora at 299 Vidal Street, Sarnia. Earl became a member of "A" Company, the Lambton 149th Battalion, Canadian Expeditionary Force. Approximately nine months later, on October 10, 1916, Private Earl Sylvester Simmons was discharged at Camp Borden, Ontario. Though his conduct and character while in the service was recorded as "good", he was discharged being declared "medically unfit".

One and a half years after Earl was discharged, in mid-April of 1918, parents Charles and Ellen Jane received the news that their middle son, Private Melville James Simmons, was officially reported dead, having passed away from wounds received in action in France.

Three months later, on July 27, 1918, twenty-four-year-old Earl Simmons enlisted a second time with the Canadian Overseas Expeditionary Force. He enlisted in Toronto, becoming a member of the Canadian Infantry, 1st Depot Battalion, 1st Central Ontario Regiment, with the rank of Private. This time he recorded his birthdate as May 1, 1893 in Sarnia, and his "present address" as Independence Road, Kansas City, Missouri, U.S.A. He recorded his trade or calling as machinist, and his next of kin as his wife, Mrs. H. Simmons, of 257 Christina Street, Sarnia (his parents address. It was later changed to 3rd Street, Fort Madison, Iowa). Earl also recorded that he had 10 ½ months prior military experience with the 149th Overseas Battalion, as a Private. On August 1, 1918, Private Earl Sylvester Simmons was approved for service by the Medical Board at Niagara Camp.

Two weeks later, on August 14, 1918, Earl was admitted to the hospital station at Niagara Camp, diagnosed with dermatitis seborrhoeica. Six days later, on August 20, 1918, he was discharged, recorded as "skin condition cured, readmission advised on surgical ward, diagnosis orchitis". On August 26, 1918, he was admitted to Toronto Base hospital diagnosed with orchitis (inflamed, enlarged and tender testicles).

In early October 1918, he was suffering headache, chills, and pain. He remained in hospital until mid-October, being discharged on October 16, 1918 with the recommendation for seven days sick leave. On October 30, 1918, he was admitted to a Toronto Stationary Hospital with influenza, pneumonia and tonsillitis. He remained in hospital for thirty-two days until December 2, 1918, before being transferred to Toronto Stationary Hospital at Exhibition Camp, for convalescence, diagnosed with influenza. He remained there for 4 days, recovered, and was released on December 6, 1918 and recommended for a ten days leave. Earl Simmons never had the opportunity to serve overseas.

Eleven days after being released from hospital in Toronto, on December 17, 1918, Private Earl Sylvester Simmons of the 1st Depot Battalion, Central Ontario Regiment, suddenly lost his life while at his Christina Street home in Sarnia. At the time of his death, the *Sarnia Observer* reported that, "he was a returned soldier, having been up and about the city up to almost the time of his death, which resulted from heart trouble". On the official death report, the doctor recorded that his death was the result of "accidental poisoning" at home. His Veterans Death Card records his death as, "*Died at his residence, No. 257 Christina St., Sarnia, Ontario, 17-12-18, Auto Intoxication*". His Canada War Grave Register records him as; *Circumstances of Death: Auto Intoxication – Taken ill at his home on December 16th, 1918. Dr. A.R. McMillan, of Sarnia, and Dr. R.G.R. McDonald, of Sarnia, were in attendance. Died at 12:30 A.M. December 17th, 1918. Lake View Cemetery, Sarnia, Ontario.* For parents Charles and Ellen Jane Simmons, their youngest son Earl's death came only eight months after they had received the news that their middle son, Melville, had been killed in action in France.

So a few days before Christmas 1918, Charles and Ellen Jane Simmons bid goodbye to their second child. Earl Simmon's funeral was held with full military honors from the family home on Christina Street. Services were conducted by Reverend George Hazen of the Devine Street Methodist Church and included members of the Great War Veterans' Association, the Sarnia Citizen's band, a firing party and a bugler playing the "Last Post". Earl Sylvester Simmons, 24, is buried in Lakeview Cemetery, Sarnia. On his headstone are inscribed the words, 845301 PRIVATE SYLVESTER E. SIMMONS CENT. ONT. REGT. C.E.F. 17TH DEC. 1918 and on the lower half is 845299 SAPPER MEL J. SIMMONS 11TH FIELD CO. C.E.F. DIED OF WOUNDS IN FRANCE 6.4.18. After the war, Charles and Ellen Jane Simmons moved to Fort Madison, Iowa, U.S.A.

Note: Earl Sylvester Simmons signed all documents in his Military File as "Earl Sylvester Simmons"; however, the name on his grave is inscribed as, "Sylvester E. Simmons".

SIMMONS, Melville James (#845299)

Melville Simmons, 26, had been married for more than four years and was working as a mechanic when he made the decision in January 1916 to serve his country. Eleven months after arriving in France, Sapper Melville Simmons of the Canadian Engineers was killed in action by a bomb dropped from an enemy aeroplane. He is buried in Roclincourt Military Cemetery, Pas de Calais, France.

Melville James Simmons was born in Petrolia, Ontario, on March 10, 1889, the middle son of Charles Solomon and Ellen Jane (nee Cleland) Simmons. Charles Simmons (born November 15, 1864 in Stratford, Ontario) married Ellen Jane Cleland (born January 27, 1864 in Adelaide, Ontario) on November 15, 1884 in Oil City, Ontario. Charles supported his family working as a machinist, and he and Ellen Jane had three children together, all boys, all born in Petrolia: John Edward (born September 27, 1885, was later employed with Mueller Manufacturing Co.); Melville James; and Earl Sylvester Simmons (born May 1, 1894, also joined the 149th Battalion, Canadian Infantry, 1st Battalion--see above).

In 1891, Charles and Ellen Jane Simmons were residing in Petrolia, with their two children at the time, sons John (age six) and Melville (age two). In 1901, the Simmons family was living in Sarnia and included parents Charles and Ellen Jane (both age thirty-five), and their children John (age fifteen), Melville (age twelve) and Earl Sylvester (age eight). Six years later, on April 11, 1907, eldest son John Simmons, age 21 and a machinist, married twenty-one-year-old Sarah Rosanna Zealand in Sarnia. In 1910, John and Sarah Rose Simmons were living in Wayne Michigan, and in 1921, they were living at 309 Maxwell Street in Sarnia. John and Sarah Rose Simmons had seven children together: Earl Melville, Noble Charles, Dwight Sylvester, Edward John, James Percival, Margaret Gertrude and Ellen Maria Simmons.

In 1911, Charles and Ellen Jane Simmons (both age forty-four) were living at 112 Euphemia Street, Sarnia with their two sons: twenty-two-year-old Melville and eighteen year-old Earl Sylvester. Both father Charles and son

Melville were employed as machinists at the time, while Earl was a labourer.

Later in the year, on September 4, 1911, twenty-three-year-old Melville Simmons married twenty-two-year-old Rhoda Jane Clark in London, Ontario. Rhoda Jane Clark, residing in Eastwood, Ontario at the time, was the daughter of Alfred Henry (a farmer) and Georgina Elizabeth (nee Sibbans) Clark, of Woodstock, Ontario. Melville and Rhoda Jane Simmons would reside at 175 Christina Street, Sarnia. By that time, Melville's parents Charles and Ellen Simmons were residing at 257 Christina Street. The following year, on August 12, 1912, the youngest Simmons boy--Earl Sylvester, 21, married Florence Cora Wagner, 18, in Petrolia, Ontario.

Melville Simmons was a resident of Sarnia for nineteen years and, prior to enlistment, was an employee of the Sarnia Fence Company. Twenty-six-year-old Melville, along with his younger brother Earl Sylvester, enlisted together in the Canadian Over-Seas Expeditionary Force on January 26, 1916 in Sarnia. Melville stood five feet ten inches tall, had grey eyes and black hair, was married and lived at 175 Christina Street in Sarnia at the time. He recorded his trade or calling as mechanic, and his next of kin as his wife Rhoda Simmons of 175 Christina Street, Sarnia. Melville became a member of the Lambton 149th Battalion, Canadian Expeditionary Force. His training took him to Camp Borden, where in early September 1916, he spent six days in hospital due to an illness.

One year after enlisting, on January 26, 1917, Melville embarked overseas from Canada bound for the United Kingdom aboard the *SS Grampian*. He arrived in England on February 6, 1917. Initially, Melville was taken on strength into the Canadian Engineers Training Depot, at the Army Camp at Crowborough. Three months later, on May 9, 1917, he sailed from England and arrived in France the next day to be part of the Engineers Pool. Eleven days later, on May 21, 1917, he was transferred to the 11th Field Company, 4th Division of Canadian Engineers, with the rank of Sapper. Sapper Melville Simmons joined this unit on the front line on May 23, 1917.

Approximately eleven months after arriving in France, on April 6, 1918, Sapper Melville Simmons of the 11th Field Company, Canadian Engineers, was wounded by a bomb from an enemy aeroplane. The attack happened at approximately 1:00 p.m. Melville lost his life half an hour later, the result of the wounds received after being hit. His Circumstances of Death Register records him as; *Date of Casualty: 6-4-18. Died of Wounds. Wounded by a bomb dropped from an enemy aeroplane at about 1 p.m. on April 6th, 1918, and died about half an hour later. ROCLINCOURT MILITARY CEMETERY, 2 miles North of ARRAS, FRANCE.*

Thirteen days later, on April 19, 1918, Charles Simmons at 257 South Christina Street in Sarnia received the following telegram from the Director of Records in Ottawa: DEEPLY REGRET TO INFORM YOU THAT 845299 PRIVATE MELVILLE J. SIMMONS, ENGINEERS, OFFICIALLY REPORTED DIED OF WOUNDS, APRIL 6, 1918. At the time of his Melville's death, his wife Rhoda Simmons was living in Woodstock, Ontario. Melville Simmons, 29, is buried in Roclincourt Military Cemetery, Pas de Calais, France, Grave VI.B.14.

Eight months after Melville's death, tragedy struck Charles and Ellen Jane Simmons again. In December 1918, their youngest son Earl Sylvester Simmons (who had enlisted with Melville), a former member of the 149th Battalion, lost his life in Sarnia, the result of accidental poisoning. Earl's funeral was held with full military honours, originating at the family home on Christina Street. Charles' and Ellen Jane's thoughts that day would also have been with their son Melville, buried somewhere in France. Earl Sylvester Simmons, 24, is buried in Lakeview Cemetery in Sarnia. On his headstone are inscribed the words, 845301 PRIVATE SYLVESTER E. SIMMONS CENT. ONT. REGT. C.E.F. 17TH DEC. 1918 and on the lower half is 845299 SAPPER MEL J. SIMMONS 11TH FIELD CO. C.E.F. DIED OF WOUNDS IN FRANCE 6.4.18. After the war, Charles and Ellen Jane Simmons moved to Fort Madison, Iowa, U.S.A.

SKINNER, William Bruce (#226164)

Raised by his grandparents in Point Edward, William Skinner was only eighteen years old when he enlisted in the Canadian Over-Seas Expeditionary Force in October 1915 in Sarnia. Nine months later he arrived in France as a member of the Canadian Cavalry. He was killed in action in one of the most brutal and horrific battles of the war. William has no known grave but is memorialized on the Menin Gate (Ypres) Memorial, Belgium.

William Wallace Wellington Bruce Skinner was born in St. Thomas, Elgin County, Ontario, on January 2, 1897, the son of Peter Cunning and Bella (nee McKerry) Skinner. William's grandparents were Angus and Mary McRury both originally from Scotland. Angus McRury was born about 1830 in North Uist, Outer Hebrides, Scotland, and had immigrated to Canada in 1851. Mary (nee MacKenzie) McRury was born about 1833 in North

Uist, Outer Hebrides, Scotland, and had immigrated to Canada in 1852. Both Angus and Mary McRury came to reside in Point Edward, Ontario. William was raised by his Point Edward grandparents, Angus and Mary McRury, after his own mother and father had passed away when he was an infant. William's other local relatives included his aunts Miss Sarah McRury, of 175 North Front Street (later 281 Emma St.); and Mrs. George Culley; L. McRury; and Mrs. D.J. McRury, of the city of Sarnia.

Angus and Mary McRury had five children of their own: Alexander, Catherine Georgina, Donald John, Archibald Ronald and Sarah McRury. In 1901, Angus (a dock labourer) and Mary McRury were residing in Point Edward with two of their children; twenty-seven-year-old Archibald (a farm labourer) and nineteen year-old Sarah McRury. In 1911, fourteen year-old William Skinner was living on Alexander Avenue in Point Edward with his grandparents, seventy-two-year-old Angus McRury (a labourer, GTR shed) and sixty-eight-year-old Mary McRury, and their daughter Sarah McRury (age twenty-nine, a grocery clerk). At the time, despite his young age, William was employed as a labourer at the Grand Trunk Railroad shed, alongside his grandfather Angus.

Eighteen year-old William Skinner enlisted in the Canadian Over-Seas Expeditionary Force on October 26, 1915 in Sarnia. He stood five feet ten inches tall, had blue eyes and brown hair, was single, and lived in Point Edward with his grandparents Angus and Mary McRury at the time. He recorded his trade or calling as machinist, and his next-of-kin as his grandfather Agnes McRury of Point Edward. William became a member of the "B" Squadron, 2nd Depot Regiment, Canadian Mounted Rifles, with the rank of trooper. Trooper William Skinner embarked overseas bound for the United Kingdom on April 2, 1916 aboard the *HMS Olympic*.

William Skinner arrived in England on April 12, 1916 and was taken on strength at Shorncliffe into the Royal Canadian Dragoons (a heavy cavalry unit). Almost three months later, in early July 1916, William completed his Military Will (a perforated sheet from his pay book) in which he wrote; "In the event of my death, I give the whole of my property and effects to my aunt, Miss Sarah McRury, Point Edward, Ontario." On July 6, 1916, William arrived in France, becoming a member of the Canadian Cavalry Brigade (CCB), with the rank of Private.

Seven months later, on February 21, 1917, the unit was renamed the Canadian Light Horse (CLH). One month later, on March 28, 1917, William was attached to the Assistant Provost Marshal (APM) Canadian Corps (a group of military police). He served with them for five months.

On August 28, 1917, William Skinner rejoined his CLH unit and was then granted leave until September 9, 1917. By mid-October 1917, William was back with his unit as it arrived with the rest of the Canadians in an area of Flanders, Belgium known as Passchendaele. On October 24, 1917, William was briefly attached to No. 1 Canadian Motor Machine Gun (CMMG) Brigade before returning to the CLH.

The **Battle of Passchendaele** in Belgium (October 26 – November 10, 1917) was waged in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and glutinous mud. Canadians overcame almost unimaginable hardships and horrific fighting conditions, and achieved a remarkable Canadian victory that few thought possible. But it came at a cost of almost 12,000 Canadian wounded and more than 4,000 Canadians killed.

Three weeks after arriving at Flanders, on November 7, 1917, Private William Skinner of the Canadian Cavalry, Canadian Light Horse, lost his life while fighting in the Battle of Passchendaele. William's death was officially recorded as, *Date of Death: 7-11-17. Killed in Action*. He has no known grave.

Private William Skinner, 20, is memorialized on the Menin Gate (Ypres) Memorial, Belgium, Panel 10. William's name is also inscribed on the plaque on the Memorial in the Village of Point Edward. William's grandfather, Angus McRury, passed away in March 1919 at the age of eighty-eight. William's grandmother Mary McRury passed away in May 1920 at the age of eighty-six. Both Angus and Mary McRury are buried in Lakeview Cemetery, Sarnia.

SMITH, Harry (#3131723)

England born Harry Smith, 28, was living in Sarnia when he was drafted under the Military Service Act of 1917. He never had the opportunity to serve overseas. Only weeks after being called to service in January 1918, he was admitted to hospital in London, Ontario. He died there a month later as a result of tuberculosis. Harry Smith is buried in Lakeview Cemetery, Sarnia.

Harry Smith was born in Burton-on-Trent, Stafford, England, on June 11, 1889, the son of William and

Minnie (nee Wood) Smith of England. Harry had at least one brother, William Smith Jr., born about 1888 in Staffordshire, England. At some point in his youth, Harry lost his father William Smith Sr., who passed away at age forty. In 1902, still residing in England, Harry had an attack of pneumonia and was sick for six weeks. He had employment for a time in a brewery, but on account of the dampness, he was forced to quit. He had a cough that was persistent throughout his life.

In 1907, eighteen year-old Harry and his brother William Jr., along with their mother Minnie Smith, immigrated to Canada. Only six weeks after arriving in Canada, Harry suffered a second attack of pneumonia and was unable to work for ten months. Harry ended up living in Sarnia with his widowed mother Minnie Smith at 492 Confederation Street. Two years before joining the military, Harry fell off an engine in the Sarnia round house, resulting in unconsciousness and coughing up a lot of blood. Harry was a member of St. John's Anglican Church, and was employed for a time with Imperial Oil Company before becoming a letter carrier.

In Europe, with the Canadian troops thinning at an alarming rate and no end to the war in sight, the government instituted the Military Service Act in 1917. Twenty-eight-year-old Harry Smith was drafted under the Military Service Act of 1917, Class One. He underwent his medical examination in Sarnia on November 15, 1917. He was called to service on January 9, 1918, reporting to the 1st Depot Battalion, Western Ontario Regiment (W.O.R.) in London, Ontario. Harry stood five feet eight and a half inches tall, had blue eyes and dark hair, and was single. He recorded his trade or calling as letter carrier and his next-of-kin as his mother Mrs. Minnie Smith of 492 Confederation Street, Sarnia.

Private Harry Smith

Private Harry Smith never had the opportunity to serve overseas. Less than two weeks after being called to service, after experiencing ill-health symptoms that included chills, malaise and coughing, he was admitted to the Army Medical Centre in London on January 19, 1918. There he was diagnosed with pneumonia. His mother Minnie Smith was able to visit him from Sarnia on January 23. While being treated in hospital, Harry experienced symptoms that included breathing difficulties, headaches, coughing with phlegm, difficulty sleeping, and considerable chest pain, that all deteriorated over time. By February 13, his condition had worsened and was recorded as: "breathing very difficult, pulse irregular, eyes rolling backward, respiration very laboured, perspiring profusely and condition shows no improvement."

On February 15, 1918, Private Harry Smith passed away at 1:15 A.M., as a result of tuberculosis, at Wolseley Barracks Hospital, London, Ontario. His remains were brought back to Sarnia where a funeral was held at his late residence. The Canada War Grave Register recorded his death as; *Acute Tuberculosis – admitted to hospital Jan. 20th, 1918 – had had previous attacks of lung trouble. Nursed by special nurse. Died from exhaustion. Lake View Cemetery, Sarnia, Ontario.*

Harry Smith, 28, is buried in Lakeview Cemetery, Sarnia, Ontario. On his headstone are inscribed the words, UNTIL THE DAY BREAK AND THE SHADOWS FLEE AWAY. On December 17, 1919, Harry's thirty-one-year-

old brother William Smith Jr. (a clerk) married thirty-two-year-old Rhoda Evelyn Lakin (born in England, immigrated to Canada in 1919) at St. John's Church in Sarnia. In 1921, sixty year-old widowed Minnie Smith was still residing at 492 Confederation Street in Sarnia, along with her son William Jr. (a labourer), his wife Rhoda Evelyn (both age thirty-three), and their infant daughter Miriam Smith.

SMUCK, David Radcliffe (#03676)

Sarnian David Smuck was a victim of one of the most tragic and controversial incidents in the Great War. Stationed aboard the *Llandovery Castle*, a Canadian hospital ship heading to England from Halifax, Private Smuck died when a German U-boat, against the rules of the Hague Convention, sank the defenseless ship in June 1918. David Smuck and his crew mates are memorialized on the Halifax Memorial.

David Smuck was born in Sarnia, on May 18, 1893, the son of Peter and Emily (nee Porter) Smuck. On November 25, 1876 in Brantford, Ontario, Peter Smuck, a 23 year old railway employee from Stratford, Ontario married Emily Porter, age 20, who was born November 14, 1856 in Ancaster, Ontario.

Peter and Emily Smuck had nine children together: George (born February 9, 1876); twin sisters May and Mabel Smuck (born May 24, 1884); Peter (born April 1, 1886); Blanche Emily (born January 5, 1888); John Wesley (born July 2, 1891); David Radcliff; Bertha (born November 30, 1895); and Marygald Cathelene Smuck (born March 12, 1898). In 1881, Peter and Emily, along with their four year-old son George were residing in Goderich, Ontario. Ten years later, in 1891, Peter and Emily had moved to Sarnia with their five children: George, May, Mabel, Peter and Blanche Smuck. Eight years later, on November 2, 1899, when David was six years old, Peter Smuck was killed accidentally when he was working as a railroad brakeman. The young father of nine was only 46. In 1901, forty-two-year-old widowed Emily Smuck was residing at 202 South Mitton Street in Sarnia, the head of the household, with all nine children ranging in age from twenty-nine to three: George (a brakeman with the GTR), May, Mabel, Peter, Blanche, John, David (age seven), Bertha and Marygald.

David's older brother (by two years) **John Wesley Smuck** enlisted in the Canadian Over-Seas Expeditionary Force on September 23, 1914 in Val Cartier, Quebec. Twenty-three-year-old John Smuck stood five feet six inches tall, had blue eyes and light brown hair, was single, and recorded his trade or calling as a machinist and his next-of-kin as his mother, Emily Smuck, in Sarnia. John became a member of #2 Stationary Hospital, Canadian Army Medical Corps (CAMC). As part of the First Contingent, he embarked overseas bound for the United Kingdom on October 3, 1914. In November 1914, Joseph Hay, G.T.R. locomotive foreman at Sarnia tunnel, received a letter from his friend John Smuck, with the Canadian Army Medical Corps, of the First Overseas Contingent. Following is a portion of that letter:

On Board H.M.T. City of Benares, November 7, 1914

My Dear Mr. Hay,

Just a few lines to give you a rough idea of our trip to date. We spent three weeks at Long Branch, seven miles outside of Toronto, and then to the notorious Valcartier camp. This place was more like a young city, board walks, electric lights, water works, and sewage system and banks. After three weeks more of life under tents we embarked at Quebec city on H.M.T. Scotian.

Here life was a change. Good beds or rather berths, and plenty to eat. We had 22 transports, besides our escorts. At night not one light was seen. Sometimes we felt a little creepy, but would retire to our large dining room to play cards or enjoy good music. After 21 days on water we arrived at Devenport. We were on board one week before disembarking. All noncoms. were granted shore leave to see the old historic city and also Plymouth. The reception given us was something to be well remembered.

On disembarking we marched to the railway station to entrain for Salisbury Plains, where we arrived the following day. It rained 23 out of 24 days we were camped there and we had wet feet continually, but not one man sick, which is considered a good record. Our unit is the first of the Canadians to leave for the front and are on our way now for the continent. Where? We do not know and if we did it would be impossible to let you know, but it is probably France. In sight of land now, but are anchored in the English channel. Why? Ask Kitchener! Our company is ready for anything from good to bad and hope to be home some day to relate my experiences in full.

Sincerely yours, John Smuck

No. 11 Stationary Hospital, C.A.M.C. First Canadian Expeditionary Force

Private John Wesley Smuck of the CAMC arrived in France with #2 Canadian Stationary Hospital on

November 8, 1914. By April 1915, he had been promoted up the ranks to Lance-Sergeant and then Sergeant. While overseas, John was hospitalized on a number of occasions: in late October 1915 due to a hernia; in late January 1916 (back in Shorncliffe, England) due to epilepsy; in late February 1917 (in Boulogne, France) due to influenza; and on two occasions in 1918 (in France) due to mumps. In early August 1917, John reverted to the rank of Private at his own request so he could be transferred to the 15th Battalion. John Smuck served in England and France and survived the war, being discharged on demobilization in London, Ontario on June 12, 1919.

Eight months later, on February 11, 1920, twenty-eight-year-old John Smuck married twenty year-old Emilie Olikier in St. John, New Brunswick. Emilie was born around 1899 in Belgium and had immigrated to Canada in 1920. In 1921, John (a machinist) and Emilie Smuck were residing at 186 Ross Avenue, Sarnia. Two days before Christmas of 1922, tragedy struck the young couple when John, 31, passed away in Sarnia. The cause of death was recorded as rheumatic endocarditis (an infection of the inner lining of the heart). The War Graves Register (Circumstances of Casualty) recorded that his death was attributed to his military service. John Smuck is buried in Lakeview Cemetery in Sarnia. Also see page 65 and 232.

Nine months after his brother John had enlisted, twenty-two-year-old **David Radcliffe Smuck** enlisted in the Canadian Over-Seas Expeditionary Force on June 28, 1915 in Sarnia. David stood five feet eight and a half inches tall, had blue eyes and fair hair, was single, and recorded his trade or calling as a barber, and his next-of-kin as his mother Mrs. Smuck at 202 Mitton Street, Sarnia. He also recorded that he was an active member of the 14th Field Artillery Militia. One month later, by late July 1915, David arrived overseas in England. Once there, he became a member of the Canadian Army Medical Corps (CAMC), No. 3 Stationary Hospital, with the rank of Private. Only days after arriving in England, on August 1, 1915, David proceeded to Dardanelles in Turkey.

In early September 1915, David wrote a letter to his mother Emily in Sarnia. In it, he described his travels so far aboard ship as it travelled from England, up the English Channel out into the North Sea, passing along the coast of Spain and Portugal, through the Straits of Gibraltar (*but I did not see the rock as it was about 2:00 a.m. in the morning*), into the Mediterranean Sea, along the north coast of Africa, and then by Algeria. Following is a portion of the letter he wrote while his ship was anchored in the harbor of Malta:

My Dear Mother,

Just a few lines to let you know we are this far on our trip, and I am feeling fine, hope everybody is well at home. We had a fine trip so far, excepting last Monday, and it was very rough coming through the Bay of Biscay, and I guess I know now what sea sickness is. We left Southampton a week ago today about 2:30 p.m., and we are still on board ship. I hope we soon get off as I am tired of travelling. We have No. 1 stationary hospital from France on board with us. From what I hear they are going to put all the Canadians down in the Dardanelles. They expect to have Constantinople in three months, but you can never tell...

The weather here is awfully warm, 110 to 114 in the shade, so that is going some. They are going to give us all a new outfit of clothing, something like overalls with big helmets. We do not hear much about the war at all. I haven't seen a paper for over a week, so I do not know what is going on. When in Shorncliffe all we could see was men in khaki. There seems to be great numbers of them, and signs up "Enlist Today." I saw young "Wireless" Smith since I have been over here, from Sarnia, and he said it was something awful in the trenches last winter for a couple of weeks. The water was up to his knees, and you had to half stand up, and if you stood straight up you would get a bullet....

Well, mother, I think I have told you all for the time. Give all at home my very best.

From your loving son, Dave

Certainly, the young barber from Sarnia did not have an easy time of it. On October 17, 1915, David was admitted to No. 3 Stationary Hospital in West Mudros (island of Lemnos, Greece) due to diarrhea. He would be discharged to duty three weeks later. On December 30, 1915, he was again admitted to No. 3 Stationary Hospital, Mudros, this time due to jaundice, and recorded as "seriously ill". By mid-January 1916, he had been transferred to No. 3 Canadian Stationary Hospital in Abasia, Egypt, where his status had changed from "previously reported seriously ill" to "now reported dangerously ill". On January 17, 1916, Emily received the following telegram from Ottawa at her Mitton Street home: SINCERELY REGRET TO INFORM YOU NO. 3676, PTE. DAVID RADCLIFFE SMUCK, NO. 3 STATIONARY HOSPITAL, OFFICIALLY REPORTED SERIOUSLY ILL. JAUNDICE. WILL SEND FURTHER PARTICULARS WHEN RECEIVED.

ADJT.-GENERAL

On January 21, 1916, still suffering with jaundice, David was admitted to Valletta Military Hospital in Malta,

and the next day was transferred to St. Andrew's Military Hospital in Malta. One month later, on February 19, 1916, he was invalided back to Shorncliffe, England aboard the hospital ship *Essequibo*. On February 27, 1916, he was admitted to Royal Victoria Hospital in Netley, near Southampton, England, where his condition was recorded as "casualty now reported to be ineffective – jaundice" and "enteric fever". On March 16, 1916, he was transferred to Addington Park War Hospital in Croydon because he suffered from enteric fever. One month later, on April 19, 1916, he was admitted to the Woodcote Park Convalescent Hospital in Epsom, still with enteric fever. Nearly five weeks later, David was declared fit for duty and was discharged from Woodcote Park on May 22, 1916.

More than nine months later, on March 5, 1917, David Smuck returned to Canada on furlough aboard the SS *Metagama*. He remained in Sarnia until May 14, 1917. By October 1917, David was back in Shorncliffe, England. Three months later, on January 22, 1918, he was posted to No. 16 Canadian Field Ambulance, Shorncliffe. Two months later, on March 21, 1918, Private David Smuck was posted to the Canadian Hospital Ship *Llandoverly Castle*. The **HMHS *Llandoverly Castle*** was an 11 000 ton Canadian Hospital Ship. It had been chartered by the Canadian Government and was in the service of carrying wounded and sick from England to Canada for many months.

In June 1918, the ship was returning to Liverpool, England after having brought 644 Canadian casualties back to Halifax, Nova Scotia. Being a Hospital Ship, it was, in accordance with international law, clearly identified as such. On each side of the *HMHS Llandoverly Castle*, a brightly illuminated Red Cross was displayed with full strings of electric lights. The ship was unarmed and was sailing without escort. On board, the crew comprised one hundred and sixty-four men, eighty officers and men of the Canadian Medical Corps (including Private David Smuck), and fourteen nurses, for a total of two hundred and fifty-eight persons. According to the Hague Convention, an enemy vessel had the right to stop and to search a Hospital Ship, but not to sink it.

On the night of June 27th, 1918, at about 9:30 p.m., German submarine U-86 made no attempt to search the Hospital Ship. Captain Helmut Patzig of U-boat 86 was suspicious, and, without warning, U-86 torpedoed the *Llandoverly Castle*, about 114 miles southwest of the Fastnet Rock (Ireland). The *Llandoverly Castle* sank within ten minutes; however, a number of lifeboats were lowered successfully. Those who survived the blast proceeded to attempt to rescue many of the survivors struggling in the water. They were interrupted by Captain Patzig of the surfaced German submarine, who started interrogating crew members to obtain proof that the *Llandoverly Castle* was also an ammunition carrier or was sheltering American airmen on board. When the German Captain could secure no proof, he prepared for diving and ordered his crew below deck.

Captain Patzig, two officers and the boatswain's mate stayed on deck. The U-boat did not dive, but started firing with machine guns at the life boats to kill all witnesses and to cover up what had happened. When the submarine did leave, it attempted to ram the lifeboats in the water, and once clear, launched shells into the area of the survivors. To further conceal this event, Patzig extracted promises of secrecy from his crew and faked the course of U-86 in the logbook. Only one lifeboat survived the attack. Thirty-six hours after the attack, twenty-four survivors were rescued in the remaining lifeboat. In total, two hundred thirty-four persons lost their lives in the sinking of the *Llandoverly Castle* Hospital Ship, including eighty-eight of the ninety-four Canadians on board, and all fourteen Nursing Sisters who had managed to board one of the lifeboats.

Private David Smuck of the Canadian Army Medical Corps, lost his life in the brazen June 27, 1918 enemy attack on the Canadian Hospital Ship *Llandoverly Castle*. Initially listed as, *Missing*, David Smuck was later officially listed as, *Previously reported missing believed drowned now for official purposes presumed to have died on or since 27-6-18. Lost at sea on "Llandoverly Castle". The Halifax Memorial, Halifax, Nova Scotia*. Private David Smuck, 25, of Sarnia has no known grave. He is memorialized with his shipmates on the Halifax Memorial, Halifax, Nova Scotia, Panel 2.

The attack on and sinking of the *Llandoverly Castle* was not only one of the most controversial events during World War I--it was also the most significant Canadian naval disaster of war. Canadians were rightly incensed after the attack and used the fate of the doomed hospital ship as a rallying cry for the Canadian troops during the final months of the war in its Hundred Days Campaign.

After the War, the British initiated a War Crimes trial (the Leipzig trials) against the officers of U-86. The German Captain Helmut Patzig could not be found and was never brought to trial. He would re-appear in time to serve with the German Navy in the Second World War. The two officers were tried and convicted, and sentenced to four years of hard labour. On their way to prison, the officers escaped, were never recaptured, and never served any time in prison.

As the war ended, and in the few years after, a number of the Smuck family members would pass away. David's twenty year-old sister Marygald Cathelene Smuck (a bookkeeper), passed away on October 18, 1918 in Sarnia, the result of pneumonia. David's twenty-eight-year-old sister Blanche Emily Smuck (then Arnold), passed away on January 3, 1919 in Chicago, Illinois. David's thirty-one-year-old brother, World War I veteran John Wesley Smuck, passed away on December 23, 1922 in Sarnia, the result of rheumatic endocarditis that was attributed to his military service. The matriarch of the family, Emily Smuck, a housekeeper, passed away at the age of sixty-nine on July 31, 1929 in Sarnia. A number of the Smuck family members, including war veteran John Wesley Smuck, and matriarch Emily Smuck, are buried in Lakeview Cemetery in Sarnia.

SOPER, Russell Wright

Russell Wright Soper, an architect in Sarnia, enlisted in the Great War in 1916. He survived Passchendaele, but was killed in April 1918, 11 days before his only child, Ernest, turned one. Lieutenant Soper of the 116th Battalion, was killed in action while fighting in France. When the unit to the left of his was forced to retire near Mericourt, the position of his Battalion was threatened. He was in charge of filling in a communication trench to block the enemy's advance. At approximately two minutes past midnight while in the trench with his brother-in-law Ernest Hartley Nutting, the Sarnian was killed. The 28 year old officer Russell Wright left behind his wife, Alma, and one son.

Russell Wright Soper was born in Whitby, Ontario on April 20, 1889, the son of Armon (born June 16, 1846) and Elizabeth Ann (nee Wright, born July 16, 1854) Soper. On November 25, 1875, Armon, a professor of electricity at the time, married Elizabeth Wright in Prince Albert, Ontario. Armon and Elizabeth Soper had two children together. Unfortunately, their first child, Clarence Percy, born December 12, 1877, passed away at a young age. Nine year-old Clarence died as a result of diphtheria on October 12, 1887, a year and a half before Russell was born.

In 1891, Armon and Elizabeth Soper along with two year-old Russell Wright, were residing in Port Perry, Ontario, where Armon supported his family working as a telegraph operator. Ten years later, in 1901, Armon and Elizabeth Soper, and their eleven year-old son Russell, along with their sixteen year-old domestic Victor Wilson and twelve year-old servant Maud Buchanan, were residing in Cardwell District, Ontario. At the time, Armon was employed as a merchant and domestic Victor Wilson was employed as a clerk. The next year, on September 25, 1902, when Russell Soper was thirteen years old, Armon Soper passed away in Port Perry at the age of fifty-six.

Russell Soper was educated in Port Perry public and high schools and, upon graduating from collegiate, he taught there for two years. Russell then attended the University of Toronto in the Applied Science Program and obtained a four-year degree in Architecture (1909-13). In 1911, twenty-two-year-old Russell was rooming at the house of Hannah Stiver (age sixty) at 225 Robert Street in Toronto, along with two other roomers: Gertrude Sewell (age fifty-nine) and James Stiver (age twenty-seven). The following is a portion of what was written below Russell's photograph in the 1913 University of Toronto yearbook; *As a student of Architecture at S.P.S., he has fully justified his choice of a profession, both from the excellence of his work in design, his geniality, and his ability to cope with any situation as it arises.* On April 21, 1913, one day after his twenty-fourth birthday, Elizabeth Ann, Russell's mother, passed away at the age of fifty-eight.

Russell Soper worked as an architect in Sarnia for several years and had opened his office in the Carter building on Front Street. Rapidly making a name for himself among local builders and contractors, Russell drafted plans for several buildings in the city and vicinity. He was also an active member of the Sarnia Tennis Club and a member of the 27th Lambton Regiment. In the Sarnia City Directory 1916, Russell was recorded as residing at 168 Front Street.

Provisional Lieutenant Russell Soper of the 27th Lambton Regiment attended a School of Infantry in London, Ontario from March 6, 1916 to April 30, 1916, where he obtained his Certificate of Military Qualifications and earned the rank of Lieutenant. On May 20, 1916, Lieutenant Russell Soper obtained another Certificate of Military Qualification at an Officer's training course in London, Ontario. He passed a prescribed examination that qualified him for the rank of Captain.

Four days later, on May 24, 1916, twenty-seven-year-old Russell Soper married twenty-four-year-old Alma Priscilla (nee Nutting) in Uxbridge, Ontario. Alma, born July 6, 1891 in Cannington, Ontario, was the daughter of Marshall Lafayette, a teacher, and Priscilla Sarah (nee Jones) Nutting, of Uxbridge, Ontario. Alma's younger brother was **Ernest Hartley Nutting**, born December 18, 1894. Ernest Nutting enlisted with the 116th Battalion on

November 26, 1915 in Uxbridge. He arrived in England on July 31, 1916 and in France on February 11, 1917 where he rose to the rank of Sergeant with the 116th. He allocated much of the money that he earned each month while serving overseas to his widowed mother, Priscilla Nutting in Uxbridge. Both Ernest Nutting and Russell Soper served with the 116th Battalion; in fact, they were together in the same trench when Russell was killed. Ernest Nutting survived the war and was discharged on demobilization in Toronto in March 1919.

Russell and Alma Soper had one child together, Ernest Haig Soper, born April 13, 1917 in Uxbridge, Ontario, while Russell was overseas.

Six weeks after getting married, twenty-seven-year-old Russell Soper enlisted in the Canadian Over-Seas Expeditionary Force (CEF) on July 10, 1916, at Niagara Camp, Niagara on the Lake. He stood five feet nine inches tall, had hazel eyes and brown hair, recorded his present address as Uxbridge, Ontario, his trade or calling as architect, and his next-of-kin as his wife Alma Soper in Uxbridge, Ontario. He also recorded his prior military experience with the 27th Regiment in Sarnia, six months as a Lieutenant. On July 23, 1916, Russell Soper was appointed Acting Sergeant in the Canadian Infantry with the 116th Battalion, Central Ontario Regiment at Camp Borden.

Lieutenant Russell Wright Soper

Two months after marrying, Russell embarked overseas from Halifax on July 23, 1916, bound for the United Kingdom aboard the *SS Olympic*. He arrived in Liverpool on July 31, 1916. Two and a half months later, on October 14, 1916, Russell was promoted to temporary Lieutenant of the 116th Battalion at Camp Witley. Four months later, on February 12, 1917, he was transferred to the 2nd Reserve Battalion at Camp Bramshott. After five more months, Lieutenant Russell Soper proceeded from East Sandling to France with the 116th Battalion on August 2, 1917. He arriving the following day and by the first week of September 1917, he arrived at the front lines.

Russell Soper served with the 116th Battalion in one of the most brutal battles of the war. The Battle of Passchendaele in Belgium (October 26 – November 10, 1917) was waged in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and glutinous mud. Overcoming almost unimaginable hardships and horrific fighting conditions, the remarkable Canadians obtained a victory that few thought possible. It came, however, at a cost of almost 12,000 Canadian wounded and more than 4,000 Canadians killed. Surviving this battle, the 116th saw action on the Lens Front into the winter months.

On January 26, 1918, Lt. Russell Soper was granted fourteen days leave in Nice, France. He rejoined his unit at the front lines on February 10, 1918. Approximately three weeks later, on April 2, 1918 (eleven days before his son's first birthday), Lieutenant Russell Soper of the 116th Battalion, was killed in action while fighting in France. When the unit to the left of his was forced to retire near Mericourt, the position of his Battalion was threatened. He was in charge of filling in a communication trench to block the enemy's advance. At approximately two minutes past midnight while in the trench with his brother-in-law Ernest Hartley Nutting, the Sarnian was killed.

Lieutenant Russell Wright Soper's death was officially recorded as, *Killed in Action, In the Field (France)*

on April 2, 1918. Following is an excerpt from the records of the 116th Battalion in France that includes a reference to the death of Russell Soper:

Towards the end of February the battalion moved back to its old familiar hunting ground around Avion, where, although the trenches and general conditions were excellent, we sustained a series of misfortunes. Patrols went out every night through the ruins of Avion to try and locate enemy posts and whilst engaged in this work we lost two of our officers, Lieutenant C. R. Hillis and Lieutenant R. W. Biggar, within a few days of each other. From this front we moved south and on the 1st of April we were situated in the New Brunswick trench, in front of Mericourt.

During the last three months two important changes in our organization took place which it may be wise to record.

Major G. R. Pearkes, recently awarded the Victoria Cross for gallant work at Passchendaele with the 5th C.M.R., was appointed Officer Commanding 116th Battalion, to replace Colonel Sharpe, whose illness in England seemed likely to keep him away from France for an indefinite period.

Major J. Sutherland, at one time a Company Commander in the 52nd Battalion, but recently an instructor at Ferfay, was appointed second in command to Lt.- Colonel Pearkes.

The German grand offensive, which was to land him at the gates of Paris, had commenced, and in consequence the "staff" were showing very distinct signs of nervousness commonly called "wind up."

The First, Second and Fourth Canadian Divisions had been, or were being withdrawn from the line to be in readiness for action wherever they might most be needed, and the Third Division was left to defend Vimy Ridge as best it could, with nothing behind it except its own artillery and a couple of labour battalions employed in agricultural work, which had lately become a feature of modern warfare. During the day the Brigadier paid a visit to Battalion Headquarters, and, amongst other things, suggested that we might carry out some kind of raid in order to get identification, and by this means discover the enemy plans.

At 6 p.m. a meeting of the Company Commanders was called, and within the hour it was arranged to send out a battle patrol of one officer and twenty-five O.R s. from each Company, to work independently on given frontages. It was also arranged that whichever patrol was successful in capturing a prisoner, would send up a red flare immediately. The operation was scheduled to commence at 11 p.m., without artillery or machine gun support.

At 9 p.m. a message was received from the Divisional Commander stating that identification on our front might be necessary, and at 10 p.m. the Corps Commander wired in saying that it was necessary, so that, all things considered, our preparations were probably well timed.

"D" Company patrol, under Captain Baird, was the first to start the quarry, for shortly after setting out it ran into a strong German patrol on its way over to our lines. With the battle cry "Come on Toronto," Captain Baird, followed by his patrol, rushed on the Germans before they had time to move and a regular scrimmage took place, during which Captain Baird lost the use of his right arm, due to the displacement of one of the muscles. He was in the act of capturing the German patrol leader when his right arm collapsed and his revolver dropped from his hand. The German officer immediately seized him round the neck and was giving him a rough time when one of our party shot the German dead. In the meantime the remainder of our patrol had succeeded in capturing two prisoners and put the rest to flight.

*Red flares were immediately sent up and all parties returned to our lines in high spirits, having obtained the "necessary identification" asked for by the Corps only two hours previously, although this achievement was greatly dimmed by the loss of two officers killed (Lt. J. A. Gibson and **Lt. R. W. Soper**).*

Ernest Haig Soper (son of Russell Wright and Alma Priscilla Soper)

Russell Soper left behind his wife Alma Priscilla (nee Nutting) Soper and their one year-old son Ernest. In 1921, twenty-nine-year-old widow Alma Soper (a teacher) and their four year-old son Ernest, were residing in Uxbridge, along with her sixty-three-year-old mother Priscilla Nutting, and eighty-three-year-old grandmother Elizabeth Jones. Years later, Russell and Alma Sopers' son, Ernest Haig Soper, served in World War II.

Russell Wright Soper, 28, is buried in La Chaudiere Military Cemetery, Vimy, Pas de Calais, France, Grave I.C.3. Alma Soper lived to one hundred years of age. In the Uxbridge Cemetery in Durham, Ontario, there is a grave commemorating both Russell and Alma Soper. Inscribed on the gravestone are the words, IN LOVING MEMORY OF RUSSELL WRIGHT SOPER LIEUT. 116 BATT. C.E.F. APRIL 20, 1889 – APRIL 2, 1918, KILLED IN ACTION AND HIS BELOVED WIFE ALMA PRISCILLA NUTTING JULY 6, 1891 – DEC. 27, 1991. SOURCES: A, B, C, D, E, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z

STEELE, James (#3130337)

After emigrating from Scotland and finding work at Imperial Oil, James Steele, 34, was drafted into the Canadian army under the Military Service Act of 1917. In mid-August 1918, Private Steele was deployed to the front as a member of the Canadian Infantry, 5th Battalion. Three weeks later, while fighting during the Hundred Days Campaign, James was wounded by enemy shrapnel during the Battle of Arras and Breaking the DQ Line. He died later that day as a result of his wounds and is buried in Ligny-St. Flochel British Cemetery, Averdoint, Pas-de-Calais, France.

James Steele was born in Shotts, Lanarkshire, Scotland, on May 6, 1883, the son of Mary Steele. At some point, James and his sister Margaret Steele immigrated to Canada and came to reside in Sarnia. In 1914, James and Margaret were residing at 232 Devine Street. In 1916 and 1917, James was still residing at 232 Devine Street and was employed as a pumper at Imperial Oil Company.

In Europe, with the Canadian troops thinning at an alarming rate and no end to the war in sight, the government instituted the Military Service Act in 1917. Thirty-four-year-old James Steele was drafted under the Military Service Act of 1917, Class One. He underwent his medical examination in Sarnia on October 12, 1917 and was called to service on January 3, 1918, reporting to the 1st Depot Battalion, Western Ontario Regiment in London, Ontario. James stood five feet ten inches tall, had blue eyes and brown hair, was single, and was residing at 360 Maria Street in Sarnia at the time. He recorded his trade or calling as locomotive fireman, and his next-of-kin as his sister, Margaret Steele, who was residing at 284 Davis Street in Sarnia.

One month later, on February 4, 1918, James embarked overseas bound for the United Kingdom aboard the *S.S. Grampian*. He arrived in England on February 16, 1918. He was taken on strength into the 4th Canadian Reserve Battalion at Bramshott. Approximately three and a half months later, on June 2, 1918, James departed from Camp Witley and arrived in France that day, where he was transferred to the 47th Battalion. Two weeks later, he was taken on strength into the Canadian Corps Reinforcement Camp (CCRC)--where troops were held before being sent to reinforce existing units. Nine weeks later, on August 14, 1918, Private James Steele became a member of the Canadian Infantry, 5th Battalion, Saskatchewan Regiment, joining that unit at the front line the next day. He soon found himself taking part in the final campaign of the Great War.

The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany's unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one in which all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km.

The second offensive in Canada's Hundred Days Campaign was the **Battle of Arras and Breaking the DQ Line** in France (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line--a series of strong defensive trenches and fortified villages. General Sir Julian Byng called the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line “*the turning point of the campaign*”, but it came at a cost of 11,400 Canadian casualties.

Less than three weeks after arriving at the front, on September 1, 1918, Private James Steele was killed in

action during the Battle of Arras and Breaking the DQ Line. He was killed after being hit by enemy shrapnel. On that day, Private Steele was recorded as “dangerously wounded” and “shrapnel wound hip”. He was taken to No. 7 Casualty Clearing Station and passed away that day as a result of the wounds he had received.

In early September 1918, James’ sister Margaret in Sarnia, received word that her brother, *Pte. James Steele, infantry, had been dangerously wounded and admitted to the 7th Canadian Casualty Clearing Station*. Later, she received the news that Private James Steele was officially recorded as, *Died of Wounds – No. 7 Casualty Clearing Station*. James mother, Mary Steele, who was residing at South Bridge Street in Airdrie, Scotland, received the Memorial Cross after the war for the loss of her son. James Steele, 35, is buried in Ligny-St. Flochel British Cemetery, Averdoint, Pas-de-Calais, France, Grave III.D.2.

STOTT, Herbert (#845252)

Herbert Stott had many reasons not to fight in The Great War. He was married, had five children, and was 33. Nevertheless, when he decided to enlist in early December of 1915, the *Sarnia Observer* reported that the first recruit to be taken on by the Lambton 149th Battalion was Herbert Stott. Herbert, unfortunately, died less than three months before the war ended. Complications from wounds he suffered while fighting in the early stages of the Battle of Amiens led to his death. Herbert left behind his wife, Annie, his five children, and his parents in England. Herbert Stott, 36, is buried in Dewsbury Cemetery, Yorkshire, United Kingdom, in his father’s plot.

Herbert Stott was born in Ravensthorpe, Yorkshire, England, on March 1, 1882, the son of John and Annie Stott, of Dewsbury, England. At some point while in England, Herbert married Annie Hicks (born about 1888 in Bingley, Yorkshire, England) and the couple had five children together: John Alfred (born about 1905); William (born about 1907); Leonard (born about 1908); Sarah Annie (born about 1910); and Edith (born about 1915 in Ontario).

In 1911, Herbert Stott, 28, and Annie Stott, 23, were residing in Yorkshire, along with their four children. At the time, Herbert was employed as a silk spinning overlooker and Annie was employed as a worker in the silk mill. Two years later, in 1913, the Stott family immigrated to Canada, and by 1916 they were residing at 294 Queen Street, Sarnia.

Thirty-three-year-old Herbert Stott enlisted in the Canadian Over-Seas Expeditionary Force (CEF) on December 3, 1915 in Sarnia. He stood five feet three inches tall, had blue eyes and brown hair, and recorded his trade or calling as labourer, and his next-of-kin as his wife Annie Stott of 294 Queen Street, Sarnia. Herbert became a member the Lambton 149th Battalion, CEF. In early December of 1915, the *Sarnia Observer* reported that the first recruit to be taken on by the Lambton 149th Battalion was Herbert Stott. One year later, in mid-December 1916, Herbert Stott of the 149th Battalion spent a week in the military hospital in London due to rubella. In the 1916 and the 1917 Sarnia Directory’s, Herbert’s occupation was recorded as “soldier”.

Private Herbert Stott

The married father of five embarked overseas from Halifax bound for the United Kingdom aboard the SS *Lapland* on March 25, 1917. He arrived in Liverpool on April 7, 1917, and was first taken on strength into the 25th Reserve at Bramshott. Approximately two months later, on June 1, 1917, Herbert was taken on strength into the 161st Battalion at Camp Witley. Eight and a half months later, on February 24, 1918, he was transferred into the 4th Reserve Battalion at Bramshott. Four days later, Private Herbert Stott arrived at the Canadian Base Depot in France, becoming a member of the Canadian Infantry, 1st Battalion, Western Ontario Regiment (WOR). In the early days of April 1918, he was at Canadian Corps Reinforcement Camp, and on May 13, 1918, he joined his unit at the front lines.

Herbert Stott of the 1st Battalion, WOR, soon found himself part of the last great campaign of the war. The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in Canada’s Hundred Days Campaign was the **Battle of Amiens** in France (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km – but it came at a cost of 11,822 Canadian casualties.

Less than three months after arriving at the front lines, on August 8, 1918, Private Herbert Stott was wounded in action while fighting in the early stages of the Battle of Amiens. On that day, he was hit by enemy gunfire. He was admitted to 1st Canadian Field Ambulance, then a Canadian Casualty Station, suffering a gunshot wound, left thigh. The next day, he was admitted to #5 General Hospital, Rouen, his injuries recorded as “*gun shot wound lower extremities. Flesh Lt.*” Five days later, on August 14, he was admitted to a War Hospital in Exeter, England, recorded with a gun shot wound left side, seriously ill. Herbert Stott’s parents, John and Annie Stott in England, even had the opportunity to visit their son in hospital during his recovery.

Doctors operated on Herbert Stott on August 15, where an incision showed gas gangrene so they decided to amputate his left leg. Early the next day, he was assessed as “dressed stump looks well, general condition much improved.” Later that evening, on redressing the wound, some gas was noticed and his pulse was very low. The following morning, on August 17, 1918, at 6:00 a.m., Herbert Stott lost his life as a result of the wounds he had received. His death was later officially recorded as, *Died of Wounds – (SW.Lt.Side) War Hospital, Exeter.*

On August 19, 1918, Annie Stott on Queen Street in Sarnia received the following telegram from the Director of Records in Ottawa: DEEPLY REGRET TO INFORM YOU 845252, PTE. HERBERT STOTT, INFANTRY, OFFICIALLY REPORTED DIED OF WOUNDS AT WAR HOSPITAL EXETER, ON AUGUST 17TH, 1918, GUNSHOT WOUND IN SIDE AND AMPUTATION OF LEG.

Only days prior to receiving the above telegram, Annie had been sent a message that her husband Private Herbert Stott had been wounded. When Annie received the telegram announcing her husband’s death, she and their five children--the youngest child Edith being three years of age--were preparing for a picnic. There would be no picnic that day.

Following is an article from a Dewsbury, England newspaper, reporting on the death of Herbert Stott:

Westtown Soldier Buried with Military Honors

Another painful local casualty is that of Pte. Herbert Stott, the son of Mr. and Mrs. J. Stott, of 12 Cemetery Road, Westtown, who has died of wounds. He was a Canadian soldier, joining the Dominion forces in Lambton’s Own at the beginning of the war, and a sad feature of the case is that his wife and five young children are left at Ontario, Canada. He was wounded in the trenches in the thigh on the 10th August, and was brought to Exeter. On Thursday last week his parents received a wire saying: “Son seriously wounded, come at once.” They immediately visited him and though the amputation of his leg had become necessary and the operation had been performed, when they left him on the Friday evening he was quite cheerful. Mr. and Mrs. Stott reached home on Saturday morning, and at six o’clock in the evening came a wire to say their son was dead.

The internment, with military honors, took place at Dewsbury Cemetery on Wednesday, the Rev. J.J. Baldwin, Vicar of St. Matthew’s, Westtown officiating. There was a very considerable expression of public sympathy,

and a military escort (with firing party), under the command of Sergt. Major Hemingway. A band with muffled drums was in the procession. The coffin, wrapped in the Union Jack, was borne by the soldiers from the top of the Cemetery road to the graveside, where after the last rites had been performed, several volleys were fired and the "Last Post" sounded.

It was a strange coincidence, which Pte. Stott himself remarked, that when he arrived in Canada several years ago it was on the 28th March, that he sailed from Canada with his unit on that date, and that he went to France from Bramshott this year on the same date. "I wonder," he said, "where I shall be the next 28th of March?"

Herbert Stott wasn't the only member of his family to see action. His brother, Robert, was a Private with the Northumberland Fusiliers, and survived being gassed in France. He was unable to attend his brother Herbert's funeral. Herbert's brother-in-law, Pte. Herbert Drake, had his knee-cap blown off and had been discharged.

On December 23, 1920, thirty-three-year-old widow Annie Stott remarried, her new husband being Englishman John Horace Hyne, 26, a boilermaker who had immigrated to Sarnia in 1907. Annie and John Hyne resided at 501 Confederation Street, Sarnia, along with Annie and Herbert's five children: John Alfred, William, Leonard, Sarah Annie and Edith Stott.

At least three of the Stott children married in Sarnia: John Alfred Stott (at age twenty, of 480 Wellington Street, a CNR employee) married Helen Victoria Ash on September 11, 1924 at St. John's Rectory in Sarnia; Sarah Annie Stott (at age seventeen, of Sarnia, a spinster) married Eric Wray on June 26, 1926 in Wainfleet, Welland County, Ontario; William Stott (at age twenty, of 480 Wellington Street, a machinists helper) married Mildred Marshman on September 6, 1926 in Sarnia; and Leonard Stott (at age twenty-one, of 418 Wellington Street, a Sectionman) married Mildred Vietta Waite on June 16, 1928 in Sarnia.

Herbert Stott, 36, is buried in Dewsbury Cemetery, Yorkshire, United Kingdom, Grave K."U" 340, in his fathers plot. On Herbert's headstone are inscribed the words, GREATER LOVE HATH NO MAN THAN THAT HE LAY DOWN HIS LIFE FOR HIS FRIENDS.

SUMMERS, M.J. - No information found in searched records links this name to Sarnia.

Possibly Earl Summers. No confirmed information from a number of sources.

THOMSON, Daniel Alexander Edward (#845352)

Daniel Alexander Edward Thomson suffered a fate that too many soldiers in The Great War experienced. After enlisting in 1915, Daniel, age 21, was deployed overseas but did not arrive in France until early in 1918. Approximately six months after arriving in France, on September 3, 1918, Private Daniel Thomson Jr. of the 47th Battalion was killed in action in the battle to break the DQ Line. Daniel Thomson's body was never recovered. He was simply recorded as *Date of Casualty: 3-9-18. Killed in Action*. Twenty-four-year-old Daniel Thomson Jr. has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France.

Daniel Thomson was born in Alvinston, Ontario, on June 24, 1894, the youngest son of Daniel Thomson Sr. a carpenter born about 1858, and Ellen (nee Gunn) Thomson, who was twelve years her husband's junior. Daniel Thomson, age 33, married Ellen Gunn, 21 in Alvinston, Ontario on January 6, 1891. Daniel and Ellen spent some time in Dawn Township before moving to 338 Cameron Street in Sarnia. They were blessed with five children: Alvin Ernest (born April 10, 1891); William James Connell (born September 15, 1892, passed away at the age of eleven on October 23, 1903 due to diptheria); Daniel Alexander Edward; Mary Margaret (born September 2, 1896); and Kathleen (born August 21, 1898). When Daniel Jr. was only four years old, his father passed away in March of 1899, five months before Daniel's sister Kathleen was born.

Ellen Thomson remarried on December 30, 1902, her new husband being Lawrence "Larry" Roberts, a labourer in Kent County. Ellen and Larry Roberts had three daughters together--stepsisters for Daniel and his siblings: Katherine "Katie" Elizabeth (born March 18, 1905); Annie Violet (born June 14, 1908); and Velma (born February 10, 1911). In 1911, the Thomson/Roberts family was residing together at 458 George Street, Sarnia. Living with parents, Larry and Ellen, were their children: Alvin (age twenty, employed as a machinist, along with Alvin's wife Fyrne Levina); Daniel Jr. (age sixteen, employed with the railroad); Mary (age fourteen); and Kathleen (age twelve) Thomson; and Katie (age six); Annie (age three); and Velma (age eight months) Roberts.

Daniel's older brother, **Alvin Ernest Thomson**, 24, also enlisted in the Canadian Over-Seas Expeditionary

Force in Sarnia on December 22, 1915. He did so two weeks after his younger brother, Daniel Jr., had enlisted and Alvin became a member of the Lambton 149th Battalion. Employed as a machinist, Alvin was residing at 276 Maria Street at the time, with his wife Fyrne Levina Thomson, who he recorded as his next-of-kin.

Nine months later, Alvin Thomson was discharged, the result of being A.W.L. Three months later, on December 27, 1916, Alvin enlisted again with the 149th Battalion in London, Ontario. Alvin and his wife Fyrne were residing at 196 Penrose Street in Sarnia at the time. Unfortunately for Private Alvin Thomson, he never had the opportunity to serve overseas. Two months after his second enlistment, on February 9, 1917, he was struck off strength from the 149th Battalion, declared as medically unfit for service (his index and middle finger of his left hand were missing, lost in a corn shredder accident).

Daniel Alexander Edward Thomson, 21, enlisted in the Canadian Over-Seas Expeditionary Force (CEF) on December 7, 1915 in Sarnia two weeks before his older brother Alvin enlisted. Daniel stood five feet eight inches tall, had blue eyes and brown hair, was single, and recorded his present address as Sarnia, Ontario. He also recorded his trade or calling as labourer, and his next-of-kin as his mother, Ellen Roberts residing in Dawn (R.R. #2, Sarnia), Ontario. Her address was later changed to 252 Shamrock Street, Sarnia.

Daniel Thomson Jr. became a member of the 149th Battalion, Western Ontario Regiment, CEF and during his initial training, Daniel was injured a couple of times. On July 22, 1916, he sprained his ankle and was admitted to the hospital at Camp Borden. He was discharged three days later. On November 7, 1916, he was promoted to the rank of Lance Corporal. On January 22, 1917, he was admitted to the Military Hospital in London, the result of a sprained wrist and injury to his hand. After having a splint applied and with his injuries improving, he was discharged from the hospital on January 30, 1917.

Approximately fifteen months after enlisting, on March 25, 1917, Daniel Thomson Jr. embarked overseas from Halifax bound for the United Kingdom aboard the *SS Lapland*. He arrived in Liverpool on April 7, 1917, and from the Segregation Camp was transferred to the 25th Reserve Battalion, CEF, at Bramshott. Less than two months later, on June 1, 1917, he was taken on strength into the 161st Canadian Infantry Battalion at Camp Witley. Eight months later, on February 28, 1918, Private Daniel Thomson Jr. proceeded from Camp Witley and arrived in France, becoming a member of the Canadian Infantry, 47th Battalion, British Columbia Regiment.

Approximately five months later, Daniel Thomson Jr. found himself part of the final great campaign of the war. The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km.

The second offensive in the Campaign was the **Battle of Arras and Breaking the DQ Line** in France (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line – a series of strong defensive trenches and fortified villages. General Sir Julian Byng called the Canadian victory at the 2nd Battle of Arras and breaking of the DQ Line “*the turning point of the campaign*”, but it came at a cost of 11,400 Canadian casualties.

Approximately six months after arriving in France, on September 3, 1918, Private Daniel Thomson Jr. of the 47th Battalion was killed in action in the battle to break the DQ Line. Daniel Thomson’s body was never recovered. He was simply recorded as; *Date of Casualty: 3-9-18. Killed in Action.*

Shortly after Daniel Thomson was killed in action, communication from the military about his death was sent to his mother, Mrs. Ellen Roberts c/o Mr. George Pilkey, R.R. #1 (12th Line), Corunna, Ontario. Twenty-four-year-old Daniel Thomson Jr. has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. SOURCES: A, B, C, D, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z

TIMPSON, Edward Arthur (#602317)

Edward Arthur Timpson emigrated from England, found work as a florist in Sarnia, and enlisted at age 21. After surviving the Battle of the Somme, the Battle of Vimy Ridge, the Battle of Lens and Hill 70 and the Battle of

Passchendaele, Corporal Edward Timpson was wounded when he was hit by enemy shellfire in the final days of the Battle of Amiens in August 1918, ten days before his 25th birthday. He died later that day from the severity of his wounds. Edward's remains were buried in Dury Hospital Military Cemetery and later exhumed and reburied at Villers-Bretonneux Military Cemetery.

Edward Arthur Timpson was born in Great King's Hill, High Wycombe, Buckinghamshire, England, on August 25, 1893, the son of Edward Osborne and Hester Augusta (nee Fulford) Timpson, both of Great King's Hill, England. NOTE: This birthdate is based on what Edward recorded on his Attestation Paper when he enlisted. Therefore, in his military Personnel Records, his age at enlistment, and age at death are based on this birthdate. However, in both the 1901 and 1911 England and Wales Census records, Edward's birth year is recorded as **1897**. The England and Wales Civil Registration Birth Index record his birthdate as sometime in October-November-December 1896. [These records also list his first name as Edwin vs. Edward. Throughout his military Personnel Records, he signed his first name as Edward]. Based on the England/Wales census and birth index, it is possible that Edward Timpson lied about his age at enlistment. He may have been three or four years younger than the age he recorded.

On December 19, 1880, Edward Osborne Timpson, born 1856 in Buckinghamshire, England, married Hester Augusta Fulford of Hertfordshire, England who was also born in 1856. The marriage took place at St. James in Paddington, Westminster, England and, over the years, Edward Sr. and Hester were blessed with ten children together: Charles Edward (born 1881); Mary Augusta (born 1883); Claritta Elizabeth Ellen (born 1884); Lilian Eliza (born 1886); Frank (born 1888); Harry Osborne (born 1890); Lucy Alice (born 1892); William Herbert (born 1894); Edward Arthur (born 1893 or 1897); and Isabel Elizabeth (born 1899).

In 1891, the Timpson household included parents Edward Sr. and Hester and their six children: Charles Edward, Mary Augusta, Claritta, Lilian Eliza, Frank and Harry Osborne Timpson. In 1901, the Timpson family was residing in Great King's Hill where Edward Sr. supported his family as a carpenter and nine children lived with them: Charles Edward (a carpenter), Lilian Eliza, Frank, Harry Osborne, Lucy Alice, William Herbert, Edwin Arthur (age four), and Isabel Elizabeth. Ten years later, in 1911, much of the Timpson family were still residing together in Great King's Hill, England--parents Edward Sr. (a carpenter) and Hester and their five children: Frank (age twenty-three, an upholsterer); Harry Osborne (age twenty-one, a grocer); William Herbert (age sixteen, a baker); Edwin Arthur (age fourteen); and Isabel Elizabeth (age eleven), and a granddaughter Gertrude Clarrita Timpson (age eight).

Older brother Charles Edward Timpson, who married in 1905, immigrated to Canada in 1913, along with his wife Elizabeth (nee Shorey) and their three children at the time: Ena Myrtle, Stanley Frederick and George Edward Timpson. Charles and Elizabeth Timpson resided at 178 Penrose Street, Sarnia, and Charles supported his family by working as a carpenter. Charles and Elizabeth Timpson would have two more children together: Margaret and Jean Timpson.

Edward Arthur Timpson immigrated to Canada the year after his older brother Charles. Edward departed from Southampton, England and Cobh, Ireland aboard the *SS Andania*, and arrived in the port of Quebec on May 10, 1914. He was recorded as nineteen years old, his intended destination as Sarnia, his former occupation as gardener, and his intended occupation as fruit farmer.

Prior to enlisting, Edward was employed by A. Macklin, florist, in Sarnia. Twenty-one-year-old Edward Timpson enlisted in the Canadian Over-Seas Expeditionary Force (CEF) on January 14, 1915 in Sarnia. He stood six feet and one inch tall, had hazel eyes and black hair, was single, and recorded his trade or calling as gardener, and his next-of-kin as his father Edward Timpson Sr., of Great King's Hill, Buckinghamshire, England. Edward Timpson became a member of the 34th Battalion, CEF.

Nine months after enlisting, on October 23, 1915, Private Edward Timpson embarked overseas bound for the United Kingdom aboard the *SS California*. He arrived in England on November 1, 1915, and was initially stationed at Camp Bramshott. Three months later, on February 3, 1916, he was transferred to the 23rd Battalion, stationed at West Sandling, and three weeks after that, on February 26, he was promoted to Acting Corporal.

Three months later, on May 25, 1916, Edward Timpson reverted to the rank of Private on his request, and was transferred to the 2nd Battalion. The next day, May 26, Private Edward Timpson arrived in France, where he was taken on strength into the 10th Battalion, Alberta Regiment. He departed the Canadian Base Depot in France on June 6, 1916, joining the 10th Battalion in the field the next day. Nine days later, on June 16, 1916, Edward Timpson was promoted in the field to Lance Corporal in the 10th Battalion.

For more than a year-and-a-half after Timpson joined this unit, as part of the 1st Canadian Division, the 10th Battalion took part in many of the major battles involving the Canadian Corps in France and Belgium. This included the Battle of the Somme (July 1-November 18, 1916)--one of the bloodiest and most futile battles in history; the Battle of Vimy Ridge (April 9-12, 1917)--the first time (and last time in the war) that all four divisions of the Canadian Corps, with soldiers from every region in the country, would surge forward simultaneously; the Attack on Hill 70 and Lens (August 15-25, 1917)--where they faced enemy flame-throwers and mustard gas for the first time; and the Battle of Passchendaele (October 26 – November 10, 1917)--one waged in unceasing rain on a battlefield that was a nightmarish mess of rotting, mangled corpses, gagging gas, water-filled craters and glutinous mud.

On two occasions during that time, Edward Timpson was promoted in rank: on August 22, 1917, he was appointed Acting Corporal, and less than two months after that, on October 10, 1917, he was promoted to Corporal in the 10th Battalion.

By mid-1918, Edward Timpson found himself taking part in the final great campaign of the war. The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in Canada’s Hundred Days Campaign was the **Battle of Amiens** in France (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km – but it came at a cost of 11,822 Canadian casualties.

Ten days before his 25th birthday, on August 15, 1918, Corporal Edward Timpson was wounded in action--hit by enemy shellfire, during the final days of the Battle of Amiens. He was taken to No. 47 Casualty Clearing Station (CCS) where his wounds were recorded as; “*SW (shell or shrapnel wound) penet. Abdomen and SW hand and leg right and neck.*” That day, Corporal Edward Timpson passed away as a result of his wounds at No. 47 Casualty Clearing Station. Edward’s Commonwealth War Graves Register records him as *Date of Death: 15-8-18. Died of Wounds – No. 47 Casualty Clearing Station. S.W. Penet abdomen etc...* Edward’s remains were buried in Dury Hospital Military Cemetery, ¾ miles South of Amiens, and later exhumed and reburied at Villers-Bretonneux Military Cemetery.

In mid-September 1918, Edward’s brother, Charles Timpson, of 142 Penrose Street, Sarnia, received the news of his brother’s death. Edward Arthur Timpson was the second Timpson son to lose his life in the war. Three years prior to Edward’s death, his brother **William Herbert Timpson**, had been killed in action with the British Army in Flanders. Private William Herbert Timpson, of the 10th (Service) Battalion, Gloucestershire Regiment, was killed in action on September 25th, 1915. A third brother, **Harry Osborne Timpson**, had also enlisted with the British Army when the war broke out. Harry Timpson survived the war. It is worth noting that Edward’s mother, Hester Augusta Timpson, and her sister, Mrs. Nash, both residing in England, had ten sons in their families, eight of whom enlisted. Of the three Timpson boys who enlisted, two lost their lives in war--Edward Arthur Timpson and William Herbert Timpson. Edward Arthur Timpson, 24, is buried in Villers-Bretonneux Military Cemetery, Somme, France, Grave VI.AA.10.

TOWERS, Norman Ewart

Sarnia born Norman Ewart Towers had been practicing law for four years when he enlisted at age 27 in the Canadian Over-Seas Expeditionary Force (CEF) on April 15, 1915. Three months after being promoted, Captain Towers of the 7th Canadian Light Trench Mortar Battery was wounded in action during the Battle of Flers-Courcelette—he was hit multiple times by enemy gunfire. According to the medical report, Captain Towers *never rallied & never became quite conscious & died at 1 A.M. Sept 20, 1916.*

Twenty-nine-year-old Norman Towers is buried in St. Sever Cemetery, Rouen, Seine-Maritime, France. On his headstone are inscribed the words, BORN IN SARNIA, CANADA. His name is also inscribed on the First World War Memorial in Osgoode Hall’s Great Library, Toronto.

Norman Towers was born in Sarnia, Ontario on October 7, 1887, the youngest son of Thomas Foard and

Mary Ann (nee Huggart) Towers. Thomas Foard Towers, born November 1845, in Airth, Stirlingshire, Scotland, emigrated from Scotland with his family in 1856. Sixteen years later, on September 17, 1873, twenty-seven-year-old Thomas married twenty-seven year-old Mary Ann Huggart (who was born July 1846, Durham, Ontario) in Putnamville, North Dorchester, Middlesex, Ontario.

By 1875, Thomas and Mary Ann Towers were residing in Sarnia, and eventually at 231 College Avenue, where they raised six sons together: Alfred St. Clair (born April 21, 1875); Robert Irwin (born October 29, 1876); James Crawford (born November 17, 1879, passed away on November 15, 1910 due to carcinoma of liver, leaving behind his wife Florence and their 7-month old son James); Gordon King (born June 18, 1881); Thomas Logan (born July 15, 1884) and Norman Ewart Towers. Over the years, Thomas Towers supported his family by working at a number of occupations, including being a bookkeeper, a clerk, an accountant and a hardware merchant. In 1895, Thomas was a member of the Lambton 27th Battalion, St. Clair Borderers, along with his nineteen year-old son Robert.

In 1891, the Towers household in Sarnia included parents Thomas (a book keeper) and Mary Ann Towers, along with their children: Alfred (a bank clerk), Robert, James, Gordon, Thomas and four year-old Norman Ewart, along with seventy year-old Agnes Towers, the mother of Thomas. Ten years later, in 1901, the Towers household included parents Thomas (an accountant) and Mary Ann, along with their children: Robert (a barrister), James (an assistant bookkeeper), Thomas, and thirteen year-old Norman Ewart Towers, along with their general servant, twenty-two-year-old Mary Toban.

Two of Norman's brothers, Robert Irwin and Thomas Logan Towers, also served overseas during the Great War. Thirty-eight-year-old **Robert Irwin Towers**, a barrister at law, enlisted on September 14, 1915 in London, Ontario. Robert completed his Officers' Declaration Paper soon after, and was appointed Lieutenant-Colonel with the 70th Battalion, CEF. In April 1916, he embarked overseas from Halifax bound for the United Kingdom. In England, he was appointed a member of the Board for adjustment of Regimental Funds. In February 1917, Robert was appointed President of Regiment Funds Board. He returned to Canada in May 1917. Robert Towers was discharged from service and struck off strength in October 1917.

Thirty year-old **Thomas Logan Towers**, a physician, enlisted in the Canadian Over-Seas Expeditionary Force on January 25, 1915 in Guelph. Initially Thomas was appointed the medical officer of the 108th Regiment with the rank of Lieutenant. In June 1915, he embarked overseas and once in England, was taken on strength into the Canadian Army Medical Corps (CAMC). He was appointed Captain, and was initially attached to the Canadian Convalescent Hospital, Monks, Horton. On July 6, 1916, the then Major Thomas Towers arrived in France, as a member of the CAMC. He served in a number of general hospitals and Canadian field ambulance units in France. Thomas Towers survived the war and was struck off strength on general demobilization in May 1919.

Norman Ewart Towers was educated at Sarnia's public and high school, and then attended the University of Toronto, first receiving his Bachelor of Arts (Political Science) 1905-08, followed by his law degree in 1911. Norman became a barrister and practiced law in Port Arthur, Ontario with the firm of Keefer, Keefer & Towers.

Captain Norman Ewart Towers

Twenty-seven-year-old Norman Towers enlisted in the Canadian Over-Seas Expeditionary Force (CEF) on April 15, 1915 in Port Arthur, Ontario (he completed a second Attestation Paper on April 30, 1915). Norman stood five feet seven inches tall, had blue eyes and brown hair, was single, and was employed as a “barrister-at-law”. He recorded that he was a member of the Active Militia, the 96th Lake Superior Regiment, and that he had four years prior military experience in the 1st Hussars, Canada. He also recorded his next-of-kin as his father Thomas F. Towers, of Sarnia. Norman became a member of the Army, 52nd Reserve Battalion, CEF. Just prior to going overseas, Norman returned to Sarnia to visit his parents.

On June 17, 1915, Norman Towers embarked overseas from Montreal bound for the United Kingdom aboard the *SS Scandinavian* with a special draft of 250 men from 52nd Battalion. On June 29, 1915 in England, he was transferred to the 32nd Reserve Battalion, CEF. One month later, on July 29, 1915, Lieutenant Norman Towers’ April 15, 1915 Attestation Paper was certified by a magistrate, and his Certificate of Medical Examination was signed at Shorncliffe Camp, England. Two months later, on September 23, 1915, he was transferred to the Royal Canadian Regiment (RCR). Five weeks later, on November 1, 1915, Lieutenant Norman Towers arrived in Boulogne, France with the RCRs.

On November 15, 1915, Norman wrote a letter from France to his parents Thomas and Mary Ann Towers in Sarnia. The following is a portion of that letter:

Dear Father,

I presume that by now mother will have received my letter and also post card. At present we are comfortably settled at billets. Each company billets by itself and there are seven of us in one room no larger than our sitting room at home and there we eat, and sleep and live, and also do our own cooking, but it is surprising what one can get used to when you try, and it is warm at night, which is a big consideration. Yesterday we saw a wonderful sight, aeroplanes dodging the anti-aircraft guns and on a tremendous scale it reminds one of trying to shoot hawks at a great height.

This country is an awfully pretty one, more so than England, and is just like the pictures one sees – particularly the long rows of tall trees laid in absolutely straight lines. Naturally, I can’t tell you anything of our position or movements, etc., but as yet we have not been in the front trenches, though we may be soon. Persistent rumors of peace negotiations are circulating, but I daresay you people at home know more about that than we do. The mail service is excellent and last night I got yours and mothers letters, and some others... I was the most envied man in the company that night, for letters are the main thing over here.

I find that I have brought over practically everything that I need, although my boots have shrunk a bit with the continued wet and I have come to the conclusion that the only way to do it is to buy boots at least two sizes too large – they are one of the main troubles over here, as there is lots of marching to do. In spots the mud is fearful, but nothing to what it would be if this war were round Oil Springs. Do you remember some of our trips out there and in particular the one when you and I and Rob and mother got lost coming home at night – it is still fresh in my memory.

Where we are just now, although the enemy were at one time in possession of it, there are no signs of war. Perriman and I were out for a walk today and it was just like one at home in the country. We both wished it might have been. From now on my letters will have to be shorter as the opportunities for them are few and as a rule we are dog-tired. I am enjoying the life immensely and will continue to do so for a time anyway – every moment there is something new. Be sure to write often as letters are doubly welcome now, and even if I only send a card, it will serve to let you know that I am well and going. Much love as ever, to you both, and you are constantly in my thoughts, as I am sure I am in yours.

Yours lovingly, Ewart

Lt. N.E. Towers, “D” Company, R.C.R. Canadian Corps

Four months after writing the above letter, on March 13, 1916, Norman became a member of the 7th Canadian Light Trench Mortar Battery. Three months after that, on June 14, 1916, he was promoted to Temporary Captain in command of the 7th Canadian Light Trench Mortar Battery.

Norman Towers soon found himself fighting in the **Battle of the Somme** (July 1-November 18, 1916). It was one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

The second major offensive of the Somme battle was the week-long **Battle of Flers-Courcelette** (September 15-22). It was here where tanks made their first appearance in the war. The Battle was a stunning success for the

Canadians, but it came at a cost of over 7,200 casualties. It was during this second major offensive of the Somme battle where Norman Towers was killed in action.

Three months after being promoted to Captain, on September 19, 1916, Captain Norman Towers of the 7th Canadian Light Trench Mortar Battery was wounded in action during the Battle of Flers-Courcelette—he was hit multiple times by enemy gunfire. On the Medical Case Sheet, Norman Towers was recorded as “*Lieutenant Norman Towers of the RCR*” and that he “*was admitted to No. 2 Red Cross Hospital, Rouen, at about 4:00 a.m. on September 19, 1916*”. Also on the Medical Case Sheet, the doctor recorded that Towers had, “*GSW Multiple*” and “*was suffering with multiple wounds involving scrotum and penis, right thigh and buttock, and left thigh*”, and “*On admission he was very collapsed and there were signs of ‘gas’ infection of the thighs*”. Norman Towers was operated on by two doctors that morning at 9:30 a.m., where one doctor recorded, “*shell fragments were removed from both thighs and gas gangrene present.*”

The next day, on September 20, 1916, at No. 2 Red Cross Hospital, Rouen, Norman Towers was recorded as “*GSW (gun shot wound) buttock, dangerously ill*”. Later the doctor added to Norman Towers Medical Case Sheet that, “*The patient never rallied & never became quite conscious & died at 1 A.M. Sept 20, 1916*”. Norman Towers’ Commonwealth War Graves Register records him as; *Date of Death: 20-9-16. Died of Wounds No. 2 Red Cross Hospital, Rouen.*

On September 20, 1916, Norman’s parents in Sarnia received two telegrams, both from the official war records office at Ottawa. The two official telegrams read as follows:

Thos. F. Towers, Sarnia, Ont.

Sincerely regret to inform you Captain Norman Ewart Towers, artillery, officially reported dangerously ill at Red Cross Hospital, Rouen, Sept. 20th. Gunshot wounds. Will send further particulars when received.

Signed, Officer in Charge, Record Office.

and

Thos. F. Towers, Sarnia, Ont.

Deeply regret to inform you Captain Norman Ewart Towers, artillery, officially reported died of wounds, Sept. 20 at No. 2 Red Cross Hospital, Rouen. Signed, O.I.C.R.O.

Sarnians learned of the death of Norman Towers in the September 22, 1916 *Sarnia Observer* with the front page headline; *Two Sarnia Young Men Make Supreme Sacrifice* (Sarnians also learned that Lance Corporal Robert Palmer Crawford had died of wounds eight days earlier – Robert Crawford’s story is also included in this Project).

Twenty-nine-year-old Norman Towers is buried in St. Sever Cemetery, Rouen, Seine-Maritime, France, Grave Officers, A.101.5. On his headstone are inscribed the words, BORN IN SARNIA, CANADA. His name is also inscribed on the First World War Memorial in Osgoode Hall’s Great Library, Toronto. The Osgoode Hall memorial contains the names of law students and graduates who died as a result of the war. There is also a memorial stone in Lakeview Cemetery in Sarnia. Inscribed on it are the words; 1887-1916 CAPT. N.E. TOWERS O.C. 7TH CAN. T.M.B. FELL AT COURCELETTE FRANCE SEPT. 16, 1916 FAITHFUL UNTO DEATH I WILL GIVE THEE A CROWN OF LIFE.

TURNER, George (#47966)

George Turner was twenty-seven years old when he made the decision in May 1915 to serve his country. Only days later he was sent overseas and within five months he was on the front lines. Two months later he was killed in action in Flanders Fields. His mother had the following inscribed on his grave; The Place Made Vacant in Our Home Can Never More be Filled.

George Turner was born in London, Ontario, on January 25, 1888, the son of Mrs. Mary Jane McCarthey of 232 Davis Street, Sarnia (later Mrs. Robert V. Harrison, of R.R. #1 Corunna, Ontario). [NOTE: In a couple of George Turner’s military records, his mother’s surname is recorded as McArthur.] At age twenty-seven, George enlisted in the Canadian Over-Seas Expeditionary Force (CEF) on May 31, 1915 in Niagara Camp, Ontario. He stood five feet five and a half inches tall, had dark brown eyes and dark hair, was single, and recorded his trade or calling as blacksmith, and his next-of-kin as his mother Mrs. Mary Jane McCarthey in Sarnia. George Turner became a member of the 37th Battalion, CEF.

Only days after enlisting, in early June 1915, George Turner embarked overseas from Montreal bound for the

United Kingdom aboard the *SS Hesperian*. On June 20, 1915 in England, he was transferred to the 17th Reserve Battalion at Shorncliffe. Like all Privates overseas, George earned his \$1.00 + \$0.10 (field allowance) per day.

In early September 1915, while on leave, George Turner suffered an accident—while skating at a roller rink, he fell and injured his hip. The medical officer recorded, “*Examination showed the hip in a very bad bruised condition & a large haematoma present.*” George spent over two weeks in hospital recovering from the injury—from September 6-11 at M.B.C.H., Shorncliffe, and from September 11-21 at Quex Park Military Hospital in Birchington, Kent. Approximately six weeks later, on November 1, 1915, he was transferred, becoming a member of the 42nd Battalion, Quebec Regiment. That same day, he departed with the 42nd Battalion for France.

Just over two months after arriving in France, on January 11, 1916, Private George Turner of the 42nd Battalion was killed in action while fighting in Belgium. His death was recorded as *O.C. Battalion Reports: Killed in Action, 11-1-16*. George Turner’s Commonwealth War Graves Register records him as; *Date of Death: 11-1-16. Killed in Action. Place of Burial: 50 yds, N of gate and 25 yards East of barn at R.E. Farm Cemetery near Wulverghem, Belgium. Sheet 28 – N.35.D.8.7. Cross erected.*

In late January 1916, the telegraph company in Sarnia received the following telegram from the Adjutant-General in Ottawa:

Mrs. Mary Jane MacCarthur, Sarnia, Ont.

Deeply regret to inform you that No. 47966, Private George Tuner, of Sarnia, of 42nd formerly 37th Battalion, officially reported killed in action. Signed, Adj.-Gen.

The telegraph company officials could not immediately deliver the telegram, as Mrs. Mary Jane MacArthur (George Turner’s mother and next of kin), was no longer residing in Sarnia. Shortly after, she was located in Hamilton, and the telegram was forwarded to her.

Following is a portion of the war diary of the 42nd Battalion for January 1916 that records the death of Private George Turner along with five other soldiers:

The efforts of the 7th Canadian Infantry Brigade during three weeks in 1st Brigade area earned the following letter from Major Currie, C.B., Commanding 1st Canadian Division:

“It gives me a great deal of pleasure to inform you that during the stay of the 7th Infantry Brigade in the 1st Brigade area, they behaved at all times most gallantly. Besides, they did a great deal of very necessary and useful work.”

“At the time they took over the line, the trenches, owing to the very bad weather, were not in the best of shape but your fellows have made a great difference. I went over the line last Saturday morning and was delighted with what I saw had been done and so expressed myself to Brigadier General MacDonell. I asked him to convey my thanks to all the ranks of his Brigade: I know he will, but I want you to know as well how I have appreciated them. They were active in their patrolling, did a lot of wiring, greatly improved the front trenches, worked hard on supporting points and were aggressive always. While I deeply regret their casualties I do not think they were excessive.”

“Brigadier General Hughes has written me in warm terms of praise of what has been accomplished by MacDonell’s Brigade.”

*7th Brigade total casualties during three weeks were 13 O.R killed, 2 Officers 69 O.R. wounded, of these 42nd Battalion total casualties were 3 O.R. killed (Ptes Matthews, E., **Turner, G.** and Ward G.) 39 O.R. wounded of whom 3 O.R. died of wounds (Ptes Wells, W.B., Belhumeur, J., McKillop, A.).*

In May 1921, George’s mother, then Mrs. Robert V. Harrison of Froomfield, received the Mother’s Cross in memory of her son who had been killed in action on the battlefield of Flanders. She also received the Mons Star and Military Medal from the war office. George Turner, 27, is buried in R.E. Farm Cemetery, Heuvelland, Belgium, Grave III.A.12. On his headstone are inscribed the words, THE PLACE MADE VACANT IN OUR HOME CAN NEVER MORE BE FILLED MOTHER.

VALLIS, Clifford George (#264281)

England born Clifford Vallis immigrated to Canada at the age of seventeen. Six years later when he made the decision to serve his country, he was living with and helping to support his widowed mother in Sarnia. By the time he arrived in England five months later, he was already suffering from illness. Three months later he was returned to

Canada where he never fully recovered, the illness ultimately took his life. Clifford is buried in Mount Pleasant Cemetery, London.

Clifford George Vallis was born in Pimlico, London, England, on March 10, 1893, the eldest son of William George and Kate (nee Fanner) Vallis. On April 3, 1892, twenty-eight-year-old William Vallis (born March 1864, Worcester Park, Surrey, England) married twenty-six-year-old Kate Fanner (born September 1866, Stepney, Surrey, England) in St. Michael and All Angels, Bedford Park Hounslow, England. William and Kate Vallis were blessed with two children together: Clifford George and Herbert William (born February 24, 1897 in Pimlico, England). In April 1897, four year-old Clifford Vallis started school at Holy Trinity School in Westminster. In 1901, the Vallis family--parents William (a coachman) and Kate Vallis, along with eight year-old Clifford and four year-old Herbert, were residing in London, England in the county of Kensington, Brompton Ward.

In September 1910, seventeen year-old Clifford Vallis immigrated to Canada from London, England. He arrived aboard the passenger ship *Lake Erie* at the Port of Quebec on September 29, 1910, with his stated destination as Toronto, Ontario. In early 1911, his parents William (a motor car washer) and Kate Vallis, along with their fourteen year-old son Herbert were still residing in London, England.

Later that year, Clifford's forty-four-year-old mother Kate and his younger brother Herbert immigrated to Canada. They arrived in Montreal aboard the *Grampian* on May 8, 1911. Initially, Kate and her sons Clifford and Herbert resided in Toronto, lodging with George and Esther McBride. Clifford Vallis' occupation was recorded as an inspector in a department store, and Herbert's occupation was a clerk in a wholesale store. Father William Vallis arrived in Canada in July 1911. The following year, on March 5, 1912, patriarch of the family William passed away in Toronto at the age of forty-eight due to pneumonia.

Twenty-three-year-old Clifford Vallis enlisted in the Canadian Over-Seas Expeditionary Force (CEF) on July 17, 1916 in Sarnia and Camp Borden. He stood five feet nine and three quarter inches tall, had grey eyes and brown hair, was single, and lived at home with his mother Kate at the time, at 253 Devine Street, Sarnia. Clifford recorded his trade or calling as shipping clerk (he was employed with Mueller Mfg. Company) and his next-of-kin as his widowed mother Kate Vallis on Devine Street. At the time, Clifford was helping to support his mother by giving her \$40.00 a month. Clifford also recorded that he had prior military experience, serving four years (1910-1913) with the Queens Own Rifles, Toronto.

Clifford became a member of the Canadian Infantry, 213th Battalion, Eastern Ontario Regiment, CEF. Three months after enlisting, on October 17, 1916, he was transferred to the 173rd Battalion, Canadian Highlanders, CEF, with the rank of Private. Just over three weeks later, on November 10, 1916, Clifford was admitted to the Sussex Military Hospital in New Brunswick, diagnosed with nephritis. He was given treatment and remained in hospital for five weeks. Five months after enlisting, in mid-December 1916, Clifford Vallis embarked overseas bound for the United Kingdom to join his battalion (the 173rd Battalion had embarked overseas from Halifax aboard the *SS Olympic* on November 14, 1916).

On December 28, 1916 in England, Private Clifford Vallis was transferred to the 40th (Reserve) Battalion, Canadian Infantry. Less than two weeks later, on January 7, 1917, he was admitted to Moore Barracks Canadian Hospital, Shorncliffe diagnosed with nephritis. While in hospital, he was made a member of the 40th Reserve Battalion. At Moore Barracks Hospital, his Medical Case Sheet recorded that Clifford *had influenza and rheumatism last winter, and was laid up for two and a half months in Toronto. His first attack of nephritis followed immediately. Second attack developed in Sussex, New Brunswick, 10-11-16. He was treated in St. John N.B. for five weeks. This the third attack commenced four days ago. First he noticed his face swollen, weakness and headache with some backache followed.*

On February 10, 1917, Clifford was reported as *much improved but will not be fit for service being boarded for discharge to Canada*. He was discharged from Moore Barracks Hospital on March 12, 1917, with his diagnosis changed to "nephritis chronic". The next day, he sailed from Liverpool on the hospital ship *Letitia*, returning to Canada for discharge. The next month, on April 15, 1917 at the Discharge Depot in Quebec, Private Clifford Vallis was "Struck off Strength" from the 213th Battalion, discharged as "medically unfit". Less than four weeks later, on May 10, 1917, Clifford was re-attested and taken on with the 213th Battalion in London, Ontario for further medical treatment. On that day, he was admitted to the Military Hospitals Commission of Canada (MHCC) at Wolseley Barracks in London.

Seven months later, on December 20, 1917, at 1:15 p.m., Private Clifford Vallis lost his life at Wolseley

Barracks Hospital in London, Ontario. The cause of death was recorded as nephritis and Vincent angina (infection of the pharynx). Clifford's Canada War Graves Register records him as *Date of Death: 20-12-17. London, Ontario Military Hospital. Nephritis – Discharge at Quebec, 15-4-17 but re-attested with M.H.C.C. for further medical treatment May 10th, 1917. Given every care and attention.*

Kate Vallis later received a War Service Gratuity of \$180.00 for the loss of her son Clifford. In 1921, she moved to Greenwood Avenue, Toronto. On December 28, 1920, Clifford's twenty-three-year-old brother Herbert Vallis, married twenty-two-year-old Mary Annie Phillips (born Watford, Ontario) at St. John's Church in Sarnia, Ontario.

Clifford Vallis, 24, is buried in Mount Pleasant Cemetery, London, Ontario, Plot Section X.R.1. Originally, a wooden cross was erected over Clifford Vallis' grave with all the particulars. The wooden cross was later replaced by a headstone. On his headstone are inscribed the words, AT REST. On the Sarnia cenotaph, his name is inscribed as H. Wallis.

WADE, Robert (#124061)

England born Robert Wade along with his brother immigrated to Canada in their early twenties and came to live and work in Sarnia. Other Wade family members followed and three of the Wade boys would enlist in Sarnia in the same year. In fact, the three Wade boys fought together in one of the most horrific battles of the war. All three were wounded only days apart—for Robert, his wounds were fatal. He left behind his parents, siblings and his wife in Sarnia.

Robert Wade was born in Boroughbridge, Yorkshire, England, on August 24, 1890, the son of William Alfred and Mary Ann (nee Robshaw-Burkhill) Wade, of Yorkshire, England. William Wade (born 1861) married Mary Ann Robshaw-Burkhill (born 1865) in December 1886 in Yorkshire. William and Mary Ann were blessed with nine children together: Sarah Ann (born 1887); John William (born 1888); Annie Elizabeth (born 1889); Robert; Alfred (born July 25, 1893); Walter (born April 19, 1895); Herbert (born 1896); Emily (born 1898); and Hetty (born 1906).

In 1891, the Wade family was residing in Humberton, Yorkshire—parents William (an agricultural worker) and Mary Ann Wade, along with their children: Sarah Ann, John William, Annie Elizabeth and infant Robert Wade. In 1901, the Wade family was residing in Harrogate, Yorkshire—parents William (a waggoner at a corn mill) and Mary Ann Wade, along with most of their children: Sarah (age fourteen), Annie (age eleven), Alfred (age seven), Walter (age five), Herbert (age four) and Emily (age two). In 1911, some of the Wade family were still residing together in Yorkshire—parents William (a hay cutter) and Mary Ann Wade, along with fifteen year-old Walter (an apprentice boot maker), twelve year-old Emily and five year-old Hetty who were both still in school.

Two of the Wade children immigrated to Canada in 1911: twenty-one-year-old Robert Wade and twenty-three-year-old John departed Liverpool, England aboard the *SS Corsican* and arrived in Halifax on March 30, 1911 with \$70 between them. Their intended destination was Sarnia to work as farm labourers. Other members of the Wade family would follow, and they would reside in at 301 Cameron Street in Sarnia. In the 1914 Sarnia Directory, residing at 301 Cameron Street were William Wade (labourer), Alfred Wade (Broderick & Co.) and Robert Wade (W.J. McIntyre). In the 1917-18 Sarnia Directory, residing at 301 Cameron Street were William, Alfred (a soldier) and Walter (a soldier) Wade. Three of the Wade boys served in the Great War. All three of them enlisted in the same year, and all three of them fought and were wounded in the same battle, only days apart.

Twenty-two-year-old **Alfred Wade** (#402867) was the first to enlist, signing up with the Canadian Overseas Expeditionary Force (CEF) on January 29, 1915 in Sarnia. He stood five feet eleven inches tall, had blue eyes and fair hair, was single, and recorded his trade or calling as a clerk (later changed to tailors cutter - apprentice) and his next of kin as his father William at 301 Cameron Street, Sarnia. He became a member of the 34th Battalion and arrived in England on June 30, 1915 and was transferred to the 11th Reserve Battalion. On August 3, 1915, he was transferred to the 1st Battalion, and arrived with that unit in France the next day.

After serving for more than a year in France, on September 3, 1916, Private Alfred Wade was wounded in action, a gunshot wound to the thumb, during the Battle of the Somme. He was treated in several hospitals in France including at Boulogne, Etaples and Havre, before being returned to Moore Barracks Canadian Hospital in Shorncliffe, England on October 14, 1916. Suffering from frequent colds, cough and steady loss of weight for

months, he was also treated for “bronchitis” while there. His condition was later diagnosed as pulmonary tuberculosis, the result of his time in the trenches. In late December he was moved to Hastings Sanatorium Hospital. In mid-January 1917, he was invalided to Canada, sailing from Liverpool because of his “general debility”. In Canada, he entered Queen Alexandra Sanatorium in Byron for treatment. He was discharged on November 30, 1917 in London, Ontario “being no longer physically fit for war service”. He returned to his parents home on Cameron Street in Sarnia. Alfred Wade passed away on August 18, 1958 at the age of sixty-five.

Twenty year-old **Walter Wade** was the second Wade to enlist. Initially signing up with the Canadian Overseas Expeditionary Force (CEF) on June 24, 1915 (#90886), he became a member of the 29th Battery, Canadian Field Artillery, 1st Howitzer Brigade. One month later, on July 20, 1915, he was transferred to the 34th Battalion. One month after that, on August 30, 1915, Walter completed another CEF Attestation Paper in Sarnia, becoming a member of the 70th Battalion (#123033). Walter stood five feet five and a half inches tall, had brown eyes and brown hair, was single, and recorded his trade or calling as a butcher and his next of kin as his mother Mary Ann Wade on Cameron Street, Sarnia.

In late December 1915-early January 1916, Walter was in a London, Ontario hospital for a week due to bronchitis. Back in 1908, Walter had had pneumonia and was ill for six months. After he recovered, he dealt with bronchitis ever since.

On April 26, 1916, Walter Wade embarked from Canada bound for the United Kingdom aboard the *SS Lapland*, arriving in England on May 5 as a Private with the 70th Battalion. Less than two months later, on June 28, 1916, Private Walter Wade was transferred to the 24th Battalion and arrived the next day with that unit in the field in France (he arrived with his brother Robert who was in the same battalion). Soon after arriving in France, Walter experienced increased coughing and shortness of breath. His expectorations got worse and he lost weight. He reported sick at LeHavre and was put under treatment by his Medical Officer.

Despite his ill-health, Walter soon found his way to the front. On September 12, 1916, Private Walter Wade was wounded in action, hit on his abdomen by a piece of shell that knocked him over, during the Battle of the Somme. He was laid out for about two hours and was taken to a dressing station and then to a field ambulance about six hours after being hit. On September 19, he was assigned to a rest camp, and the next day, was sent to 16th General Hospital at LeTreport. For almost three weeks, he vomited some blood and vomited after every meal. He was moved to other hospitals for treatment in France before returning to England. In England, he convalesced at Graylingwell War Hospital, Chichester (Oct. 11-23), and Canadian Convalescent Hospital, Epsom (Oct. 23-Dec. 13).

In mid-December 1916 he was in Moore Barracks Military Hospital, Shorncliffe, diagnosed with bronchitis. One week later, he was moved to Ontario Military Hospital, Orpington, Kent where his symptoms of coughing and expectoration, shortness of breath and loss of weight persisted. He was diagnosed with the disability “tubercle of lung” and eventually discharged from hospital on April 11, 1916. On May 3, 1916, he was invalided to Canada for further medical treatment. At Spadina Military Hospital in Toronto he was diagnosed with pulmonary tuberculosis. Walter Wade was discharged from the military on August 31, 1917 in Toronto, declared as “medically unfit for war service”, and returned to Sarnia.

On March 31, 1914, twenty-three-year-old **Robert Wade** (a clerk) married twenty-three-year-old Vanny Louisa Twiner in Sarnia. Robert’s brother Alfred Wade and his sister Emily Wade (of 301 Cameron Street) were the witnesses on the Marriage Certificate. Vanny Louisa Twiner was the daughter of Joseph (a farmer) and Elizabeth (nee Pash) Twiner. Robert and Vanny Wade lived at 317 Maxwell Street, Sarnia.

Approximately 1 ½ years after getting married, twenty-five-year-old Robert Wade enlisted in the Canadian Overseas Expeditionary Force (CEF) on October 8, 1915 in Sarnia. He stood five feet five and a half inches tall, had blue eyes and brown hair, and recorded his trade or calling as grocer’s clerk, and his next-of-kin as his wife Vanny Wade of 317 Maxwell Street. Robert became a member of the 70th Overseas Battalion, CEF.

Six months after enlisting, on April 24, 1916, Private Robert Wade embarked overseas from Halifax bound for the United Kingdom aboard the *SS Lapland*, arriving in England on May 5, 1916. Two months later, on June 28, 1916, he was transferred to the Canadian Infantry, 24th Battalion, Quebec Regiment, at Shorncliffe. The next day, June 29, 1916, Private Robert Wade crossed the Channel and moved with the 24th Battalion to the front in France. His brother Walter, also with the 24th Battalion, arrived in France with him. Their brother Alfred had arrived in France with the 1st Battalion ten months earlier. The three Wade brothers all took part in fighting in one of the most horrendous battles of the war.

The **Battle of the Somme** (July 1-November 18, 1916) was one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

All three Wade brothers were wounded in a two week period in September 1916, one fatally. On September 3, Private Alfred Wade was wounded in action, hit in the hand by enemy gunfire. On September 12, Private Walter Wade was wounded in action, hit in the abdomen by a piece of enemy shellfire.

The second major offensive of the Somme battle was the week-long **Battle of Flers-Courcelette** (September 15-22). It was here where tanks made their first appearance in the war. The battle was a stunning success for the Canadians, but it came at a cost of over 7,200 casualties. It was during this second major offensive of the Somme battle where Robert Wade was killed in action.

Two and a half months after arriving in France, on September 16, 1916, Private Robert Wade of the 24th Battalion, was killed in action on the Somme battlefield during the Battle of Flers-Courcelette. In his Personnel File, there are five entries recorded in sequence: *Reported from base wounded Sept. 16th, 1916 - shell shock; Reported wounded Inquires have been made; Previously reported wounded now missing since Sept. 16th, 1916; Previously reported missing now for official purposes presumed to have died on or since Sept. 16th 1916; and Previously reported missing presumed dead now reported killed in action Sept. 16, 1916.*

Robert Wade's Commonwealth War Graves Register records him as; *Date of Death on or since: 16-9-16. Previously reported Missing now for Official purposes presumed to have died – now Killed in Action.* At some point, Robert's remains were exhumed from the original place of burial, and then reburied in Adanac Military Cemetery, 6 ¼ miles North East of Albert. His widow Vanny Wade received a War Service Gratuity of \$180.00 for the loss of her husband. She resided at 128 Essex Street, Sarnia for a time and later moved to Water Lane, Selsley, Nr. Stroud, Gloucester, England. Robert Wade, 26, is buried in Adanac Military Cemetery, Miraumont, Somme, France, Grave II.B.2.

WALTERS, Joseph John

Sarnia born Joseph Walters, an only child, was twenty-one years old in April 1916 when he made the decision to serve his country. Within six months, he was a Lieutenant taking part in one of the bloodiest and most futile battles in history. Joseph survived this horrendous battle but the following spring, he was killed in action while fighting to rid France of its German oppressors.

Joseph John Walters was born in Sarnia, Ontario on September 26, 1894, the only child of Jacob D. and Anna K. (nee Peiffer) Walters. In 1901, the Walters family was residing in London, Ontario--parents Jacob (born April 14, 1866, occupation recorded as traveller) and Anna Walters (born January 8, 1870 in Nova Scotia); their six year-old son Joseph John; along with a twelve year-old cousin Mabel Peiffer (born in Nova Scotia). Ten years later, in 1911, the Walters London household included parents forty-four-year-old Jacob and forty year-old Anna Walters; along with their fifteen year-old son Joseph Walters. Note: On the 1901 Census, the Walters family is recorded as having German origin. On the 1911 Census, they are recorded as having Scottish origin.

Twenty-one-year-old Joseph Walters completed his Officers' Declaration Paper with the Canadian Overseas Expeditionary Force on April 22, 1916, receiving his medical approval in St. Thomas, Ontario. He stood five feet six inches tall and lived at home with his parents at 1029 Richmond Street in London, Ontario at the time. He recorded his occupation as journalist ("reporter newspaper"), and his next-of-kin as his mother, Mrs. J.D. Walters of 1029 Richmond Street, London. He also recorded that he had prior active militia experience with the 25th Elgin Regiment, St. Thomas, Ontario, and that he had several years' military service in the cadets. Joseph became a member of the 91st Battalion, Canadian Expeditionary Force, with the rank of Lieutenant. He embarked overseas from Halifax bound for the United Kingdom aboard the *SS Olympic* on June 28, 1916. He arrived in Liverpool on July 5, 1916.

On July 15, 1916, Lieutenant Joseph Walters was transferred to the 35th Battalion at West Sandling. Seven weeks later, on September 7, 1916, he earned qualifications in a "bombing course, C.M.S.". Later that month, on September 29, 1916, he was transferred to the Canadian Infantry 20th Battalion, Central Ontario Regiment, and embarked across the English Channel to the front lines in France.

Lieutenant Walters joined his unit in the field on October 8, 1916 and was thrust immediately into a horrendous battle. The Battle of the Somme (July 1-November 18, 1916) was one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance about 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties. Joseph Walters survived this harrowing experience.

In the New Year, on January 21, 1917, Joseph was granted ten days leave, and returned to England. He returned to the field in France on February 4, 1917. A month and a half later, he was admitted to No. 22 Casualty Clearing Station (CCS) as a result of P.U.O. (pyrexia – of unknown origin fever of an undetermined cause). One week later, on March 31, 1917, he was admitted to Duchess of Westminster's Hospital at Le Touquet, France, diagnosed with P.U.O. slt. He remained there for one week, being discharged to Details Camp Etaples on April 6, 1917. On April 14, 1917, two days after the Battle of Vimy Ridge, Lieutenant Joseph Walters returned to the field rejoining his unit, the 20th Battalion.

Less than one month after returning to his unit, on May 10, 1917, Lieutenant Joseph Walters was killed in action while fighting in France. On May 19, 1917 in Rouen, France, the Officer in Command of the 20th Battalion recorded on the Field Service Record that Lieutenant J.J. Walters was "*Killed in Action, In the Field (France), 10-5-17*". Joseph Walters' Commonwealth War Graves Register records him as; *Date of Death: 10-5-17. Killed in Action.*

Joseph Walters remains were originally buried in Acheville Road Cemetery, and later exhumed and reburied in Lievin Communal Cemetery, 2 miles W.S.W. of Lens. Not long after Joseph's death, his parents Jacob and Anna Walters were residing in Clover House, Rochester, New York, U.S.A. Joseph Walters, 22, is buried in Lievin Communal Cemetery Extension, Pas de Calais, France, Grave III.A.16. In November 2019, his name along with 25 others was added to the Sarnia cenotaph, engraved in stone to be remembered always.

WATSON, Edward Phillip (#3131744)

American born Edward Watson, 22, was living in Sarnia with his parents and only brother when he was drafted for military service. Seven months after being called to service, he was fighting in the last great and costly campaign of the war. He was killed in action five weeks before the Great War came to an end and is buried in Sancourt British Cemetery, Nord, France. His parents commemorated his sacrifice locally in Lakeview Cemetery and Parker Street United Church.

Edward Phillip Watson was born in Flint, Genesee County, Michigan, USA, on July 8, 1895, the youngest son of Edward Proctor Watson Sr. and Ella (nee Barron) Watson. On January 21, 1893, twenty-three-year-old tinsmith Edward Watson Sr. (born May 29, 1869 in Sarnia) married twenty year-old Ella Barron (born February 26, 1872 in Sarnia) in Port Huron, Michigan. Both Edward Sr. and Ella were residing in Sarnia at the time. Edward Sr. and Ella Watson were blessed with two children together: Harold Barron Watson, born March 24, 1893, and Edward Phillip Watson Jr. Though Edward Sr. and Ella Watson were both born in Sarnia, their two sons were both born in the USA.

In 1901, the Watson family in Sarnia included parents Edward Sr. (age thirty-one) and Ella Watson (age twenty-eight); and their two boys eight year-old Harold and five year-old Edward Jr. Father Edward Sr. supported his family working as a tinsmith at the time. Ten years later, in 1911, the Watson family was living at 146 Watson Street, Sarnia and included; Edward Sr. (employed as a tinsmith at Goodisons) and Ella Watson; and their two boys Harold (age seventeen, a book seller) and Edward Jr. (age fifteen, an express clerk).

In Europe, with the Canadian troops thinning at an alarming rate and no end to the war in sight, the government instituted the Military Service Act in 1917. Twenty-two-year-old Edward Watson Jr. was drafted under the Military Service Act of 1917, Class One. He underwent his medical examination in Sarnia on November 6, 1917 and was called to service on January 9, 1918, reporting to the 1st Depot Battalion, Western Ontario Regiment in London, Ontario. He stood five feet ten and three-quarter inches tall, had grey eyes and dark brown hair, was single, and lived at home with his parents on Watson Street at the time. He recorded his trade or calling as hammer operator, and his next-of-kin as his father Edward Sr. of Watson Street, Sarnia.

On February 21, 1918, Edward Watson Jr. embarked overseas from Halifax bound for the United Kingdom aboard the *SS Cretic*. He arrived in England on March 4, 1918, and the next day, was taken on strength into the 4th Canadian Reserve Battalion at Bramshott. Five months later, on August 18, 1918, Private Edward Watson Jr.

proceeded from Camp Witley bound for France, becoming a member of the Canadian Infantry, 1st Battalion, Western Ontario Regiment. He arrived at the Canadian Base Depot in France on August 20, 1918, and three days later, arrived at the Canadian Corps Reinforcement Camp (CCRC). Twelve days later, on September 1, 1918, Edward Watson joined the 1st Battalion in the field at the Front.

Private Edward Watson Jr. was soon immersed in the final great campaign of the war. The **Hundred Days Campaign** (August 8 – November 11, 1918 in France and Belgium) was the “beginning of the end” of the Great War. Canadians were called on again and again over the three-month period to lead the offensives against the toughest German defences. The series of victories repeatedly drove the Germans back, culminating in Germany’s unconditional surrender on November 11, but it came at a cost of almost 46,000 Canadians killed, wounded and missing.

The first offensive in the Campaign was the Battle of Amiens (August 8-14, 1918), a truly all-arms battle, one that all four Canadian divisions would be involved in. Over the course of one week, in a battle that British Field Marshal Douglas Haig called “*the finest operation of the war*”, the Canadians would advance nearly 14 km. The second offensive in the Campaign was the Battle of Arras and Breaking the DQ Line (August 26-September 3, 1918), where Canadians were part of a spearhead force tasked with crashing one of the most heavily fortified positions, the Hindenburg Line. General Sir Julian Byng called the Canadian victory at Arras and the DQ Line “*the turning point of the campaign*”.

The third offensive in Canada’s Hundred Days Campaign was the **Battle of Canal-du-Nord and Cambrai** in France (September 27-October 11, 1918). Against seemingly impossible odds and a desperate, fully prepared enemy, the Canadians fought for two weeks in a series of brutal engagements. They successfully channeled through a narrow gap in the canal, punched through a series of fortified villages and deep interlocking trenches, and captured Brouillon Wood and the city of Cambrai. General Arthur Currie would call it “*some of the bitterest fighting we have experienced*” and victory came at a cost of 14,000 Canadian casualties.

Private Edward Watson Jr. of the 1st Battalion lost his life during this third offensive in France. Exactly one month after arriving at the front, on October 1, 1918, he was killed in action. His loss was originally recorded as, *Reported missing after action October 1st, 1918*. In mid-October 1918, his parents Edward Sr. and Ella in Sarnia received information from the War Office that their youngest son, EDWARD WATSON, HAS BEEN OFFICIALLY REPORTED MISSING. By the end of that month, Private Edward Watson Jr.’s death was officially recorded as, *Previously reported missing, now reported killed in action October 1st, 1918*. His Commonwealth War Graves Register records him as; *Date of Casualty: 1-10-18. Reported from Base Missing. Now Killed in Action. Buried Sancourt British Cemetery, 10 ¾ miles S.E. of Douai, France*.

Approximately five weeks after Edward Watson’s death, the Great War came to an end. Edward Watson Jr., 23, is buried in Sancourt British Cemetery, Nord, France, Grave I.C.5. In Lakeview Cemetery in Sarnia, there is a memorial grave marker in honour of Edward Watson. The marker reads: IN MEMORY OF EDWARD PHILIP WATSON 1895-1918 PTE. 1ST BTN. W.O.R. FELL AT CAMBRAI OCT. 1, 1918 BURIED IN SANCOURT BRITISH CEMETERY FRANCE ‘FAITHFUL UNTO DEATH I WILL GIVE THEE A CROWN OF LIFE’.

On September 23, 1920, Edward Jr.’s twenty-seven-year-old brother Harold Watson married thirty-two-year-old Alice Victoria Millard (born November 6, 1887 in Sarnia) in Sarnia. In 1921, parents Edward Sr. (a tinsmith with Imperial Oil) and Ella Watson, along with their son Harold (a meter reader) and his wife Alice Watson were residing together at 147 Watson Street, Sarnia. Seven years later, in 1928, a stain glass memorial window was unveiled in Parker Street United Church in Sarnia to commemorate the sacrifice made by Private Edward Watson. The inscription at the base of the window reads, *In Loving Memory of Pte. E.P. Watson Killed in Action on Oct. 1, 1918*. The window is still there today, in what is now called Lighthouse Community Church. Parents Edward Sr. and Ella Watson, along with their son Harold and his wife Alice Watson, are all buried in Lakeview Cemetery in Sarnia. SOURCES: A, B, C, D, E, F, L, N, 2C, 2D, 2G, 7C, 8X, 8Y, 10Z

WEATHERILL, Bertrand Peter (#123146)

Bertrand Weatherill was twenty-two years old in September 1915 when he made the decision to serve his country. His older brother enlisted soon after and together, they embarked overseas and arrived in France in the same battalion. Both brothers were soon fighting in one of the most atrocious battles of the war. Approximately one year after enlisting, Bertrand was killed in action on the Somme battlefield. The twenty-three-year-old has no known grave but is memorialized on the Vimy Memorial, Pas de Calais, France.

Bertrand Peter Weatherill was born in Oil City, Lambton County, on November 8, 1892, the youngest child of Robert Weatherill Sr. and Laura Louisa (nee Keating) Weatherill. On June 22, 1887, thirty-one-year-old Robert Weatherill (born September 1854 in Toronto) married twenty-three-year-old Laura Louisa Keating (born September 12, 1863 in Oil Springs) in Oil City, Lambton, Ontario. Robert and Laura Weatherill were blessed with three children together: Helen Eskelly Mitchell (born March 13, 1888); Robert Jr. James (born September 9, 1889); and Bertrand Peter.

In 1891, the Weatherill family was residing in Enniskillen, Lambton East-- parents Robert Sr. (a storekeeper) and Laura Weatherill, along with their children Helen (age three) and Robert Jr. (age one). Robert Weatherill Sr. was a merchant in Oil City before engaging in a brokerage business, and later in fruit farming. Tragedy hit the family eight years later when they suffered the loss of Robert Weatherill Sr. (Bertrand was not quite seven years old). On September 20, 1899, forty-four-year-old Robert Sr., father of three, passed away on his farm from the effects of septicemia (blood poisoning).

In the spring of 1901, thirty-seven-year-old widow Laura Weatherill was raising three young children on her own, thirteen year-old Helen, eleven year-old Robert and eight year-old Bertrand in Plympton, Lambton West. On December 16, 1901, Laura remarried, to fifty-nine-year-old widower John Palmer Jarman (born October 1842) in Huron County. Ten years later, in 1911, the family was residing in Plympton Township--parents John (a farmer) and Laura Jarman; along with their children Robert Jr. (a bank clerk), Helen (a school teacher) and Bertrand Weatherill (a farmer); along with a farm labourer, George Laugman (born 1885 in England, had immigrated to Canada in 1911).

Bertrand's older brother, **Robert Jr. Weatherill**, also served in the war, enlisting less than two months after Bertrand had enlisted. Twenty-five-year-old Robert Weatherill enlisted with the 45th Overseas Battalion of the Canadian Expeditionary Force (CEF) on October 29, 1915 in Swan River, Manitoba. He stood five feet eight inches tall, had blue eyes and brown hair, and was single at the time. He recorded his trade or calling as bank clerk, and his next-of-kin as his mother, Mrs. L.L. Jarman in Wyoming, Ontario. Less than four months later, Robert was transferred to the 70th Battalion, CEF, the same battalion as his brother Bertrand. Private Robert Weatherill embarked overseas with his brother Bertrand aboard the *SS Lapland* on April 24, 1916, arriving in England on May 5, 1916. Robert was hospitalized for five days that first month due to influenza. One month later, Robert Weatherill was transferred to the 58th Battalion along with his brother, and together they arrived in France on June 19, 1916. Both brothers were soon fighting in one of the most atrocious battles of the war—the Battle of the Somme.

On two occasions, five days in August 1916, and six days in November 1916, Private Robert Weatherill was hospitalized in France due to PUO (pyrexia - of unknown origin fever of an undetermined cause). Approximately seven months after arriving in France, on January 8, 1917, Robert was promoted in the field to Sergeant. Three months later, in early April 1917, Robert was transferred to England with a view to obtaining a commission and was posted to 2nd Central Ontario Regiment Depot (CORD) in East Sandling. On July 1, 1917, he was a Lieutenant, a member of the 8th Reserve Battalion in Shorncliffe. In early September 1917, he was seconded for duty with the Royal Air Force (RAF), attending the Royal Flying Corps School of Aeronautics in Reading. The Great War ended in November 1918. Lieutenant Robert Weatherill remained with the RAF in England until early May 1919, and then returned to Canada in late June 1919. Robert Weatherill was discharged on demobilization in Ottawa in July 1919. In September 1921, Robert married Elizabeth Marion McKay in Swan River, Manitoba. Robert and Elizabeth had two daughters together. Robert Weatherill passed away at the age of sixty-nine in October 1958 in St. Catharines, Ontario.

Twenty-two-year-old **Bertrand Peter Weatherill** enlisted in the Canadian Expeditionary Force (CEF) on September 7, 1915 in London, Ontario (two months later, his older brother Robert enlisted). Bertrand stood five feet six and three-quarter inches tall, had grey eyes and brown hair, and was single at the time. He recorded his trade or calling as banker, and his next-of-kin as his mother, Laura Louisa Jarman living in Wyoming, Ontario. He also recorded that he had militia experience, serving one year with the Queen's Own Rifles, Toronto. Bertrand became a member of the 70th Battalion, CEF. Two months later, on November 15, 1915 in London, Bertrand was promoted to the rank of Sergeant. Four months later, on March 17, 1916 in London, he reverted to the rank of Private.

The following month, on April 17, 1916, while on his way from London to Halifax, Bertrand was promoted again to the rank of Sergeant. Six days later, he again reverted to the rank of Private at his own request. Bertrand embarked overseas from Halifax bound for the United Kingdom aboard the *SS Lapland* on April 24, 1916, along with his older brother Robert. The two Weatherill brothers disembarked in England on May 5, 1916. Six weeks later, on

June 19, 1916, Private Bertrand Weatherill and his brother arrived in France as members of the Canadian Infantry, 58th Battalion, Central Ontario Regiment. Two days later, on June 21, 1916, Bertrand and his brother arrived for duty at the Front with the 58th Battalion.

Private Bertrand Weatherill soon found himself taking part in one of the most horrendous battle of the war. The **Battle of the Somme** (July 1-November 18, 1916) was one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance about 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties. During the first month of this battle, on July 25, 1916, Bertrand Weatherill was promoted to the rank of Corporal while in the field in France.

The second major offensive of the Somme battle was the week-long **Battle of Flers-Courcelette** (September 15-22). It was here where tanks made their first appearance in the war. The Battle was a stunning success for the Canadians, but the victory came at a cost of over 7,200 casualties. It was during this second major offensive of the Somme battle where Bertrand Weatherill was killed in action.

Approximately three months after arriving in France, on September 17, 1916, Corporal Bertrand Weatherill of the 58th Battalion was killed in action on the Somme battlefield during the Battle of Flers-Courcelette. His loss was originally recorded as: *Reported from Base MISSING since Sept. 17th, 1916*. Days later, his status was changed to: *Previously reported missing, now reported wounded Sept. 25th, 1916*; and later recorded as: *Previously reported wounded, now reported "wounded and missing" since Sept. 17th, 1916*; and finally recorded as: *Previously reported wounded and missing, now for official purposes presumed to have died on or since 17-9-16*. Corporal Bertrand Weatherill's Commonwealth War Graves Register records him as; *Date of Casualty: 17-9-16. Previously reported Wounded and Missing now for Official purposes presumed to have died*.

Bertrand Weatherill, 23, has no known grave. He is memorialized on the Vimy Memorial, Pas de Calais, France. He was posthumously awarded the Victory Medal and the British War Medal. Bertrand Weatherill's name is also included on a World War I memorial tablet in St. Paul's Anglican Church, in Toronto, along with the names of seventy-five other men of that church who lost their lives during the Great War. On the Sarnia cenotaph, his name is inscribed as C. Weatherill.

WESTON, Alfred (#603167)

Alfred Weston, who immigrated to Canada from England, enlisted with the Canadian Over-Seas Expeditionary Force in August 1915, two weeks after he was married. By the end of May 1916, Private Weston arrived in the front lines in France. Unfortunately, he died two months later at the Battle of the Somme, one of the deadliest battles in the history of the Great War. Alfred, 22, had been wounded by enemy gunfire to his stomach and he never recovered. He is buried in Lijssenthoek Military Cemetery, Belgium.

Alfred Weston was born in Birmingham, Warwickshire, England, on August 14, 1893, the son of Thomas William and Florence Emma (nee Wells) Weston. Thomas Weston (born 1861 in Staffordshire, England) and Florence Wells (born 1867 in Worcestershire, England) were married in 1892 in England. Their union produced six children: Charles Thomas (born 1892); Alfred; Arthur E. (born May 6, 1896); Hilda Florence (born October 2, 1897); Horace (born June 22, 1899); William Sayers (born 1904).

In 1901, the Weston family was residing in Aston Manor, Warwickshire. Thomas supported Florence and their five children by working as a hinge finisher. Along with Florence and their children Charles (age eight), Alfred (age seven), Arthur (age four), Hilda (age three), and Horace (age one), was a thirty-nine-year-old boarder, William Wells. At some point between 1901 and 1911, the patriarch Thomas, passed away. In 1911, the Weston family was still residing in Warwickshire, England and, if nothing else, had diverse occupations: widowed mother Florence Weston was a bullet maker; and her children Alfred (seventeen) was a lathe hand; Arthur (fifteen) was a rubber maker; while Hilda (thirteen) and Horace (eleven) were in school, and six year-old William Weston was still at home. In the summer of 1913, at the age of twenty, Alfred Weston immigrated to Canada. He departed from Avonmouth, England aboard the *Royal Edward* and arrived in the port of Quebec on August 30, 1913. Alfred declared his final destination as Toronto, and his intended occupation as labourer.

Over the years, most members of the Weston family followed Alfred to Canada. His mother, Florence Weston, arrived in Quebec alone in June 1914 and ended up residing in Hamilton. Alfred's brother, Charles, had also

immigrated to Canada some time before the war and resided in Sarnia. On August 24, 1914, Charles Weston married Beatrice Hall (of London, England), at St. John's Rectory in Sarnia. The couple returned to England, where Charles served with the British Army during the war. Alfred's brother, Arthur, married Dora Ellen Pugh in July 1919 in England and Arthur and Dora Weston immigrated to Canada two months later. In June 1921, Arthur and Dora were residing at 384 S. Vidal Street, Sarnia, along with his brother Horace Weston, and sister-in-law, Eva Weston. Arthur and Dora Weston had two children together—Alfred Arthur and Norman Weston—and the family later resided in Fort Gratiot, St. Clair, Michigan.

Alfred's brother Horace Weston, had also immigrated to Canada and on December 25, 1920, he married Eva Harriet Pugh (of England) in Sarnia. Horace and Eva Weston were blessed with two children together: Dorothy and Kenneth. Eventually, the family settled in nearby St. Clair, Michigan. Alfred's sister, Hilda, also immigrated to Canada and on April 11, 1919, she married Frank Cooke (of England) in Sarnia. Hilda and Frank Cooke had three children together: Hilda May (born December 1920 in Sarnia); William Edward (born September 1923 in Point Edward); and Frank Thomas Cooke (born July 1929 in Michigan). Hilda and Florence Cooke later resided in Wayne County, Michigan. Alfred's youngest brother, William, also immigrated to Canada. On July 10, 1926, William Weston married Canadian Evelyn F. Carson in Hamilton.

Alfred Weston, now 22, married eighteen year-old Rebecca Jane "Jenny" Baker (born in Harrowgate, England, the daughter of William and Jane Baker) in Sarnia on August 25, 1915. The young couple resided at 337 Mitton Street, Sarnia, but on September 7, 1915, two weeks after getting married, Alfred enlisted in the Canadian Over-Seas Expeditionary Force (CEF) in Sarnia. He stood five feet seven and a half inches tall and had dark blue eyes and light brown hair. He recorded his trade or calling as electrician, and his next-of-kin as his newlywed wife Jennie, who was residing at 337 Mitton Street, Sarnia. Alfred became a member of the 34th Battalion, CEF. Six weeks later and two months after getting married, Alfred embarked overseas aboard the *SS California* as part of the 2nd Canadian Contingent. Alfred Weston arrived in England on November 1, 1915.

Private Alfred Weston

Initially stationed at Bramshott, Alfred was transferred three months later on February 3, 1916, taken on strength into the 23rd Battalion at West Sandling. Three months later, in May 1916, he completed his Military Will (a perforated sheet from his Pay Book) writing, "I, Pte. Alf Weston 603167 E Com, 23 Batt leave everything I possess to my wife Jenny Weston 337 Mitton St. Sarnia Ontario Canada." Days later, on May 25, 1916, Private Weston was transferred to the 2nd Battalion and then proceeded to France. The next day, on May 26, 1916, he was taken on strength into the Canadian Infantry, 10th Battalion, Alberta Regiment.

Private Alfred Weston soon found himself taking part in one of the most horrendous battle of the war. The **Battle of the Somme** (July 1-November 18, 1916) was one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

Approximately two months after arriving in France, on July 31, 1916, Private Alfred Weston was hit by enemy gunfire during the Battle of the Somme and died as a result of his wounds. He was initially recorded as *Dangerously wounded at No. 3 Casualty Clearing Station July 31st, 1916*. That same day, his status was changed to *Died of wounds No. 3 Casualty Clearing Station July 31st, 1916 GSW (Gun shot wound) abdomen*. Alfred's Commonwealth War Graves Register records him as *Date of Casualty: 31-7-16. Died of Wounds. No. 3. Can. Casualty Clearing Station. Burial: Soldiers' Cemetery, Lijssenthoek, 1 ¾ miles S.W. of Poperinghe*.

One year later, in August 1917, the *Sarnia Weekly Observer* included three "In Memoriams" to Alfred Weston submitted by his family members. Following is his wife Jenny Weston's memoriam; *In loving and honoured memory of my dearest husband, Private Alfred Weston, who died of wounds one year ago today, July 31, 1916, "Somewhere in France." Gone but not forgotten*. Alfred Weston's mother, sister and brothers added the passage; *"The Lord said unto him well done, thy good and faithful servant, enter thou into eternal rest."* Alfred Weston's sister, brothers and niece also added the passage:

*And when he saw his work was done,
He gently called to him: My son! My Son!
I need thee for a greater work than this
Thy faith, thy zeal, thy fine activities
Are worthy of My larger liberties.
Then drew him with the hand of welcoming grace
And side by side they climbed the heavenly ways.*

Florence Weston, Alfred's widowed mother, received her Memorial Cross for the loss of her son at her house at 337 Mitton Street, Sarnia. Alfred's widow, Jennie, later remarried becoming Jennie Causley, who resided at 230 South Brock Street, Sarnia. Alfred Weston, 22, is buried in Lijssenthoek Military Cemetery, Belgium, Grave VII.D.16.

WHEATLEY, George Percival (#101577)

In the early 1990s, the city of Sarnia named five streets after five fallen soldiers from Sarnia. Wheatley Drive, located off Michigan Line west of Modeland Road, is named for George Percival Wheatley who was killed in action in the Great War. On January 16, 1917, Private Wheatley of the 102nd Battalion died in the Somme area of France. He had been sent "up top" to take compass readings that would determine the path of the next section of the underground tunnel. Unfortunately, he was spotted by a German sniper who fired the fatal shot. George Wheatley, 37, is buried in Villers Station Cemetery, Villers-Au-Bois, Pas de Calais, France.

George Percival Wheatley was born in Blackwell, in the Township of Sarnia, Ontario on June 28, 1880, the youngest son of Thomas Coulson (a farmer) and Gratia Abigail (nee: Clark) Wheatley, of RR #3 Sarnia. Thomas Wheatley was born in 1841 in the hamlet of Froomefield, a village located just south of Sarnia, which was named after brothers Froome and Field Talfourd, early settlers in the area. George's paternal grandfather was John Wheatley (1815-1891), who was also an early settler to this area. John Wheatley had come from England in 1837 at the age of twenty-two as a fully qualified (7-year apprenticeship) wheelwright or wagon maker. John served in the local militia for two years and married Alvira Proctor (1822-1913), who was also an immigrant. John and Alvira Wheatley were blessed with thirteen children together and George's father, Thomas Coulson, was the oldest, born November 4, 1841 in Moore, Sarnia Township.

Thomas Coulson Wheatley (referred occasionally in records by the initials T.C.), married twenty-six-year-old Gratia Abbie Clark (born 1846, daughter of Peter and Angeline Clark) on July 16, 1872 in Sarnia. Thomas and Gratia resided in the Lakeshore area near Blackwell Station, and they had five children together: their first was a still-birth, Mary Florence (born March 30, 1875); John (born 1876); Thomas Edward (born 1878); and their youngest George Percival. When George was only four years old, his mother, Gratia, died on December 29, 1884. The thirty-eight year old matriarch passed away as the result of exophthalmic goiter (Grave's disease, an endocrine disorder).

Thomas Coulson Wheatley remarried on June 20, 1888 in Sarnia, to Margaret Jane "Jennie" Campbell (born in Dundas in 1851, daughter of John and Margaret Campbell). Thomas and Margaret Jennie Wheatley had three children together: Margaret (born November 1889); and twins Charles Coulson and Addison Campbell (born October 29, 1890). Thomas and his family settled on land between Lake Huron and Wawanosh Swamp (which was later drained). In 1891, the Wheatley household in Sarnia included parents Thomas (a farmer) and Margaret, along with

their children: Mary Florence (age sixteen); John (age fourteen); Thomas Edward (age thirteen); George Percival (age ten); Margaret (age two); and twins Charles and Addison (age five months).

Ten years later, in 1901, the Wheatley household included parents Thomas Coulson (a farmer) and Margaret as well as their children: Florence (age twenty-six, a teacher); George (age twenty, a farm labourer); Margaret (age eleven); Charles; and Addison (age ten). Thomas Wheatley was a skilled, active and very successful farmer and market gardener. He was also a leader in the community; for example, he was a “stand-in” Methodist clergyman and choir leader, and became chairman of the school board (Blackwell School). In 1911, a decade later, the Wheatley household included parents Thomas (a farmer) and Jennie and their children: Florence (age thirty-six, a teacher); Margaret (age twenty-one, a teacher); and twenty year-old twins Charles (a farmer) and Addison (at school) Wheatley.

To earn money for college, George’s eldest brother, John, worked in a lumber camp in Minnesota for a time. John fell in love there with an immigrant Norwegian girl, and they were married in Cookstown, Minnesota on October 4, 1899. George and his older brother, Edward, both attended the wedding in Minnesota, with George acting as the “best man” at the wedding. John and his wife eventually returned to the Sarnia (Blackwell) area, but for brothers George and Edward, the Minnesota trip generated an interest in life out west. This was at a time when the government was offering free or very low price land to young Canadian males as an incentive in order to settle the west.

Edward Wheatley moved to Watrous, Saskatchewan around 1905, and George, at age twenty-five, moved to Alberta about the same time. George took a large piece of land in the Peace River area of northern Alberta, and starting from “scratch”, became a rancher/farmer. When war broke out, George sold his cattle at the end of the season and headed to Edmonton to enlist.

Thirty-five-year-old George Wheatley enlisted in the Canadian Over-Seas Expeditionary Force (CEF) on December 20, 1915 in Edmonton, Alberta. He stood five feet eight inches tall, had blue eyes and light brown hair, was single, and recorded his trade or calling as labourer, and his next-of-kin as his father Thomas Wheatley in Sarnia. George became a member of the 66th Overseas Battalion, CEF. Four months later, on April 28, 1916, Private George Wheatley embarked overseas from Halifax bound for the United Kingdom aboard the *SS Olympic*. He arrived in England on May 7, 1916, and one month later, on June 8, 1916, he was transferred to the 14th Field Artillery Howitzer Brigade. A month passed before he was transferred again, taken on strength into the 9th Reserve Battalion in Shorncliffe on July 6, 1916.

George Wheatley c. 1899

George with nephews Lloyd and Clark – March 1916
(during his last visit to Ed Wheatley’s home near Watrous, Sask.)

A note on George’s two nephews in the above photo: The older nephew Clark died at age ten. The younger nephew, Lloyd, served in World War II, as part of an RAF bomber crew. After his aircraft was shot down over Germany, Lloyd was captured and spent the rest of the war as a POW. He survived the war and returned to Canada.

A little over one month later, in August 1916, George was transferred again, to the 102nd Battalion, British Columbia Regiment. He crossed the Channel with that unit, arriving at Havre, France on August 20, 1916. When he completed his Military Will, he bequeathed all of his property and effects to his brother, Edward, in Dellwood, Saskatchewan, including his bank account in the Bank of Commerce in Watrous Saskatchewan, one saddle and one rifle. By the end of September 1916, Private George Wheatley and the 102nd Battalion, part of the 4th Canadian Division, had arrived at the Front Lines.

George Wheatley soon found himself taking part in the Battle of the Somme (July 1-November 18, 1916)—one of the bloodiest and most futile battles in history. The Somme battle lasted for more than four brutal months and saw the Allies advance around 10 kilometers. A more telling statistic is the number of injuries and deaths: of the 85,000 Canadian Corps, there were more than 24,000 Canadian casualties.

Approximately one month after arriving in France, on October 22, 1916, Private George Wheatley suffered a gunshot wound to his face (nose) and one finger on his left hand. That day he was evacuated through an Australian Casualty Clearing Station and then moved to No. 3 Canadian General Hospital in Boulogne. Two days later, he was transferred to No. 7 Convalescent Depot in Boulogne, where he remained until November 9, 1916. George rejoined the 102nd Battalion on November 21, 1916.

It appears that sometime between his being wounded and his return to his unit, George's documents were lost or destroyed; in fact, all the original files for members of the 102nd Infantry Battalion were destroyed, likely either in a fire or by enemy action. All members of the unit went through a new enrolment in France in December 1916. So on December 7, 1916, thirty-six-year-old Private George Wheatley completed a second Attestation Paper with the Canadian Over-Seas Expeditionary Force (CEF). He stood five feet eight inches tall, had blue eyes and brown hair, was single, and recorded his trade or calling as farmer, and his next-of-kin as his father, Thomas Coulson Wheatley, at R.R. #3 Sarnia, Ontario.

On December 23, 1916, George Wheatley and the 102nd Battalion were temporarily attached to 182 Tunnel Company, Royal Engineers. Their work with the engineers involved repairing and building defensive positions, field fortifications, communication trenches and transportation tunnels. The tunnels were used, for example, to bring ammunition forward and the wounded back to medical facilities. The engineers of the Tunnel Company provided the knowledge and leadership, while the infantry provided the labour. As the Canadians made preparations for the upcoming offensive at Vimy Ridge in April 1917, much of the work was done at night under the cover of darkness, while under enemy fire.

On January 16, 1917, Private George Wheatley of the 102 Battalion was killed in action in the Somme area of France. He had been sent "up top" to take compass readings that would determine the path of the next section of the underground tunnel. Unfortunately, he was spotted by a German sniper and killed. His body was buried the next day. George's Commonwealth War Graves Register records him as *Date of Casualty: 16-1-17. Killed in Action. Buried: Villers Station Military Cemetery, 1 mile N.W. of Villers-au-Bois, 3 ¼ miles S.W. of Aix-Neulette.*

The 102nd Battalion went on to distinguish itself in the fighting at Vimy Ridge in April 1917 and lost most of its men in the process. After the war, surviving members of the battalion erected a memorial on Vimy Ridge on which were recorded the names of unit members who had been killed or who had died from wounds received during the war. (NOTE: a number of battalions erected memorials at Vimy Ridge to commemorate their fallen comrades). Several years later, after the Government of Canada decided to construct a National War Memorial on Vimy Ridge, all unit memorials were ordered removed from the Ridge. The 102nd Battalion's memorial was dismantled, transported to Canada, and re-erected in a place of honour. For many years it was at Canadian Forces Base at Chilliwack, British Columbia, and when this base closed, the plaque was moved to an armoury in Kamloops, British Columbia. George Wheatley's name is included on that memorial plaque.

George Wheatley, 37, is buried in Villers Station Cemetery, Villers-Au-Bois, Pas de Calais, France, Grave VI.A.17. George's father, Thomas Coulson Wheatley, passed away only eight years later, on March 28, 1925 in Sarnia, at the age of eighty-three.

George Wheatley's stepbrother, Charles Wheatley, 27, was drafted to serve in the war under the Military Service Act of 1917, Class One. In Europe, with the Canadian troops thinning at an alarming rate and with no end to the war in sight, the government had instituted the Military Service Act in 1917. Charles Wheatley underwent his medical examination in Winnipeg, Manitoba on November 16, 1917, and was called to service on January 5, 1918,

reporting to the 1st Depot Battalion, Manitoba Regiment in Winnipeg, Manitoba. He stood five feet six inches tall, had blue eyes and red hair, was single, and was attending Manitoba Agricultural College in Winnipeg at the time. He recorded his trade or calling as farmer, and his next-of-kin as his father, Thomas C. Wheatley, who was residing at R.R. #3 in Sarnia, Ontario. Charles also recorded his birthdate as October 29, 1889, making himself one year older than he actually was (his birthdate was October 29, 1890). Private Charles Coulson Wheatley did not go overseas, and in late January 1919, he was struck off service in Winnipeg on demobilization.

In Sarnia, George Percival Wheatley is memorialized by the naming of a street after him—Wheatley Drive. Louis Bratanek, a local developer, was responsible for naming the street in 2005, coinciding with the Year of the Veteran. In that year, Sarnia City Council asked Bratanek if he would consider naming a street he was currently developing off Michigan Avenue after a local fallen soldier. Bratanek agreed and when he read the list of Sarnia's fallen, he saw the name "G. Wheatley" and knew he'd found his street name. Bratanek had no idea who G. Wheatley was but he recognized the surname Wheatley. Over three decades earlier, his father had purchased a farm in Blackwell from Abigail Wheatley, a market gardener. As it turned out, Abigail was George's niece who was a teenager when her uncle was killed in war nearly nine decades earlier.

WILKINSON, W. – No information found in searched records links this name to Sarnia.

WILLIAMS, Frederick James (#2448462)

On July 10, 1917, at age forty-two, Frederick Williams enlisted in the Canadian Over-Seas Expeditionary Force in Windsor, Ontario. He was much older than the average soldier and Eve, his wife of twenty-five years, and he had been blessed with three children together. Still, Frederick felt compelled to enlist and saw action in France. At the Battle of Amiens, enemy fire hit him in the abdomen and right leg. Despite the doctors' best efforts, Frederick died nearly two months later and one month before the end of the Great War. Frederick Williams, 43, is buried in Mont Huon Military Cemetery, Le Treport, Seine-Maritime, France.

Frederick Williams was born in Sarnia, Ontario on December 6, 1874, the son of David J. and Melissa Ann (nee Finch) Williams. On September 9, 1871, twenty-two-year-old David Williams (born 1846 in Wales) married twenty-one-year-old Melissa Finch (born January 1951) in Port Huron, Michigan (they were both residing in Sarnia at the time). David and Melissa Williams had nine children together: Ella M. (born May 1870); Charles Herbert (born June 16, 1872); Frederick James; Frank B. (born March 2, 1877); Arthur David (born March 11, 1880); Elmer Clarence (born April 25, 1882); Mabel Alice (born March 10, 1885); George H. (born October 15, 1887); and Gordon W. (born May 16, 1890).

In 1881, David, a labourer, and Melissa Williams were residing in Sarnia with their five children: Ella (age eleven), Charles Herbert (age eight), Frederick James (age six), Frank (age four) and Arthur David (age one). Ten years later, in 1891, the Williams household in Sarnia included parents David, now a farm labourer, and Melissa and eight of their children: Charles (age nineteen, a farm labourer); Frederick James (age sixteen); Frank (age fourteen); Arthur (age eleven); Elmer (age nine); Mabel (age six); George (age three); and Gordon (age one).
