

FAIRBANK OIL FIELDS

The County of Lambton and Fairbank Oil Fields have applied to Parks Canada for the Oil Springs Industrial Landscape (OSIL) to be included in Canada's Tentative List for World Heritage Sites.

Already a National Historic Site, the "Oil Springs Industrial Landscape" includes the Fairbank Oil Fields property and the County's Oil Museum of Canada site, which are both located south of the Village of Oil Springs in Lambton County. The Fairbank Oil Fields property consists of 350 wells spread over more than 600 acres which are still commercially pumping oil using authentic 19th century technology.
